Nu-i de mirare că mă confruntam agasant cu pulsaţiile unui zgomot devorator, îndoiala de a aduna într-un tot organic forţa de atracţie a unor elemente subiective ce îmi rezervau privilegiul de a respira acea vrajă imbatabilă a trăirii dincolo de limitele percepţiei clasice, în perimetrul gândurilor întâmplătoare. Toate se aflau în relaţie cu un tonifiant sentiment de linişte, confort, reverie, ca pecete a conexiunilor eterne cu esenţa unei bijuterii fine numită "tehnică de simbolizare", care transcende timpul şi spaţiul.

Această misterioasă îndeletnicire a fost în cele din urmă asociată cu o mică punte suspendată peste distanţa ce mă desparţea de credinţa omului de ştiinţă, ca atunci când eşti în căutarea unui lucru imposibil de prezis, fiindcă nu mai credeam în inteligibilitatea lumii supusă cercetării, bazată pe observaţie directă şi formule empirice.

De asemenea, încercam să mă dispensez de culorile faţadei moderne şi sigure ale artei văzute prin ochiul unui fotograf, gândurile alunecându-mi doar spre acea simţire a necuprinsului unor învălmăşiri cosmice, îndemnând condeiul să surprindă momente de visare, încât să învăţ a trăi din frânturi de inspiraţie la fel cum un seducător poate trăi toată viaţa lui din seducţie.

Înainte de a obţine accesul la universul simbolic al unei opere a cărei conştiinţă este pregătită să descopere amprenta absolutului, lucrând în real prin puterea charismatică, trebuie să guşti din nebunia lui Don Quijote. Apoi trebuie să accesezi alchimia izvorâtă din cercetările de laborator ale lui Paracelsus, din care să extragi "radicalul liber" plasat în centrul compoziţiei unei formule exprimate prin raţionamente abstracte.

Avântul spre cunoaşterea cea mai înaltă, ştiinţa raportării la abscons, gândirea dublă, atingerea fazei definitive de *coincidentia oppositorum* , reflecţia infinită pe care o implică "magia anamorfotică" produsă de oglinda unei alte lumi, toate acestea nu pot face un pas uriaș înainte dacă nu se găsește mereu un alt continuator al Marii Opere !

Leadership: Ai nevoie de "Altceva-ul" nealterat care există în adâncul fiinţei tale, încorporat chipului pe care îl porţi prin creaţie, spre a putea asigura o vizibilitate optimă mesajului pe care îl transmite arta ta?

Iar dacă vă întrebaţi cum s-a produs în mintea mea acest plan de arhitect care îşi construieşte opera de artă a propriei vieţi prin fracţionarea omogenităţii unui univers văzut figurativ, dovedind din plin un fin şi pătrunzător spirit de observaţie, atunci trebuie să aveţi în minte portretul marelui politician Talleyrand, aşa cum îl construia Jean Orieux:

"Privirea lui e tot ce există pe lume mai impenetrabil, priveşte drept înaintea lui, dar cel care-l priveşte nu poate să-şi dea seamă dacă-l vede. Puterea noastră de pătrundere e prea mică, experienţa noastră e prea sărăcăcioasă, imaginaţia noastră e prea limitată ca să ne putem face o idee suficientă despre o asemenea fiinţă. Acesta este efectul pe care-l va produce într-o bună zi asupra istoricului, care va putea să găsească un ajutor preţios în portretul acesta. El posedă calităţile superioare şi modestia geniului în faţa unui geniu de altă factură."

Cine le face pe toate cu măsură? Cine poate să creeze un asemenea mister ce stârneşte o anumită seducţie şi captează un anumit interes, apelând la jocurile minţii sub măsura sensului atribuit mariajului dintre sublim şi efemer, dintre incognoscibil şi simbolizare?

Acesta nu poate fi decât un artist emblematic al artei realist-figurativă, aventurat într-o relaţie cu acea doză de incertitudine semantică ce caracterizează textul sacru, un fel de Pigafetta care se împacă mai curând cu liniştea încăperilor închise şi a cărţilor tăcute, decât cu sabia scoasă în mijlocul încăierărilor de sentimente şi indiscreţii pe care le pun la dispoziţie revelaţiile lumii reale.

Ca să priveşti lucrurile din perspectiva artei, învaţă să pătrunzi misterul unui portret adâncindu-te în detaliile unei fiinţe imaginare.

Formula misterului, creat în mijlocul unui eveniment aparent verosimil, precum istoria unui portret într-o oglindă care ne ispiteşte într-un univers imaginar dincolo de cel reprezentat, este rezultatul unui act de comunicare în care însăşi Dumnezeu, infinitul suprem, îi dezvăluie omului secretul care este în același timp o revelație a esenței sale ascunse în tot şi în toate.

Altceva-ul este proiecţia Eului care spune "Da" schimbării vederii formelor "divine" care stau la baza lumii vizibile şi îi dă viaţă. Reprezintă acea simţire a biruinţei de a exprima absconsul, contradictoriul, metafora obscură, simbolizând pătrunderea în contrapartea de umbră, labirintică, a omului.

Misterul artei care îşi caută înţelesul se regăseşte în prim planul curiozităţii de a afla lucruri noi, punându-le la îndoială pe cele imaginate, culminând cu încercarea de exprima prin antiteza lor o nouă realitate.

Misterul de nepătruns al cumpănirilor sorţii

On Aprilie 11, 2014

Reglează cu mare precizie înălțimea morală şi sufletească a omului, pentru a-i anula statusul de jucător slab.

E vorba aici numai de o părere personală. Ca să spunem însă tot ceea ce gândim, credem că Jean Valjean, în starea sufletească în care se afla când a început s-o iubească pe Cosette, a avut nevoie de înviorarea asta pentru a nu se mai abate de la calea binelui. Avusese prilejul să vadă sub multe aspecte ticăloşia oamenilor şi mizeria societăţii, aspecte fragmentare şi care, negreşit, nu arătau decât o parte a adevărului. Îl năpădiseră alte amărăciuni. Dezgustul şi oboseala puneau iarăşi stăpânire pe dânsul.

*Cine poate şti dacă Jean Valjean nu era pe cale de a-şi pierde curajul şi de a se prăbuşi din nou? Iubea şi se simţea din nou tare. Vai, nici el nu era mai sigur pe picioare decât Cosette ! El îi dădea sprijinul lui, iar ea îi dădea puterea. Prin el, ea izbuti să-şi facă drum în viaţă. Prin ea, el izbuti să rămână om de treabă. El i-a călăuzit paşii. Ea i-a înseninat zilele. O, mister dumnezeiesc şi de nepătruns al cumpănirilor sorţii ! **

Leadership: Ce fel de om ai fi dacă nu ai cunoaşte umbra vieţii, referitor la un mod de a te diferenţia de vechiul tău model de personalitate prin efectul unui eveniment special datorat destinului?

Reconstituirea la rece a lumii "pierdute" cu care omul s-a confruntat, a acelor vremuri tulburi care au necesitat alegeri complicate şi dureroase, din perspectiva unicităţii, dar mai ales a rezistenţei pe care o măsoară numai sufletul, într-o evidenţă nerostită, dar asumată şi deopotrivă acceptată, întăreşte prezentul şi îl înalţă. Destinului lui Jean Valjean a potrivit întâlnirea unui aşa zis răufăcător cu un suflet nevinovat de copil, ceea ce a determinat forţa acţiunii de a da voie lucrurilor să se petreacă după o raţiune mai înaltă, acea raţiune de a putea interpreta trecutul printr-un plus de semnificaţie într-un prezent glorios.

Leadershipul vizează schimbarea de sine într-un cadru de respingere a oricărei vinovatii sau tensiuni, motivând acea sete nepotolită de a controla realitatea unei noi abordări a vietii. Este o reflectare a înălțimii morale şi sufleteşti, maxime sau minime a omului, datorată separării de trecut, la care el poate ajunge în stadiul de evoluţie.

Leadershipul este un nucleu central, alcătuit din materie imperfectă, care va deveni energie, venind spre tine din alte direcţii. O energie luminoasă care te face să te deschizi în faţa vieţii după ce ai trecut prin multe încercări şi experienţe. Căci este foarte greu să te ataşezi de un model de " *a fi* " care să te motiveze, după ce gândirea ţi-a fost alterată de o poziţie de inferioritate, de statusul „jucătorului" slab care credeai că eşti pe terenul vieţii.

Ce fel de om ai fi dacă nu ai cunoaşte umbra vieţii, istoria trecutului? Căci numai datorită ei poţi privi lucrurile ca atare, mai în ansamblu, mai în profunzime, mai avansat decât dacă nu accepţi grija ta faţă de ea.

Iar umbra aceasta resimţită prin efectele directe pe care le propagă pe toată orizontala vieţii, suflând peste propria ta fire şi peste propria ta realitate cu tăria unui uragan pentru care nu există bariere, ci doar consecinţe, conduce la dependenţa totală de o altă variabilă, cum ar fi ataşamentul faţă de o persoană specială. Care, la rândul ei, generează o putere superioară, o viziune mai clară, acoperită cu blândeţe şi lumină, care se suprapune peste atribuțiile și obiectivele tale inițiale.

Leadership: Poţi să te reformezi prin transfer de energie la nivel de schimbare a întregii stări sufleteşti într-un context de tipul "Remind yourself in all those things that weren't supposed to happen" ?

Dar cine își poate demonstra calitatea și originalitatea modelului de lider prin oportunitatea prezentată jucătorului de a-și asuma un rol activ în scenariul vieţii?

Exact când eşti pe cale de a-ţi pierde curajul şi de a te prăbuşi definitiv, ceva sau cineva te pune pe picioare, devenind stăpânul formei întruchipate în tine, sclipirea de geniu care de sens noii tale identităţi. Îţi reformează relaţia cu viaţa în alte condiţii, în imediata vecinătate a leadershipului care într-adevăr dezvoltă spiritul colaborativ.

Asta înseamnă că te-ai reformat după negocierea între un acord parţial cu viaţa, bazat pe un trecut apăsător, şi unul total conectat la prezentul pe care îl trăieşti prin “transfer de energie" dinspre ceva sau cineva, care îţi aduce împlinirea.

Leadershipul surprinde acea raţiune a existenţei de a putea interpreta trecutul în mod corect, prin prisma faptului că eşti în stare să uiţi că ai fost odată în stare să faci ceva mai prejos de demnitatea şi conştiinţa ta.

Omul are dreptul moral să se reformeze, să se îndrepte, chiar şi atunci când singura lui vină s-a datorat forţei fatidice a sorţii ce împiedică fericirea să-şi atingă scopul.

Misterul de nepătruns al cumpănirilor sorţii reflectă acea formă de cunoaştere peste înţelegere, primitoare, doar cu acumulare de tendinţe, cuprinsă în situaţii concrete, obţinută fără ajutorul raţiunii, ci doar pe cale sufletească, care dezvoltă sentimentul de bucurie ce întregeşte omul şi realitatea sa.

Misterul din spatele rândurilor

On Ianuarie 31, 2018

Începe să culegi roadele străduinţelor tale de-o viaţă, în măsura în care reușești să tragi învățăminte din informaţia trunchiată aşezată în faţa ta.

– Am sorbit răzbunarea pe îndelete, în bezna celulei şi în deznădejdea captivității, spuse abatele Faria. Dar acum, când am iertat lumea din dragoste pentru tine, acum când te văd tânăr şi ai viitorul în față, acum când mă gândesc la fericirea pe care poate să ţi-o aducă o asemenea destăinuire, mă înfioară întârzierea şi tremur la gândul de-a nu dărui unui stăpân atât de vrednic ca tine, bogăţiile tăinuite în pământ.

Edmond Dantes întoarse capul, oftând.

– Văd bine că tot nu mă crezi, Edmond, continuă abatele. Oare glasul meu nu te-a convins deloc? Văd că trebuie să-ţi dau dovezi. Iată, citeşte hârtia asta, pe care n-am mai arătat-o nimănui.

Şi luând hârtia, din care lipsea o jumătate, nimicită fără doar şi poate în vreun accident, Edmond citi următoarele rânduri:

Leadership: Permiţi neglijarea unei anumite părţi din informaţia sursă, în vederea obţinerii unei reprezentări mai compacte a realităţii de care nu te poţi debarasa?

– Acum, ce-ai de spus? întrebă Faria când tânărul termină ce citit.

– Dar nu văd decât rânduri trunchiate şi cuvinte fără șir. Scrisul e întrerupt din pricina vreunui foc şi rămâne nelămurit.

– Ţie, prietene, care-l citeşti pentru prima oară, poate să ţi se pară aşa. Dar mie, care am stat plecat deasupra lui nopți îndelungate, mie care am reconstituit fiecare frază şi am completat fiecare idee, mie mi-a fost dat să găsesc înţelesul care lipseşte. Mai ales ca eu știu povestea acestei hârtii.

Ca o concluzie. Cel ce manifestă o curiozitate asupra necunoscutului, luând în considerare acea caracteristică a cunoașterii concentrată în dictonul *„ Eu sunt lucrul prin intermediul căruia ştiu să-mi ascult raţiunea "*, îşi propune să interpreteze totul din perspectiva certitudinilor pe care le poate descoperi datorită includerii sale într-un context mai amplu de realitate.

Leadership: Ești pregătit să experimentezi o poveste intensă care vine la pachet cu acțiunile unei descoperiri ce își apără certitudinile?

Destinația spre care tinzi, având în vedere memoria plină cu particularități ale unor modele de informație desprinse din fragmentele unor scrieri diferite, din întâmplări reale, din fragmente ale unei realități certe, dar uitate, dispune de o anumită forță legată de nemărginirea unei transcendențe personale ce relevă o întreagă poveste.

Această poveste este trecută cu vederea când uiţi să sapi la rădăcina lucrurilor şi să dai la o parte crusta de neştiinţă ce le acoperă importanţa, când eşti sensibil la stimuli exteriori sau când te laşi purtat de valul nevoilor de moment.

Povestea ne invită în interiorul unui spaţiu închis, dar divers, un decupaj dintr-un continuum care se întinde până la nivelul de înţelegere al fiecăruia, mult mai adânc decât totalitatea infinită pe care o exprimă parcursul simbolic al unei călătorii fără plan ce scoate în evidenţă flexibilitatea de a vizita diverse locuri despre care afli mai multe când te afli în apropierea lor decât la mare distanţă de ele.

Este povestea unei istorii uitate din care decupăm frânturi trecute şi fixate prin filtrul personal al înțelegerii subiective, modelată de propriile valori și de o constantă meditație asupra sinelui și raporturilor cu ceilalți. Povestea unor întâmplări auzite sau citite, din care transpar atât trăirile, cât și diferențele individuale, cu posibilitățile multiple de apropiere între două mentalități care se exclud prin particularităţile de reproducere a realităţii.

Înainte să parcurgi o astfel de poveste, ai nevoie de anumite certitudini referitoare la teritoriul necunoscut în care vrei să pătrunzi, de anumite repere care să-ţi garanteze cumva că există şanse mari ca la sfârșitul călătoriei să te alegi cu o descoperire.

Lipsa curiozității de a afla lucruri noi şi interesante este aidoma unei hârți pe care este marcat locul descoperirii unei realități din care absentezi fiindcă ai omis faptul că poți face parte din planul ei.

Misterul din spatele rândurilor este un adevăr pe care nu reuşeşti să-l vezi din lipsa dorinţei de a parcurge interstițiile care îţi îngăduie să afli ceea ce nu ştii despre tine.

Misterul privirii în roşu

On Iulie 22, 2020

Pictează-ţi viaţa în culorile sufletului, ca o modalitate de exprimare a propriilor trăiri în ansamblul unor învăţături care transcend timpul şi îţi gestionează responsabil destinul.

Nu mai simțisem niciodată ceva asemănător, nimic mai greu de îndurat. Şoapta firavă a emoțiilor mele părea a fi trecută prin comparația cu o colivie mică din aur. Nu mă recunoșteam liber, nu mă recunoșteam deloc. Eram bogat fără să mă recunosc eliberat din lumea imaginarului, ca un duh închis în propria-i sticlă. Cu un singur cuvânt bine ticluit, inspiraţional, flexibil, aş fi putut să mă eliberez total din propria-mi neputinţă, din această izolare de gheaţă care generase un puternic sentiment de singurătate, ca dintr-o poveste cu tâlc care ne precede pe toţi şi care, graţie cărţilor sapienţiale, se actualizează mereu la fiecare generaţie.

Speranţa era tot îndepărtată. Şansa de a fi eu însumi era şi mai îndepărtată. Cuvintele-mi rămâneau în urma conştiinţei care striga în surdină "îndurare". Nici argumentele invocate de estetica artei nu-mi veneau prea mult în ajutor. Şoapta unui trandafir "Double Delight" aflat în preajma mea îmi bucura sufletul mâhnit de atâta zbucium, acordându-se rodului unei noi forme de interiorizare trecută prin creaţia de atelier a unui pictor care nu și-a putut expune la timp pânzele pictate, pierzând șansa de a fi laureat.

Gândurile trecute prin filtrul emoţiilor erau mai mult iluminaţie decât pictură. Privindu-mă cu ochi de sfânt, cu o privire plină de dragoste, trandafirul mi-a împărtăşit o parte din experienţa spirituală întâlnită de-a lungul timpului la ceilalţi oameni care i-au fost aproape, ca pe un fel de traversare a spiritului de la un slujitor al lui Dumnezeu la un gospodar aflat în căutarea sufletului. Şi mi-a vorbit încântător, cu luare aminte, cu glas blând, prin vocea Tânărului Ioannis care pornise cu mult timp în urmă în căutarea lui Dumnezeu:

"Nu vedeam nici o valoare în ce-mi era la îndemână. Cine ştie, poate că tocmai acesta era destinul meu, blestemul meu. Iubirea, ştiinţa, Dumnezeu, toate îmi erau la fel de inaccesibile, pentru că ceva din mine mă împiedica să mă mulţumesc cu ce dobândeau ceilalţi. Nu eram nici bucuros, nici întristat de această descoperire. Melancolia inexprimabilă a inaccesibilului îmi dădea nişte fiori atât de stranii, încât nicio plăcere a simţurilor nu mi se părea că poate egala această voluptate subtilă şi aprinsă."

Leadership: Caracterul mijlocitor al trăirilor tale, repetabile în fluxul liber al conştiinţei, pune accentul pe conceptul de providenţă suverană care îţi scoate în cale momentele şi contextele cele mai potrivite pentru a străluci pe plan spiritual?

Nu mi-e ruşine să recunosc cât de mult mi-au atins aceste cuvinte inima, aducând în prim plan însăşi raţiunea mea de a fi, fiorul sublim al idealului de a mă justifica în ipostaza de erou al unor întâmplări provenite din alte situaţii de viaţă, cu precădere în situaţia unei lipse a posibilităţii de a percepe o poveste dintr-o carte a nemuririi. Trandafirul are darul acesta de a iscodi sufletul omului, de a-i explora mintea, tot atât de bine precum o face pictorul atunci când îşi pavează drumul spre idealul de a face artă din natură.

Sufletul meu, plin de amintiri din altă viaţă, pare a fi rezultatul regăsirii mele într-un corp al naturii. Trandafirul este singurătatea mea, imboldul meu, trecerea mea de la uman la divin. Când sunt privit cu ochi de spirit al naturii, tot atunci când spiritul naturii îmi face plăcerea de a fi în mijlocul oamenilor, înţeleg cât sunt de mic şi de neînsemnat în faţa unei vieţi paralele care pare să aibă secretele ei, intersectându-se cu a mea în creuzetul unei trăiri unice.

Ceea ce am în vedere aici este tocmai deșteptarea ochiului de artist care îşi caută privirea într-o ipostază de contemplator al naturii, fiind capabil să realizeze o retrospectivă a vieții sale complexe, plină de evenimente, ciudat împletite de-a lungul unui vast spaţiu intermediar, dându-şi seama că trebuie să se bucure pe deplin de fiecare dintre momentele sale unice, indiferent cum sunt timpurile.

Dacă cunoașterea și-ar închide ochii, aşa cum florile îşi închid petalele noaptea, atunci ochii nu și-ar mai lărgi privirea spre un tărâm de dincolo de misterios, precum pictura unei poveşti sau a unui vis. Trandafirul este martor la fiecare secundă a vieţii mele trăită prin libertatea de a crede, prin constrângerea unui miracol exterior, a unui nou început, a unui strop de eternă tinereţe, *in necessariis unitas, in dubiis libertas* . Aceeaşi cunoaștere face ca ochii să trezească ceea ce este adormit într-o privire pe care timpul o numeşte *Asphiroderto* , şi căruia eu i-am atribuit semnificaţia de "triumf al jumătăţii sacre".

Leadership: Creaţia ta inspiră fiorul sublim al idealului de a te justifica în ipostaza de erou al unor întâmplări provenite din alte situaţii de viaţă, cu precădere acelea care obligă la anumite concesii din partea ta?

În sfârşit, am înţeles de ce esenţa destinului Tânărului Ioannis este, pe alocuri, însăşi ţesătura destinului meu, asemenea unui drum puţin umblat către tărâmuri îndepărtate, într-o lume care nu obligă arta de a fi părtaşă la metamorfozele evoluţiei Pământului. Fiindcă tot ceea ce trăiesc în prezent trezeşte amintirile unei vieţi pline de patimi şi îndoieli, atât de multe temeri, *un estado deprimente profundo,* din jurnalul unui artist care nu a înţeles niciodată că arta de a fi tu însuţi este reflexia unei oglinzi care măreşte şansa unei vieţi colorată caleidoscopic, variată, plină de aşteptări.

După cum trandafirul compensează cu parfumul său starea de spirit a personalităţi aflate la confluența timpurilor şi mentalităților, tot astfel Tânărul Ioannis şi-a compensat amprenta lăsată asupra lumii cu loviturile unui destin care părea tot mai potrivnic, și asta fiindcă Dumnezeu nu a legat spiritul învățăturilor sale de spiritul de iubire. El a crezut că ştiinţa poate domina totul în lume, oferind lumii întregi spiritul său de consolare și blândețe, de dreptate şi corectitudine. Dar ceea l-a împins spre dezamăgire, chiar spre deşertăciune, a fost incapacitatea de a-şi domoli orgoliul nemăsurat.

Nu lăsa pe nimeni să se joace cu sufletul tău, fiindcă nimeni nu ştie cât de multe a avut îndurat un suflet mare.

Tânărul Ioannis a permis orgoliului, înălţimea aceasta abruptă a spiritualităţii sale, să preia controlul asupra vieţii sale, când mai bine era să lase sensibilitatea atotstăpânitoare să-i conducă gândurile şi simţămintele spre fericirea omenească. Poate că ținea şi el între degete un foarte frumos trandafir de culoarea sângelui proaspăt, la fel ca toţi acei înţelepţi ce au înţeles că viaţa trăită numai în faţa sfinţeniei lui Dumnezeu este o viaţă a cărei flacără a fost aprinsă mai înainte ca ei să realizeze cât sunt de sfinţi.

Eu nu vreau să fiu un sfânt, atât de mândru şi de înţelept, fiindcă inima mea ştie numai semnificaţia trandafirului pe care îl dăruiesc celor ce sunt în stare să dea vieţii mele un sens, şi fericire. Sunt încrezător că sfinţenia mea este o formă a fericirii izbândită prin dăruire şi ambiţie.

Mi-a rămas arta, nimic mai mult decât creaţia, şi mesajul unui artist excepţional: "Fii arta pe care o păstrează în taină creaţia ta". Mai bine este să las arta să-mi conducă sufletul, fiindcă prin pictură îmi exersez sensibilitatea şi tot prin pictură îmi pun sufletul în culoare, pe pânză. Astfel, învăţ să simt emoţia nematerială, acel fior pe care-l simte un trandafir la atingerea unui suprarealism subtil, cu puternice accente de înviorare a sufletului, a minţii şi a spiritului creator.

A străluci pe plan spiritual înseamnă să extragi din înţelepciunea naturii tale, a faptelor şi a emoţiilor tale, acea forţă care poate să dea sens vieţii tale, acea stare de mulțumire sufletească, intensă și deplină, care niciodată nu te limitează, ci te schimbă.

Misterul privirii în roşu poate fi desluşit prin înclinaţia artistului de a surprinde esenţa sufletului omenesc într-un tablou conceput să încânte doar privirile care te răscolesc până în adâncul ființei, acelea care opresc timpul în loc şi te fac să trăieşti nesfârşit anumite momente.

*** Notă:** *In necessariis unitas, in dubiis libertas* . - "În lucrurile necesare, unitate; în lucrurile discutabile, libertate";

Source: https://neculaifantanaru.com/misterul-privirii-in-rosu.html

Miza unui destin

On Ianuarie 04, 2016

Păşeşte pe făgaşul unui spirit mare, măsurându-ţi forţele propriei deveniri după aspiraţiile pe care le dorești concretizate în performanțe durabile.

Trebuia să mă obişnuiesc cu situaţia ireparabilă în care ajunsesem, în ciuda unor ample eforturi de cercetare a propriei lumi ancorată la o regândire a împărţirii prezentului, prin reformularea ecuaţiei de echilibru a elementului finit numit "şansă". Sau noroc.

Totul se interpunea unui peisaj inedit cu încărcătură spirituală, mai amplu creat de intervenția însăși a providenţei, facilitând deschiderea unei acţiuni posesorii asupra actualizării realităţii. Însufleţit de un exces de zel în contextul procesului de adaptare la normele legilor acestei lumi, aşa cum nimeni nu a mai reuşit, am început să ridic ştacheta când circumstanţele au devenit favorabile.

Nu există răsplată sufletească mai mare decât să ştii că eşti favorizat în lupta pentru cucerirea unui vis, spre care tind toate forţele binelui şi ale răului, într-un complex cauză-efect a unui singur efect neaşteptat şi inexplicabil prin intermediul cauzelor cunoscute.

Leadershipul contopește determinarea interioară cu viziunea exterioară, devenind o piatră de încercare ce aduce schimbarea și împlinirea destinului personal.

Un gând răzleţ parcă îmi şoptea, ca o petală de trandafir desprinsă prematur dintr-un boboc ascuns de văzul lumii. Un fior imens mă pregătea de-o revelaţie: *"Mă aşteaptă o noapte înfrigurată, dar a mea brățară ți-o las ţie moștenire ! "*

Constantinopolul a fost piatra de încercare a sultanului Mehmet. Cucerirea acestui oraş a făcut obiectul visurilor lui încă din copilărie. Era ceva între el şi Allah, care îi putea cumva contopi pe amândoi într-un mod unic, într-un singur înţeles. Totodată, prin cucerirea Constantinopolului îşi putea dovedi lui însuşi că este superior tuturor strămoşilor săi.

Degeaba au aşteptat bătrânii înţelepţi ca el să-şi frângă gâtul, ei au murit primii, fără să înțeleagă sensul vieții și ciclurile fiinţei umane. Mehmet a fost acela ce a fost să vie, el a fost omul schimbării, omul viitorului. Timpul ce s-a scurs, de partea lui a trecut. Astfel s-a împlinit profeţia.

Leadership: Poţi vedea într-o lumină nouă sfera totalității unor cauze determinate de "întâmplare", având ocazia să le redefinești dincolo de orizontul evenimentelor decise de Dumnezeu?

Nimic nu rămâne neclintit în faţa unui fulger. Iar loc de a lumina ca un fulger este, desigur, pentru toţi aceia care-şi urmează visurile. Dar aşa cum nimeni nu învaţă să înoate din cărţi, nici visurile nu sunt atinse doar schiţându-le pe hârtie. Mai întâi trebuie să ştii încotro să-ţi îndrepţi atenţia şi cu cine trebuie să te confrunţi. Cu tine, sau cu Dumnezeu? Miza unui destin este lumea. Iar gloria lui e veşnicia.

Esenţa absolută a unei deveniri ale cărei elemente de legătură sunt semnele şi prevestirile, sub influența visurilor direcţionate de o putere mai presus de tine, se extrage din eforturile ample de cercetare a propriei lumi ancorate la o regândire a împărţirii prezentului.

Iar prezentul, din punctul de vedere al conştiinţei care indică adevăratul nivel de pregătire spirituală și intelectuală la care ai ajuns, devine un soi de fereastră spre ceva mult mai cuprinzător decât experienţa de viaţă. Spre un orizont al semnificaţiilor care dau sens existenței. O fereastră deschisă este un triumf al împliniriilor răsunătoare datorate unei dirijări a prezentului reflectat în viitor, numit coinidenţă sau hazard.

Leadership: Încerci să deschizi o fereastră spre ceva mult mai cuprinzător decât experienţa de viaţă?

Prezentul, dobândind prin înţelegerea profundă a fenomenelor ce se petrec în jur semnificaţia de înnoire personală, cultivatoare de principii, valori și cunoştinţe, poate să faciliteze deschiderea unei acţiuni posesorii asupra actualizării realităţii. El se împarte, în contextul procesului de adaptare la normele legilor acestei lumi, în două forţe - una pozitivă şi una negativă, un plus şi un minus.

Prin cea dintâi forță îți poţi dovedi ţie însuţi că eşti superior tuturor celorlalți, prin cealaltă (rezultată din prima) poți extrage acel sens al totalităţii, pornind de la efectele și cauzele iniţiativelor tale.

Leadershipul poate fi prelucrat mai bine în prezent, ca atribut al activelor tale exploratorii - precum interesul acordat unei pasiuni deosebite, sau unui destin individual victorios. Dar el își are rădăcinile în trecutul pe care l-ai construit în favoarea ta, în căutarea unui sens pentru care merită să-ți dedici viața... şi moartea.

Cu fiecare şansă pe care ţi-o oferi ca să te priveşti altfel eşti mai aproape de a-ţi creşte pe termen lung starea de eficientă în raport cu valoarea totalităţii unei anumite fiinţe individuale. Una care există în tot şi se afirmă printr-un instinct de posesiune foarte dezvoltat a cursului vieţii.

Miza unui destin care asumă o istorie, este lumea în care te integrezi mai întâi ca o forță de atracție, apoi ca o forță de reacție, apoi ca forță de ocupație. În final rămâne de stabilit eficacitatea lor în sensul modificării favorabile a evoluţiei lumii.

Citez în încheierea acestui articol descrierea unei cărți, aparţinând poetului Tudor Gheorghe Calotescu, așa cum este prezentată pe site-ul editurii Absolut.

"Istoria clipei" prin raportare la Univers tâlcuieşte viaţa într-o clipă, efemeră şi scurtă. Este o secundă în neant şi un fir de praf în infinit. Totul, viaţa, trăirile, lumea se concretizează de la cunoscut la absolut şi se relativizează reflectând imensitatea într-un bob de rouă, răsturnând Universul peste un micron.

O asemenea istorie este o sedimentare a unor vieţi succesive, a unor retrăiri regăsite în momentele de iluminare în senzaţii, în gândire şi în memoria lumii reflectată în om.

Modul de manifestare al leadershipului

On Aprilie 12, 2008

Felul cum te raportezi la ipostazele în care experimentezi "Drumul Virtuţii" oglindeşte modul în care realizezi conexiunea dintre ceea ce îţi asumi ca datorie şi ceea ce îţi asumi într-o situaţie de ignoranţă.

S-a întâmplat apoi ca un prieten, proprietar al unei fabrici de sticlă din Antwerp, care era foarte gras, să îi ceară lui Butler să îl scape de kilogramele în plus. Irlandezul i-a dat o mică bucată de piatră, sfătuindu-l să o atingă cu limba în fiecare dimineață. După trei săptămâni, am văzut cum irlandezul a slăbit dintr-odată, fără însă ca sănătatea să îi fie afectată. Între timp, am trimis pe cineva la Vilvord, rugându-l pe Butler să îmi trimită un leac pentru o otravă ce mi-a fost dată de un dușman secret. Eram în chinuri groaznice - încheieturile mă dureau teribil, iar pulsul îmi era intermitent, fapt pentru care leșinam foarte des și îmi pierdeam puterea văzând cu ochii.

Butler, care se afla încă în închisoare, i-a spus servitorului pe care îl trimisesem să îi aducă o mică sticlă de ulei de măsline. După ce a atins de ulei pietricica pe care o folosise și înainte, a trimis sticla la mine, dându-i instrucțiuni servitorului să mă ung cu o singură picătură de ulei acolo unde mă doare, sau peste tot, dacă durerea este atât de mare. Am făcut după cum a zis, însă nu am simțit nici o ameliorare. între timp, dușmanul meu se afla pe patul morții și a cerut să fie iertat pentru păcatul pe care l-a făcut asupra mea. Astfel am aflat că fusesem otrăvit, ceea ce și suspectam. Am avut apoi grijă să elimin veninul, ceea ce, cu ajutorul lui Dumnezeu, am reușit.

Leadershipul înseamnă să recunoști că adevărata putere vindecătoare vine din abordarea cauzelor ascunse, armonizând acțiunile externe cu nevoile interne ale ființei.

După ce am mai asistat ulterior la tratarea mai multor femei, l-am întrebat pe Butler de ce acestea au fost vindecate atât de ușor, în vreme ce eu (deși m-am aflat la un pas de moarte și am fost chinuit de dureri groaznice) nu am simțit nici o ameliorare?

M-a întrebat atunci care a fost boala de care am suferit și a înțeles că otrava îmi pricinuise necazul. Mi-a spus că uleiul trebuia luat pe cale internă sau piatra ar fi trebuit atinsă cu limba, fiindcă sursa bolii era în interior. A mai observat și că uleiul nu fusese bine alcătuit, pentru că proprietățile tămăduitoare se aflau numai la suprafață, piatra fiind doar puțin atinsă de lichid. Același om a vindecat și o măicuță, care vreme de optsprezece ani a avut mâna dreaptă umflată, fără să o poată mișca, având degetele foarte rigide. Tămăduirea s-a produs prin simpla atingere a pietrei cu limba.

La aceste miracole au fost martori mulți oameni, iar ei suspectau că se petrece vreo vrajă ascunsă sau vreun meșteșug diabolic. De când lumea, oamenii obișnuiți au prostul obicei de a considera că orice lucru pe care nu îl înțeleg datorită ignoranței lor este opera unui spirit rău.

Leadership: Poţi să justifici concepţia pe care o ai despre înţelegerea obţinută prin descoperirea semnificaţiei valorii şi a integrării informaţiei în contexte aplicabile efectelor lor de tip "feedback" şi, prin urmare, să te justifici în legătură cu ceea ce te face să te simţi superior?

Este de ajuns să vedem ce se întâmplă când încercăm să explicăm o realitate complexă doar din perspectiva unei experienţe de cunoaştere câştigată prin cercetare şi inovare - asta este

ca şi când am încerca să redăm inefabilul viziunii divine. În acest caz, lumea ne va întoarce spatele atunci când încercăm să o ajutăm fiindcă ea crede mai mult în miracole şi în coincidenţe decât într-un capital intelectual facilitat şi susţinut intens de puterea de asimilare a cunoaşterii şi a unor direcţii noi de gândire.

Când doctorul prescrie un medicament, de fapt el apelează la latura lui emoţională, apelează frecvent la fluxul conştiinţei, apelează la subiectul cunoaşterii, la practicile de utilizare ne-abuzivă a informaţiilor privilegiate. Experienţa lui îndelungată, posibilitatea lui de a-şi adânci cunoaşterea de sine într-un mediu prielnic unic, favorabil inovării și schimbărilor, devine rentabilă în momentul în care el găseşte un motiv pentru a experimenta "Drumul Virtuţii" - care începe cu credinţa de a găsi înţelegere şi omenie în fiecare sprijin pe care îl acordă lumii.

Leadershipul atinge o cunoaștere superioară când reușești să fii împăcat cu incertitudinea și să navighezi cu încredere prin complexitatea deciziilor.

Hai să spunem că doctorul este o aducere aminte a minunilor divine traduse printr-o cunoaştere superioară care, culminând cu percepţii suprasensibile, l-ar putea substitui pe Dumnezeu.

Şi chiar dacă nu este împăcat cu tot ce se întâmplă şi îi este greu să ia o decizie, doctorul ştie foarte bine de unde îi parvine toată tematica aspectului care urmează a fi elucidat cognitiv, ştie foarte bine cum să facă pe cineva să înţeleagă necesitatea prioritizării corecte a cerinţelor care definesc un caracter bun, făcându-l unic, statornic, conştiincios şi simţitor. Doctorul se impune printr-un fel de împărtăşire a stării sale de satisfacţie şi împlinire către persoane cu emoţii similare.

Iar prin feedbackul primit de la pacienţi, chiar şi răspunsul lor negativ la schimbare, doctorul îşi justifică concepţia pe care o are despre înţelegerea obţinută prin descoperirea semnificaţiei valorii şi a integrării informaţiei în contexte care leagă activitatea profesională de viaţa cotidiană. O asemenea concepţie la care poate ajunge doctorul poate de felul: *"viaţa este cea care formează conştiinţa, dar conştiinţa se va simţi inferioară atunci când două gândiri se află în opoziție în raport cu obiectul de referință."*

A te justifica în legătură cu ceea ce te face să te simţi superior înseamnă să înţelegi că modul tău de gândire este mai profund şi mai eficient decât al celorlalţi oameni, prin faptul că rezultatele propriilor cercetări şi descoperiri reuşesc să îndeplinească rolul de garant al evoluţiei sustenabile a generaţiilor.

Modul de manifestare al leadershipului poate fi întâlnit pe parcursul avansului cunoaşterii în care se transmit informaţii preţioase referitoare la relaţia dintre adevăr şi realitate, dintre cercetare şi descoperire, dar mai ales referitoare la relaţia dintre fenomene şi cauza lor absolută.

Doctorul este un adept al determinismului nu doar fiindcă reuşeşte să asigure starea de bine a pacienților și să administreze tratamentul adecvat bolilor de care aceștia suferă, ci pentru că insuflă oamenilor setea de cunoaştere, deschidere şi autoperfecţionare. El este un om superior fiindcă ştie să facă diferenţa dintre ceea ce se vede şi ceea nu se vede, dintre ceea ce se întâmplă în realitate şi ceea ce se petrece în mintea oamenilor, dintre ceea ce se întâmplă în mod normal şi ceea ce are să se întâmple după intervenţia lui.

Cele mai importante ipostaze ale doctorului sunt: cea de luptător, în care a clădit și lăsat ceva în urma sa; şi cea de fiinţă neasaltată de spiritul meditativ şi de obsesiile conştiinţei. Drumul virtuţii sale oglindeşte modul în care el realizează conexiunea dintre ceea ce îşi

asumă ca datorie şi ceea ce îşi asumă ca dăruire şi dragoste în situaţia în care ceilalţi oameni dovedesc ignoranţă.

Te poţi afla într-o situaţie de ignoranţă atunci când oamenii nu sunt pregătiţi să facă un pas înainte spre cunoaştere, când ei nu sunt pregătiţi să intuiască faptul că tocmai tu eşti printre puţinii doctori care îşi tratează pacienţii cu respect şi le oferă toate informaţiile şi explicaţiile necesare pentru a face posibilă justificarea cunoașterii empirice şi a implicaţiilor sale etice.

Momentul cheie al regizorului

On Ianuarie 09, 2017

Fii consecvent în a aprecia controlul pe care îl exerciţi asupra artei, determinând în conştiinţa celorlalţi un ansamblu de idei datorită căruia opera poate fi condusă la finalitate emoţională.

"Greva" se născuse din experienţele sale teatrale şi le purta încă amprenta. Această primă operă cinematografică reflectă, ca într-o oglindă - prin răsturnare - producţia de "Măşti de gaz". Dar filmul se încurcă în epavele unei teatralităţi excesive care îi era străină lui Eisenstein. Însă din preocupările specifice ale mizanscenei teatrale din *"Prăpastia"* , *"Ascultă , Moscova ! "* , *"Măşti de gaz"* se născuse o nouă noţiune: mizancadrul.

"Greva" înseamnă începutul montajului eisensteinian. La baza lui, în această fază, stă gândul că alăturarea a două imagini dă naştere la o idee, inedită, întregul creat astfel fiind superior sumei celor două elemente constitutive. Montajul consistă la Eisenstein, în crearea, prin relaţia a două imagini, a unei emoţii-şoc (acordată bineînţeles cu sensul dramatic al acţiunii), pentru a determina în conştiinţa spectatorului o idee şi, apoi, un ansamblu de idei datorită căruia opera poate fi condusă la finalitatea emoţională sau dialectică.

Eisenstein descoperă o întreagă matematică şi fizică a generării emoţiei. Începând această impresionantă muncă de cercetare a propriei sale creaţii, pe care o va continua până la sfârşitul vieţii, Eisenstein descoperă legile intime ale operei de artă. De acum înainte gândirea estetică va merge paralel cu creaţia, devenind, într-o continuă alternanţă, atât explicitarea, cât şi adesea motorul ei. *****

Leadership: Străluceşti prin tot ceea ce ai unic, surprinzător şi inovator înainte de a ajunge la o revelaţie ce are ca prim determinant gândirea estetică plasată în paralel cu crearea unei noi imagini asupra realităţii analizate prin idealul de artist?

Când cauţi să generezi noi emoții prin intermediul muncii de cercetare a propriei creaţii, pe care te poți bizui în procesul dobândirii a noi informaţii și cunoștințe, ajungi inevitabil la o constatare surprinzătoare, la o concluzie neaşteptată. Emoţiile, privite prin prisma muncii de cercetare, sunt cele care susţin fără îndoială legile intime ale creaţiei, fiind superioare prin intensitatea cu care alimentează avântul omului spre țeluri mărețe.

Asta vădeşte, în contextul întăririi rolului de îndrumător al căutărilor de noi forme şi mijloace expresive de regie, principala ta consecvenţă în a îndrăzni lucruri noi în triunghiul momentelor furate de obiectiv, pe care le trăiești printr-o continuitate neîntreruptă a firului narativ. Munca de cercetare a creaţiei, în paralel cu gândirea estetică, trebuie să dea naştere la o imagine care să te reprezinte ca reper principal al unui nou tip de deschidere spre o realitate imediată care pare să fi fost formată special pentru a asigura un rezultat fulminant în materie de receptare a spectacolului teatral, deci pentru a asigura o neclintită convingere despre rolul înălţător al artei.

Montajul, în același timp, este o consecinţă a dezvoltării noţiunilor, conceptelor, ideilor ce derivă din utilizarea acelor constatări care au caracter de experiment și nu respectă procedurile de construcție clasice. Ceea ce implică un anumit grad de raportare la actul de redare a unei scene în particular sau în mod repetat.

Iar regizorul care este consecvent în a aprecia „controlul pe care îl exercită asupra artei”, face cinste leadershipului prin aceea că determină în conştiinţa viitorilor spectatori o idee şi, apoi,

un ansamblu de idei datorită căruia opera poate fi condusă la finalitate emoţională.

Acel izvor nesecat de „întreg superior”, realizat prin lărgirea unei noţiuni care poate să devină prefigurarea precisă a unui moment cheie, este de fapt un efect al includerii continue a trăirii unei opere de artă, a unei imagini despre un eveniment în planul realităţii, în contextul experienţei personale - în a decide ce anume vrei să transmiți.

Adevărata operă de artă este rezultatul conturării unei finalităţi emoţionale, născută dintr-o constatare surprinzătoare, dintr-o concluzie neaşteptată. Iar a trăi opera de artă înseamnă să înduri starea de așteptare și pregătire a inspiraţiei, înseamnă să străluceşti prin tot ceea ce ai unic, surprinzător şi inovator înainte de a ajunge la o revelaţie.

Finalitatea emoţională, ca o scânteie palidă devenită un uriaș incendiu, este reuşita creării unei imagini unice, personalizate, cu efecte directe faţă de posibilul înțeles atribuit noţiunii de „ascultare și transformare interioară”. Este punctul cel mai de sus al unei evoluţii care consolidează versiunea acelui model de trăire sufletească obţinut prin consecvenţa manifestării imaginaţiei și creativităţii.

Momentul cheie al regizorului este asociat cu lărgirea noţiunilor provenite din creşterea consecvenţei în a îndrăzni lucruri noi în construcția montajului, ce culminează printr-o concluzie neaşteptată. Această concluzie este forţa călăuzitoare a inspiraţiei spre conceperea unei noi viziuni.

Monologul lui Edward Prendick

On Februarie 15, 2017

Asumă-ţi dependenţa de a fi străin de ceea ce întâlnești în situaţiile din exterior, încât să identifici mai uşor semnificaţia reală a valorilor „Adevărat" sau „Fals" care susţin o mai bună reprezentare a omului autonom.

Doresc să fiu singur. Din această cauză, trăiesc în apropierea câmpiei întinse. Şi când această umbră mi se aşterne pe suflet, pot să mă refugiez acolo. Câmpia pustie este atunci minunată, sub cerul măturat de vânt.

Cât timp trăiam în Londra, groaza era aproape insuportabilă. Nu puteam să scap de oameni: glasurile lor pătrundeau prin ferestre. Uşile încuiate erau doar o slabă apărare.

Pentru ca să lupt cu închipuirea mea ieşeam pe străzi şi acolo miorlăiau în urma mea femei care îmi dădeau târcoale, bărbaţi înfometaţi îmi aruncau pe ascuns priviri invidioase, muncitori palizi şi extenuaţi treceau tuşind pe lângă mine, cu ochii obosiţi şi cu pasul grăbit. Bătrâni aduşi din spate şi trişti, mormăind, cu totul nepăsători, faţă de grupul zdrenţuros a copiilor care râdeau de ei.

Atunci mă retrăgeam în vreo biserică, dar chiar şi acolo, atât de mare îmi era tulburarea, mi se părea că predicatorul trăncănea "gânduri mari" la fel cum făcea una din creaturile doctorului Moreau, Omul-Maimuţă. Deosebit de greţoase mi se păreau feţele rătăcite şi lipsite de expresie ale oamenilor din trenuri şi omnibuze. Nu păreau să fie semenii mei mai mult decât ar fi nişte cadavre, aşa că nu îndrăzneam să călătoresc, până când nu mă asiguram că eram singur.

Şi mi se părea că şi eu însumi nu eram o creatură raţională, ci doar un animal chinuit de vreo stranie tulburare mintală, care îl făcea să rătăcească singur, ca un cerb care îşi pierde sângele. *****

Leadership: Îţi trăieşti prezentul la valoarea de vârf a unei succesiuni de monologuri, printr-o curioasă psihologie a eliberării de dependenţa în care te afli?

A fi tu însuţi într-o existenţă construită, determinată şi întreţinută de drogul numit „Realitate virtuală" - fără a se produce efectiv decât ca posibilitate de a te salva dintr-o situație în care te simţi incomod şi nemulţumit, este o sursă benefică temporară pentru întărirea stăpânirii de sine. Aici, mă refer la virtutea de a fi împăcat cu tine însuţi, virtutea de a fi suprem, şi nu prin prisma îndrăznelii de a face lucruri speciale, ci prin "sfinţenia" îndrăznelii de a-ţi urma vocaţia în condiţii de lipsă de afectivitate şi nestimulare.

Înainte de a te descoperi în leadership, niciodată întovărăşit de ură sau de interese egoiste, ci de speranța unei lumi mai bune, mai întâi trebuie să devii un cuceritor - să stăpâneşti propria natură inferioară, a propriei instinctualităţi, să-ți stăpâneşti pornirea de a dispreţui și pornirea de a inculca altora propriile tale vederi. Eşti singurul tău aliat în lupta cu strădania de a se scoate în evidenţă legăturile ce se stabilesc între ştiinţă şi descoperire, strădania de a te delimita de orice ar putea să dăuneze aşteptărilor tale la nivel de cercetător, deci trebuie să începi să pui preţ pe controlul gândurilor care te ajută să descoperi misterele posibilităţilor infinite de creaţie.

Adevărul vieții tale, desfăşurat într-un raport complex de evaluare a realităţii, poate fi

adevărul oamenilor care trăiesc în fervoarea vitală a unei deveniri subsumate practicii unei gândiri critice tot mai avansate, a unei ruperi de ritm și echilibru.

În acest caz, dependenţa de a fi străin de ceea ce întâlnești în situaţiile din exterior, în toate cele potrivnice unei dezvoltări favorabile, nu va fi niciodată îndreptată spre o confruntare pe termen lung cu ceilalți oameni. Astfel, se evită receptarea unor valori și concepţii care oscilează compromiţător în jurul „Omului nou", ferindu-te de pericolul de a fi dominat de o clasă individuală inferioară.

Leadershipul priveşte ascuțimea minții, alegerea cugetării pe care ai ales să te reprezinte în totalitate în faţa lumii drept experienţă a unei realităţi care este incontestabil foarte greu de descoperit, deci a unei ealitati care, adesea, devine o provocare sau chiar o dilemă: cât de "departe" poate omul ajunge numai cu gândul şi cu gândirea lui?

Tendinţa de a juca un rol pasiv în planul unei ordini sociale precedă potenţialul de a juca un rol primar, de catalizator al schimbării. De fapt, în planul de ansamblu al schimbării lumii un rol important îl joacă tendinţa omului de a-şi restructura gândirea către un mod de gândire particular, ceea ce are ca prim considerent tăria de a te supune unei realităţi mai profunde, mai vaste, care poate fi descifrată numai prin destinul şi opera unui erou singuratic.

Oamenii cei mai puțin accesibili nu sunt atât de expuşi avalanșei de trenduri care schimbă lumea. Cine își asuma temporar pasivitatea în desfăşurarea raţională a faptelor și evenimentelor, în lipsa bucuriei de a fi în mijlocul lumii, va identifica mai uşor semnificaţia reală a valorilor „Adevărat" sau „Fals" care susţin o mai bună reprezentare a omului autonom şi a unei realităţi modelate de raţiune.

Un asemenea om îşi trăieşte prezentul la valoarea de vârf a unei succesiuni de monologuri, care dezvoltă o psihologie a eliberării de acea dependenţă compromiţătoare: tendinţa de a urma calea aleasă de ceilalți. El nu-şi găseşte libertatea în aspectele exterioare ale lumii vizibile, ci în bogăţia şi adâncimea cugetării, purtând în sine dorinţa continuă de a-şi manifesta esenţa într-o sursă nelimitată de "energie vitală" pentru formarea caracterului.

Caracterul este experienţa pe care o capeţi urmând provocarea realităţii de a se lăsa cunoscută prin posibilităţile tale de a te dezvolta într-un mediu solitar, având astfel posibilitatea de a afla mai multe despre tine, cum ar fi punctele sale forte, punctele slabe, motivaţiile şi înclinaţiile puternice.

Monologul lui Edward Prendick reprezintă punerea în balanţă a unor avantaje și dezavantaje eferente abordării unei realităţi axate pe valorile stabilite de contrastul dintre esenţă și aparenţă. La un asemenea om, adevărul provine din ceea ce simte în interior, iar falsul provine din ceea ce îl leagă de exterior.

Este un început de echilibrare a poziţiei exprimate pe parcursul construirii unei imagini de sine faţă de un anumit punct de referinţă, cum ar fi apartenența la un set de valori care te distinge de alţii, te particularizează prin lipsa ta din mijlocul unei turme care re-acţionează pe baza impulsurilor simţite fără implicarea gândirii.

Monologul este singurul mod de a-ți lămuri poziția și sentimentele privind relaţiile cu cei din jur, generând depăşirea atitudinii faţă de ceea ce nu poate fi constrâns sau eliminat, şi de a începe să faci faţă moral și emoțional unei rupturi de realitatea în care nu tu ești cauza deformării ei.

* Notă: H.G.Well - *Insula doctorului Moreau* , Editura Tineretului 1962.

Monologul omului care îşi târâie bătrâneţea

On Octombrie 15, 2012

Mobilizează-ţi potenţialul de lider spre un alt fel de a fi, fără să te laşi târât înainte de tăvălugul unei evoluţii necontrolate care promovează mediocritatea.

Am fost şerif al acestui district de când aveam 25 de ani. E greu de crezut. Bunicul meu a fost om al legii. Şi tata, la fel. Eu şi el am fost şerifi în acelaşi timp, el în Plano, iar eu aici, în Desert Aire. Cred că e destul de mândru de asta. Eu am fost mândru.

Unii dintre şerifii de pe vremuri nu purtau armă. Multor oameni le vine greu să creadă asta. Jim Scarborough nu a purtat niciodată armă. Ăsta e Jim cel tânăr. Gaston Boykins nu ar fi purtat una în districtul Comanche. Mi-a plăcut mereu să aud despre cei din vremurile trecute. Nu am ratat niciodată şansa de a face asta.

Nu poţi să nu te compari cu bătrânii. Nu pot să nu mă întreb cum îşi făceau treaba în acele vremuri.

Cu ceva vreme în urmă, în Huntsville, am trimis un băiat pe scaunul electric. A fost arestarea şi mărturia mea. A ucis o fată de 14 ani. Ziarele au spus că a fost o crimă pasională, dar el mi-a spus că nu a fost nicio pasiune. Mi-a spus că şi-a dorit dintotdeauna să omoare pe cineva. A spus că, dacă ar fi eliberat, ar face-o iar. A spus că ştie că va ajunge în iad. Va ajunge acolo în 15 minute.

Nu ştiu ce să cred. Chiar nu ştiu. Am ştiut mereu că trebuie să fii dispus să mori ca să-ţi faci datoria. Cred că-i mai mult vorba de ceea ce eşti dispus să devii. Dar nu vreau să mai risc şi să mă întâlnesc cu ceva ce nu înţeleg.

Şi mai cred că un bărbat trebuie să-şi pună sufletul la bătaie. Iar eu nu-s în stare s-o fac. Acuma mă gândesc că poate nici n-am fost vreodată.

Ar trebui să spun: "Bine, voi fi o parte a acestei lumi."

Leadership: Suferi o criză existenţială marcată de întrebări de genul „De ce eu ?”

Încotro de îndreptăm, noi, bătrânii, dacă nu spre o sărăcie interioară tot mai crâncenă? se întreba un erou al unui mic roman de formare spirituală.

Preţul pentru a ne menţine vie energia este direct proporţional cu domeniul în care activăm şi cu nivelul nostru de responsabilitate. Leadershipul poate deveni prin prisma acestor două considerente, o dezamăgire, un impediment, o invitaţie la eşec, un balast împovărător, o arie largă de repere care încep să-şi piardă sensul.

Ca o stea care se stinge sub ochii noştri, leadershipul îşi poate pierde din strălucire, transformându-se dintr-un atu într-un defect, până ce valoarea lui ajunge la zero. Un domeniu sever şi determinant, devenind din ce în ce mai greu de asimilat, sub forma foarte accesibilă a "predestinării şi respingerii", a îmbolnăvirii, a îmbătrânirii. Victima unei rupturi între durabilitate şi evoluţie, incapabilă să efectueze o mişcare de 90 de grade în sens invers propriei axe, pentru a ieşi din "şahul" dat de timp.

Luminile noi ale adevărului îţi întregesc sau îţi întunecă judecata? Motivul pentru care ne decidem să abandonăm cursa spre excelenţă, constă în a recunoaşte această imposibilitate de îndeplinire a obligaţiilor ce ne revin, de a cunoaşte şi a înţelege în întregime adversarul propriului nostru viitor: a fi parte dintr-o lume care dispare puţin cate puţin. Este vorba de o criză existenţială, având foarte multe întrebări cu privire la scopul nostru pe pământ.

Adevărul constă în a recunoaşte cine suntem şi cine nu suntem în punctul în care simţim că pierdem controlul, atunci când devenim prizonieri ai propriei noastre mediocrităţi.

Leadership: A fi o parte a acestei lumi înseamnă să renunţi la o lume întreagă pentru tine?

Şeriful Ed Tom Bell, din filmul " *No Country for Old Men (2007)* ", îşi spuse monologul contemplând, cu sufletul şi cu gândul îndreptate spre toate acele lucruri ascunse, semi-încuiate în obscurul unei vieţi care se derula în acelaşi timp pe două fronturi: al unui destin ce trebuia împlinit, apoi al unui rămas bun. El a ales mai mult abandonarea totală în negura unui apus scăldat de perspectiva morţii.

Ca un imn de deznădejde, ca un act de acuzare, vorbele şerifului dezvăluie fără cruţare apăsările şi asupririle societăţii în care trăia, dar şi simptomele unei slujbe căreia nu-i mai putea face faţă. Pur şi simplu, firea lui nu se mai intersecta cu cerinţele, cu restricţiile, cu trendurile ei. Bătrâneţea, cu toate adaosurile ei, îl încleştară cu totul. Se resemnase pentru imperceptibila parte ce i se cuvenea – pregătirea unui viitor pe care nu-l va trăi niciodată.

Ajutorul lui trebuia să vie "de sus", din partea unei conştiinţe mai înalte, mai lucide, din partea unei atitudini mai sănătoase, mai atente, mai responsabile, mai protective; din partea unei existenţe active şi pline de sens. Dar el nu era în măsură să recunoască remediile, să şi le administreze singur, fiindcă nu mai era receptiv la transformările sociale.

Ce se va alege din frunzişul unui copac bătrân tăiat de la rădăcină? Bătrâneţea e un ţinut complicat care prinde tot mai mult teren, îţi cuprinde conştiinţa ca un giulgiu rece, accentuându-ţi deznădejdea şi oboseala.

Leadership: Întreaga expresie a personalității tale este obținută prin jocul subtil al condiţiilor stabilite de o predestinare implacabilă, fără a recurge la constrângeri incompatibile cu limita răspunderii personale?

Firea ta se intersectează cu cerinţele, cu restricţiile, cu trendurile leadershipului?

În ceea ce priveşte convingerile şi năzuinţele noastre ce emană din idealul nostru de mâine, din tot ceea ce înseamnă evoluţie şi dezvoltare, (ideal ce poate fi perceput în mod direct în fața sensului şi a rigorilor existenței), ele reprezintă factorul principal în determinarea nivelului de încredere în sine. Un fel de pietre de temelie a predestinării care să nu cedeze la prima furtună şi să tragă cu ea întreaga construcţie a vieţii noastre de până atunci.

Atât sub aspectul atitudinii şi a gândirii, al modului în care înţelegem şi ne plăsmuim viaţa, cât şi sub cel al dezvoltării graduale şi durabile, aceste convingeri şi năzuinţe reprezintă totodată cadrul de referinţă al întregii noastre transformări, asigurat de contribuţia tuturor factorilor fizici, psihologici şi sociali care participă în mod activ la obţinerea excelenţei.

Lucru atât de important cu cât unele din ipotezele prospective – reproduse pentru realismul procesului de transformare – pornesc de la analiza acelei realităţi cu care ne identificăm. De aceea şi unele din temerile şi inconvenienţele noastre, cauzate de impresia neputinţei şi a

manifestării imprevizibilului, îşi limitează valabilitatea în funcţie de modul cum ne analizăm şi cum percepem trecutul ş viitorul în relaţie cu o predestinare implacabilă.

Condiţiile stabilite de o predestinare implacabilă, în adâncurile întunecate ale unei minţi consumate, sunt asociate variabilei de raportare la semeni în drumul către idealul suprem: de a trece bariere de netrecut în sfera obişnuitului trăit.

Există după o anumită vârstă o tendinţă de stagnare şi apoi de decădere, de abdicare de la idealurile pe care le-am plăsmuit în tinereţe. Viitorul aparţine acelor lideri care îşi vor menţine permanent tinereţea spirituală, acelora care se adaptează permanent la cerinţele mereu în schimbare ale societăţii, la schimbările tehnologice, dar mai ales cele de mentalitate, ajustându-şi modul de acţiune fără să abdice de la realizarea ţelurilor propuse.

Aceasta este esenţa tinereţii fără bătrâneţe şi a vieţii fără de moarte, o strânsă şi durabilă raportare la ceea ce suntem de fapt, ca o flacără care trebuie cât mai mult întreţinută, alimentată de cele mai multe ori de trendul pozitiv al activităţii noastre. Să participăm cu cât mai mult elan la tot ce săvârşim în viaţă prin leadership, căci tot ceea ce vom crea, bun sau rău, va rămâne veşnic urmaşilor noştri.

Monologul omului care îşi târâie bătrâneţea scoate în evidenţă acea trăsătură a liderilor care îşi abandonează rolul şi răspunderea stabilite de leadership în relaţie cu viaţa.

Aşa cum la bătrâneţe omul nu are capacitatea de acţiune pe care o avea cu ani în urmă, tot astfel leadershipul pe care îl practicăm îşi diminuează sensul odată cu involuţia noastră în marea evoluţie a societăţii şi a vieţii.

Montajul Armonic în Cinematografie

On Iulie 17, 2010

Leadershipul armonic presupune integrarea simultană a diferiților stimuli într-o viziune coerentă, ghidând inspirația și execuția spre un "simț al cadrului" bine definit.

În secvența cetei din "Potemkin", realizatorul practicase "montajul tonal", sau "melodic-emotiv". Montajul armonic este o fază superioară. Denumirea derivă din muzică și ea explică și esența ideii. Depășind, deci, modalitatea folosirii unei singure dominante, Eisenstein constată, prin analogie, că "în combinații care exploatează aceste vibrații colaterale – care nu sunt altceva decât însuși materialul filmat – noi putem realiza, într-un mod analog cu muzica, complexul armonic vizual al cadrului. Astfel este construit montajul în "Vechiul și Noul". Adică construit nu pe dominante particulare, ci ghidându-se după toți stimulii conținuți de materialul filmat."

Toți acești factori stimulativi simultani concură spre o unitate care determină "simțul" cadrului. Metoda are, de aceea, o "calitate fiziologică", acționând nemijlocit asupra simțurilor spectatorilor, ca și în acea muzică care este construită pe utilizarea dublă a armoniilor. Nu clasicismul lui Beethoven, ci calitatea fiziologică a lui Debussy și Scriabin.

Leadershipul creativ depășește tehnicile clasice de montaj, transformând fiecare secvență într-o parte dintr-un "complex armonic vizual", care să angajeze spectatorii pe multiple niveluri senzoriale.

A fost semnalată în cursul evoluției cinematografiei, concomitent cu dezvoltarea montajului clasic, apariția unei tehnici de montaj armonic mai mult sau mai puțin complexă, cel mai frecvent fiind semnalată utilizarea armonicelor vizuale și a stimulilor colaterali. Această tehnică poate fi semnalată și în cursul creației lui Eisenstein, când pe lângă elementele de montaj tonal pot fi prezente elemente ale montajului armonic.

Montajul armonic demonstrează capacitatea de a genera valori normale sau superioare ale impactului vizual, crescând complexitatea narativă și intensitatea stimulilor senzoriali.

Filmele bazate pe montaj clasic se pot, în cazuri rare, însoți de elemente de montaj armonic, astfel încât să creeze o experiență vizuală și emoțională unică. Adesea, s-au descris secvențe asociate cu tehnici de montaj rezistente la abordările convenționale, urmate de o structură narativă complexă, având rolul de a accentua tensiunea dramatică și profunzimea tematică. Circa jumătate dintre ele au fost asociate cu scene de impact emoțional puternic, pe motiv că integrează cu măiestrie imagini și sunete pentru a amplifica reacțiile spectatorilor.

Un lider vizionar în film știe să orchestreze multiple straturi de semnificație, creând structuri narative complexe care îmbogățesc percepția și înțelegerea spectatorilor.

Prin urmare, în cursul secvențelor asociate cu montaj armonic s-au semnalat valori normale, sau la limita lor superioară, ale impactului vizual, creșteri ale complexității narative și ale stimulilor senzoriali, iar examenele critice au relevat prezența multiplelor straturi de semnificație. Reiese de aici că montajul armonic poate transforma o simplă poveste într-o experiență cinematografică profundă și captivantă.

Analiza stilistică relevă utilizarea montajului melodic-emotiv, uneori asociat cu proliferarea stimulilor vizuali; la acestea se asociază, la unele scene, formarea de structuri narative

complexe cu rol de a îmbogăți percepția și înțelegerea filmului de către spectatori. În special, examinarea detaliată relevă prezența elementelor vizuale cu impact puternic la nivelul cadrului, al secvenței și al întregului film, în alternativa unei abordări clasice, care poate părea liniară și predictibilă. Evoluția este cel mai des favorabilă cu o abordare creativă adecvată, menită să impresioneze și să captiveze publicul. Unele cazuri evoluează spre crearea unei noi dimensiuni cinematografice, depășind limitele montajului clasic și acționând nemijlocit asupra simțurilor spectatorilor, asemănător muzicii lui Debussy și Scriabin.

Complexul armonic vizual creat prin montaj nu doar că menține coerența narațiunii, ci și intensifică impactul emoțional asupra spectatorilor, transformând experiența filmică într-o imersiune profundă și captivantă, care transcende simpla vizionare.

Montajul Armonic în Cinematografie se referă la interacțiunea subtilă dintre diferitele elemente vizuale prin faptul că creează o experiență senzorială complexă în versiunea unei sincronizări armonice între imagine și emoție. Spun asta știind că această metodă influențează direct percepția spectatorului prin intermediul unei combinări echilibrate de stimuli vizuali și auditivi care provoacă o reacție emoțională profundă.

Montajul armonic și forma superioară a polifoniei

On Iulie 18, 2010

Leadershipul în cinematografie presupune abilitatea de a extrage și implementa informații subtile despre montaj, depășind observațiile superficiale ale aspectelor narative.

Ne aflam deci la o formă superioară a polifoniei despre care mai fusese vorba. Pentru o clarificare a acestor teze teoretice să dăm un exemplu din "Vechiul și Noul" în care montajul armonic realizează o progresie simultană a unei serii multiple de linii care-și păstrează fiecare propria ordine de construcție, independentă, și contribuie în același timp la ordonarea compoziției generale. Exemplul este scena procesiunii religioase, în care Eisenstein distinge următoarele șapte linii:

1. linia emoțională a subiectului, care crește de la cadru la cadru;

2. linia prim-planurilor succesive care cresc în intensitate plastică;

3. linia extazului progresiv al celor din procesiuni, urmărită prin conținutul dramatic al prim-planurilor;

4. linia vocii femeilor (fețele cântărețelor);

5. cea a vocii bărbaților (fețele cântăreților);

6. linia celor ce îngenunchează la trecerea icoanei, a căror cadență se accentuează, născând totodată un "contra-curent" al liniei purtătorilor de icoane și cruci;

7. linia prosternărilor, care unește toate curentele în mișcarea generală a secvenței "de la cer până la praf - de la strălucirea vârfului crucilor îndreptate spre cer, până la fețele oamenilor bătând fruntea în praf".

Montajul își atinge efectul total prin senzația compozită a tuturor acestor elemente în ansamblul lor organic.

Un lider vizionar în domeniul filmului știe să echilibreze restructurarea generală cu revizuirea parțială, analizând în profunzime fiecare secvență pentru a obține maximum de impact.

Extracția informațiilor referitoare la realizarea montajului, a căror rădăcină nu este complet resorbită de punerea în scenă a diverselor scenarii, impune o abordare delicată, greu de suportat de cineaștii care observă doar defectele de suprafață ale aspectelor narative. Din această cauză se impune fie o restructurare generală, fie o revizuire parțială, prin care secvențele sunt analizate în profunzime. Cu alte cuvinte, nu sunt indicate imobilizarea atenției spectatorului și efectuarea montajului cu o tehnică "aproximativă", întrucât lipsa de subtilitate îl poate face să nu întrevadă eventualele reacții emoționale ulterioare ale personajelor, dobândind el însuși o stare de anxietate față de film și de experiențele cinematografice complexe, pe care le poate uita foarte greu.

Prin urmare, la montajele negative de tipul "primitiv", linia prim-planurilor succesive care cresc în intensitate plastică poate altera viziunea narativă, lăsând miezul intact în jurul celulei. Bineînțeles, aceste formațiuni poartă numele de "secvențe nearmonice" și se deosebesc de structurile armonice prin faptul că ceea ce se vede într-o imagine numai parțial expusă nu distruge narațiunea obținută nu prin sintetizare și supraordonare de imagini, ci prin alăturarea de imagini, cuvinte și sunete, în manieră aleatorie, conform unei estetici girate de Eisenstein. În curs de multiplicare, provocarea este menținerea coerenței liniilor vocii femeilor și ale bărbaților, secondate de extazul progresiv urmărit prin conținutul dramatic al prim-planurilor.

Leadershipul creativ în montaj implică evitarea tehnicilor "aproximative", focalizându-se pe subtilități care pot declanșa reacții emoționale profunde în spectatori.

În acest context, se impune fie o abordare generală a narațiunii, care să împiedice sinteza de imagini discordante, fie o focalizare loco-regională pe anumite elemente ale poveștii, deoarece fiecare componentă trebuie să își păstreze integritatea. Rezultatele vizuale obținute prin tratarea scenelor cu doze mici de suspans, pe linia emoțională a subiectului, care crește de la cadru la cadru, sunt capabile să se distingă ca elemente unificatoare, în cursul multiplicării succesive a punctelor de vedere narative, fără să își piardă coerența externă, devenind structuri stabile.

În special, la filmele cu structură narativă complexă, montajul armonic nu distruge decât stratul superficial al poveștii, miezul narativ rămânând intact în jurul temei centrale. Aceste construcții poartă numele de secvențe armonice și se deosebesc de montajul clasic prin faptul că structura lor narativă este numai parțial deconstructată. Mai mult decât atât, secvențele armonice pot fi obținute și prin tratamentul scenelor în curs de dezvoltare cu tehnici inovatoare de montaj. În acest caz, este împiedicată sinteza lineară a narațiunii.

Leadershipul în cinematografie înseamnă capacitatea de a anticipa reacțiile emoționale ale spectatorilor, menținând un echilibru subtil între ritmul montajului și conținutul dramatic.

Spre deosebire de montajul clasic, montajul armonic permite multiplicarea liniilor narative în structuri complexe, dar, în cursul dezvoltării lor succesive, își păstrează coerența generală și devin construcții narative polifonice. Pe de altă parte, montajul clasic nu se poate multiplica în structuri narative complexe, ci doar în secvențe simple. În aceste condiții însă, diviziunea narativă este anarhică, rezultând scene de intensități diferite cu un conținut variabil de informație narativă.

Rezultă, prin urmare, că dacă construcția viziunii dată de succesiunea planurilor nu este absolut indispensabilă vieții personajelor, ea îndeplinește totuși un rol de organizare subtilă cu care, în procesul de diviziune a cadrelor din montaj, se obține o structură echitabilă a informației cinematografice.

Un lider inovator în film știe să garanteze o estetică care provoacă și menține angajamentul spectatorului, chiar și în fața unor tehnici neconvenționale.

Montajul

On Noiembrie 15, 2015

Găseşte noi teorii în practica creaţiei, urmând calea firească a unei gândiri condiţionate de experienţa emoţională.

Eisenstein a încercat să transpună montajul paralel din sfera acţiunii în cea a semnificaţiei, alăturând cadrelor care-i înfăţişau pe menşevici ţinând discursuri sforăitoare şi lacrimogene, câteva imagini de mâini zdrăngănind harpe şi balalaici. Dar paralelismul era pur literar, de aceea în fond necinematografic, nerealizat.

Oprim aici înşirarea exemplelor… Ele l-au dus pe Eisenstein la pasul următor prin care a căutat în această modalitate esenţa cinematografiei. Acesta era „filmul intelectual" pentru care a militat câţiva ani şi la baza căruia era ideea după care: „Cinematografia este, înainte de toate şi în esenţial, montaj". Pentru că şi teoria filmului intelectual – a cărui sarcină era restaurarea plenitudinii emoţionale în proces intelectual – nu era decât *reductio ad paradox* al acestei concepţii despre montaj.

Şi astfel, din nou, teoria se născu din practica creaţiei. Era totdeauna calea firească a gândirii lui Eisenstein: de la fondul de experienţă emoţional – prin experienţa intelectuală – la film – şi de aici la teorie. Chiar dacă denigratorii săi doar afirmau existenţa unui proces invers în creaţia sa şi aceasta cu scopul de a-i demonstra caducitatea. *

Leadership: Poţi să faci trecerea la fondul de experienţă emoţional prin utilizarea experienţei intelectuale, procedeu specific unei creaţii care îşi revendică termenul de perfecţiune prin practicarea paralelismului?

Principalul aspect care caracterizează montajul este o creaţie care îşi revendică termenul de perfecţiune prin practicarea paralelismului, din sfera acţiunii în cea a semnificaţiei, atunci când realitatea se dezvăluie în forma unei trăiri tainice care îţi dă senzaţia ai acumulat o mulţime de experienţe pe parcursul unei vieţi întregi. Regizorul este o consecinţă intrinsecă a credinţei într-o realitate plăsmuitoare a omului întreg, o realitate pe care nimeni altcineva nu o prevede, putând fi însuşită numai în funcţie de ce el trăieşte într-un anumit punct al vieţii.

Oricât s-ar dezvolta o idee, fiind vorba despre o cheie a operei realizate în cea mai mare parte cu contribuţia experienţei acumulate din „căutarea esenţei", procesul ştiinţific de tratare a unui anumit subiect – de la activitatea intelectuală la fondul emoţional – se manifestă în direcţia folosirii unui stil aparte de a te dărui evoluţiei şi de a-ţi demonstra autenticitatea.

Leadershipul, din felul în care cauţi să descoperi esenţa unor noi cunoştinţe, neputând fi „programatic", poate avea ca rezultat această direcţie de cercetare a profunzimilor din care arta îşi trage seva, asumată ca obiectiv asociat experienţei de creaţie, care cuprinde în primul rând fondul de experienţă emoţional dobândit într-un singur eveniment spectaculos al vieţii.

Povestea unui destin de regizor urmează calea unei gândiri axate pe certitudine care îşi transpune relaţia dintre existenţa obişnuită şi trăirea estetică suficient de activă într-o reprezentare vizuală de excepţie.

Practic, are loc un gen de ataşament între ceea ce încerci să exprimi şi semnificaţia pe care o atribui realităţii, alăturând imagini şi reprezentări ale lumii, cât mai contrastante, din prezent sau din trecut. Amintiţi-vă ce scria Ana Blandiana: „ *Am observat că, pe măsură ce se aşterne*

timpul, amintirile nu se şterg, ci îşi accentuează contrastele, pierd mulţimea nuanţelor şi-a tonurilor de gri pentru a păstra numai un ferm desen în alburi şi negruri exclusive. "

Emoţionalul care rezidă din ceea ce eşti atunci când pui „în scenă" noi experimente, în mijlocul adaosurilor informaţionale declanşatoare de stări de tip „Wait", în mijlocul cărora se află omul în care te oglindeşti, devine treptat un fel de compromis între putinţa de a te exprima şi putinţa intelectualului de a schimba anumite percepţii vis-a-vis de un anumit eveniment, fenomen, profil sau subiect de studiu.

Ori a pune în scenă aceste experimente de oglindire în altcineva sau altceva, nu este doar un produs al gândirii. Montajul poate fi, ca atare, alimentat de atitudinea de tip „empatic" – o formă de intuire a realității prin identificare afectivă.

Leadershipul este coordonata avântului de a descoperi o nouă realitate transpus într-o capodoperă de creaţie care surprinde o anumită emoţie şi transmite o senzaţie de putere şi dinamism în stare să vrăjească, să producă dependenţă.

Montajul aduce în prim plan interesul acordat reconfigurării lumii interioare, prin reflectarea unei imagini exterioare.

Un lider excepţional îşi asumă rolul de artist în utilizarea jocului de rol. El îşi exersează autenticitatea prin imaginarea propriei versiuni a realităţii faptelor, şi redarea lor într-un conţinut care îi oglindeşte stilul de a gândi şi a simţi. Jocul de rol este o călătorie spre un alt „înainte" al propriei tale persoane.

Şi ce este o călătorie, spunea Ana Blandiana, dacă nu o încercare de a vedea cum, în alte condiţii, sufletul nostru rămâne acelaşi? Ce este o călătorie dacă nu o experienţă capabilă să verifice, printre întrebări şi comparaţii, puterea noastră de a reacţiona, de a răspunde? Pentru că, oricât de modeşti am fi, nu putem să nu observăm că important cu adevărat nu este ceea ce am văzut, mişcându-ne, ci ceea ce am simţit în mişcare.

Moştenitorul unei mari averi

On Iunie 21, 2015

Supune-te unei solide verificări a validităţii de om de mare caracter, prin utilizarea puterii gândirii care supravieţuieşte „morţii".

- Acum înţeleg de ce mi-aţi dat întâlnire aici, în insula aceasta dezolată, în mijlocul unui ocean, în palatul acesta subteran, în mormântul acesta pe care şi l-ar putea dori chiar şi un faraon: fiindcă vă sunt drag, nu-i aşa conte? Fiindcă mă iubiţi îndeajuns ca să-mi dăruiţi una din morţile despre care îmi vorbeaţi adineaori, o moarte fără agonie, o moarte care să-mi îngăduie să mă sting rostind numele Valentinei şi strângându-vă mâna.

- Ascultă, Maximilien - adaugă contele cu glas tare, văd că durerea ta este nesfârşită. Totuşi, mai crezi în Dumnezeu şi nu vrei să-ţi dai sufletul pierzării.

- Conte, răspunse el cu tristeţe, ştiţi foarte bine că sufletul nu-mi mai este al meu.

- Ascultă, Maximilien, continuă Monte Cristo, tu ştii că eu n-am nicio rudă în lume. M-am obişnuit să te privesc ca pe fiul meu; ca să-mi salvez fiul, mi-aş jertfi viaţa şi cu atât mai mult averea. Vreau să spun că te gândeşti la moarte fiindcă nu cunoşti bucuriile vieţii pe care ţi le îngăduie o mare avere. Maximilien, aproape tot ce am îţi dăruiesc ţie. Cu o asemenea bogăţie vei putea ajunge la orice ai dori. Eşti ambiţios? Toate carierele îţi vor fi deschise. Mişcă lumea, schimbă-i faţa, fă lucruri nesăbuite dacă trebuie, dar trăieşte ! *

Leadership: Te separi de profunzimea sfâşietoare a trăirilor, căutând limitele extreme ale spiritualităţii care nu încetează să angajeze viaţa într-o autentică poveste menită să scoată în evidenţă gradul tău de a înţelege tainele unei inteligenţe superioare?

Fenomenul „Profunzime sfâşiată" determină o plasare a omului în raport cu sinele care critică şi pedepseşte, foarte apropiat de acea stare a indiferenţei capabilă să-l îndepărteze de năzuinţele spre libertate de gândire care îndeamnă la bine prin cuvânt şi faptă. Reflectat şi asupra celorlalţi, acest fenomen imprimă acea idee de respingere a tot ceea ce poate să-l confirme pe individ ca fiinţă investită cu conotaţii superioare.

Leadershipul este imaginea stăpânirii de sine rezultată din lupta împotriva prejudecăţilor, patimilor, limitelor, pornirilor, întristărilor care îţi înceţoşează viziunea şi convingerile. Adesea, omul trebuie să treacă prin disperare, durere, furstrare ca să ajungă la un nivel mai înalt de încredere, respect şi stimă de sine, încât temperamentul să se schimbe radical prin exersarea autocontrolului şi a verticalităţii, prin exersarea abţinerii de la a contracara un fenomen care oricum se întâmplă.

Omul ajunge la o conştiinţă fondată pe reprezentări ale realităţii care convin aşteptărilor sale pe măsură ce înaintează spre învăţătură şi putere, spre maturitate şi împlinire. Spiritualitatea contribuie a determina în individ o modalitate particulară de reacţie la gânduri şi sentimente, ca mijloc de adaptare la condiţiile sociale şi moralizatoare de existenţă. Spiritualitatea înseamnă de fapt să accepţi provocarea unor noi experienţe de viaţă, fără să-ţi condiţionezi conştiinţa să intre într-un impas definitiv.

Dar libertatea omului trezit din starea de confuzie, a omului care renaşte dintr-un declin temporar, caută întotdeauna limitele extreme: viaţa desăvârşită sau moartea rapidă. Ce-i drept, numai atunci când ea se manifestă ca reacţie la ceea ce omul trăieşte şi la ceea ce se

întâmplă în jur, ca o componentă esenţială a unei atitudini active cu privire la ceea ce este însufleţitor, dar mai ales la ceea ce el trebuie să reprezinte în marea ecuaţie a existenţei.

Leadership: Încerci să îţi impui propriile convingeri asupra unei situaţii pe care simţi că n-o stăpâneşti, în conformitate cu modul tău de a percepe deznodământul aşteptat?

Când te gândeşti că sfârşitul e aproape, asta se datorează convingerilor care te sabotează. Scriitoarea de origine română Lungu Laura (alias Alexia McGray) avea dreptate când spunea:

"Viaţa e un carusel în care te urci şi aştepţi ce va urma. Priveşti când eşti sus şi îţi pui dorinţa să fii mereu acolo. Apoi, brusc, caruselul cade şi ţi-e greu să fii jos, pe marginea prăpastiei. Ceri să fii mereu sus, dar nu se poate, pentru că nu tu conduci caruselul, ci el te conduce pe tine. Aceasta este viaţa care îşi face jocurile dinainte ca tu să apari, iar tu eşti doar un biet participant la joc."

Orice deznodământ se poate amâna printr-un strop de ajutor divin, aşa cum orice acţiune are şi o reacţiune. Viaţa este direcţia lui "tu însuţi" într-un vârtej care te poate distruge, iar la cine te aştepţi mai puţin te va ajuta să te ridici.

Acest "tu însuţi", supus unei solide verificări a validităţii de om de mare caracter, perceput ca singură direcţie de urmat prin experimentarea libertăţii de a acţiona în conformitate cu realităţile vieţii, devine simbolul unei polarităţi care ce conferă atitudinii spirituale o notă de provocare faţă de existenţă. Această polaritate poate fi exprimată în două feluri:

Prima, cea a conştiinţei tragice care cunoaşte sensul eşecului total şi nevoia renunţării la sine, în care sensul suferinţei este cunoscut printr-o vulnerabilitate a minţii şi a sufletului. A doua, cea a devenirii unui destin de măreţie care înglobează întreaga fiinţă, concentrând în sine potenţialul renăscător al încrederii în viitor.

Leadershipul este rezultatul gândirii care supravieţuieşte „morţii", permiţând omului să cunoască şi să-şi asume bucuriile pe care i le îngăduie experimentarea credinţei sau a unei trăiri cu adevărat înălţătoare. Înainte ca omul să fie pus în starea de a simţi utilitatea vieţii, cineva trebuie să-l înveţe regulile ei, fără a neglija tocmai sâmburele raţional al teoriei conform căreia modificările minore, atent concepute şi inteligent puse în aplicare pot declanşa consecinţe majore.

Viaţa văzută prin prisma leadershipului poate fi definită prin următorul motto: "Mişcă lumea, schimbă-i faţa, fă lucruri nesăbuite dacă trebuie, dar trăieşte ! "

Moştenitorul unei mari averi este individul care, înotând prin apele cele mai adânci ale vieţii lăuntrice, înfruntând împrejurările cele mai hotărâtoare, ajunge să realizeze ceea ce credea că nu mai este cu putinţă: miracolul de a fi altcineva.

Iată tot secretul devenirii, mărturisea Alexandre Dumas în celebrul său roman: „ *Nu există nici fericire, nici nenorocire în lume. Există doar compararea unei stări cu cealaltă şi - atâta tot. Doar cel care a simţit nefericirea cea mai cumplită este în stare să simtă cea mai mare fericire. Ca să-ţi dai seama cât de bine este să trăieşti, trebuie să fi dorit să mori."*

*** Notă:** Alexandre Dumas - *Contele de Monte Cristo* , Editura Tineretului, 1957.

Muzica unei vieţi total virtuoase

On Martie 09, 2021

Formează-ţi o viziune clară asupra a ceea ce vrei să transmiţi prin intermediul creaţiei tale, înainte de a te hotărî să schimbi ceva la trăirile pe care le ascunde sufletul tău.

Muzica a fost prima parte a incursiunii mele într-o lume dominată de culoare care parcă anunţa acea explozie de nuanţe vii ale unei estetici penetrată în profunzime de fermentul gândirii simbolistice. Ea mi-a oferit o panoramă a creației audiovizuale transformată reflexiv într-un torent de energie pozitivă, folosind inclusiv realitatea virtuală pentru a asculta şi a schimba sunetele unei muzici stelare pe care întreaga cunoaştere a omenirii o pune pe seama apropierii de perfecţiunea absolută.

Spun asta pornind chiar de la unele dintre cuvintele atribuite lui Beethoven: *"Muzica este o modalitate spirituală de a pătrunde într-un univers mai înalt al cunoașterii care cuprinde Omenirea, dar pe care Omenirea NU îl poate cuprinde."*

Astfel, muzica a devenit o revelație mai înaltă decât toată înțelepciunea și filosofia de care credeam că n-am să mai scap niciodată. A devenit un test de sensibilitate a limbajului, a expresiei, un fel de procedeu de sensibilizare a materiei din care arta îşi trage substanţa vibrantă, posibil a se manifesta ca o reprezentare firească în planul fizic al unei emoţii, al unui gând, al unui mesaj acompaniat de lirismul sublim, contemplativ, învăluitor, al imaginaţiei din care aleatoriul nu lipseşte nicio clipă.

Cât despre ceea ce-mi anulează orice nelinişte, prin ceea ce mi se întâmplă zilnic, ei bine, muzica îmi poate oferi vibraţia unei clipe de inedit, alteori îmi transmite vibraţia unei emoţii efemere. Aici, fiind incontestabil faptul că niciodată un creator nu va fi mai preocupat de el însuşi decât atunci când inspiraţia cea mai pură va fi mai abundentă într-o stare de tensiune pulsatilă, prelungită.

Leadership: Poţi să produci o reflectare a esenţei tale vibraționale printr-o compoziţie de elemente cu surplus de semnificaţie - rar întâlnite într-o lume a creaţiei care se vrea o oglindă a Universului?

Ce vreau să arăt este că muzica nu este doar un criteriu de separare al sinelui de non-sine, o chemare de trezire spre o mai înaltă înţelegere a tâlcului metafizic al existenţei. Ci reprezintă, în primul rând, o largă incursiune într-un prezent etern al cărui ecou răzbate până acolo unde spiritul ajunge să înfrângă legile naturii, estompând raportului realitate–vis, şi te cheamă mai departe spre o conştientizare a sinelui ca spirit, nu ca formă sau ca şi corp.

Muzica este acea creaţie a unui artist care emoţionează până la capăt, amintind de sentimentul intim de bine pe care ni-l poate aduce momentul de legătură cu tărâmul spiritual al universului, cu itinerariul locurilor cerești ce ne înconjoară. Este mărturia unei vieţi trăite prin arta de a exprima sentimente cu ajutorul sunetelor combinate într-o manieră specifică.

Iar ceea ce captează cu adevărat atenţia ascultătorului de muzică este dovada existenţei unei sinergii între formele de undă ale unei revelaţii de sine ce se împlineşte în întruparea Logosului, contribuind la crearea unei imagini simbolice, şi ceea ce se accentuează prin surprinderea frumuseţii unei vieţi trăite în lumina unor versuri care încălzesc inima oricărui om, inspirând, trezind emoții, capacitând înţelesurile profunde ale dimensiunilor artei plastice.

Esenţa vibraţională a unui artist rezidă din acea calitate a muzicii care poate aduna laolaltă toate emoţiile desăvârşirii unei opere de creaţie.

Ce să zic, poate că am eu o tragere anume spre muzică, ori spre anumite genuri de melodii care insuflă o stare specială, fiecare piesă compusă de mine având în spate o poveste frumoasă de viaţă. Da, sunt un muzician, dar nu orice fel de muzician, pentru că notele mele de sublim, acele note de sensibilitate, de eleganţă şi intimitate, acele note de bas profund ridicate pe „Imaginează-ți", au ca efect liniştirea dinspre gânduri şi o anumită căldură a inimii.

Chiar şi această inimă roșie, plină de naturaleţea şi spontaneitatea artei, bătând pe ritmul cuvintelor furate din somnul unor gânduri transpuse într-un univers simbolizat, are în partea de sus o notă muzicală strălucitoare de culoare semitransparentă, cu scânteieri cristaline. Ea bate fără să mă întrebe, fără să se ascundă de mine.

Leadership: Imaginea menită să sugereze decorul în care sufletul îţi tresare de emoţie, poate să fie surprinsă ca o manifestare a imaginaţiei tale într-o lume care există în afara percepției realităţii?

Cât despre ceea ce-mi anulează orice nelinişte în momentul de vârf al inspiraţiei, spre care tinde dinamismul inerent al imaginilor plăsmuite din exprimarea emoţiilor, într-un spaţiu lăuntric, acolo unde toate călătoriile se unesc într-una singură, aş vrea să fac referire la un pasaj din romanul "Papillon", scris de Henri Charrière:

"Niciodată sufletul meu, spiritul meu, nu vor aparţine acestui drum degradant, al putrezirii. Nu trăiesc decât pentru ca să evadez. Datoria mea de om faţă de mine însumi nu-i aceea de a-mi face dreptate, ci în primul rând, mai presus de orice, aceea de a trăi, de-a trăi pentru a evada. Chiar zdrobit, o evadare este o victorie. Să trăiesc, să trăiesc, să trăiesc. Să repet asta ori de câte ori voi fi gata să mă abandonez disperării, de trei ori aceste cuvinte de speranţă: "Cât timp există viaţă, există speranţă."

Recitind acest pasaj, iată, vă ofer concluzia pe care o trage sufletul meu despre călătoria unui artist în această lume: trebuie întotdeauna să existe ceva care să susţină ritmul vieţii mele, care să transmită şi să crească vibraţia unei alte realităţi pe care eu însumi o caut într-o sensibilitate a exprimării care emoționează, subtilă, ascunsă, indispensabilă actului de creaţie.

Cred că toate contribuie în mod egal la impresia pe care o lasă imaginea unei singure fiinţe.

Aşa este. Uneori simt că trăiesc acest moment plin de sensibilitate ca o izbândă a evadării dintr-o lume care, trăind-o direct, mi se pare că moare încetul cu încetul. Şi, nu, nu mă întristez de cele de ce întâmplă în exteriorul meu, ci mă bucur de faptul că ceea ce întâmplă în exteriorul meu îmi pune la încercare emoţia de a fi conectat la o pereche de căşti în care se aude refrenul: "I'm a world that's waiting to be discovered."

Ceea ce se reflectă în leadership este legătura sinergică care transferă trăirile în viziune şi încarcă experienţa vieţii cu o semnificaţie care poate ajunge realitate.

Muzica unei vieţi total virtuoase se adresează omului care a ştiut să evadeze în nemurire cu ajutorul simţului artistic (acţionând mai mult după sentimente şi mai puţin după logică), incluzând facultatea de a percepe fenomenele lumii exterioare ca o reflectare a lumii interioare.

Iată elementele imaginii din care îţi poţi extrage conţinutul artistic aferent unui proiect interesant de creaţie: Sunete. Culoare. Formă. Aspect. Emoţii. Cuvinte. Gesturi. Costume. Paşi de dans. Limbaj. Imagine. Vibraţii. Spirit. Viziune. Perspectiva analitică. Numere. Design.

Tu cum poţi să redai ce conţine interiorul tău prin prisma a ceea ce se întâmplă în exteriorul tău, luând în considerare aceste elemente?

Foloseşte-ţi bogăţia imaginaţiei !

N-aveţi niciun drept asupra mea

On Noiembrie 28, 2009

Învaţă să te conectezi la realitatea lumii concrete, fără să depinzi de acea realitate a imaginilor care pretind explicaţii, justificări, înţelegeri în ceea ce priveşte raportul dintre ceea ce doreşti să obţii şi ceea ce nu este posibil să primeşti.

- Aşa este, spuse Olympia. Nu mai vreau să fiu prea umila supusă a excentricităţilor dumneavoastră. Dacă aţi avea pentru mine nu dragostea, asta n-aş îngădui-o, ci afecţiune, - ştiţi că viaţa mea este cântecul, - atunci n-aţi mai încerca să-mi interziceţi să nu cânt, ci să respir. Sub pretext că sunteţi gelos pe vocea mea vă interpuneţi între mine şi visul meu, îmi retrageţi sublima bucurie de a emoţiona inimile parizienilor, de a face ca sufletul meu să palpite în sufletul oamenilor. Deoarece dumneavoastră aveţi extravaganţele dumneavoastră, ar trebui să le înţelegeţi şi pe ale altora. Cât despre mine, extravaganţa mea este bucuria de a transmite sălilor pline fiorul care-mi tulbură sufletul, tot ceea ce simt, tot ceea ce mă copleşeşte. Nu văd pentru ce aş sacrifica capriciul meu pentru al dumneavoastră. N-aveţi niciun drept asupra mea. Sunt liberă. Voi cânta oriunde voi dori. Teatrul este piedestalul, este trepiedul înflăcărat de unde preoteasa îşi rosteşte oracolele în faţa mulţimilor şi revărsa asupra lor harul divin care o devora.

După o scurtă pauză, Olympia continuă:

Mi-aţi amintit de învoiala noastră, continuă Olympia, înviorându-se pe măsură ce vorbea. Haideţi, spuneţi-mi că-mi cereţi înapoi cei cincizeci de mii de franci pe care mi i-aţi împrumutat? În timp ce eu îmi făcusem din dumneavoastră un prieten, dumneavoastră doreaţi să-mi deveniţi stăpân ! Iată că mă desprind şi sfărâm învoiala. Vă dau banii înapoi şi îmi retrag prietenia. Banii? Dacă aţi crezut că mă reţineţi prin acest lanţ, v-aţi înşelat. N-am avut niciodată nevoie de ei, decât pentru a-i dărui. În ceea ce mă priveşte, nu cunosc alt lux şi altă bogăţie decât arta, şi nu m-aş simţi niciodată mai în largul mei decât într-o cămăruţă, la o mansardă, unde aş cânta ca o pasăre. Slavă Domnului ! Pot să mă achit şi să nu vă datoreze nimic.

Leadership: Imaginea ta este influenţată cauzal de experienţa conştientă, subiectivă, a unei persoane care chiar dacă participă la procesul schimbării nu se poate situa într-un raport de egalitate cu alegerile tale?

O tresărire încreţi buzele lordului Drummond, ca al lui Othello când Iago l-a informat că Desdemona îl iubeşte pe Cassio. După tonul ferm şi semeţ cu care vorbise, lordul Drummond pricepuse că luase o hotărâre pe care nimic n-ar fi putut-o zădărnici, cu excepţia artei, poate, fără de care n-ar fi putut trăi.

- Aşadar, zise el, faptul că vă iubesc este o crimă? Dumneavoastră, o artistă, dumneavoastră îmi reproşaţi emoţia pe care o resimt în faţa artei? Ideea că m-am îndrăgostit de o voce, aşa cum te-ai îndrăgosti de o femeie şi că am pentru sufletul exprimat în cântecele dumnezeieşti aceeaşi gelozie pe care alţii o au pentru un trup? Da, este adevărat, sunt gelos pe cântecul dumneavoastră. Dar nu numai din pricina mea, ci şi din pricina dumneavoastră. Aveţi dreptate, am izbucniri mânioase când vă văd azvârlind oamenilor de rând aceste sunete în care puneţi tot sufletul dumneavoastră. Publicul vă admiră în mod necioplit, dar nu va înţelege valoarea. Nu are totdeauna starea de spirit să vă asculte. Glasul dumneavoastră, care mie îmi deschide bolţile cerului, pe alţii îi lăsă în lumea pământeană. Ah ! De ce făgăduiţi raiul neasemuitelor melodii tuturor acestor oameni infirmi şi abrutizaţi? De ce coborâţi firmamentul la nivelul pavajului străzii? Ceea ce dumneavoastră numiţi spectacol, eu numesc profanare !

Leadership: Iei în calcul posibilitatea de a nu te autoacuza ca având drepturi asupra altor oameni, fără să trebuiască să explici atât conţinutul conştient al gândurilor tale cât şi modul tău de acţiune cauzală?

Gândurile şi ideile noastre, fiind deseori materiale, dacă se întrepătrund în dezvăluirea formelor de manifestare ale sentimentelor profunde, aşa cum o atestă povestea de mai sus, atunci rezultatul este unul dezastruos. În interiorul unui abis întunecos al minţii omului, chiar dacă există o picătură din frumuseţea sufletului, omul nu îşi va găsi niciodată puterea de a se elibera de întuneric. El va rămâne exact ca întunericul: un loc neclintit, un simbol al răului, al misterului sau al fricii.

A visa că vezi pe cineva în întuneric nu mai este atât de normal, nu-i aşa? Iar speranţa omului de a se schimba este o necesitate psihologică, în încercarea modestă a-şi preconiza un viitor strălucit, demn, continuator al unor nume ilustre. Alteori, nu înţelegem că începem să fim iubiţi abia după ce învăţăm să spunem cu hotărâre “nu” acelor cauze lăuntrice ce limitează efectele unui act asumat de iertare.

Este oare posibil să înţelegem în mod raţional acest lucru, lăsând la o parte acea trăire de "suntem împreună", indiferent de ocazie? Logica spune că nu, dar sufletul spune da. Rămâne să formulăm o înţelegere raţională a influenţei reciproce dintre doi oameni, adică dintre aspectul material şi cel mental, înţelese ca aspecte ale unui drept unic: dreptul de a nu fi judecat. Dar, mai ales, trebuie să luăm în calcul şi dreptul de a nu ne autoacuza atunci când faptele noastre secătuiesc pe alţii de forţă. Şi când faptele noastre rele sunt o pricină de poticnire pentru cei din lume şi în acest fel îl îndepărtăm pe Dumnezeu de lângă noi, cum este ?

Sondând chiar mai adânc în sursa gândurilor oamenilor ca să scoatem la iveală o logică comună, vom descoperi că cel puţin unul din ei nu se dă bătut şi găseşte puterea de a deveni un luptător împăcat cu sine însuşi, cu ajutorul unui om sufletist care îi devine apropiat. Fără a lega semnificaţia fiecărui gând de vreun lucru exterior, vom vedea că întotdeauna unui din ei este influenţat cauzal de experienţa conştientă subiectivă a celuilalt. Prin urmare, concluzia este următoarea, aşa cum bine observa episcopul Nicolae Velimirovici:

"Noi ajungem duşmanii unui om când îi cunoaştem însuşirile rele, dar nu le cunoaşte pe cele bune. Şi ajungem prietenii unui om când luăm seama la însuşirile lui bune, dar în acelaşi timp, întrevedem şi pe cele rele."

De multe ori leadershipul este acea realitate a spiritului uman care produce efecte copleşitoare. Pe cât posibil, în leadership, trebuie să cultivăm o privire "apropiată" de acea realitate care insuflă spirit de credinţă în ceea ce priveşte imaginea de sine, prin eliminarea a ceea ce este subtil, aparent, neînsemnat, dar cu efecte de tipul: "eu sunt pricina dumneavoastră ! "

N-aveţi niciun drept asupra mea ! Asta exclamă o persoană care se ştie influenţată de cineva care se pretinde a fi un colaborator, dar în realitate doreşte clar înfrângerea sa. Avea dreptate eseistul american William G. Jordan atunci când spunea:

Fiecăruia dintre noi îi este dată o minunată putere, aceea a binelui şi răului, anume influenţa tacită, inconştientă, nevăzută, pe care o are viaţa sa: simpla iradiere a ceea ce este cu adevărat un om, şi nu ceea ce pretinde că este.

Nălucirile unui creier desprins din neant

On Iulie 06, 2015

Plasează-te în ipostaza de navigator în spaţiul cunoaşterii, fără a face din leadership un domeniu închis în sine.

Totul se constituia ca o punere în scenă a unei realităţi fără nume, într-un univers care nu putea fi calculat de ştiinţă, ci doar de vocea interioară a unui artist care îşi evaluează opera, având nevoie de confirmarea faptului că gustul său faţă de profunzimea şi misterul interiorităţii sale este desăvârşit. Într-un fel, mă simţeam ca şi când ar fi trebuit să fac o mare descoperire, un pas înainte în găsirea unor corpuri cereşti locuibile, un nou record în domeniul cercetării spaţiale, printr-un fel de rezonanţă la ascultarea unei game largi de sunete precum cele ale inimii.

Cea mai mare claritate a convingerii unui observator relativist este că nu există idei înnăscute, ci doar o forţă ce declanşează anumite procese mentale. Gândul alerga fără să se poată opri asupra ideilor principale, mici străfulgerări de intuiţie şi imaginaţie condensate într-un material de scurtă durată în care timpul, luându-se uneori egal cu zero, era justificat prin faptul că se comporta ca o conversaţie cu un necunoscut, căpătând mai apoi valoarea de sentiment.

Mă simţeam dezorientat, de parcă ar fi trebuit să explic până la un anumit punct existenţa unui ocean aflat la treizeci de leghe sub suprafaţa globului. Gândul era parte integrantă a unui univers sensibil, o nălucire a unui fals Eu. Sau, mai bine zis, o nălucire a unui lucru prezentat sub diferite forme, o oglindă a unei realităţi egale cu suma forţelor de interacţiune între profund şi senzaţional. Proprietatea unui fenomen de a depinde de acțiuni momentane, o momeală a dorinţei de a străpunge ascunsul. Toate aduceau promisiunea interpretării unei noi rezonanţe în spectrul unei compoziţii revelatoare.

Leadership: Activarea laturii tale de creator se sprijină pe unicitatea capacităţii de a depăşi timpul în care ai trăit ca martor al unei realităţi ce nu poate transfigura persoana umană decât în spaţiul unei descoperiri despre propria sa natură?

Natura propriei mele persoane se înscria, concentric, în natura gândurilor mele. Astfel, am fost capabil să-mi deschid inima și mintea pentru a înțelege în profunzime natura propriei mele realități și relația mea cu Universul.

Timpul devenea un dublu al gândului, un ansamblu de conexiuni neuronale create în mare viteză de o minte care se întreabă - nu doar o minte care caută, în acord cu convenţia „început-sfârşit": *nu e niciodată prea târziu sau prea devreme, este atunci când trebuie să fie.*

Or în cazul unor distribuţii de sarcini ale funcţiilor sale de acces într-un perimetru care îndeplinea polivalenţa unui univers alternativ. Într-un spaţiu care, de multe ori, era diferit de toate celelalte, neţinând cont de măsuri, standarde şi reguli, concentrându-se și dilatându-se după împrejurări, timpul se calcula în funcţie de variabilele „dus-întors". Oare cât de stabil era acest circuit mereu reînnoit de răspunsuri şi de revelaţii?

Gândul, ca şi sufletul are doi ochi, spunea cineva, unul priveşte timpul, celălalt stă întors spre veşnicie. Materializarea gândului depinde întrucâtva de puterea omului de penetrare a nespusului şi de dominare a neantului, admiţând faptul că potenţialul său de sondare este nelimitat.

Leadership: Te plasezi într-o regiune diferită a spaţiului numit „Tu însuţi" în acord cu convenţia „început-sfârşit" din imboldul gândurilor izvorâte dintr-un misterios fluid creator ce curge în planul continuu al interpretării realităţii?

Ceea ce fascinează prin mijloacele prin care proiecţiile gândurilor reuşesc să îndeplinească un scop fixat deseori cu anticipaţie, este modalitatea de a declanşa o nouă reprezentare a spaţiului numit „Tu însuţi", fără a confunda scopul cu cauza. Acest spaţiu face legătura dintre ceea ce îţi imaginezi şi ceea ce experimentezi într-o realitate care depăşeşte cu mult ceea ce este unanim acceptat.

Realitatea după care te ghidezi în viaţă este de multe ori sinonimă cu gândurile care te sabotează, cu aspectele delicate ale personalității tale, ceea ce pentru un creator înseamnă să-ţi construieşti o a doua natură, deasupra naturii dăruită deja de către Creator. Această a doua natură se distinge în funcţie de cum percepi adevărul despre lumea în care trăieşti, şi în funcţie de cum reuşeşti să-ţi descoperi reperele de real folos în viaţă.

Judecând după felul cum omul îşi foloseşte voinţa de a se înscrie cu orice preţ în ordinea imaginarului, leadershipul poate fi considerat o plasare a cunoaşterii într-o lume în care accesibilitatea ei constituie un impediment?

Dacă da, atunci leadershipul devine un domeniu închis în sine, cu un ecou tot mai slab în mase, dar cu o mai mare orientare spre ceea ce îşi imaginează aspirantul la superioritate, făcând din această ştiinţă o adevărată artă a abstractizării, conducând (eventual) la anumite tipuri sau forme de prezentare şi de reprezentare a cunoştinţelor. Dar şi cu o orientare pe cum se poziționează el față de actul de gândire care trece dincolo de nomenclatorul de teme morale, identitare, filozofice acceptate ca repere ale fixării unor limite sociale.

Leadership: Există posibilitatea să-ţi însuşeşti o nouă concepţie despre lume, fără ca însăşi însuşirea acestei concepţii să fie deja o interpretare personală a unei imagini situate foarte departe de adevăr?

Transformarea gândirii, plasarea omului în ipostaza de navigator în spaţiul cunoaşterii prin folosirea puterii oferite de micile străfulgerări de intuiţie şi imaginaţie, dezvoltă cu succes în cadrul leadershipului o superioritate, ce-i drept, oarecum indirect, dar care poate avea o corespondenţă în ceea ce priveşte imaginea de sine. Omul devine superior prin concepţia unică pe care şi-o face despre lume după interpretarea pe care şi-o dă lui însuşi într-un context de redefinire a realităţii.

O imagine situată departe de adevăr este o captură a realităţii care nu se învoieşte cu gândurile asupra unui singur aspect: nu e niciodată prea târziu sau prea devreme să te recunoşti altcineva decât cel ce ai fost până într-un anumit punct al vieţii.

Filosoful român, C. Rădulescu Motru afirma la un moment dat: „ *Adevărurile ştiinţifice semănate în inteligenţele oamenilor sunt neproductive. Ele n-au într-însele putinţa de a fi transformate în valori practice. Ele nu schimbă nimic din rutina obişnuită.* "

Pentru ca adevărurile să fie acceptate, ele trebuie să fie descoperite pe cont propriu şi apoi conştientizate pe deplin. De aceea, a te plasa într-o regiune diferită a spaţiului numit „Tu însuţi" în acord cu convenţia „început-sfârşit" din imboldul gândurilor, pe palierul cald al imaginaţiei, în cadrul diverselor direcţii ale rezultatelor experimentale, este o formă de a te diferenţia de ceilalţi, de a te recunoaşte drept altcineva, este o formă de a te simţi liber să cunoşti tot ceea ce alţii nu pricep.

Astfel tu nu vei mai putea trăi prin cunoaşterea celorlalţi oameni. Dar oare ei vor putea să se lumineze prin ceea ce tu ai asimilat la nivel individual?

Interpretarea pe care o dai fiecărui lucru este o întâlnire dintre gânduri şi realitate care poate omite analiza obişnuită a posibilităţilor lumii de a se revela ca o supapă a suportării existenței într-un univers fără început şi fără sfârşit.

Nălucirile unui creier desprins din neant scot în evidenţă acea latură a omului aflată în pericolul de a obţine mai mult sau mai puţin decât i se cuvine prin sondarea necunoscutului căruia îi corespunde imaginarul, în funcţie de cantitatea de cunoştinţe adaptate la cerințele și exigențele sale personale, dar susceptibile de a fi transferabile altora.

Nălucirile unui creier dotat cu atributele desăvârşirii

On Aprilie 26, 2014

Însuşeşte-ţi elementele unei ştiinţe perfecte, fără să defrişezi un drum imaginar într-o lume pe care mulţi o consideră de neatins.

O realitate neaşteptată mi-a răsărit atunci în faţă, bizară precum o revelaţie care nu-ţi poate lămuri existenţa, părăsindu-te înainte de a apuca s-o conştientizezi bine, aruncând îndoială asupra vechilor mele preocupări dedicate angajamentului intelectual. Ceva inexplicabil m-a proiectat într-un imaginar neobişnuit, un imaginar ce absorbea cu naturaleţe în propriile-mi alcătuiri realul şi irealul, constituind o structură de imagini ce avea drept scop crearea sau accentuarea unor combinații armonioase între artă şi ştiinţă.

Era doar o constatare, un regret şi în acelaşi timp o satisfacţie care pendula indefinit între două extreme, una a închiderii şi una a deschiderii schimburilor de convingeri care anunţau acea curioasă întoarcere asupra originii mele. Ceve ce avea să mă facă să-mi reneg toate amintirile, gândurile, raţiunea mea de a trăi, prin adoptarea unei nebunii provocatoare, dar a unei nebunii cu tâlc.

Iar tâlcul acesta fin, care grăieşte mai mult decât cuvintele înseşi, depăşind graniţele spaţiului şi timpului, a fost exprimat cel mai bine de un personaj al lui Frank Herbert: *" E normal să ne temem de ceea ce nu înţelegem. "*

Leadership: Îţi pui toată încrederea în capacitatea ta de a interpreta corect mesajul unei realităţi care se dispensează de verosimil, dar care are puterea de a pătrunde înţelepciunea şi semnificaţia unei minţi care halucinează?

Asta era marea nebunie, extazul eului liric, o nouă montare a unei creaţii îndrăgite din marele repertoriu Universal, reflexul unei lumi închipuite pornită dinspre imaginar către zone "neasfaltate" ale drumului existenţial. Să mă las purtat, ca o plută prinsă într-o mişcare giratorie, pe aripile unei clipe de pierdere şi căutare, undeva unde n-am mai fost, unde durerea depărtării de ireal se amestecă cu dorul apropierii de real.

Da, asemenea lui Jorj X. McKie, trăiam acea senzaţie de pătrundere într-un mister care deschide adâncurile unui orizont în care poate avea loc o concretizare a unei previziuni interioare, sau mai degrabă a unei idei abstracte: *" Era ceva aproape palpabil. Dacă lăsam să-mi scape o singură pulsaţie din ceea ce se petrecea cu mine, consecinţele puteau fi incalculabil de tragice, nu numai pentru mine, ci şi pentru o întreagă lume."*

Mesajul unei realităţi care se dispensează de verosimil, ca prilej al unei creaţii aflate sub semnul adevăratei arte a potrivirii cuvintelor, este că oricât de mult ai încerca să legi o lume nouă de o mistică profundă, în care puţine lucruri sunt concrete şi clare, până la urma tot va trebui să accepţi existenţa unei taine pe care nu o poţi pătrunde.

Înţelepciunea şi semnificaţia unei minţi care halucinează, care imaginează o subiectivitate capabilă să își relateze propria apariție și recompunere, la trecut și la viitor, înăuntru și în afară, până la starea în care ajunge ea însăşi prizonieră a unei realităţi mult prea complexe, are ca suport măiestria îmbinării a tot ce simţi, voieşti şi gândeşti, care te face să biruieşti suferinţa şi să câştigi mângâierea unei călătorii într-o lume care se străduiește din răsputeri și fără încetare să te transforme în altcineva. Într-un Creator fără margini.

Leadership: Libertatea de a-ţi însuşi elementele unei ştiinţe perfecte este condiţionată de reacţii ale gândirii despre sine, în strânsă legătură cu ceea ce te fascinează?

În ceea ce priveşte realitatea creată trebuie sa luam in calcul posibilitatea evidenţierii calităţii a ceea ce nu este alterabil, ci admisibil, adică a revelării acelor părţi din fiinţa ta pe care ştiinţa nu le-a reprimat, asigură premisele dobândirii de noi impulsuri de adâncire mistică. În studiul celor mai avansate metode de a te depăşi ca individ, spre a deveni un lider, trebuie luată în considerare reacţia gândirii despre sine în interiorul acestei realităţi create, adică felul în care percepi lumea şi lucrurile în mod diferit.

Gândirea creatorului despre sine poate fi strâns legată de capacitatea de a vedea o realitate prin raportarea la Dumnezeu, sau prin revelaţia unei înrudiri spirituale cu armonia universului şi cu „numerele interioare" ale unei vieţi încă nepătrunsă în tainele ei adevărate. De asemenea, gândirea creatorului poate fi strâns legată de ipostaza unui magician care vrea să domine atenţia publicului prin intermediul enigmelor, trucurilor magice şi al ghicitorilor de tot felul.

În acest caz Ego-ul tău, generat de un anumit stadiu de dezvoltare a "producţiei" de înţelegeri bazate pe experienţă, dar în special pe acele conexiuni cu imaginarul, menite să ofere ştiinţei şi cercetării un anumit nivel de calitate şi un grad sporit de autenticitate, începe să te definească în întregime, precum o pată care acoperă fiecare părticică din tine.

Poţi să faci din leadership o călătorie iniţiatică în universul unei minţi din alt univers, a unei minţi care percepe "realitatea" ca fantezie şi îşi trăieşte fantezia cu frenezie, ca realitate?

Gândirea creatorului este şansa de a te introduce într-un spaţiu în care este uşor să te laşi fermecat de un peisaj atipic, de un personaj pe cât de complex, pe atât de direct și de minuțios în existența sa, într-o călătorie introspectivă. Atunci când îţi etalezi cunoaştere într-un joc al confuziei de informaţii şi de perspective este foarte probabil să te loveşti de certitudinea unui nou fapt, al unui nou început, al triumfului ghicitului asupra logicii.

La rândul ei, gândirea ta capătă alte valori, asigurând premisele pentru investiţii suplimentare de realizare a unei aşa zise "nebunii", ceva inexplicabil care te proiectează într-un imaginar neobişnuit, ce absoarbe cu naturaleţe în propriile-ţi alcătuiri realul şi irealul, constituind o structură de imagini ce are drept scop crearea sau accentuarea unor combinații armonioase între artă şi ştiinţă.

Oricând poţi face din tine un explorator de orizonturi care defrişează un drum imaginar într-o lume pe care mulţi o consideră de neatins. E normal ca, în acest caz, oamenii să te perceapă drept un om cu două feţe şi să nu se încreadă în tine, fiindcă se tem de ceea ce nu înţeleg. Fiindcă superioritatea ta, extrapolată din asocierea gândirii ştiinţifice cu nevoile rafinate, indică de cele mai multe ori inferioritatea inteligenţei lor.

Uneori, să duci creaţia la alt nivel printr-un suflu vizionar, printr-o desfăşurare a imaginaţiei în spaţii largi, printr-o capacitate de sinteză rar întâlnită, înseamnă să trăieşti într-o lume a aparenţelor în care nimic nu e ce pare a fi.

Nălucirile unui creier dotat cu atributele desăvârşirii sugerează construcţia unei noi realităţi, deschizând drumul către un izvor nesecat de inspiraţie şi viziune, dar nu capătă valoare decât pentru satisfacerea propriei tale curiozităţi şi conştiinţe.

Aceste „funcţii" ale propriei tale unicităţi, care procesează cantităţi mari de materie

imaginativă, nu creează o punte spre leadershipul uman şi social, nu satisface decât cea clientelă exigentă şi sofisticată doritoare să achiziţioneze un *scientific product* care să îndeplinească toate criteriile de definire ale unor noi componente ale realităţii.

Născut a doua oară

On Ianuarie 21, 2011

Stabileşte un raport direct între tine şi ceilalţi - o deplină şi paşnică integrare a ta în universul lor interior.

Timpul are o adâncă putere, are o forţă ciudată de apreciere şi de evidenţiere a tuturor sentimentelor, a gândurilor pe care ţi le faci cu privire la viitorul tău. Iar timpul pe care îl petreci alături de o persoană dragă, o persoană veselă şi plină de viaţă, îţi poate oferi un răspuns la una din întrebările fundamentale ale existenţei tale: "Cine eşti?"

Filmul *"Pretty Woman (1990)"* . Multimiliardarul Edward Lewis şi "angajata" lui, Vivian Ward în timpul unei scurte partide de şah pe care o jucau mai mult din amuzament.

La un moment dat el, privind-o în ochi, îi spune cu multă delicateţe că e timpul să întrerupă jocul, fiindcă e târziu şi are mult de lucru.

- Ce-ar fi să nu mergi mâine la lucru? Ce-ar fi să-ţi iei zi liberă? îi spune Vivian cu o expresie a feţei ce arăta clar că ar fi vrut să petreacă mai mult timp cu el.

Rămas o clipă pe gânduri, ca şi cum ar fi cugetat adânc, Edward îi răspunde:

- Eu să nu lucrez? Eu deţin compania...

Vei fi incapabil să observi un lucru dacă interesul tău faţă de el nu-ţi este stârnit de o altă modalitate de a-l vedea.

Pentru prima oară în viaţa lui, Edward Lewis, convins de Vivian, şi-a luat o zi liberă. O zi care avea să-i schimbe tot universul interior. Au fost împreună la iarbă verde, au călărit împreună, s-au plimbat prin oraş, au râs, au glumit – ca şi cum ar fi fost în concediu. S-au simţit amândoi minunat. Ce mai ! O zi de neuitat. Într-adevăr de neuitat. Căci, la sfârşitul filmului, după încheierea acelei afaceri importante pentru care venise la New York, Edward se reîntoarce în parc, se descalţă şi păşeşte în picioarele goale pe iarba verde pentru a avea încă o dată senzaţia de relaxare şi de libertate. Îşi simţea sufletul mai senin şi mai voios.

A adăuga artei - de a fi împăcat cu tine însuţi, dincolo de aparenţele pe care le afişezi în lume, o nouă formă de exprimare, înseamnă să introduci în configuraţia ta o nouă unitate de apărare care să te ajute să supravieţuieşti într-o lume ostilă. Integrarea experienţei de sine în leadership, legată de starea sufletească pe care o alegi ca fundal întâmplărilor vieţii tale, îşi găseşte corespondent în realitatea pe care o reprezinţi, pe care o trăieşti, pe care o transformi într-un tablou al fericirii simple, curate, în care împlinirea vine din zâmbete, din dragoste faţă de tot ceea ce te înconjoară.

Dacă natura triumfă în versurile marilor poeţi, în splendoarea fascinantă a tuturor luminilor şi culorilor, a tuturor vocilor ei clare, atunci liniştea sufletească triumfă în materie de dezvoltare a leadershipului, căci menţine la nivel satisfăcător capacitatea personalităţii tale de a hotărî ceea ce este cel mai bine pentru tine, debarasându-te de restricţiile de tipul: *"îmi este teamă să mă desprind de tot ce mă leagă de actual, îmi este teamă să mă expun la orice fel de situaţii în viaţă, din care am ocazia să cresc ca persoană".*

Îţi măsori integrarea experienţei de sine în leadership în funcţie de ceea ce te defineşte sau în funcţie de ceea ce te avantajează?

Dacă se instalează o îngrijorare acută legată de rolul imens pe care-l joci în plan profesional, conştient sau nu de implicaţiile pe care le are o ascensiune dincolo de graniţele realităţii, ai două variante: poţi să accepţi spiritualitatea în complexitatea ei de forme sau poţi să accepţi acea umilinţă dură a renunţării la ceea ce îţi face bine, care nu aparţine însăşi esenţei a ceea ce eşti, a ceea ce înseamnă să fii om.

Leadershipul are în compunerea lui posibilitatea de definire a paricularitatilor imaginii de sine a omului, mai ales în momentele sale de armonie, pace, înţelegere. Adică atunci când intri cu adevărat în contact cu tine însuţi şi încerci să-ţi faci o asigurare a unui viitor de valoare, în acord cu nevoile tale de formare-dezvoltare a personalităţii.

Ai încredere în ceea ce te poate face să te simţi bine ! Integrarea experienţei de sine în leadership se măsoară în felul în care te distanţezi sau te apropii de tine însuţi, de viaţa pe care o trăieşti, de ce se petrece în proximitatea ta, de capacitatea ta de a te desprinde din sclavia unei poziţii profesionale.

Ceea ce te defineşte trebuie să fie strâns legat de acceptarea unui cadru de referinţă pentru realitatea cu care, de fapt, poate fi comparată puterea, prestaţia sau generozitatea ta. În schimb, ceea ce te avantajează cu adevărat este statutul pe care îl ai în momentul când lupţi să devii cineva în ochii altora sau în ochii tăi, din care învingătoare iese calitatea de a te transforma într-o apariţie încântătoare în tendinţele de a ascunde la vedere ethosul.

Leadership: Validezi fiecare experienţă pe care o trăieşti prin ceea ce eşti în stare să construieşti singur "în cădere liberă" de la mare înălţime?

Tu îi ajuţi pe ceilalţi să pună lucrurile în ordine în viaţa lor? La fel cum un pictor transfigurează realitatea dând naturii pe care o interpretează o notă de duioşie, de lumină, de calm, tot aşa Vivian a produs o schimbare pozitivă şi sănătoasă în viaţa lui Edward, dându-i un nou sens, o nouă înţelegere, un nou orizont tradus printr-o stare de linişte interioară şi de armonie.

Vivian a determinat schimbarea lui totală, aducându-i o satisfacţie interioară deosebită, o stare de confort. Moment în care el s-a simţit nu doar mai bine, ci şi mai echilibrat din toate punctele de vedere. Păşind din nou pe iarbă, după ani de zile, el s-a simţit ca un copil care, bucuros că a învăţat să meargă, devine brusc mai plin de viaţă, mai energic, mai vioi. Partea luminoasă din sufletul lui s-a trezit din nou la viaţă.

Vivian a fost antena lui emoţională. L-a ajutat să conştientizeze semnificaţia mai profundă a vieţii. Emoţiile au căpătat mai multă semnificaţie în viaţa lui şi au avut un impact direct asupra acţiunilor sale.

A construi ceva singur "în cădere liberă" de la mare înălţime înseamnă să-ţi creşti valoarea de referinţă fără să-ţi ordonezi priorităţile legate de ceea ce ţi se întâmplă în timp ce eşti ocupat să faci alte planuri.

« Născut a doua oară » este un fel de a spune că, pentru a da valoare leadershipului tău, trebuie să determini o schimbare majoră de atitudine şi de mentalitate în rândul celor care te înconjoară. Nu înseamnă altceva decât să le uşurezi celorlalţi sufletul, propria existenţă, să îi dezlegi de vraja apăsătoare a unei vieţi lipsite de armonie şi echilibru. Pentru asta trebuie să stabileşti un raport direct între tine şi ei - o deplină şi paşnică integrare a ta în universul lor

interior. Ei, dând crezare gândurilor pozitive pe care le insufli, vor manifesta o stare de bucurie sufletească.

Nu uita că leadershipul este un mijloc de apropiere şi de cunoaştere între tine şi ceilalţi oameni. Ajută-i să pună lucrurile în ordine în viaţa lor, ajută-i să găsească noi modalităţi de a-şi trăi corect viaţa şi să se debaraseze de o mentalitate păguboasă şi amăgitoare. Ajută-i să beneficieze astfel de fundamentul necesar pentru o funcţionare eficientă: armonia în viaţă. Ajută-i să răspundă la întrebarea fundamentală a vieţii: *"Cine sunt eu cu adevărat?"*.

E valabil şi pentru tine. Serviciul şi obligaţiile care îţi revin îţi vor pune mereu la încercare limitele. Prin urmare, cred că e bine şi util să găseşti o supapă sănătoasă – precum "schimbarea de peisaj" pentru a te elibera de orice frustrare şi orice tensiune. Nu uita că suprasolicitarea sporeşte deseori probabilitatea unui conflict cu colegii de serviciu sau cu angajaţii.

Concluzie: Contribuţia ta, ca lider, la "armonia" în colectivul în care îţi desfăşori activitatea, este covârşitoare. Această armonie se poate obţine uneori foarte greu datorită diferenţelor dintre oameni în ceea ce priveşte educaţia, cultura, etc. Stabilind un raport direct între tine şi ceilalţi, integrându-te în universul lor interior, poţi produce schimbări pozitive.

Încearcă să reaprinzi flacăra din sufletul celorlalţi !

Natura nelimitată a experienţei vizuale provenită din simţuri

On Aprilie 22, 2022

Învaţă să menţii în simţuri imaginea care ţi se desfăşoară în minte, făcând apel la subtilitatea cu care artistul îşi imortalizează impresiile cele mai tainice.

Guma de mestecat pe care o apreciez cel mai mult de la o vreme încoace este "Fini", cu o aromă intensă de fructe proaspete, având o compoziţie bine structurată şi o densitate ridicată de jeleu, oferind avantajul unui gust plăcut, dulce-acrişor. Guma "Fini" se pretează cu real succes în orice fel de circumstanţe, mai ales în varietatea de combinaţii în care o pot savura fără griji, fără rezerve, fără să mă gândesc că-mi bat joc de corpul meu: la aniversări, la reuniuni, la tot felul de evenimente sau petreceri. Este mai ceva ca un desert delicios.

Cu oricare ocazie, având o însemnătate aparte pentru clipa în care orice artă se străduieşte să devină realitate, savurez totodată fascinația ce ia naștere din absența compromisurilor sau din perspectiva adaptării la situații extraordinare. A şti să mesteci guma "Fini", ca pe un jeleu care cu fiecare mușcătură aduce o senzație de eliberare, trezind simţurile, revigorând papilele gustative, este o atitudine de mare mândrie, dar şi o atitudine de mare candoare, fiindcă eşti mai plin de suflet faţă de toţi cei cu care intri în contact.

Aceeaşi atitudine o am atunci când trebuie să surprind şi să pictez o emoţie, un gând sau o experienţă intensă, cu multă artă şi sensibilitate, în câmpul forţelor misterului care alimentează imaginaţia, *Azaresenthos.*

Or atunci când trebuie să pictez tabloul dinăuntrul simţurilor mele, devenind realitate printr-o materializare a sentimentului de libertate, a sentimentului de fascinaţie indispensabil pornirii într-o aventură a creaţiei de o mare coerenţă. în care culoarea şi gustul se întrepătrund printr-un mecanism misterios, îmi place să descopăr un alt mod de dobândire a unor simțuri corporale prin care aromele sunt percepute și recunoscute ca fiind permanente.

Leadership: Poţi să transformi percepția care rezultă din stimularea unui nerv gustativ într-un spațiu dedicat vizualului în cele mai complexe forme ale sale?

Vai, cât de mult îmi mai place arta. În această privinţă, gustul pe care îl simt atunci când pictez un zâmbet, acelaşi zâmbet pe care, într-un fel anume, îl conferă tocmai aroma de dulce-acrişor a gumei de mestecat "Fini", desemnează începutul unei imagini cuprinsă în teoria viziunii: imaginea zâmbetului meu este o reinterpretare a unui gust rafinat, suficient de bun pentru a-l face accesibil tuturor.

Ei bine, cine îmi vede zâmbetul larg, instinctiv va şti că sunt încărcat de emoţia unui gust intens şi autentic, exprimat printr-un *Afragmentoriss* , o percepție care rezultă din stimularea unui nerv gustativ. Gustul, o invitație la sinceritate, la deschidere și autenticitate, canalul acesta invizibil care uneşte simţurile şi funcţiile propriului trup, parcă îmi forţează un reflex cerebral care nu schimbă doar expresia feţei, ci totodată stimulează creierul să producă endorfine.

Ce mai, guma "Fini" este o binecuvântare de la Creatorul suprem ! Mai întâi fiindcă îmi îngăduie să pornesc într-o aventură a cunoașterii şi experimentării în artele vizuale, apoi fiindcă îmi inspiră imaginea unei singure persoane: a artistului care îşi arogă un segment sau o bucată dintr-o zonă artistică şi spune că este numai a lui.

Leadership: Gust produsului pe care vrei să-l scoţi în evidenţă poate fi tradus într-o emoţie ce devine realitate printr-o materializare imediată în concretul existenței unui personaj descris între coordonatele "senzorial" şi "intelectiv" ?

Gustul este o actualizare a vizualului, un update asigurat de elementul dominant care schimbă aspectul fizionomiei, putând crea un efect de lifting al privirii, sau îndulcind trăsăturile cele mai pregnante ale personalităţii. Mai rămâne să iau în calcul tabloul dinăuntrul simţurilor mele, câmpul forţelor care-mi pictează chipul fiind asemănător senzaţiei de energie pe care o dă percepţia complexă a unei interpretări chimice, manifestându-se diferit şi neaşteptat, legată de practica savurării fructelor dulci-acrişoare.

Și deodată intru în lumea extraordinară a artistului, unde orice gust este tradus printr-o emoţie și orice nobilă emoţie devine realitate printr-o materializare imediată în concretul existenței unui personaj descris între coordonatele universului la care aspiră cu intensitate. Or acest fapt se asociază cu ivirea unui punct de vedere exprimat de John Fowles în cunoscutul roman "Daniel Martin":

"Nu este de domeniul misticului. Este materia cuprinsă în natura lucrurilor. Am mai avut o dată această senzaţie după multe ore de lucru, cu un papirus pe care îl descifram. Ieşisem din timp, devenisem papirusul însuşi. Dar asta nu m-a ajutat să-l descifrez. Nu în acest sens eram papirusul. Poate eram fluviul. Fluviul care desparte. Pentru câteva clipe tot ceea ce nu trece dincolo de fluviu. Acel fluviu care desparte."

Se observă uşor că atunci când încerc să descriu gustul gumei de mestecat, mă confrunt cu percepţia complexă a unei interpretări concentrate asupra legăturii dintre natura omului şi natura lucrurilor care trec dincolo de cuvinte, de percepții.

Mă gândesc că şi gustul are o direcţie spre care se îndreaptă simţurile mele, însă nu acele simţuri de natură chimică sau gustativă, ci este vorba de un feeling aparte, un indiciu că pot fi altcineva: cineva cuprins între concretul senzorial şi raportarea raţional-intelectivă la o realitate mai complexă şi nevăzută care mă face să tânjesc după un alt început de poveste.

Leadershipul este un produs direct al vizualului care te apropie de o poveste în care personajul se autocaracterizează drept un receptor al gustului pe care se bazează raţiunea asumării unei noi identităţi (artistice).

Natura nelimitată a experienţei vizuale provenită din simţuri este redată prin intermediul gustului unui produs care nu îşi consumă niciodată factorul de prestigiu. Pentru a înţelege mai bine fenomenul experienţei vizuale, învaţă să menţii în simţuri imaginea care ţi se desfăşoară în minte, făcând apel la subtilitatea cu care artistul îşi imortalizează impresiile cele mai tainice.

Natura secretă a lui Thot

On Februarie 10, 2009

Rezonanța dintre divinitatea primordială și conştiinţa de sine modelează conturul realității atemporale, într-un efort de a deschide o perspectivă nouă asupra originilor propriei existențe.

Ibebi tăcu. Între ei se instală tăcerea, abia tulburată de suflul respirației. Apoi Ibebi zise:

- Acum, spune-mi ce ştii despre crearea lumii după învăţătura din acest templu al lui Thot.

- Încă o dată, nu pot să-ţi spun decât ceea ce am citit în prima carte a lui Thot, răspunse Keops. La origine, totul se afla în Thot, el se confunda cu cele opt divinităţi misterioase primordiale.

- Cine erau aceşti zei misterioşi? întrebă Ibebi.

- Aceşti zei erau patru, dar aveau în ei cele două aspecte, masculin şi feminin, creatoare fiind numai unirea lor. Şi aceste ființe neinteligibile se numeau Nun, forma sa feminină fiind Naunet. Al doilea cuplu era Huh şi Hauhet, al treilea, Kuk și Kauket, al patrulea, Amon și Amaunet. De aceea zeul creator a putut să spună despre el însuşi: "Sunt Unu care devine Doi; sunt Doi care devine Patru; sunt Patru care devine Opt"; sunt Unu care îl protejează pe Opt, căci aceste divinități sunt doar emanaţii ale naturii sale.

Leadership: În ideea că "Sunt Unu care devine Doi, sunt Doi care devine Patru", cum percepi relația dintre simetrie și expansiunea conștiinței de sine în viziunea ta asupra originii realității?

- Aceştia Opt nu constituie esenţa lui Thot, nu sunt legate de el foarte strâns, încât le creează din propria substanță, adică le face să iasă din el prin puterea cuvântului sau, mai exact, prin voinţa sa?

- Aşa se pare. Căci Nun şi Naunet sunt două aspecte ale lumii primordiale neorganizate, ale haosului care, prin unire, va da naştere lumii organizate. Dar este scris că Huh şi Hauhet sunt apele, iar eu nu ştiu ce trebuie să înțeleg prin asta. Să fie oare apele fluviului divin care iese din matcă şi fecundează Pământul?

- Nu, căci doar mult mai târziu apele Pământului și apele cerului au venit la viaţă. Vei afla natura lor mai târziu. Dar continuă.

- Kuk şi Kauket înseamnă spațiul infinit cufundat în întuneric, înainte de crearea luminii.

Leadership: Consideri că un ciclu repetitiv al divinităților poate reprezenta un reper vizual pentru înțelegerea modurilor în care realitatea se pliază pe diferite nivele ale propriei tale conștiințe?

- Oare nu în acest spațiu fără limită se va realiza crearea lumii sensibile?

- Desigur.

- Căci, fără acest spațiu, nimic nu poate să aibă întindere şi totul se reduce la un punct minuscul. Nu crezi?

Keops încuviinţă cu o mişcare a capului. Apoi întrebă:

- Dar nu ştiu să spun nimic despre Amon şi Amaunet. De ce acest cuplu divin este ascuns? Dacă este ascuns, nu poate să apară vederii noastre, şi de ce, dacă este, nu se manifestă?

- Tocmai aceasta este partea de mister, ceea ce este ascuns curiozității muritorilor. Află că toate aceste aspecte ale universului, care se situează la baza totalităţii sale, se află în Thot, ele constituie natura secretă a lui Thot.

Perspectiva ta asupra creației, văzută prin prisma descoperirii divinității, îți influențează modul în care percepția vizuală capătă formă și relevanță în conștiința ta.

Natura secretă a lui Thot vizează acele aspecte ale universului, care se situează la baza totalității unei noi înțelegeri despre sine, care te poate transforma într-un om mult mai bogat spiritual, capabil să concentreze o putere mai mare în mâinile sale.

Te-ai gândit vreodată că interpretarea acestor emanații ale naturii divine ar putea să-ți dezvăluie noi tipuri de expunere asupra relației dintre finit și infinit?

*** Notă:** Rachet, Guy - *Keops si conjuratia Ibisului*, Editura Lucman, 2003.

Nebunia cunoaşterii în spaţiul realităţii extinse

On Ianuarie 16, 2015

Concentrează-te pe atingerea unui anumit stadiu al procesului de prelucrare şi rafinare a cunoaşterii, întărindu-ţi capacitatea de a sugera formule autentice existenţei.

Nu cunoşteam toate raporturile dintre existenţă şi inexistenţă. Mi se părea că neantul este doar un efect ireversibil de prelungire a unei iluzii, de genul celei ale spaţio-temporalităţii. Şi că este constituit din adevărate legi nescrise. Dar tocmai asta este partea cea mai interesantă. Puteam să rămân încadrat în geometria unei lumi explorate strict ştiinţific, prin forţa interpretării unor variate tipuri de concepte, situatii, procese, şi a modului cum maximizam relaţiile între entităţile neobservabile direct, concepute în coordonatele unui univers fantastic.

Un act al conştiinţei de dincolo de spaţiu şi timp. Făceam un experiment care depindea de atingerea unui anumit stadiu al procesului de prelucrare a cunoaşterii întemeiate pe convingeri subiective, integrând anumite entităţi de sens în spaţiul existenţei mele, prin analizare redusă – frumos-urât, bine-rău, dragoste-ură. Dar mai ales prin utilizarea combinată a convingerilor nealiniate la câmpurile de undă ale adevărurilor lumii. Nonconformist, surprindeam fenomenele ce se înfăţişau în fiecare zi privirii mele, succedându-se şi repetându-se fără întrerupere, precum rotaţia unor sateliţi naturali în jurul planetelor.

Când un artist vrea să trăiască acea libertate a oricărei stări lipsite de productivitate, îşi ia ca model de inspiraţie un personaj identificat cu istoria unei lumi ce îşi păstrează identitatea şi sensul într-un spaţiu al minunilor, iluzii minunate ale unor noi întrebări, din alte vieţi şi alte universuri.

Marea nebunie a cunoaşterii este să te identifici cu un personaj care are o lume a lui, pe care încerci s-o înțelegi și s-o creezi sau s-o recreezi într-un spaţiu al comunicării sinelui prin cuvântul unui creator atotputernic.

În exemplele folosite pentru manifestarea creaţiei există întotdeauna cu o deviere de la cadrul spaţial marcat de verticala şi orizontala unei lumi dominate de două puteri complementare: simbolismul şi universalismul. Dacă la început adevărurile la care am ajuns s-au dovedit a fi o pură speculaţie, simple curiozităţi cu totul nefolositoare, un du-te-vino de lumini şi umbre, mai apoi ele s-au transformat în certitudini ce au deschis poarta răspunsurilor la întrebarea călăuzitoare a filosofului german, Martin Heidegger: „Ce este existenţa?".

În romanul lui Cervantes, omul realist şi practic, Sancho Panza, încearcă să-l lecuiască pe Don Quijote de nebunia sa. Ideea era să pună o oglindă în faţa nebuniei lui, să înregistreze fiecare dintre iluziile sale absurde şi ridicole, astfel încât el să vadă cu limpezime înăuntrul propriei sale lumi şi să nu permită niciunui un factor exterior să oculteze adevărul.

Dar mintea lui Don Quijote refuză să vadă cu limpezime „evidentul" şi să înţeleagă valenţa transformatoare a personalităţi sale. Cu toate acestea, el reuşeşte să perceapă lucrurile mai clar decât oricine altcineva din jurul său, pentru că nu ținea cont de clișeele mentale care întunecau judecata celorlalți.

Leadership: Îţi extinzi orizonturile ştiinţei satisfăcând aspiraţia valorificării ample a descoperirilor care dau direcţie existenţei într-un cadru al creaţiei care pune virgulă acolo unde lumea pune punct?

Ştiinţa este ceea ce rămâne după ce ţi-ai justificat invadarea vieţii private de către forţele unei viziuni care frizează nebunia. Susţinerea unei viziuni este un proces care poate avea la bază definirea unor adevăruri necunoscute, înfăţişând lumea dintr-o direcţie promiţătoare. Dar, în acelaşi timp, este o modalitate de întărire a capacităţii tale de a sugera formule autentice existenţei, care la rândul ei creează toate celelalte forţe.

Întregul meu demers artistic viza activitatea unei creaţii care pune virgulă acolo unde lumea pune punct, cu un simţ al poeziei, îmbinând elegant ficţiunea şi realitatea într-o poveste care trece dincolo de spectacolul imediat al vieții și proiectează o lumină emoționantă peste cele mai derizorii fapte. Viziunea dă o imagine asupra gradului de încorporare a ştiinţei într-un cadru unic, în care leadershipul se poate manifesta ca o forţă mentală de pătrundere şi de percepere a unor adevăruri care pot schimba modul în care oamenii văd existenţa, lumea şi locul lor în ea.

De fapt, nebunia mea consta în faptul că trăiam în acelaşi timp două vieţi complet separate: una în care ştiinţa schimba modul în care mă gândeam la lume şi una a poveştii în care eram personajul principal dintr-o serie de interacțiuni nedorite ale unei realităţi cu efecte imprevizibile. Descoperirile pot servi ca exemplu strălucit al puterii de a face ştiinţă, chiar dacă noţiunile cu care operezi, depinzând de interpretările subiective atribuite realităţii, sunt astfel constituite încât să ofere existenţei un sens fundamental simplificat, nemarcat de evaluarea pozitivă ori negativă a celor din jur.

Aici mă refer la un gen de leadership care poate fi împlinit numai dacă înaintezi pe calea experimentului de tip „ *Artificial Existence Form* ", vizând construirea unei realităţii ce poate fi valorificată într-o multitudine de ficțiuni în raport cu mai multe puncte de vedere. O creaţie care pune virgulă acolo unde lumea pune punct este un tot a mai multor elemente ca imaginaţie, compoziție, limbaj, interpretare, cromatică, stilistică, perspectivă, mesaj, pe care numai o poveste reuşeşte să le reproducă cel mai bine în afara vieţii recunoscute ca atare prin practică.

Leadershipul tău este clădit pe ştiinţa întrebărilor care îşi găsesc răspunsurile în „sclipirea nebuniei", vizavi de trasarea unor noi coordonate de factură umanistă în centrul unei ficţiuni care trebuie luată drept realitate?

Sclipirea nebuniei, devenită un fel de încercare de a reda o emoţie puternică care se dezvăluie doar în practica unei mai bune poziţionări a gândirii pe o direcţie a creaţiei, poate fi percepută ca o luptă între două personalităţi distincte: una care vrea să schimbe lumea, alta care vrea să facă parte dintr-o lume care nu respectă regulile realităţii. E ca şi când ai face parte dintr-o poveste a cărui personaj se ridică din mister cu o forţă extraordinară pentru a imortaliza o întreagă existenţă veridică.

Acest gen de leadership, clădit pe ştiinţa întrebărilor care îşi găsesc răspunsurile în „sclipirea nebuniei", este o formă de auto-angajare în actul definirii şi promovării unei noi realităţi constituite din adevărate legi nescrise. Adică plăsmuite prin integrarea unor entităţi de sens în spaţiul existenţei.

Ne împotrivim obiceiului de a amesteca concluzii false cu cele corecte. Vom spune că leadershipul are la baza producerea revelaţiilor trăite şi exprimate de individul ce posedă o minte absorbantă de noi înţelesuri şi premise, supuse unui raţionament logic (adică unul corect), rezultând ceva care contrazice realitatea pe care o văd ceilalţi. Liderul este individul care reuşeşte să perceapă lucrurile mai clar decât oricine altcineva din jurul său, pentru că nu ține cont de clișeele mentale care întunecă judecata celorlalţi.

Cine încearcă să stabilească o nouă realitate, o nouă filă a existenţei care poate să capete mai mult sens, utilizată ca un substitut pentru o îmbunătăţire a actului cunoaşterii ştiinţifice,

prin valorificarea şi recuperarea necunoscutului şi non-explicitului, va putea să deschidă calea către promovarea unei noi definiri a leadershipului.

O ficţiune care trebuie luată drept realitate este o existenţă a cărei solemnitate poate fi susţinută, interesant, în funcţie de actul de creaţie căruia îi eşti dator să-i acorzi o notă de "nebunie" prin însăşi viziunea comunicată printr-un autoportret realizat din perspectiva naratorului omniscient.

Nebunia cunoaşterii în spaţiul realităţii extinse vizează acea experienţă de creare a unor raţionamente care conduc la articularea unor noi puncte de vedere asupra existenţei ce poate să condiţioneze echilibrul individului cu lumea. Omul poate stăpâni realitatea, lumea şi existenţa numai pe măsură ce le cunoaşte în mod ştiinţific. Şi numai prin utilizarea combinată a convingerilor nealiniate la „câmpurile de undă" ale adevărurilor admise unanim.

Nebunia este o operă de artă

On Aprilie 12, 2015

Reuneşte-ţi experienţa, talentele şi punctele forte cu o structură de navigare într-un univers de idei şi viziuni, într-un mod care să inspire şi să dea artei de a face ştiinţă o nouă orientare.

Voiam să transform ceva de nepătruns în cu totul altceva, pe care să îl pot defini ca fiind real, prezentându-l ca pe un adevăr restrâns care să nu intre în minţile oricui, nefiind înţeles decât prin constituţia sa spaţio-temporară.

Confuz. Mă simţeam ca şi când aş fi traversat un coridor gol, luminat de o singură flacără: a curiozităţii de a înţelege ceva care doar pare, prin modificarea consumului de energie a vidului. În spaţiul gol se transmite, de la un punct la altul, ca printr-un fluid nevăzut, o forţă ascunsă, o parte a unor răspunsuri aflate sub incidenţa nebuniei. Iar nebunia este o operă de artă, este reflexul unei lumi închipuite, pornind dinspre obsesie spre realitate.

Insistent, asupra gândirii mele mistificatoare plana întrebarea pe care îmi sprijineam credinţa, în înfiorătoarea nebunie pe care o cream singur atunci când făceam saltul spre o raţiune superioară ce păstra inteligibilul: „Cum?" În timp ce sentimentul pătrunderii întregului neînchipuit de către un adevăr ştiinţific, mai înalt decât orice gând, conturat în felul în care pictorul organizează spaţiile goale pe pânză dezvăluind noi detalii, căpăta variate nuanţe şi manifestări.

Era un punct de interes care putea fi poziţionat în mod simetric sau aleatoriu, prin extragerea materiei din ortoexistenţă, prin simpla trecere a timpului, în acelaşi fel în care grandiosul şi sublimul din artă, cu numeroasele lor nuanţe şi variante, formează un grup unitar coagulat în jurul unei perfecţiuni ce devine echivalentul înnoirii însăşi, forţa de a cuceri o nouă realitate.

Dacă Newton a încercat, dar n-a reuşit să unifice în mod convingător descrierea corpusculară cu cea ondulatorie a luminii, eu am izbutit să unific ceea ce era ascuns cu ceea ce era contrar logicii uzuale. Nebunia este sinonimă creaţiei pure, presupune resetarea gândirii, generarea unui impuls motivaţional pentru a îndrăgi incognoscibilul, ducând până la pierderea omului în vid fără posibilitate de întoarcere.

Leadership: Viața ta își poate afla sensul printr-o schimbare la nivel de interpretare a unei teme abordată prin argumente înlănţuite într-o gradaţie care merge spre concluzii greu acceptabile raţional?

Artistul este suma contrastelor dintre esenţa şi aparenta, dacă am pune cap la cap tot ceea ce influenţează rolul său într-o închipuire a unui chip purtat în balansoarul abiselor. El reprezintă acel canal de comunicare atins de inspiraţie care atinge aspectele relaţiei dintre cuvânt, imagine şi semnificaţie, accesat prin raţiunea de a trăi o altă experienţă pe care o consideră definitorie pentru formarea lui ca om, chiar dacă dintr-un Ego nemăsurat.

Ca să devii şi să rămâi artist până la capăt, într-un mod care să inspire şi să dea artei de a face ştiinţă o nouă orientare, pe cărările întortocheate ale neînţelesurilor şi interpretărilor infinite ale ascunsului în care nimeni nu poate intra, trebuie să te arunci în golul pe care îl dă ireversibilitatea proceselor de transformare ale realului.

Un om al progresului este produsul unei minţi care nu poate trăi în prezent, fuge tot timpul

înainte şi înapoi spre o destinaţie diferită de aceea la care năzuiesc ceilalţi oameni. El este însoţit de o întoarcere la 180 de grade a minţii care poate exprima revelarea unei crize a fiinţei aparţinând intenţionalităţii de a face vizibil ceea ce încă nu este.

O înnoire care nu poate fi cuprinsă în marginile conştiinţei poate duce la un fals pozitiv, la un nivel superior de viziune a ceea ce se petrece dincolo de experienţa directă, în aşa fel încât să aibă sens, putând fi concretizat într-un produs creativ.

Astfel, realitatea nu mai este văzută ca o experienţă de viaţă care te maturizează, unică şi personalizată, ci începe să fie percepută ca un fel de exil autoimpus, asumat, într-o altă lume în care personajele trăiesc uneori experienţe limită ce le plasează în alte dimensiuni ale receptării faţă de fascinaţia unei imagini care îşi exprimă sensul printr-o analogie cu multe faţete ale aceluiaşi sine.

Leadership: Adopţi o abordare "open source" definită printr-un funcţionalism împins dincolo de limitele în care te-ai format ca om al progresului, din perspectiva unui paralelism cu adevărata natură a realităţii pe care o trăieşti?

Leadershipul, în cursul acestui proces de penetrare a enigmelor nerezolvabile raţional, fapt ce îşi pune amprenta pe întreaga ta evoluţie, bazată pe o abordare "open source", se defineşte printr-un funcţionalism împins dincolo de limitele în care te-ai format ca om al progresului şi în care ţi-ai însuşit cunoaşterea.

Aici leadershipul lasă loc unei autenticităţi depline, dar în acelaşi timp se plasează în spaţiul unei ambiguităţi în ceea ce priveşte definirea realităţii şi punerea în aplicare a ceea ce-ai dobândit prin strădania de a transforma ceva de nepătruns în cu totul altceva, pe care să îl poţi defini ca fiind real, prezentându-l ca un adevăr care aparţine numai şi numai matricei cunoaşterii.

Abordarea „open source", caracterizată ca un proces de creştere a individualităţii şi unicităţii ideilor, are ca principal aliat în demersurile de asimilare a unei viziuni îndrăzneţe asupra viitorului tocmai curiozitatea de a înţelege ceva care doar pare, prin pătrunderea într-un spaţiul greu de definit.

Ceva de dincolo de aparenţe, ca o alcătuire de mare forţă de convingere, manifestând apartenenţa la acelaşi unic adevăr. Unul care trebuia luat drept concept definibil în limbaj ştiinţific şi nu redus la semnificaţia sa din limbajul comun. Un adevăr care chiar dacă creează senzaţia unei dezordini studiate se poate traduce printr-un plus de originalitate, pe linia măreţiei şi vizionarismului.

Dorinţa cea mai puternică a unui artist al mixturilor de realităţi rămâne aceea de a-şi reuni experienţa, talentele şi punctele forte cu o structură de navigare într-un univers de idei şi viziuni, pentru a răspunde la cerinţele schimbării şi pentru a se adapta la necesităţile impuse de propriile sale idealuri.

Starea în care artistul îşi judecă propria creaţie, izolându-se de realitatea celor din jur, stă sub constrângerea necesităţii implacabile de a trăi într-o reprezentare a realităţii pe care creierul său a construit-o pe baza unor opoziţii faţă de tot ceea ce este integrat în graniţele normalităţii.

Să nu judeci niciodată un artist, pentru că s-ar putea să nu-ţi dai seama de diferenţa dintre un nebun şi un creator de noi perspective de abordare a personalităţii.

Nebunia este o operă de artă prin redefinirea realităţii pe care o experimentezi într-un context de genul "trebuie să deschid o fereastră spre adevărurile care scapă observaţiei obişnuite". Iar înfiorătoarea nebunie pe care omul o creează singur în încercarea de a face saltul spre o raţiune superioară - păstrând inteligibilul: „Cum”? - spre care tind elementele sale de unicitate, se declanşează atunci când începe să obţină rezultate din nimic.

Cine poate să modeleze dintr-un nimic un colos, cuprinzând pe de-a-ntregul măsura nebuniei care poate fi alăturată ieşirii din cadrul normal al gândirii, cel care înţelege în ce constă această experienţă revelatoare prin extinderea profunzimii în a crede într-un indefinit care poate fi interpretat ca o funcţie de alegere a inputurilor şi outputurilor, acela va izbuti să unifice ceea ce este ascuns cu ceea ce este contrar logicii uzuale. El va fi un indicator reprezentativ al superiorităţii.

Nebunia unor exigenţe perfect realizabile

On Aprilie 24, 2014

Stabileşte etalonul valorii pe care îl aduci în mod specific şi exclusiv ştiinţei, încât efectul de convergenţă spre tine însuţi să fie unul vizibil şi constructiv.

Speram să găsesc în mine însumi făgăduiala acelei virtuţi sublime, sub forma tendinţei particulare de combinare şi asociere între funcţiile punctelor de contact ale unei realităţi mai adânci. În care suprafaţa de sprijin a ansamblului suport-creaţie, determinată prin măsurători ale timpului în fenomene explicabile şi inexplicabile, nu prezenta un risc pentru imaginaţie. Nebunia este exigenţa omului de a răspunde concomitent la numeroase cerinţe, fără a investiga setul de idei care formează cadrul limitativ al întregii sale gândiri despre lume şi al experienţei despre lume.

Ceva anume mă îndepărta din rutina strictă a gândirii metafizice pe care o datoram unei pleiade de arhitecţi ai revoluţiei creatoare, alcătuind o bază nouă de susţinere ştiinţifică. Chintesenţe ce închid în ele tot ceea ce înseamnă standard realist, ceva care mă reţinea din a mă bucura de experienţa conştiinţei supreme.

Practic, mă îndeletniceam cu munca unei vieţi de cercetare pe care numai imposibilul unei minuni eterne o făcea mai tainică şi mai puternică, datorată purtării de grijă faţă de mult încercata viaţă a unui personaj prins într-un careu de transformări peste limite, neînţelegând repetiţiile şi sursele lor de constituire. Într-un mod cât mai ingenios cu putinţă, mă străduiam să mai pun o cărămidă la planurile mele de viitor în ceea ce priveşte crearea unei gândiri alternative, formată din alte gândiri din ce în ce mai interconectate.

Leadership: Poţi să te impui ca o consecinţă neaşteptată a elaborării unor modele de raţionament mai sofisticate, fără să cazi în capcana emiterii unor presupuneri şi aproximări ce pot fi abandonate în spaţiul reprezentării abstracte a realităţii?

Mai degrabă, cred că încercam să reînvii un gen de gândire mort de câteva mii de ani, fără să-mi dau osteneala să reflectez la ce reprezint eu însumi ca plăsmuitor de noi forme de gândire. Mă simţeam cumva stânjenit, stingher în prezenţa unor gânduri alandala, de parcă aş fi avut de doborât un copac cu o secure neascuţită. De parcă ar fi trebuit să creez o nouă realitate din nimicul unei găuri negre, a unei speranţe trecute, care să întreacă orice imaginaţie prin simplul fapt al accesului la o literatură deja apusă.

În volumul "Despre înţelepciunea anticilor", celebrul filosof Francis Bacon punea o întrebare foarte pertinentă: *"Când pui în faţă un corp simplu de lumină şi de adevăr, la ce mai foloseşte să pui în fiecare colţ mici luminiţe palide de combateri? De ce, când sunt distruse îndoieli, să stârneşti şi oarecum să dai naştere la alte îndoieli tocmai prin rezolvare?"*

Tristeţea care devine o stare de spirit nu se justifică decât în faţa greutăţii de a defini o nouă realitate prin prisma a ceea ce omul deduce din legile vieţii, complicându-le cu presupuneri ce nu sunt adevărate. În această ecuaţie, eu eram cuprins de acea nebunie care marchează nevoia unei noi experienţe de cunoaştere greu realizabile, potrivit criteriilor generale de individualizare a manierei de a face artă.

Leadership: Efectul de convergenţă spre tine însuţi este realizat cu mijloace care îţi permit atingerea unor virtuţi reale sau închipuite?

Omul nu poate fi cu adevărat ajutat să se autodepăşească decât dacă ajunge la cunoaşterea modului său individual de a evolua. În această privinţă un rol important îl are sentimentul de trezire dintr-un somn adânc, acel soi de eliberare spre un model năzuit de personalitate, cu aspiraţiile deasupra posibilităţilor sale de progres, călăuzit de convingerea că va putea accede fără piedici la rolurile esenţiale şi de prestigiu din domeniul în care activează.

Leadershipul se compune şi se dezvoltă într-un joc de verificare a potenţialului de a te depăşi. Dar efectul acesta de convergenţă spre tine însuţi, spre ceea ce faci, spre direcţia ta de dezvoltare considerată firească, spre etalonul valorii pe care îl aduci în mod specific şi exclusiv ştiinţei pe care o reprezinţi, trebuie urmărit şi realizat cu mijloace care să-ţi permită atingerea unor virtuţi reale, nu închipuite. Atingerea unor valori neînţelese înainte, prin trăire şi simţire - numai acestea pot să-ţi înalţe fiinţa de la " *Omul Inferior* " la " *Omul Superior* ".

Dacă încerci să alcătuieşti o bază nouă de susţinere ştiinţifică, reînviind un gen de gândire mort de câteva mii de ani, fără să-ţi dai osteneala să reflectezi la ce reprezinţi ca plăsmuitor de noi forme de gândire, ar însemna să asamblezi o maşină de curse din diverse piese luate alandala.

Acest proces de compunere şi organizare, din bucăţi, a unei structuri ştiinţifice te ajută să ajungi mai aproape de marile realizări personale, să-ţi încerci limitele, să te descoperi, provocându-te să treci dincolo de graniţa realităţii palpabile. Şi să descoperi o lume nouă.

Dar nu-ţi îngăduie să treci dincolo de zidurilor închisorilor imaginare confecţionate de-a lungul timpului în procesul adaptării la un real pe care nu-l pot controla în totalitate. Asta, pe lângă faptul că îţi restricţionează accesul la tiparele existenţiale şi la condiţiile de viaţă cotidiană.

Leadership: Experienţei privirii în tine însuţi i se opune altă experienţă care s-o contrazică?

Evident, poţi găsi o motivaţie în eforturile tale de a aplica o forţă excesivă pentru răsturnarea obişnuinţei de a gândi în trecut, în specificul unei identităţi în "balansare" pe care o porţi în relaţia cu rolul pe care trebuie să-l interpretez în jocul de verificare a potenţialului de a te depăşi, al cărui final nu-l cunoşti. Dar nici nu pot fi călăuza unei nebunii.

Experienţei privirii în tine însuţi, o parte a actului de autocunoaştere, i se opune altă experienţă care s-o contrazică, cea a diversităţii de idei şi viziuni, atunci când devii prizonier într-un careu de transformări peste limite, neînţelegând repetiţiile şi sursele lor de constituire, străduindu-te să mai pui o cărămidă la planurile tale de viitor în ceea ce priveşte crearea unei gândiri alternative.

Imaginea realităţii orientată spre experienţa privirii în tine însuţi este adevărul care se întoarce la tine după ce în prealabil ai imprimat raţiunii o direcţie mai puţin aşteptată, mai puţin previzibilă.

Nebunia unor exigenţe perfect realizabile vizează aspectele de evoluţie aparent de neatins ale leadershipului. Dar atunci când îţi doreşti ceva cu ardoare, când vrei să-ţi aduci aportul în acest vast domeniu şi găseşti mijloacele de a atinge cele mai înalte piscuri ale performanţei, nebunia se transformă în ceva măreţ şi de neuitat.

Negrul devorează tot ce e colorat

On Noiembrie 19, 2016

Promovează o artă ieşită din tipare, creând o stare de dependenţă faţă de ce este definit ca fiind dominant în propria ta realitate expusă prin analogii și comparaţii.

Giordano Bruno şi ciuma cedează locul, în planurile creatoare ale lui Eisenstein, unui alt erou. Un erou aproape matematic calculabil. Întocmai cum, prin observaţii asupra orbitelor diferitelor corpuri cereşti, planeta Uranus a fost calculată a priori, mult înainte de a fi văzută prin lentila unui telescop.

Ce subiect a adus sunetul când a pătruns în film? Biografiile muzicienilor. Şi ce subiecte au fost aduse prin sosirea culorii? Biografiile pictorilor. Dar culoare şi sunet împreună? Ambele au fost epuizate, deci trebuie să căutăm un al treilea subiect. Ce-ar fi să fie biografia unui poet? Aşa s-a născut ideea unui film despre Puşkin. Şi de aici s-a născut ideea "Ivan cel Groaznic".

Dar ideea negrului rămâne. Încă de la discutarea filmului despre ciumă, ea se suprapune instantaneu cu acea impresie iniţială, devenită obsesivă. "Implacabilitatea oarbă" va deveni culoarea neagră - moartea neagră - ciuma care devorează tot ce e viu şi colorat. Îşi aminteşte şi de impresia puternică pe care discuţia cu Andrei Belii i-o lăsase în 1933: analiza evoluţiei frecvenţei valorilor cromatice în opera lui Gogol urmarea pas cu pas apropierea tragică a nebuniei mistice şi întunericului în sufletul scriitorului. Atât acolo, cât şi în "Ciuma", negrul devorează tot ce e colorat. *

Leadership: Poţi să abordezi un subiect care se constituie dintr-o multitudine de aspecte asamblate într-un întreg menit să rezolve psihologia unei problematici a dublului şi a diferenţei?

Ceea ce ne dă posibilitatea unei analize mai temeinice asupra modului de a trata un anumit subiect, în limitele câmpului de observație a unor personaje controversate, delimitând o anumită zonă de acțiune sau de manifestare a lor la care facem referire, este tocmai atracția între ceea ce vrem să creăm și impresia iniţială, devenită obsesivă, a evadării obligatorii din conceptele tradiționaliste - considerate de neîncălcat.

Mai simplu spus, impresia iniţiată este o formă de concentrare a mai multor informaţii şi interpretări în baza dorinţei de a schimba ceva la realitatea pe care o iei în stăpânire prin intermediul creaţiei artistice. Însăşi puterea creaţiei, devenită o însuşire de primă importanţă la un regizor, o virtute de mare preţ a intelectului practic, trebuie să se sprijine pe această impresie, încât interpretările pe care regizorul le conferă realităţii să poată fi tematizate într-o operă marcată de har, eleganţă, spirit şi inovaţie vizuală.

Ideea negrului şi ideea albului, sau asemănarea culorii negre cu moartea, sunt măsura consecinţelor abaterii de la valoarea "True" a condiţiei de fond a noutăţii pe care o aduce cercetarea calitativă a subiectului și a contextului de viață al unor personaje. Ele pot dezorganiza răspunsul la ceea ce caută lumea, telespectatorii, constituind o formă particulară a interpretării unei situații ce declanșează o reacție emoțională caracterizată prin acceptarea unei perspective diferite de concepere a unei poveşti.

Psihologia unei problematici a dublului şi a diferenţei se regăseşte în spaţiul de creaţie al unui artist care încearcă să contureze portretul unui erou real sau imaginar prin prisma conştiinţei unei fiinţe supreme, providenţiatoare, care raţionalizează pe baza unei logici

bivalente de tipul: bine-rău.

Ce subiect a adus sunetul când a pătruns în film? Este întrebarea de primă importanță când se încearcă o transpunere a ideilor în noi metode de producţie a unui conţinut orientat către o comunicare plină de semnificaţie, bazată pe surprinderea „viului" în ipostaze mai colorate. Sau absenţa umanului, redat într-un tablou mai puțin colorat, dar grăitor.

Dar toate aceste analogii între culori, abilitatea de a le reprezenta prin lumea sunetului, în convenţii proprii ale limbajului ştiinţific și regizoral care permite dezvoltarea cu precizie a ideilor, creează o stare de dependenţă faţă de ce este definit ca fiind dominant în propria ta realitate. În structura și proporțiile unei viziuni care decupează în planul lumii o perspectivă singulară.

Leadershipul, constituind o formă particulară de producere și reprezentare a cunoaşterii, nu se poate distanța de această dominanţă stilistică, fiindcă ea atinge o multitudine de aspecte asamblate într-un întreg menit să rezolve psihologia unei problematici a dublului şi a diferenţei dintre totalităţi comparate în momente diferite de evoluție.

O totalitate a psihicului individual, o totalitate a lumii și o totalitate a influenţelor naturale şi sociale, fizice şi spirituale, directe şi indirecte, organizate şi neorganizate. Obţinute și metamorfozate prin analogii vizuale.

Marea putere a artei regizorale se determină după un singur criteriu: ceea ce este dominant în propria ta realitate va fi dominant în pasaje concise din relatarea Creaţiei pe care le poţi folosi pentru a trage nişte concluzii referitoare la istoria umanităţii.

Negrul devorează tot ce e colorat este efectul unei impresii venite din afara propriilor gânduri, dar devenită obsesivă pentru ochiul care vânează o nouă certitudine prin prisma aprecierii artistice. O certitudine a anormalităţii, a drumului care nu permite oricui să pătrundă în locul unde se naște... ideea.

*** Notă:** Ion Barna - *Eisenstein* , Editura Tineretului, 1966.

Neobişnuita întâlnire a omului cu un om (II)

On Martie 10, 2013

Încadrează-te în tiparele de dezvoltare ale leadershipului de tip "existenţial", prin experimentarea unei noi dimensiuni a personalităţii în realitatea pe care tu însuţi o concepi.

Eram prins într-un loop continuu, delirant, care executa în paralel mai multe operaţii, crescând astfel posibilitatea de eroare. Îndeosebi, parcurgeam un ciclu complet în gol, reversibil, format din transformări, sau diverse fuziuni reversibile. Nu puteam distinge nimic din această împletitură de stări şi tranziţii între stări, din acest amalgam de gânduri pe care nu le puteam delimita clar. Pur şi simplu se succedeau neregulat, ascendent şi descendent ca nişte electrozi cu micro-curenţi care se poziţionează într-o zonă neutră, cu potenţial de *rebound.*

Nu puteam să percep ceea ce se petrecea cu adevărat, nu mai înţelegeam nimic din ce se întâmplă cu mine. Era o obsesie, şi o obsesie din ce în ce mai copleşitoare pe măsură ce mă apropiam de adevăr, de partea nevăzută din mine. Eu şi propriul meu univers, nedespărţiţi precum Castor şi Polux. Şi totuşi delimitaţi printr-o linie discontinuă - de o iluzie, de o slăbiciune. Ce anume stătea între noi doi, ce anume ne putea facilita procesul de permanentă unificare între noi? Ne-am fi putut oare fortifica relaţiile, devenind unul şi acelaşi, un întreg, o entitate, şi nu o instanţă a unei legături?

Leadership: Poţi să-ţi formezi o nouă percepţie despre cine eşti cu adevărat prin intermediul experienţelor trăite la limita dintre ceea ce corespunde realităţii şi ceea ce se supune încercării de a te detaşa de clişeele comune?

Un pasaj din " *The Black Riders* ", de Stephen Crane, îmi stăruia necontenit în minte:

Un om declară universului:

"Sir, eu exist ! "

Totuşi, replică universul:

"Acest fapt nu a creat pentru mine vreo obligaţie oarecare."

Cine era acest om din mine care exista tot timpul, această jumătate cu accent tot mai pronunţat, comparativ cu propria mea percepţie despre expectanţele unei realităţi care se desfăşoară în mod plenar în activitatea imaginativă? Era oare un univers? Cât preţuia el? Ce obligaţie aveam faţă de el?

O armonie reală nu poate exista fără existenţa unei polarităţi. Trebuia să caut adânc în mine însumi "Omul", să descopăr chintesenţa fiinţei mele dincolo de spaţiu şi timp, dincolo de orice principiu şi limitare, fără să mă întreb de fiecare dată dacă el este punctul terminus al existenţei mele.

Trebuia să mă supun încercării de a mă detaşa de clişeele comune de genul „aşa merg lucrurile" ca să-mi construiesc propriul turn de fildeş în care uneori mi s-a întâmplat să

păşesc, ca într-o bulă temporală, şi să intru într-un alt timp şi spaţiu. Doar ca să realizez că unicul lucru care mă putea ajuta să simt prezentul în toată splendoarea lui era capacitatea de a mă detaşa de anumite dorinţe şi să las să se întâmple doar ceea ce era potrivit pentru mine, ceva dictat doar de o entitate mai înaltă.

Leadership: Poţi să-ţi validezi autonomia raţiunii de a exista prin maximizarea reflexiei a ceea ce eşti cu adevărat în perimetru realităţii care se vrea a fi un adevăr al fiinţei şi totodată un microcosmos al universului?

Felul cum îţi percepi personalitatea, în virtutea unui algoritm de detectare a particularităţilor care te deosebesc şi te fac să fii tu însuţi, oferindu-ţi posibilitatea de a-ţi exprima cea mai măreaţă versiune a ta, poate sprijini fie stabilizarea direcţiei de dezvoltare în societate, fie mobilizarea dezvoltării progresive în jurul anumitor idei de redefinire a realităţii.

Întrucât eşti interesat de ceea ce se întâmplă cu propria ta fiinţă şi cu mediul din jur, accentele cad probabil pe standardul tău de evaluare şi de formare ce influenţează ritmul şi trendul tău existenţial. Abia astfel începi să ai o idee despre ce pierzi dacă nu reuşeşti să recunoşti şi să cucereşti acea parte din tine care se vrea inabordabilă - acel univers care poate absorbi binele şi răul.

Singurul adevăr al fiinţei în care mă zbat să trăiesc este acela că nu mă pot opri să mă privesc într-o oglindă imaginară care îmi preia imaginea dintr-o altă perspectivă a universului, menită să-mi arate că există un Dumnezeu personal şi prezent în viața mea.

Acea parte din tine pe care o recunoşti drept suverană este mult diferită de acea parte din tine care te ţine prizonier în acea frântură de univers care se îndreaptă încet spre libertatea înălţimii gândului care precede revelaţiile şi fapta. Întrucât aceste două mari contraste definitorii, bine înghesuite într-un interior ambiguu, nu apar prea des în contextul leadershipului, trebuie să le căutăm în altă parte, în spaţiul valorilor fundamentale, în contextul expunerii în faţa realităţii care permite asumarea stării de fapt.

Reflexia a ceea ce eşti cu adevărat în perimetru acestei realităţi, prin alăturarea celor două contraste care îţi potenţează atitudinea, trăirile şi trăsăturile de caracter, fac din tine un lider în măsură să-şi valideze propria autonomie.

Leadership: Existenţa spre care tinzi este rezultatul unei partide cu un jucător tare, pornind de la premisa că tot ceea ce îţi transmite vocea interioară este un mesaj provenit dintr-o altă ordine a lucrurilor decât cea dominantă?

Spuneam la unul din webinaruri: *„ Pentru a merge pe propria lui cale, liderul trebuie să-şi valideze virtuţile cele mai de preţ prin iluminare, deci trebuie să treacă prin propriul proces de înțelegere."*

Acest proces de înţelegere stabileşte efectul maxim pe care îl poate produce leadershipul de tip "existenţial", prin experimentarea unei noi dimensiuni a personalităţii în realitatea pe care tu însuţi o concepi.

Existenţa spre care tinzi este rezultatul unei partide cu un jucător tare, cu “Omul” din tine. Priveşte acest joc în doi cu mare interes. Adevăratul câştigător, dovedindu-şi consecvenţa în orice tip de situaţii, este acest tandem, aproape infailibil: Tu şi El, amândouă entităţile în acelaşi trup.

Nu-i dorinţă mai firească pentru un aspirant la statutul de lider decât dorinţa cunoaşterii depline. El încearcă toate mijlocirile care îl pot duce la aceasta. Dacă dă greş judecata şi nu poate întrebuinţa experienţa, apelează la "Omul" din el.

Arta de a te ridica deasupra oricăror limitări, prin diverse încercări, se naşte – nu din izolarea, ci din contactul permanent cu partea ta cea mai reprezentativă, partea lucrătoare din tine. Rolul ei ţi-a luminat calea.

Un mesaj provenit dintr-o altă ordine a lucrurilor decât cea dominantă poate fi formulat în felul următor: "Modul în care concepi relaţia cu realitatea pe care o trăieşti este un mod de a experimenta universul, astfel încât fii nevoit să-l reorganizezi".

Neobişnuita întâlnire a omului cu un om evidenţiază reflexia a ceea ce eşti cu adevărat in perimetru unei realităţi create de tine însuţi prin alăturarea celor două părţi din tine: una conducătoare şi cealaltă vitală individualităţii tale.

Îndreaptă-ţi atenţia spre „Omul" din tine, spre adevăratul tău nucleu de mobilizare şi de prospectivă. Experimentează unitatea. Caută adânc în tine însuţi, caută chintesenţa fiinţei tale dincolo de spaţiu şi timp, dincolo de orice principiu şi limitare, fără să te întrebi de fiecare dată dacă ea este punctul terminus al existenţei tale. Sapă în marele zăcământ al vieţii şi al realităţii, prin autocunoaştere, şi încearcă să extragi toate acele minerale care servesc la cristalizarea identităţii tale.

Neobişnuita întâlnire a omului cu un om (I)

On Martie 10, 2013

Descoperă "Omul" din tine ca să desăvârşeşti întregul cadru al individualităţii tale.

Tindeam spre ceea ce era esenţial devenirii mele, spre neobişnuit, spre o nouă destinaţie. Psihologia mea căuta să descopere Omul în Om, omul absolut, abstract, care se afla ascuns sub stratul nesolidificat al identităţii mele. Acea parte din mine, mai consistentă şi mai importantă, pe care n-o puteam aduce la suprafaţă, dar care cerea cu disperare să fie dezvăluită şi recunoscută, lăsată apoi să curgă liberă ca un fluviu, pentru ca puterea ei să transforme realitatea din jurul meu.

Misiunea omului ascuns era de a mă completa, ca un frate, ca o simetrie firească, ca o armonie deplină, desăvârşind întregul cadru al individualităţii mele. Un înşelător joc dublu, cu comutator, pus în slujba unei cauze creatoare, unei metode riguroase, ştiinţifice, de a explica ceva prin comparare cu altceva. O nesiguranţă? O incursiune incredibilă într-o mare aventură, un proces complex de sinteză a sinelui care consta în speţă în unificarea inconştientului şi conştiinţei?

O roată care se învârte numai într-un singur sens nu poate fi deviată în sens contrar fără să fie în esenţă atinsă. Întregul meu univers, lumea mea interioară era destul de dezorientată, oscilantă. Precum o scădere şi apoi o creştere a intensităţii câmpului electric între două valori maxime. Ce anume mă putea readuce la o dezvoltare sigură, fără să produc o ruptură de status quo-ul cunoscut?

Leadership: Devii la fel ca obiectul atenţiei tale în sensul formării convingerii că atingerea unui plan lăuntric fundamental va conferi profunzime trăirii, seriozitate exprimării şi consecvenţă în a integra absolut toate aspectele în viaţa de zi cu zi?

Tinzi spre ceea ce este esenţial devenirii tale? Ce se află sub stratul nesolidificat al identităţii tale? Poţi aduce la suprafaţă acea parte consistentă din tine care cere cu disperare atenţie? Care este misiunea omului ascuns în tine? Ce anume te poate readuce la o dezvoltare sigură, fără să produci o ruptură de status quo-ul cunoscut?

Tot ceea ce cunoaştem şi ştim despre noi înşine, toate elementele care ne reprezintă, convingându-ne de ele, ne completează, ne definitivează, ajutându-ne să evoluăm într-un mod cu totul particular. Un om mare este expresia unui dialog lăuntric excepţional între adultul şi copilul din tine, între vizionar şi experimentator, între visător şi realist, între critic şi artist, un dialog care nu evită întrebările şi răspunsurile faţă de ceea ce te ţine legat de o anumită stare de lucruri menită să-ţi inspire un oarecare confort emoţional şi intelectual.

Reprezentarea pe care o aducem propriului arhetip pe care-l întrupăm, rolul nostru individual în relaţie cu felul în care ne percepem, cu ceea ce vine din sursa noastră interioară, este prima şi cea mai importantă conştinţă pe care trebuie s-o dobândim. Şi ea se obţine prin parcurgerea acelui ciclu reversibil, format din transformări, a căror finalitate conduce la formarea identităţii tale.

Omul pe care îl ascunzi în tine este similar unui jurnal-capodoperă în care se relatează experienţa unor trăiri care te-au impresionat prin forţa şi seducţia lor de "Lume Nouă".

Sub atâtea chipuri putem evolua, încât nu ştim care este cel adevărat, nu ştim care are un

grad de maturitate mai adecvat şi, prin urmare, nu ştim de care să ne ţinem. Dar numai acea parte din noi înşine, mai consistentă, pe care n-o putem aduce la suprafaţă, are puterea de a ne transforma realitatea şi existenţa. De aceea, obiectul atenţiei tale nu trebuie să fie doar realitatea în care trăieşti, supusă unei reprezentări codificate a prezentului, ci povestea în imagini a unei incursiuni într-o mare aventură a cărei stranietate poate fi rareori atinsă pe parcursul aventuros al existenţei.

Ceea ce ţi se întâmplă în viaţa de zi cu zi creează acel sentiment de apartenență la entitatea "noi": o parte din tine care lasă să se întrevadă discret o perspectivă de tip creator, şi una care lasă să se întrevadă o continuare a poveștii în care te regăseşti, dintr-un jurnal de lectură.

Dacă păstrăm distanţa între noi şi "Omul" din noi, acest exponent care alcătuieşte modelul nostru de funcţionare, în necontenita dinamică a vieţii, în lupta continuă pentru cucerirea ei, nu vom putea niciodată să ne apropiem de perfecţiune. Nu vom reuşi niciodată să reglăm arcul care ţine potenţialul nostru în tensiune, în direcţia de deschidere spre viitor, spre nou, spre adevărata ţintă: excelenţa.

Leadership: Poţi să găseşti îndrumare din partea unei convingeri care îţi arată că în viaţă "Lucrul cel mai preţios rămâne nevăzut" din perspectiva raportării la o prezenţă care te face să crezi că nimic nu poate să dispară complet?

Atingerea excelenţei este un proces, o activitate continuă pentru a te desprinde din plutonul fruntaş al "alergătorilor de cursă lungă". De fapt, excelenţa înseamnă să porţi constant un dialog cu tine însuţi din care să extragi învăţămintele unei gândiri desăvârşite despre cum ar trebui să arate realitatea care te înconjoară, luând în calcul considerentele unei valori de informaţie a faptelor, evenimentelor şi întâmplărilor ce constituie intriga unei poveşti de neuitat. Iar o asemenea valoare de informaţie poate fi o comunicare despre un anumit aspect al realităţii obiective, sau o noţiune de largă generalitate filosofică.

Unul din cele mai bune moduri de a te apropia de excelenţă nu este să-i instruieşti pe alţii, ci să fii capabil să-ţi instruieşti "Omul" din tine - să-i încredinţezi lui misiunea de a te conduce, să-i permiţi să te însoţească peste tot, să-l laşi să-şi desfăşoare toată forţa pentru a dobândi coordonare, stabilitate şi vigilenţă.

Citeam undeva pe internet un lucru interesant: " *Când priveşti în spatele criteriilor, care divizează oamenii după: culoarea pielii, apartenenţă etnică, haine etc. – înţelegi că aceste lucruri sunt nesemnificative. Lucrurile la care ar trebui de fapt să atragem atenţia sunt valorile lor. Când priveşti în spatele micilor diferenţe, vei descoperi în profunzime adevărata individualitate a fiecăruia – cea care mă reprezintă şi te reprezintă, cea care ne reprezintă pe toţi.* "

Adevărata individualitate are la bază includerea "Omului" din tine în sfera existenţei tale, el este acea prezenţă semnificativă, adevărata ta călăuză, care te reprezintă în totalitate, în orice moment al vieţii. Individualitatea unui om poate fi gândită şi din perspectiva raportării la o prezenţă care te face să crezi că nimic nu poate să dispară complet din realitate, fiindcă realitatea se manifestă printr-o schimbare continuă a propriei persoane văzută din două ipostaze: de conştinţă a sinelui şi de conştiinţă a comunicării mesajului creat prin prisma propriilor trăiri.

El este, citându-l pe scriitorul Antoine de Saint-Exupery, acea nestemată care rămâne nevăzută şi neînţeleasă pentru cei mulţi - constituind doar o parte a unei realităţii complexe, mai greu accesibilă şi abordabilă, dar care într-un iureş debordant de recuperare a clişeelor care însoţesc transformarea periodic, îţi controlează traiectoria de evoluţie.

Convingerea care îţi arată că în viaţă "Lucrul cel mai preţios rămâne nevăzut" este că poţi controla aproape tot ceea ce ţi se întâmplă cu condiţia ca tot ceea ce gândeşti şi năzuieşti să se raporteze la acea parte din tine care ştie că poţi să contezi mai mult decât ce se vede din exterior, că poţi să dezvălui mai mult despre tine decât ce se vede în mediul înconjurător.

Neobişnuita întâlnire a omului cu un om evidenţiază consecinţele ce derivă din acest dulce episod al întâlnirii cu "Omul" din noi. Depinde de fiecare dintre noi de ni-l facem aliat sau duşman, de avem interese convergente sau divergente.

Aşa cum un pianist exersează cu o siguranţă şi o uimitoare precizie fiecare bucată dificilă din piesa pe care o va interpreta în faţa publicului, tot astfel şi tu, pentru ca leadershipul tău să capete o formă bine definită, trebuie să exersezi această "evadare" din realitatea dură care te înconjoară, şi să încerci o coborâre cu săniuţa spre acea realitate învelită într-o crustă, ce nu poate fi percepută în mod obişnuit, pe care deseori o negi, în faţa căreia deseori închizi ochii: **tu însuţi.**

Descoperă "Omul" din tine, ca să desăvârşeşti întregul cadru al individualităţii tale.

Nepătrunsul din Infernul lui Dante

On Martie 01, 2014

Stabileşte o mai bună relaţionare cu tine însuţi în cadrul unei realităţi imaginare care să te ajute să devii mai conştient de înzestrările tale intelectuale.

Mi-am închipuit întotdeauna că sunt cu un pas în faţa timpului, mergând cu gândul înaintea oricărei mărimi fizice, folosindu-mă la maxim de toate resursele existente pe un pământ care face parte dintr-un vis despre Dumnezeu. Dar, cumva, mă loveam de incertitudinea unei realităţi imposibile. Ajunsesem în ipostaza profesorului Otto Lidenbrock din opera lui Jules Verne care încerca să aprofundeze şi să-şi consolideze cunoştinţele despre lumea întunecată subpământeană, deviind mereu de la direcţia firească de înaintare aleasă de companionii săi. Trăind neodihna şi doar rătăcirea, mereu în aşteptări, mereu în amânări.

Nu spunea Aristotel că în pântecele pământului plumbul şi celelalte metale ordinare se transformă cu timpul în aur? Aşadar, trebuia să lupt cu imposibilul, împletit într-un conglomerat unic de neclarităţi, indicii adevărate şi false, concentrate în jurul unei cantităţi de resurse nebănuite de cunoaştere. Însemnând sfârşitul definitiv al legăturii atinse tangenţial cu realitatea neexplorată care îşi vărsa continuu picăturile de mister, pe măsura formării ei. Gânduri de acest fel mă mistuiau continuu.

Singura realitate care se încăpăţâna să mă ţină prizonier într-un fel de imagine a unui univers primordial, ca într-un soi de transă, era faptul că mă vedeam într-un loc complet necunoscut, dar înzestrat cu multe virtuți magice, generator de minuni, de legi și reguli aparte, de veșnicii încremenite în arhetipuri imuabile. Această realitate, una pe care n-ai cum s-o ocoleşti într-o permanentă căutare de a modela timpul, cu scopul de a descoperi multe alte adevărului despre viață, se proiectează mai presus de orice enigmatic într-un „atunci" care a încetat să mai fie „acum".

Leadership: Accesul tău la o nouă formă de veridicitate presupune o investiţie substanţială în posibilitatea realizării unei comparaţii între ceea ce întâlneşti la tine prin influenţa unui personaj enigmatic şi ceea ce este dincolo de ideile tale preconcepute?

Aveam senzaţia că, dintr-un salt, m-am întors înapoi pe scara timpului cu multe secole, sporind ambiţiile legate de cunoaşterea necunoscutelor, aidoma unui om de ştiinţă care, înarmat cu metode de cercetare din ce în ce mai eficace reuşeşte să străbată dincolo de aparenţa obiectelor şi a fenomenelor, sesizând proprietăţi şi conexiuni de multe ori inaparente. Este ciudat cum reuşesc unii oameni să se ridice deasupra fenomenelor coexistente ale lumii reale doar printr-un exercițiu continuu al imaginației și al trăirii împărtășite prin intermediul conştiinţei clare şi cutezătoare, prelucrată prin filtrul unei memorii livreşti de cea mai bună calitate.

În mod implacabil, curiozitatea mea de a cerceta nepătrunsul din *Infernul lui Dante* se accentua, dar cu măsura hotărâtă de propriile-mi convingeri şi prejudecăţi. În timp ce intensitatea gândirii pe care o consumam în încercarea de a accede la elementele de noutate ce se zbăteau anapoda în clarobscurul unei lumi deposedate abuziv de proprietăţile şi concentraţiile ei, creând iluzia optică a unui spaţiu subîntins, se putea măsura pornind de la zero absolut.

Veridicitatea acordată unei idei măreţe despre esenţa umană rezidă din ceea ce eşti în stare să reprezinţi în planul unei aşteptări superioare de la viaţă, din perspectiva unei viziuni inspiratoare. Nu mai eram doar un trecător anonim prin lume, imaginea stranie a unei fiinţe ce trăieşte prin automatisme, expresia unei personalităţi discrete, reţinute. Ci mai degrabă

reflexia întregii cunoaşteri a unui univers plin de mistere pe care ceilalţi cercetători din domeniu încercau cu mare greutate să îl observe şi, pe cât le stătea în putinţă, să îl înţeleagă.

Leadership: Poţi să desluşeşti înţelesurile utile pentru maximizarea calității a ceea ce vrei să transmiţi, prin referire la o creaţie de mare anvergură intelectuală pe care ai realizat-o pentru a fixa regulile unei noi modalităţi de abordare a schimbării de perspectivă?

Când te simţi în apropierea unei realităţi de ordin superior, deschizătoare de noi perspective, a cărei umbră cade nestingherită pe albul fragedei intenţii de a asimila noi cunoştinţe şi experienţe, lucrurile par mai puţin izbitoare, nu mai pătrund atât de adânc în tine, pierzând mult din statornicie. Şi e îmbucurător să îţi pară că lămureşti ceea ce nu era de lămurit decât în parte sau deloc.

Ori de câte ori atingi un nou nivel de cunoaştere, accesând un set de informaţii care ar putea determina o schimbare de perspective, te gândeşti: " *Nu voi accepta să mă mai întorc pe vechiul front de luptă cu ceea ce aveam înrădăcinat în mine, în mintea mea. Voi dezerta.* "

Şi, într-adevăr, nu numai că ai senzaţia că te teleportezi într-o lume care pare ireală pentru că afli anumite aspecte ascunse, dezlegi nişte necunoscute, capeţi acces la nişte revelaţii care scapă la prima vedere chiar şi cercetătorilor cei mai avizaţi în domeniu. Ba mai mult, îţi însuşeşti o anumită capacitate de analiză și autoanaliză, tratând informaţiile într-un mod constructiv şi axat pe întrebări, folosind analizori de tip "If-Then-Else". Desluşind înţelesurile unor corelaţii complexe şi oferind explicaţii utile pentru maximizarea calității a ceea ce vrei să transmiţi.

A fixa regulile unei noi modalităţi de abordare a schimbării de perspectivă înseamnă să te adaptezi la cerinţele unei realităţi pe care oricât ai vrea să n-o conştientizezi, oricât ai încerca s-o eviţi, până la urmă tot îţi pierzi "capul" în ea.

Ca lider, trebuie să-ţi dezvolţi capacitatea de a discerne cu precizie sensul pe care urmăreşti să-l comunici, cuantificând şi reproducând complexitatea realităţii. Şi de a-l reda cu fidelitate fără a pune la îndoială validitatea ipotezelor şi argumentelor pe care le construieşti în vederea introducerii unei noi forme de gândire. O creaţie de mare anvergură intelectuală cuprinde motivele pentru care eşti dispus să-ţi asumi măsura lucrurilor pe care pui preţ atunci când vrei să fixezi regulile unei noi modalităţi de abordare a schimbării de perspectivă.

Cercetează profund ceea ce eşti cu adevărat, necunoscutele care fac parte integrantă din propriul tău Eu, pentru a desluşi înţelesurile utile maximizării calităţii de lider. Cunoscându-te bine, desluşind aspectele nevăzute a ceea ce eşti şi a ceea ce vrei să devii, vei putea să-ţi cristalizezi motivaţiile şi intenţiile în corelaţie cu realitatea în care trăieşti şi cu sistemul de gândire a celorlalţi.

Leadershipul înseamnă să oferi imaginea unei realităţi obiective care dă impresia de noutate, chiar dacă este doar o plăsmuire a minţii tale.

Nepătrunsul din Infernul lui Dante simbolizează acel aspect al relaţionării cu tine însuţi, în cadrul unei realităţi imaginare care te ajută să devii mai conştient de înzestrările tale intelectuale. Din dorinţa instinctivă de a poseda o mai bună capacitate de a discerne şi de a interpreta corect realitatea pe care o experimentezi, cu uşurinţă şi rezultate maxime. Pe care este important s-o prezinţi şi s-o impui deschis celorlalţi.

Nepătrunsul dintr-un timp fără orbite

On Martie 16, 2014

Evaluează-ţi potenţialul de lider din perspectiva efectelor secundare ale ştiinţei pe care o deţii, astfel încât să treci dincolo de graniţele propriei tale fiinţe.

Spre uimirea mea, un fapt se încăpăţâna să rămână inexplicabil şi nu reuşeam să-i dau de capăt cu niciun chip. O întrebare simplă nu-şi afla răspunsul, creând intens o senzaţie de absurditate, o interdependenţă complementară între raţiune şi instinct, între realitate şi imaginaţie. După tot ce-am încercat să construiesc o viaţă întreagă, după tot ce-am încercat să explic prin propria-mi reţetă ştiinţifică, întrebarea încă mai persista. Cu un impact negativ continuu.

Totul se închidea în mine, simţitor, în neliniştea pe care înflăcărarea şi nebunia, strânse laolaltă într-un singur ceas de repaus, erau fecundate de născocirile arbitrare ale minţii surescitate ce şi-a pierdut contactul cu realitatea sufletului ataşată cumva de lumea apăsătoare a acumulărilor ştiinţifice din care simţea că trebuie să fugă.

Mă simţeam inferior în faţa unui presupus rival, în faţa unui fapt straniu, neaşteptat, cumpănind toate Nu-urile care despicau orice presupus răspuns, căci raţiunea şi logica dispăruseră cu totul din preajma mea. De parcă ar fi trebuit să sondez adâncimea unui ocean cu ajutorul unei frânghii la capătul căreia era prins un bolovan de granit. Nu dădeam de fund, nu izbuteam decât cu mare dificultate să trag înapoi greutatea, fără să pricep nimic din ce ar fi trebuit să pricep.

Şi întrebarea atât de simplă, atât de firească ca oricare alta, lovea necontenit în creierul meu, creând efectul unui gong care străpunge timpul, producând o frecvenţă de înaltă vibraţie, o rezonanţă deranjantă ce parcă trebuia verificată în mod experimental. Năucită, mintea încetase să-mi dea vreo explicaţie savantă. Căci între unda purtătoare de informaţie şi puterea de deducţie capabilă să folosească informaţia respectivă se producea o anumită presiune de saturaţie.

Leadership: Poţi să-ţi construieşti o imagine convingătoare asupra raportului dintre fidelitatea faţă de experienţa vieţii şi vibraţia înaltă a conştiinţei care te ţine în suspans, aşa cum se poate exprima într-un context de tipul "I'm lost in my own world" ?

Tu cum îţi măsori experienţele de zi cu zi? Este timpul să îndrepţi reflectoarele asupra "rivalului" tău destoinic, asupra sensurilor pe care le atribui muncii tale? Îţi creează ele intens o senzaţie de absurditate care te bântuie neîntrerupt, avertizându-te în privinţa unor acumulări excesive de idei ce se pot transformat în frustrări?

Scriitorii care prin experienţele lor au ajuns să dea un sens vieţii, pot să discearnă dincolo de realitatea invizibilă celorlalţi, una pe care o găzduiesc în gândurile lor, ocupându-se în egală măsură de lucrurile pe care le iubesc şi cele de care se tem.

Iar această realitate, înţeleasă şi fructificată prin intermediul cunoştinţelor, pe parcursul unei perioade de timp nedeterminate, în sensul satisfacerii unor nevoi de autorealizare, poate fi percepută doar într-un anume fel. Şi poate răspunde multor întrebări a căror înveliş fin se disipează încet în prelungile revelaţii care îi ajută să se cunoască mai bine.

Unul dintre atributele acestui gen de experienţă de viaţă, când eşti pus în faţa unui fapt

straniu, neaşteptat, atunci raţiunea şi logica par să dispară cu totul din preajma ta, îl reprezintă sentimentul că propria ta conştiinţă s-a extins dincolo de graniţele Eului. Acesta este momentul când se instalează neliniştea ce te opreşte din a-ţi atinge potenţialul, scăzând randamentul şi productivitatea muncii tale. Momentul când ai atins stadiul de stagnare, periculos în dezvoltarea leadershipului, şi începi să depui eforturi inutile, pentru că nu mai vezi progresele cu care te-ai obişnuit la început.

Leadership: Trebuie să ai priceperea realităţii căutate în logica unui orizont de interogativitate pentru a construi un model de revelare a sinelui în măsură să pună în evidenţă mecanismele măsurării trăirilor care te frământă?

Un orizont de interogativitate vizează dorinţa de a repera continuu ceea ce crezi greşit despre tine. Este modalitatea de a demonstra că eşti motivat şi interesat să schimbi factorii de experienţă ai vieţii cu o anumită doză de necunoscut care duce întotdeauna la o atitudine de nouă de uimire în faţa unei lumi pe care am uitat că o purtăm în noi: tărâmul fanteziei.

Bine remarca scriitorul român Lucian Blaga: *"Simţul realităţii ni s-a dat pentru a ne orienta, dar şi pentru a face posibilă mirarea noastră în faţa neverosimilului realităţii."*

Este necesar să-ţi concentrezi eforturile cognitive spre noi identităţi de exprimare de sine? Este necesar să te îndrepţi cu paşi vertiginoşi spre o armonizare cu tine însuţi?

Întrebarea care se cere rezolvată provine dintr-o experienţă derivată din interacţiunea cu noile cuceriri ale ştiinţei conducerii. Şi ea reprezintă semnul unei degringolade de neînţeles, care îţi poate întoarce pe dos toată perspectiva bine pusă la punct în domeniul în care crezi că le ştii pe toate.

Ce minciună există într-un adevăr?

Această întrebare lansează ideea reformulării tuturor concepţiilor despre practicarea ştiinţei la nivel înalt care pretinde o cercetare sistematizată şi complexă, în sensul determinării nivelului de eficienţă a abilitaţilor tale, având ca scop final dezvăluirea legăturii dintre autoobservare şi autoevaluare. Această legătură poate crea armonie sau, din contră, dizarmonie cu propria fiinţă.

Măsura trăirilor care te frământă este dată de factorul de separare între ceea ce te conține în exces (o stare de incertitudine asupra propriei individualităţi) și ceea ce te respinge din spaţiul unei realităţi pe care nu reuşeşti s-o stăpâneşti.

Eşti condus de o gândire mult prea alambicată ca să poată să se descurce prin meandrele de nivel superior ale înţelegerii existenţei?

Nepătrunsul dintr-un timp fără orbite exprimă acea posibilă stagnare din evoluţia ascendentă a unui lider, cauzată de ineficienţa acţiunilor generate de mintea neadaptată la întrebările cheie pe care ştiinţa le pune în mâinile sale, limitându-l la zonele pe care nu le înţelege.

Nestăpânita întunecare a minţii de dincolo de noi

On Mai 04, 2013

Păstrează-ţi caracterul intact în situaţiile de viaţă bulversante, astfel încât vulnerabilitatea ta să nu se manifeste la cote maxime.

Doi foşti colegi de la Oxford iau cina, dar numai *un dîner d'affaire,* şi atât. Harold Reynolds şi Laura Quinn. Din păcate Reynolds nu-i poate oferi Laurei un post la compania în care activează, conflict de interese pretinde el. Dar astfel, fără rea intenţie, el smulge dintr-o singură mişcare petalele uneia dintre cele mai sensibile crizanteme.

Iar în acest moment de deznădejde cumplită şi dezarmantă, în biata femeie izbucneşte supărarea, dezaprobarea şi frica. Instantaneu, în vastul creuzet al firii sale se topesc şi se reduc până la doza minimă toate acele gânduri benefice, optimiste şi înviorătoare, în care îşi pusese tot sprijinul. Toată esenţa vieţii ei, condensată într-o clipă de maximă intensitate, amarnică prin fiorii pe care-i resimte, arzând ca o torţă ce arată calea spre întuneric, se îndepărtează de moralitate.

Laura cade parcă într-o îndelungă întunecare a minţii de dincolo de ea, într-o stare de înrăire, de răzvrătire, care o consumă extraordinar, devorând-o până la ultimul suflu de viaţă, prăbuşindu-i întregul eşafodaj etic. O rătăcire pe care nimeni nu o poate înţelege, decât cea care o trăieşte, protagonista întâmplării atât de spontane a ființei ei.

După cum viteza unei reacţii chimice creşte în funcţie de temperatură, tot astfel starea de surescitare a sistemului ei funcţional, temperamentul care se aprinde repede, destabilizând orice acţiune pozitivă normală, o duce pe Laura spre tărâmul răului. Ceva erupe din adâncul ei cu acea impetuozitate caracteristică fiarelor însetate de sânge, ceva inerent oricărei conștiințe de sine, o disperare pe cale de a se transforma într-un fiasco ce o poate costa scump.

Leadership: Este caracterului tău hotărât să îndeplinească rolul de determinant al reprezentării vulnerabilităţii printr-un act de împotrivire adresat circumstanţelor nefavorabile, prin adoptarea unei abordări psihi-emotionale bazată pe convingerea că "mâine va fi la fel ca azi" ?

Laura nu-şi poate păstra caracterul intact, devine vulnerabilă. Îndrăzneala şi determinarea care-i caracterizează întreaga fiinţă îşi iau avânt, transformându-se într-un diabolic complotism, plan al unei răzbunări absurde, necalculate, şi al dorinţei pătimaşe.

Simte cum de la un capăt la celălalt al fiinţei ei străbate o încordare vehementă: " *Să-l omor ! Să-l omor, ticălosul !* ", mormăie ea involuntar în culorile sumbre ale agresivităţii Ego-ului întărâtat. Concentraţia de substanţe nocive care participă la reacţia nervoasă, fiind foarte mare, practic nu variază, ci din contra, se triplează. Nivelul ei de agresivitate atinge cote ridicate.

Femeia aceasta, pe care o puteam socoti adineaori cea mai blândă dintre oameni, care n-ar fi fost în stare să omoare o muscă, îşi iese puternic din minţi. Mâna, tremurândă, înfierbântată, caută instinctiv ceva cu care să-şi lovească oponentul. Să apuce un cuţit, o furculiţă, nu contează ce, numai să fie de metal, ascuţit şi tare, letal de la prima lovitură. Fulgerător să-l înfigă într-însul, tot mai apăsat, mai intens, mai satisfăcător.

Leadership: Testul caracterului tău urmăreşte să transmită lumii o imagine mai sugestivă a aspectului de "o viaţă prinsă în ciclul trăirilor cele mai intense", încât să eviţi acea capcană a presupunerii rezonabile că ceea ce nu te omoară te face mai puternic?

Dar Reynolds nu bănuieşte nimic. Aşa cum Peyrade, din opera lui Balzac, întindea pe podelele apartamentului său mai multe covoare pentru ca locatarii de la etajul de dedesubt să nu audă niciun zgomot, Reynolds pare că şi-a învelit inima cu mai multe straturi protectoare de apărare, greu de sfărmat, aşa încât să poată ticăi în linişte, fără să se teamă de nimic. În continuare o priveşte pe Laura cu nonşalanţă, ca pe un sistem care nu poate să genereze energie, care nu este capabil să riposteze sub nicio formă.

- Permiteţi? intervine la timp chelnerul. Moment salvator. Astfel, nevoită, mâna femeii se retrage încet, învinsă de neprevăzut, şi totuşi nesigură. Ciocniri moleculare au loc în Laura la recombinarea radicalilor liberi - nesiguranţa, teama, vulnerabilitatea - configurând o nouă structură aparent funcţională, dar fragilă şi instabilă.

Pe zidurile conştiinţei curge lumina, izolat. Slăbiciunea vibrează ca făcliile-n oglinzi. Temporar, Laura este cuprinsă de o pace liniştitoare deplin confirmată de cuvintele acelea vechi: *„ Veşnicul meu străjer, inima, veghează. "*

Caracterul unui om care experimentează îndoiala în mijlocul furtunilor vieţii seamănă cu un laptop second hand: este ieftin de întreţinut, dar nu va putea îndeplini toate condiţiile pentru a face faţă "jocurilor" grele.

Fragilitatea care cuprinde natura umană în condiţiile impuse de necesităţile unui joc de tipul *"Am să le arăt eu lor dar...numai pe bani"* , este suma trăirilor cele mai profunde pe care ţi le poţi revela ţie însuţi într-un fel de solemnitate silenţioasă, când nu reuşeşti să-ţi asumi măreţia de a conlucra cu o lume schimbătoare.

Nestăpânita întunecare a minţii de dincolo de noi desemnează acea stare precară de a fi, care devorează omul până la ultimul suflu de viaţă. O rătăcire pe care nimeni nu o poate înţelege în afară celuia care o trăieşte, o disperare pe cale de a se transforma într-un fiasco total.

Dacă vrei ca leadershipul tău să fie considerat drept cel mai valoros rezultat al procesului tău de ascensiune, atunci păstrează-ţi caracterul intact în situaţiile de viaţă bulversante, astfel încât vulnerabilitatea ta să nu se manifeste la cote maxime.

*** Notă:** " *Flawless (2007)*"

Nevoile reale ale leadershipului

On Decembrie 27, 2008

Asumă-ţi şansa de a fi în centrul atenţiei în momentele de cumpănă, astfel încât să uşurezi procesul de promovare a valorilor tale cele mai înalte.

Ieri dimineaţă am citit o ştire pe internet. O reporteră care a fost prezentă la locul unui grav accident, a scris pe o foaie de hârtie ultimele cuvinte pe care le-a murmurat fata rănită grav, înainte de a murit. Reportera a scris şocată:

"Mamă, am ieşit cu prietenii mei şi am mers la o petrecere. Mi-am amintit cuvintele tale: să nu beau alcool. M-ai rugat chiar fiindcă trebuia să conduc. Aşa că am băut doar sucuri. Am fost mândră de mine, fiindcă ţi-am ascultat sfatul. În comparaţie cu ceilalţi prieteni am făcut alegerea cea bună. Sfatul tău a fost corect. Când s-a terminat petrecerea, toţi şi-au luat maşinile, dar fără să fie în măsură să conducă în siguranţă... Eu totuşi eram sigură că sunt conştientă. Nu puteam mamă să-mi închipuiesc ce urma să mă aştepte. Acum sunt culcată pe asfalt şi aud poliţistul ce spune...Sângele meu e peste tot pe asfalt şi eu încerc din toate puterile să nu plâng. Aud doctorii spunând că nu voi reuşi să supravieţuiesc..

Sunt sigură că celălalt tânăr care conducea nu şi-a dat seama cât de mult gonea...În concluzie, el s-a hotărât să bea. Şi eu trebuie acum să mor... De ce fac ei asta, mamă? Dacă ştiu că vor distruge vieţi...? Durerea pe care o simt este ca şi când m-ar înţepa mii de cuţite. Spune-i sorei mele să nu se teamă şi lui tata să fie puternic. Cineva trebuia să-i spună acestui tânăr că nu trebuia să bea alcool, dacă conduce. Poate dacă părinţii lui i-ar fi spus, aşa cum mi-ai spus tu mie, acum aş fi fost în viaţă...Respiraţia mea se face din ce în ce mai slabă...şi începe să-mi fie frică, mamă ! Acestea sunt ultimele mele clipe şi sunt atât de disperată ! Aş vrea atât de mult să te îmbrăţişez şi să îţi spun că te iubesc...Te iubesc mult, mama...Adio...."

Aceste cuvinte au înduioşat o lume întreagă, dar în primul rând pe reportera care le-a scris. După acest eveniment tragic, reportera a început o campanie dură împotriva conducerii sub influenţa alcoolului.

Leadership: Se justifică să-ţi asumi o şansă foarte scăzută de a ieşi dintr-un impas greu de depăşit, cu riscul de a nu respecta obligațiile care îţi sunt impuse de la bun început?

Cine oare ţine cumpăna puterii tale de a alege între a fi sau a nu fi un om cu influenţă, un om care înfăptuieşte schimbarea sau preferă stagnarea? Preferi să fii doar un martor indiferent care asistă la un accident grav al cărui consecinţe, chiar dacă pot afecta viaţa celorlalţi, ţie nu îţi schimbă deloc întregul fel de a fi? Continui să îţi menţii acelaşi status în această situaţie? Sau preferi să adopţi o atitudine proactivă, de a îndrepta şi de a preveni evenimentele care copleşesc o lume întreagă?

Leadershipul nu este un domeniu strict tehnic, iar liderul nu este un robot care acţionează doar în baza unui "soft" creat în limitele stricte şi precise ale matematicii, fizicii şi electronicii. Ci trebuie să fie încărcat şi de sentimente de empatie, iar liderul trebuie să ştie să le exteriorizeze în faţa oamenilor pe care îi conduce, sau pe care îi are în grijă, respectând sentimentele şi trăirile acestora, căci altfel va eşua şi nu va mai ajunge să finalizeze ceea ce a început.

Ceea ce diminuează considerabil valoarea propriului tău fel de a fi, şi ceea ce dăunează stilului tău de viaţă, este acea neputinţă de a identifica nevoile reale ale leadershipului pe

care îl practici, şi pe care intenţionezi să-l ridici la un nivel cât mai înalt. Onorează-ţi obligaţiile în aşa fel încât de la un capăt la altul al personalităţii tale nicio trăsătură de caracter să nu fie pusă la îndoială, niciun sentiment să nu fie sădit sau distribuit la întâmplare.

Aşa cum îmbătrânirea este un proces care nu iartă pe nimeni, tot astfel un om care nu este în măsură să dea valoare leadershipului său - sădind în sufletul celorlalţi bucuria de a i se alătura drumului său, este neiertat de soarta eşecului. Felul de a te raporta la ceilalţi este un proces absolut necesar, fără de care nu poţi trece la un nivel mai înalt.

Leadership: Eşti capabil să schimbi fundalul realităţii care alimentează un eveniment destinat să te marcheze, astfel încât trăsăturile tale de caracter să nu fie puse la îndoială?

Care crezi că este factorul care ar putea diminua considerabil valoarea propriului tău fel de a fi? Îţi onorezi obligaţiile astfel încât trăsăturile tale de caracter să nu fie puse la îndoială? Cum îţi exteriorizezi sentimentele în faţa oamenilor? Care este calitatea unică, necesară unui lider, care te caracterizează? Cum contribui la procesul schimbării?

Dacă există anumite scăpări momentane ale voinţei tale de a contribui la schimbarea lucrurilor, dacă dă greş încercarea spiritului tău de a atrage atenţia asupra unui anumit aspect, dacă sursa de energie care îţi alimentează staţia de amplificare a convingerilor proprii (şi care poate vindeca orice răni) îşi încetează funcţionarea, atunci potenţialul tău de influenţă va scădea vertiginos.

Tendinţa generală în leadership nu este spre diferenţiere sau spre diversitate, ci mai degrabă spre omogenitate. Trebuie să uneşti toate acele părţi din tine care te definesc, şi să le aduci la un numitor comun, pentru a putea fi acceptate de toată lumea. Acestea sunt însuşirile de care trebuie să dai dovadămereu: tendinţa de a fi apreciat, nevoia de a fi atent în cine ai încredere, aptitudinea ta potenţiala de a fi în empatie cu ceea ce alţii proiectează în tine, consimțământul de a auzi ceea ce ţi se propune ascultării, discernământul de a face alegeri informate, capacitatea de a discerne între diferitele emoții.

Aşa cum organismele pluricelulare iau naştere dintr-o singură celulă, celula ou, tot astfel potenţialul tău de lider va creşte din acea legătură singulară care se stabileşte între părţile care te definesc, garantându-ţi dreptul de a te impune în mod hotărât în procesul de schimbare a lucrurilor, acţiunilor pe care le poţi schimba, spre obţinerea beneficiilor comune.

Leadership: Te concentrezi pe îndeplinirea consimțământului de a auzi ceea ce ţi se propune ascultării, într-un moment în care trebuie să aprobi înţelesul cel mai înalt al unei simţiri care refuză să treacă dincolo de aparenţă?

O anume tendinţă care se accentuează tot mai mult la unii lideri constă în caracterul temporar al răspunderii pe care şi-l asumă, în continuă "criza" aş spune. Căci ei omit cu dezinvoltură esenţialul, trec fără nicio jenă peste ceea ce este esenţial la leadershipul performant: îşi uită rolul, de aceea şi sunt înlocuiţi. Sau, mai bine zis, alţii sunt cei care reuşesc să-şi asume răspunderile şi să dea tonul solidarităţii, înlocuindu-i pe primii.

Oameni obişnuiţi, şi totuşi speciali în anume situaţii, oameni precum reportera care a fost prezentă la locul gravului accident, şi înduioşată de ultime cuvinte ale fetei rănită grav, a început o campanie dură împotriva conducerii sub influenţa alcoolului.

Această posibilitate de a acţiona deschis, imediat, obiectiv, la tot ceea ce este cu adevărat important pentru tine, pentru ceilalţi, din spirit de solidaritate, este întemeiată, susţinută de

existenţa acordului dintre Eul tău şi adevăratele valori pe care se bazează leadershipul. Această posibilitatea este deschisă tuturor oameni obişnuiţi.

Dacă nu transmiţi celorlalţi din jurul tău un mesaj, aşa cum reportera a dat viaţa mesajului: "Nu conduceţi sub influenţa alcoolului ! ", atunci nu vei putea să intri în rândul oamenilor cu adevărat inclinaţi spre arta conducerii. Vei pierde ocazia, chiar dacă nu eşti lider, să îi faci pe ceilalţi să înţeleagă că viaţa omului trebuie înnobilată de idealul cel mai înalt: de a salva alte vieţi.

Leadershipul se concretizează în îndeplinirea consimțământului de a auzi ceea ce ţi se propune ascultării, într-un moment în care trebuie să pui în valoare provocarea de a vedea ceea ce auzi.

Nevoile reale ale leadershipului sunt acestea: spontaneitatea simţirii care se face înţeleasă prin gând, consimțământul de a auzi ceea ce ţi se propune ascultării, discernământul de a face alegeri informate, capacitatea de a discerne între diferitele emoții, capacitatea de a oferi răspunsuri pentru a ieși din orice confuzie, valorificarea superioară a funcţiei simţirii faţă de cea a gândirii, încercarea simţirii de a deveni raţiune.

Tu acţionezi deschis, ferm, la tot ceea ce este cu adevărat important pentru ceilalţi oameni? Care sunt adevăratele valori pe care se întemeiază leadershipul tău? Este "solidaritatea" cea mai importantă trăsătura a leadershipului tău? Ai dorinţa şi abilitatea de a-ţi creşte potenţialul de lider? Porţi discuţii cu oamenii pentru a afla răspunsul la problemele care îi frământă? Care sunt capacităţile evidente (sau ascunse) ale persoanei pe care vrei s-o selectezi pentru schimbare?

Valorile cele mai înalte ale omului sunt empatia, stabilitatea emoţională, toleranţa adecvată în faţa eşecului, şi curajul de a nu renunţa.

Nicio suferinţă veche în amurguri

On Ianuarie 06, 2017

Dezvoltă-ţi o puternică trăsătură de obiectivizare a existenţei, creându-ţi o nouă poziție faţă de trăirile şi atitudinile vechi ce pot fi oricând redeclanşate.

Am fost puţin nebun, cu o adicţie faţă de lucrurile care îmi erau apropiate ca experienţă şi îndepărtare ca descoperire, într-o solidă loialitate numai faţă de aşternerile de înţelesuri pentru care merita să-mi vând chiar sufletul. Ceea ce îmi rămânea să dilatez în această realitate era, într-o formă simbolică, o extensie a visului lucid care mă chema înapoi la mine, la timpul pe care l-am irosit neştiindu-mă al nimănui, la bucuriile pe care nu le-am trăit în preajma tuturor. Exigenţe pentru dezvoltarea unor amăgiri închipuite, devenite ulterior bântuitoare.

Existenţa este forma simbolică a unei realităţi pe care nu o poţi manipula, sau mai degrabă este încercarea de a manipula o realitate devenită simbol prin intermediul felului cum îţi reprezenti fiinţa în ipostaza de Creator. Iar un povestitor care face parte dintr-o realitate mai largă, mizând pe forma unei atitudini egocentrice, poate deveni el însuşi simbolul unei noi filosofii despre lume şi viaţă în încercarea de a manipula felul realităţii de a se declara "mai reală" decât lumea fabricată în opera de artă.

Şi tot de atâtea ori am încercat să mă conving că nu am nevoie de mine, ca de atâtea ori am încercat să dau o lovitură destinului plin de " *dacă* " şi " *poate dacă nu era aşa",* cu toată opoziţia mea pentru toate surprizele irealului care se trudea să prindă, într-o vreme bună doar pentru amurguri, din îndepărtatele ceruri, doar bonusurile eliberatoare ale detaşării de situaţiile asemănătoare sau diferite.

Măsurători ale câmpului magnetic al creierului meu, făcute cu o precizie încă neatinsă vreodată, arătau o concentraţie puternică de subiectivizare în sensul unor aspiraţii de întoarcere la ceea ce contează, la ceea ce este autentic şi adevărat. Numai în acest fel puteam să întrevăd sensul unei experienţe de sine raportată la realitatea unei individualităţi indefinite, adică prin mijlocirea unei legături directe sau indirecte cu trăirile şi frământările unei lumi care se vrea prea ambiguă pentru a fi înţeleasă de minţile obişnuite.

Leadership: Eşti pregătit să fugi din calea unei realităţi pe care o ştii şi o trăieşti, dar pe care vrei s-o interpretezi altfel prin prisma unei înţelegeri superioare atribuite simbolurilor din care îţi poţi fabrica o altă identitate şi o altă conştiinţă?

Şi ceea ce am înţeles despre mine în lumea propriei conştiinţe, este exact ceea ce constata scriitorul Aldous Huxley despre el însuşi într-unul din romanele sale: *"Brusc, am simţit că lucrurile mergeau prea departe. Prea departe, chiar dacă pătrundeam spre o frumuseţe şi mai intensă, cu o semnificaţie şi mai profundă. Privind în urmă şi analizând, mă temeam să nu fiu copleşit, să nu mă dezintegrez sub presiunea unei realităţi mai măreţe decât ar fi putut să suporte un cuget obişnuit să trăiască mai tot timpul în lumea confortabilă a simbolurilor."*

Deseori o înţelegere superioară este generată din interiorul cauzei stărilor de confuzie şi nu din afara lor. Iar când destinul îi aplică omului o vizibilitate redusă, apoi salvarea temporară din rutina credinţei izvorâtă dintr-o eroare a propriei conştiinţe, prin falsificarea realităţii produse în jurul unei rupturi de sine, abia atunci el îşi ridică aripile gândurilor nerostite şi zboară într-un nou trailer: "Vreau să mă salvez de la desfiinţare ! "

El nu evadează în cerurile unui început interior de viaţă, doar în mod retrospectiv, ci începe

să poarte noi realităţi în universul care nu este antiuman, anti el însuşi. Iar în ceea ce priveşte relaţia dintre realitate şi simbol, ei bine, este ceva aparte. După cum aţi putea uşor intui, sunt supus presiunii de a nu mă putea acomoda cu personajele şi cu aparenţele acestei lumi, ci doar cu trăirile cele mai simple rezultate din experienţa de a spune o poveste fără alb şi negru, fără eroi. O poveste cu multe oglinzi, cu multe faţete, din care una singură este viaţa mea, la alt nivel de percepţie a lucrurilor.

Leadership: Poţi să te angajezi în înfăptuirea schimbării realităţii din care îşi sorb viaţa cuvintele tale, fără să execuţi mai multe repetări ale anterioarelor tale stări și experiențe?

Şi câte nu am avut de învățat din povestea bătrânului cusurgiu care, nervos şi veşnic preocupat de averea personală, îşi schimba testamentul în fiecare săptămână. La un moment dat, s-a împiedicat şi s-a înecat în bazinul cu apă fierbinte din camera lui înainte să-l poată observa sau ajuta cineva.

Ceea ce contează pentru înfăptuirea schimbării, accesibilă nu doar celor virtuoşi, ci și celor ce experimentează nuanţele tainice ale sentimentului de frământare, consumator de viață, este însăşi recunoaşterea faptului că duci "o luptă colosală" care îţi depăşeşte puterile.

Lupta care te încearcă, de la tonurile primitive ale obişnuinţei de a rămâne fidel pierderii de sine, la cele rafinat complimentare ale creării unor stări noi de motivaţie, în faza unei depline reflectări asupra existenței, este tocmai extraordinarul instrument de definiţie şi de creare a unei noi poziții faţă de trăirile şi atitudinile vechi ce pot fi oricând redeclanşate.

Realitatea din care îşi sorb viaţa cuvintele tale este lupta pe care o duci spre căutarea unei noi idei faţă de tine însuţi, învelită în pânză de "spectaculos" cu sentimentul unei poveşti care invită la reflecţie asupra liberului arbitru, sau asupra libertăţii de a fi oricine vrei tu.

Pe de altă parte, o realitate manifestată ca o necesitate stringentă de reformulare a unei concepţii unice şi atotcuprinzătoare despre ceea ce înseamnă căutarea unei noi idei faţă de tine însuţi - care să faciliteze o extindere a înţelesului de „identitate", este trebuincioasă menirii de a diferenţia acele fenomene care la nivelul autoacceptării au potenţialul de a deveni principale în sfera ta de existență.

În marele container al leadershipul se produc indivizii care au realizat, încă de la prima încercare de învingere a zbuciumului existenţial, că nu contează cum te percepi aruncând o privire retrospectivă asupra destinului: *„ poate dacă nu era aşa "*. Ci felul cum te pricepi să interpretezi şi să răspunzi la toate manifestările tale anterioare, memorate și reactualizate. Rămâi fidel lor?

Leadershipul este fidelitatea pe care o datorezi celuilalt TU într-o creaţie a cărei realitate nu aparţine unuia singur, ci tuturor.

Nicio suferinţă veche în amurguri scoate în prim plan acea autodepăşire de sine pricinuită de vechile manifestări sufleteşti, înscrise între neajunsuri şi deziderate, care are ca bază o deplinătate tot ceea ce este bun şi favorabil chiar şi în faţa unui destin ostil.

Niciodată nu trebuie să luaţi cinematografia „în bloc"

On Iunie 24, 2011

Un artist adevărat poate să mențină energia spontană a creației autentice, chiar și atunci când presiunile externe favorizează un stil academic și standardizat.

Niciodată nu trebuie să luați cinematografia noastră „în bloc". Văd cu groază cum avangarda noastră devine, încetul cu încetul, o academie infatuată, manierată, cu toca – roșie încă, dar capricios șifonată – peste fracul estetic și tradițional, de o tăietură perfectă, impecabilă. Este sufocată! Și nu este vorba doar de „aripa" din Leningrad, care tinde spre clasicism – cel mai dezgustător dintre clasicismele posibile! – ci de tendința generală care cuprinde majoritatea lucrurilor care se fac.

Și, ceea ce este și mai grav, aceste tendințe apar și la cei pentru care lucrăm! „Evoluăm" calm, acolo unde ar trebui să simțim din nou nevoia de a revoluționa până la temelii. În loc de pulsația vieții și a pasiunii autentice, stilismul steril devine regula, iar creația se transformă într-o estetică lipsită de viață.

Aceste observații reflectă starea de spirit a regizorului rus Serghei Eisenstein și explică motivația drumului său ales în următorul film, „Vechiul și Noul". Totodată, ele dezvăluie modul său de gândire și reacție față de dificultățile inerente în procesul creativ.

Leadership: În ce măsură transformarea avangardei într-un stil convențional afectează capacitatea creației tale de a rămâne un spațiu al explorării autentice?

În ecosistemul cinematografic, diversitatea avangardei poate fi treptat înlocuită de uniformitate, atunci când condițiile devin manierate și infatuate. Creația, odată plină de viață și pasiune autentică, este sufocată de un stil academic, mai puțin rezistent, dar perfect în aparență. Iar această standardizare duce la pierderea spiritului revoluționar și la crearea unor opere sterile, aranjate cu eleganță în fracul lor estetic, dar lipsite de energia spontană a artei adevărate.

Asemenea unei grădini artificiale care înlocuiește natura sălbatică, această „evoluție calmă" a cinematografiei riscă să transforme temeliile vitale ale creației în simple ornamente standardizate. Avangarda domesticită devine, astfel, o academie convențională.

Leadershipul artistic susține energia autentică a creației în fața presiunilor academismului, fiind un act de curaj care păstrează viu suflul revoluționar al artei.

Niciodată nu trebuie să luați cinematografia „în bloc", pentru că fiecare creator are propria viziune artistică, mai ales atunci când avangarda riscă să devină academism steril. Autenticitatea trebuie constant reînnoită, astfel încât expresia cinematografică să rămână palpitantă și adevărată.

Niciun fel de sacrificiu nu mă sperie

On Noiembrie 26, 2016

Porneşte în căutarea unui sens de exprimare decurgând din ceea ce încerci să construieşti, fără a avea la îndemână toate drepturile asupra conţinutului pe care îl experimentezi.

Eisenstein a spus odată: "Primele îndepărtate bubuituri ale artei revoluţionare în devenire se auzeau împrejur şi cutremurau văzduhul. Atracţia mea pentru misterioasa activitate care se numeşte artă era de nebiruit, acaparatoare, nesăţioasă. Niciun fel de sacrificiu nu mă sperie."

Gata de orice sacrificiu pentru a putea pătrunde în captivitatea teatrală, Eisenstein rătăcea febril prin Moscova. Primul sacrificiu fusese buchisirea hieroglifelor japoneze cu scopul de a putea, astfel, rămâne în capitală. Apoi, renunţarea la căminul din Petrograd în schimbul unei hoinăreli fără ieşire aparentă, pe străzile Moscovei. Până la întâlnirea cu Strauch, Eisenstein nu avea adăpost, nu avea mâncare, pe care o primeau pe cartelă doar cei ce munceau undeva sau studenţii (dar universitatea nu se deschisese încă). Moscova din 1920 ducea o lipsă cumplită de hrană şi căldură.

În ciuda acestor condiţii dure, setea de cultură a maselor, entuziasmul oamenilor de artă dăruiau vieţii moscovite o căldură neobişnuită, o incandescenţă alimentată de flacăra pasiunii creatoare. Să ne amintim că în acea vreme celebrul scriitor rus Ilia Ehrenburg nu se lamenta pentru totala lipsă de hârtie, ci îşi scria, cu maximum de firesc, romanele şi poeziile pe dosul vechilor chitanţe. *

Leadership: Îndrăznești să te separi de viaţa cotidiană în mod alternativ, în urma obişnuinţei de a socoti arta ca pe ceva apropiat şi accesibil unei viziuni care niciodată nu se demodează?

Ceea întăreşte legătura dintre viață şi artă, date fiind pe de o parte condiţiile de dezvoltare, pe de altă parte dinamica fenomenelor sociale și morale, este faptul că întregului concurs de împrejurări care te propulsează de la un statut la altul i se dă o funcţionalitate. Este vorba despre acea versiune a puterii de care trebuie să dai dovadă în condiţiile unei scăderi a traiului lumii, puterea de a fi altcineva, care îţi dă posibilitatea de a te conecta la acea personalitate exemplară care trebuie să dăinuie în creaţia ta.

Orice situație, indiferent cât de nepotrivită la suprafaţă, poate fi privită sub două aspecte. Mai întâi sub aspectul unei alianțe cu „eforturile exagerate", dintre ceea ce colectezi fără posibilități mari de transpunere într-un control al folosinţei, și ceea începi să introduci în propria formă de perceptie și cunoaștere pornind de la micile deprinderi.

Apoi, sub aspectul unei intenţii serioase de asimilare forţată a unor ascunsuri din sensurile pe care le atribuie mintea unor evenimente, care creează noi înţelegeri, noi învăţături foarte diferite, al căror unic indicator este acela de: confruntare curajoasă.

Arta este outputul relaţiei dintre subiect, cadru și conţinut. Arta este un profil al leadershipului, un proces de căutare al unui sens de exprimare decurgând din ceea ce încerci să construieşti fără a avea la îndemână toate drepturile asupra conţinutului pe care îl experimentezi. Cu consecinţa înlocuirii sau modificării acelor constante iniţiale sau intermediare care duc la o depăşire a limitei pe care o poţi suporta.

A te separa de viaţa cotidiană în mod alternativ, în urma obişnuinţei de a socoti arta ca pe ceva apropiat şi accesibil, înseamnă să îţi rezervi dreptul de a opera modificări asupra conţinutului experimental. Un om care dobândeşte abilitatea de a se ridica la un înalt nivel de înțelegere și simţire, o mentalitate care găsește suport chiar și într-o realitate împotmolită în propriile limite, este un mare artist - singurul în măsură să ridice experienţele la un înalt nivel de abordare artistică.

Leadershipul este alternativa adoptării psihologiei şi coordonatelor unei personalităţi care îşi îngăduie totul pentru a avea totul, sau care traversează epocile pentru a face loc glasurilor altor vremi să îşi exprime individualitatea, gândurile şi ideile în varianta modernă.

Niciun fel de sacrificiu nu mă sperie este deviza oricărui om gata de orice sacrificiu pentru a putea pătrunde în captivitatea artei, dincolo de limitele condiţionate de circumstanţele vieţii.

Leadershipul este o abordare artistică a nuanţei de gri a vieții. Oamenii cu adevărat mari sunt artişti desăvârşiţi fiindcă sunt capabili să-şi menţină și să-şi valorifice avantajul de a-şi schimba nuanţa în decursul vieții.

*** Notă:** Ion Barna - *Eisenstein* , Editura Tineretului, 1966.

Nimeni nu ştie ce se petrece în sufletul unui regizor

On Ianuarie 05, 2017

Adesea, ceea ce se prezintă ca o conformare exterioară nu reflectă veritabilele convingeri și sentimente ale individului, mai ales pe planul unei identități coerente şi unitare.

Eisenstein, căruia i s-au propus subiecte alese special astfel ca să fie nevoit a le refuza, este acum vehement atacat pentru că nu realizase de mult niciun film.

Nemulţumirile marelui regizor continuă însă. Invitat în continuare la serbarea de aniversare a 15 ani de existenţa a cinematografiei sovietice, Eisenstein primeşte o mai mică distincţie decât colegii săi, cărora li se acordă ordine şi titluri mai înalte. Printre ei se număra Podovkin, Dovjenko, foştii sale elevi, fraţii Vasiliev, sau chiar fostul său asistent Alexandrov.

A doua zi, ca preşedinte al consfătuirii, rosteşte un discurs de închidere. Răspunde ponderat unor atacuri. Se angajează să reînceapă munca de creaţie. Peste câţiva ani îşi va aminti cu ironie atmosfera cenuşie...în anii de după 1930, care încerca să cuprindă pe toţi, uniformizând creaţia. Evident, aşadar, că supunerea sa conformistă de acum nu este reală. Nimeni nu ştie – şi nu trebuia să ştie – ce se petrece în sufletul său. Sfinx imperturbabil, maiestatea sa Eisenstein îşi păstrează maiestatea.

Leadership: Reușești să-ţi păstrezi rezistența interioară, navigând printre cerințele contradictorii și care aparent se conformează exteriorului, aşa încât să-ţi păstrezi autenticitatea?

Adesea, artiștii, la fel ca Eisenstein, sunt percepuți ca niște figuri conformiste în public, însă realitățile lor interioare sunt pline de convingeri și sentimente profunde, nemulțumiri și dorințe de exprimare liberă, care rareori sunt vizibile pentru exterior. În ciuda unei aparente conformări exterioare, inima creativă a artistului luptă continuu cu restricțiile impuse, refuzând să cedeze complet. Această luptă internă este adesea mascată de o fațadă imperturbabilă, unde "nimeni nu știe - și nu trebuia să știe - ce se petrece în sufletul său".

Așa cum Eisenstein a fost nevoit să navigheze printre cerințele contradictorii ale timpului său, lăsând impresia unei supuneri, în realitate el a păstrat o rezistență interioară, refuzând să-și abandoneze viziunea artistică. Prin discursurile și gesturile sale aparent conformiste, el și-a exprimat subtil critica și a transmis mesaje ascunse, demonstrând că supunerea sa nu era decât o strategie de supraviețuire în fața unei uniformizări creative asupritoare.

Leadership: Poți extinde semnificația confruntărilor tale, oferind o interpretare mai profundă a conflictului intern, culminând într-o viziune care transcende imediatul și exaltă lupta ta continuă în fața autorităților?

În condițiile grele de creaţie pe care le impune o viaţă plină de încercări şi nemulţumiri, artistul (regizorul în acest caz) se poate trezi faţă în faţă cu o alegere dificilă: să-și exprime liber ideile şi sentimentele prin intermediul creaţiei, riscând atacuri şi ironii, sau să adere la linia impusă de "sistemul în vogă", sacrificând astfel integritatea sa artistică pentru o cauză mai puţin nobilă. În acest caz, artistul nu se confruntă doar cu o luptă personală dusă într-o atmosferă incertă, dintre mândrie şi prejudecată, ci și cu o luptă colectivă, implicând întreaga comunitate artistică din care face parte.

Un artist original nu se supune preferințelor altora decât în materie de respect și recunoaștere

a operei sale. Chiar dacă regizorii folosesc în opera lor simboluri subtile și mesaje codate pentru a comunica convingerile lor nestrămutate, adâncite în sistemul lor moral individual, în exterior trebuie să se conformeze cerințelor oficiale, pentru a nu declanşa represalii. Luând în calcul dualitatea existenței artistice, trebuie să subliniem că tensiunile dintre libertatea individuală și constrângerile sociale sunt de fapt inevitabile.

Aşadar, povestea lui Eisenstein devine nu doar relatarea unui conflict personal, ci și o reflectare a luptei universale a artiștilor împotriva constrângerilor impuse de autorități. Aceasta extinde semnificația existenţial-profesională a regizorului, oferind o interpretare mai profundă și mai largă a confruntărilor sale, și arată cum, în ciuda recunoașterii externe, conflictul său intern și devotamentul față de artă autentică rămân neclintite.

În leadership, supunerea este doar o strategie de supraviețuire în fața uniformizării creative. Recunoașterea externă poate masca conflictul intern, dar devotamentul față de arta autentică rămâne neclintit, oferind o mărturie a forței interioare și a determinării în a-ți urmări potențialul.

Nimeni nu ştie ce se petrece în sufletul unui regizor, dar toată lumea îi urmăreşte capodopera şi nu dă importanţă aspectelor ascunse care nu spun nimic despre lupta artistului împotriva sistemului. Un singur lucru este cert: dacă vrei să te exprimi pe deplin, trebuie să scoți din tine esența sufletului tău și s-o oferi lumii printr-o creație care transcende imediatul, dând o valoare incontestabilă spiritului tău.

*** Notă:** Ion Barna - *Eisenstein* , Editura Tineretului, 1966.

Nisipurile timpului

On Februarie 15, 2011

Închină-ţi viaţa sublimului, pentru ca leadershipul tău să prindă viaţă şi să reziste în timp.

Simt nevoia să vă relatez din nou o scenă interesantă din filmul " *Prince of Persia (2010)* ". Dastan, prinţul Persiei, împreună cu Tamina, prinţesa Alamutului, ajung în încăperea Clepsidrei, îngropată în adâncul pământului. Trebuiau cu orice preţ să-l oprească pe Nizam, fratele răposatului rege persan Sharaman, să întoarcă timpul înapoi.

Între Nizam şi Dastan are loc o altercaţie violentă. Iar din cauza cutremurului care s-a produs şi a nisipului care se năruia, Dastan alunecă de pe stânci. Dar reuşeşte să se prindă de o margine a acestuia. În acest timp Tamina ajunge faţă în faţă cu Nizam, şi face o ultimă încercare de a-l convinge pe acesta să renunţe la planul său diabolic. În schimb, Nizam, care nu putea să-şi scoată din cap obsesia lui de-o viaţă – de a deveni cel mai puternic om din Persia, o prinde de umeri şi o aruncă în hăul care se deschisese în jurul lor.

Dastan reuşeşte să o prindă de mână pe Tamina. În adâncul inimii lui simţea că nu putea trăi decât prin ea. Însă Tamina, privindu-l în ochi cu o duioşie sfâşietoare, îndurerată peste măsură fiindcă îşi simţea sfârşitul aproape, şi înţelegând furtuna ce îi zguduia inima iubitului ei, îi spune acestuia ultimele cuvinte înainte să-i dea drumul la mână:

- Dastan, opreşte-l pe Nizam. Dacă sticla se sparge, lumea va muri odată cu ea ! Te iubesc !

Fiecare vorbă a ei îi străpungea inima lui Dastan. Ochii ei exprimau ceva dulce, era dragostea ce-o nutrea pentru el şi pentru dorinţa de viaţă.

- Nu ! strigă Dastan, privindu-şi iubita prăbuşindu-se în hăul adânc. Suferinţa puternică, izvorâtă din adâncul inimii sale îi amplifică forţa şi dorinta de a-l impiedica pe Nizam să-şi ducă planul la capăt. Cu inima încleştată de durere şi plin de furie el îşi adună tot curajul şi toată puterea, se urcă înapoi pe stâncă şi se năpusti asupra lui Nizam.

În cele din urmă Dastan a reuşit să întoarcă timpul înapoi, să-l învingă pe Nizam, şi s-o readucă la viaţă pe Tamina dovedindu-şi suprema dragoste pe care o purta pentru ea.

Leadership: Trăsăturile tale de caracter corespund forţei în ascensiune a însemnătăţii pe care o dai luptei cu propriile tale limite în încercarea de a umple satisfăcător un timp care altfel ar fi gol?

Lupta cu propriile limite poate avea o însemnătate de gestionare a timpului în funcţie de modul cum te raportezi la marea provocare de a trăi și de a-ţi asimila cât mai mult propria existență sau, de ce nu, de a ţi-o pierde. Timpul poate fi perceput ca un zid care se surpă în faţa ta sau ca o continuare a unei cărţi ce trebuie citită de mai multe ori pentru a-i sesiza toate nuanţele.

Când vorbim de leadership nu ne referim, strict, la arta de a ajunge în frunte. Ci, ne referim şi la o realitate bazată pe efecte - care servesc exclusiv scopurilor nobile, care nu rămân în umbră şi devin neidentificabile. Leadershipul, în a cărui compoziţie se regăseşte nisipul fin al valorilor adevărate, n-ar trebui să prezinte un grad pronunţat de uzură dacă este lăcuit

periodic cu straturi groase de credinţă.

Această putinţă de a înfăptui binele prin conştiinţa unui sacrificiu suprem, stă în faţa tuturor resurselor disponibile pentru finalizarea la termen a edificiului pe care el şi-a zidit calităţile. Un timp gol este rezultatul unei vieţi fără sens care nu singularizează lectura unei cărţi povestită de oameni extraordinari.

Leadership: Poţi să te constitui ca o realitate care conţine în sine întregul timp şi spaţiu, fie ca o evadare dintr-o realitate care te constrânge să suporţi testul major al poveştii tale?

E de presupus că întotdeauna mijloacele de înălţare a edificiului leadershipului se resorb în scopul atins. Barierele care trasează graniţe pentru toţi acei indivizi care ar putea la un moment dat să funcţioneze extraordinar, acţionând în baza impulsurilor instinctive, pot fi depăşite doar cu acordul conştiinţei curate.

Această conştiinţă determină manifestarea lor, dând naştere la o nouă formă de "a fi", suma acelor trăsături de caracter care corespund forţei în ascensiune a însemnătăţii pe care ei o dau luptei cu propriile lor limite. Adică, atunci când simt nevoia să-şi dovedească apartenenţa la cineva sau ceva, cu riscul propriei lor libertăţi şi vieţi.

Dar, în special, ei trebuie să întrebuinţeze o doză mărită de chibzuinţă şi încredere în consolidarea temeliei edificiului, pentru a nu se surpa înainte de fi terminat. De aceea judecăţile proprii, izvorâte dintr-o perspectivă care străluceşte ca o făclie în întunericul imens al prezentului, trebuie să se menţină permanent la niveluri ridicate. Înţelegerea adecvată a prezentului poate determina o mai corectă evaluare a trecutului, dar şi o altă concepţie asupra viitorului.

Testul major al poveştii lui Dastan nu a fost cerinţa impunătoare a conştiinţei de a fi ghidată cu mult dincolo de limitele ei prezente, ci de deschiderea conştiinţei de-a nu fi afectată de emoţii în modul radical în care acest lucru se întâmplă într-un creier obişnuit.

Leadership: Atribui valori greşite unor aspecte ale lumii exterioare, evaluându-ţi capacităţile în raport cu momentele de timp anulate de posibilităţile tale de a gestiona esenţa condiţiei de muritor?

Tot ceea ce te înconjoară şi te limitează, care te blochează şi nu te lasă nicicum să avansezi, depinde de valorile de compromis pe care se fundamentează experienţa trăirii într-o realitate paralelă, accesând reversibilitatea timpului.

Când încerci să te lupţi cu tot ce e rău, acel moment când cea mai dragă persoană de lângă tine pleacă, când cazi şi crezi că nu te mai poţi ridica, devii prizonierul unei lumi pe dos: moartea e intensă, familiară, apropiată, în timp ce viaţa e tot mai străină.

Condiţia de muritor se instalează în acel moment când crezi că viaţa nu mai are nici un rost. Astfel, începi să atribui valori greşite multor aspecte ale lumii exterioare, cum ar fi maximizarea efectelor negative asupra relaţiei dintre oameni şi încercările lor, reactualizând constant adevărul conform căruia nimeni nu trăieşte la nesfârşit.

Capacităţile tale de a-ţi construi un prezent şi un viitor mai bun, de a-ţi înfrumuseţa viaţa şi de a produce o schimbare semnificativă în lume, încep să scadă şi să aibă valori de "mărginire" la plenitudinea plăcerilor simple şi trecătoare.

Leadershipul nu este un edificiu veşnic, de neclintit, căruia să-i poţi adăuga pe rând câte o nouă piatră de glorie, ci mai degrabă un organism viu care evoluează trecând prin mai multe faze. Iar aşa cum nisipul timpului curge neîncetat în clepsidra vieţii, tot aşa şi tu, ca lider, îţi poţi spori neîncetat valoarea personală impunându-ţi viziunea şi iniţiind un leadership bazat pe valori şi principii morale bine stabilite, precum solidaritatea şi coeziunea.

Încercarea de a străpunge timpul este fundalul a tot ceea ce experimentează fiinţa umană de la începutul vieţii şi până la sfârşitul ei, pe care trebuie să proiectăm învăţătura credinţei şi împlinirii faptelor măreţe.

Leadershipul se poate clădi pe o fundaţie solidă, pe empatie, pe adevărata prietenie, pe înţelegere şi afecţiune reciprocă între indivizi, pe sentimente de profundă preţuire şi recunoştinţă. Sau se poate dărâma şi se poate transforma într-un morman de nisip dacă îl foloseşti după bunul plac, fără să ţii cont de limitele lui, de principiile de aur pe care, ca lider, ai obligaţia să le respecţi. Principii precum " *nu-ţi folosi puterea în mod greşit pentru a-ţi satisface orgoliile personale.* "

Dacă eşti un adept fanatic al filozofiei *"În faţa mea toată lumea trebuie să se aplece"* , atunci nu vei putea să controlezi aşteptările crescute ale oamenilor, şi în consecinţă vei eşua.

Secretul remarcabil al unui lider de succes constă în crearea unei armonii calde între ceea ce simte, ceea ce gândeşte şi felul cum acţionează. Aşa cum iubirea indică armonia între două făpturi care se completează şi se înţeleg bine mai ales la nivel emoţional - tot aşa leadershipul tău indică gradul de apropiere faţă de ceilalţi oameni şi se poate ridica la cel mai înalt grad de desăvârsire daca îţi dezvolţi abilităţile de a înţelege suferinţele, motivaţiile şi aspiraţiile lor.

Linia timpului pe care trebuie să o construieşti pentru a fi folosită doar la accesarea unei conştiinţe mai înalte reflectă ceea ce aduni într-o viaţă care nu se pierde în van.

Nisipurile timpului reprezintă o modalitate metaforică de a transmite un adevăr incontestabil: totul se transformă, inclusiv leadershipul, care se poate ridica la înălţime numai în timp, pe măsura dezvoltării lui, sau se poate nărui ca un castel de nisip dacă nu are un fundament stabil şi un liant adecvat.

Ia atitudine în faţa timpului dacă vrei ca valoarea leadershipului tău să crească. Închină-ţi viaţa sublimului, pentru ca leadershipul tău sa prindă viata şi să reziste în timp. Făureşte-ţi niste idealuri şi nişte valori care să nu contravină eticii şi integrităţii profesionale. Închină-ţi viaţa dezvoltării unei noi viziuni, a unui nou mod de zugrăvire a leadershipului bazat pe unitate şi stabilitate, pe adevăr, empatie şi încredere.

Adună-ţi tot curajul şi toată puterea inimii pentru a-ţi dovedi preţuirea şi ataşamentul faţă de cei din jurul tău, şi astfel leadershipul tău va prinde viaţă şi va rezista în timp.

Nivelul artistic în leadership

On Mai 07, 2017

Îmbunătăţeşte-ţi experiența de a crea noi modele de expunere a concepţiilor despre lume, om și viață, prin dezvoltarea capacităţii de a genera idei izvorâte din acele emoţii şi sentimente care au schimbat traiectoria propriei deveniri.

Aveam teribila senzaţie că trăiesc printr-un simţământ al apropierii de arta concilierii fizicii cu Dumnezeu, dar cu înclinare spre măiestria unui Rembrandt căruia îi plăcea să pătrundă adânc în psihologia celor portretizaţi. Destul de repede am învăţat să stimulez "variaţia oarbă" permiţând imaginaţiei să lucreze liber şi să producă noi asocieri de idei desprinse din structurile unei genetici elementare, generate la întâmplare din culorile unei lumi imposibile.

În acel anotimp al evoluţiei grăbite, secondate de memento-ul unei biochimii străine şi implacabil ostile, moartea tot mai pronunţată, ca şi viaţa tot mai chinuită, formau ramura unei ştiinţe a victimizării. O ştiinţă a cărei forţă, dominată de morfologie, din schema de reacţii pline de şoc care violau legile geneticii, era egală cu suma variaţiilor dintre informaţiile aflate la îndemână şi descoperirile de moment.

Probabil, evoluţia personalităţii mele era direct proporţională cu perfecta stăpânire a artei de expunere a unor noi concepţii despre lume, despre viaţă, într-un soi de apropiere de pulsul naturii, de ştiinţele ei. Noroc că întotdeauna natura cere să fie venerată nu doar prin jertfe omeneşti, ci prin prisma învierii omului la viaţă, pe axa artei de a merge înainte, dar cu băgare de seamă și în speranța că îi va fi dat să învingă toate piedicile, ca să aibă ce le răspunde reproșurilor tentativei de a se întoarce la origini.

Era un fel de angajament de a mă lăsa inspirat de combinaţia a numai două tonuri care mă trezeau înspăimântat din ceasul libertății incerte, roșu și negru, transformarea prin moarte și învierea prin chinuri. Roşul lăsa impresia de horror cu elemente fantastice ce căpătau brusc o explicaţie perfect raţională, negrul lăsa să planeze o incertitudine în privința momentului meu de glorie.

Leadership: Creaţia ta produce o schimbare în modul de reprezentare a realităţii faţă de actul prelucrării unei imagini care asigură acurateţea reprezentării de sine în raport cu o experienţă artistică inovativă?

Se crease o rezonanţă remarcabilă între voia Divină şi prezenţa Divină, între interioritate și exterioritate. Un delir al lumii înlăcrimate. O lucrare în care arta modela sensibilitatea umană, intensificând-o până la furia cea mai agresivă într-un prezent care nu mai prezenta speranța unui viitor. Cred că imaginea căreia trebuia să-i asigur acurateţea reprezentării de sine, eu aflându-mă în prim planul unei creaţii numite "Reflecţie asupra evoluţiei lumii", era dată de reprezentarea veridică a unei realităţi care cultivă mai mult "news" decât "fake", deci o realitate care pe neaşteptate poate deveni imprevizibilă.

În leadership, creaţia capătă valenţe de excepție de la regulă într-un test psiho-comportamental care compară ceea ce vezi - cu ceea ce ți-ai dori să vezi, măsurând capacitățile tale de înțelegere a unei realităţi deosebit de complexe.

Aceeaşi creaţie, văzută din perspectiva reprezentării de sine, referindu-mă la mine ca la un mic tratat al ştiinţei menit să întărească o fortăreaţă atât pe hârtie cât şi în evoluţia lumii, se continua cu plus-valoarea unei experienţe artistice de tip "crossing borders". Un artist trebuie să privească dincolo de imaginile din faţa sa, dincolo de aparenţe, dincolo de linia

orizontului, dincolo de educaţia formală, pentru a-şi putea însuşi toate cuceririle artei: viziunea, idealurile, filosofia de creaţie, trăirile unei lumi noi, percepţiile unui modernism al realităţii, alianţa dintre rigoare şi fantezie.

Totul în fundalul evenimentelor era colorat cu un neobişnuit realism, psihotic ca într-un portret haşurat ce refuză reducţia şi simplificarea în favoarea nuanţelor tratate cu o uimitoare veracitate, din care se degaja întrebarea îngrijorătoare: cum e să fii singur în lupta cu demonii?

Trasările conturului unor picături de lacrimi circumscrise unor tipare liniare de trăire intensă încercau să pună la îndoială universul de sensibilitate, plin de poezie, a artistului care sub masca unei aparente apatii, dar convențională în multe privinţe, avea darul de a disimula o anumită individualitate.

Leadership: Te ridici la așteptările impuse de un rol care-ţi dă prilejul să realizezi o frumoasă creaţie, evaluându-ţi talentul pe linia unei continuităţi imprevizibile?

Credeam că-mi voi putea grupa gândurile și trăirile într-o idee nouă, prin înfruntarea lor, prin rezolvarea contradicţiilor aparent ostile ale unei lumi în tranziţie, într-un atribut al cunoaşterii și al nobleţii pentru care eram predestinat - în faţa teribilului suspans al vieţii plină de răsturnări de situație.

Teorema proiecţiilor spune că proiecţia pe o axă a rezultantei unui sistem de forţe este egală cu suma proiecţiilor pe aceeaşi axa a forţelor care alcătuiesc sistemul.

Adevărata artă cu care mă confruntam, îi simţeam fiorii din care se năşteau monştrii, la rândul lor extrem de captivanţi ca într-un thriller *qui touche, qui pose des questions jusqu'à la fin* , un thriller care juca trucuri cu mintea mea, era perfecţionarea unei genetici menită să rezolve problemele insolubile: "ce este viaţa, ce este omul, ce este lumea, ce este omul în lume?"

Era ca şi când trebuia să dau naştere unei poetici care să capteze în mrejele sale elementele inovatoare ale unei gândiri de nivel superior, dar deocamdată încă insuficient cultivată în procesul de evoluție pe axa unui sistem de forțe care admitea o rezultantă unică egală cu momentul meu de noroc în viaţă. Fireşte, încă nu am găsit răspunsurile. Dar încă mai caut. Încă sunt în viaţă.

Leadershipul se afirmă printr-o calitate pe care toţi ar trebui să o aprecieze: să reuşeşti să defineşti distincţia dintre ceea ce ți se întâmplă şi ceea ce te face să continui să mergi înainte, oferind o imagine fidelă poziţiei pe care o ocupi în cadrul unei compoziţii coerente.

Poziţia poate fi cea de artist care a înțeles viața și a receptat-o în operele sale ca o vocaţie şi şi-a asumat-o ca o misiune. Sau cea de artist care, trăind în mijlocul unei societăţi greu încercate, se apucă să zugrăvească societatea aceea ca un ideal de omenie de neatins.

Motivația și dorința de a participa la chemarea pentru efectuarea schimbării se determină prin aprecierea evoluţiei în timp a unui fenomen interesant, dar dureros. Și, totodată, prin estimarea modului de a te manifesta prin sensibilitate artistică. Prin capacitatea de a te exprima pe diferitele planuri ale creaţiei care amestecă voit registrul miraculosului cu cel al supranaturalului. Prin pornirea lăuntrică de a accede la o fărâmă din cunoaşterea adevărului cu privire la ceea ce este de evitat într-un cadru al deznădejdii.

Nivelul artistic în leadership este asigurat de experiența de a crea noi modele de expunere a concepţiilor despre lume, om și viață, prin dezvoltarea capacităţii de a genera idei izvorâte din acele emoţii şi sentimente care au schimbat traiectoria propriei deveniri.

Nivelul artistic este cu atât mai înalt cu cât reuşeşti mai bine să-ţi psihologizezi toată povestea, mai ales hotarul dintre viaţă şi moarte. Iar adevărata ta spectaculozitate se produce atunci când permiţi imaginaţiei să lucreze liber şi să producă noi asocieri de idei generate la întâmplare din culorile unei lumi imposibile.

* **Notă:** World War Z

Nivelul cel mai înalt al leadershipului

On Decembrie 15, 2016

Purcede la construcția unei arte desăvârşite, realizând o îmbinare intre experiența extazului și cerinţele totului din jur.

O linişte cosmică, născută din integrarea omului în peisaj, în natură, în viaţa ciudată a acestei ţări. Odată rămas singur cu natura te cuprinde o senzaţie neobişnuită de autodizolvare în natură, de contopire cu ea, o armonie deplină. Se naşte senzaţia cele mai sublime bucurii a extazului. Extazul ale cărui legi au fost obiectul atâtor cercetări înfrigurate, atâtor calcule migăloase ale artistului. Acum, însă, a devenit o senzaţie concretă. Se răstoarnă deci toate gândurile iniţiale în legătură cu filmul.

Cinematograful nu i se pare pasionant decât în măsura în care este un mic univers experimental. Va trebui să urmeze o perioadă de purificare, de transformare completă a cinematografiei în care n-o să rămână piatră peste piatră din scumpele noastre opere răposate. Ceea ce este aici în jur e mult mai interesant, incomparabil mai pasionant decât orice fel de cinematografie. Problema montajului nu i se mai pare deloc interesantă. Cea a sunetului mai puţin.

Acum, ajuns în miezul trăirii extazului, Eisenstein are totuşi o reacţie alergică parcă împotriva cinematografiei. "Totuşi, atât de conştiincios ca aici mi se pare că n-am lucrat niciodată". Se naşte acum voluptatea unică şi atât de râvnită a trăirii unei armonii şi unităţi interioare. *

Leadership: Recunoşti rolul unei categorii de forţe necesare în captarea naturii esenţiale a unei experienţe trăită exclusiv prin tot ce te înconjoară, încât să duci creaţia la nivel de artă atemporară?

Extazul este drumul, nu fără însemnătate, străbătut de omul plin de cunoaştere pe suprafaţa unei realităţi de ordin suprem, pe care o numim plenitudine invizibilă în mișcare curgătoare, după ce a traversat vastitatea unei trăiri care i-a lărgit conştiinţa şi i-a rafinat sensibilitatea. Aici se constată unicitatea creaţiei dusă la nivel de artă atemporară: prin faptul că ceea ce trăieşti prin lucrul în care te crezi te împlineşte fără să te justifici, fără să ai celelalte lucruri.

Un om care experimentează extazul, omul pătruns de un conţinut al sublimului, oricât ar fi de nebunească senzația de a fi înconjurat de tot ceea ce înseamnă bun, frumos, inspiraţional, artistic, trăiește ca un adevărat creator după regulile unei vieți și ale unei arte care înseamnă continuitate. O artă marcată de calcule migăloase, de culori tot mai sugestive, ce capătă o anume simbolistică, până la construirea unui adevărat arsenal de elemente „fantasy" cu valoare de reper pentru formarea noului.

Omul pus în faţa unui asemenea arselan de elemente, corespunde la rândul său unui întreg numit „nemărginire", fiind capabil să atribuie operei sale subordonată unui concept unitar – un destin înălţător, plin de magnetism şi virtuozitate. El capăta o putere neobișnuită, ca un astru strălucind de lumină, apropiindu-se de perfecţiunea celui care iubeşte şi împrumută termeni din însăşi propriile sale condiții de funcţionare, în autoritatea unei transcendenţe absolute.

Personalitatea care gravitează în jurul leadershipul este cea care, conectându-se la totul din jur, reușește să creeze un univers experimental, mereu în expansiune, format dintr-o dimensiune a trăirilor care se cer împărtăşite, din dimensiunea unui mod de viață plin de

sens și din dimensiunea unei teme de creaţie mai largi.

Construcţia artei, la fel ca și măreția omului, seamănă cu o formă mai nouă a leadershipului, numită de mine „Inside-Out". Adică ceva ce se petrece în tine, în relație cu exteriorul care îți ia ochii și te vrăjeşte în totalitate. Iar a depăși limita cunoașterii experimentale, prin raportarea la ceea ce simți în contextul unui anumit tip de răspuns la ce se întâmpla în jurul tău, este o capodoperă a sublimului.

Forțele care contribuie la captarea naturii esenţiale a unei experiențe trăită exclusiv prin tot ce te înconjoară constau în unitatea dintre idee și imagine, în care se împletește o armonie de emoții, integrand astfel omul într-un peisaj al neobişnuitului care se reinventează constant.

Inside-out este calitatea lăuntrică a omului transferată valoric şi spiritual în forma unei creaţii care sugerează perfecta armonie dintre natură şi sentiment. Or evaluarea calităţii unei creaţii axată pe cerinţele "totului din jur", adică depinzând de trăsăturile fiecărui model de inspiraţie în parte, se face la fel, prin transferul valoric şi lăuntric (în marea carte a naturii) a unei percepţii sensibile despre o realitate necontrafăcută.

Adevărata împlinire a creaţiei se obţine prin trăirea unei armonii şi a unităţii interioare prin comuniune cu viaţa naturii, cu elemente el, cu forţele ei, cu valorile ei, încât să cuprinzi NOUL unui mod de gândire într-o temă de mare temeritate, de mare vizibilitate, de mare interes.

Nivelul cel mai înalt al leadershipului poate fi atins doar de către omul care percepe creaţia prin adâncirea înțelegerii contextelor de explorare a noului ce depind de armonizarea între experiența extazului și cerinţele totului din jur.

*** Notă:** Ion Barna - *Eisenstein* , Editura Tineretului, 1966.

Noi doi, visul şi povestea

On Aprilie 27, 2020

Învaţă să fii creaţia unui Creator care te obligă să-i accepţi prezenţa dintr-o altă perspectivă a duratei şi a spaţiului.

Dacă ţi-ar fi spus cineva că într-o bună zi vei ajunge mai mult şi mai departe decât ai visat vreodată, s-ar fi schimbat ceva la tine? Şi dacă într-o bună zi, una din acele zile la care nu ai multe aşteptări, vei simţi că eşti parte dintr-un vis frumos, şi că acest vis se cuibăreşte măreţ într-o poveste bună, neputând fi furat de niciun hoţ de cărţi, ai putea oare să te mai întorci la viaţa ta anterioară, s-o trăieşti ca şi când nu ai fi visat niciodată că faci parte dintr-o poveste?

Aşadar, cineva ţi-a destăinuit viitorul, revărsând peste sufletul tău speranţa de a da curs unei poveşti menită să te reconforteze, ajutându-te să-ţi recapeţi libertatea de a fi tu însuţi în continuarea unei poveşti care promite să fie mai ceva ca într-un vis. Şi oricine ar fi fost acel cineva, credibil sau nu, cu siguranţă a fost de ajuns ca să-ţi amintească că cel ce visează mai mult şi cât mai departe primeşte întotdeauna din timp o înştiinţare cu privire la un vis care promite totul la timpul viitor.

Şi iată că visul, împreună cu cineva care visează, a depins de altcineva căruia visul i-a făcut dinainte o idee despre tine, venind în întâmpinarea dorinţei inimii tale. Probabil că visul, cu o înfăţişare atât de plină de viaţă, îşi exprimă rostul final ca un simbol al răbdării şi al speranţei, jucându-se de-a v-ați ascunselea într-o poveste care aminteşte de un Creator, de o mână văzătoare, de un Hoţ de cărţi, de Cele trei porţi fermecate, de străvechea Morla sau de minunatul oraş de argint numit Amarganth.

Cum este oare să fii parte a unei poveşti care se scrie zi de zi alături de un vis în care simţi că eşti orice îţi doreşti să fii, şi că visul şi povestea, un element esențial al reveriei și un gen epic, sunt cheia pătrunderii într-un univers al Creatorului de infinit?

Poate că avea dreptate Alexandre Dumas, când spunea chiar la finalul unui roman celebru:

"Nu uitaţi niciodată că până în ziua când Dumnezeu va binevoi să-i destăinuiască omului viitorul, toată înţelepciunea omenească va fi cuprinsă în aceste două cuvinte: AŞTEAPTĂ ŞI NĂDĂJDUIEŞTE."

Leadership: Formatul creaţiei căreia i se supune viaţa ta poate fi văzut ca o aducere în prezent a mărturiei unei poveşti care se susţine prin privirea ta în altă lume?

La un moment dat, în călătoria ei prin ţara oglinzilor, Alice întâlneşte un ţânţar care o întreabă:

- Ce folos atunci, că insectele au nume, dacă nu vor să răspundă la acest nume?

- Nu-i de niciun folos pentru ele, zise Alice; dar bănuiesc că e de folos pentru cei ce le numesc. Altfel de ce-ar avea lucrurile nume?

Iată cum se scrie o poveste inspirată de un vis asociat cu starea mentală a unui visător prins

într-o lume a fanteziei, a secretelor, a misterelor magice. Tu, povestea mea, eşti visul meu cel împlinit, fiindcă ţi-am putut da un nume care face înconjurul realităţii în care m-am tot afundat, iar numele tău iată-l, acesta este: *Erelyndhus* , sau forţa cuvântului pur din spaţiul frumosului transcendent. Nicio poveste nu rezistă fără un vis plin de semnificaţii, la fel cum nicio oglindă nu poate să reflecte o gândire aparte, o imagine inversată, un alt chip decât tinereţea, fără lumina unei stele călăuzitoare.

Iar dincolo de ţara oglinzilor, în care Alice s-a tot adâncit, şade un tâlc de mare sugestivitate: tot ceea ce primeşte de la tine un nume se răsfrânge în mii de feţe, într-o optică geometrică, asemenea unei plăsmuiri dintr-o veritabilă împărăţie a oglinzilor fermecate. Considerând că o rază de lumină monocromatică se propagă prin intermediul materiei libere într-o altă realitate, iar refracţia s1 cade pe suprafaţa de separare a cerului de pământ, plană în punctul x1 aflat sub unghiul unei justificări supranaturale, atunci vom fi liberi să ne mişcăm într-o lume fantastică, dar care totodată este extrem de reală pentru că este lumea propriului nostru Sine.

Concluzie. Creaţia mea este visul unui artist care se desfăşoară sub forma unei holograme într-un spaţiu real definit ca imaginar. Iată, deci, de ce mă numesc un Creator: fiindcă peste tot pe unde îmi plimb ochii nu văd decât imaginile unei lumi extrem de complexe şi de vii, imagini reflectate simultan într-o oglindă care e una din căile veritabile spre Marea Cunoaştere – aş vedea până departe şi aş descoperi că, într-o existenţă anterioară, am fost altcineva care nu mă cunoaşte, dar care se comportă ca şi cum m-ar cunoaşte.

Înainte de a înţelege leadershipul, încearcă să trăieşti experienţa de neuitat a unui vis devenit realitate, cu ascensiunea spre eternitate a Creatorului, încât să nu mai ai nevoie de îndrumare spre "lumină".

Noi doi, visul şi povestea, facem parte dintr-o lume care nu se lasă inundată de contemporaneitate, şi care nu se dezvăluie oricui, ci numai celor cu adevărat merituoşi care ştiu să transmită emoţii, să împărtăşească din experienţa sinelui, asemenea efortului unui artist care face din pictură un mod de comunicare mai directă între sensibilitatea Creatorului şi realitate.

Niciodată nu m-am gândit c-aş putea face dintr-un vis grandios povestea vieţii mele, cu înclinaţie spre arta unui Creator Absolut care vede imaginea sa într-o formă sau alta, diferită de orice aşteptări omeneşti. Ci, tocmai visul s-a gândit la mine înainte de a mă transforma într-o poveste a cărui erou este nemuritor, la fel ca şi Cel ce scrie în Glasul Universal o nouă pagină a cărţii Sale.

Alice din ţara oglinzilor, încă mai încearcă să-şi reflecte destinul în completarea poveştii mele. Dragă, Alice, vei reuşi să pătrunzi în lumea mea, numai după ce vei regla oglinzile lumii tale să se vadă din poziţia unui meşter neîntrecut al avangardelor artistice…

Norii nemărginiţi ai posibilităţilor imaginate

On Iulie 04, 2013

Identifică elementul primordial în care setea de înţelegere a ceea ce eşti se îmbină perfect cu dimensiunea cunoaşterii superioare, pentru ca încrederea în evoluţia ta să fie deplină.

Încercam să pătrund într-un spaţiu în care timpul nu exista, asemenea unui călător aflat în continuă mişcare în căutarea unui loc al său. Şi nu mă mulţumeam doar cu atât. Căci omul dominat de imaginar, care persistă în a lua în considerare toate necunoscutele, vrând să pătrundă chintesenţa unei gândiri superioare, se adânceşte neistovit în viziunea lui fixă căutând cu orice preţ raza de lumină ce se strecoară prin smogul gros al inexplicabilului.

Stelele răsăreau una câte una, ca aurul dintr-un zăcământ neexploatat, dintr-un alt timp. Numărul lor conta prea puţin. Căci numai câteva grame din acest preţios corp strălucitor erau suficiente pentru a extrage chintesenţa unei materii sau substanţe de viaţă ce ar fi putut umple spaţiul de timp a reflecţiei mele, singurul ţel al căutării.

Dar combinarea elementelor vitale ce asigurau coeziunea materiei decurgeau greu. Deseori erau catalizate de unii ca fiind intermediari instabili şi foarte reactivi. Sensul şi nonsensul. Trebuia să atribui un sens acestei călătorii spre un alt timp, înainte ca nonsensul şi absurdul să-şi înfigă adânc rădăcinile contorsionate în mintea mea. Tocmai în asta consta măreţia mea !

Leadership: Poţi să te pui în ipostaza de a deveni un "ostatic" al necesităţii de a te întoarce spre cele din afara proprei realităţi, fără să devii serviabil în faţa materiei care te captivează prin capacitatea ei de a se autoorganiza în structuri din ce în ce mai complexe?

În principiu, era vorba de a exalta forţa vitală necesară depăşirii limitelor de înţelegere admise de intelect, utilizată rar numai de oameni cu o spiritualitate ridicată şi un mod de gândire superior. Stimularea acelei energii de a transforma fundamental spaţiul şi oamenii cu care intram în contact, de a o economisi şi de a o fixa în viitorul update al propriei mele existenţe, trebuia să-şi facă efectul pe termen lung dacă voiam să ating un nivel de cunoaştere superior.

Aveam nevoie de un instrument mai sigur, de o structură de forţe care să reducă orice suspiciune care plana asupra mea. Iar identificarea elementului primar, filosofic, în care setea de viaţă se îmbina perfect cu dimensiunea cunoaşterii superioare, găsirea acelei forţe de atracţie care să pună în mişcare universul şi timpul, devenea tot mai dificilă. O nouă conştiinţă trebuia descoperită. O altă dimensiune a vieţii şi a timpului în care aş fi avut, în sfârşit, puterea de a face lucrul pentru care am fost creat: să fiu un creator, demiurgul propriilor mele plăsmuiri.

Un reflex al plăcerii de-a imagina tot felul de chestii fantastice, creând mental tot felul de legături absconse între vizibil şi invizibil, între divizibil şi indivizibil, mă contaminase în întregime. Era evident că gândurile cele mai întortocheate puseseră stăpânire pe mine. Dar tocmai în asta consta măreţia mea, în faptul că am permis gândurilor să mă înalţe la norii frumoşi şi nemărginiţi ai posibilităţilor imaginate.

De atunci am învăţat să cred în evoluţia mea şi în viitor.

Leadership: Poţi să faci dintr-o condiţie a vieţii o experienţă de navigare într-un imaginar

abstract, fără extinzi şi să-ţi aprofundezi cunoştinţele între două sfere distincte: "stăpân" şi "prizonier"?

Gândurile cele mai întortocheate pun stăpânire pe tine? În ce constă măreţia ta? O nouă conştiinţă trebuia descoperită? Ai puterea de a face lucrul pentru care ai fost creat?

Leadershipul nu vizează numai sfera specifică a dezvoltării şi perfecţionării spre atingerea unei poziţii fruntaşe, ci şi studiul personal al interpretării pe care o dai oricărei experienţe pe care o trăieşti în momentul în care urci orgolios scările foarte lungi spre excelenţă. Căci, inevitabil, în acest moment începi să resimţi o presiune din partea cadrului tău de referinţă, adică a unităţii propriei fiinţe compusă din două ipostaze diferite.

Prima, a omului de ştiinţă, care trebuie să smulgă, prin simplificări favorabile, o logică riguroasă din anumite puncte de vedere sau dintr-un *template* de gândire sofisticat, sau dintr-un ciclu mult mai amplu şi mai complex de idei insuficient fundamentate. A doua, cea a creatorului, a omului dominat de imaginar, care încercând să pătrundă lucrurile ascunse, vrând să pătrundă chintesenţa unei gândiri superioare, se adânceşte neistovit în viziunea lui fixă până ce se îndepărtează de punctul său de referinţă.

Aşadar, putem spune că, într-un fel, leadershipul rezidă dintr-un experiment care reuneşte, în combinaţii atent construite, cele două ipostaze care nu trebuie să se respingă. De regulă, însă, cele două ipostaze se luptă, delimitând două dimensiuni distincte: "stăpân" şi "prizonier". Indicat ar fi ca acestea să se înglobeze într-o singură viziune clară, conferind caracteristicilor de bază ale individului o anumită autenticitate.

Este limpede că suprimarea relaţiilor între cele două dimensiuni, mai ales pierderea controlului asupra lor, în lipsa unei bune coordonări a procesului de alcătuire şi finisare a "creaţiei", va accelera treptat regresul în descoperirea de noi resurse care să faciliteze accesul spre cunoaşterea superioară.

Iar simplificarea şi armonizarea operaţiunilor de atingere a superiorităţii în leadership constituie cele mai sănătoase pregătiri în vederea limitării efectelor negative pe care le poate avea strânsa relaţie dintre cele două ipostaze.

Leadership: Poţi să-ţi dezvolţi o structură de forţe care să reducă orice suspiciune ce planează asupra ştiinţei tale, chiar dacă modul în care te raportezi la imaginea mentală de sine nu se ancorează la cerinţele realităţii?

Obţinerea superiorităţii în materie de ştiinţă reprezintă un proces destul de complex, în care extraordinarul se combină cu neînsemnatul, demascând şi denunţând astfel cu mare asprime viciile în materie de leadership, supraevaluarea sau subevaluarea. Iar schimbările care se petrec în materie de competenţă, când este testată valoarea creaţiei şi a creatorului, par uşor de acceptat dacă se experimentează sentimentul de a fi util propriei individualităţi.

Un autor şi conferenţiar american spunea odată: " *Ascultarea creează încredere, baza tuturor relaţiilor de durată.* " Dacă este să facem o corelaţie, aici este vorba şi de felul în care tu, liderul, te pui în slujba ştiinţei, fără să falsifici relaţiile dintre cele două ipostaze menţionate anterior.

Ca să obţii o superioritate în leadership, ai nevoie de o structură de forţe care să reducă orice suspiciune care planează asupra ştiinţei sale, precum: capacitatea de a prezenta construcții noi ale realității, capacitatea de a crede în ficţiunea pe care ţi-o asumi , capacitatea de a crea o legătură între ceea ce se întâmplă în exterior şi ceea ce se întâmpla

în interior, capacitatea de a schimba percepția publică, capacitatea de a gândi pe cont propriu pentru a descoperi lumea din jur.

Încrederea în evoluţia ta va fi deplină numai dacă reuşeşti să identifici elementul primordial în care setea de înţelegere a ceea ce eşti se îmbină perfect cu dimensiunea cunoaşterii superioare. Ce eşti? Un stăpân al ştiinţei? Sau un prizonier al ei?

Depinde de măreţia ta, depinde de cât de mult permiţi gândurilor să te înalţe la norii frumoşi şi nemărginiţi ai posibilităţilor imaginate. Şi, mai ales, depinde de capacitatea ta de a nu te lăsa stăpânit de ea.

Leadershipul este ceea ce adaugi experienţei tale de explorator al unor spaţii cu multiple posibilităţi de lărgire a orizonturilor, astfel încât să redai perfect începutul unei lumi noi din perspectiva cauzalităţii şi al adevărului care trebuie crezut pe cuvânt.

Norii nemărginiţi ai posibilităţilor imaginate se referă la posibilitatea de a pune în practică, cu rezultate benefice, tot ceea ce plăsmuieşte imaginaţia determinată de propria-ţi ştiinţă şi cunoaştere. Iar acest joc imaginar bazat pe reguli stricte îţi poate aduce laurii victoriei sau penalizări dureroase.

Now We Are Free

On Iunie 08, 2018

Învaţă să descoperi semnificaţiile vieţii în clarobscurul conştiinţei unde cuvântul îşi mărturiseşte ataşamentul faţă de firul original al unei poveşti adevărate, repetată la infinit.

Numele meu, pe care trecutul îl lasă în seama soarelui care e veşnic, eu Juba, sunt doar o rămăşiţă a gladiatorului care altădată îi delecta pe locuitorii Romei cu suferinţa sa, cu tăria de a lupta până la ultima picătură de sânge, cu umilinţa de a muri în numele multor paradisuri care urmează doar după infern. Fiecare parte din mine stă mărturie unei lucidităţi conştiente de actul săvârşit contra valorilor morale acceptate de lumina credinţei pure.

Asemenea mie, orice sclav are dreptul să-şi scrie istoria fără să ceară nicio răsplată generoasă din partea lui Dumnezeu, ca un soi de obligativitate faţă de încheierea unei anumite etape de viață și începutul unei noi căi de urmat într-o vreme în care îngerii nu mai zboară, pentru că acolo unde nu e rugăciune cerul se face ca piatra. Faptele pe care memoria timpului şi inima mea nu le va şterge niciodată se îndreaptă, cu bune şi cu rele, numai spre cei ce îmi sunt alături într-un *adagio of lingering sadness.*

Există o clipă în istoria lumii, o secundă astrală care se adaugă orei neîntrerupte pe care imaginaţia o scaldă numai în lucrările pictorilor, o micro-materie dintr-un univers fără nume care schimbă hotărârea şi acţiunile omului de rând. Sufletul unui gladiator, adâncindu-se într-o mirare fără seamă: "Ce oare caut eu aici?" pe un tărâm al celor ce nu pricep realitatea credinţei, ca într-o carte în care nu poţi citi decât așa, pe scurt, un rezumat, îşi cârmuieşte cu greu trupul spre victoria unei clase de vârf a societăţii.

Ceea ce reuşeşti să finalizezi în Colosseum nu-ţi este acceptat decât ca libertate de a spune DA, până la un punct.

Dacă aş fi fost un pic mai înţelept decât moartea, de care m-am lovit la fiecare pas, probabil aş fi ocolit condiţiile şi cauzele determinate de statutul meu şi aş fi încercat să forţez actul de voinţă liberă spre împlinirea poruncilor puterii divine. Chiar şi aşa, viaţa mea ar fi devenit insuportabilă, pentru că având de ales între eternitate şi efemeritate nu aş fi putut întrezări o lume a bravilor războinici şi a femeilor luptătoare ce-i însoţesc cu iubire până la capătul ei. Doar prezentul contează.

Leadership: Te înscrii în nişte evenimente care se doresc tot atâtea momente de reevaluare a unei poziţionări faţă de o viaţă ce poate fi descifrată prin dimensiunea zbuciumului sufletesc auzit doar prin credinţa în nemurire?

Cu puterea de rezistenţă pe care mi-o dat-o steaua norocoasă, am supravieţuit sublimului Quo Vadis din spatele unei poveşti sângeroase doar ca să scriu cu lacrimi în ochi aceste rânduri pline de tristeţe şi regret, pe care razele de foc ale soarelui, tangente la suprafaţa Pământului, le vopseşte în culoarea frunzelor pomului care freamătă liniştitor în briza unei mângâieri de vară. Păcat că norocul meu nu a fost de partea celui căruia îi datorez viaţa.

Cine va citi aceste rânduri le va pune, poate, în sânul unei inimi de leu care în acelaşi chip cu Maximus Decimus Meridius va sparge zidul de piatră al robiei şi va atinge el însuşi culmile unei notorietăţi niciodată câştigate de un împărat ca Lucius Commodus, pentru a renaşte o istorie a biruinţei prin luptă şi suferinţă.

Eu însumi îl invidiez pe Maximus pentru capacitatea lui de a cugeta, de a lupta, de a nu se da bătut, de a crede într-un singur ideal care îi conservă existența într-o continuă verificare a divinității, conferindu-i o superioritate care spune, de fapt: „Dacă eu aș fi împărat, nu m-aş purta niciodată așa cu sclavii".

Leadership: Încerci să scapi de înfrângerea propriei nelinişti sub actiunea unor forţe de răspuns la producerea unor evenimente asupra cărora numai timpul îşi lasă amprenta?

Sunt aplecat asupra trupului care a făcut din eroul unei tragedii o legendă a luptătorilor neînfricaţi, o piatră de temelie a edificiului pe care s-a zidit o istorie sângeroasă, o regândire a reprezentării unei realităţi care poate fi interpretată în diferite moduri. Nimic nu stă în faţa destinului de gladiator, chiar dacă ai repurtat victorii glorioase, decât moartea.

Muritorul şi-a reglat conturile cu viaţa. În timp ce mâinile şi picioarele i se zbat convulsiv, din gât auzindu-se un horcăit profund, ochii aproape pierzându-şi strălucirea, buzele sale încearcă cu o ultimă sforţare să contureze singurul cuvânt care, la urma urmelor, reprezintă cel mai mare triumf al vieţii: "FREEDOM".

Povestea lui Maximus Decimus Meridius dăinuie prin ecoul plin de sânge a unor aventuri inimaginabile desfăşurate într-un mare amfiteatru, numit Colosseum pentru că se afla în apropierea unei statui imense din bronz, Colosso.

Bănuiesc că pentru a stăpâni întreaga Romă, Maximus nu avea destulă abilitate, nu era un geniu al efectelor exceselor de inspiraţie, fiindcă a lovi scuturi şi a crăpa capete nu este de-ajuns într-o guvernare, mai e nevoie şi de un soi de răutate vecină cu nebunia care să îndrume masele spre o isterizare din cauze greşite. Satisfacţia lui pur spirituală venea din conştiinţa puterii pe care o avea asupra trupului său clădit special pentru a lupta.

Ca şi autor al acestor rânduri pline de adevăr, care fac elogiul devotamentului cel mai sublim, ridicat ca o piatră de hotar deasupra legilor unei lumi neînţelese, în virtutea raţiunii manifestată în universalitatea sa, nu regret nicio clipă moartea eroului care a creat legiuni întregi de fani ai unei realităţi care va bântui veşnic istoria.

Singura mea nemulţumire este că nu am avut destul timp la dispoziţie pentru a discuta mai mult cu el. Avea un fel aparte de a privi şi de a trata oamenii, lucrurile, evenimentele din imediata proximitate, ca şi când ar fi încercat să le stăpânească raţiunea în curgerea şi metamorfoza lor continuă.

Leadership: Te consumi într-o permanentă pendulare între putinţa de a-ţi rescrie povestea şi luciditatea extremă cu care îţi mărturiseşti neputinţa de a da un nou sens vieţii?

Cuvintele înălţate de istorie ca un frumos mausoleu, "My name is Gladiator", trec prin firele unui lanţ de amintiri care cheamă mereu intensitățile unui clarobscur sufletesc înscris în competiţia cu propriile limite, pentru a compune împreună cu deznodământul unui destin rebel un nou set de configurații existențiale. Ele vor fi mereu surprinse în imagini vii de către pictori şi scriitori, având impact prin experienţele autentice pe care le oferă.

Niciodată n-am să renunţ la omul care îşi demonstrează mereu ataşamentul. Dar e prea târziu ca să mai sper. Nu mi-a mai rămas decât să-l privesc pe Maximus cu nostalgie, aşa cum îl priveşte şi apusul, pe cât de frumos, pe atât de apăsător. Îi strâng mâna cu veneraţie şi respect chiar înainte ca el să închidă definitiv ochii. Simt alunecarea sufletului său în veşnicie, un mesaj venit din altă lume de tipul "Recepţionat" născând o speranţă a timpului care face din sclav un zeu nemuritor. Now you are free !

Bun prieten, am fost mereu alături de tine în Colosseum, în scurtele momente ale spectacolului dintre viaţă şi moarte, ca nişte diamante care îşi reflectă strălucirea până la cer, care după atâtea operaţii de şlefuire la temperaturi extreme ajung să fie prelucrate în mii de faţete de o înţelegere neclară a existenţei, dar care strălucesc mereu, radiază, şi sunt minunate oricât de ciobite ar fi.

Sunt sigur că vei reînvia în viitorul îndepărtat, sub un alt nume şi altă înfăţişare. Probabil vei fi reîntâlnit sub forma puterii unui alchimist care luptă alături de materie, ţinând în mâna dreaptă cartea universală a transmutaţiei, cu împletitură de un roșu sângeriu ca al mantiei gladiatorilor, iar în mâna stângă ţinând scutul conştiinţei libere, taina credinţei într-un cuget curat.

Ştiinţa zeilor este mută, dar ne lasă la dispoziţie puterea interpretării misterului vieţii. Singurul gând la care mai am acum puterea să reflectez, şi cu care închei această relatare, va rămâne înregistrat în memoria timpului ca un profil autentic al gladiatorului care îşi rescrie povestea:

Niciodată sufletul nu o să doară mai tare ca atunci când simți că nu ai fost de ajuns pentru a schimba o lume.

Now We Are Free este motto-ul celor care luptă pentru a-şi câştiga libertatea vieţii, plătind chiar cu preţul dureros al nemuririi. Pregăteşte-te la orice pas să întâmpini nişte evenimente la care nu te aşteptai, menite să-ţi schimbe destinul !

Nu este doborât încă ţarul Moscovei !

On Iulie 30, 2016

Fii acea parte a imensităţii şansei de a alege, fără ca circumstanţele să mai aleagă în locul tău.

Scena din film continuă. Basmanov soseşte cu vestea trădării prietenului lui Ivan, cneazul Kurbski. Călugărul citeşte mai departe psalmul regelui David. Altcineva îi şopteşte tarului despre întinderea trădărilor. Călugărul: „O cât apasă inima. Aşteptat-am milă. Dar în zadar. Mângâitori am căutat. Dar n-am aflat."

Şi atunci, deodată, Ivan şi-a ridicat capul. Şi ca o fiară sălbatică a strigat prin toată catedrala: „Minţi ! Nu este doborât încă ţarul Moscovei ! "

Acum ia hotărârea de a crea armata opricinicilor, de a pleca la Svoboda Alexandrovskaia. „Egumen de fier mă voi face." Se sfătuieşte cu cei ce i-au rămas credincioşi. Ia hotărârile ce-i vor călăuzi de aici înainte paşii. Se urcă din nou la sicriu. Priveşte trăsăturile îngheţate ale moartei. Şi i se pare că chipul ei s-a destins, că îl aprobă.

Cu mâna pe obrazul ţarinei moarte, Ivan îşi face marele legământ: *„Lucruri măreţe voi săvârşi: atotstăpânitor pământesc mă voi face ! Două Rome au căzut, cea de a treia – Moscova ! - stă pe loc. Iar a patra Romă nu va fi ! "* *

Leadership: Poți să trăiești sub condiţia ta reală, într-o versiune a realităţii care nu te validează drept posesor al unui destin de excepție?

Într-o lume în care sensul adevărat al valorii umane se pierde printr-o întorsătură a lucrurilor trăite, printr-o fatalitate a tot ce se întâmplă, unde numai experienţa personală este cea mai bună lecţie de viață, un aspirant la putere poate fi semnificat real sau simbolic, prin situația de a se aşeza în situația existenţială a întâlnirii dintre două categorii de circumstanţe.

Mai întâi acele circumstanțe de hazard când el însuşi este un rătăcit prin ceaţă, mişcându-se fără rost şi fără încetare, dar care trage în mod neaşteptat şi lumea după el. Apoi, acele circumstanțe de necesitate, reprezentând modalitatea de manifestare a unor stări sau tendinţe de dominare, prin forţa potenţialului de a se impune, când el devine "schimbarea" datorită faptului că rămâne fidel principiilor sale de afirmare.

Ne referim la şansă ca la o modalitate de a şti să alegi între circumstanţele favorizante ale unei situaţii şi slăbiciunea ta lăuntrică, iar ţarul Moscovei a înţeles că ceea ce apare la orizontul destinului său într-un anumit moment de cotitură trebuie luat ca un semn de recunoaştere al meritelor personale, înainte ca această şansă să dispară.

Leadershipul este acea parte a imensității oportunității de a alege, fără a lăsa circumstanțele să aleagă în locul tău. O șansă pe care foarte puțini o înțeleg, pentru că în fiecare destin ea apare la un moment dat, dar poate dispărea dacă nu ești demn de ea.

Iar așa cum scria cineva pe un blog de astrologie, trebuie menţinut un echilibru între cele două aspecte: acceptarea destinului şi eforturile de a influenţa circumstanţele.

Leadership: Poţi atinge experienţa nemijlocită a unor lucruri fără a şti în acelaşi timp măcar un adevăr despre ele, doar considerându-le drept o cerinţă sine qua non pentru atingerea măreţiei?

Posesorul unui destin de excepție știe că trebuie să parcurgă un drum lung care duce la restaurarea fiinţei sale, prin experiențe ierarhizate într-un lanț ascensional. De aceea el face o preocupare constantă din acest drum, care pe fondul unor răsturnări de situație să nu se circumscrie unei realităţi absurd contrariante, ci doar acelor experiențe repetate de a se aşeza pe poziţia unui biruitor.

Iar un biruitor care îşi apără cu stoicism drepturile se orientează întotdeauna după sloganul: „ *Lucruri măreţe voi săvârşi: atotstăpânitor pământesc mă voi face ! "* Aceste lucruri, în orice imagine despre sine însuşi, în orice circumstanţă, fac înconjurul unei gândiri exprimate printr-un fel de necesitate de a reflecta asupra posibilelor legături cu un erou al cărui super-putere constă în capacitatea de a demonstra că posedă acea ştiinţă de a alege neghina din grâu. Un asemenea erou este în stare să trăiască un moment important cu o mare combustie interioară, dar deloc exteriorizată.

A trăi sub condiţia ta reală, dar într-o versiune a realităţii care nu te validează drept posesor al unui destin de excepție, înseamnă să continui să înaintezi pe drumul vieții beneficiind de puterea efectivă a unor idealuri înalte, fără să te conformezi lor în fiecare din acțiunile tale.

Atingerea măreţiei este considerentul unei mari reprezentativităţi pe scena unei istorii care trebuie definită printr-o realitate trecută, prezentă şi viitoare, încât eroul principal să fie considerat cel mai înalt şi neţărmuit adevăr despre faptele şi rănile istoriei.

Nu este doborât încă ţarul Moscovei ! este rodul acelor manifestări personale, născute din focul lăuntric, care redau pe marea imagine a destinului figura unei personalităţi marcante formată prin lupta continuă cu forțele ostile, în special cu fenomenul de regres: fii comun ca ceilalți.

*** Notă:** Ion Barna - *Eisenstein* , Editura Tineretului, 1966.

Nu este îngăduit să atingi spiritele

On Februarie 25, 2017

Înainte de a-ţi crea o concepţie originală despre artă, învaţă să te percepi drept o forță între alte forțe.

Vor trece multe zile înainte să devin ceva asemănător cu persoana care fusesem odinioară. Intensitatea câmpului existenţial produs între punctul de cotitură care a condus la situaţia actuală, şi punctul de ieşire din lumea plină de aparenţe pe care era înfăşurată aţa necesară cusăturii unei aprige cotituri de destin, producându-se în ritm viu, încordat, devenise o senzaţie de tărie, o apăsare puternică. Ceva care nu se poate descrie în cuvinte. Dar care a dezvoltat dependenţa de sentimentul apartenenței la ceva mai mare, mai puternic.

Alături de mine, portretul lui Nicolas Flamel, pe al cărui chip expresiv se poate citi acea energie de foc condensată într-un criteriu de raportare la o lege esoterică: *"Nu crede nimic ! Caută singur adevărul ! "* , îmi transmite o stare ciudată de exaltare, amestecată cu regret. Uneori, sunt trist datorită secretului puterii prin care intelectul de vede pe sine, dobândit prin luarea în considerare a valorii indirecte a unei legi universale: "Ceea ce este Sus este ca şi ceea ce este Jos, şi ceea ce este Jos este ca şi ceea ce este Sus".

Intens, mă simt încadrat într-un ansamblu de fluxuri neutrinice, numere cuantice şi unde ale fotonilor gamma expulzate în spaţiul înconjurător, în lumina unei stranii inteligenţe invizibile, ca şi când între mine şi marele alchimist s-ar fi fixat pentru eternitate o probă indiscutabilă a materializării spiritelor.

Fără să fiu om de ştiinţă, mă simt prins în ansamblu unor manifestări aparent eterogene, cu binecuvântarea unor anumite spirite de înaltă evoluţie, mai ceva ca într-un fenomen poltergeist, completându-mi gândurile doar cu ideea intervenţiei unei inteligenţe aparte într-un joc de energii la care nimeni nu are mai mult acces ca mine. Proba eternităţii lor este însăşi natura realităţii mele, guvernată de legea fatală: totul se transformă, totul curge, nimic nu este încremenit, static.

Leadership: Percepţia asupra realităţii tale poate suferi o schimbare care se vădeşte a fi incomunicabilă la nivel de imagine, dar comunicabilă la nivel de transmitere a senzaţiei de permanenţă a existenţei pe care o trăieşti la nivelul unei conştiinţe transcendentale pure?

Acest *bizarre* fenomen al perceperii spectrului unui semnal discret, al unui iluminism pozitiv cu dorinţa mărturisită a totalităţii, centrat pe dobândirea cunoaşterii avansate şi pe înţelegerea unei realităţi virtuale, este trecut în cadrul imediatităţii prin tăișul sabiei lui Nietzsche: *"Când priveşti în Adânc, şi Adâncul priveşte în tine."*

Rasputin, misticul rus, se folosea mult de privire, care îi impresiona pe interlocutorii săi până la a-i paraliza. Era efectul *Hypnotize* prin interpretarea unei enigme. Aşa este şi cu figura din tabloul meu, îmi răpeşte orice şansă, orice putere de a vedea cu adevărat farul cosmic al lui *"Chi sono veramente?"* decât prin efectul unei gravitaţii care depăşeşte forţele electrostatice ale unui câmp de reacție: "Marile secrete nu ţin de lumea noastră ! ".

Fără să-mi doresc să fiu o forţă între alte forţe, astfel ca din exterior să nu se poată sesiza existenţa vreunei întâmplări supranaturale, vreunei cauze de inadmisibilitate, pe fondul căutării febrile a semnelor unei vieţi de dincolo, care este doar privilegiul unui medium, mă simt reţinut într-un câmp gravitaţional care devine suficient de puternic pentru a modifica

natura intrinsecă a funcţiei mele prezente: de mesager al unei lumi trecute.

A-mi trăi existenţa la nivelul unei conştiinţe transcedentale pure, în sfera gândurilor curate şi puternice, înseamnă să-mi revigorez spiritul aventurier într-o unică manifestare istorică trup-suflet, capabilă de cunoaştere, de acea libertate la care oamenii din prezent pot doar să viseze.

Leadership: Te orientezi în plăsmuirea operei tale după un factor al percepţiei reprezentând dispoziţia subiectivă cu care se receptează semnificaţia unei viziuni de dincolo de real?

Victor Hugo ajunsese să vorbească de la egal la egal cu profeţi precum Moise, Mahomed sau Iisus. I se părea foarte firesc să fie ales de cei mai însemnaţi morţi ai omenirii pentru a purta cu ei nobile discuţii, încât să dea la iveală opere de o rară inspiraţie universală. La fel ca şi Victor Hugo, am învăţat că a interacţiona cu spiritele înaintaşilor de seamă ai ştiinţei şi culturii, câştigând astfel o înclinaţie spre misticism, la fel ca orice acţiune care lasă o urmă în timp, înseamnă de fapt să pun bazele unei filosofii a transcendenţei care ar fi în acelaşi timp o poetică a existenţei şi a cunoaşterii pure, o poetică a imaginarului care n- ar trebui să cunoască alt mod de exprimare decât limbajul simbolic.

Esenţa unei dezvoltări bazate pe resursele unei realităţi revelatoare se obţine prin interpretarea unei enigme de genul găsirii diferenţei între două imagini aproape identice: imaginea lumii din perspectiva unui om care există doar prin comparația cu "ceva" necunoscut. Şi imaginea lumii din perspectiva unui conţinut al comunicării cu ceva foarte adânc, vast, aflat în afara ta dar care este legat de o existență anterioară.

Înainte de a-ţi crea o concepţie originală despre artă, învaţă să te percepi drept o forță între alte forțe, drept o evoluție între două asemenea imagini. Arta este însuşirea omului de ştiinţă de a se vedea mai presus de vedere, gradul realităţii şi al valorii sale depinzând de oglindirea reflexivă a sufletului său în altcineva.

Leadership: Poţi să împărtăşeşti din experienţa ghidului tău spiritual în cadrul unui efort de transcendere, fiind în primul rând o comuniune la nivel de suflet cu realitatea unei lumi care nu îşi poate demonstra existenţa?

Care este privilegiul minţilor cele mai luminate? Ele își concentrează întreaga esenţă a capitalului intelectual în acelaşi mesaj, provenit din străpunsul meditaţiilor care permite suprapunerea celor două imagini, care determină fenomenul particular: „Marile secrete nu ţin de lumea noastră ! "

O operă de artă există doar prin sensul care îl impregnează pictorul imaginii sale, prin raportarea la un întreg constituit prin însumarea unor trăsături desprinse din analiza unei experiențe ce corespunde apartenenței la o inteligenţă mai subtilă şi cu o concepţie mai generoasă asupra lumii, asupra vieții și asupra naturii omeneşti.

Un asemenea artist se orientează în plăsmuirea operei sale după un factor al percepţiei şi cunoaşterii superioare, reprezentând dispoziţia subiectivă cu care se receptează semnificaţia unei viziuni de dincolo de real.

El descoperă ideea în fapt, semnificaţia generală a unei imagini în fenomenul particular al unei potriviri între o existență anterioară și consecinţa unei existenţe maturizată prin dezvoltarea trăsăturilor unei anumite specificităţi: „Nu crede nimic ! Caută singur adevărul ! "

Privilegiul unei minţi luminate este adevărul pe care îl afli despre tine în modul de reprezentare a realităţii într-un plan mai înalt, adică într-un plan al existenţei complet diferit.

Nu este îngăduit să atingi spiritele, dar întotdeauna poți purta cu ele nobile discuții dacă ai puterea să iei în considerare fenomenul particular al unei prezenţe simţită la nivel de emoţie pe care s-o utilizezi ca material de rară inspiraţie pentru realizarea unei opere de artă.

Nu-i uşor să ajungi lider pe piaţă

On Aprilie 10, 2009

Scopul unei companii nu trebuie să fie acela de a supravieţui, ci de a învinge într-o zonă care se ridică la înălţimea statutului de oportunitate pe care-l reprezintă un anumit Start-Up.

A-ţi întemeia o companie şi a pătrunde pe o piaţă aflată în continuă dezvoltare este, din anumite puncte de vedere, asemănătoare cu intrarea într-o bătălie. Dacă vrei să-ţi înfiinţezi o companie doar ca să supravieţuieşti, ca să-ţi asiguri un trai decent, cu siguranţă vei pierde în faţa celor care pornesc încă de la început cu gândul că vor fi victorioşi, că vor reuşi să se impună pe piaţă cu performanţe vizibil mai mari faţă de orice competitor. În acest caz tu vei face doar ceea ce este necesar pentru a pluti pe apă în timp ce competitorii, mult mai hotărâţi, vor face totul ca să te înece.

Ceea ce vreau să spun este că dacă te hotărăşti să-ţi întemeiezi şi să conduci o companie trebuie să pui osul la treabă serios. Trebuie să te pregăteşti din timp pentru o mutare rapidă şi eficientă. Nu este de-ajuns să crezi cu toată fiinţa că vei ajunge în fruntea clasamentului, trebuie să te implici cu tot curajul şi puterea ta. Stabileşte-ţi o strategie care să cuprindă obiective realiste şi care să-ţi permită o dezvoltare pe termen lung. Dincolo de toate acestea este imperios necesar să fiţi ambiţios, perseverent si tenace.

Leadership: Poţi susține apăsat și hotărât un punct de vedere opus celui dominant pe piaţa de produse, încadrându-te într-o zonă care nu are nevoie de nicio prezentare pentru a putea fi folosită pentru exploatare comercială de un marketing vizual?

În cartea "Cele 75 dintre cele mai bune decizii manageriale", jurnalistul englez Stuart Crainer preciza:

"La fel ca cele mai bune firme de calculatoare, Apple şi-a început viaţa într-un garaj. În 1977, Steve Jobs a conceput Apple 1, considerat de mulţi ca fiind primul calculator personal. Jobs şi strălucitul său partener tehnic, Steve Wozniak au construit primul calculator în acel garaj.

Însă decizia firmei Apple de a obţine trofeul pentru producerea primului calculator personal accesibil a creat o industrie. Varianta Apple 1 a condus la varianta Apple 2, apoi la varianta VisiCalc şi, în final, a fost lansat pe piaţa în 1984 computerul Mac. De asemenea, decizia firmei Apple a aruncat un văl acoperitor asupra deciziei firmei Xerox de a nu continua dezvoltarea calculatoarelor, după ce echipa ei care lucrase la calculatorul PARC realizase un progres vital."

A-ţi dori să ajungi primul mai ales pe o piaţă extrem de dinamică care atrage an de an tot mai mulţi jucători, este o motivaţie destul de puternică care te va face să lucrezi mai repede şi mai bine. Însă pentru a-ţi asigura succesul trebuie să ţii cont de anumite lucruri. În primul rând nu îţi poţi permite să intri pe o piaţă unde concurenţa este acerbă fără să oferi servicii de calitate. De aceea este esenţial să-ţi măreşti valoarea serviciilor în domeniul tău, astfel încât să câştigi un avantaj în raport cu concurenţa. Pe de altă parte trebuie să observi tendinţele clienţilor, să ştii să le exploatezi astfel încât să oferi ceva cât mai nou şi cât mai bun.

Un marketing vizual care are scopul de a susţine un model de business repetabil și scalabil se distinge atât prin accesibilitatea cu care îşi face cunoscut produsul, cât şi prin modul în care doreşte ca publicul ţintă să perceapă identitatea companiei/mărcii. Acest gen de

marketing se conduce după motto-ul: "O ocazie ratată este o taxă în plus la Fisc şi un punct în minus la capitolul onestitate".

În marketing, accesibilitatea cu care îţi obişnuieşti consumatorii seamănă cu vârful unei umbrele care nu poate fi "escaladat" decât prin folosirea unor indicatori precum: posibilitatea de a se transforma într-o armă, sau posibilitatea de a fi folosit ca un concept de orientare spre servicii personalizate.

Concluzie: Dacă vrei să ajungi lider pe o piaţă în care concurenţii accelerează ritmul de expansiune, trebuie să faci din reuşită scopul tău principal. Într-o altă ordine de idei, asta înseamnă să-ţi faci bine temele înainte de a te avânta în afaceri, să ştii pe ce drum să o iei, să acţionezi cu o intensitate mare în direcţia aleasă şi să eviţi pe cât posibil situaţiile riscante.

Dacă vrei să ajungi în vârf aleargă mai repede decât ceilalţi concurenţi şi nu te oprii niciodată.

Nu încerca să fugi de tine

On Mai 20, 2016

Afirmă-ţi fidelitatea faţă de exigenţele unei gândiri autonome, rămânând devotat valorilor comunicării cu tine însuţi la un nivel mai înalt.

Exista în mine un soi de curiozitate dezagreabilă, ca un vârf de săgeată otrăvit, transformându-se tot mai mult în suferinţă. O cădere perpetuă într-o stare de conectare la un soi de ştiinţă ocultă, referitor la o putere omniprezentă cu care aveam o legătură specială, pe care încercam s-o manevrez, s-o depăşesc cu puterea acelui suflu inspiraţie al pictorului înzestrat cu darul de a reda lumea în nemărginirea ei.

Într-un fel, îmi examinam existenţa prin manifestarea unor întrebări pe care mi le puneam adesea: Ce pot cunoaşte despre ceva îndepărtat? Prin lentila cărei puteri superioare de înţelegere aş fi putut găsi punctul de convergenţă cu această stranie materie? Prin intensitatea cărui câmp de valori aş fi putut explica, ca pe un indiciu al găsirii unor noi legi de evoluţie, ieşirea din decorul spaţiului meu interior?

Dar aşteptarea unor răspunsuri nu întâlnea nimic la capătul ei.

Pentru că dorinţa de a afla adevărul era mobilul gândirii mele şi al tuturor faptelor care o precedau, cu ea trebuia să pornesc în marea căutare, de la acest punct de vedere, încercând să-mi dau seama dacă depindeam de valorile ce există independent de cineva sau ceva, de vreo forţă mai presus de mine. Dar, în primul rând, ca orice om devotat unei gândiri ştiinţifice, trebuia să rămân devotat valorilor unei comunicări cu mine însumi.

Leadership: Te ataşezi unei continue provocări la luptă împotriva unei forţe mai presus de tine, pe care o suporţi având tu însuţi o criză de autoritate?

Lupta pe care o duceam era parcă împotriva unui reducţionism al complexităţii conţinutului ontologic şi a unei naraţiuni unilaterale pierdută în contemplarea aceleiaşi realităţi. Oare devenisem obiectul stimulării descoperirii de sine, sau o mărturie a facultăţii de a fi determinabil în altcineva sau ceva? Tocmai de aceea îndrăznesc să-mi dau deseori un sfat, uimind poate pe cei ce mă înţeleg, care mă va scuti de o nesuferită refugiere într-o situaţie regresivă, de care-mi este silă. Iată-l:

Fii întotdeauna atent la ceea ce te înrobeşte prin dependenţă şi-ţi porunceşte să trăieşti cu nevoia de a te compara prin enigma ce o reprezintă !

Atinsesem astfel coarda invizibilă a neputinţei de a înţelege ceea ce se săvârşeşte prin intermediul raţiunii care nu există decât pentru a explica o consecinţă finală, din perspectiva închiderii în mine. Intens, simţeam suferinţa prin care trecea eroina romanului lui John Fowles, claustrată într-o încăpere îngustă de un colecţionar de fluturi.

"Îmi este inferior din absolut toate punctele de vedere. Singura lui superioritate constă în puterea de a mă ţine aici. Altă putere nu are. Nu poate nici să se poarte, nici să vorbească, nici să facă orice altceva mai bine decât mine - nici pe departe - aşa că va continua să rămână Bătrânul Mării până când, cumva, am să reuşesc să scap de el."

Curiozitatea este o parte a neputinţei de a-ți da seama cine ești, care se instalează atunci

când încerci să te ataşezi unei continue provocări la luptă împotriva unei forţe mai presus de tine, pe care o suporţi având tu însuţi o criză de autoritate. De fapt, o asemenea criză se instalează atunci când cineva sau ceva încearcă să pună stăpânire pe viaţa ta, iar Egoul nu suportă înfrângerea de a fi trecut într-o stare de inutilitate, deci atunci când gândirea ta nu are acces la adevărurile unei lumi pe care crezi că o cunoşti.

Leadership: Te afli în prezenţa unui "Ego" care însetat de propria importanţă şi-a îmbogăţit memoria cu un vast material informaţional cules de pe urma unei gândiri care se străduieşte să dezvăluie totul a priori?

Întreabă-l pe Dumnezeu cine este El, iar semnul întrebării se va întoarce ca un bumerang spre tine: Cine eşti tu? Vei reuşi să scapi de El, doar atunci când vei reuşi să fugi de tine.

Iată menirea unui om care experimentează „ *I'll find myself in the endless oceans of my mind* ”: să clarifice acea neclaritate dintre ceea ce există în realitate și ceea ce nu există, dar pune în ordine existenţa lui.

Această neclaritate confirmă interesul tău pentru câştigarea unei anumite autorităţi asupra propriei fiinţe din punct de vedere al suportului pe care îl oferă adevărul suprem: în momentul în care te compari cu ceva sau cineva aflat deasupra înţelegerii tale, de care ajungi să depinzi, începi să te ridici deasupra nivelului tău de referinţă.

O gândire care se străduieşte să dezvăluie totul a priori este o variantă de acceptare a unei succesiuni de gânduri, emoţii, senzaţii şi credinţe, în scopul producerii unei revelaţii care să schimbe perspectiva despre lumea din jur.

Nu încerca să fugi de tine este îndemnul îl aud din ce în ce mai des rostit de către oamenii cu calităţi de lider.

Leadershipul este o ştiinţă care are nevoie de atestările unui adevăr suprem care te întregeşte, pentru a se putea dezvolta prin prisma actului de a te apropia de ceea ce nu cunoşti.

Pentru a face din leadership un ansamblu de cunoaştere care să includă ca piesa dominantă o raţiune bazată pe experienţa abordării dependenţei de o forță mai presus de tine, în căutarea asiduă a unui adevăr pe care-l simţi, dar nu-l poţi exprima, trebuie să fructifici avantajul de a fi prizonierul unui moment de răscruce. Atunci când simți nevoia unei comparaţii care să dea naștere unui ego mai puternic, o identitate creată la care nu mai vrei să renunţi.

Nu oricine poate fi lider

On Martie 05, 2009

Fii dispus să-ţi explorezi adevăratul potenţial, dezvoltându-ţi capacitatea de a-ţi asuma riscuri în încercarea de a imprima celorlalţi spiritul tău plin de forţă şi de măreţie.

Cu multă vreme în urmă, comandantul unui batalion de militari care primise misiunea să apere partea de nord a unui oraş din Spania s-a văzut pus într-o situaţie disperată atunci când, brusc, armata sa a fost atacată de inamicul mult mai numeros. Observând îndârjirea cu care soldaţii inamici se năpusteau asupra lor, comandantul a încălecat şi, fără să spună nimănui nimic a fugit, lăsându-i pe oştenii săi să se descurce cum or putea în faţa inamicului.

Oştenii au observat imediat lipsa comandantului lor şi n-au avut de ales, au fost nevoiţi să-şi aleagă un înlocuitor, adică un alt comandant. În final, chiar dacă au fost mai puţini ca număr, au câştigat bătălia datorita noului lor comandant.

Leadership: Îţi poţi atribui o însuşire care să te reprezinte într-un mod definitoriu, fără să-ţi recunoşti vulnerabilitatea în cazul unei situaţii extreme care constituie partea demonstrativă a unei ştiinţe fără partea de experimente?

Uneori leadershipul este ca o minge: alergăm după o poziţie înaltă, şi chiar arunci când o prindem îi dăm cu piciorul, fiindcă nu suntem capabil s-o controlăm. În leadership, ca şi in fotbal, unii lideri, odată ce intră în posesia „mingii", ori o pierd imediat, ori o pasează altora de frică să n-o piardă, ori şutează – şi doar foarte puţini înscriu.

Aşa cum în fotbal, elementul esenţial îl constituie înscrierea golului, care, prin stabilirea diferenţelor de scor, dă un învingător şi un învins - tot astfel elementul esenţial al talentului tău de a conduce îl constituie, pe termen lung, abilitatea ta de a recunoaşte schimbarea şi atitudinea în faţa ei.

Tu când şi cum îţi valorifici propriul potenţial de lider? În momentele cele mai dificile, prin transformarea atitudinii şi gândirii tale – dintr-un posibil învins, într-un învingător sigur de victoria sa?

Leadership: Îţi poţi pune în valoare personalitatea prin asigurarea legăturii dintre imaginea pe care o asociezi cu ideea de conflict şi limitele împlinirii individuale asociate cu o imagine de sine ce corespunde unor reacţii neaşteptate?

Odată ce ai fost propulsat într-o funcţie înaltă de conducere trebuie să îţi iei imediat rolul în primire, să îţi onorezi noile tale responsabilităţi şi să iei măsuri dacă este nevoie pentru a remedia eventualele probleme, în caz contrar rişti să fii înlocuit. Nepăsarea şi lipsa de responsabilitate sunt cele două boli grave de care trebuie să te fereşti cât timp te afli la conducere. Dacă nu cauţi în permanenţă modalităţi de a inspira încredere celor aflaţi în subordinea ta, dacă nu eşti alături de ei atunci când au mai multă nevoie de tine, dacă nu-i încurajezi, dacă nu-i motivezi şi nu-i îndrumi către o direcţie favorabilă lor, nu vei atrage decât ura, mânia şi dispreţul lor.

Spiritul conducătorului le dă şi celorlalţi putere. Un conducător talentat are capacitatea de a-i antrena pe oameni în direcţia în care crede el de cuviinţă, spre atingerea unui scop comun. Pentru a-i mişca pe oameni trebuie mai întâi să-i câştigi de partea ta, să le demonstrezi că fără ajutorul tău nu vor reuşi să se descurce în situaţii dificile.

Nu vei putea câştiga niciodată respectul, admiraţia şi fidelitatea celorlalţi dacă nu eşti capabil să-ţi asumi toată responsabilitatea pentru remedierea problemelor cu care aceştia se confruntă şi dacă nu iei măsurile care se cuvin pentru limitarea acestora pe viitor. Nu poţi să ai pretenţia ca oamenii să-şi facă treaba şi să-şi atingă obiectivele de performanţă dacă nu-ţi îndeplineşti obligaţiile. Iar cea mai importantă obligaţie pe care trebuie să ţi-o asumi, ca lider, este să cultivi încrederea şi dorinţa de a se autodepăşi.

Leadership: Eşti în stare să-ţi pui în evidenţă gradul de asociere dintre procentul de creştere al vizibilităţii şi gradul de noutate al deznodământului care te face să fii tu însuţi într-un mod cât mai profund?

Când un conducător nu este serios şi nu se implică în mod direct în rezolvarea problemelor, automat el este schimbat din funcţie, şi un altul este promovat. A conduce un grup de oameni nu este o joacă, este mai degrabă o povară, o datorie foarte mare pe care trebuie să ţi-o asumi. Este o datorie morală şi profesională pe care trebuie s-o respecţi şi s-o duci la îndeplinire. Este datoria ta să te preocupi de viitorul oamenilor, de pregătirea şi motivarea lor, îndrumându-i în direcţia potrivită. Pe de altă parte, dacă devii delăsător şi fugi de noile tale responsabilităţi, vei fi catalogat drept "necorespunzător".

Vai de conducătorul lipsit de curaj, de voinţă şi ambiţie, care nu se implică cu toată responsabilitatea în problemele şi greutăţile cu care se confruntă cei pe care îi conduce. Unui astfel de om nu-i este dat să rămână prea mult timp în funcţia pe care o are. Puterea nu este deţinută decât de liderii puternici, care ies în faţă în situaţiile dificile şi ştiu să tragă oamenii după ei.

Măreţia unui om se măsoară prin atitudinea sa şi prin faptele sale. Aşadar, fii dispus să-ţi explorezi adevăratul tău potenţial, dezvoltându-ţi capacitatea de a-ţi asuma riscuri în încercarea de a imprima celorlalţi spiritul tău plin de forţă şi de măreţie.

Gradul de noutate al deznodământului care te face să fii tu însuţi într-un mod cât mai profund este dat de relaţia care se stabileşte între perspectiva modului în care îţi gestionezi experienţa într-un moment culminant şi viziunea din care se inspiră eforturile oamenilor de a atenua efectele schimbărilor majore care tind să se producă.

Nu pot spune o minciună

On Ianuarie 18, 2015

Ridică-te la înălţimea măreţiei tale, găsind adevărul suprem din tine însuţi.

O minciună nu poate fi niciodată anulată. Nici măcar adevărul nu este de ajuns. Eu sunt părinte şi ştiu lucrurile acestea. Adu-ţi aminte ce s-a întâmplat cu părintele ţării noastre. A tăiat cireşul şi apoi i-a spus tatălui său: „Nu pot spune o minciună." Puţin mai târziu, a aruncat moneda spre celălalt mal al râului.

Aceste două istorioare reprezintă nişte evenimente cruciale din istoria americană. George Washington a tăiat copacul, iar apoi a aruncat moneda. Înţelegi? El ne spunea încă de pe atunci un adevăr esenţial. Şi anume că banii nu cresc în copaci. Asta a făcut ca ţara noastră să fie aşa de măreaţă, Peter. Acum chipul lui George Washington se află pe fiecare bancnotă de un dolar. *****

Leadership: Poţi să descoperi măreţia fiinţei tale, trăind în lumina reflecţiilor asupra formării tale ca sursă de orientare spre imperativul "adu-ţi aminte ! ", sau ca sursă de distorsiune a alegerilor și împrejurărilor care îţi condiţionează viaţa?

Una dintre experienţele comune liderilor, o experienţă născută din încercările şi provocările întâmpinate, dar mai ales prin căutarea şi însuşirea treptată a învăţăturilor, ideilor, adevărurilor extrase din cunoştinţele dobândite şi din fiecare aspect al relaţionărilor sociale, este experienţa lui „Eu sunt". La rândul ei, este urmată de experienţa relevantă privind evenimentele ulterioare bilanţului vieţii, ştiind că în anumite momente nu există tunel, nici lumină strălucitoare, ci doar o singură variabilă: "Adu-ţi aminte ! " Mai mult, să nu uităm că lumina conştiinţei noastre, a Sinelui, este precum lumina laserului ce dă viaţă unei imaginii: nu afectează vederea, dar poate schimba rezoluţia sau fundalul reprezentării obiective a faptelor şi fenomenelor zilnice, fără a marca interdependenţa dintre ele.

Ceea ce devii este rezultatul unei rememorări sociale care judecă prin adevăr faptele pe care le-ai săvârşit şi evenimentele pe care le-ai pus în mişcare în favoarea scrierii lor în istorie. Iar acest "Eu sunt", mai presus de semnificaţia esenţială a realităţii în care te formezi, într-un replay continuu ce reflectă în mod adecvat uscurşurile şi coborâşurile pe care doar cu ochii sufletului le simţi, le vezi, le înţelegi, este pus în valoare prin intermediul adevărului din care se ravarsă mândria de a face parte dintr-un plan mai mare.

Procesul de formare este un scenariu aprobat la cel mai înalt nivel de trecerea ta spre o nouă abordare a relaţiei dintre "adu-ţi aminte" şi idealurile pe care le împlineşti sub forma interactivă a evenimentelor pe care ai dorit se se deruleze altfel. Nu uita că prin lucrurile pe care le împlineşti în viaţă, faci o investiţie eternă, nu una temporară !

Este posibil ca toţi aceşti promulgatori ai evoluţiei în zona socio-profesională, să fi conştientizat sensul real al propriei lor autenticităţi şi să se împotrivească opacităţii celorlalţi, resimţind o enormă diferenţă. Aceasta reprezintă o imagine de sine cu un enorm impact asupra lumii, dar în acelaşi timp imaginea unei realităţi complexe care ia conturul unei individualităţi pentru care diferenţa este mai importantă decât asemănarea.

Leadership: Înţelegi cauzalitatea care îţi condiţionează evoluţia, astfel încât să scrii o epopee legendară în cursul căreia soarta lumii se va juca în jurul unui om investit cu puterea de a înrâuri cursul istoriei?

Manifestarea lui "Eu sunt" este una din acele bijuterii care trece testul timpului sub forma validării unei singure opţiuni: niciodată să nu-ţi accentueze valoarea mai mult decât ai fost în stare să duci la împlinire. Iar ceea ce trece testul experienţei de a face din simple lecţii de viaţă noi orizonturi de formare şi dezvoltare, punând în prim plan rememorarea unor momente care te-au făcut să simți că vei câștiga un Jackpot istoric, este construită pe premiza că "nimeni nu este lăsat în urmă". Oare orientarea ta spre direcţia schimbării se bazează pe premiza că ai capacitatea de a face experienţelor dificile?

Aici leadershipul vizează raportul esenţial între ceea ce faci şi ceea ce eşti în câmpul de rememorare al angajamentului peren faţă de toţi cei care, de-a lungul generaţiilor, au schimbat ceva în cursul evenimentelor lumii. Leadershipul conţine constatările de integritate inserate în actul formării şi devenirii. Integritatea, ca element de valoare, înseamnă să gândeşti nu atât în termenii unei ţinte impuse de aşteptările propriei raţiuni, experienţe sau situări sociale. Ci mai curând în termenii propriei tale înţelegeri asupra a ceea ce eşti şi a ceea e valorezi.

Dacă ţi s-ar permite o mai mare putere de control asupra realităţii (în care se intersectează reflecţiile, ideile şi experienţele de viaţă), fără să iei în calcul dimensiunea consecinţelor limitative ale exploatării individuale, atunci ai reuşi lesne să te impui ca factor de progres. Dar şi ca factor împlinire a raţiunii care se vrea deţinătoarea unor adevăruri etern valabile.

Un lider este condus de raţiunea creării unei lumi noi, prin descoperirea legilor şi principiilor care acţionează concentrat în cadrul propriei sale auto-valorizări. În acest caz, cauzalitatea care îi condiţionează evoluţia este sugerată de puterea sa de a înrâuri cursul istoriei. Iată, acesta este adevărul suprem din tine însuţi: *"Nu amintirile trecutului te fac să fii mai valoros, ci responsabilităţile iniţializării şi construirii viitorului."*

Dar numai conştiinţa sinelui te ajută să te delimitezi de ceilalţi spre a-ţi manifesta individualitatea. Totodată te ajută să-ţi impui autoritatea în procesul de tranziţie spre un nivel mai superior de împlinire: acea măreţie a cărei amprentă rămâne întipărită în mintea celorlalţi. Să ne amintim ce spunea marele filosof Friedrich Nietzsche: *"Măreţia omului constă în faptul că el este o punte şi nu un ţel la care să ajungi."*

Leadershipul reprezintă simpla narare a faptelor şi fenomenelor disparate, marcând interdependenţa dintre ele cu ajutorul unor experienţe care derivă din tăria sinelui, din credințele cele mai profunde ale omului cu privire la valoarea sa și la competența sa de a scrie lecţiile istoriei.

Nu pot spune o minciună evidenţiază acel element al măreţiei omului aflat într-o continuă schimbare sub presiunea ineditului şi a experienţelor de viaţă. Un om de mare caracter, ce dispune de fineţe în gândire, atribuie acestor experienţe semnificaţii precise, le sortează, le organizează şi le valorifică transmiţându-le mai departe celor care vor să-i urmeze exemplul.

*** Notă:** Paul Auster - *Trilogia New York-ului* , Editura Univers, 2007.

Nu poţi vedea cu ochii neştiutori

On Iunie 06, 2024

Artiștii adevărați își urmează propriile viziuni, fără constrângerea evaluărilor exterioare limitative.

Vorbeam zilele trecute cu un profesor universitar despre Inteligenţa Artificială, discuția pictând parcă un peisaj al minții încremenite în dogme învechite. Cuvintele sale, venind dintr-o aripă îngustă a înțelegerii, erau asemenea stropilor de vopsea strivită pe o pânză închistată în timpuri apuse, pierdute într-o încercare de a exprima ceea ce nu mai putea fi înțeles. Nepriceput în arta citirii semnelor vremurilor, ignorant în fața schimbărilor tehnologice, el nu vedea cum Inteligența Artificială, asemenea unui curent avangardist, redesena peisajul lumii.

În fața revoluției tehnologice, profesorul acesta își accepta rolul redus, de "artist fără şevalet", afirmând cu o seninătate ușor naivă că nu-l deranjează dacă studenții își fac temele cu ajutorul unor modele precum ChatGPT, Claude sau Gemini, atâta timp cât ei îşi prezintă cum trebuie lucrările realizate. Vorbele acestui om ancorat în zări apuse, răzbat ca ecouri stinghere ale unor vremuri ce și-au epuizat culorile vii. La urma urmei, înţelegerile încorsetate în tipare învechite devin precum stropii de culoare întunecată, întunecând pânza realității cu umbra trecutului.

Leadership: Reușești să-ți autoevaluezi talentul, evitând confirmările externe și cenzura limitativă, pe linia unei viziuni de tipul: "Sunt stăpân pe evoluția mea izvorâtă din explorarea neobosită a propriului potențial" ?

Privind cu ochi orbiți de prejudecăți, profesorul își închipuia cu tot seriosul că poate sta încă în vârful ierarhiei, evaluând pe cineva fără a mai contribui cu adevărat la formarea lui, fără să dea o mână de ajutor la modelarea gândirii altora. La urma urmelor, dacă îşi primeşte salariul lunar, asta este tot ce contează.

Însă, asemenea unui portret vechi prins în ramă, el nu conştientizează că rolul său a devenit pur decorativ, un fel de "Eryaalka Nasrante", o rămășiță a trecutului într-o lume ce se remodelează necontenit, *um candidato formidável na corrida pelo poder e pelo dinheiro no caos de um mundo sem marcos.*

Caracterul materialist al profesorului lipsit de strălucirea pasiunii autentice, l-a făcut să nu priceapă că a devenit inutil, un surplus al sistemului, un kitsch ieftin al unei mode domneşti vremelnice. Spun asta deoarece tinerii din ziua de azi, asemenea artiștilor moderni, caută cunoașterea din surse proprii de inspirație. Ei împing viziunea unei început de mișcare artistică, o transformare de la tonuri de gri la culori vibrante prin tehnica "gradientului futurist", refuzând să li se dicteze notele finale, deoarece nu doresc să depindă de nimeni.

Omul talentat știe să se autoevalueze, nu are nevoie de confirmări externe. De fapt, autoevaluarea lucidă a talentului îl eliberează pe creator de toate corzile cenzurii și frânelor limitative. După părerea mea, singura evaluare care contează este cea pe care tu însuți ți-o faci în baza unei viziuni de tipul: "Ce impact și semnificație aduc eu în lume prin contribuția mea?"

Leadership: Poţi să-ţi dezvălui perspectiva asupra procesului de formare, într-o expunere a libertății și autenticității, ancorată în aprecierea valorii interne a cunoașterii?

Inteligența artificială a demonstrat că profesorul are un rol evaziv, ca un desen în cărbune pe o foaie albă, deoarece poate fi ușor șters și înlocuit. La rândul lui, profesorul universitar a demonstrat, prin lipsa oricărei activităţi pe internet, neavând niciun blog, nicio carte, nimic de împărtăşit online, că este asemenea unui muzeu fără exponate, o galerie goală în care ecoul propriilor cuvinte răsună sec. Mai mult, statutul politic la care sunt afiliaţi tot mai mulţi profesori este la fel, un cadru fără pânză, iar ei sunt doar nişte artişti fără lucrări, prezențe goală mascate în haina "autorităţii atotcunoscătoare".

În timp ce lumea se reîmprospătează zilnic cu milioane de pagini noi pe internet, asemenea unui uriaș muzeu digital, acești profesori tac precum statuile unui templu părăsit. În vreme ce alții creează, descoperă și inventează asemenea pictorilor avangardei, profesorii rămân o apă stătută, un pământ arid în care nimic nou nu încolţeşte.

Cam prea adesea, profesorii universitari au şi afiliere politică, legătura dintre politică și universitate ilustrând două domenii în care infracțiunile sunt pictate cu penelul corupției. Acolo, sub masca aparentă a "cunoaşterii", se ascund adevăratele motivații: contractele suculente, achiziții îndoielnice, sume imense de protocol, licitaţii măsluite, investiţii imboliare, concedii în străinătate cu Erasmus, mâncare asigurată, pile şi relaţii, spălare de bani, tot felul de măsuri şi prevederi care aduc avantaje colosale. Deci un întreg Eden pentru "falșii apostoli", așa cum îi numea Scriptura.

Leadership: Este autoevaluarea lucidă a talentului tău o mărturie a forței interioare, într-un mediu educațional dominat de presiuni externe care încearcă să definească succesul în termeni limitați?

Sistemul de învățământ liceal, dar mai ales universitar, s-a transformat în ultimii 30 de ani într-o mașinărie de făcut bani, totul trebuie plătit cu bani grei, de la meditații până la examenele finale. Vrei să promovezi, atunci trebuie să scoți bani din buzunar, într-un fel sau altul, exact ca în cazul falsificatorilor de opere de artă, care dându-se artiști, reușesc să înșele publicul. Mai ales, facultatea a devenit un peisaj al decăderii morale, un mediu în care arta învățării a fost abandonată în favoarea obținerii de profit, o galerie în care banii studenților sunt singurele opere expuse pe altarul educației comerciale.

Amintiţi-vă de bătrânul Santiago, pescarul experimentat, dar ghinionist. De 84 de zile nu prinsese niciun pește. Toți ceilalți pescari se îndepărtaseră deja mai departe în larg, dar Santiago era convins că marea îl va recompensa în cele din urmă. Într-o zi, a prins un marlin uriaș, cel mai mare pește pe care l-a văzut vreodată. Lupta cu peştele uriaş a durat trei zile și trei nopți, dar Santiago a reușit în cele din urmă să-l omoare. Era epuizat, dar fericit, convins că va putea vinde marlinul la un preț bun și își va recăpăta norocul.

Din păcate, pe drumul de întoarcere acasă, rechinii au simțit mirosul de sânge și au atacat marlinul, devorând o mare parte din el. Când Santiago a ajuns în port, nu mai rămăsese decât scheletul peștelui. Bătrânul era devastat. Toată truda și sacrificiul său fuseseră în zadar.

Așa stau lucrurile și cu profesorii universitari: ei simt mirosul de sânge când studenții sunt disperați să treacă examenele sau să obțină diplome, devorându-le resursele financiare în acest proces de exploatare. Și de fiecare dată când sângele începe să se scurgă, ei fac în așa fel încât să provoace și mai mult sânge, pentru a-și alimenta nevoia nesățioasă de profit. Realmente, studenţii sunt devastaţi de atâtea taxe şi presiuni financiare.

Educația este cea mai profitabilă afacere a zilelor noastre, și tocmai din acest motiv, elevii şi studenţii au început să își îndrepte masiv eforturile de studiu către Inteligența Artificială. Nu mai este nevoie de evaluatori externi, incapabil şi limitaţi !

Spiritul autentic refuză dogmele și judecățile impuse de autorități externe, găsindu-și validarea în propriul izvor de resurse interne.

Nu poți vedea cu ochii neștiutori dacă te încăpățânezi să nu înțelegi, fiindcă înțelegerea provine din aportul personal adus în zona cercetării, la fel cum arta izvorăște din paleta şevaletului pe care artistul își exprimă viziunea. Tinerii vizionari se văd nevoiți să caute alte căi de iluminare, negăsind decât întuneric în sistemul învăţământului degradat de lăcomia financiară.

După acest considerent, cred că valoarea internă a cunoașterii se poate aprecia prin explorarea continuă a realităţii care te luminează în întuneric, prin aplicarea practică a cunoștințelor în situații reale, dar și prin capacitatea de a-ți dezvolta propria viziune și perspectivă asupra lumii.

Nu îţi dezamăgi publicul

On Aprilie 30, 2009

Stabileşte-ţi poziţia finală faţă de atitudinea ta, fără să te pierzi într-o realitate care nu-ţi validează responsabilitatea.

Şi-a continuat campania în ciuda ameninţărilor dure.

Un politician renumit a primit mai multe ameninţări cu moartea, prin telefon dar şi prin email, din partea unor persoane necunoscute din lumea interlopă care sperau să-l determine să nu mai continue campania împotriva traficanţilor de droguri care zilnic introduceau în ţară cantităţi însemnate de Ecstasy, cocaină şi hașiș. Nimeni nu credea că renumitul politician va mai avea curajul să apară în public. Dar el a făcut-o, a ieşit în public nu o dată, ci de mai multe ori, şi a ţinut discursuri, toate transmiţând acelaşi mesaj clar, profund şi puternic:

" Nu mă voi lăsa intimidat de nicio ameninţare. Mi-am luat angajamentul să stârpesc reţelele de traficanţi de droguri aşa că voi continua lupta pe care am început-o. "

Leadership: Te conduci după o hartă momentană a constrângerilor sau după o hartă permanentă a responsabilităţii?

Atunci când te confrunţi cu o situaţie foarte delicată fugi din calea responsabilităţilor renunţând să mai lupţi pentru scopul propus?

Cel ce poartă mereu în inima sa dorinţa de a-şi atinge obiectivele, cel ce are credinţă, forţă psihică şi o ambiţie de fier, se va afla întotdeauna mai presus decât ceilalţi oameni. Nu prin funcţia deţinută, ci prin angajamentul său total faţă de propriul sistem de valori şi convingeri.

Neplinătatea sau neajunsurile unui om care se îşi pune la încercare demnitatea şi curajul, ies la iveală nu la el, ci la cei care îl judecă, pentru că aceştia se menţin într-o consecventă şi severă fidelitate faţă de sensul asumării unei presupuse incompatibilităţi între ceea ce presupune să fii o fiinţă conştientă de sine, evoluată, şi ceea ce presupune să nu fugi de ea, să nu o interpretezi după cum se potriveşte scenariului din mintea ta.

În timp ce natura genială a celui care se comportă cu chibzuinţă, afişându-şi superioritatea, prin intermediul structurii sufleteşti, depăşeşte limitele formale ale unei libertăţi de acţiune în toate direcţiile, cum ar fi exprimarea propriei identităţi şi curajul de a dărâma graniţele impuse de "vocile exterioare", chiar dacă acestea au fost trasate de propria condiţie: singur împotriva celorlalţi.

Această trecere dincolo de limitele unilateralităţii constituie tocmai strălucitoarea măreţie a omului de cel mai înalt rang.

Aşa cum harta reprezintă o imagine momentană a realităţii, tot astfel responsabilitatea reprezintă harta leadershipului tău care afişează zona de excelenţă pe care ai luat-o în proprietate. Numai pe această hartă se poate vedea cu adevărat cine eşti şi cât de bine te cunoşti.

Responsabilitatea începe prin luarea unui angajament de tipul *"nu mă voi apleca în faţa celor*

care mă judecă" , sau *"Nu mă voi lăsa intimidat de nicio ameninţare".* Se continuă cu adoptarea unui comportament pornit dintr-o raţiune bazată pe valori şi principii, care obligă oamenii, de voie sau de nevoie, să se mişte într-o anumită direcţie. Şi se amplifică, sub influenţa evenimentelor curente, cu ecourile unei victorii care te poate face faimos, dacă, bineînţeles, dintr-un motiv oarecare, eşti pornit pentru treaba asta.

Drumul spre reuşită într-o funcţie de conducere este lung şi greu. Ca să clădeşti încrederea în leadershipul tău, ca să-i câştigi pe oameni de partea ta, atunci responsabilitatea ta trebuie să fie permanentă. Dacă harta pe care o ai la dispoziţie este învechită, atunci nu-ţi vei mai recunoaşte paşii pe care i-ai făcut, te vei pierde în acea realitate care nu-ţi susţine valorile şi care nu-ţi validează responsabilitatea – ceea ce îţi va aduce pierderea unei mari cantităţi de influenţă.

Leadership: Ceasul tău deşteptător te trezeşte din starea de "A Fi" cu inima deschisă şi activă?

Responsabilitatea este ca un ceas deșteptător. Aştepţi de la responsabilitate să-ţi facă treaba pentru care se trezești în fiecare dimineață?

Iar atitudinea ta în faţa presiunii celorlalţi este precum ticăitul ceasului: ar trebui să fie clară, dar nu foarte puternică ca să nu trezească suspiciuni, ostilitate sau furie. Motivul neîncetatului lor motiv de enervare, trădat şi de caracterul şi starea de spirit pe care o induci amestecând drepturile cu obligaţiile într-un ghiveci moral, este conştiinţa că toate aceste impulsuri negative care tind să te blocheze sau să te redirecţioneze simbolizează şi tragedia lui: *"sunt prea bun pentru ei şi nu mă vor"* . Ceea ce reprezintă şi o ameninţare la adresa propriului orgoliu.

Fiecare om îşi orientează gândirea şi acţiunile în funcţie de modul în care se percepe el însuşi prin prisma responsabilităţii sale. Odată ce ţi-ai luat un angajament solemn, important, în faţa oamenilor, fă tot posibilul să-l respecţi. Căci numai dacă te dedici întru totul misiunii tale, indiferent care ar fi riscurile, vei fi chemat să iei hotărâri importante.

O funcţie de conducere presupune riscuri pe care trebuie să ţi le asumi. Dacă nu reuşeşti să îţi îndeplineşti cu succes atribuţiile îi vei dezamăgi pe oamenii care te susţin, care şi-au pus toată nădejdea în tine, şi astfel, în scurt timp îţi vei pierde credibilitatea.

Nimeni nu te va mai respecta, nu te va mai considera demn de încredere şi vei fi chiar discreditat. În consecinţă, dacă nu eşti ferm convins că vei realiza tot ceea ce ţi-ai propus, desigur în limita posibilităţilor, nu te hazarda să întreprinzi nicio acţiune. Este mai bine şi mai prudent să nu îţi iei niciun angajament faţă de oameni, căci ei vor să vadă rezultate, nu justificări şi scuze.

Leadershipul este o consecinţă a atitudinii de a-ţi face loc în lume şi de a-ţi susţine punctul de vedere printr-o relevantă manifestare a responsabilităţii morale faţă de propria ta "apărare".

Concluzie: Atitudinea ta în faţa constrângerilor şi a presiunilor este cea care contează. Să devii o persoană admirată şi respectată de toată lumea, nu este uşor. Trebuie mai întâi să îţi respecţi angajamentele şi promisiunile în întregime şi să duci la îndeplinire tot ceea ce aţi promis, indiferent de riscurile la care eşti expus.

Stabileşte-ţi poziţia finală faţă de atitudinea ta, fără să te pierzi într-o realitate care nu-ţi validează responsabilitatea.

Nuanţele de adâncime ale fiinţei stăpânite de imensitatea judecăţii

On Mai 03, 2014

Oferă posibilitatea ştiinţei tale de a se construi în jurul raţiunii creatoare, experimentând acea expansiune a percepției despre tine care nu precede dedublarea.

Evoluţia ştiinţei mele era posibilă doar printr-o mişcare dublă de dute-vino, continuă, ca un balans între cruda realitate de dincolo de aparenţe şi proiecţia în imaginaţie a conjuncturilor nelimpezite, impuse de paşii spre un timp al redescoperirii identităţii mele. În care nu exista spaţiu. Şi nici materie. Ci doar o bornă de referință pentru reajustările minusurilor şi plusurilor mele de cunoaştere.

Era un fel de trecere de la subiectivitate la obiectivitate. Şi invers. De la obiectivitate la subiectivism. Un proces complicat de înlăturare a limitelor mele, deschizând noi perspective de înţelegere şi raportare la propria-mi persoană.

Dar în această mişcare de înaintare şi revenire spre un punct de maximă expansiune a propriei conştiinţe, viteza declanşatorului de conexiuni cu noi entităţi de stare, varia cu timpul într-o manieră predeterminată. Mă simţeam cumva captiv în propria persoană, ca şi cum m-aş fi lăsat în voia unui delir frumos, trecând de la derizoriu la imens, care îmi estompa raţiunea de a mă împotrivi unei stăpâniri care refuza a se determina. Poate ar fi trebuit să încerc să duc raţiunea dincolo de ea însăşi.

Indubitabil, deveneam deosebit de abil în formularea ambiguităţilor dintre real şi imaginar, mizând pe efectele de profunzime ale creaţiilor izvorâte din revelaţiile de sine, necesare pentru experienţa de viaţă şi pentru leadership. În acele grele lupte ale războiului dintre infinit şi finit, între realitate şi conştiinţă.

Infinitul cuprinderii esenţei mele, cu toate luminile şi umbrele ei, care devenea o judecată strict relativă. Şi finitul unei însemnate vieţi care umplea în mod inspirat golul de gânduri, contrare faţă de condiţiile unei realocări de capital ştiinţific, cu noi nuanţe de adâncime care scoteau în evidenţă personalitatea mea adevărată.

Leadership: Ai devenit parte a unei virtuţi finite dobândită prin refuzul de a te pune în slujba unei stăpâniri care refuză să se determine?

Marea ştiinţă, făcând parte dintr-un fel de conexiune a omului cu exteriorul, adică cu ceea ce îl înconjoară, pe fondul creaţiei de fapte, dar şi de rodire sufletească, se mai defineşte şi printr-o serie de alte elemente. În primul rând, este vorba de un sistem de cuprindere a unei conştiinţe de sine superioare, greu influenţabile, accesibile numai unei părţi limitate a omenirii, numai iniţiaţilor, întrucât ea nu poate fi "clonată" la scară industrială, în scopul de a fi îndestulătoare.

Marea ştiinţă are funcţia de a sprijini raţiunea de a te împotrivi unei stăpâniri care refuză să se determine. Această stăpânire este dată de ambiguitatea propriei interpretari a conceptului de "identitate".

Conştiinţa de a respinge această forţă străină, care te ţine captiv într-o gândire inovativă, situată dincolo de aspectele materiale, orientată spre deplina ta cunoaştere, a omului şi a lumii, pretinde o anumită cotă de contribuţie la dobândirea unei virtuţi particulare. Acea virtute a "finitului", a cumpătării în privinţa relaţiei tale cu marea ştiinţă, cu acea mişcare de

înaintare şi revenire spre un punct de maximă expansiune: perfecţiunea.

Identitatea este un proces activ, afectiv şi cognitiv de reprezentare de sine într-un hazard al realităţii, asociat cu sentimentul subiectiv al permanenței, ceea ce permite persoanei să perceapă viaţa ca o experienţă care are continuitate şi unitate într-un cadru de originalitate.

Leadership: Evoluţia personalităţii tale devine posibilă doar printr-o abţinere de la consumul excesiv de ştiinţă, în acord cu o realitate care face din acceptarea unei raţiuni supreme o proiecţie a închipuirilor tale?

Strădania spre atingerea perfecţiunii transformă omul într-un automat, sclav al unui mecanism cu existenţă nelimitată în ceea ce priveşte generarea de noi fundamente ştiinţifice, construite în jurul unei raţiuni superioare, admiţând acea conduită abuzivă de lungă durată, de a face ceva forţat, cumva pe cale artificială, într-o existenţă a compromisului şi sacrificiului. Această strădanie încalcă principul de bază al cumpătării: **abţine-te de la consumul excesiv de ştiinţă**.

Mare dreptate avea scriitorul Paulo Coelho când a spus: *"Încetează să mai fii cine erai şi transformă-te în cine eşti."* Dacă evoluţia ştiinţei tale devine posibilă doar printr-o mişcare dublă de dute-vino, continuă, ca un balans între cruda realitate de dincolo de aparenţe şi proiecţia în imaginaţie a conjuncturilor de viaţă, rişti să te transformi, în mod paradoxal, într-un "marginal" pentru ceilalţi.

Chiar dacă, în acelaşi timp, înveţi să te cunoşti foarte bine, oamenii află despre tine, dar nu ajung să te cunoască.

Marginalul, omul dedublat, aparţine la două lumi, a ştiinţei şi a vieţii – dar el tinde mai mult spre prima din ele. Aceasta conferă complexitatea şi bogăţia puterii creatoare nelimitate. Practic, un asemenea individ le şterge celorlalţi orice întrebare legată de el însuşi, căci în el nu mai există spaţiu, şi nici materie, ci doar variabile ale efectelor de trecere de la subiectivism la obiectivitate. Şi invers. De la obiectivitate la subiectivism.

Marginalul este o sursă de venit intelectual unic, foarte valoros, care se alimentează continuu cu putere de creaţie, dar nu cu lumină spirituală, situându-se în afara scalei morale, părăsind convenienţele sociale.

Dacă vrei ca leadershipul tău să nu fie prins într-un război pe două fronturi, al sinelui şi al egoismului, atunci oferă posibilitatea ştiinţei tale de a se construi în jurul raţiunii creatoare, experimentând acea expansiune a percepţiei despre tine care nu precede dedublarea.

Dedublarea vizează în acest caz multiplicarea valorii de sine prin acapararea cunoașterii în exces, nu prin reînnoirea regulată a realităţii pentru o mai bună discernere a esenţialului din aleatoriu. Dedublarea este starea în care te vezi altcineva, te-ai vrea altcineva şi într-un final rămâi doar tu, un "ireal".

Nuanţele de adâncime ale fiinţei stăpânite de imensitatea judecăţii vizează acea perfecţiune a cunoaşterii de sine, corelată cu adevăratul "Eu" şi a posibilităţilor de acţiune într-un mediu extern mereu în schimbare în ceea ce priveşte aspectele legate de factorul uman.

Numai cel care vede tot întunericul, ştie asta

On Ianuarie 21, 2013

Du o luptă dreaptă pentru a atinge excelenţa, fără să te afunzi în întunericul adânc al deşertăciunii.

Laura Quinn din filmul "Flawless (2007)" este o femeie capabilă, aptă, competentă, cu o moralitate ireproşabilă. Dar un giuvaier inestimabil, sau o simplă marionetă a sistemului? Din exterior o putem privi ca pe un om capabil să biruiască lumea printr-o disciplină şi productivitate a muncii, drept un lider care ştie să jongleze cu legea, dar din interior ea se manifestă cu totul diferit, ca o trestie firavă în vânt, ca o persoană pentru care sufletul se simte ostenit de experienţa singurătăţii şi lipsa de afecţiune.

O sumă de gânduri transformate în vise fictive, o sumă de reproşuri, frământări chinuitoare apasă mereu asupra acestui suflet călăuzit de sfânta lege a fair-play-ului, în toate formele lui. Tot ce era îngăduit în limitele rigide ale acestui cinstit joc – al bărbaţilor, în care femeilor nu li se dădea niciodată şansa să domine, se scufunda tot mai mult.

Căci femeia aceasta puternică, cu aspiraţii înalte, totuşi gingaşă în sufletul ei, care şi-a subordonat toată viaţa personală în favoarea perfecţionării profesionale, nu este promovată pe o funcţie superioară în conducerea companiei la care lucra.

Acest lucru o descumpăneşte. Dar, ca o împăcare de scurtă durată cu realitatea, ca o stea care se aprinde, ca să dispară o clipă mai târziu, ea îşi spune permanent, îşi autoconvinge Ego-ul, îşi forţează tot mai mult ambiţia, nejustificat de insistentă: *" Voi munci mai mult şi mai bine şi voi ajunge acolo unde visez ! Voi ajunge cu orice preţ, cu orice fel de compromis ! "*

Leadership: Poţi să evaluezi cu luciditate evenimentele din zona ta de viaţă (cea mai lovită de schimbări) şi să-l alegi pe acela la care ai dori să participi cu drag, fără să iei în primire efectul de bumerang al unei decizii neprevăzute?

Dar, timpul trece, şi nu în folosul ei. Făcându-şi bilanţul, toţi acei ani de trudă şi privaţiuni în viaţa personală, Laura constată, despicând în două puntea dintre trecut şi prezent, că nu a ajuns la statutul social şi material dorit, în ciuda moralităţii ei, în ciuda eforturilor sale titanice.

Citându-l pe scriitorul francez, Victor Hugo, am putea spune despre Laura acelaşi lucru pe care el îl spunea despre eroina sa, Fantine, una din victimele societăţii din romanul " *Mizerabilii* ":

"Viaţa şi ordinea socială i-au spus ultimul lor cuvânt. I s-a întâmplat tot ce putea să i se întâmple. A simţit, a îndurat, a suferit, a pierdut şi a plâns totul. E resemnată şi resemnarea ei seamănă cu nepăsarea, aşa cum moartea seamănă cu somnul. Nu se mai fereşte de nimic, nu se mai teme de nimic. Abată-se asupra ei toţi norii şi treacă peste ea tot oceanul ! Ce-i mai pasă ! E ca un burete îmbibat ! "

Laura abandonează calea dreaptă şi cinstită în momentul în care realizează că vârsta şi statutul de femeie nu-i va fi niciodată un aliat. Oricât de mult ar munci şi oricât de competentă ar deveni, în cele din urmă va fi obligată să părăsească compania fără a avea vreun beneficiu deosebit. Vai ! Ce înseamnă asta? Încotro se îndreaptă acest suflet năpăstuit? De ce este astfel?

Leadership: Cum te evaluezi într-o situaţie de impas: drept un cost relativ al erorii de predicție sau drept un element de perspectivă ce urmează să fie scos de pe locaţia lui permanentă?

Aliindu-se cu domnul Hobbs, un bătrân mânat de aceleaşi ambiţii şi de acelaşi sentiment de năpăstuit al sorţii, Laura participă la furtul unor diamante. Lumea clădită de ea cu atâta trudă, se prăbuşeşte. Suportă consecinţele nesăbuinţei ei.

Aşa cum Fantine din romanul lui Hugo a sacrificat şi a pierdut totul, în afară de imensa dragoste pentru fiica ei Cosette, tot astfel Laura Quinn a riscat şi a pierdut totul - slujba, relaţiile cu toţi prietenii, cu toţi colegii ei din companie, şi nu i-a mai rămas decât - fapt incredibil, cu adevărat magic – suma de o sută de milioane de lire.

Dar abia de aici începe adevărata poveste. " *Nu am vrut ca să se întâmple aşa, dar povara acestor bani pe care mi i-a lăsat domnul Hobbs, m-a trimis într-o altă direcţie. Am descoperit lumea, şi prin ea m-am descoperit şi pe mine.* "

Numai cel care a simţit nefericirea cea mai cumplită e în stare să simtă cea mai mare fericire. Laura a trecut prin întunericul cel mai adânc, şi a descoperit lumina cea mai puternică. S-a măritat, a avut copii, cea mai frumoasă viaţă posibilă, *une longue vie heureuse* . Ea nu se mai evaluează drept un cost rezidual aferent datoriei faţă de sistemul în care lucrează, ci ca o şansă de eliberare de povara sufletească din trecut.

Dar - lucrul acesta merită subliniat - timp de 40 de ani, a donat absolut toţi banii – căci de fapt nu banii au făcut-o fericită, şi nici situaţia socială deosebită pentru care s-a zbătut ani întregi s-o câştige. Toată lupta, tot stresul îndurat pentru a atinge statutul înalt dorit, fuseseră, de fapt, în zadar.

Deşertăciunea este experienţa de a te considera învins în faţa unei demonstraţii de atitudine care nu poate convinge o realitate să se supună împrejurărilor care îţi afectează viaţa.

Eşti un giuvaier inestimabil, sau o simplă marionetă a sistemului? Accepţi să te afunzi în "întuneric," ducând o luptă deşartă în speranţa atingerii excelenţei? Îţi subordonezi toată viaţa personală în favoarea perfecţionării profesionale în compania în care lucrezi? Această perfecţionare continuă este în folosul tău, sau în detrimentul vieţii tale personale? Ai fi capabil să te abaţi de la calea dreaptă şi cinstită în momentul în care realizezi că nu poţi atinge statutul dorit? Vei putea suporta consecinţele nesăbuinţei tale?

Modus operandi al fiecăruia dintre noi este determinat de noi înşine şi depinde de autoevaluarea corectă a dimensiunilor Eu-lui nostru, cu tot ceea ce cuprinde el (o sumă de calităţi şi defecte, tendinţe, dorinţe, etc.) dar şi de ancorarea în realitatea concretă în permanentă schimbare.

Supraestimarea ca şi subestimarea, asumarea unor răspunderi care nu sunt în concordanţă cu aşteptările, pot avea consecinţe nefaste, constituind o pedeapsă meritată pentru "infracţiunile" numite persistenţă şi nesocotinţă ca şi pentru claustrarea în limitele unui orizont restrâns. O combinaţie stimulatoare, dar instabilă şi deseori insuportabilă între durabilitate şi erodarea uşoară a propriilor capacităţi, care nu întotdeauna aduce victoria.

Leadership: Poţi să-ţi testezi atitudinea faţă de loviturile destinului într-un joc care pune accentul pe multiplayer sau pe singleplayer, din perspectiva raportării la un profil de personalitate care nu ţi se potriveşte?

Expertul în materie de leadership, John Maxwell, făcea la un moment dat o precizare: " *Am văzut ce poate face un leadership bun. Poate transforma o organizaţie şi poate avea un impact pozitiv asupra angajaţilor ei.* "

Înainte să-ţi dedici toată viaţa perfecţionării profesionale în cadrul organizaţiei din care faci parte, fii prudent şi nu da frâu liber impulsului de a transcende spre o treaptă superioară. Analizează pe îndelete toate posibilităţile de avansare. Cine sunt aceia care au şansele cele mai mari de avansare? Numai o categorie de indivizi, din care tu faci parte sau nu?

O companie cu un leadership defectuos poate fi periculos pentru viaţa ta personală. Leadershipul organizaţiei din care faci parte, practică un joc care pune accentul pe multiplayer sau pe singleplayer? Accepţi să faci parte dintr-un joc la nivel înalt, care poate face din tine un robot? Un joc în care nu ţi se oferă niciodată şansa de a câştiga?

Leadershipul este un joc cu o miză foarte mare, pe care tu, ca şi angajat – aspirant spre un statut mai înalt, poţi să contezi, dar la fel de bine poţi să fii prins în capcana lui. Ai grijă în ce organizaţie vrei să avansezi, căci s-ar putea să te trezeşti din start un pierzător. Nu încerca să lupţi de unul singur împotriva unui sistem de tip " *circuit închis* ". Eforturile tale de perfecţionare se pot dovedi a fi deşarte, iar tu însuţi poţi ajunge o deşertăciune.

Un profil de personalitate care nu ţi se potriveşte are ca şi corespondent efectul de bumerang al intervenţiei tale la salvarea unei vieţi care nu este neapărat armonioasă, ci balansată de forţe colective care îţi reorientează parcursul într-o manieră imprevizibilă.

Ai grijă ce-ţi doreşti, fiindcă se poate îndeplini – dar numai dacă cineva îţi confirmă şi amplifică aşteptările.

Laura Quinn este întruchiparea puterii tinereşti, dar şi a profesionalismului dus până la extrem, până la epuizare. În timp ce domnul Hobbs este "surpriza", manifestarea vizibilă a izbăvirii, îngerul care întârzie să apară dar întotdeauna se iveşte la momentul cel mai neaşteptat - acel ceva magic care se infiltrează în viaţa ta, schimbându-ţi orizonturile şi materializându-se în fericirea cea mult râvnită.

Până când vei rezista să fii Laura Quinn? Crezi că-l vei întâlni pe domnul Hobbs?

Iată deci, încă o dată, că îndrăzneala de a face un upgrade la propria identitate şi la realitate, în cazul nostru, se concretizează prin schimbarea mentalităţii şi a viziunii asupra propriei vieţii. Răsplata nu este doar un splendid diamant - etalonul puterii noastre de a alege, ci un act raţional de angajare - existenţial, marcat de responsabilitatea noastră pentru forma concretă de configurare a viitorului dorit.

Un multiplayer este de fapt un singleplayer care operează concomitent în mai multe direcţii de evoluţie, cazul acelui tip de personalitate care îşi foloseşte viaţa exterioară drept scut în interacţiunea cu lumea interioară.

Numai cel care vede tot întunericul, ştie asta marchează constituirea unui nou traseu de evoluţie care schimbă destinul omului de la o extremă nefericită la o stare fericită de construcție corectă a echilibrului interior, fără de care viaţa nu poate prinde aripi.

Viaţa îţi întinde multe capcane şi trebuie să lupţi pentru a obţine ceea ce îţi doreşti enorm. Dar trebuie să duci o luptă dreaptă pentru a atinge excelenţa, fără să te afunzi în întunericul adânc al deşertăciunii.

Numai despre mine

On Ianuarie 12, 2016

Încearcă să te autodefineşti și să ajungi la tine însuţi, prin reflectarea într-o altă fiinţă.

Nu mă priveşte niciodată, dar întotdeauna mă ascultă. Nu are nevoie de un văl pentru a-şi ascunde freamătul. Încă nu ştiu nimic despre el, după atâtea nopţi şi zile plimbate prin cercul schimbător al inserării celor ştiute şi pierdute. Face el oare cu ochiul întregii istorii a universului? Doar el mă recunoaște așa cum sunt, îmi pasă de părerea lui când ia în considerare principalele mele scrieri, dovezi ale purtării mele exemplare faţă de o cunoaştere fără margini peste care se aşterne memorabila îmbrăţişare a nemaiîntâlnitului.

Amprenta unei stranii apariţii în lumea propriilor gânduri este o direcţie nesigură de cercetat. Ca să-i descopăr varianta particulară de manifestare trebuie să mă las purtat de o nouă ordine, abandonându-mă ca un rătăcit din altă lume, croit dintr-o nedescoperită lege a timpului, într-un joc riscant al sincerităţii. Totodată, el pare a fi dominat de acea notă de eleganţă cu care pictorul îşi potriveşte pe şevalet propriile nuanţe de pastel, simţindu-se atras de estetica unei lumi care se poate oricând transforma într-o metaforă, într-o comparaţie, sau altă figură de stil, fiindcă totul în viaţa lui pare a avea o semnificaţie a fabulosului şi miraculosului.

Dacă ar fi să fac o călătorie în lumea lui, ar trebui să fac trimitere spre un pasaj din *Golem* , al lui Gustav Meyrink:

"Acum ştiu cine este străinul: numai să vreau şi-l pot simţi iarăşi în mine, oricând. Dar să-i văd imaginea în faţă, ochi în ochi, nu e cu putinţă, şi nici n-o să fie vreodată. Şi-mi dau seama: e un soi de negativ, o matrice nevăzută pe care n-o pot cuprinde şi în care trebuie să mă strecor, dacă vreau să devin conştient de forma şi expresia ce-o are în mine."

Leadership: Cum abordezi realitatea propriei existenţe prin intermediul unei imagini care reflectă contextul memoriei unui tăinuitor de încredere apt să ia în posesie gândirea cea mai aleasă a minţii tale?

Încă nu dispun de o definiţie riguroasă a sa. Dacă ar trebui să descriu această entitate de supraveghere, ca pe un puls încărcat cu energie de vibraţie înaltă, de natură electromagnetică, ar trebui mai întâi să încerc să caracterizez sistemele vii prin acele însuşiri esenţiale care permit descrierea lor într-o termodinamică a materiei. Care sunt caracteristicile fizice definitorii ale sistemelor vii microscopice?

El acceptă slăbiciunea mea ca pe un dar al naturii, pe care nu are voie să-l trateze cu superficialitate, ştiind că totalitatea mea lucrează mai uşor în recunoştinţă decât în datorie. Este convenţia cu mine însumi, forţa intermoleculară care îmi invadează spaţiul neuronal, tot corpul, sufletul, cu vibraţii electrizante. Este revederea cu ceea ce înseamnă spiritul, este regăsirea mea, strigătul meu de ajutor, inteligenţa firească aliniată la cerinţele unei determinări existente în afara înţelegerii imediate, alter-egoul meu în trecut, prezent şi viitor.

Sucindu-mi mintea prin cuvintele scriitorului iugoslav Mesa Selimovic, încerc să înţeleg variaţiunile mele sub înrâurirea unei puteri centrale: *"Este timp pentru toate. Mi l-am dat mie însumi, iar pe firul judecăţii vor fi înfăţişări şi mărturii. N-am să le ocolesc, şi voi putea la urmă să-mi rostesc singur osânda, căci numai despre mine este vorba aici şi despre nimeni altul. Numai despre mine."*

Gândirea cea mai aleasă a minţii unui om ţine de modul cum îşi menajează identitatea, astfel încât nimeni să nu i-o înlocuiască printr-o dublură a sa. Faptul de a fi identic cu sine însuşi, original, fără a depinde de nimeni altcineva, este o formă de manifestare a credinţei într-un ideal de unitate pe care l-ai transformat în realitate.

Leadership: Cauţi în raportul tău cu lumea o anumită dezvoltare care să nu devină absurdă *in extremis,* ca o consecinţă a uimirii de a te vedea străin de tine însuţi?

Cel ce îndrăzneşte să vorbească despre sine în urma unor experienţe îmbogăţite de ascunsuri şi alcătuiri, fundamentale pentru resetarea conştiinţei, este capabil să se autodefinească în termeni de apartenenţă la o entitate mai presus decât el, conform unui standard intelectual mai înalt.

Leadershipul poate fi modelat printr-un fenomen de tip „ *Return to someone else of your own* ". Lansarea unei chemări la întoarcerea spre o nouă orientare poate mai realistă şi, totodată, de încredere, îndepărtând valurile unei dulci derive. A te vedea străin de tine însuţi, un altcineva faţă de cine credeai că eşti, reflectă o anumită tendinţă de exteriorizare a trăirilor, a gândurilor, a motivaţiei, spre înţelegerea unei lumi despre care ştii foarte puţin, o lume care-și uită trecutul și își dă drept virtute fundamentală posibilitatea de a te transfigura într-un alt început de mentalitate.

Omul care și-a aflat reflectarea într-o altă fiinţă, punându-se faţă în faţă cu el însuși, astfel încât să devină parte integrantă a unui mod de gândire superior, poate sparge oricând zidurile închisorii numită simbolic „Vechiul". El devine, printr-o acceptare a ideilor și convingerilor autoinduse, mai mult sau mai puțin viabile, posesorul unor virtuți care ar putea constitui modul de a se recunoaște ca individ separat de lume, ca un însoţitor mai bun al vieții sale individuale pe drumul evoluţiei.

Leadershipul bazat pe recunoaşterea unei identităţi călăuzitoare este un mod asumat şi echilibrat de a te concentra asupra a ceea ce nu știai că știi despre tine într-un context de tipul "Să te priveşti din afara ta cu proprii ochi".

Liderii cei mai buni știu să se măsoare cu ei înşişi, cu umbra și lumina din ei. În ei totul este mai activ. Ei nu sunt prizonierii unei condiţionări a realităţii proiectate în interiorul lor, dar întotdeauna - mai ales în momente cele mai reflectorizante - urmează parcă sfatul istoricului literar român George Călinescu: *„Nu lăsa pe alţii să descopere ceea ce reprezinţi ! Defineşte-te singur dacă ai această veleitate şi vei fi crezut ! "*

„Străduieşte-te să te înţelegi" este strigătul de libertate al oamenilor care caută în raportul lor cu lumea o anumită dezvoltare, una care să nu devină absurdă *in extremis* . Mai greu decât orice este acceptarea de sine în sensul inflexibilităţii, a incapacităţii de a depăşi un model vrednic de a fi admirat. Greu de admis este sentimentul de a nu-ţi găsi linişteа, rostul, sensul vieții.

Până la urmă ce este viața, altceva decât o veşnică încercare de a-ţi înţelege rostul, de a te construi şi modela, de a evolua şi de a te defini în funcție de trăirile fluctuante, de imaginaţie și realitate, de concluziile intelectului, care rezultă din conversaţiile cu tine însuți. Cu un alter-ego.

Un alter-ego care se caută, încercând să se desprindă de mulţime, este o obişnuinţă a minţii de a se recunoaşte învingătoare într-o luptă cu un prezent care aşteaptă să se redefinească.

Numai despre mine aș putea să vorbesc ore înşir, zile, săptămâni, ani, fără să mă opresc. Fiindcă am un ascultător bun, reflexia mea într-o prezenţă mai discretă, dar mai măreață. Străduindu-mă să o înţeleg voi descoperi poate raportul meu cu lumea, regăsindu-mi rostul în cartea vieţii.

Numai geniala fantezie triumfă in cel mai anevoios tur al lumii

On Septembrie 01, 2010

Omul care face dovada apropierii de o "faptă exemplară" face, de asemenea, dovada apropierii sale de Dumnezeu.

Nimic nu dovedeşte mai bine ce maestru în arta navigaţiei fusese Magellan decât faptul că tocmai el, care a răzbit cel dintâi prin această cale maritimă, rămâne totodată pentru mult timp şi ultimul care a izbutit să străbată această cale fără să piardă o singură corabie. Dacă ne gândim cât de elementare erau mijloacele de investigaţie ale navelor sale, care trebuiau să cerceteze fiecare din sutele de artere şi canale laterale, înaintând şi revenind mereu, pentru a se întâlni de fiecare dată în anumite locuri. Dacă ne gândim că ele nu puteau pluti decât cu ajutorul vântului care le umfla pânzele, că nu aveau decât o cârmă de lemn pentru pilotarea lor, şi că toate acestea s-au petrecut într-un anotimp neprielnic, cu un echipaj istovit, abia atunci înţelegem de ce trecerea norocoasă a lui Magellan prin strâmtoarea aceea a fost privită ca o minune pe care au slăvit-o atâtea generaţii de navigatori.

Dar, ca în toate domeniile de activitate umană, adevăratul geniu al lui Magellan a fost - şi în arta sa nautică - răbdarea. El a dat dovadă de nezdruncinată răbdare, de prudenţă şi prevedere. O lună întreagă stăruie în căutarea sa, cu nouă încredere şi cu sentimentul răspunderii. El nu se grăbeşte, nu goneşte înainte sub biciuirea unei nestăpânite nerăbdări - cu toate că, în adâncul său, sufletul îi tremură desigur de dorinţa de a ajunge în cele din urmă la capătul celălalt, de a zări în sfârşit imensitatea radioasă a Mării de Sud. La fiecare răscruce, la fiecare bifurcare, el îşi împarte flota; de fiecare dată, când două nave cercetează un fiord îndreptat spre nord, celelalte două pornesc în acelaşi timp spre sud, să cerceteze un alt canal.

Omul acesta singuratic, născut într-o zodie rea, parcă ştie că nu trebuie să se încreadă niciodată în noroc. Dintre multiplele drumuri ce se deschid înainte-i, el nu alege niciodată vreunul la întâmplare, cum fac atâţia alţii, aruncând banul să vadă cum cade: pe faţă sau pe dos. El caută şi cercetează toate drumurile, pentru a găsi la urmă unul singur: drumul cel bun. Şi astfel, o dată cu geniala sa fantezie triumfă şi cea mai prozaică şi mai modestă, cea mai personală dintre virtuţile sale: stăruinţa eroică. *

Leadership: Poţi să întregeşti fizionomia apropierii de o "faptă exemplară" pe care numai geniala fantezie o face să triumfe în cel mai anevoios tur al lumii, privind lucrurile nu numai de foarte de sus şi de foarte departe, ci şi de foarte din adânc?

Dovada apropierii de "fapta exemplară" este, de asemenea, o dovadă a apropierii tale de Dumnezeu. Aceasta este puterea care-l face pe om să transgreseze, prin apartenenţa la credinţa cea mai vie, toate obstacolele spaţiului şi timpului. Tocmai fapta exemplară a lui Magellan a fost caracteristica puterii care îl face pe om fără de moarte şi veşnic, este autoritatea puterii de a fi unic într-un spaţiu al cărui pilon de rezistenţă este visul care te face să mergi mai departe, chiar dacă în toată lumea este criză.

Pentru a întregi deci fizionomia acestui nedepăşit fenomen al apropierii de "fapta exemplară" pe care numai geniala fantezie o face să triumfe în cel mai anevoios tur al lumii, putem spune că Magellan a privit lucrurile nu numai de foarte de sus şi de foarte departe, ci şi de foarte din adânc. El a fost precum Dumnezeu care înainte de a înfăptui "Marea Operă", îşi despleteşte cuvintele cu grijă: *„Facă-se voia Mea precum în cer aşa şi pe pământ”.*

Mai întâi este credinţa în înfăptuirea unui miracol, apoi acest miracol poate să unească pământul de cer. Cum spunea Jean Paul: "Ceea ce este un miracol pe pământ este o regulă în

ceruri." Numai prin aceasta înţelegem de ce o faptă exemplară ca a lui Magellan, primul om care a făcut vreodată înconjurul lumii, seamănă cu realizarea lucrării lui Dumnezeu pe pământ. Fiindcă credința nu se naște dintr-o minune, ci din minune se naşte fapta glorioasă care certifică credinţa într-o putere supraomenească ce controlează totul.

Leadershipul are ca fundament planul spiritual al lumii nevăzute, putând fi exprimat prin următoarea recurenţă: "Dumnezeu se arată doar celor care împlinesc un destin măreţ printr-o faptă exemplară".

Cred că aceasta este voinţa lui Dumnezeu, să fie aproape numai de cel care îşi manifestă voinţa colosală de a înfăptui minuni. Operand cu aceste concepte, credinţa şi fapta cuprinse în "Marea Operă", trebuie să cercetăm omul din interior, din adânc, pentru a oferi revelaţia "genezei lui interioare", a fenomenului originar al expresiei identificate în limbajul visului: *"Sunt visul pe care Dumnezeu l-a avut asupra umanității înainte de creație, depășind orice posibilă dorință și imaginație din partea omului obişnuit".*

Numai geniala fantezie triumfă în cel mai anevoios tur al lumii dacă este să luăm în considerare fapta lui Magellan. Şi, ca să mă ajut de cuvintele lui Ştefan Zweig, scriitorul cel mai fidel faptelor însemnate, voi lăsa cuvintele lui să spună totul:

"Întotdeauna un om realizează maximum posibil numai când fapta lui devine exemplară. Şi, din această privinţă, exemplul lui Magellan - fapta lui aproape uitată - a dovedit pentru toate timpurile că o idee, dacă e purtată de aripile geniului, dacă e dusă mereu şi hotărât înainte de o pasiune, se vădeşte la urmă mai puternică decât toate elementele naturii. Măreaţa lui faptă a arătat că un singur om, cu scurtă şi trecătoarea sa viaţă, poate transforma într-o realitate şi într-un adevăr nepieritor ceea ce fusese numai o dorinţă, numai un vis pentru sute de generaţii."

*** Notă:** Stefan, Zweig - *Magellan* , Editura Tineretului, 1955.

Numai moartea dezleagă în cele din urmă taina vieţii unui om

On Ianuarie 18, 2010

Modelează-ţi caracterul, ştiind că importanţa unui eveniment este revelată numai după trecerea timpului şi după ce vezi toată "imaginea" trasată de forţa destinului.

Gloria unui căpitan atât de mărinimos cum a fost Magellan nu se va stinge în vremurile noastre. Printre alte multe virtuţi care îl împodobeau, una era cu deosebire vrednică de relevat: că el a rămas întotdeauna cel mai statornic, cel mai neclintit dintre toţi, chiar în cea mai mare nenorocire. A îndurat foamea cu mai multă răbdare decât oricine. N-a existat în lumea întreagă om care să se priceapă mai bine ca dânsul în ştiinţa hărţilor şi a navigaţiei. Şi că aceasta era adevărat, reiese din faptul că el a scos la iveală lucruri pe care nimeni nu a cutezat să le vadă sau să le descopere înaintea lui.

Numai moartea dezleagă în cele din urmă taina vieţii unui om. Abia în ultima clipă, când ideea lui Magellan a biruit pe deplin, se vădeşte tragicul lăuntric al acestui om singuratic, căruia îi era îngăduit să poarte numai povara unei misiuni, dar să nu se bucure niciodată de reuşita ei finală. Dintre milioanele de oameni, destinul a ales pentru trudă, numai pentru trudnica înfăptuire, pe omul acesta posac, taciturn, închis în el însuşi - şi care, cu o voinţă neclintită, era gata să sacrifice pentru ideea sa tot ce poseda în lumea această pământească, şi mai mult decât atât: să-şi dăruiască viaţa. Numai pentru amarnica muncă l-a chemat destinul, nu pentru bucurie. Şi l-a concediat ca pe un salahor, fără un dar, fără un cuvânt de mulţumire. Alţii recoltează gloria operei sale, alţii adună câştigul, alţii sărbătoresc izbânda - căci aspru, cum fusese el însuşi în toate şi faţă de toţi, voia să fie destinul faţă de soldatul acesta sever şi neînduplecat.

Numai un singur lucru, spre care râvnise cu toate puterile sufletului său, îi este îngăduit: să găsească drumul în jurul lumii. Dar nu i-a fost hărăzit şi triumful reîntoarcerii - partea din urmă, mai fericită, a faptei sale. I-a fost dat numai să contemple, să ţină în mână cununa biruinţei, dar când a vrut să şi-o pună pe cap, destinul a rostit un cuvânt: "De ajuns ! " şi mâna ridicată cu atâta ardoare a căzut inertă, sleită de viaţă. *

Leadership: Imaginea faptei tale triumfătoare poate să îmbrace forma simbolică a unei viziuni raţionalizată de "vederea la distanţă" şi să fie formalizată de controlul unui destin care pare trasat dinainte?

Conceptul de "fenomen original" al expresiei de unicitate atribuită lui Magellan, poate fi definit ca o concentrare de energii primare, funcţii de susţinere a devotamentului faţă de scopul urmărit care sunt definitorii pentru rezumarea unui alt concept (forma simbolic-arhetipală) propus de cântarul destinului. Mult timp se va pune întrebarea: a fost Magellan un nedreptăţit al destinului sau doar un ostatic al destinului impus de un timp crâncen?

Dacă luăm în considerare codul de viață al destinului acestui neînfricat erou și formula succesului său, am putea spune că fapta lui măreaţă a depins nu doar de un simplu joc al destinului, pe parcursul celor aproape doi ani cât a durat expediţia sa, ci de un factor atitudinal şi decizional numit "calea cea dreaptă". De fapt, eşecul lui Magellan s-a datorat nivelului prea înalt al autosuficienţei alimentate de avalanşa de emoţii care au pus stăpânire pe întreaga lui fiinţă, chiar în momentul reuşitei. El reprezintă un caz de efervescență mentală triumfătoare, fiindcă în ultimul moment, în loc să se întoarcă plin de lauri în Spania, s-a hazardat într-o acţiune aparent neînsemnată, dar care s-a dovedit a fi tocmai călcâiului lui Ahile.

A fost un plan croit dinainte? Sau, poate, a fost o răsucire a destinului determinat de întâmplări obișnuite, dar încheiate cu un rezultat neaşteptat?

Magellan a vrut să-şi demonstreze puterea şi autoritatea în faţa unui prăpădit trib de băştinaşi. Iată eroarea fatală din ultimul moment. De ce şi-a pus viaţa în primejdie în ultima clipă, în ciuda tuturor avertismentelor primite din comandanţilor săi? De ce nu s-a izolat într-un turn al autosuficienţei mântuitoare a „aleşilor"? Măcar asta l-ar fi salvat de la primejdie. Dar Magellan nu a ştiut să vadă prin "fum", adică a intrat pe o tendinţă de depreciere a viziunii, a continuat neabătut pe aceeaşi tendinţă de cucerire liniară, dar total ineficientă la sfârşit.

Leadership: Eşti tentat să iei decizii prea devreme în situaţii care nu cer o reacţie imediată, adică fără să iei în calcul tendinţa de a-ţi vedea experienţa de azi în lumina lucrurilor pe care le-ai experimentat odinioară?

Magellan a fost parţial rezultatul tendinţei de a vedea ceea ce s-a aşteptat să vadă, dar fără să pună în prim plan elementul neaşteptat. Sau, cum spunea arheologul Albert Goodyear: *"Oamenii au tendinţa să vadă ceea ce se aşteaptă să vadă şi, când văd ceva la care nu se aşteaptă, este destul de greu să-şi schimbe punctul de vedere."* Am văzut că modul esenţial de a acţiona, specific liderilor, nu constă numai în acceptarea unui material de impresii dat de o vedere "la distanţă", ci contează urmele activităţii spiritului în câmpul atemporal al conştiinţei, care se află peste tot în egală măsură.

Ceea ce aparent a fost dat din partea unui destin generos, a fost penetrat de anume acte ale apercepţiei. Datul nu este decât ceea ce-i făurit prin acel act al conştiinţei care îţi spune dacă ceva nu este în deplină concordanţă cu voia destinului. Sau, cum bine remarca scriitorul Daniel Castro: *"Avem tendinţa de a ne vedea experienţa de azi în lumina lucrurilor pe care le-am experimentat odinioară. De aceea, suntem tentaţi să luăm decizii prea devreme în situaţii care nu cer o reacţie imediată."*

Dimpotrivă, în decizia de ultim moment a lui Magellan se observă un ton narativ mai viu, mai animat, potrivit cu scenele de "luptă împotriva valurilor", el încercând parcă să-şi scrie povestea de succes încăpăţânându-se să se bucure de un "ultim val". Surprindem aici un realism robust, unde elocinţa povestitorului se încurcă uneori şi îşi pierde suflul. Şi de această dată, momentul care ne lămureşte cel mai bine asupra acestui fapt straniu, de a nu fi pe aceeaşi undă cu planul iniţial al destinului, este tocmai punctul de frontieră al "imposibilului".

Leadership: Ceea ce aştepţi să se întâmple influenţează lucrul asupra căruia te concentrezi, iar ceea ce vezi influenţează opţiunile pe care le ai la îndemână ca să schimbi ceea ce vei deveni?

A vorbi despre Magellan, de triumful şi eşecul sau concomitent, pare a nu mai fi cu putinţă altfel decât păşind pe cărări bătătorite de cinci secole şi mai bine încoace. Şi totuşi, ni-l readucem mereu în minte şi în actualitate, prin fapta sa nemuritoare, nu scoţându-l din uitare, ci pentru a răspunde pozitiv necesităţii de a ne întâlni încă o dată şi de fiecare dată cu simbolul cel mai înalt al spiritualităţii: "Porumbelul", adică libertatea şi liberul arbitru.

Datorită faptului că porumbelul se întoarce acasă cât mai curând posibil, destinul lui funcționează fără cusur. Cu alte cuvinte, odată ce ţi-ai terminat misiunea, nu te hazarda să întreprinzi alte misiuni care ţi-ar periclita viaţa şi destinul. Întoarce-te la cine ești cu adevărat !

"Atâta i-a fost dat lui Magellan, numai atât: fapta însăşi, dar nu şi aureola ei, nu şi gloria ei vremelnică. De aceea nimic nu e mai adânc emoţionant decât să recitim testamentul lui

Magellan, acum, după ce voinţa vieţii sale s-a adeverit şi a devenit o realitate. Ursita i-a refuzat tot ce solicitase cu atâta smerenie în ora aceea a plecării. Nimic din ceea ce dobândise prin luptă, pentru el şi pentru ai săi, nimic din ce era prevăzut în acea Capitulacion nu i se mai recunoaşte. Niciuna, într-adevăr, nici măcar una din toate acele dispoziţii pe care el le exprimase cu atâta cumpănire şi prevedere în testamentul său nu se mai acordă urmaşilor lui după moartea sa eroică; fără cruţare, îi este interzisă realizarea oricărei dorinţe a sa, chiar a celei mai curate şi mai pioase."

Şi din datoria de a împărtăşi destinul acestui erou intrat veşnic în istorie, întărindu-ne puterile fiinţei din ceea ce geniul său ne-a lăsat moştenire în scurta şi scânteietoarea lui existenţă printre noi, să încercăm să ne asumăm o lecţie importantă de viaţă: "Ceea ce aştepţi să se întâmple influenţează lucrul asupra căruia te concentrezi, iar ceea ce vezi influenţează opţiunile pe care le ai la îndemână ca să schimbi ceea ce vei deveni."

Leadershipul este realitatea pe care trebuie s-o vezi de departe înainte ca ea să te surprindă în mod fatal din cauza unei întâmplări care iese din cotidian.

Numai moartea dezleagă în cele din urmă taina vieţii unui om, dacă ne gândim la faptul că ceea ce Magellan a lăsat moştenire lumii întregi, rostul întregii sale călătorii, a fost o idee. După cum bine scria Ştefan Zweig:

"Mai mult decât oricine altcineva. Magellan a dovedit pentru toate timpurile că o idee, dacă e purtată de aripile geniului, dacă e dusă mereu şi hotărât înainte de o pasiune, se vădeşte la urmă mai puternică decât toate elementele naturii. Magellan a arătat că un singur om, cu scurta şi trecătoarea lui viaţă, poate transforma într-o realitate şi într-un adevăr nepieritor ceea ce fusese numai o dorinţă, numai un vis pentru sute de generaţii."

Dincolo de ce s-a scris şi se va scrie despre opera lui Magellan, fapta exemplară, misiunea şi confruntările cu neprevăzutul pe care el le-a iniţiat, continuând să fie găzduite în memoria timpului, ele sunt o dovadă a interesului viu păstrat pentru opera pe care Dumnezeu i-a pregătit-o numai lui, cu siguranță una demnă de marea scenă de dincolo de orizont. Nu-l vom uita niciodată !

*** Notă:** Stefan Zweig - *Magellan* , Editura Albatros, 1987.

Numai ultima trăsătură de penel contează

On Martie 11, 2012

Caută mai întâi prezența a ceea ce te-a deranjat înlăuntrul tău, și făcând asta mintea ți se va umple de încredere.

Honoré de Balzac a scris o poveste scurtă intitulată "Le Chef - d'œuvre inconnu". Voi rezuma această poveste conform site-ului wikipedia:

Tânărul pictor Nicolas Poussin, încă nu atât de faimos, îl vizită pe pictorul flamand Frans Pourbus în atelierul său. El este însoțit de bătrânul maestru Frenhofer, care comentează cu atenție pe marginea tabloului pe care tocmai l-a terminat Porbus. Tabloul este al Mariei Egiptului, iar în timp ce Frenhofer îi aduce laude, el sugerează că lucrarea pare neterminată. Cu câteva ușoare atingeri de pensulă, Frenhofer transformă pictura lui Porbus astfel încât Maria Egipteană pare să prindă viață în fața ochilor lor.

Deși Frenhofer stăpânea o tehnică aparte, el recunoaște că nu a reușit să găsească un model potrivit pentru propria sa capodoperă, care înfățișează o frumoasă curtezană numită Catherine Lescault, cunoscută mai bine sub numele de La Belle Noiseuse. El a lucrat zece ani la această capodoperă viitoare pe care nimeni nu o văzuse încă. Poussin îi oferă ca model de inspiraţie pe propria sa iubită, Gillette. La rândul ei, Gillette este atât de frumoasă încât Frenhofer este stimulat să-și termine proiectul rapid. Poussin și Porbus vin să admire tabloul, dar tot ce pot vedea face parte dintr-un picior care s-a pierdut într-un vârtej de culori. Dezamăgirea lor îl conduce pe Frenhofer la nebunie, iar acesta distruge tabloul și moare în acea noapte.

Frenhofer, fusese tot mai sfâşiat de neputinţa de a-şi atinge ţinta din pricina descoperirii pe care o făcuse, şi anume că nu există contur, ci doar nuanţe oscilante.

Leadership: Importanța pe care o acorzi propriilor impresii despre cum ai putea să te simţi special, poate să hotărască acea intensitate a emoţiei pe care o consideri inaccesibilă publicului şi pe care o resimţi la nivel de conştiinţă?

Nu este uşor să rămâi fidel valorilor benefice, sută la sută din timpul pe care îl acorzi propriilor nevoi şi dorinţe, mai ales când ştii că trebuie să renunţi la vechile convingeri, la vechile tipare de gândire. Artiştii care abordează totul prin prisma descoperirilor obţinute din roadele propriilor munci, cu trimitere la ceea ce lasă în urma lor, sunt conduşi de valori precum puterea de a se face ascultaţi, recunoaşterea (pretenţia de a fi admiraţi) şi emoţia (acea emoţie de graţie artistică). Nimic nu le poate schimba aceste valori decât eşecul, regretul de a nu se fi ridicat la înălţimea aşteptărilor lor şi, mai ales, la înălţimea aşteptărilor celorlalţi oameni.

Am găsit pe această cale un citat aparţinând scriitorul francez Honore de Balzac: *"Nu contează decât ultima trăsătură de penel."*

Prin asta el dă şi tonul în ceea ce priveşte gestionarea acelei ultime caracteristici trebuincioase omului care aspiră la atingerea excelenţei în materie de leadership. În fruntea mişcării noastre de "reinventare", de adaptare şi de poziţionare a propriei persoane (cu nevoile şi aspiraţiile dar şi cu limitările fireşti) în centrul atenţiei, stă o singură calitate preţioasă: acceptarea.

Înseamnă să accepţi partea ta de contribuţie la situaţiile critice care îţi alterează natura profundă, putând a ajunge chiar la sabotajul propriu. Această calitate "acceptarea", stă la loc de frunte între cele mai trainice pietre de temelie ale leadershipului. Practic, acceptarea înseamnă să-ţi recunoşti lipsa de desăvârşire atunci când eşti pe punctul de a-ţi preamări gloria. Mai înseamnă să te regăseşti sufleteşte într-o operă care nu este neapărat o capodoperă, ci o modestă compoziţie care lasă de dorit.

Conştiinţa pe care te bazezi ca să îţi formezi o personalitate puternică este direct proporţională cu dezamăgirea pe care o experimentezi la nivelul unei constatări care reflectă o realitate incontestabilă.

Ce-ar fi dacă am antrena mai multe "talente", mai multe "genii" în producerea de leadership fără a fi necesare eforturi atât de chinuitoare de a ne eficientiza la maxim resursele proprii?

Tentaţia asimilării unui leadership "industrial" şi a tot ce se petrece pe planul industriei cu leadershipul, o putem sesiza uşor, alteori mai greu, dar întotdeauna definitoriu, în felul în care ne raportăm la descoperirea pe care o facem într-un anumit domeniu şi la felul cum descoperirea poate afecta buna dispoziţie, stima de sine, imaginea individului în mijlocul lumii.

Leadershipul este în strânsă legătură cu descoperirea pe care o faci despre tine însuţi într-un context în care importanţa muncii tale creşte semnificativ. Dar nu întotdeauna importanţa muncii tale hotărăşte ce trebuie să se întâmple pentru ca rolul tău să se diminueze sau să se amplifice. Trebuie ca şi conştiinţa să accepte subordonarea sa altei conştiinţe, iar lucrul acesta mi se pare ruşinos şi impardonabil.

În artă, realitatea de care te înconjori trebuie să fie congruentă cu nivelul interiorităţii pe care îl experimentezi ca un fel de inspiraţie spirituală menită să îmbogăţească dialogul dintre a fi superior şi a te simţi opera propriei tale personalităţi.

Numai ultima trăsătură de penel contează atunci când vrei să-ţi impui o anumită stare de spirit care, sub multe aspecte, te poate face să te simţi superior în ceea ce priveşte profesionalismul şi calitatea operei tale. Când îţi impui atingerea unui anumit target, cum ar fi realizarea unei capodopere durabile, trebuie să-ţi păstrezi o stare de bine potrivită pentru un învingător, o stare îmbucurătoare care, sub orice aspecte ai privi-o, îţi permite construirea unei noi personalităţi în jurul Sinelui.

Un artist deosebit este o personalitate spirituală care rămâne fidelă valorilor ei în orice moment al vieţii.

Numai un sfânt poate să împrumute imaginea unui muritor

On August 16, 2020

Este suficient să parcurgi o poveste cu viaţă, despre viaţă, ca să găseşti o infinită plăcere în actul de a trăi o altă viaţă.

Mă aflu în proximitatea trandafirului, atâta timp cât există admiraţie reciprocă, intrând din ce în ce mai adânc în povestea unui tablou descris de un pictor anonim cu o pensulă plină de viaţă, visătoare, în care domină culoarea sângelui. În episoade delimitate de "va urmă" cred că se înscrie existenţa veritabilă a trandafirului meu, între cea dintâi proiectare a demersului de analiză a operei de artă şi definitivarea ideii de spaţiu al unei frumuseţi aproape ideale.

Atât de sinceră, frumos scrisă, povestea vieţii mele se înscrie cu mult suflet, cu delicateţe, în perspectiva unei neîncetate asemănări cu El, un trandafir cu petale de culoarea sângelui ce se structurează în perspectiva unei teme artistice de mare interes: *Anacredarekr* , însemnând stabilitatea sentimentului de apartenenţă la esenţa naturii impusă prin durata unei stări de spirit cu bogate semnificații din foarte multe unghiuri de vedere.

Eu şi trandafirul meu. Doar noi doi suntem protagoniştii unui spectacol de culori, expresia unui act de valorizare estetică în sesizarea şi în gustarea unei opere de artă explicată printr-o apropiere de harul lui Dumnezeu transpus într-un spaţiu de Creație. Ne unim ceresc şi natural printr-o rugăminte care conţine cuvântul "depărtare", extras parcă din amintirea unui timp suspendat într-o regiune deşertică:

Iată, mă exprim prin gura lui Allah din 1001 nopţi. Allah să coboare asupra-mi binecuvântările sale ! Care-i insul care să nu fi cunoscut urmările dărniciei sale? În ce mă priveşte, ya sidi, apoi de-aş avea eu pe faţa mea şi o sută de guri, şi în fiecare gură câte o sută de limbi, şi pe fiecare limbă câte o comoară de limbuţie, tot n-aş putea să-ţi povestesc aşa cum se cuvine dărnicia cea minunată a domniei sale Abulcassem !

Leadership: Viziunea ta artistică este promisiunea ambiţioasă pe care o faci lumii cu privire la ce vei dezvălui despre tine într-un limbaj specific universului şi naturii căruia nu-i corespunde nimic din viaţa reală?

Calm, răbdător, cu emoţie, îmi păstrez ochii aţintiţi asupra formei de simbolism numită "comparaţie". Continui să privesc la mine cu drag de artă, când realist, când visător, prin reperul vizual al unui ochi care observă drumul spectaculos al unei viziuni artistice expresioniste dinainte pregătit de ideea unei naturi libere care se impune în mod universal la om, pe care spiritul poetic trebuie să o imite jucându-se de-a artistul în mijlocul unui Orient mirific și odihnitor.

Oare privirea mea va putea să garanteze transparenţa totală a acuarelei în altă versiune Alpha şi Omega a naturii?

Atât de sensibili, ochilor de artist le poate fi atribuită, ca punct de plecare pentru identificarea unei viziuni captivante, demne de pus în practica picturii, tocmai puterea de transfigurare a realităţii şi capacitatea de asimilare a luminii în fiecare dintre sufletele receptive care trăiesc "povestea unei lumi pierdute şi regăsite". În limba lui Allah se aude firul poveştii mele, iar paradisul deşertului, întins sub un soare arzător, anunţă fondul comun al descoperirii unei arte de nişă, numită atât de frumos: Sympathia.

Trandafirul îmi citeşte gândurile, le adună printr-o iluminare mistică într-o rugăminte care conţine cuvântul "Fantastic", făcând din ele zvâcnirea culminantă a condiţiei primare a fiinţei mele netulburată de o conştiinţă a vulnerabilităţii estetice. Asemenea unei petale de trandafir luată de vânt care nu cunoaşte nicio silnicie, ci doar lumina palidă a înserării, mă simt transpus într-o nouă dimensiune, într-o limbă ce capătă semnificaţii şi mai neînţelese pe măsură ce se deplasează în direcţia opusă realităţii în care mă raportez la empiric şi raţional, încât totul devine fascinant !

Leadership: Sinele tău răspunde la îndemnul trăirii fervente a sentimentului înalt de manifestare a harului divin disponibil ca model de referință pentru înțelegerea simbolisticii artei?

Iată cu ce îmi delectez mintea şi sufletul: cu înscrierea existenţei unui trandafir în lumea visătoare şi artistică a lumii mele, în sensul pur mistic al cuvântului *Eryosthevia* , însemnând deschiderea omului la lucrarea harului divin. Artisticul, demn de frumuseţea trandafirului, se regăseşte în puterea acestui cuvânt care parcă îndeamnă la visare, înfrumuseţându-l pe om cu harul Sfântului Duh, într-un mod personal şi unic. Iar dacă eu sunt un trandafir, mai sublim decât orice dovadă prin care Dumnezeu ar putea fi cunoscut, asta se datorează faptului că trăiesc în interiorul unui spaţiu al iluminării, între creaţiile pure ale naturii şi creaţiile imaginare ale omului.

Cu atâta naturaleţe şi drag, trandafirul mi-a vorbit cu convingerea că fac parte dintr-o altă lume, mai îndepărtată: *"Încearcă să adormi cu ochii deschiși ca să mă poți visa mai real. Să fiu eu realitatea visului tău."*

Iar eu i-am răspuns ca unui învăţător străvechi care s-a transferat în altă lume: *"Voi încerca să-mi aţintesc privirea asupra visului din care cu greu mă pot întoarce, numai ca să pot îmbrăţişa realitatea unei pensule care îşi manifestă dorinţa de a colora cu empatie o imagine în stare de contur."*

Adevărat. Eu sunt un sfânt, pentru că duhul cuvântului meu (plin de mister) traversează spaţiul ce se întinde de la pământ la cer, şi se reîntoarce sub forma unei imagini pline de emoţie în câmpul unei arte a sensibilităţii, *Aterspesys* , într-un moment când lumea se minunează cât a ajuns ea de departe. Căci numai un sfânt poate să împrumute imaginea unui muritor de rând pentru a se remarca în lumea oamenilor, iar această lume nu diferă prea mult de lumea minunată şi nemuritoare a spiritelor naturii.

Prin simbolistica artei vei primi în stăpânirea ta duhul unui Sfânt cu ajutorul căruia vei putea să comunici cu toate spiritele naturii. Acest fapt denotă înclinarea şi uşurinţa de a trăi un alt plan de existenţă decât lumea pământească.

Numai un sfânt poate să împrumute imaginea unui muritor atâta vreme cât acest sfânt este un artist ce se apropie cu sufletul de zona acuarelei şi a picturii, autentificându-se nu doar ca reper al universalităţii, ci ca o minune a naturii, regăsindu-se el însuşi într-o operă de artă ca element unificator între cer şi pământ, între vis şi realitate, între cultură şi estetic.

Înainte să-mi plăsmuiesc realitatea căreia voiam să-i dau viaţă în paginile cărţilor mele, prin limbajul unei esențialități spirituale, trandafirul mi-a transferat în suflet şi în gând următoarele cuvinte:

Numărătoarea inversă

On Septembrie 02, 2010

Verifică cum progresează aria ta de responsabilitate, detectând starea emoţională, psihică şi comportamentală a oamenilor în momentele decisive.

Depăşiseră prin atâtea primejdii, străbătuseră mări şi oceane, şi încă nu dăduseră de urma căpitanului Grant. Curajul le fusese pus la grele încercări, trecuseră prin toate emoţiile aşteptării, iar acum se şimţeau cu toţii cuprinşi de deznădejde, în special Mary şi Robert, copii căpitanului.

La comanda expediţiei se afla însuşi Lordul Glenarvan, care era conştient că ajunseseră din nou într-un punct mort al căutării. Încă o dată harta după care se ghidaseră în călătoria lor îi condusese pe un traseu eronat, traseu pe care el însuşi îl recomandase. Încă o dată dăduseră greş. Având însă un nemaipomenit entuziasm de care numai adevăraţii aventurieri dau dovadă, fiind încrezător în reuşita misiunii pe care el însuşi o pregătise şi pe care promisese s-o împlinească, s-a adresat micului său echipaj:

- Să avem încredere, prieteni ! Să avem încredere ! Căpitanul Grant nu este cu noi, dar suntem siguri că-l vom regăsi.

Şi asta fusese de-ajuns ca să redea nădejdea şi buna dispoziţie pasagerilor de pe vasul Duncan.

Leadership: Îţi întreţii în mod demn capacitatea de a întrezări perspectiva reuşitei, prin ochii liderului?

În cursul acelei lungi călătorii, toţi membrii echipajului de pe Duncan au continuat să privească totul din perspectiva reuşitei, prin ochii Lordului Glenarvan, mergând acolo unde a dorit el, oprindu-se numai unde dorea el să se oprească, admiţând tot ce spunea el. Şi asta deoarece Lordul Glenarvan a fost îndeajuns de abil încât să le ofere mereu un strop de încredere şi energie mai ales în momentele grele, determinându-i să adopte un comportament activ şi constructiv. Întreaga lui atitudine arăta că era un om puternic atât din punct de vedere fizic cât şi psihic.

În leadership nu există victorie prin renunţare !

Singura cale de a-ţi atinge obiectivele este să-i determini pe oameni să participe la atingerea lor, iar prima ta prioritate în acest sens trebuie să fie aceea de a îmbunătăţi eficienţa muncii lor, şi sporindu-le potenţialul de dezvoltare. Însă atunci când ajung într-o situaţie nouă, sau când se află intr-o mare dificultate, sau când par să bată pasul pe loc, oamenii încep să aibă anumite dubii şi rezerve privind eficacitatea ta ca lider şi capacitatea ta de conducere, iar tu devii în ochii lor un tip mediocru şi slab, căruia nu-i mai acordă nici un respect.

Oamenii nu pot urma curajoşi voinţa celui care nu este capabil să-i conducă eficient într-o direcţie favorabilă lor. Iar în acest caz se poate întâmpla ca toată bunăvoinţa şi interesul lor să scadă atât de tare încât să înceapă să aibă o atitudine duşmănoasă faţă de el. În leadership ori îţi asumi rolul de lider şi îţi îndeplineşti misiunea, ori eşti discreditat.

Liderii înţeleg tâlcul proverbului scoţian “ *Nu poţi fi niciodată legat de vreo promisiune*

făcută în mod nechibzuit. " Promisiunea Lordului Glenarvan s-a înrădăcinat în mintea şi în sufletul echipajului său atât de adânc, încât tot ceea ce făceau decurgea din ea. De nenumărate ori s-au avântat în necunoscut, punându-şi vieţile în pericol – cu gândul, desigur, de a-l găsi pe căpitanul Grant. Şi tot de atâtea ori promisiunea lui cu valoare de angajament a reprezentat un motiv suficient de puternic pentru a-l urma.

Zece, nouă, opt, şapte…

Când semnele unei posibile crize, cu tot ceea ce implică aceasta, sunt tot mai evidente, starea sufletească a oamenilor devine tot mai imprevizibila ajungându-se la indignare şi revoltă. Răbdarea tuturor celor de pe vasul Duncan a fost pusă la grea încercare, când, după luni întregi de călătorie, ajunseră tocmai pe coasta Americii de Sud, fără să fi găsit nicio urmă care să indice locul în care s-ar fi aflat căpitanul Grant.

În acel moment, disperat şi frustrant, cu greu Lordul Glenarvan a putut domoli spiritele. A reuşit totuşi prin vorbele sale pline de speranţă şi prin tonul său plin de curaj şi ardoare, însă probabil era pentru ultima oară. Căci din acea clipă toţi membrii echipajului "au pornit" numărătoarea inversă. Daca nu reuşeau să dea de urma căpitanului cât mai repede, acel ultim dram de încredere pe care i l-au acordat ar fi dispărut în totalitate. Şi în consecinţă raporturile dintre ei s-ar fi alterat definitiv.

Nu-i poţi lăsa pe oameni prea mult în stand-by !

Oamenii nu se pot încuraja singuri. Ca lider nu te poţi aştepta ca ei să se umple de curaj şi să se propulseze singuri înainte. Este sarcina ta să-i încurajezi şi să-i ajuţi să-şi atingă potenţialul oferindu-le energia să meargă mai departe atunci când se opresc din cauza unei greşeli. Însă nu-i poţi lăsa pe oameni prea mult în "stand-by" căci ei sunt mari consumatori de speranţă. Nici excesiv de optimist nu poţi să fii şi sa spui: " *Vom aştepta oricât va fi nevoie.* "

Oamenii, cu toate convingerile lor, se aliniază misiunii tale până la un punct. Căci, categoric, există un punct limită până la care sunt dispuşi să te urmeze, punctul în care numărătoarea inversă ajunge la 0. Atunci ei decid dacă merită să-ţi acorde încrederea şi să te urmeze mai departe sau să te părăsească definitiv. Îşi vor pune întrebări de genul: Unde ne duce tipul ăsta? Merită să-l urmăm? Vom fi în siguranţă alături de el? Apoi, cu toată fermitatea vor alege cea mai convenabila variantă.

Concluzie: Din momentul în care ai devenit lider începe numărătoarea inversă. Depinde de tine când se va ajunge la zero, acest punct însemnând victoria sau eşecul.

Pe tot parcursul "drumului", mai ales în situaţiile critice, tu eşti factorul mobilizator care întreţine entuziasmul, speranţa şi atitudinea proactivă a echipei. Chiar şi-n momentele când tu însăţi ţi-ai pierdut speranţa, nu te exterioriza în faţa echipei, ci insuflă-le încredere oamenilor, şi în acelaşi timp, străduieşte-te să găseşti rapid soluţii de ieşire din criză.

Verifică cum progresează aria ta de responsabilitate, detectând starea emoţională, psihică şi comportamentală a oamenilor în momentele decisive.

Numărul unu

On Februarie 22, 2010

Dezvoltă trăsăturile dominante ale caracterului tău, tratându-te pe tine însuţi ca sursă a modelării celorlalţi oameni.

Mai rămăseseră doar cinci în viaţă. Iar rechinii, care deveniseră mai „deştepţi" în urma experimentelor, inundaseră aproape întreg laboratorul submarin, Aquatica. Aproape că îşi pierduseră cu toţii speranţa. Russell Franklin, acţionarul de baza a laboratorului, care în trecut reuşise să salveze un grup de persoane într-o avalanşă din Himalaya, încercă să calmeze spiritele:

- Trebuie să găsim o modalitate de a ieşi de aici. În primul rând trebuie să…

Nici nu termină de spus tot, că dintr-o dată, preţ de o clipă, unul dintre rechini, făcu un salt din bazinul care făcea legătura cu exteriorul şi îl înşfăcă cu totul.

Senzaţia de teamă se amplifică. Tom Scoggins, simţi imediat fiori de gheaţă pe şira spinării, bătăile inimii i-o luară razna la vederea acelei scene de groază. La fel ca orice om care se simte în pericol, în el se declanşase o reacţie de tipul "rămâi nemişcat". Era, fără nicio îndoială, într-un moment de slăbiciune extremă.

- L-a mâncat, Isuse ! Nu mă mişc de aici. Nu mă mişc de aici. Cineva ne va veni în ajutor. Ne vor scoate de aici şi totul va fi bine. Nu mă mişc de aici. Înghesuindu-se într-un colt, adunat, strâns, copleşit de emoţii negative, cuprins de teama ca va împărtăşi aceeaşi soartă ca şi Franklin.

Leadership: Îţi exerciţi puterea asupra altor oameni, trezindu-le stimulii pozitivi?

Oamenii care au aptitudini de lider ies la iveală tocmai în astfel de momente dificile. Carter Blake, antrenorul de rechini, n-a rămas indiferent. Ci de cum a observat că Tom s-a panicat, s-a apropiat de el, i-a vorbit şi l-a încurajat, făcându-l să înţeleagă că dacă vă rămâne ţintuit în acel loc are mai multe şanse să moară decât dacă îl urmează pe el. Apucându-l de mâna dreaptă pe Tom, l-a ajutat să se ridice şi şi-au continuat drumul mai departe.

Unui om îi este greu să trăiască fără nicio speranţă. Alţii au prea multă. Carter Blake i-a fost dat lui Tom în locul speranţei, pentru că avea fermitatea care lui îi lipsea. Avea ceva superior în el, avea un curaj ieşit din comun pe care l-a dovedit de nenumărate ori, fapt care l-a determinat pe Tom să-şi pună imposibila salvare în mâinile lui.

Schimbarea nu se produce singură, ci vine prin implicarea oamenilor în acţiune. Prin puterea geniul său aventuros, datorită atitudinii sale de tipul „ *câştigă cu orice preţ* ", Blake l-a adus pe Tom pe calea cea bună, iar conştiinţa i-a dat acestuia puterea de a continua.

Cultura ta de leadership se reflectă cu precădere în atitudinea ta?

Viitorul lui Tom şi a celorlalţi supravieţuitori a depins în totalitate de un singur om, Carter Blake, numărul unu în toate. Numărul unu când venea vorba de curaj, numărul unu când venea vorba de asumarea răspunderii, numărul unu când venea vorba de fermitate, de luarea

iniţiativei, de prezenţă de spirit şi ingeniozitate. El era singurul capabil să-i salveze. Era singurul care îşi cunoştea adevăratele sarcini. Şi, socotindu-se destul de puternic, nu a ezitat să-şi pună viaţa în pericol pentru ceilalţi, flerul ajutându-l enorm în alegerea celei mai bune căi de urmat.

Aşa cum un braţ amputat este înlocuit de o copie perfectă a membrului lipsă, tot astfel tu, prin puterea ta de influenţă poţi să înlocuieşti slăbiciunile oamenilor cu speranţe şi să-i determini să acţioneze în concordanţă cu gândirea şi atitudinea ta.

Tu poţi să preiei controlul asupra emoţiilor oamenilor şi să contracarezi efectele negative ale schimbării? Oamenii au încredere în tine? Ai puterea să-i convingi pe oameni că lângă tine mai au o „şansă”? Îţi dovedeşti prezenţa de spirit şi îndrăzneala în situaţii dificile? Ai capacitatea să preiei controlul asupra emoţiilor lor, să le revitalizezi energiile şi să-i scoţi din acel punct, deseori paralizant, care îi împiedică să acţioneze?

Numărul unu este personajul care are multă stăpânire de sine, care nu se pierde în situaţii critice şi care găseşte rapid soluţii de a ieşi din orice impas. Este acela care reuşeşte să mobilizeze oamenii dându-le încredere şi curaj pentru a depăşi momentele grele prin care inevitabil trec. Tu eşti un astfel de om?

Gradul în care te construieşti pe tine însuţi ca sursă a modelării celorlalţi oameni (după gândirea şi atitudinea ta) te ajută să-ţi dezvolţi trăsăturile dominante ale caracterului tău. În consecinţă, fă în aşa fel încât oameni să te perceapă ca fiind „componenta” cea mai fiabilă şi mai eficientă a întregului lor potenţial.

Source: https://neculaifantanaru.com/numarul-unu.html

Numele nostru va dăinui mai departe

On Ianuarie 02, 2024

Fii modelul percepţiei sacre a timpului, creând o operă care transcende imediatul și stabilește o relație între conștientizare și raportare la eternitate.

"Sunt în camera mortuală a faraonului. Schelete multe. Gramofonul nu mă ajută. Munca e grea. Te face să te gîndeşşti la nemurire. Pentru omul de rând, îmi închipui, noțiunea egipteană despre nemurire este cea mai aiurită superstiție. Dar asta numai pentru că ideea noastră despre viaţa eternă s-a schimbat, indiferent dacă suntem sau nu creştini. Deşi suntem de acord cu ancestorii noştri de pe Nil că nemurirea este cea mai importantă realizare a omului (mai importantă decât iubirea sau o vagă reputaţie a virtuţii, de departe mai presantă decât prietenia), nu suntem atât de nebuni să ne închipuim că o să ne fie transportate corpurile în viaţa de apoi.

Folosim un vocabular diferit, salvarea sufletului, slava veşnică. Spuneţi-i cum vreţi, dar să faci ca numele tău să răsune mai departe, după ce numele inferiorilor şi torţionarilor tăi s-au stins de mult, ăsta-i un lucru pe care cu toţii îl sperăm în continuare. Și, lucrul cel mai delicios dintre toate, să faci să se întâmple acest lucru înainte ca vieţile lor fizice să se sfârşească, ca să simtă cum ultimele firicele din numele lor se spulberă în vreme ce ei încă respiră şi conştientizează că atunci când scheletul lor putrezit va fi descoperit şi aruncat în pământ, vor fi deja o grămadă anonimă de păr și de piele, îndreptându-se voios spre a deveni pulbere anonimă de carbon, în vreme ce alţii dintre noi vor deveni sori şi stele.

Leadership: Reputația pe care ți-o clădești te ajută să conștientizezi puterea de a face ca numele tău să persiste în amintirea lumii, știind că reprezentarea ta în societate este oglinda valorilor, acțiunilor și contribuțiilor tale?

Nu ştiu pe nimeni care să nu aspire la această permanenţă, chiar dacă susţin că n-o fac. Lumea e plină de arcuri de triumf şi de juniori nu-știu-cum, artiști care trăncănesc stresaţi să ştie că opera lor va dăinui, poeţi care se sinucid ca să-şi asigure faima, vorbe rostite cu limbă de moarte şi testamente care încearcă să-i controleze pe moștenitori, nume citite anual în biserici şi sinagogi, pietre de mormânt împopoţonate şi declaraţii de dragoste pe patul de moarte, testamente și donaţii nominalizate, bani lăsaţi partidelor politice şi organizaţiilor de caritate. Cu toţii încă suntem foarte egipteni, fără îndoială.

Nu sunt idiot. Când va veni vremea, ştiu că o să fiu mort. N-o să-mi plimb degetele pe corzile unei harpe înaripate şi nici măcar (așa cum plănuisem ca băiat) n-o să savurez delectările fierbinţi, carnale ale unei lumi de dincolo mărginite de palmieri, păzită de Anubis și asistată de Isis. Vorbesc de ceva mai uşor, mai fin, mai inatacabil şi inepuizabil din punct de vedere intelectual şi spiritual. Nemurirea pentru noi, deşi vă fi acorporală, nu este fără conştiinţă: conştiinţa, în chiar momentul expirării corpurilor noastre, că numele nostru va dăinui mai departe."

Leadership: Realizarea unui scop nobil și menținerea unei reputații virtuoase îţi oferă posibilitatea de a contribui la perpetuarea numelui tău și la perenitatea impactului tău asupra unei imagini care se perpetuează?

Cu grijă și virtute, cu o înţelepciune de depăşeşte tinereţea, vei putea să-ţi clădeşti o reputație durabilă, asigurându-te că amprenta ta pozitivă va continua să răsune glorios în lumea celor din jur, chiar și atunci când trupul tău pământesc se va stinge. Mai ales prin aspirația către virtute și prin trăirea în concordanță cu valorile spirituale (cunoaşterea, iluminarea, libertatea, armonia), vei putea crea o legătură profundă cu lumea, asigurându-te

astfel că semnificația numelui tău va persista în conștiința colectivă, chiar și după ce treci dincolo de granițele vieții fizice.

Nu uita că prim-planul în care îţi detaliezi imaginea, într-un decor al înţelepciunii înaintate, îţi va permite să evidențiezi cu precizie trăsăturile esențiale ale caracterului tău și să evidenţiezi aspectele care vor captiva privitorii imaginii tale. Pentru asta e nevoie de o viziune de ansamblu simetrică și armonioasă. Practic trebuie să imprimi imaginea sinelui tău în linia orizontului vizual al celorlalţi prin intermediul simbolismului, marcând un reper vizual, un loc al memoriei colective, emițând totodată un sentiment de unitate cu zeii, cu natura, cu aştrii sau cu ancestorii.

Însăşi imaginea ta trebuie să exploreze o posibilă istorie, o poietică a receptării înnoitoare și a spațiilor de expunere ale artei, adăugând compoziții vizuale precum accesorii indispensabile ale artei. Fii modelul atenției și percepţiei vizuale, creând opere care transcend imediatul și stabileşte o relație între simetrie și conștientizare. Oferă spiritului de observație, memorie vizuală și deschidere către imagini superioare cu o gamă coloristică deosebită și un contrast uluitor.

Leadership: Poţi oferi o expunere rapidă a existenţei lor în lume, încercând să emiţi sentimentul de distanță sau apropiere faţă de imaginea unei suprafiinte înzestrate cu nemurire?

Istoria ne spune că mulţi lideri au ţinut să exploreze o expunere rapidă a existenţei lor în lume, încercând să emită sentimentul de distanță sau apropiere faţă de imaginea unui zeu suprem, prin tonuri și efecte de reflecţie în imaginea construită. De exemplu, observand pictura realizată de Jacques-Louis David, celebra piesă de muzeu "Bonaparte traversând Marele Saint Bernard", imediat ne dăm seama cât de precis a fost conturat generalul după instrucţiuni clare (demne de un conducător plin de înţelepciune).

Se spune că David a vrut să-l picteze ca pe un erou cu sabia în mână, pe câmpul de luptă. Bonaparte însă a rostit cuvintele memorabile: *"Nu ! Cu sabia nu se câştigă bătăliile, vreau să fiu pictat liniştit - pe un cal nărăvaş".*

Închină-ţi viaţa sublimului, pentru ca leadershipul tău să prindă viaţă şi să reziste în timp, explorând vizibilitatea de dincolo de prezent, prin făurirea unei imagini glorioase ce poartă pecetea originii tale divine. Practic, imaginea ta marchează linia orizontului și separă realitatea de interpretare prin atingerea și valorificarea rezultatelor tale obţinute într-un anumit domeniu, sau printr-o poziţie fruntaşă. Ai grijă cum îţi conturezi imaginea, încât să fie mai mult decât glorioasă, să fie memorabilă și inspiratoare pentru cei din jur.

Leadershipul face apel la salvarea sufletului și la căutarea slavei veșnice, servind ca o amintire a responsabilității tale de a contribui la o moștenire pozitivă, marcându-ţi prezența în istoria umanității.

Numele nostru va dăinui mai departe dacă caracterul și atitudinea noastră vor fi bine impregnate într-o imagine care reflectă dimensiuni metafizice cu o încărcătură spirituală aparte, întrucât aceasta devine, mai întâi de toate, o fereastră către profunzimile ființei noastre interioare.

O antologie a literaturii fără frontiere

On August 05, 2018

Lărgeşte-ţi orizonturile de reprezentare a artei din care ţâşnesc, inseparabile, forma şi conţinutul, din perspectiva unui personaj care îşi joacă rolul într-o operă înscrisă pe linia de destin pe care tu singur o alegi.

Într-un fel, trebuia să mă asemăn cu cineva la fel de experimentat ca mine în arta scrierii fără cusururi, fără a exista dubii asupra înțelesului ei, astfel încât lumea să vadă valoarea unei îndeletniciri alese fără să se împiedice de numele autorului şi de titlurile lui. Din alt punct de vedere opera mea, substituită efortului de a mă considera un fel de demiurg care dă sensuri profunde şi infinite condiţiei umane prin limbajul artei, s-ar spune că era lucrată din materialul "non finito" al unei realităţi asociată unei zone de constrângere obiectuală aflată la frontiera dintre concepţia spaţială a picturii şi promisiunea alterităţii.

Ansamblul resorturilor adânci ale operei unui artist se studiază prin determinarea de a substitui realitatea dată cu o experienţă de viaţă fabricată sau preluată din alte părţi. Ca un neobosit în căutarea perfecţiunii imortalizate prin creaţie, încrezându-mă prea mult în forţele proprii şi având puterea de a distinge între finit şi infinit, între cer şi pământ, între depăşirea de sine şi stabilitatea în orice ţine de emoţiile privirii în urmă, am nimerit pe terenul unei acceptări generale, dar una bazată pe negarea nevoii de relaţionare prin dialogurile cunoaşterii ştiinţifice.

Era ca şi cum întreagă lume ar fi aşteptat în secret şi fără băgare de seamă exact opera unui tânăr nonconformist ce poate satisface năzuinţele ferecate ale lumii, într-o manieră revoluţionar-eliberatoare, dar fără ca el să prezinte şi spaţiul concret al imensităţii schimbătoare definit prin *L'esprit De Finesse* . Asta este echivalent cu o lovitură ţintită - prin cuvântul mântuitor - în preaplinul unei vieţi care refuză să intre într-o grilă de interpretare prea strâmtă, realitatea neputând fi integrată de-a-ntregul în contextul metalimbajului unei ştiinţe spirituale.

Devoțiunea totală față de idealuri eterne transformă hazardul în revelație, creând un limbaj expresiv ce îmbină originalitatea cu profunzimea simbolică.

Romancierul și dramaturgul rus Ivan Sergheievici Turgheniev îşi punea la un moment dat întrebarea: Ce exprimă Don Quijote? Răspunsul lui nu a întârziat să apară: *"Don Quijote reprezintă credinţa în ceva etern, nestrămutat, credinţa în adevărul care se află în afara omului, un adevăr greu de pătruns care cere slujire şi jertfe, dar care este accesibil unei totale devoţiuni şi puteri de sacrificiu."*

Momentele cele mai semnificative de afirmare a expresivităţii limbajului meu, rezultat din sfera stilistică a comparaţiilor distincte, se raportează doar la locul unei subtile ambiguităţi care lăsa liber teritoriul oricăror posibile interpretări. Omul nu mai este văzut ca o manifestare a hazardului, ci ca revelare a unor conexiuni cu ocultismul, cu mediul simbolic înconjurător, cu arii stilistice şi tematice diferite ale artei înscrisă pe coordonatele unei originalităţi de expresie indiscutabile, a unei autenticităţi poetice revelatoare.

Leadership: Îţi testezi priceperea de a transforma obiectul artistic într-un caleidoscop de trăiri și senzaţii, regândind radical subiectul artei tale din nesfârşita perspectivă a unui singur individ care nu poate recepta şi interpreta just realul?

Intervenţia mea în realizarea efectivă a cadrului de "mister" particular nu numai că situează

arta la un nivel de exprimare unic, original, lăsând în urmă ceva care nu fusese încă scos din tipare, dar dobândeşte o nouă dimensiune de percepţie a realităţii şi o actualitate reînnoită prin semnificaţiile pe care le dezvolt. Obiectul artistic este cartea rară, greu de înţeles şi de acceptat, evidenţiind acel liant absolut trebuincios între o cultură de elită şi una de masă.

Priviţi cum reuşesc să creez un efect tulburător dintr-o culoare intensă exprimată prin cuvântul "non finito", ca simbol al spaimei în faţa trecerii timpului, urmând să-i dau valoarea specifică unui obiect ce capătă în umbră un aspect misterios, altceva decât ideea de destin la care se raportează Don Quijote însoţindu-mă ca un devotat tovarăş spre mine însumi.

Mai întâi asociez trăirea unei experienţe de viaţă unică cu necesitatea unei solidarităţi efective purtată faţă de libertatea de expresie, reprezentată prin refuzul de a mă conforma cerinţelor societăţii în spaţiul plin de taine a unui Don Quijote, purtător de semnificaţie intrinsecă. El contrazice şi combate pe toată lumea cu tot entuziasmul de care dispune un artist în căutarea identităţii care trăieşte în şi prin diferenţă, nu în ciuda ei.

Atâta timp cât îi voi permite nevoii mele de a avea dreptate să vă condiţioneze "starea de a fi" prin oglinda iluziei, respectiv condiţia de a fi mai presus de mine, veţi fi incapabili să rămâneţi deschişi în faţa ideii de poveste.

Literatura se hrăneşte dintr-o asemenea obsesie a confruntării timpului uman cu promisiunea alterităţii, părând a avea efectul unei experienţe de viaţă limitate la sfera lumii artistice care îşi reneagă asprimea printr-o nebunie neînţeleasă de nimeni. Nebunia intimă a omului, cu sarcasmul şi lecţiile ei de etică, este singurul lucru care contează în căutarea înţelegerii adânci a întregului numit "univers paralel", ca un fel de suspendare între plauzibil şi ireal, între firesc şi misterios.

Leadership: Te poziţionezi în limitele unei judecăţi care tinde spre explicaţii cauzale stringente, fără a reprezenta interesul de durată al artei pentru creaţia unei experienţe cu adevărat spirituală?

Îmi vine în minte numele Machiavelli, despre care scriitorul român Alexandru Balaci spunea la un moment dat: *"A fost un umanist în sensul că, în centrul atenţiei sale lucide, a pus întotdeauna omul şi nu entitatea. Dar totdeauna luciditatea sa politică, vigoarea raţionamentului s-au aliat cu elanul scriitorului artist. Aceasta explică coerenţa fundamentală, logica, şi caracteristica operei sale. Machiavelli nu a fost un speculativ, dimpotrivă, opera lui se caracterizează printr-o adevărată evadare din metafizic şi abstract."*

Dacă mă privesc din perspectiva unei aprecieri a experiențelor estetice care se încrucișează și se suprapun reciproc, ca raporturi de forţe simbolice, de elanuri şi calităţi emoţionale, indiferent cum trăiesc înţelesurile lucrurilor, ajung să funcţionez ca un personaj de ficţiune care totuşi se vede în afara propriei lumi. Străpuns fiind de un spaţiu ştiinţific, în care raţiunea se împleteşte cu imaginaţia, mă integrez în expresia trăirii unui nou timp al constituirii unei conştiinţe artistice care nu face niciodată concesii în faţa prostului gust.

Machiavelli n-ar permite ca înţelepciunea şi virtutea experienţei sale să-mi lezeze stilul cu perceperea reală a greşelilor atinse de insubordonare în faţa vreunei autorităţi critice, imperative, morale, sau în faţa asalturilor exegetice spectaculoase. Asta, chiar dacă mi-am îngăduit adesea să mă raportez la expresii care nu aparţin neapărat de metaforă, ci de sincretismul mai multor modalităţi de a gândi realitatea, în care expresiile se asimilează cu reprezentările de alt ordin, nesenzoriale.

Un curaj de dincolo de mine, ce nu poate fi decât divin, mă autentifică într-un spaţiu al diversităţii de idei drept un beneficiar al multor distincții ce-mi recunosc întâietatea în planul

unei creaţii de dincolo de rigorile timpului.

Virtutea de a efectua evaluarea apartenenţei mele la un soi de determinare ascunsă pe care numai Universul pare s-o provoace, considerându-mă privilegiat în faţa vederii de dincolo de granița vizibilă a acestei lumi, este circumscrisă unei sfere de cuprindere a unor spații vaste, aparent nemărginite, de simţire, de spirit şi de percepţie a afinităţilor cu personajele altor scriitori.

A crea o literatură de o mare forţă a limbajului înseamnă să asiguri trecerea de la reprezentarea figurativă a realităţii la exprimarea esenţei lucrurilor reînnoite în planul unei arte care îşi ia drept orizont teoretic sfera interacţiunilor umane în contextul afirmării unui spaţiu simbolic, autonom şi privat.

O antologie a literaturii fără frontiere afişează în mod diferit îndemnul pentru a scrie, ca act de eliberare de sub povara sentimentelor de apartenenţă la o tendinţă sau la un curent anume, trăite de un artist încercat de povara unui secret de nemărturisit care face presiuni spre a fi comunicat printr-o esenţializare simbolică.

O artă într-adevăr de mare viitor

On Ianuarie 15, 2010

Comunicarea emoționantă poate sublinia impactul cultural și social al unei opere de artă.

Studioul organiza la acel moment o vizionare cu un prim montaj al filmului. Au fost invitați scriitori, ziarişti, conducători ai marinei militare. Era de faţă și revoluţionarul marxist Lunacearski. Regizorul rus, Serghei Eisenstein, îi salută pe rând pe oaspeţi și le mulţumea că au venit. În timpul proiecţiei domni o liniște emoţionantă. Când se aprinse lumina, tăcerea nu fu întreruptă de aplauzele obișnuite. Spectatorii şedeau pe scaune muți de emoție și nemişcaţi.

Deodată, Lunacearski se urcă sprinten pe un scaun și începu o cuvântare entuziasmată: *„Am fost martorii unui eveniment cultural istoric. S-a născut o nouă artă. Începând de azi, arta filmului devine o artă într-adevăr de mare viitor…"* Vorbi scurt, dar foarte frumos. Abia atunci porniră aplauzele.

Leadership: Îți focusezi atenția asupra echilibrului și armoniei în timpul creației artistice, așa încât momentul de importanță istorică surprins de tine să evidențieze puterea artei de a inspira profunzimea trăirilor umane?

Procedura de vizionare a unui film presupune un montaj atent și detaliat al filmului. Regizorul, revendicând idei exprimate în formă artistică, folosește diverse instrumente (precum muzica, scenografia, dialogurile subtile și simbolismul vizual) pentru a obține informații relevante despre personajele sale. Este important să se mențină o atmosferă calmă și profesionistă pe tot parcursul creaţiei, ca şi când toţi ar lua parte la un eveniment cultural istoric. După o primă evaluare a filmului, toți cei implicați în procesul de distribuție cinematografică pot stabili un plan adecvat de lansare şi promovare, prin intermediul unei cuvântări entuziasmate.

Comunicarea eficientă și emoționantă dintre regizor și renumitul revoluționar, printre ceilalți oaspeți, a marcat un moment de importanță istorică prin faptul că a subliniat impactul filmului ca instrument de schimbare culturală și socială, dar şi prin faptul că a evidențiat puterea artei de a inspira și de a mobiliza schimbări sociale semnificative. La final, aplauzele au pornit, confirmând impactul profund al evenimentului, prin faptul că acea cuvântare a demonstrat capacitatea liderilor culturali și politici de a colabora pentru a genera schimbări durabile în societate.

Leadership: Cum poţi ajusta procesul de organizare a unui eveniment cultural istoric, pentru a reflecta tăcerea emoționantă a spectatorilor?

Procesul de organizare a unei vizionări de film include mai multe etape distincte, de la analiza scenariului la montaj și proiecție. În fiecare fază, echipele colaborează pentru a asigura că filmul final îndeplinește specificațiile inițiale. Documentația detaliată este esențială pentru succesul evenimentului, facilitând comunicarea între diferitele părți implicate, cum ar fi scriitori, ziariști, și conducători. O liniște emoționantă poate domina sala în timpul proiecției, reflectând tăcerea emoționantă a spectatorilor, care rămân nemișcați de emoție.

Deodată, un participant se poate ridica și începe o cuvântare entuziasmată: *"Suntem martorii unui eveniment cultural istoric. S-a născut o nouă artă. De acum înainte, arta filmului va avea un viitor luminos."* Această recunoaștere poate veni scurt, dar impactul ei va fi profund, declanșând aplauze și confirmând importanța acestui nou mediu artistic.

Leadershipul își menține calitatea de extensie a Creației inițiale, doar dacă Creatorul devine martorul unui eveniment istoric transpus într-un act artistic de mare amploare și semnificație.

O artă într-adevăr de mare viitor derivă din acel act de creație care emoționează spectatorii prin capturarea unui moment de importanță istorică și prin prezentarea lui într-o formă profundă și evocatoare. Un film de succes poate declanșa reacții entuziaste și aplauze, confirmându-i importanța artistică, iar emoția spectatorilor poate crea o atmosferă de tăcere profundă în timpul proiecției filmului.

Evenimentele artistice de amploare pot întări rolul liderului cultural, văzut ca martor al unui act artistic remarcabil ce îi consolidează rolul de agent al schimbării.

O breşă în zidul impenetrabil al omului

On Martie 17, 2013

Dă o notă aparte personalităţii tale, fără să abandonezi acea aprofundare analitică a "Omului" din tine.

Eram bântuit de gânduri esenţiale venite nu ştiu de unde, nici cum. De acele gânduri nemărturisite ascunse în taina unor şoapte aruncate-n timpul nopţii, până când i se năzare câte unuia, neliniştit, să alunece din clepsidra unui ceas invizibil, ca apoi să dispară în neant. Nu mi se mai întâmplase niciodată aşa ceva. N-am fost în stare să percep nimic pe-atunci.

Astfel, ajungeam la explicaţii pur ştiinţifice, cauza unei doze variabile de subiectivitate, dar care nu spuneau nimic despre existenţa vreunui fenomen al retrăirii unor sentimente inacceptabile sau despre natura vreunui fenomen social.

Ce explicaţie puteam să dau acestui fapt spontan, acestei uniuni simbolice absolute, şi totuşi fragile, cu vreo altă experienţă extraordinară şi revelatoare care mă impulsiona să fiu ceea ce sunt? Mă simţeam de parcă ar fi trebuit să concep o poezie autentică din visele unei existenţe obscure, înduioşătoare şi meditative, a cărei esenţă, locuind ca un martor tăcut în centrul unui univers finit, nu putea fi cuprinsă şi înţeleasă decât prin intermediul credinţei într-un fantezist „adevăr superior".

Leadership: Poţi să traiesti la limita conștiinței îmbrățișand neliniștea interioară ca pe un catalizator al evoluției, astfel încât să transformi îndoiala în noi perspective asupra potentialului tău de a transforma aparentul non-sens în surse de inspirație?

Totul în mine exprima o adâncă nelinişte, ca un semnal de alarmă. Un torent de lumini şi umbre care ricoşau fără încetare în "semnificativ", în tot ceea ce mă reprezenta ca om, îmbogăţindu-mă cu noi ecouri, cu noi nuanţe, cu noi sensuri ale unei vieţi susceptibile de o evoluţie fără precedent, cu noi perspective asupra conştiinţei – pe care în starea de "trezire" nu le acceptam ca fiind reale.

De parcă m-aş fi situat în vecinătatea unei linii de înaltă tensiune care risca să se prăbuşească, iar această prăbuşire necontrolată tindea să producă alte efecte decât cele avute în vedere iniţial. Era ceva periodic. Bizar, intram într-un *stand-by* alunecos, într-un fel de aşteptare de dinainte ca totul să se petreacă, o aşteptare nedefinită a ceva ce nu ştiam când se va termina. Când visezi se întâmplă să suporţi realitatea prin intermediul unei ficţiuni care funcţionează după logica non-sensului.

Leadership: Îţi poţi asuma izolarea într-un destin ieşit din comun sub aspectul unui urcuş spre desăvârşire care nu cunoaşte decât limita recunoaşterii unui adevăr superior?

Trebuie să fi existat ceva, izolarea, impresia de irealitate, ca aceea dintr-un castel medieval olandez bântuit de duhuri rele, în comparaţie cu modul în care percepeam ceea ce mi se întâmpla. Evenimentele din jurul meu, trecerea timpului şi evoluţia mea. Şi poate ceva mai profund, un fel de sfâşiere, o breşă în zidul aparent impenetrabil al Ego-ului meu.

Eram mai aproape de adevăr decât presupunem la început. Mă agita acest *imprévisible* cu multe faţade, această uşoară maladie a neobişnuitului, greu de diagnosticat, greu de tratat în faze avansate, această tensiune ciclică care mă consuma, perturbându-mi profund existenţa. De fapt, situaţia prin care treceam putea fi percepută drept urcuşul spre o desăvârşire care a

început cu izolarea într-un teritoriu aseptic al imaginaţiei sterile şi se continua cu un mic şiretlic al Egoului, o programare a conştientului de a privi numai prin filtrul "trezirii dintr-un vis foarte viu". Încă mă întreb cum a putut mintea mea să creeze o poveste aşa de ciudată.

Înlănţuit în mijlocul frământărilor interioare pe care nu le putem exprima cu uşurinţă, descopeream de fiecare dată câte ceva nou în legătură cu mine însumi. Lucrul acesta se întâmpla încetul cu încetul, pe măsură ce-mi scăpa întâmplător câte un gând din acela tentant care îţi face cu ochiul numai în starea de transă.

Leadershipul este actul de a forja o identitate autentică, ghidată de intenția de a da sens frământărilor, eliberându-te de limitele mentale impuse de percepția convențională asupra societății.

Astfel am ajuns să trec printr-o perioadă decisivă de tranziţie a vieţii, a cărei undă de rezonanţă încă mai freamătă cu intensitate în mine.

Nu trebuia să abandonez nicidecum acea aprofundare analitică a "Omului" din mine, cu luminile şi umbrele lui. Ci, să încerc să dau formă gândurilor care mă loveau, ca fierarul care bate fierul înroşit în foc, să le atribui un anumit înţeles, superior, încât să mă ajute să mă asum pe mine însumi, să scot la iveală şi să valorific partea necunoscută din mine.

Singurul adevăr care m-a înfiorat profund, principiul esenţial de viaţă care m-a eliberat dintr-o închisoare mentală, dintr-o cuşcă imaginară care ardea mereu cu aceeaşi putere, singurul soare accesibil doar minţilor înalte, a fost următorul: atitudinea și intenția cu care adresam întrebări și căutam răspunsuri la tot ce mă frământa îmi influențau în mare măsură fondul percepţiei realităţii numite societatea umană.

Leadership: Există cu adevărat o "stângă" și o "dreaptă" în tot ceea ce te defineşte, puse pe seama unei vulnerabilităţi care nu favorizează acţiunea bazată pe mai multe planuri temporare?

Treci printr-o perioadă de tranziţie decisivă pentru viaţa ta? Totul în tine exprimă o adâncă nelinişte? Ai senzaţia că intri într-un fel de aşteptare nedefinită a ceva ce nu ştii când se va termina? Eşti lovit de impresia de irealitate? Ce înţeles poţi atribui gândurilor care te lovesc neîncetat? Simţi că eşti înlănţuit în mijlocul unor frământări pe care nu le poţi exprima cu uşurinţă?

Acolo unde nu se vede aproape deloc o urmă, un indiciu, un semn distinctiv, sau măcar un efect al propriilor tale manifestări, acolo unde pur şi simplu nu îţi poţi focaliza interesul asupra propriei tale cunoaşteri şi înţelegeri nu se poate înregistra niciun progres, nicio întregire a "tabloului" care dă notă aparte personalităţii tale - în luxurianta existenţă a evenimentelor.

Acest lucru denotă faptul că nu există cu adevărat o "stângă" și o "dreaptă" în tot ceea ce te defineşte, ci mai degrabă, ceea ce se poate numi un *stand-by* , o aşteptare nedefinită a ceva ce nu ştii când se va termina. Stanga si dreapta simbolizeaza doua sensuri alternative de strabatut spre atingerea unui anumit nivel de conştientizare a realităţii, dar ele nu se pot concretiza intr-o singura valoare numita "indice flux de eveniment" care sa pretinda o permanenta concentrare asupra actiunii directe.

A te cunoaste mai bine inseamna sa-ti cultivi abilitatea de observator profund, evitând să judeci aspru experiențele nefamiliare care ar putea inhiba creșterea ta ca lider.

Fii în concordanţă cu facultatea excepţională de a fi un observator profund al realităţii care te iniţiază în a te cunoaşte, fără să arunci lumini necruţătoare asupra tuturor aspectelor nemaiîntâlnite în existenţa ta care ar putea să exercite o dominare nefavorabilă. Doar astfel vei putea să dărâmi orice zid din drumul sinuos spre desăvârşirea potenţialului tău.

Vei putea să dai ultimele lovituri de spadă în apusul a ceea nu te reprezintă, acelei forme indispensabile de experienţe de viaţă, săracă în conţinut, neprielnică, care determină anumite stări de disconfort, reacţii adverse, înclinaţii total aiurea.

Examinarea ta atentă ar putea să evidenţieze existenţa unei structuri complexe de decizie bine poziţionate în cadrul propriei tale existenţe? Sau te regăseşti într-o permanentă stare de tensiune între ceea ce contează şi ceea ce doar aparent contează?

Toate trăirile, toate situațiile și experiențele prin care treci, luminoase sau întunecoase, te impulsionează să fii ceea ce eşti, orientându-te constant ori spre acele stări de anxietate, care te macină, care te târăsc mereu în jurul aceluiaşi sentiment de neputinţă. Sau, dimpotrivă, spre acele stări prietenoase de " *a fi* ", care îţi maximizează toate resursele şi performanţele sistemului tău de funcţionare.

Experienţa trăirii prin cãldura inimii care dă viaţă cuvântului scris se desfăşoară pe două planuri temporare: un joc al imaginaţiei din care nimeni nu mai poate scăpa (pătrunzând, cu un întreg alai de sentimente tremurătoare şi confuze), şi un rezultat al realităţii din care trebuie să reiasă aptitudinea ta pentru a discerne semnificaţia unei noi faţete a Egoului.

O breşă în zidul impenetrabil al omului permite accesarea unei realităţi create dintr-o imaginaţie care, prin doar un pumn de cuvinte, reuşeşte să transforme o poveste într-un limbaj al vieţii mai mult sau mai puţin formalizat logic.

Oricât de bun ar fi blindajul pe care ni-l creăm pe parcursul vieţii, oricând poate apărea o breşă în acest zid aparent impenetrabil. Breşa sau breşele ce apar se datorează nouă înşine, prin neluarea în considerare a "punctelor de minimă rezistenţă", respectiv a punctelor slabe pe care toţi le avem, dar nu toţi recunoaştem existenţa lor.

O autocunoaştere profundă, o autoanaliză a Ego-ului care ne face să fim ceea ce suntem, ca şi evaluarea prospectivă a cauzelor şi efectelor, ne va face capabili să obturăm aceste breşe în timp util, devenind imbatabili în viitor.

O călătorie provocatoare în lumea interioară a fiinţei mecanice (Part. II)

On Mai 07, 2013

Racordează-te la borna de referinţă a autenticităţii tale, reformând efortul de a înţelege sensurile de nepătruns ale existenţei aplicate în contextul noilor tendinţe de înnoire.

Fără a-şi da seama, Hobbs se transformă în ceva ce nu trebuia să fie, într-o necunoscută obţinută dintr-o mulţime de combinaţii posibile, din care niciuna potrivită, pe care inima şi subconştientul le acceptă doar temporar, ca pe un test. Va rezista sau nu? Zbârnâie şi şuieră glasurile lăuntrice, războindu-se cu acea sete de a culege totul, de a nu lăsa nimic în urmă. Gândurile se îmbulzesc, se înghiontesc flămânde, făcându-şi loc către adevărata libertate, către marea atracţie, stimulând adrenalina. Îndrăzneala dusă până la extrem, nebunia, exaltarea momentului, supra-valorificarea plăcerii dulci-efemere.

Diamantele se află chiar sub ochii lui, strălucirea lor este eternul unui vis devenit realitate, trebuie doar să le adune într-un loc şi să le facă dispărute din seiful băncii. Ecoul integrităţii nu-i mai răspunde, căci nu mai este de mult viu. În continuare Hobbs cedează instinctului care-i zvâcneşte în degete. Să dispară, să dispară repede totul ! răsună vocea de trâmbiţaş a Eului său, a infractorului profund, care nu-şi dă seama cât de letală e situaţia.

Un hoţ nu este un artist veritabil decât atunci când îşi arata talentul de a gândi mai presus de limitele impuse de cerinţele momentului prezent. Tracasat de repetatele conflicte întreţinute de mândria exacerbată, dar totodată cuprins de o senzaţie plăcută, de un stimul fantastic, de intensitatea acelei stări de maximă energie, de euforia fără margini întreţinută de psihicul zdruncinat, Hobbs se aruncă cu mai multă îndârjire în văpaia momentului decisiv al destinului.

În felul acesta lumea de dincolo de hărţi, lumea comorilor ascunse, lumea cealaltă pe care poate numai Hauff sau Kafka ar fi putut s-o descrie atât de viu şi fantezist totodată, depăşeşte în esenţa ei învelişul realităţii şi al acceptabilităţii acestuia.

Autenticitatea unui artist constă în însuşirea capacităţii de a gândi mai presus de ceea ce simte într-un moment de cotitură, trăind experienţa unei opere de artă în funcţie de ce îi dictează destinul unei aventuri a interiorităţii.

În timpul efortului fizic, nebănuit pentru un bătrân ca Hobbs, producerea de căldură creşte pentru o scurtă perioadă de timp la nivelul musculaturii, toate energiile se armonizează, corpul înfloreşte, este mai plin de viaţă. Şi, dacă n-ar interveni reacţiile compensatoare în vederea restabilirii funcţiilor vitale în limitele normale, date de sentimentele adânci de ură, de mânie, de revoltă, mai mult ca sigur asemenea pulsaţii bruşte de tensiune i-ar fi periclitat viaţa.

Nicio voce nu se ridică mai grav, niciun suflu nu poate fi perceput mai puternic, şi toate energiile declanşate se epuizează rapid atunci când mecanismul sufletesc este decuplat de la nivelul de maximă alertă. Totuşi, cu dedublarea raţiunii şi simţirii ce-l caracterizează, Hobbs rămâne deosebit de receptiv la presiunea exercitată de realitate, de acele influenţe dominante: " *a fi* " şi " *a nu fi* ".

Doar astfel tărâmul necunoscut pe care el calcă cel dintâi, devine acum o ţară a lui. Doar astfel jaful devine mai simplu ca niciodată, transformându-se într-o adevărată victorie - a unui făptaş abil, care va rămâne pentru totdeauna necunoscut.

Leadership: Îţi verifici aptitudinea de a privi dincolo de semnificaţia unei recompense revelatoare şi însufleţitoare, răspunzând solicitărilor fondului tău de probitate reprezentativ?

Hobbs nu-şi verifică aptitudinea de a privi dincolo de semnificaţia unei recompense revelatoare şi însufleţitoare, dincolo de nebunia unui curaj care vindecă orice rană sufletească, ci mai degrabă se lăsă în voia unui singur impuls de gândire la rece: de a nu admite nicio abatere de la setea de justiţie rămasă activă în conştiinţa şi sufletul lui.

Stimulul de procesare a gândurilor şi emoţiilor rămâne prezent în realitatea ta atâta timp cât te concentrezi asupra încercărilor existenţiale. Stimulul acesta cântăreşte cât o stâncă care nu se clatină nici în cea mai năprasnică furtună, dobândind control asupra unor dimensiuni importante din viaţa ta, dar mai ales asupra dimensiunii personalităţii pe care eşti dispus să o arăţi lumii.

Există însă şi posibilitatea ca, asemenea unui căutător fervent al unor noi sensuri de parcurgere a vieţii, să ajungi un simplu colecţionar de experienţe palpitante, dar gol pe dinăuntru, incapabil de a te recunoaşte tu însuţi şi de a privi dincolo de zidurile propriei minţi rătăcite.

Acest sindrom de "tunel care se prelungeşte la nesfârşit" formează prin norul foarte subţire al prejudecăţilor o auto-suspendare până la verdict. În leadership se mai numeşte auto-marginalizare. Verdictul este o afirmare răsunătoare a angajamentului tău faţă de autoritatea puterii tale de a fi o fiinţă morala timp îndelungat. Ceea ce presupune să faci schimbări permanente, să faci ceva ce nu ai mai făcut înainte, chiar şi pe timp de furtună.

Să recunoşti în tine însuţi un învingător care ştie să-şi impună victoria înseamnă să vezi dincolo de răzbunarea propriei "dreptăţi" care dă sens vieţii.

Verdictul în sine, clarificând starea ta de compatibilitate cu formatul vieţii care adaugă variantei de dezvoltare interioară o funcţionalitate suplimentară, nu este altceva decât o "emanaţie" a stilului de a face update-uri la propria caracterizare. Sau mai bine zis, a stilului de a face din propriile imperfecţiuni o măsură reală a bucuriilor sau a dezamăgirilor pe care le trăieşti.

Una din cele mai importante resurse ale leadershipului care permite o anumită distanţă de parcurs şi o anumită putere la "borna de referinţă" a autenticităţii, este aptitudinea de a privi dincolo de sens. Dincolo de sensul atribuit angajării tale într-un joc de şah existenţial, straniu, cu câmpuri albe şi negre, în care piesele tale cele mai importante sunt înlocuite de ecoul integrităţii - acest întreg care are inclus în interiorul său un şir nesfârşit de succesiuni valorice, dar şi drame de conştiinţă.

Sensul reprezintă o probă a încercării tale de a te rupe de ceea te împiedică să trăieşti pacea interioară, iar pentru a schimba sensul trebuie să inversezi "minusul" cu "plusul". Adică să-ţi redefineşti întreaga realitate şi mai ales relaţia cu tine însuţi. Autenticitatea înseamnă să acumulezi experienţe la întâmplare, relevându-ţi în repetate rânduri preferinţele pentru particularităţile lor.

Leadershipul apare aici ca un proces de adaptare la acele stări de conştiinţă şi dispoziţii comportamentale pentru acţiune - alterate de evenimentele cele mai importante, care totuşi pot avea o finalitate pozitivă dacă nu devii prizonierul lor. Să nu uităm că stâncile, cu cât se înălţă mai mult până la cer, cu atât se clătină mai tare şi se prăbuşesc mai uşor.

Un leadership care priveşte spre sensul vieţii este destinul unei întâlniri cu impulsul de combatere a tuturor rătăcirilor tale apărute într-o lume care nu-ţi cere certificat de capacitate pentru a fi mai bun.

O călătorie provocatoare în lumea interioară a fiinţei mecanice evidenţiază traseul spre acele repere existenţiale necunoscute care omul le negociază cu el însuşi, pe măsura propriului contur al minţii şi al sufletului care pot controla acţiunile.

Prozatorul român, Adrian Şchiop, sfătuia la un moment dat: „ *Ieşi din confuzie şi fixează-ţi nişte repere valorice şi evenimenţiale* ". Degeaba te dovedeşti a fi un spirit predominant practic şi plin de imaginaţie, dacă în procesul de negociere serios cu tine însuţi nu iei seama atât de pragul limită al trăirilor provocate de anumite experienţe, cât şi de pragul limită al rezistenţei tale de a suporta ajustări pe parcursul dezvoltării personale. Iar aceste praguri pot fi corelate cu menţinerea unui echilibru între crearea unui nou profil şi distribuirea resurselor de adaptare la tot ce ţi se întâmplă.

O călătorie provocatoare în lumea interioară a fiinţei mecanice (Part. I)

On Mai 07, 2013

Identifică configuraţia particulară a omului luat prizonier de propriile gânduri, astfel încât percepţia ta asupra identităţii sale reale să nu se deformeze.

Doi ochi sticlesc de nerăbdare, în timp ce nobilul sentiment al răspunderii faţă de propria fiinţă se dezlănţuie cu forţă uriaşă. În domnul Hobbs totul răsună în gol. Perechea de electroni a legăturii covalente care gravitează în jurul stabilităţii şi statorniciei sale se repartizează între cele două nuclee: a cugetării, care declanşează în el mecanica specifică unei autocunoaşteri depline, şi a simţirii care coexistă, fără a fi atinsă.

Căci, da, domnul Hobbs a pătruns în marea încăpere, atât de bine securizată, în care se aflau diamantele. Se uită mecanic la nestematele din jur. Şi fără să gândească prea mult, urmărind spiritul răzbunării, fără să fie cuprins de fascinaţia căutătorilor de comori, se lasă împins în direcţia chemării sale, a scopului său mult râvnit.

În spatele a tot ceea ce-l motivează, ţinându-l prizonier într-un egoism orb, într-o colivie a decadenţei individuale, a demenţei temporare, se îngrămădesc gândurile răzbunătoare în nerăbdarea lor de a-şi primi răsplata. Numai ele, gândurile, supraîncărcate şi suprastimulate, numai ele stabilesc deosebirea dintre " *ce* " şi " *cum* ", dintre staţionare şi mişcare, dintre reîntoarcerea în trecut şi raportarea la prezentul care îşi confiscă propriul trecut.

Acaparat mai puţin de feeria acestor lumini şi sclipiri, cât mai ales de senzaţia de izbândă totală, lui Hobbs nu i-a mai rămas decât să ia, cu mâna duşmănoasă, fiecare diamant în parte. Mâna pe care mecanic o împinge înainte înşfăcă categoric fiecare diamant, de la cel mai mic la cel mai mare, ca şi cum nu i-ar fi aparţinut lui, ci acelei constante de a fi, tăinuite, acelei forţe impunătoare şi încrezătoare care se ridică împotriva conştiinţei sale curate.

Leadership: Te laşi împins în direcţia unei chemări care ţâşneşte din adâncimea unei existenţe subordonate raţiunii sau simţirii, prin faptul că nu poţi să-ţi stăpâneşti reacţiile şi răspunsurile la încercările vieţii?

Tot ceea ce te motivează, te ţine prizonier într-un egoism orb, într-o colivie a decadenţei individuale? Te poţi impune în faţa acelei forţe mistificatoare care se ridică împotriva conştiinţei tale curate?

Semnificaţia leadershipului depăşeşte zona strictă a profesiei, repoziţionându-se în zona strictă a tiparului de "uzură" individului, în sfera identităţii sale reale. Ea se impune, în consecinţă, a fi interpretată prin analiza laturii invizibile a personalităţii care se manifestă printr-un comportament neprevăzut.

Importanţa evoluţiei liderului, de la ipostazele variate în care îşi înfăţişează modelul de personalitate, respectiv caracterul, îşi găseşte expresia ei cea mai pregnantă în fiecare detaliu, în anumite comportamente, sau în afecţiuni de ordin psihic sau emoţional.

Când nobilul sentiment al răspunderii, căruia îi încredinţezi toată fiinţa, se dezlănţuie cu o forţă uriaşă, piere instantaneu acea gândire concentrată, necesară formării şi funcţionării personalităţii la standardele înalte. Ai senzaţia că îţi împietreşte mintea, care o ia mai degrabă razna, alunecă pe panta alunecoasă – a făţărniciei, a vieţii duble, a personalităţii multiple, a demenţei – ducând în final, la autodistrugere.

În acest caz leadershipul devine complet imobil şi asfixiat, îşi încetineşte dezvoltarea, nu mai poate genera stimuli pozitivi, nu mai poate da omului o formă bine definită care să-i permită să-şi exercite corect puterea.

Leadership: Cunoaşterea existenţei tale se acumulează pe temerile şi speranţele apărute în faza de formare a gândirii din perioada unei maturităţi constrânsă să schimbe complet peisajul mental pe care l-ai proiectat de-a lungul unei viziuni mult prea idealiste?

Să te afli de partea învinsului înseamnă să te îndrepţi spre o destinaţie în care se întrepătrund necesităţile unei existenţe frământate şi credinţa bazată doar pe evaluarea unei singure părţi a ansablului de principii şi valori care deosebesc măreţia omului de rătăcirea dementă a animalului dresat de acea parte a societăţii umane care este înstrăinată de Dumnezeu.

Domnul Hobbs n-a cunoscut suferinţa cea mai amară decât după moartea soţiei sale, fapt ce l-a determinat să caute răzbunare. Până la producerea acestui eveniment nefast, viaţa i s-a aşezat înainte ca o poveste liniştită de iubire. A fost un şoc total. Omul care experimentează la nivel psihic şi emoţional valurile de energie negativă, acele mişcări periodice sau neperiodice extremiste ce declanşează o adevărată criză în propria lui viaţă, îşi despoaie ştiinţa, filozofia, de strălucitorul vestmânt al gândirii bine direcţionate, al conştiinţei curate şi al simţirii blânde, mature.

Nu degeaba spunea Balzac: " *Mulţi oameni au luat drept energie încrederea pe care ţi-o dau iluziile.* " În special iluzia că poţi face orice doreşti, fără să fii nevoie să te sincronizezi cu ceilalţi oameni din jur, influenţându-le excesiv dezaprobarea faţă de felul tău de a fi. Iluzia că poţi să te ridici mecanic deasupra a tot ce te leagă de Omul din tine, cu o iscusinţă nemaipomenită, chiar cu preţul prăbuşirii în gol.

Leadership: Cele mai înalte ţeluri ale ştiinţei tale pot să capete un relief puternic în ecuaţia unei profunde transformări a vieţii care aduce cu ea o negare a menirii de a fi?

Leadership înseamnă să-i influenţezi pe ceilalţi oameni prin puterea exemplului. Dar ce exemplu poate da un lider care, înrobit de pornirile cauzate de un exces de adrenalină, acaparat de senzaţia de izbândă totală, înşfăcă lacom orice pare de valoare indiferent de consecinţe?

Domnul Hobbs şi-a folosit toate capacităţile, mult peste măsura aşteptărilor sale şi ale tuturor celor din jurul său, pentru a jefui o bancă într-un mod cât se poate de ingenios. El nu şi-a negat menirea pe care dintr-o dată a ştiut că trebuie să o împlinească, nu a simţit nicio remuşcare. Dar nici n-a mai fost acelaşi om ca înainte, a devenit o forţă de reacţie împotriva fenomenului numit "corupţie sau injustiţie". Abia într-un moment crud al vieţii îşi scoate omul la iveală genialitatea şi caracterul.

Ţelul suprem al ştiinţei sale nu a fost să jefuiască o bancă, ci să-şi dovedească lui însuşi că este indispensabil prăbuşirii unui sistem riguros care coordonează vieţile oamenilor.

Împodobindu-şi personalitatea cu strălucitoarele culori ale ignoranţei şi dorinţei sale nestăpânite, inconştient el se transformă în ceva ce nu trebuie să fie. Într-o necunoscută obţinută dintr-o mulţime de combinaţii posibile, din care niciuna potrivită, pe care inima şi emoţiile le acceptă doar temporar, ca pe un test. Cât timp va rezista el acestei schimbări pe care oamenii, bineînţeles, o vor sesiza cu uşurinţă şi o vor dezaproba?

Dar mai important decât atât este reacţia lui ulterioară. Va avea liderul curajul să-şi suporte

starea de delir?

Atunci când ecoul integrităţii nu-i va mai răspunde, atunci când va răsuna vocea de trâmbiţaş a Eului său, a infractorului profund, care îşi va da seama cât de fatală e situaţia în care singur s-a pus, în marea unitate a realităţii, cele mai înalte ţeluri ale ştiinţei sale vor mai putea să capete un relief puternic? Vor mai putea să capete o culoare atât de vibrantă, încât toţi oamenii să poată să-l înţeleagă, şi să se nutrească ei înşişi cu acea hrană corespunzătoare desăvârşirii?

Leadershipul are ca fundament atingerea unei maturităţi care să aducă cu sine consistenţă în a practica prudenţa faţă de darurile vieţii şi efortul de cultivare a unui simţ al calmului în faţa unei eventuale răsturnări de situaţie.

O călătorie provocatoare în lumea interioară a fiinţei mecanice desemnează acea minunată ocazie de a plonja în esenţa fiinţei liderului şi de a-i descoperi potenţialul încă prea puţin cunoscut. În acelaşi timp face obiectul suspiciunii şi al fascinaţiei faţă de ceea ce este el cu adevărat atunci când se abate de la norme şi normal, faţă de ceea ce este straniu şi neobişnuit la el.

Dacă vrei să înţelegi mai bine partea umană a leadershipului, identifică configuraţia particulară a omului luat prizonier de propriile gânduri, astfel încât percepţia ta asupra identităţii sale reale să nu se deformeze.

O călătorie riscantă spre tărâmul tainic al asasinului

On Octombrie 27, 2012

Caută legătura dintre cauză şi efect: acea constantă de "a fi" bazată pe un discernământ care cerne valorile adevărate de cele false.

Trăia într-un sistem de gândire ce pretindea să se afle pe culmile cele mai înalte ale spiritualităţii, dar care ignora sau dispreţuia cea mai mare parte a realităţii morale a fiinţei umane. Modul său de gândire nu avea în vecinătatea lui o altă înălţime, creastă sau pisc, pe care vreo virtute, vreo orientare, vreo influenţă pozitivă să fi putut cerceta toată întinderea lui deşartă şi rece, încremenită sub o pojghiţă de smerenie falsă. Un mod de gândire rece, fără nici măcar o fărâmă de suflet, de culoare, de onoare, de visare, de fericire, luând forma unui ceas cu alarmă folosit ca mijloc de selecţie a viitoarelor ţinte.

S-ar fi spus că ura tot ce-i ieşea în cale. Orice om, dar mai ales orice bătrân, îi provoca repulsie, o silă de nedescris, ca o rămăşiţă de infern care denatura imaginea viitorului şi sensul vieţii sale. Un spaţiu ciudat între exponenţii unor gândiri cu totul şi cu totul diferite. O descărcare inevitabilă, cu toată siguranţa, a tensiunii directe induse de o minte confuză, păguboasă, iraţională, în totală contradicţie cu realitatea socio-umană.

Anton Chigurh era numele său, al asasinului, al omului hotărât şi loial ambiţiilor sale, care se coalizase cu răul. Omul acesta complicat şi foarte aspru, omul acesta pentru care viaţa şi moartea nu erau antagonice, nu se excludeau, ci se întrepătrundeau ca o simfonie de elanuri, disperări şi derute, omul acesta atât de hăituit de propriile limite era el oare conştient de înlănţuirea de convingeri prin care se ridicase şi coborâse, treaptă cu treaptă, până la aspectele reprobabile care alcătuiau orizontul lăuntric al spiritului său?

Leadership: Izbuteşti să-ţi impui o acceptare filozofică indiferentă, ca în faţa unui rău inevitabil, încât să-ţi să-ţi justifici o atitudine de tipul "să vină ce-o veni"?

Unui altfel de om, unei asemenea structuri de judecată, unui asemenea jucător prins într-un permanent joc al realului cu irealul nu poţi să-i aplici leacul vrăjit, pastila tămăduitoare, fără să-ţi pese cum şi pentru ce se produce efectul.

De regulă miracolul însănătoşirii se împlineşte doar în cazul celor care şi-au clădit personalitatea pe o anumită gândire logică, menită să sprijine redresarea propriului lor Eu. A celor care caută legătura dintre cauza şi efect: acea constantă de "a fi" bazată pe un discernământ care cerne valorile adevărate de cele false. Nu era şi cazul său.

Scânteia s-a aprins. Anton Chigurh, ucidea în continuare, ghidându-se după nişte principii mai presus de fiinţa umană. Îşi dădea el oare seama de tot ce se petrecea în jurul său şi de tot ce se frământa într-însul?

Un fluid misterios străbătea întregul său fel de fi, ca o putere misterioasă revărsată prin spaţiile ilogice care influenţau substanţa lăuntrică a materiei personalităţii sale.

Se simţea, semeţ şi neclintit, ca cel ce trece curajos puntea timpului pentru a pătrunde într-un tărâm tainic. Într-un deşert arid unde nu există Dumnezeu, nici legi divine, nici repere, nici oaze de speranţă. Ci numai două entităţi complementare: deşertăciunea şi moartea. *****

Leadership: Poți trăi pe măsura propriei tale revelații despre tine în contextul evenimentelor care îţi pot periclita integritatea prin anularea zbuciumului sufletesc din proiecţia speranţei faţă de un nou început de viaţă?

O înţelegere corectă şi completă a dimensiunii propriei tale existenţe, printr-o asumare a răspunderii faţă de rezultatul acţiunilor tale, este esenţială în vederea păstrării echilibrului moral şi a tiparelor care imprimă naturii tale o strânsă armonie. Această înţelegere, acest pion important în partida grea de şah dintre "a fi la cheremul destinului" şi "a fi la comanda vieţii", poate fi favorabilă ambelor părţi, având şi rezultate pozitive şi negative.

De aceea, pentru o devenire rodnică semnificativă care se doreşte a fi menţinută în vigoare cât mai mult timp, şi nu anulată la primul semn de dezechilibru, setează-ţi "ceasul deşteptător" care să-ţi amintească constant cine eşti şi încotro te îndrepţi, care să ticăie non-stop şi să-ţi trezească impulsul spre o evoluţie neîngrădită şi ascendentă.

Poţi să te transformi dintr-un om de piatră într-un om viu? Asemenea unei statui care suportă degradarea temporală, personalitatea ta poate suferi o anumită "împietrire", o statornicie a pretenţiilor tale de om raţional la un nivel la care nicio virtute, nicio orientare, nicio influenţă nu o mai poate modifica.

A abdica de la principiile sănătoase specifice liderului care tinde spre excelenţă, înseamnă a te implica într-un joc periculos cu consecinţe nefaste. Autocenzura, liberul arbitru trebuie să funcţioneze impecabil, aidoma unui ceasornic programat să sune ori de câte ori te îndepărtezi de la "normalul" zămislit de tine în timp.

Leadership: Eşti în stare să-ţi păstrezi orientarea spre excelenţă datorită unei doctrine care pune în prim plan "inevitabilul" din proiecţia unei lumi interioare care se mistuie în ea însăşi?

Foarte uşor te poţi transforma într-un asasin, dacă nu cu fapta, cel puţin prin modul de gândire aberant, prin tendinţa de îndepărtare a lumii din jur, prin negarea principiilor fundamentale care guvernează relaţiile dintre indivizi, impunând o "săritură" de la concepţiile idealiste despre viaţă şi aşteptările de la ea.

O doctrină a înţelegerii fiinţei umane care dacă nu găseşte puncte comune cu doctrinele celorlalţi din jur, prezentând o anumită compoziţie de valori, menţinând un anumit ritm de asimilare a elementelor care compun evoluţia ta, se fărâmiţează până la dispariţie.

Un vechi proverb chinezesc spune: " *Dacă îţi cunoşti duşmanul şi te cunoşti pe tine însuţi, poţi duce o sută de războaie, fără să fii înfrânt.* " Duşmanul tău cel mai mare este "asasinul", sistemul propriu de convingeri care îţi influenţează transformarea odată cu trecerea timpului, odată cu asimilarea anumitor valori care nu fac casă bună cu leadershipul şi cu orientarea ta.

În leadership, inevitabilul reprezintă obligaţia de a răspunde propriei reflecţii despre lume şi viaţă în circumstanţele unei ascensiuni care poate oricând să eşueze pe traseul autoimpus spre îndeplinirea obiectivelor.

Accepţi să te supui meandrelor unei gândiri păguboase, iraţionale, în totală contradicţie cu realitatea socio-umană? Te ghidezi după nişte principii sănătoase, caracteristice fiinţei umane raţionale? Eşti conştient de înlănţuirea de convingeri prin care te ridici, treaptă cu treaptă, la „înălţime"? Care sunt aspecte reprobabile care alcătuiesc orizontul lăuntric al fiinţei tale?

Analizează tendinţele în cadrul fiecăreia dintre axele care îţi compun caracterul. Colaborează constant cu acea parte puternică şi profundă din personalitatea care te defineşte, fără să-ţi exprimi o implicită preferinţă sau apreciere valorică pentru statutul unei personalităţi care îţi deformează convingerile.

Alegerea ta poate fi condiţionată de faptul că elementul predominant al personalităţii tale nu este foarte bine conturat, sau, accidental, este provocat de proiectarea unei versiuni mai dure şi mai ample ale realităţii. Această tendinţă primejdioasă se întrerupe doar dacă "ceasul deşteptător" te trezeşte din somnul ignoranţei şi al inerţiei în gândire.

Reversul propriei identităţi se poate transforma într-o piatră atunci când cazi într-un caracter rece, indiferent, evoluând tot mai mult în direcţia slăbiciunii numită: vanitate fără margini. Începi să devii o victim a unui destin neîndurător, gândind în termenii deşertăciunii, astfel: *"Simt că trăiesc într-un deşert arid unde nu există Dumnezeu ! "*

Convingerile care te ridică sau care te doboară sunt strâns legate de semnificaţia acelor evenimente cărora le atribui o notă personală de apartenenţă la un nivel sufletesc adânc şi sincer care nu se anulează în faţa reuşitelor sau eşecurilor.

O călătorie riscantă spre tărâmul tainic al asasinului este o reflecţie asupra valorilor pe care le considerăm cele mai bune, dar pe care le aservim unor scopuri care nu asigură menţinerea unei identităţi sănătoase şi pozitive.

Aşa cum impresia pe care ţi-o produce un tablou rezultă din compoziţia culorilor alese de pictor, tot astfel elementul cel mai revelator al propriei tale transformări rezultă dintr-o mai bună coordonare a eforturilor de renovare a convingerilor, dar şi dintr-o apropiere de acea constantă de "a fi" bazată pe un discernământ care cerne valorile adevărate de cele false.

*** Notă:** Anton Chigurh - personaj din filmul "No Country for Old Men (2007)"

O cale câştigătoare

On Ianuarie 10, 2009

Orientează-te către atuurile leadershipului tău, fără să ignori latura pozitivă a fiinţei tale.

Sun Tzu ne sfătuia: " *Evită punctele tari ale inamicului şi loveşte-l în punctele sale slabe.* " Un conducător iscusit nu se avântă într-o bătălie unde nu sunt şanse mari de izbândă, decât doar dacă găseşte o cale de a ieşi învingător. Iar una din căile cele mai bune de a-şi crea un avantaj real, un fel de scut protector, este de a recruta oameni din tabăra adversă.

În " *Keops şi marea piramidă",* Guy Rachet, ne povesteşte despre expediţia lui Keops în Fenicia şi despre complotul diabolic care a fost pus la cale împotriva lui.

Întorcându-se din Byblos, Keops a fost întâmpinat de ofiţerul său de încredere Ineki, împreună cu alţi doi soldaţi. Nu bănuia în niciun chip că aceştia urmăreau să-l ucidă. Dar chiar înainte ca cei trei să acţioneze, Kerset, fiica lui Reyen - unul dintre cei mai bogaţi oameni din Byblos, sări în ajutorul său şi îi omorî pe doi dintre atacatori, iar pe al treilea îl răni în picior cu două săgeţi chiar înainte de a fugi. Keops a scăpat nevătămat, fără nicio zgârietură, iar acum trebuia să afle cu orice preţ adevărul de la atacatorul rănit.

După ce a aflat cine se ascundea de fapt în spatele complotului, în mod normal, Keops ar fi trebuit să-l omoare pe acest atacator care a dorit să-i curme viaţa. Dar ce decizie crezi că a luat el?

Nu pare de crezut, dar l-a lăsat în viaţă. Ba mai mult, împreună cu Kerset i-a pansat picioarele şi l-a îngrijit cum se cuvine. Gestul său nu a fost nicidecum nesăbuit, dimpotrivă, a fost unul nobil şi bine gândit. Pentru că astfel atacatorul, printr-o poruncă a îndatoririlor morale, îi va fi recunoscător şi îl va putea ajuta să-i demaşte pe impostori. Chiar dacă decizia lui Keops n-a fost una uşoară, el a recurs la această soluţie gândindu-se la avantajele sale viitoare.

Leadership: Îţi extinzi spaţiul de manevră în apropierea unei imagini care te reprezintă printr-o calitate superioară pe care ai ignorat-o până acum la firea ta?

Toţi oamenii fac greşeli. Conştiinţa responsabilă, observarea riguroasă a îndatoririlor morale, precum şi respectarea unei conduite drepte, îi determină să-şi recunoască greşelile, să înveţe din ele şi să se străduiască să le îndrepte.

Intuiţia, alături de capacitatea de a manifesta un comportament gândit, i-au dictat lui Keops decizia pe care a luat-o, ajutându-l să anticipeze mai uşor alte pericole. Leadershipul are la bază aceste două calităţi care îţi pot schimba şi ţie atitudinea în momentele de cumpănă. Ele oglindesc „căpetenia" propriului tău potenţial, fiind acel sistem de ghidaj care nu te lasă să te abaţi de la drumul cel bun. Ele îţi amplifică potenţialul de lider printr-o pozitivă perspectivă asupra capacităţilor proprii.

O calitate a firii tale pe care se poate să o fi ignorat de atâtea ori este capacitatea de a fi a activ într-o iniţiativă nouă, într-o manieră impetuoasă de repoziţionare faţă de provocările exterioare imediate.

A te convinge de puterea de lider care sălăşuieşte în tine înseamnă să respecţi limitele dintre

"formă şi fond", în concordanţă cu valorile pe care ţi le asumi în aşa fel încât să nu regreţi mai târziu. Forma este dată de evenimentele neprevăzute, fondul este dat de modul în care le tratezi fără să te îndoieşti de tine însuţi.

Deci prima ta preocupare, ca lider, este să păstrezi întotdeauna legătura cu aceste două repere care interacţionează frecvent şi se completează reciproc, verificând în mod frecvent cum progresează aria ta de competenţă.

Imaginea care te reprezintă printr-o calitate superioară a propriei firi tale este dată de acel plus de credibilitate şi celebritate pe care trebuie să-l exploatezi abil printr-un gest onorabil.

A face abstracţie de vocea interioară care îţi şopteşte exact cum să acţionezi şi pe ce drum să o iei, este ca şi cum cineva ţi-ar distruge complet sistemul de ghidaj şi ţi-ar lua toată inteligenţa călăuzitoare. Ajungi să te comporţi haotic, fără o strategie coerentă, fără o structură, fără o logică, fără o gândire integrată şi o planificare care să corespundă abilităţilor tale şi care sa-ţi asigure în timp o anumită siguranţă în faptele tale.

Sistemul de ghidaj îţi permite să te comporţi cu multă grijă în situaţiile limită şi să abordezi lucrurile cu multă abilitate. El face conexiunea cu latura ta pozitivă care îţi accentuează personalitatea, care îţi amplifică fineţea în gândire şi îţi eliberează adevăratul potenţial de lider. Acel punct de sprijin care îţi aminteşte neîncetat de valorile tale morale, încurajându-te să le respecţi chiar şi atunci când eşti înconjurat de oameni cărora aceste valori le lipsesc.

Orientează-te în orice situaţie către atuurile leadershipului tău, fără să ignori latura pozitivă a fiinţei tale. Tu cum atingi un nivel înalt de performanţă în leadership?

Leadership: Te aştepţi să beneficiezi de o ezitare provocată abil printr-o veritabilă strategie a ambiguităţii, din care cea mai promiţătoare perspectivă este recunoaşterea unei valori de superioritate care nu a fost determinată cu certitudine?

Dacă vrei într-adevăr să-ţi atingi scopurile propuse fii pregătit pentru multe dezamăgiri. Pune în capul listei încrederea în forţele proprii, în scopul pe care îl urmăreşti să-l atingi şi mai ales în partenerii de muncă (de afaceri) pe care ţi-i alegi. Pentru că, ţine minte foarte bine, oricât de multă încredere ai avea în propriile capacităţi, dacă nu-ţi găseşti un aliat de nădejde care să te ajute la ananghie, nu vei reuşi niciodată să-ţi atingi scopurile.

Aşa cum artizanatul se caracterizează prin producţia de obiecte executate în spiritul artei, îndeosebi a celei populare, tot astfel un nivel înalt de performanţă în leadership se poate atinge prin dezvoltarea încrederii în ceilalţi oameni în spiritul celor mai nobile valori etice și morale - care vin în sprijinul aprecierii tale la justa lor valoare.

Cum apreciezi tu încrederea oamenilor? Oare cum apreciază ei încrederea ta?

Recunoaşterea unei valori de superioritate care nu a fost determinată cu certitudine este o deschidere către noi experienţe din care trebuie să deduci nişte trăsături de personalitate care să te ridice deasupra lui "a şti" şi deasupra lui "a înţelege".

O cale câştigătoare este adoptarea acelei trăsături numită generic "proces adaptiv" din care derivă, în ultimă instanţă, efectul de "dominanţă pozitivă".

O calitate a geniului meu

On Decembrie 19, 2014

Transformă-ţi ştiinţa într-o sursă de utilitate, selectând şi conceptualizând elementele de tip „reper" pe care le ai la îndemână în viaţa de zi cu zi.

Umbrelă. Cuvântul acesta este imprecis, fals, ascunde tocmai lucrul pe care ar trebui să-l dezvăluie. Dacă nu putem numi un obiect atât de simplu, pe care-l avem la îndemână în viaţa de zi cu zi, cum ne mai putem aştepta să vorbim despre lucrurile care ne interesează cu adevărat?

Dacă nu începem să încorporăm noţiunea de schimbare în cuvintele pe care le folosim, vom continua să fim pierduţi.

Munca mea este foarte simplă. Am venit la New York pentru că este cel mai oropsit loc, cel mai dezgustător. Fragmentarea se vede peste tot, dezordinea este universală. Nu trebuie decât să deschizi ochii pentru a vedea asta. Oamenii sfărâmaţi, lucrurile sfărâmate. Întregul oraş este un morman de gunoi. Serveşte de minute scopului meu. Străzile mi se par o sursă infinită de material, un depozit inepuizabil de lucruri sfărâmițate.

În fiecare zi ies cu geanta mea şi adun obiecte care par bune de cercetat. Am strâns mostre de numărul sutelor - de la cele ciobite, la cele zdrobite, de la cele crăpate la cele strivite, de la cele făcute pulbere la cele putrezite. Ce fac cu aceste obiecte? Ei bine, le dau nume. Inventez cuvinte noi care să corespundă acestor obiectelor. Nu greşesc niciodată. Este o calitate a geniului meu. *

Leadership: Poţi ajunge prin intermediul ştiinţei fragmentării până la recunoaşterea unor adevăruri care să returneze autenticităţii tale valoarea „ *Height* "?

Ştiinţa este suma a ceea ce aduni în timpul experienţei de învăţare. Iar leadershipul este un produs al ştiinţei, alcătuit din principii, concepte şi teorii înţelese şi apreciate în raport cu scopul lor - de a fi aplicate cu succes nu doar în practică, cât mai ales în propria viaţă, şi mai cu seamă în modelul de autoevaluare personală şi profesională. Cât de bine te potriveşti unei setări oferite de propria-ţi experienţă şi raţiune?

Pe de altă parte, ştiinţa fragmentării vizează ceea ce descoperi în fiecare lucru în parte atunci când îl analizezi din perspectiva unei realităţi mai profunde, de dincolo de obişnuitul unei vederi de aproape. Fragmentarea începe de la "vidul primordial" şi se continuă cu roadele neaşteptatului, dând importanţă oricărui lucru chiar dacă la acel moment ţi se pare neimportant, dând oricărei întrebări un răspuns sub unghi epietemologic în perimetrul unei realităţi care se schimbă şi devine pe neașteptate imprevizibilă.

Încercarea de a reda noi feţe realităţii, încorporând noţiunea de schimbare în „selecţiile" pe care le foloseşti drept pârghii de aducere în prim plan a unor noi perspective, este o formă de a accepta totul ca parte din întreg. Întregul unei creaţii personale, concepute ca o nesupunere la regulile de compoziţie unanim acceptate, facilitează renunţarea la ceea ce ştii şi ce crezi în mod obişnuit, pentru a deveni accesibil unei noi conştiinţe, unui nou model de gândire, unei noi forme de înţelegere a lumii.

Leadership: Cum evaluezi compromisul dintre ceea ce crezi că va fi valoarea fundamentală a unui lucru ales la intamplare și oportunitatea ca o atentă concentrare asupra lui să

devină de fapt punctul lui forte?

Selecţiile, care îţi pot furniza un sentiment de independenţă absolut, procesate într-o bază de date mai complexă, evidenţiază abordările unor cazuri particulare, teme cu impact, situaţii şi roluri noi, elemente doctrinare, având contururi mai ascunse, mai greu de urmărit şi depistat, mult influenţate de intervenţii subiective, bazate pe o înţelegere superioară a lucrurilor din jur.

În acest caz, leadershipul capătă mai mult valenţele unui ideal al convenţiei dintre perfecţiune, imaginaţie şi performanţă, la care foarte puţini artizani au şanse să mai acceadă. Iar aceste trei constante, asociindu-se, pot ajunge la numitorul comun denumit „superioritate" numai prin procesul fragmentării datelor şi informaţiilor provenite din mediul înconjurător.

Apoi, printr-o verificare a coerenţei lor, prin recodificarea eventuală a variabilelor de mesaj – sau mai exact prin prisma distribuţiilor unor variabile aleatoare, reprezentate de modul de progresie şi creşterea fluxului de mesaje, pe axele anumitor repere, se poate realiza un nou conţinut de valoare de tip „adevăr".

Experimentarea în mod separat a fiecărei noţiuni de adevăr, a fiecărei surse de capital ştiinţific, a fiecărui aspect al vieţii, prin intermediul actelor mentale – idei, convingeri - pe care te simţi obligat să le săvârşeşti ca răspuns la obsesia de a schimba ceva în configuraţia unor noi modele de reprezentare a realităţii, produce inspiraţia şi înţelepciunea atât de necesară în iluminare, ca pe o expresie a totalităţii şi a perfecţiunii.

Asta înseamnă, de fapt, să ajungi prin intermediul ştiinţei fragmentării până la recunoaşterea unor adevăruri care să returneze autenticităţii tale valoarea „ *Height* ".

O atentă concentrare asupra unui lucru poate să devină de fapt punctul lui forte atunci când modul în care îl observi şi îl foloseşti capătă accente de capodoperă a concretizării unor noi direcţii de acţiune.

O calitate a geniului meu pune în prim plan acel model de referinţă personal care înglobează caracteristici şi concepte, noţiuni şi particularităţi, supuse unei diversităţi de interpretări care conduc la dezvoltarea ştiinţei. Dacă vrei ca leadershipul să devină o formă de expresie particulară, transformă-ţi ştiinţa într-o sursă de utilitate, selectând şi conceptualizând elementele de tip „reper" pe care le ai la îndemână în viaţa de zi cu zi.

O comunicare bună depinde de arta de a asculta

On Februarie 10, 2009

Manifestă-ţi stima pe care o porţi interlocutorului tău prin manifestarea unei exemplare exigenţe faţă de tine.

Ar trebui să-l cunoașteți pe măcelarul din orașul meu. Conduce o mică măcelărie și m-am întrebat mereu cum și de unde a învățat omul acesta să comunice. Să fie de școală veche? Să fie instinctul? Nu știu. Dar își salută fiecare client pe nume și le cunoaște perfect preferințele și gusturile pentru că vorbește cu ei, astfel: "Bună ziua, doamnă Guilane. V-a plăcut prăjitura de ieri? Cu ce vă pot servi astăzi, doamnă Guilane?... O să vedeți, prăjitura asta e bună, am ales-o special să fie suculentă, așa cum vă place... La revedere și o după-amiază plăcută, doamnă Guilane".

Vă garantez că are o clientelă enormă, care îl apreciază și care nici nu se gândeşte să renunțe la el. La el clientul se simte rege, este rege: îi face plăcere să meargă acolo, să fie recunoscut, diferențiat de ceilalți clienţi și apreciat în mod vizibil. De asemenea, vă semnalez că am văzut cum el, un om care comunică atât de bine, știe să își scuture angajații și ucenicii care se mişcă prea greu și să îi felicită pe cei care deschid bine ochii și se mișcă repede. Deci, nu este nici fandosit, nici bleg și nici un patron prost. Dar știe să comunice.

Leadership: Cum te vezi în fundalul spuselor tale: prin atitudinea de recunoştinţă a celui care te serveşte, sau printr-un efort conștient de a percepe o situaţie în care te întrebi ce loc îţi revine ţie?

De ce să ascultați ! Dacă nu ați asculta, nu ați afla nimic. Ați fi sortiţi să vă învârtiţi în cerc, în jurul propriilor voastre concepții, idei, gânduri, fără nimic care să le îmbogățească, să le diversifice, să le aducă un aer nou și sânge proaspăt.

Prin urmare, a asculta este ceva care te îmbogățește foarte mult, înseamnă a-ți oferi acces la informație. înseamnă a te deschide ca să îl înțelegi pe celălalt, un lucru util când trebuie să îl convingem de ceva. Ascultați, încurajați-vă interlocutorul să vorbească, să se exprime cu cuvintele lui. Nu există nimic mai supărător decât cineva care îți termină fraza pe care n-ai apucat să o spui. Respectați-vă interlocutorul și învățați să îl cunoașteți. Cu atât mai mult vă va asculta și el, când veți avea ceva să îi transmiteți.

A asculta pe cineva înseamnă a-i dovedi că există pentru voi. Înseamnă a-i dovedi că merită să fie ascultat - ceea ce, implicit, este un cadou care se poate face între oameni. Nu-i aşa? Vă rămâne vouă să căutați cum să faceți pentru a-i oferi celuilalt plăcere, indiferent dacă este vorba despre client, bancher, măcelar, șef, asociat, angajați, colegi. O comunicare reușită, prin care reușiți să vă atingeți scopul, ar trebui să înglobeze totdeauna ceva plăcut pentru celălalt - și pentru voi de asemenea, fie și numai pentru că este mai plăcut, nu-i așa, să simți că ai puterea de a-i face fericiți pe ceilalți.

Leadershipul cuprinde o formă de ascultare necondiţionată, una care nu judecă, nu culpabilizează, dar care te face să-ţi aminteşti şi să relatezi în mod conştient şi voluntar faptele care constituie subiectul unei convenţii ulterioare.

O comunicare bună depinde de artă de a asculta, dar recepționarea unui mesaj, cât și pregătirea în vorbirea interioară a unui răspuns la ceea ce se aude, constituie o condiție prealabilă adoptării unei hotărâri care te poate urmări toată viaţa.

A face plăcere celorlalţi să te asculte este cel mai mare vector de putere autentică pe care îl poţi avea asupra lor. Aşadar, îmbogăţeşte-ţi capacitatea de percepţie şi înţelegere a lumii din jur printr-o ascultare care forțează să se spună cu voce tare ceea ce se voia tăcut și afundat în tăcere.

Fii exigent faţă de tine, fii demn de ascultarea pe care o practici în lume aşa încât informaţia transmisă să fie percepută ca un succes acceptabil al autocontrolului, sau ca un proces permanent de schimbare și transformare, dar în niciun caz nu trebuie percepută ca o constrângere interioară care te împinge să faci ceva anume.

* **Notă:** Erica Guilane-Nachez - *Şansa e de partea ta*, Editura Polirom, 2003.

O conştiinţă nouă pentru adevărurile rămase mute (II)

On Iulie 16, 2012

Abordează stilul cel mai potrivit personalităţii tale, analizând conceptul numit „viaţă" ca esenţă constitutivă a artei.

Exploram frontierele naturii umane asemenea unui creator conştient de puterea sa de a trece dintr-o realitate în alta la capătul fiecărei aspiraţii sau viziuni. Mi se părea că sunt împins continuu de efortul de cristalizare a unei gândiri cât mai pure şi mereu pozitive. Importanţa filosofiei de a explica realul sau lucrurile în sine influenţate de om constă în faptul că ea slujea drept trecere de la un punct de vedere faptic la o versiune remontată a capodoperei care se numeşte "iubesc să fiu eu", despre care aş putea vorbi la nesfârşit.

A mă privi din perspectiva artei justifica cumva ideea de progres al limbajului despre creaţie. Să creez ceva nou din nimic, să potrivesc toate elementele din care este construit omul, numai în congruenţă cu necesitatea asigurarii unei autonomii particulare, de partea tendintei de a găsi un sens, o coerenţă în viaţa sa. Să cuprind în acţiunea forţelor creatoare, ca într-o plasă imensă de pescar, toate resursele afective şi cognitive care îl fac pe om să "ticăie". Care îl fac să trăiască, să sufere, să iubească sau să viseze. Care îl condiţionează să fie ceea ce este.

Dar pentru asta trebuia să încorporez anumite caracteristici în Eul său, în menirea pe care şi-o propune, astfel încât să pară că nu depinde de mine. Să-l las să-şi urmeze calea, după legile spaţiului, ale timpului, a cauzei şi efectului. Fără să-i încalc liberul arbitru în nicio direcţie de manifestare. Fără să-i încurc valorile. Fără să pun filtre ezoterice în jurul emoţiilor care îl încearcă.

Leadership: Poţi să demonstrezi că stilul tău de a exprima latura cea mai importantă a fenomenului vieţii reprezintă un progres al preocupării pentru realităţile experienţiale, din considerentul unei creaţii care se ridică deasupra celor lumeşti?

Să aud chemarea unui om deopotrivă puternic şi fragil, care ţine de trecerea sa efemeră pe Pământ, atunci când realitatea se îmbină cu ficţiunea într-o taină a lui Dumnezeu. Şi numai atunci să intervin în viaţa lui. Să schimb direcţia în care vrea el să meargă, având încredere în discernământul său. Să trezesc în el tot felul de senzaţii, schimbări de gândire, să-l înzestrez cu tot felul de simţiri, să-i restabilizez pacea interioară, asemenea unui magician care surprinde de fiecare dată publicul cu bagheta magică.

Am realizat că oricine poate fi un Dumnezeu, un creator, un artist care naște măiestrie și frumos. Ca un copil care îşi alege singur personajele dintre jucării. Ca un dezvoltator de jocuri. Ca un pictor care odată ce-şi alege modelul îi poate finisa caracterul după cum doreşte, în funcţie de tonul culorilor pe care le foloseşte. Îngeri fără aripi. Demoni fără coarne. Fiinţe şi lucruri. Destine şi împliniri.

Viaţa în interiorul artei este o luptă permanentă între autor şi opera ideală. Suntem noi oare personaje fictive? Suntem oare înlănţuiţi în iluzia faptului că suntem liberii arbitri ai acţiunilor noastre, iar indiferent ce cale am alege tot la un punct final predeterminat am ajunge? Ce ne separă oare de marile enigme ale lumii, ale vieţii, ale universului? Suntem doar simple creaţii, sau nişte artişti creatori?

Leadership: Deschizi calea de a te cunoaşte temeinic prin legile creaţiei privite din unghiul ocrotirii vieţii private, stipulată în favoarea unei arte care transpune omul într-o altă

ipostază?

Fiecare lider s-a pus la un moment dat în postura creatorului. Să îşi desăvârşească creaţia (o împlinire a Ego-ului), să creeze noi reţete de prelucrare a realităţii vizibile prin care să-şi finiseze aptitudinile de artist, ca întemeietor al unor noi modele de raţionament şi noi sensuri de viaţă. Şi pentru că această aspiraţie nu este la niciun lider negată, ceea ce rămâne este arta. Arta de a fi tot mai perfect, asemenea unui pictor care se încarcă cu "frumuseţea" din afară şi apoi o pune pe pânză, spre a o vedea şi alţii cu scopul de a-i recunoaşte valoarea şi potenţialul.

Stilul cel mai potrivit personalităţii tale se va manifesta în acea direcţie a "creaţiei" privită din perspectiva explorării propriului Ego, ce are ca sens şi finalitate o nouă percepţie a realităţii. Numai o dinamitare a graniţelor dintre tine şi tot ceea ce ţine de zona artei, dintre creaţie, realitate şi evoluţie, va reuşi să accentueze caracterul general al concepţiei despre calitatea pe care o apreciezi cel mai mult la tine în raport cu ceea ce trăieşti şi foloseşti ca experienţă de îmbogăţire a revelaţiilor intime.

Toate aceste situaţii de moment, toată această înlănţuire continuă de transformări, diversităţi, căutări, descoperiri, efecte, au rolul de a te ajuta să conștientizezi imaginea pe care o ai despre tine şi de a-ţi cizela personalitatea cu privire la necesitatea formării unui tip de om deschis spre depăşirea limitelor pe care le impune evoluţia vieţii ca esenţă constitutivă a unei arte particulare.

A-ţi ocroti viaţa privată înseamnă să începi să te priveşti din exterior şi să trăieşti afectuos din ceea ce ştii că nu poţi oferi lumii. Asta înseamnă să fii de partea creaţiei care nu poate fi decât pe gustul tău. Înseamnă să te transpui în ipostaza unui Creator care nu acceptă decât propria realitate ca singură variantă de măsurare şi interpretare a artei de a trăi în prezent şi de a-l savura.

Leadershipul, ca formă de cultivare a artei, pretinde ca şi clauză de reprezentativitate acea versiune a realităţii extinse la infinit în universul creaţiei care te provoacă să-ţi depăşeşti limitele concepţiei despre sine.

Rotiţele care îţi pun în mişcare capacitatea de a te dezvolta, de a asambla puzzle-ul care te ajută să faci faţă schimbării şi să-ţi intensifici acea formă de creaţie care îţi permite să-ţi exprimi individualismul şi unicitatea, sunt date tocmai de aceste alternanţe care se repetă fără încetare. Ce anume te face pe tine să "ticăi"?

O conştiinţă nouă pentru adevărurile rămase mute desemnează gradul de cunoaştere a propriul tău Ego, pe care îl atingi numai atunci când cuprinzi în acţiunea forţelor tale creatoare toate resursele emoţionale şi cognitive care te fac să "ticăi", precum convingeri, imagini, idei şi atitudini abordate din perspectiva viziunii tale asupra artei.

Source: https://neculaifantanaru.com/o-constiinta-noua-pentru-adevarurile-ramase-mute-II.html

O conştiinţă nouă pentru adevărurile rămase mute (I)

On Iulie 16, 2012

Manifestă o tendinţă continuă spre cunoaşterea de sine, făcând din ea un pilon de sprijin pentru leadershipul tău.

Simţeam o puternică dorinţă de a cuprinde în mine tot ceea ce mă ispitea, ştiinţa de a identifica şi de a discerne toate legile care guvernează existenţa omului, întreaga manifestare a desăvârşiri sale, toate elementele psihologice şi emoţionale care îl alcătuiesc. Eram precum un artist renascentist care încearcă să creeze un tablou al cărui compoziţie este condiţionată de opoziţia moarte-viaţă disponibilă într-o singură dimensiune a unui sentiment estetic redat printr-o linie folosită ca element de separare între ceea ce este real şi ceea ce este imaginar.

Cu singura menţiune că adevăratul conţinut era de fapt victoria unui gând de Creator care şi-a lăsat amprenta inteligenţei la toate nivelurile de manifestare ale vieţii, sub semnul interesului acordat unei realităţi cu multe controverse.

Dar exista un mare gol în interiorul micii enciclopedii a cunoaşterii pe care o acumulasem. O limitare. Un obstacol. O barieră. Coborâtă înadins parcă de un duşman invizibil, de o forţă care mă împiedica să percep într-un mod foarte precis lumea, viaţa, natura umană. În special pe mine însumi. Trebuia să o ridic în mod deliberat dacă voiam să fac un pas înainte şi să obţin un oarecare progres spre desăvârşire.

Ce ascunde omul? mă întrebam cumva neliniştit, ca şi cum m-aş fi îndoit de existenţa lui Dumnezeu, provocându-mă făţiş să-mi exprim părerea ca un om obligat să spună tot ceea ce crede.

Ascunde trecutul şi viitorul? Este încă prea dureros prezentul, îmi repetam cu înverşunare, totuşi esenţial, căci este un element de legătură, în plină dezvoltare, pivotul central al unei întregiri perfecte şi permanente.

Cu câtă meticulozitate îmi cercetam şi verificam adevărurile, constatările, cu câtă scrupulozitate chibzuiam planurile "facerii", ajutat numai de generozitatea propriilor mele idei şi prejudecăţi !

Leadership: Trebuie să te reinventezi la un nivel superior când ai atins limita maximă de încredere într-o realitate care te obligă să cobori la nivelul a ceea ce eşti?

Ştii care sunt punctele tari şi slabe ale leadershipului tău? Leadershipul este punctul de legătură dintre tine şi ceilalţi oameni, dintre cine eşti tu cu adevărat, mai întâi ca om, apoi ca profesionist, şi imaginea pe care ceilalţi o au despre tine. Nu eşti cuprins de o vie nelinişte atunci când nu-ţi cunoşti "piesele" care te fac să te observi mai atent?

Actriţa Anca Sigartau spunea: *"Când ai atins limita, trebuie să te reinventezi la un nivel superior."* Limita este exprimată de nemulţumirea pe care o ai faţă de tine însuţi, şi care la rândul ei are un impact negativ asupra leadershipului, respectiv asupra celorlalţi oameni. Este marele obstacol care îţi blochează evoluţia. Nu îţi poţi ridica leadershipul la un nivel înalt, nu poţi câştiga respectul celorlalţi, dacă te separă o distanţă mare de optimul aşteptat de tine şi de ei.

Separarea Ego-ului de realitatea pe care o experimentezi prin raportarea la conceptul de relații de cauză sau cauză-efect, prin încălcarea tot mai mult a acestei “limite”, este o formă de a te ascunde de tine insuti, care poate declansa depresia, căci atunci aproape fiecare percepţie despre ce inseamna sa fii diferit se deformează tot mai mult.

În leadership trebuie să ţii cont de faptul că adevărată valoare pe care o produci din ceea ce înseamnă să fii diferit se întoarce asupra ta atunci când relaţia cauză-efect pe care se construieşte realitatea nu se ridică la nivelul unei drame, adică la acea parte a sensibilităţii de a reţine semnificaţiile hazardului în memorie cu rigurozitatea unei ordini de nezdruncinat.

Reinventarea vizează raportarea ta la o realitate care te îndeamnă să afli de ce e important să te uiţi din puncte noi de vedere la orice există deja în tine, dar care nu este folosit.

Cunoaşterea de sine este privilegiul cel mai important de care trebuie să te foloseşti pentru transmiterea unei imagini unitare asupra realităţii care te întregeşte prin experimentarea unor stări elevate de conştiinţă, precum împăcarea cu ceea ce îţi este propriu sau cu acceptarea lui "acum" şi "aici".

Redirecţionând cursul propriilor tale concepţii şi idei despre cine eşti într-un exerciţiu de sinceritate, deschizi calea către o învăţătură de excepţie: "Când încerci să te ancorezi la realitatea care există doar în Dumnezeu vei trăi acea stare de pace care dă suficientă importanță acceptării adevăratului sens al vieţii".

A te reinventa la un nivel superior când ai atins limita maximă de încredere într-o realitate care te obligă să cobori la nivelul a ceea ce esti, înseamnă de fapt să ai curajul să fii tu însuţi prin prisma a ceea ce eşti dispus să accepţi de pe urma relaţiei cauză-efect pe care nu tu o hotărăşti.

Zilnic asistăm la schimbări. Realitatea de ieri nu mai este cea de azi. Şi nu va fi nici cea de mâine. Iar noi trebuie să ţinem pasul cu aceste schimbări, să ne acomodăm cu ele. Un veritabil “perpetuum mobile” suntem de la naştere până la moarte, dar un perpetuum mobile care evoluează pe o spirală ascendentă.

Puterea unui gând de Creator se distinge prin configurația unică a orientării, a gândirii și esteticii pe care le declari ca fiind cele mai riguroase forme de conversaţie despre un subiect aparte din care se poate face un tablou foarte captivant.

O conştiinţă nouă pentru adevărurile rămase mute derivă din calitatea răspunsurilor pe care le dai în acea situaţie în care doar acceptând o convenţie cu realitatea cea mai concretă ai putea să capeţi încredere în ceea ce ai de învăţat ca să treci la un alt nivel de percepţie a ceea ce înseamnă să fii tu însuţi.

Source: https://neculaifantanaru.com/o-constiinta-noua-pentru-adevarurile-ramase-mute.html

O descoperire importantă este o palpitantă aventură interioară pe care o trăieşte artistul

On Aprilie 19, 2012

Adevărata inspirație apare când artistul explorează și reflectă asupra propriei creații, reușind astfel să evidențieze profunzimea viziunii sale artistice și să ofere o perspectivă autentică asupra subiectului abordat.

Sub influenţa acestei impresii puternice Eisenstein lucrează la montajul filmului său, făcând în practica muncii noi mari descoperiri în privinţa expresiei cinematografice. Lucrează la montaj într-un "extaz creator", într-o febră în care se lasă impregnat de cadrele filmului sau pe care "le aude şi le simte". Din nou descoperirea mecanismului metodei de creaţie este ulterioară "extazului creator" şi are loc în momentul, deloc poetic, în care regizorul este nevoit să-şi treacă filmul terminat prin masa de montaj pentru a-l scurta.

Acesta nu mai e un moment de inspiraţie, ci o simplă operaţie tehnică. Revăzându-şi astfel opera, artistul apare ciudat prin aparenta lipsă de raţiune a îmbinării cadrelor. Criteriul montajului i se pare în afara oricărui criteriu normal cinematografic, cu totul neînţeles. Abia încercând să-şi înţeleagă propria sa creaţie, descoperă noile legi pe care le făurise. Din nou: "Nu caut, ci găsesc." Din nou o descoperire importantă este în fapt o palpitantă aventură interioară pe care o trăieşte artistul. Descoperă acum existenţa unei "a patra dimensiuni filmice", prin ceea ce numeşte "armonica vizuală".

Leadership: Cum modelezi procesul creativ pentru a atinge perfecțiunea unei opere artistice armonice și vizuale, așa încât să fie alimentată de pasiunea ta interioară și să exprime cu fidelitate viziunea ta unică?

În arta montajului cinematografic, descoperirea unei dimensiuni noi este o palpitantă aventură interioară pentru artist. Similar cu modelarea rețelelor neuronale, regizorul experimentează structuri, criterii și tehnici variate, căutând perfecțiunea în procesul creativ. În extazul său creator, el ajustează minuțios scenele, montându-le în așa fel încât rezultatul final pare uneori irațional. Cu toate acestea, analizând ulterior creația sa, descoperă legi noi ce depășesc tehnica simplistă și conturează o operă unică. În ciuda ajustărilor aparent incoerente, procesul se transformă într-o armonică vizuală, un criteriu artistic ce relevă o dimensiune filmică unică, îmbogățind aventura interioară a artistului.

Aşadar, în arta montajului cinematografic, descoperirea unei dimensiuni noi este o palpitantă aventură interioară pentru artist. Similar cu modelarea rețelelor neuronale, regizorul experimentează structuri, criterii și tehnici variate, căutând perfecțiunea în procesul creativ. În extazul său creator, el ajustează minuțios scenele, montându-le în așa fel încât rezultatul final pare uneori irațional. Cu toate acestea, analizând ulterior creația sa, descoperă legi noi ce depășesc tehnica simplistă și conturează o operă unică.

Leadership: Cum reușești să îmbini virtutea și percepția pentru a dezvălui o operă ce transcende orice așteptări cinematografice?

În momentele tehnice, atunci când artistul își trece filmul prin masa de montaj pentru a-l scurta, el realizează că această operă aparent lipsită de rațiune dezvăluie noi reguli și modele. Ajustările minuțioase ale cadrelor, în extazul său creator, dezvăluie o armonică vizuală pe care el însuși nu o înțelege inițial. Criteriul montajului, deși aparent în afara oricărui criteriu normal cinematografic, relevă o nouă dimensiune filmică, o a patra dimensiune.

Procesul creativ devine astfel o descoperire a unei aventuri interioare în care artistul descoperă noi legi pe care le-a făurit intuitiv. Abia încercând să-și înțeleagă propria creație, artistul dezvăluie principiile ce i-au guvernat munca și realizează că aceste descoperiri nu au fost căutate deliberat, ci găsite în mijlocul extazului creator. Această abordare, caracterizată prin cuvintele lui Eisenstein „Nu caut, ci găsesc", îmbogățește aventura interioară a artistului, aducând la lumină criterii noi care nu doar îmbină cadrele, ci le oferă o coerență armonioasă, ca într-o structură a unei rețele neuronale.

Un regizor trebuie să scoată la lumină o nouă dimensiune filmică, unde coerența armonioasă a cadrelor devine o mărturie a forței interioare și a virtuții sale artistice.

O descoperire importantă este o palpitantă aventură interioară pe care o trăiește artistul dacă ne gândim la faptul că aceasta îl conduce la explorarea unor aspecte necunoscute ale creativității sale și îi dezvăluie noi modalități de a-și exprima viziunea artistică. Mai mult decât atât, această călătorie interioară poate aduce artistului o înțelegere mai profundă a propriei sale identități și a relației sale cu arta, influențând semnificativ stilul și evoluția sa ca creator.

O despărțire, dacă nu este prea lungă, sporeşte dorința față de cel absent

On Februarie 09, 2009

Revederile pot aduce o intensificare a sentimentelor de sens convergent, vizând o îmbogățire a experienței personale în relația de tip Parte-Întreg.

Keops află, în sfârşit, din gura unui trimis al lui Benu, Marele Prezicător, că venise momentul să plece de la Memphis la Hermopolis, unde îl aştepta marele preot al lui Thot, zeul polimorf, care se manifesta sub aspectul ibisului şi babuinului. Meritites, obişnuită cu absenţele repetate şi deseori prelungite ale fratelui ei, nu manifestă nicio tristeţe, contrar lui Henutsen, care nu mai contenea cu plânsul.

- Nu plânge pentru asta, surioară, îi zise Meritites. Ar trebui să te obişnuieşti să-l vezi pe soțul nostru plecând astfel, deseori pentru multe zile şi, uneori, chiar luni. Nouă ne rămân jocurile, copiii şi rudele. Ar fi pentru tine o ocazie bună ca să-ți vizitezi mama şi tatăl. Și când Keops se va întoarce, plăcerea revederii va fi şi mai mare, căci o despărțire, dacă nu este prea lungă, nu poate decât să sporească dorința față de cel absent. La întoarcerea lui Keops, vei vedea că te va iubi şi mai mult şi tu însăţi îți vei simţi inima mai clocotitoare ca înainte.

Leadership: Propria ta experiență reflectă o perpetuă tensiune între nevoia de proximitate și dorința de independență, având viziunea unui echilibru meticulos între personal și impersonal?

Keops nu fu deosebit de surprins că se văzu așteptat când se prezentă la porțile templului lui Thot, în cetatea sa de la Hermopolis, "Orașul celor Opt", situat la câteva zile de navigaţie, la sud de Memphis. Îşi părăsise reşedinţa dimineaţa, înainte de răsăritul soarelui, fără să anunţe pe nimeni, cu excepția lui Henutsen, cu care îşi petrecuse noaptea. Tânăra soție se străduise să fie veselă, căci Meritites îi spusese că soțului ei nu-i plăceau lacrimile şi implorările. Dar simţea o mare tristeţe în adâncul sufletului.

De la căsătoria lor, nu se depărtase de ea niciodată mai mult de o zi, ca să facă o vizită mamei sale, regalului său tată şi, mai des, şantierelor celor două piramide. În aceste câteva luni, atașamentul pentru soţul ei crescuse şi mai mult, ceea ce îi făcea și mai grea despărţirea. Dar momentele de rămas-bun nu se prelungiseră. Keops își legase centura, apucase bastonul lung, neted și solid, care îi folosea ca toiag, ca bâtă împotriva câinilor şi, în caz de nevoie, ca măciucă, şi o pornise la drum.

Pe tine cum te influențează perspectiva asupra despărțirii ca o formă de creștere a dorinței în modul tău de a valoriza relațiile la distanță?

Leadership: Cât de relevant este să păstrezi secretul destinației tale, reflectând asupra modului în care acest lucru influențează receptarea și interpretarea călătoriei tale?

Ar fi putut să păstreze ambarcaţiunea cu pânză şi vâslaşii puşi la dispoziția lui, ca să străbată întinderea de apă, creată de inundație, între Memphis, transformat în insulă, şi necropolă, dar renunțase. I se părea că, atunci când curentul descendent al fluviului era la fel de rapid la sfârşitul inundației și la revenirea apelor în matca lor, te puteai deplasa mai repede pe jos, când era vorba să mergi în sus pe Nil.

În plus, îi plăcea să meargă, să facă mișcare, să străbată drumurile Egiptului din nou

împânzite de ţărani, care se grăbeau să însămânţeze în mâlul proaspăt depus. Dar vrusese, mai ales, să păstreze secretul destinaţiei: singurii care îl cunoşteau erau Benu – Marele Prezicător de la Heliopolis, Anhaf, mama sa şi soțiile sale. În timpul acestor zile de călătorie, se hrănise cu pâinea şi curmalele oferite de ţărani şi băuse apă din puțuri sau din fluviu, când nu găsise puțuri. Mersese întreaga zi şi, la lăsarea nopții, dormise de cele mai multe ori pe malul Nilului, în desișurile de papirus sau, uneori, acasă la țăranii ospitalieri, care îl invitaseră să împartă cu ei cină şi să doarmă pe terasa căsuţelor din chirpici. Ajuns în apropiere de Hermopolis, se scăldase în fluviu, înainte de a merge la templu.

În leadership te vei confrunta mereu cu o dilemă: "Îţi poţi forma o viziune mai clară asupra scopului tău focusându-ţi atenţia pe mișcare și pe drumurile reînnoite, când simți că descoperi realități noi, sau atunci când percepi diferit intensitatea expresiei naturii și a vieții tale?"

O despărțire, dacă nu este prea lungă, sporește dorința față de cel absent, dacă este percepută ca un prilej pentru regăsire și creștere personală. În lumina eforturilor de a rămâne neatins de povara tristeții cum crezi că se manifestă lupta internă între a arăta curaj și a simți vulnerabilitate, reflectând asupra modului în care gestionezi emoțiile în public?

Echilibrul dintre a păstra un secret și a împărtăși experiențele cu oamenii noi din viaţa ta îţi permite să vezi lumea printr-o perspectivă plină de revelație și viziune?

O enigmă care se rezolvă numai în mister

On Mai 21, 2015

Pune capăt vechiului tradiţionalism, făcând apel la exprimare prin intermediul improvizaţiei, interpretării şi compoziţiei.

Mi se părea că ceva îmi scapă, ca înţeles al acelei reguli creatoare ce stătea sub semnul puterii magice a cuvântului al cărei imagine lipsea, a cărui esenţă, locuind ca un martor tăcut în inima mea, străbătea firul electrizant al poveştii pe care eram pe cale de a o inventa. Al fanteziei însetate după ceva nou şi straniu. Un singur mister nu-mi dădea pace, tulburându-mi orizonturile imaginaţiei, misterul tuturor misterelor, al legăturii dintre artă şi viaţă, al detaşării de obişnuitul cotidianului care refuză deliberat să-și propună un scop în viaţă: era misterul expresivităţii, particularitatea distinctivă a limbii poetice.

Cuvântul, fără a-l rosti, adulmecându-i doar briza ce-o emana la fiecare străfulgerare de inspiraţie, luând ca potenţial de referinţă însăşi experienţa de creaţie, succedându-se îndârjit unei trăiri complexe, pe axa unui timp vertical, părea să măsoare veşnicia cu slaba putere omenească.

Uneori, interesul pentru argumentul al cărui contraargument afirmam că-l înțeleg, un întreg neutru, *„ I don't know something, but I do know something else instead ”*, deci un restart al descrierii închipuitului, o reformulare sinceră a expresiei ce admitea ca potenţial de inspiraţie interpretarea unui adevăr inexact, suprima folosirea cuvântului. Şi anula componenta esenţială a artei sale, care era – în cazul meu – scânteia, metafora, *mira profunditas* . În sfârşit, dacă potenţialul de prelucrare şi de lustruire a cuvântului se lua egal cu zero, atunci ştiinţa mea nu mai putea să prezinte nicio miză, nicio speranţă de avansare.

Leadership: Poţi să realizezi o proiecţie a imaginii relevante despre tine însuţi prin interpretarea pe care o dai cultivării gândurilor despre gândire din care modelezi lumea înconjurătoare?

Marele critic francez, Hippolyte Taine, încerca să răspundă la întrebările care fac din arta căutării sensurilor o altă artă, a creaţiei, sperând să confere scrisului fineţe, generozitate sufletească, o anumită ademenire pentru cei dispuşi la lectură. *„ Ce este un cuvânt? Cum poţi, printr-o mâzgăleală neagră înşirată pe hârtie de tipar, să suplineşti, în locul lui, vederea personală a culorilor şi a formelor, interpretarea chipurilor, ghicirea sentimentelor? ”*

Negreşit. Cuvântul care îmi definea prin excelenţă creaţia, asemănător comportării unei bile pe roata unei rulete, reprezenta o formidabilă artă cuprinsă în expresia *„ what it may be, may just as well not be ”*. O floare a norocului dăruindu-se între incognoscibil, cunoaştere şi expunere. O enigmă rezolvabilă numai în mister. Nemiloasa lui forţă provenind din încărcătura de sensuri pe care o punea în evidenţă, ca un element de structură produs din transformări succesive ale materiei originale - el însuşi un mugure plin de sevă, o lume renăscută din propria-i cenuşă şi mereu cu o schimbare în componenţa sa.

Cuvântul este un gând care se tot repetă, asupra căruia te concentrezi tot mai tare, în încercarea de a-l face parte dintr-o lume în care creatorul şi creatul se confundă.

Interpretarea pe care o dădeam cultivării gândurilor despre gândire din care încercam să modelez lumea înconjurătoare putea fi clasificată după diferite criterii care, teoretic și practic, permiteau o mai bună cunoaștere a felului meu specific de a fi în ideea unei reflecţii îndelungate despre sensul vieţii utilizat ca o scară a ascensiunii greoaie în lumea literaturii.

Leadership: Reuşeşti să cuprinzi noi forme de aplicare şi îndrumare a creaţiei spre teritoriul unei arte revoluţionare, astfel încât să stăpâneşti ceea ce cucereşti?

Tradiţionalismul poate fi învins prin rânduielile şi metamorfozele creaţiei în legătură cu o temă care stârneşte interesul artiştilor, mai ales din domeniul literar. Practic, tradiţionalismul este o formă de gândire limitată, mergând pe o singură linie de abordare a unui subiect, fără a conţine alte reprezentări sau părţi ale altei reprezentări, fără a recurge la forţă expresivă şi încărcătura simbolică.

Modul de evoluţie al formelor pe care le particularizează creaţia, în lumina unor noi expuneri ale ideilor (definiţii, teorii, abordări), devin profitabile pentru o mai bună aprofundare a cunoaşterii atunci când încerci o depăşire a ceea ce alţii numesc normalitate. Ele îşi demonstrează eficienţa în diverse experimente ale devenirii – ca ştiinţă a minţii, sau ca ştiinţă a impactului libertăţii de exprimare din jurul unei lumi ale cărei prefaceri sunt rânduite de creaţie – având ca şi caracteristică principală folosirea unor înţelesuri care nu au mai fost accesibile nimănui, dar care pot să constituie un etalon al performanţei la care să te raportezi.

Orice dezvoltator al artei noi, cineva care pune capăt vechiului tradiţionalism, are ca pretenţie descoperirea înţelesurilor ascunse şi a valorilor sale. Căci arta succede creaţiei. Întotdeauna un asemenea lider, un artist al cărui mediu de exprimare autentică se realizează prin intermediul improvizaţiei, interpretării şi compoziţiei, demonstrându-şi viziunea din postura de navigator în necunoscut, luptă pentru schimbarea regulilor ce stau sub semnul puterii magice a creaţiei (o desfăşurare grandioasă de la un început ambiguu la o finalitate care asigură o înlănţuire a ideilor) prin facerea unei armuri epice.

Să stăpâneşti ceea ce cucereşti înseamnă să-ţi educi mintea să dobândească o sferă mai largă de manifestare, cuprindere şi valabilitate, într-o creaţie de mare rafinament în care toate obiectele şi persoanele din jur pot constitui un joc plastic în marele tablou al vieţii.

Un lider stăpâneşte ceea ce cucereşte. Ca răsplată pentru efortul tău, în măsura în care reuşeşti să cuprinzi noi forme de aplicare şi îndrumare a creaţiei spre teritoriul unei arte revoluţionare, mai pure, mai desprinse de influenţele străine, supuse exigenţelor legate de eficienţă, productivitate, profitabilitate şi competitivitate – în măsura în care reuşeşti să cuprinzi cu imaginaţia „infinitul pierdut în abis”, fenomenul caracterizat prin acel „ *what it may be, may just as well not be* ” – abia atunci performanţa ta în a dezvolta o multitudine de aspecte, în a gestiona o varietate de experienţe şi tipuri de conţinut va creşte simţitor.

Concludent ne apare în această privinţă citatul plin de adevăr aparţinând filosofului român, C. Rădulescu Motru: „ *Stăpânirea de fapt asupra naturii (a ceea ce este neîngrădit în creaţie) nu poate veni decât în urma stăpânirii ideale pe care o dă mintea prin concepţiunile sale ştiinţifice. Acestea din urmă conţin în virtualitate a ceea ce faptele vor realiza mai apoi în practică. Pe măsură ce concepţiunile ştiinţifice dobândesc o sferă mai largă şi devin proprietate intelectuală a unui mai mare număr de suflete, în aceeaşi proporţie cresc şi tentaţiile pentru preocupările practice grandioase şi se stabileşte între oameni o colaboraţiune mai strânsă.* ”

Limbajul care te ajută să înţelegi cum să câştigi o nouă perspectivă de a privi dincolo de barierele impuse de tradiţionalism are ca premisă favorabilă tocmai semnificaţia cuvântului pe care îl compui din experienţa vieţii şi a cărui valoare se exprimă ca un cod menit să dea un înțeles specific segmentului de realitate care alcătuieşte un univers paralel, o altfel de lume.

Leadershipul este cuvântul pe care îl poţi citi într-o imagine folosită pentru clarificarea unui sentiment, a unui vis, a unei amintiri, a unei senzaţii, încât să scoţi la iveală partea

din tine care vrea progres, creştere, recunoaşterea meritelor, atingerea succesului în plan artistic, intelectual şi cultural.

Acest cuvânt este "transcendenţă", iar leadershipul mizează pe conotaţia specială pe care el o aduce unui eveniment sau fenomen care devine emblematic pentru înnoirea gândirii.

O enigmă care se rezolvă numai în mister evidenţiază acel lucru greu de înţeles, pus pe seama creaţiei care se revărsă prin strâmtoarea străjuită de cele două turnuri „imaginaţia" şi „viziunea", constituind punctul de sprijin şi centrul forţelor capacităţii de dezvoltare şi valorificare a formidabilei arte cuprinse în expresia „ *what it may be, may just as well not be* ".

O formă diferită de leadership

On Februarie 20, 2020

Afundă-te în experienţa de a te evalua în concordanţă cu îndeplinirea condiţiei de Creator, în aşa fel încât să exprimi acuratețea empirică a unei hiperbole: "Sunt mai vast decât universul".

Freddie Mercury a găsit un mod de a se mobila pe dinăuntru, de a se construi, de a se umple cu adevăruri: prin magie. Construcţia această mistică şi înălţătoare, aflată în împărăţia perfecţiunii unde nimic nu este lăsat la voia întâmplării, această sursă de proiecţie a invizibilului în realitate, este locul unde se recepteează condiţia sacră a Creatorului de geniu.

Ne aflăm, aşadar, în faţa unui artist pentru care credinţa şi magia devin un puzzle de perspective, un întreg mişcător prin însăşi rezoluţia simbolică pe care o poate procesa muzica cea mai vie, energizantă, de înaltă frecvenţă, care exprimă binele şi frumosul. El spunea adesea: *"It's a kind of magic"* , ca şi când ar fi pus la cale cine ştie ce întâlnire cu un zeu atotputernic care se vrea a fi criteriul absolut al artei revoluţionare, canalizându-se în direcţia elaborării conceptului de "identitate surprinsă imagistic".

Acest concept pare să fie perceput ca o categorie de sine stătătoare înscrisă în favoarea unui Ego independent, care controlează totul.

Cred că magia este discursul artistic al unui Ego care aspiră neobosit spre o certitudine a ordinii plină de consistență vizuală, generând o nouă înţelegere a dimensiunii unei personalităţi artistice expuse luminii puternice într-o cameră obscură. Mai trebuie să ţinem seama de efectul evoluției hazardului însoţit de un cod numit *"There can be only one"* , ca parametru al unei idei spirituale aflate într-un continuu update.

Leadership: Poţi să formulezi în termenii expresiei "High" semnificația unei imagini artistice care transmite o emoţie puternică, spre a releva spiritualizarea unei experienţe de alteritate?

Practic, Freddie Mercury autorizează şi traversează toate lucrările magiei, vrăjitoriei şi fermecătoriei, îşi pune la dispoziţie întreagă suflare, toate emoţiile dispariţiei sale în proiecţia unei realităţi a miracolului de a fi El Însuşi divin.

Un asemenea mânuitor excepţional al expresiei High pare că spune adevărul despre un teribil secret prin ochii unei conştiinţe artistice bine orientate în discernerea obiectelor, conferindu-şi o altă putere, formând un întreg izbitor cu propria sa imagine oglindită în fotografie, în pictură, în cuvinte, în aspectul fizic, în jocul de culori al cristalului magic, toate incluse într-un plan astral-eteric foarte vast.

Imaginea lui "tot ceea ce nu se poate atinge", lasă să se înţeleagă sunetul dinamic al muzicii sale. Magia *it's a challenging the doors of time* , așteptând miracolul de-a fi redescoperită printre lucrurile unei lumi frumos poetizate, sau printre sunetele unei muzici penetrante şi ritmice, în decorul unei scene de teatru care îşi schimbă frecvent butaforia. Arta spectacolului său nu este efemeră, ca multe altele, fiindcă i se poate adăuga și arta sunetelor rafinate, amplificate prin mijloace electronice, deci o artă definită printr-un nucleu simbolic al visării sensibile: „Imaginaţia mea este un sunet divin".

Porţiunea artificială a lumii artistului este astfel făcută încât să corespundă necesităţii de a

uni subiectul cu obiectul, fenomenul cu numenul, conștiința și realitatea, într-un cubism ştiinţific care impune imaginii despre natura dumnezeiască anumite linii de forţă abstracte, manevrate cu dexteritate: senzaţii tari, libertate, putere, atmosferă incendiară. Nu-i aşa că este incredibil?

Prin această nouă perspectivă, artistul trebuie prezentat ca fiinţă esenţialmente supranaturală, ca o Mesia silit să construiască “Al treilea Templu al experienţelor artistice” în care Egoul se stinge, dar nu de tot, căci rămâne o luminiţă aprinsă şi atractivă pe întuneric. Expresia High îşi face loc aici prin intermediul unui fior metafizic: *“Modul meu fundamental de a fi printr-un tertip de ordinul creaţiei scenice, este modul fundamental al universului de a exista etern”.*

Leadership: Ceea ce gândeşti despre tine este însăşi lumea unei noi cunoaşteri, aşa cum se află ea raportată la un artist care spune “Iată ce gândesc eu” într-un cadru în care arta reacţionează sub formă de răspuns în faţa unui Alter-Ego?

Ceea ce cunoaştem despre o lume aflată în serviciul artei, asemenea unui concept complex ce poate fi definit doar din interiorul unei magii scenice, nu este însăşi lumea aşa cum s-o fi aflând ea însăşi în raportul faţă de realitate. Mai curând, este rezultatul atingerii ei cu alcătuirea subiectivă a unui arhetip universal al spiritului liber, cu energia lui dinamică, omniprezentă în manifestarea dorințelor și viziunilor despre “mimesis”. La o adică, senzaţiile şi stările sale sufleteşti se află în relaţie directă cu capacitatea de a transforma ideile în fapte.

Cine încearcă să intre în jocul de scenă al magicianului, în mintea lui atât de alambicată, simţind-o probabil ca un diamant care îţi taie răsuflarea, strălucind printr-o multitudine de reflexii, umbre, poziţii, efecte de oglindă, se va integra automat în acest fragment din romanului lui John Fowles:

“Avea ceva dintr-un animal sălbatic, cu adevărat sălbatic, mereu la pândă, pe care cea mai mică încercare de domesticire îl punea pe fugă. Îşi crease în jur un mic teritoriu al său, încercuit de capcane şi bariere invizibile, în interiorul căruia avansa sau se retrăgea; se comporta şi evolua după bunul său plac. Dar simţeam că dincolo de acest sistem de apărare există şi o regiune fără nici un fel de îngrădire, unde, într-o zi, totul îmi va fi permis…”

Realitatea artistului desemnată prin cuvântul mistic *Iasthgurassir* (nu mai ştii ce este în jur), dovedită numai prin asemănarea cu o concepţie despre transcendenţa hiperbolică, înţeleasă ca alteritate absolută, este atât de complexă încât poate fi cunoscută doar prin raportul "albului cu negru". Însăşi magia, şi ea atât de promiţătoare în toate, poate fi definită într-o artă fără graniţe, în faţa unui “Eu Însumi” conceput prin transfer de personalitate, printr-o conexiune cu Universul Divin la un alt nivel, până la statutul de Alter-Ego.

Alter-Egoul unui artist este acea imagine tăcută, neînsemnată, a puterii dătătoare de libertate, prin care valorile sale unice nu sunt nici ascunse, dar nici prezentate ca având statutul unor pagini de recomandări în care oricine îşi poate adăuga părerea.

O formă diferită de leadership se obţine prin integrarea actului de creaţie într-o imagine mistică, specifică unui tabloul pictat în stil suprarealist, în a cărui prim plan se distinge acel “Eu însumi” idealizat printr-o persistență notabilă la nivel de hiperbolă: “Sunt mai vast decât universul".

*** Notă:** Queen - A Kind of Magic

O formulă nouă a frumosului

On Februarie 19, 2014

Atribuie leadershipului o conotaţie valorică care să dureze dincolo de tendinţele trecătoare impuse de o viziune coruptibilă.

Am hotărât atunci că arta nu era pentru mine. Dar tabloul la care priveam acum era într-un fel diferit. Erau trei tablouri în vitrină. Unul dintre ele un peisaj, un colţ de ţară de fiecare zi. Altul înfăţişa o femeie pictată într-un fel ciudat, fără să respecte proporţiile, încât greu ziceai că e vorba de o femeie. Presupun că aşa ceva poate fi numit art nouveau. Nu prea ştiu ce voia să zică.

Însă a treia pictură era genul meu. Era – cum aş putea s-o descriu? Era simplă. Mult spaţiu, culori ciudate pe care nu le-ai fi aşteptat. Ici şi colo erau aruncate picături de culoare care nu păreau să spună ceva. Şi totuşi spuneau ! Nu prea sunt bun la făcut descrieri. Tot ce pot să spun e că simţeai o nevoie teribilă de a te uita mereu la imagine.

Am rămas acolo, simţindu-mă ciudat, ca şi când ceva foarte neobişnuit mi se întâmplase. *

Leadership: Iniţierea demersurilor de punere în valoare a personalităţii tale se sprijină pe imaginea pe care ţi-o plăsmuieşti despre ceea ce te fascinează?

Să cauţi ceva nou, înlăturând acea banalitate confortabilă în care se scaldă o permanentă nemulţumire de sine, în şirul numeros al falselor puncte de reper care nu te ajută să ştii dacă urmezi cursul corect spre integrarea într-o devenire lipsită de "asperităţi", este primul pas înainte spre transformare.

Iniţierea demersurilor de punere în valoare a personalităţii tale se sprijină pe imaginea pe care ţi-o plăsmuieşti despre ceea ce te fascinează, a cărei rădăcini sunt evidente prin spectrul larg al aşteptărilor pe care le ai de la sine, printr-o satisfacţie resimţită subiectiv şi obiectiv.

O viziune coruptibilă nu poate reprezenta o sursă de inspiraţie, neputând deveni realitate. Ea se conturează în jurul unei imagini care nu are nimic de spus şi care nu se modifică pe durata unei suite de operaţii. Cu alte cuvinte, degeaba admiri o imagine dacă nu te oglindeşti în ea.

Evoluţia ţine, mai ales, de o viziune a reconstrucţiei şi reformei personalităţii tale. Şi ea se raportează la leadership prin acea intuitivă înţelegere a realităţii simple corelată cu sentimentul de mulţumire profundă.

Valoarea care fundamentează sau directivează leadershipul, constituită ca un sistem de reprezentări cu privire la adevărata ta identitate, se poate reflecta în nevoia de a şti, de a cunoaşte. De a fi stimulat de o anumită doză de inspiraţie, de o anumită experienţă, de o serie de factori ce ţin de tendinţele de reconsiderare a modului în care indexezi fiecare parte a realităţii existenţei.

Capacitatea de a-i inspira pe alţii, prin ideile noi, împingându-le gândirea într-o direcţie mai largă, este condiţionată de asigurarea sau favorizarea unei orientări, formări şi readaptări la propriile tale perspective. Astfel intri automat într-o poziţie de apărare a valorilor tale, contribuind la un sens mai profund de identitate care te animă şi îţi ridică nivelul de

entuziasm – nu care te goleşte de conţinut.

Poţi să dai un plus de valoare leadershipului prin dezvoltarea personalităţii tale şi orientarea ei spre a crea un concept cu o evoluţie proprie, identificând noi perspective asupra realităţii pe care vrei s-o transmiţi?

Orientarea ta spre a crea un concept cu o evoluţie proprie, identificând noi perspective asupra realităţii pe care vrei s-o transmiţi, are ca rezultat impunerea unui nou tip de gândire care are o pondere bine determinată în leadership. Frumosul, ca o însuşire a lucrurilor percepute dincolo de matricea lor convenţională, este o valoare care fundamentează sau dirijează atât leadershipul, cât şi formele de manifestare a personalităţii tale, spre un act de fericire spirituală la nivelul minții contemplative.

Considerând ca un ideal priceperea ta egală în conturarea unui model de lider devotat propriei identităţi şi în crearea unor noi formule de reprezentare a propriei imagini despre lume şi viaţă, vei putea să sprijini mai activ acel procesor de valoare *high-end* , numit: evoluţie.

Dacă intenţionezi să-ţi îmbunătăţeşti imaginea printr-o schimbare care se efectuează gradual la nivel individual, atunci atribuie leadershipului o conotaţie valorică care să dureze dincolo de tendinţele trecătoare impuse de o viziune coruptibilă - acea viziune care nu se conformează autorităţi tale interioare.

Un concept cu o evoluţie proprie poate fi definit astfel: *"Look At This Image As If It's Your Last".*

Ceea ce te fascinează se mulează pe semnificaţia ce o atribui unei imagini care te surprinde prin ceea ce include ea, prin ceea ce oglindeşte, prin ceea ce relevă pe parcurs, prin ceea ce te împinge în altă realitate.

O formulă nouă a frumosului evidenţiază acea capacitate de a crea frumosul în leadership, şi care este apanajul unei personalităţi orientate spre acest scop. Frumosul însemnând ineditul, lipsit de stridenţă, care inspiră un calm confortabil ce vibrează în concordanţă cu necesităţile şi aspiraţiile tale raportate la cei din jur.

O gândire nouă a leadershipului

On Iunie 08, 2016

Începe să ai consideraţie faţă de sensul de evoluţiei tale, realizând o apropiere între ceea ce îți imaginezi că ești și ceea ce ești capabil să admiţi că ești cu adevărat.

Nu înţeleg ce-aş fi putut să văd la alţii, mai mult decât aş fi putut să surprind la mine, în cazul imaginaţiei incandescente, din care motiv încolţeşte un secret, iar o descoperire se cere aprofundată. Născoceam totul dintr-o dorinţă de altfel, cum ar fi ciudata apropiere de un astru strălucind necontenit prin modificări ale materiei universale, prin acel *"nimic nu se pierde, totul se transformă"* , cumva prin el însuşi o ilustrare a profunzimii spiritului meu de a încorpora totul la un loc.

Deşi inaccesibil, eram totuşi un om cu vederi largi, o construcţie polivalentă de tip „inteligent driver" aflată sub efectul materiei invizibile a unui sistem de operare ce putea fi rulat de oriunde, numit Univers. Meticulozitatea era potrivită pentru mine. Cea mai infimă descoperire, însoţită de sentimentul unei rezonanţe afective, dincolo de acea stare permanentă de istovire specifică căutătorilor de adevăruri nespuse, trezea în mine şansa unei noi victorii sub unghiul prin care priveam ştiinţa modernă.

Evoluţia este o consecinţă adevărurilor nespuse la timp, o dovadă neîntrecută a meticulozităţii cu care sunt întocmite noile puncte de vedere asupra a ceea ce poate da cercetarea ştiinţifică într-un context de tipul: *"believe în a Creator seen as an entity of your own being".*

Să fii mesager al unui destin revelator de noi semnificaţii şi experienţe înseamnă să te consideri câştigător într-o întrecere cu tine însuţi, dar în care îţi poţi testa limitele până la nivelul la care eşti pregătit să-ţi asumi o alegere dureroasă.

Practic, tot ceea ce îmi imaginam despre lume, ca fiind o creaţie proprie în care nimeni nu poate pătrunde datorită acceptării a ceea îmi stătea în putere să schimb prin evoluţia mea, consta în crearea unui context de acces liber la o bogăţie de informaţii care n-ar fi putut fi culese din altă parte şi care puteau ghida chiar şi un savant într-un labirint al revelaţiilor şi viziunilor anticipative profunde.

Singura mea preocupare era legată de opţiunea de a alege între corect şi greşit, între bine şi rău, punând în dificultate libertatea celorlalţi oameni de a-şi exprima punctele de vedere vizavi de relaţia cu un Creator care îşi permite să jongleze cu gândurile, cu prăbuşiri morale, cu orice subtilitate a fiinţei, fără să fie afectat în vreun fel de urmările unei mistificări nefaste.

Durerea cea mai grea a unui Creator este de a nu simţi nicio urmă de vinovăţie în faţa faptului împlinit, asemenea unui scriitor care îşi împărtăşeşte gândurile pe hârtie fără să atingă în mod direct raţiunea existenţei cititorilor săi.

Leadership: Poţi să pui într-o lumină favorabilă ceea ce resimţi la nivel de cunoaştere apriorică, fără să afectezi compatibilitatea cu precizia măsurătorii parametrului „Sunt un Univers" ?

Un profesor de fizică de la Princeton, pe nume Robert Dicke a propus la un moment dat o altă teorie a relativităţii generale, modificând ideile lui Einstein. Păstrând ideea spaţiului curb,

el i-a adăugat ideea de câmp de forţe, ceea ce ducea la modificarea ecuaţiilor fundamentale recunoscute unanim, permiţând explicarea altor fenomene precum deplasarea spre roşu a liniilor spectrale.

Tot ceea ce gândeşti în sfera ştiinţei are privilegiul de a fi contestat, sau dimpotrivă, poate duce la crearea unui context de acces liber la noi orizonturi existenţiale. Ceea ce poate fi socotit drept reacţie la evenimentele importante din viaţa omului, prin prisma unor constatări care confirmă urgenţa unei creşteri apreciabile a construcţiei decorului efectelor de transformare a cunoaşterii, are ca origine o fenomenologie a profunzimii întreprinse din perspectiva unei libertăți de autodeterminare fără frontiere.

O cunoaştere apriorică este expresia responsabilităţii redării unui adevăr care se conturează intangibil, în fundalul unei lumi care se vrea nouă, drept un imperativ al timpului care trece.

Caracterul puternic stimulativ al artei de a te transpune într-un univers, în măsura de a ajunge la miezul anumitor reflexii şi învăţături menite să confirme axioma că însăşi omul este un mic fragment dintr-un cod interminabil, poate să reliefeze înzestrarea ta cu puterea de a realiza apropierea între ceea ce îți imaginezi că ești - „**o totalitate**" și ceea ce ești capabil să admiţi că ești cu adevărat - „**un segment al totalităţii**".

Indus la nivel mental, sentimentul acestei apropieri între „totalitate" și „un segment al totalităţii", explorând tot ce e nou și înlocuind vechiul ce nu te mai satisface din punct de vedere rațional sau existenţial, devine din această perspectivă un tărâm al contrastelor, evidenţiind atitudinea oscilantă între două identități concurente.

Mai întâi o identitate care se descoperă pe măsură ce sunt asimilate sursele de inspiraţie caracteristice unei alte variante de gândire, mult mai înaintate. Apoi, o identitate care te face captiv al unor perspective mărunte, limitative.

Un creator care gândeşte în termenii alegerii "Sunt un univers" poate fi socotit drept imaginea unui spaţiu fascinant de gândire în care adevărul nu mai contează aşa mult, ci doar povestea pe care o spune despre Eul său - care trebuie să facă oamenii să exclame "Wow".

O gândire nouă a leadershipului este dată de unitatea dintre ideile asimilate prin raportarea la ceea ce este necunoscut și imaginea pe care ţi-o proiectezi în lume, în funcție de rezonanţa afectivă și în funcţie de aprecierea roditoare pe o resimţi faţă de sensul evoluţiei tale determinate de raportul între cele două identităţi: a realistului convins de adevărurile sale şi a povestitorului asfixiat la modul real de produsul ficţiunii sale.

O garanţie vie

On Noiembrie 05, 2010

Demonstrează oamenilor rolul tău indispensabil, însufleţindu-i cu convingerea că eşti un model al virtuţilor care străbate depărtările.

Flăcăul se hotărâse să plece în căutarea comorii sale. Dar pentru asta trebuia să traverseze deşertul ca să ajungă în oaza Al-Fayoum pentru a-l întâlni pe alchimist, singurul care cunoştea taina Marii Opere şi care l-ar fi putut ajuta să-şi găsească comoara.

O caravană imensă se pregătea să traverseze Sahara. Aproape două sute de oameni aşteptau să plece.

- Eu sunt conducătorul caravanei, spuse un bărbat cu barba lungă şi ochi întunecaţi. Am drept de viaţă şi de moarte asupra fiecărei persoane pe care o duc. Pentru că desertul e o femeie capricioasa şi uneori îi scoate din minţi pe oameni... Există multe soiuri de oameni, şi dumnezei diferiţi în inima fiecăruia. Dar singurul meu Dumnezeu este Allah, şi pe El jur că voi face tot ce va fi posibil şi tot ce va fi mai bine ca să mai birui o dată deşertul. Acum vreau ca fiecare dintre voi să jure pe Dumnezeul în care crede, în adâncul sufletului lui, că mi se va supune în orice împrejurare. În deşert, nesupunerea înseamnă moarte.

Un murmur scăzut traversă mulţimea. Jurau toţi, încet, în faţa Dumnezeului lor... Se auzi un sunet de goarnă, şi fiecare se pregăti de plecare. Caravana porni la drum. *

Leadership: Poţi să diminuezi dependenţa oamenilor de acele incertitudini care atrag imposibilitatea de a te menţine într-o poziţie de autoritate, făcând apel la o constrângere default de tipul "check your perceptions about what îs going on" ?

Leadershipul prinde rădăcini datorită unui anumit grad de pliabilitate a alternativelor de gestionare a situaţiilor de risc, prin transformarea foarte rapidă a realităţii pe care oamenii nu o pot înţelege total sau nu o pot stăpâni în întregime.

În acest caz, liderul este însoţit nu doar de sentimentul autenticităţii, dar mai ales are obligaţia de a identifica şi valorifica orice alternative menite să reglementeze libertatea de conştiinţă şi de decizie. În special libertatea de a acţiona în măsura în care şi el are deschiderea de a o suporta din partea celorlalţi.

Cu alte cuvinte, liderul trebuie să diminueze dependenţa oamenilor de acele incertitudini care atrag imposibilitatea lui de a se menţine într-o poziţie de autoritate.

Uneori vom beneficia de posibilitatea unor ansambluri de experienţe personalizate, dezvoltate de viaţă pe o cale alternativă, chiar sinuoasă, care inhibă potenţialul de acţiune. Este un fel de alipire la o entitate de coordonare superioară, manifestându-se ca un fenomen de tipul "totul sau nimic", în care gradul implicării în fixarea obiectivelor şi luarea deciziilor devin esenţiale, mai ales pe fondul unor tensiuni prelungite.

Astfel, putem lua de pildă în calcul cunoaşterea a ceea ce poate deveni punctul de plecare spre o nouă etapă de viaţă, cu punctele tari şi slabe, în cadrul direcţiei noi de evoluţie stabilite de entitatea superioară. Ca un fel de scut de apărare faţă de expansiunea percepţiei despre egalitatea părţilor, cu ajutorul particularităţilor variate ale tranziţiei spre un nou

început din setul de posibilităţi de alegere a unui lider-partener.

Leadership: Îţi foloseşti eficient puterea de a decide extinderea intervenţiei tale în modelarea destinului altor oameni, în aşa fel încât ea să contureze tot ce este mai împlinitor în interiorul şi în exteriorul tău?

Cei superiori doresc numai onoare. Când totul merge strună, îţi vezi de drum, gândindu-te că cei care te însoţesc sunt onoraţi să te aibă în fruntea lor. Dar dacă toate merg anapoda, când te trezeşti pornit pe o cale greşită, când nu mai ai niciun fel de soluţii la problemele cu care te confrunţi, în parte datorită faptului că nu ţi-ai executat cu precizie îndatoririle şi ţi-ai încălcat promisiunile, când te trezeşti fără nădejde prins în "lanţurile rătăcirii", atunci trebuie să plăteşti preţul enorm: părăsirea de către toţi cei ce te-au urmat.

Iar în momentul acela îţi pierzi onoarea şi demnitatea, îţi pierzi orice fărâmă de credibilitate, orice încredere pe care o mai aveai în tine. Lumea ta începe să se prăbuşească încet, încet..

Odată cineva a spus: *"Onoarea este o piatră preţioasă, la care cel mai mic defect îi scade mult preţul."* Nimic nu te apropie mai mult de oameni decât onoarea proprie. Onoarea pe care ţi-o acordă oamenii este o dovadă a încrederii pe care o au în tine.

Dacă nu te ridici la înălţimea aşteptărilor lor, încât să le trezeşti entuziasmul şi încrederea în tine, încât să nu se îndoiască de hotărârile tale, devenind omul pe care şi-l doresc ca lider, eşti pe cale să-ţi pierzi sentimentul respectului de sine şi conştiinţa calităţii tale de om de valoare. Un lider adevărat îşi măsoară valoarea după preţuirea oamenilor care-l înconjoară.

Onoarea cere garanţii: îţi antrenezi capacitatea de a te conecta la ceilalţi oameni prin supunerea lor totală la presiunea crescută a unei misiuni din care ei să poată determina unde se încadrează virtuţile tale reprezentative?

Totul era clar, iar oamenii, puternic influenţaţi de vorbele conducătorului caravanei, ştiau exact cum se vor desfăşura lucrurile. Ştiau exact ce trebuie să facă şi când. Erau conştienţi că trebuie să se conformeze tuturor cerinţelor conducătorului lor şi să-i dea ascultare, considerând totdeauna dreaptă orice hotărâre luată de el. Era o realitate pe care trebuiau să o accepte cu toţii, o realitate pe care nu aveau cum s-o nege, s-o distorsioneze sau s-o denigreze. Să-l asculte cu respect, dar şi cu teamă, cu responsabilitate, dar şi cu supunere. Asta era datoria lor.

La rândul său, conducătorul caravanei, fiind singurul care cunoştea drumul spre oază, se considera indispensabil: avea de hrănit zeci, sute de oameni, familii şi copii, el era responsabil de siguranţa lor. Dar avea convingerea sinceră că îi va ajuta pe fiecare dintre ei să ajungă la oază, şi pentru asta ei trebuiau să plătească cu supunerea lor totală. De asemenea, oamenii aveau garanţia totală că atunci când el decide, o face numai spre binele lor şi spre reuşita călătoriei.

Ca lider trebuie să ai sub control situaţia, chiar şi atunci când te cufunzi în somn. Tu garantezi reuşita pentru oameni ca pentru tine însuţi, deplin conştient de destinul tău şi al lor. Nu le permite, deci, să-ţi nege valoarea. Stai bine şi gândeşte-te ori de câte ori îţi asumi o misiune, o responsabilitate, căci îţi poţi pierde foarte uşor onoarea. Şi odată cu ea, inevitabil, îţi vei pierde şi puterea de influenţă.

Virtuţile tale reprezentative, întruchipând o nuanţă individuală de respect şi recunoaştere ce vine în sprijinul unei cauze nobile, se pot încadra în criteriile de definire a experienţei pe care o trăiesc oamenii din jurul tău. Recunoaşterea virtuţilor nu duce câtuşi de puţin la

simplificarea misiunii tale: fiecare om trebuie amplasat în limitele unei zone sigure de interacţiune cu aptitudinile tale, cu ceea ce trăieşti în fiecare moment şi cu ceea ce este dincolo de propria ta aparenţă.

Leadershipul este un model al virtuţilor care răzbate şi mai mult depărtările, făcând să răsune şi mai mult în sufletul oamenilor chemarea la unitate.

Concluzie: Liderul, ales pe baza unor însuşiri şi competenţe recunoscute în unanimitate, garantează pentru oameni, garantează reuşita ca pentru sine însuşi. El reprezintă o garanţie vie că lucrurile se vor îndrepta pe făgaşul cel mai bun pentru atingerea ţelurilor comune.

Aşa cum un antrenor trebuie să ştie care este limita de efort a jucătorilor săi, deci ce şi cât trebuie să le solicite - tot aşa şi tu, ca să-ţi dezvolţi nivelul de leadership, trebuie să-ţi cunoşti mai întâi limitele şi să-ţi antrenezi capacitatea de a te conecta la ceilalţi oameni, clarificându-ţi viziunea şi strategiile de atingere a scopurilor. În acelaşi timp trebuie să-ţi însușești şi să urmezi cu sfinţenie acele reguli şi norme care să favorizeze relaţiile cu ei, şi să ştii cât să soliciţi de la ei, astfel încât să ajungi împreună cu ei la linia de sosire.

Demonstrează oamenilor rolul tău indispensabil, însufleţindu-i cu convingerea eficacităţii leadershipului tău.

O iluzie pe care şevaletul timpului o pictează cu rară măiestrie

On Decembrie 12, 2023

Revizuieşte-ţi viziunea imaginii pe care o contemplezi, privindu-te ca și cum ai privi o reflectare a naturii în tine însuți.

Mă plimb pe ţărmul mării, printre rafalele vântului care fac ca valurile să se preschimbe în culorile unui tablou desprins parcă dintr-o operă de ficţiune. Un om vrea să traverseze nemurirea, şi ca să facă asta trebuie să se dăruiască momentului în care valurile, pe măsură ce se revarsă, pot să-l învăluie într-o energie puternică, transformându-l în muza pictorilor care vor privi splendoarea mării.

Da, mă cheamă marea, mă strigă valurile, mă învăluie răsăritul, şi nu oricum, ci la fel cum pensula artistului este mânată de credinţa unei opere eterne, *Esthelpih Sreycuss*, zugrăvind tabloul unei lumi seducătoare şi fascinante.

Marea completează imaginea firii mele de artist, amestecând timpurile, emoţiile şi aspectele de natură exterioară într-un soi de creuzet ideatic, un recipient capabil să reziste la temperaturi foarte ridicate, în care fierb patimile aprinse ale unei rătăciri halucinante într-un univers paralel, simbolic, ocultat, plurivalent. În plus, ceea ce imaginaţia mea bogată poate să sesizeze clar şi perceptibil, vizând acest spaţiu al absolutului greu de localizat pe axa timpului, lăsându-mă purtat de iluzia unei trăiri tot mai intense, este imaginea completă a unei firi chibzuite de artist, a acestei firi nebune, impetuoase, independente şi rafinate totodată, căreia îi sunt încredinţate atâtea puteri şi privilegii dumnezeieşti, atâtea posibilități de a se manifesta în lumea înaltă a Creatorilor Fără Seamăn.

Cu greu va putea afirma cineva că tot ceea ce poate fi numit frumos în artă, și având mare forță estetică, se găsește în mecanismul văzului. Căci, pentru a desfăta și a fermeca un suflet receptiv la frumos, eventual privind marea lucind în bătaia soarelui, omul are nevoie de emoțiile regulate din spatele privirii.

Leadership: Îți îndrepți atenția către procesul de explorare a unei lumi care transcende limitele imediatului, deschizându-te către un univers nesfârșit de posibilități și expresii artistice?

Totul este scăldat în frumusețea unei realități care încântă pictura ochilor curați. Ilustrativ în acest sens este ceea ce simt când mă plimb pe malul mării, emoția păcii și a liniștii existențiale, ca o curgere neîntreruptă a sunetului produs de valuri, în bătaia soarelui. În măsura în care sunetul valurilor reprezintă întregul dătător de emoții, subordonat dimensiunii estetice, deci fără să separ în vreun fel privirea de auz, arta mea poate fi concepută în simplitatea supremă, mai ales când în această simplitate răsună concomitent mai multe sunete diferite, dar care sunt atât de bine unite, încât cred uneori că aud doar unul singur.

Aici este ceva de ține nu doar de câmpul privirii, ci făcând parte din câmpul auzului axat pe regularitate, surprinzând același interval al clipelor de liniște în aceeași frumusețe ce rezidă din inocența și plăcerea privirii. Deci, simțindu-mă ispitit irezistibil să iau aminte la imaginea care determină ochiul să rețină o amintire auditivă, aproape cât ţin o mie de zile senine, şi chiar și după ce dispare, pot să fac ca arta să fie numită "proprietatea sunetului izolat de a fi profund".

Evident, pentru a înțelege mai bine marea, nu trebuie doar s-o privesc prin comparație cu mine, cât este ea de vastă și cât sunt eu de mic, ci trebuie să îmi imaginez elementele

ritmului valurilor ca fiind indiferente în sine, cum sunt de pildă sunetele separate ale unei corzi, ori bătaia unei tobe. Și, oare prin ce poate deveni semnificativă o succesiune de astfel de bătăi în mijlocul mareelor și al curentului marin?

Leadership: Îţi contemplezi esența spirituală în fiecare colț al imaginii de sine, făcând asocierea între o lume care înflorește în imaginație și o lume care prinde viață în realitate?

Oricât ar fi de tumultoase, sau neașteptate, valurile nu au înrâurire asupra mea decât dacă ele stabilesc un efect artistic-mistic asupra mea. Este precum o viziune a lui Borges ce îşi organizează povestea ca un pendul ce oscilează între realitate şi vis, până când visul devine realitate, adică două versiuni suprapuse ale aceluiaşi fapt. Cum amintea el în finalul povestirii Zahirul, potrivit doctrinei idealiste, verbele "a trăi" şi "a visa" sunt perfect sinonime.

Iată ideea lui Borges, aşa cum reiese din "Ruinele Circulare":

"În cartea care este universul, Dumnezeu ne-a scris soarta. Acest text nu poate fi însă citit de noi. Asemenea visătorului, Divinitatea este o proiecţie a voinţei inexorabile care a creat ori a scris lumea. Magicianul ce visează un om îşi dă seama că şi el este, la rândul lui, visul altcuiva al cărui proiect de viaţă era dinainte prevăzut în proiectul divin. Eforturile visătorului de a înţelege voinţa divină sunt de la bun început sortite eşecului. Mai mult chiar, până şi aceste eforturi zadarnice au fost prevăzute în visul Cuiva care le-a visat sau în cartea unei divinităţi care le-a scris."

De îndată ce privirea cea mai largă se îmbină cu sunetele aparent neînsemnate ale curentului marin, sau al valurilor, potrivit naturii și conținutul lor, ca niște taine demne de admirat ale naturii, atunci arta frumosului (în absoluitatea ei) devine o pură caracteristică a activității de a vedea întreaga diversitate în unitate. Artistul nu vede doar granițele lumii, ci își deschide aripile spre orizontul nesfârșit al propriei viziuni, în care descoperă sursa nesecată a visului din care magicianul creează iluzii uimitoare.

Punctul de plecare în construcţia artei este validarea realităţii pe care imaginea ta o conturează într-un vis. Un vis pe care Dumnezeul îl hrăneşte cu semnificaţie.

O iluzie pe care şevaletul timpului o pictează cu rară măiestrie este imaginea cu care artistul își contemplă propria nemurire, într-un spectacol al formelor și culorilor care transcend limitele efemere ale existenței.

A visa înseamnă să priveşti valurile mării în timp ce Dumnezeu îţi pictează viaţa în culorile sufletului Său, cu acelaşi devotament cu care pictorul îşi creează capodoperele, devenind astfel o parte din tabloul divin. Până la urmă, marea a fost prevăzută în visul meu, în care am visat că sufletul unui artist s-a preschimbat într-un magician. Iar dacă aţi observat bine, viziunea mea a fost, de fapt, proiecţia unei realităţi, binecuvântată de mâna lui Dumnezeu, care pe neaşteptate a devenit vis, într-o iluzie pe care şevaletul timpului o pictează cu atâta măiestrie.

Şi, ca să închei, voi cita un pasaj aparţinând poetului Jean Guichard Meili:

"Singurul lucru de care putem fi siguri e faptul că viitorul aparţine artiştilor, cel puţin atâta vreme cât nu vor fi copleşiţi de constrângeri exterioare. Deoarece acum ştim că formele cele mai contrare nu se distrug, ci se adaugă, la urma urmelor, că nu există niciodată un dezacord fundamental între trecutul cel mai bine statornicit şi prezentul cel mai nesigur, că nu mai e nimic altceva de făcut decât să-i acorzi artistului încrederea pe care o cere în

schimbul dovezilor de afecţiune pe care le dă prin fiecare operă a sa.

Atât cât vor exista oameni, care vor dovedi simţire, se vor afla printre aceştia unii care nu vor putea rezista unei asemenea afecţiuni. Nimic nu poate fi mai frumos decât extrema voinţă, extrema sensibilitate şi ştiinţa…"

O încântare a privirii în plan artistic

On Octombrie 01, 2021

Privirea din care transpar orizonturile vaste ale artei trebuie să fie aţintită drept înainte, şi abia apoi spre tine însuţi.

Simt că dacă privesc îndeajuns de mult marea, voi începe să înțeleg tot mai mult arta. Impresia asta mi-o lasă valurile din întinsul orizontului, alternând printr-un calm care deschide un câmp larg al amintirii. Şi, da. Îmi vorbește deseori marea, ştiind că numai un artist poate să măsoare din priviri o capodoperă înainte de a o recunoaște drept "un teritoriu greu de pătruns".

Iar dacă m-aș simți teribil îndemnat să contemplu vastitatea mării, cu ale ei valuri mai mici sau mai mari, pe scara nemăsurată a timpului, poate aș reuși să înțeleg esența intimă a naturii. Or izvorul fertil din care îmi alimentez gândurile, grație libertății absolute de a înțelege o limbă a profunzimilor ispititoare, pare fermecat, zguduit, mișcat de maturitatea unei opere a naturii, pe cât de liniștită pe atât de furtunoasă, a cărei binecuvântare trece drept un reflex desăvârșit al întregului.

Deci, să privim cu noblețe marea, dar nu înainte de a înțelege valurile ei, partea de suprafață, și scoicile ei, dar mai ales partea profundă a unui întreg care nu își dezvăluie oricui identitatea (așa cum se află ea în absolut, la baza reprezentării infinitului în finit). Și dacă continui s-o privesc, încercând mai mult imaginativ să îi sondez adâncimile, este pentru că eu însumi sunt guvernat de o necesitate absolută: de a construi o artă în întregime, atât în ipostaza ei reală, cât și în cea ideală.

Leadership: Poţi să porneşti mecanismul artistic al afirmării de sine în planul unei creaţii unice, încât mesajul pe care îl evidenţiezi să cuprindă ipostaza ideală a unei vaste întinderi care cuprinde spaţiul dintre prim-plan şi orizont?

Poate ne interesează mai degrabă ceea ce presupune privirea în exprimarea gândurilor şi trăirilor pe care le experimentează artistul. Aşadar, nu este necesar ca în prim planul unei picturi să se distingă făclia luminoasă a personalităţii artistului, ci mai degrabă trebuie să sesizăm acea expresie a trăirilor sale de moment, drept o reacţie la cele văzute de el cu admiraţie.

Hai să spunem că un artist predică idealitatea încercând să imite ceea ce a fost deja plăsmuit, dar o face intuind în concret contextul unui întreg mișcător, în manieră iluministă, pe măsura adaosului de spirit care sălășluiește în identitatea esențială și internă a tuturor lucrurilor. La fel ca eroul romantic care cunoaşte preţul umbrelei abia în clipa când ajunge s-o piardă, tot astfel artistul începe să imite modelul naturii şi efectele ei abia atunci când nu mai este condiţionat de actualitatea permanentei trăiri afective întru triumful spiritului manifestat în mesajul artistic.

S-o spun mai simplu. A construi artă înseamnă să determin în universul fictiv sau real poziția unei opere a naturii văzută ca simplă reflecție a identității mele, ca nemijlocită afirmare de sine. Iar dacă gândurile mele ar fi fost condiționate de ceva diferit de propria-mi profunzime, atunci marea ar fi fost o entitate individuală căreia nu-i revine o realitate iluzorie, ci o realitate tangibilă: afirmarea infinită de sine.

Pe această linie a afirmării de sine în artă, printr-o mişcare a privirii de departe către aproape, cred că s-a instalat şi punctul de vedere al filozofului german F.W.J.Schelling:

"Câţi n-au resimţit nobila impresie produsă de o arhitectură frumoasă, fără a se simţi ispitiţi să cerceteze temeiurile armoniei care i-a încântat ! Câţi nu s-au lăsat înrâuriţi de câte o poezie sau o operă dramatică de valoare şi n-au fost mişcaţi de ea, fermecaţi, zguduiţi, fără să caute vreodată să înţeleagă prin ce mijloace reuşeşte artistul să ia în stăpânire simţirea, să le purifice sufletul, să le răscolească intimitatea adâncă – fără să se gândească să preschimbe această plăcere total pasivă, şi astfel lipsită de nobleţe, în desfătarea cu mult superioară produsă de contemplarea activăşi de reconstrucţia operei de artă cu ajutorul intelectului şi a privirii care păşeşte cu mare băgare de seamă spre departe, doar pentru a aduce mai aproape surprinzătorul ! "

Expresia afirmării de sine în artă vine ca o confirmare a încântării pe care ţi-o provoacă simțirea unei fuziuni complete cu natura, atunci când ceea ce te inspiră la creaţie este acel "ceva" care te face să te simţi ca şi cum ai trăi într-o pictură.

O încântare a privirii în plan artistic care mă face să mă simt altfel, mult mai împlinit, ca într-o pictură a cărei subiect este o întindere plină de neprevăzut, de trăiri şi experienţe unice, este dată tocmai de puterea naturală şi irezistibilă a arbitrarului.Tot ceea ce văd de departe sau de aproape este o expresie a gândirii mele, o modulare sincronică a propriei mele existenţe, o transformare a fiinţei mele.

O inimă îngheţată risipită în neant

On Septembrie 26, 2010

Un lider are încredere în alţi oameni atunci când se vede în ei suficient de mult pe sine însuşi.

Cu mulţi ani în urmă Mercedes se îndrăgostise de un înger. Nu se putea înşela. Îl cunoştea bine pe bărbatul elegant, cu gesturi atât de blânde, creativ, energic, bătăios, ce stătea acum, după mai bine de 16 ani, în faţa ei. Era un om cinstit, muncitor, îndrăzneţ, care înfruntase o mulţime de provocări, de necazuri şi greutăţi ca să ajungă să aibă toate acele bogăţii şi toată acea influenţă în societate.

Însă Edmond Dantes, alias Contele de Monte Cristo, nu putea să-şi scoată din minte adâncul gând de răzbunare, nu putea să rupă din el acea parte care-i pustiise sufletul şi asculta numai de latura lui negativă. Nu putea să-şi schimbe acea atitudine de refuz faţă de orice sentiment pentru de ea. Era nesigur, îi era frică să nu piardă tot ce avea, ura, nu voia să se retragă dintr-o luptă câştigată, nu dorea să se autodistrugă.

Ca să evite o întrebare stânjenitoare, ca să evite să dea un răspuns pe care doar viitorul îl va da, Edmond o rugă pe Mercedes să nu încerce vreo metodă de împăcare:

- Dacă m-ai iubit vreodată, nu...nu îmi lua ura. E tot ce am.

Cu simţul deosebit pe care îl au numai oamenii cuprinşi de o adâncă durere a inimii, cu toată delicateţea şi eleganţa posibilă, Mercedes, simţind cum inima îi spărgea pieptul, încercă totuşi să-l înduplece pe Edmond s-o ierte şi să reînvie dragostea lor de altădată:

- Nu ştiu ce plan întunecat zace în tine Edmond. Nici nu ştiu de ce am fost obligaţi să trăim unul fără celălalt în toţi aceşti 16 ani. Dar Dumnezeu ne-a oferit un nou început... Nu lovi mâna pe care Ţi-a întins-o... Dumnezeu e în toate. Chiar şi într-un sărut...

Leadership: Ai încredere în oameni numai atunci când vezi în ei "licărirea" pe care ţi-ai dori să o regăsească ei în tine?

Un nou sens pe care îl dai vieţii este un mare pariu al unei încrederi ce nu se zdruncină la orice încercare mai dificilă - cum ar fi aceea de a te face indispensabil şi de neînlocuit în cazul prieteniei şi iubirii.

Dragostea nu are sfârşit, pentru că dragostea se naşte în acea parte din noi care nu moare. Acesta este, cred, mesajul filmului " *The Count of Monte Cristo* " realizat de regizorul Kevin Reynolds în anul 2002. Mercedes i-a îmblânzit lui Edmond Dantes sufletul plin de dezamăgiri, i-a înlocuit ura cu dragostea. Ea a fost salvarea lui într-un moment în care acesta se considera pierdut pe veci, incapabil să iasă din capcana trecutului său umil, din capcana sufletului său devenit rece datorită greutăţilor vieţii.

O inimă rece a fost înlocuită de una caldă. Toate simţămintele lui de frustrare, de luptă, de dezamăgire, de singurătate, s-au risipit din toată fiinţa lui pentru totdeauna. Dragostea ce i-o purta lui Mercedes i-a alungat toate suferinţele. Viaţa lui a căpătat un nou sens, lungile zile şi nopţi de aşteptare s-au terminat în sfârşit.

A regăsit în Mercedes propria lui tinereţe, propriile valori, toate năzuinţele, dorinţele şi bucuriile sale, de aceea a iertat-o. A văzut în ea tot ce i-a lipsit o viaţă întreagă, a văzut în ea o persoană capabilă să ia viaţa de la capăt, a văzut în ea propria lui împlinire, propria lui fiinţă, propria lor esenţă. A avut încredere că ea îi va asigura acea pace interioară mult râvnită de orice fiinţă umană.

Leadership: Reformularea propriilor convingeri poate fi facută prin convergenţa unor întâmplări complet disparate, pornind de la specificul spiritual al unei lumi care se refuză marilor demersuri de a-ţi orienta cursul vieţii ?

Ca să înţelegi dimensiunea reală a unei dezvăluiri care poate schimba întreaga ta lume, ia aminte la acest lucru: *"Un tăciune stins poate fi reaprins când unul incandescent este aşezat lângă el".*

Dumnezeu este bun şi îi răsplăteşte întotdeauna pe cei drepţi care iartă şi care cred în dragoste. Contele a înlocuit ura cu dragostea, ştia în sufletul său că o doreşte pe Mercedes cum niciodată n-a mai fost dorită o femeie de un bărbat. Odată ce a iertat-o, acel simţământ de gol şi durere care pătrunsese adânc în sufletul lui, a dispărut. Persoana care îi era cea mai dragă, care a locuit în trecutul lui, l-a eliberat de imensa povara din sufletul său.

Când focul vieţii liderului este pe cale să se stingă, el trebuie să-şi găsească noi motive sau raţiuni noi pentru a-l reaprinde, aşa cum a făcut-o contele. Când focul vieţii lui s-a stins, sau e pe cale să se stingă, e necesar să-şi găsească noi alte ţinte.

Marile demersuri de a-ţi orienta cursul vieţii pot fi concepute atunci când reuşeşti să te interpui între lecţia pe care o are cineva de învăţat şi persoana respectivă, altfel rişti să preiei karma negativă a respectivului şi ajungi să suferi în locul lui.

Convergenţa unor întâmplări complet disparate creează o aşteptare uriaşă ce culminează cu o emoţie puternică din care trebuie să extragi "esenţa existenţială".

Concluzie: Încrederea, această nestemată rar de găsit, este atât de fragilă încât poate să dispară în orice moment, mai ales atunci când tu, ca lider sau ca simplu om, ai fost trădat de cei mai buni prieteni care ţi-au devenit cei mai mari duşmani.

În aceste circumstanţe se naşte, lesne de înţeles, răzbunarea împotriva tuturor - mai mult sau mai puţin vinovaţi, sau chiar nevinovaţi. Discernământul personal are mare importanţă în aceste situaţii. Căutând cu atenţie vei constata că în unii nu ai văzut la timpul potrivit calităţi pe care le-ai dori să le regăseşti la tine, ca de exemplu capacitatea de a ierta şi de a lua totul de la început, moment în care inima ta îngheţată se va risipi în neant.

Să nu uităm niciodată că *"mânia în oamenii cei buni, se naşte marţi şi moare luni; în cei deştepţi ea stă o zi (noaptea fiind un sfeşnic bun), în semidocţi domneşte luni şi toată viaţa la nebuni. "*

O înţelegere nouă cu privire la Dumnezeu

On Ianuarie 12, 2009

Miracolele pot oferi un nou sens ciclului vieții, influențând viziuni și credințe deterministe într-o manieră neașteptată.

Am găsit demult pe internet următoarea întâmplare, văzută ca un miracol. Este despre o întâlnire supranaturală care vă va oferi o înţelegere nouă cu privire la Cer, îngeri şi distingerea vocii lui Dumnezeu.

În anul 2004, Kevin Malarkey şi fiul său de şase ani, Alex, au suferit un accident de maşină deosebit de grav. Forţa impactului l-a paralizat pe Alex şi părea imposibil ca el să supravieţuiască. „Cred că Alex s-a dus să fie cu Isus", i-a spus un prieten tatălui zdrobit de durere.

Când Alex s-a trezit din comă, două luni mai târziu, avea de împărtăşit o poveste incredibilă. Despre evenimente petrecute la locul accidentului şi apoi în spital, câtă vreme fusese inconştient. Despre muzica nepământească, ce sună pur şi simplu teribil pentru urechile unui puşti de şase ani. Despre îngerii care l-au purtat pe braţe chiar pe porţile Cerului. Şi, lucrul cel mai uimitor dintre toate… despre întâlnirea şi conversaţia sa cu Isus.

Băiatul care s-a întors din ceruri este povestea adevărată a călătoriei cu totul extraordinare a unui băiat obişnuit. Pe măsură ce veţi vedea Cerul şi pământul prin ochii lui Alex, veţi dobândi o înţelegere nouă a minunilor, a vieţii de dincolo de lumea aceasta şi a puterii dragostei unui tată.

Leadership: Consideri că impactul experiențelor limită asupra conștiinței tale este un dialog continuu cu percepţia intenţională a lui Dumnezeu, în care fiecare "replică" adaugă valoare la viziunea ta asupra lumii?

Cred că traumele profunde pot deschide porți neașteptate către înțelegeri celeste. Iar poveștile de supraviețuire împotriva tuturor probabilităților pot amplifica credința în minuni. În orice caz, evenimentele cele mai revelatoare pot transforma înțelesurile noastre despre viață și moarte, pe măsura unui scenariu existenţial incredibil.

Povestea băiatului ne aduce în discuție teme importante precum existența divină, impactul experiențelor limită asupra conștiinței umane și posibilitatea de a accesa cunoaștere și înțelegere prin intermediul unor experiențe care transcend limitele obișnuite ale realității. Asemenea întâmplări nu doar că stimulează curiozitatea și credința, dar ne și provoacă să reconsiderăm felul în care percepem lumea din jurul nostru și relația noastră cu divinitatea.

Supranaturalul, așa cum a fost întâlnit de Alex în momentele sale critice, oferă o fereastră către dimensiuni ale existenței care rămân de obicei ascunse ochiului uman și minţii raţionale. Fenomenele precum muzica cerească sau conversațiile cu ființe angelice sugerează că există straturi ale realității ce pot fi explorate prin prisma altor sensuri decât cele cinci cunoscute. Aceasta ne poate îndemna să ne întrebăm dacă există alte forme de percepție sau stări de conștiință care să permită accesul la astfel de experiențe.

Leadership: Ai luat în considerare posibilitatea de a accesa o cunoaștere înalta prin intermediul unor experiențe care transcend realitatea obișnuită, unde percepția și interpretarea se unesc într-o experiență revelatoare?

Interacțiunea dintre cer și pământ, așa cum este relatată de Alex, poate fi comparată cu dialogul dintre conștient și subconștient în psihologia profundă. Acest dialog, deși adesea criptic, este esențial pentru înțelegerea de sine și pentru echilibrul psihic. În plus, capacitatea de a "auzi" și distinge vocea divinității în tumultul experiențelor de viață poate fi văzută ca o metaforă pentru discernământul interior prin care navigăm, în acord cu complexitatea emoțională și morală a existenței.

Experiențele limită pot clarifica misterul ce învăluie viața și moartea. Astfel, povestea lui Alex nu este doar relatarea unei întâmplări personale, ci devine un catalizator pentru reflecții asupra unor aspecte profunde ale existenței umane și interacțiunii dintre lumea fizică și cea spirituală. Înțelepciunea dobândită în momente de cumpănă poate lumina două din întrebările fundamentale ale existenței: De ce trăim? şi De ce ni se oferă o a doua şansă la viaţă?

Un vizionar trebuie să recunoască cum întâmplările existenţiale, ancorate de contextul său spiritual, îl provoacă să reevalueze modul în care percepe și valorifica propria relație cu divinitatea.

O înţelegere nouă cu privire la Dumnezeu se poate căpăta doar prin intermediul unor "minuni", evenimente neaşteptate şi incredibile care ne obligă să credem într-o forţă aflată mult deasupra lumii, deasupra a tot ceea ce credeam că ştim. Nicicând nu va fi mai mult necesară o minune, decât atunci când ne simţim complet "în derivă" în această viaţă tumultuoasă, şi nicicând nu vom înţelege mai puternic prezenţa lui DUmnezeu decât atunci când cea mai mare nefericire s-a preschimbat în cea mai neaşteptat de mare fericire.

Tu ești conștient de modul în care vocea interioară te ghidează în tumultul vieții, având convingerea că aceasta este o revelație a echilibrului tău psihic, așa cum cerul reflectă uneori starea pământului?

O introducere în inefabilul lui Adrian

On Septembrie 11, 2015

Exercită-ţi puterea de descoperitor, îmbrăţişând ceea ce se iveşte prin intermediul unei compoziţii intelectuale unice.

Nu voiam ca lumea să vadă la mine, rătăcit în altă lume poate paralelă, prin utilizarea unui limbaj ezoteric, procesul de disoluţie a substanţei active numite: *„Philosophia tribuit sese transformandi”* – compoziţia gândirii pornite din nimicurile grave ale vieţii. Inedit, mă alăturam reprezentaţiunilor unui modernism al artei conceptuale care depăşise momentul de maximă expansiune.

Adesea, intram în acea stare de nelimitare proprie unui scriitor care gândeşte în mare, faţă de cititorii care gândesc pe bucăţele. De aici, o filosofie a comunicării prin creaţie, un stil care ducea de la introspecţie la analiza unei potenţiale instanţe autonome de control asupra alternanţelor dintre înţelesuri şi dedesubturi. Dar, asemenea unui licurici care sclipeşte doar pentru o clipă şi apoi piere, întreaga vedere a ideii mele despre arta scriitoricească se estompa după primul răcnet al excesului de ficţiune.

Gândiţi-vă la nesfârşitul unui cer înstelat care se confruntă cu realitatea vie într-un loc fără legi, ca o sublimă manifestare a unui concept formal elegant. Veţi întrezări acele latente porniri către un exces de visare sumbră, o exacerbare a avântării în incertitudine, privind parametrii de intrare în evoluţia formidabilă a variaţiunilor de direcţie. Era cineva pregătit să constate la mine ceea ce nu se putea vedea decât prin gemuleţul subiectivităţii?

Leadership: Poţi să dai semnificaţie unei forme de exprimare autentică care transmite mesaje simbolice dincolo de conținutul real al cuvintelor, având deschidere către reperele cauzale ale valorilor experienţial-empatice?

La eroul scriitorului Thomas Mann, pe nume Adrian Leverkuhn, toate trebuiau să reiasă dintr-un ceva cu sens închipuit, să fie descoperite dintr-un ceva care poate fi creat sau clădit pe un suport artistic. Scrisorile sale trebuiau să fie descifrate pentru a putea fi înţelese. Celui ce le citea îi venea să se dea cu capul de pereţi că nu pricepe absolut nimic din ele. Era o putere de control transmisă printr-o formă de exprimare ce a fost în prealabil încărcată cu sensuri ascunse de un vrăjitor.

Adrian, fără să ştie să citească notele, fără digitaţie, stăpânea această formă extraordinară de exprimare şi nu o folosea pentru a crea confuzii în compoziţiile sale muzicale, ci pentru a descoperi noi armonii, noi exerciţii de modulaţie, noi construcţii de figuri melodice cu o ritmică nedefinită.

Eu eram un fel de oglindă a lui Adrian, dar una care se preface într-o închipuire a unui chip purtat în balansoarul trăirilor pline de miez, de semnificaţie. Am o singură calitate, îmi ziceam trasând în sineitatea mea o linie destul de nedefinită. Am învăţat să mă folosesc de ceea ce alţii nu vor putea să cuprindă niciodată: ştiinţa de a străbate un calvar suplimentar de intersecţii de la care pleacă în coborâre un singur drum. Ştiinţa de a fi o întrebare la care ceilalţi nu pot găsi răspuns.

Reperele cauzale ale valorilor experienţial-empatice care mă legau atât de mult de Adrian, domnind peste soclul abundenţei de expresii şi terminologii întâlnite numai în literatura de specialitate, erau date de exigenţele unei expresivităţi a imediatului care trădau latura agitată şi nonconformistă a firii mele. Ele puteau fi analizate numai din perspectiva unei

forme de perfecţionism care mă epuiza în întregime.

Sfâşierile mele lăuntrice, exacerbarea avântării în incertitudine, constituiau de fapt vibraţiile fine ale gândurilor lui Adrian.

Leadership: Îţi asumi responsabilitatea autenticităţii, utilizând nişte compoziţii înfăptuite după modelul unei forme de exprimare proiectate pe temeiul unui suport ştiinţific rigid?

Cine este destul de avântat spre autentic, încât să gândească în mare tot ceea ce alţii nu sunt pregătiţi să înţeleagă decât pe bucăţele, poate foarte uşor să se abată de la normele convenite de leadership. Leadershipul are la bază proiectarea unei cunoaşteri care ghidează spre o extindere a gândirii, pentru câştigarea libertăţii de a nu fi limitat, trecând informaţia dintr-un singur cadru de referinţă rigid în altul de navigare înspre diferit.

Numai cine îmbrăţişează ceea ce se iveşte prin intermediul unei compoziţii intelectuale unice, chiar cu riscul de a fi o întrebare la care ceilalţi nu pot găsi răspuns, va reuşi să adauge noi sensuri universului său conceptual.

Artistul îşi personalizează parcursul de formare şi dezvoltare prin asumarea experienţei de se angaja într-o ştiinţă a particularului, privind creaţia drept o mulţime divizată de elemente imaginative. Această personalizare prezintă o legătură cu exercitarea puterii sale de descoperitor prin faptul că se simte atras de o experienţă bazată în primul rând pe o varietate de teme şi abordări nefamiliare.

Astfel poţi da o direcţie nouă acţiunilor tale şi mai ales sinelui - care se străduieşte să-şi desfăşoare proiecţia într-un univers al celor ştiute şi neştiute, al posibilităţilor de reinventare prin acumulare de sensuri închipuite atribuite noţiunilor asimilate.

Un suport ştiinţific solid în arta literară reprezintă un caz de abandonare de sine într-un spaţiu plin de încărcătură emoţională, intelectuală şi spirituală, tangent cu exigenţele unei expresivităţi a imediatului care nu te lasă să creezi personaje neutre, ci doar unele cu destin aparte.

Totalitatea artistului care îşi pune la încercare competenţa ştiinţifică cât şi abilităţile literare rezidă din puterea imaginarului de a reconstitui din fragmente dispersate de informaţii parţiale trăirile unei minţi conştiente de sine. Acestea vin în interacţiunea cu particularul unui subiectivism exagerat, dar strălucitor prin nemaipomenita forţă impulsivă a dorinţei de a epata, sub orice formă.

În acest caz leadershipul îşi determină adresa de identificare din două perspective distincte: una a totalităţii care succede haosul şi cealaltă a interconexiunilor dintre aspectele de noutate pe care le zugrăveşti în raport cu tendinţele de manifestare şi corectare a confuziilor.

A crea premisele unei evoluţii care are ca efect redarea unei forme de exprimare prin creaţie, cu riscul de a-ţi fi contestată autoritatea în materie de artă, înseamnă să reprezinţi în plan valoric „totalitatea" prin extinderea acelor interconexiuni.

Iar dacă vrei să-ţi asumi autenticitatea utilizând nişte compoziţii înfăptuite după modelul unei forme de exprimare proiectate pe temeiul unui suport ştiinţific rigid, toate aceste premise se vor concretiza mai greu sau se vor dovedi false.

Leadershipul este ceea ce scoţi la iveală prin intermediul exprimării autentice, în consonanţă cu trăirile model ale unei minţi care gândindu-se pe sine, regândeşte întreaga lume.

O introducere în inefabilul lui Adrian scoate în evidenţă acea categorie a indivizilor care experimentează o exacerbare a avântării în incertitudine, problemă specifică tuturor artiştilor care vor să evolueze prin extinderea cunoaşterii - pornind de la un context subiectiv sau de la nişte constatări greu de validat, dar din care reuşesc să producă ceva de valoare.

O lacrimă a orbului

On Septembrie 19, 2010

Evaluează-ţi bine calităţile şi limitele, fără să îngădui nicio abatere de la tine însuţi.

Unul dintre soldaţii generalului Mustafa Yakubu, care rămăsese în urmă, o descoperi pe doctoriţa Kendricks. Îşi încărcă arma şi o îndreptă spre ea cu un singur gând. Prin mintea femeii trecură iute o grămadă de posibilităţi de ieşire din această situaţie – s-o ia la goană era prima, dar îşi dădu seama că nu mai avea timp. Rămase neclintită locului, incapabilă să reacţioneze.

Locotenentul Waters îl imobiliză imediat pe soldat cu o singură lovitură de cuţit, salvând-o astfel pe doctoriţă de la o moarte sigură. Apoi dădu ordinul de înaintare spre zona Apha. O voce lăuntrică stăruia însă îndărătnică în capul femeii. Mânată de o nemărginită teamă, doctoriţa îl rugă pe Waters să facă ceva ca să-i împiedice pe ceilalţi soldaţi ai generalului Mustafa Yakubu să ajungă la misiunea St. Michael. Dar locotenentul trebuia să fie dur şi neîndurător. O întoarcere de la scopul primordial îi putea periclita misiunea. Aşa că a ignorat complet dorinţa femeii, şi le-a dat ordin celorlalţi membri ai echipei lui de comando să-şi continue drumul.

Leadership: Îţi este hărăzită încercarea de a da sens experienţei trăită printr-o incursiune în ascunsul unui regret care te ajută să înveți să nu te deteşti pentru ceea ce ai greșit?

Un conducător de trupă de comando vede consecinţele acţiunilor sale mai departe şi cu mai mare claritate decât cei din jur. Atunci când are de îndeplinit o misiune importantă, el trebuie să-şi lase temerile deoparte şi să fie pregătit pentru orice situaţie, să reacţioneze fără şovăială şi fără sentimentalism ori de câte ori trebuie, să fie mai rece decât este în realitate, să facă orice sacrificiu, să meargă drept la ţintă, fără păreri de rău şi fără ruşine, gândindu-se în fiecare clipă la consecinţe.

Îţi permiţi vreo abatere de la tine însuţi? Locotenentul Waters, din filmul " *Tears of the sun (2003)* ", a rămas orb la rugămintea stăruitoare a doctoriţei Kendricks şi impasibil faţă de soarta celor din misiunea St. Michael. Putem lesne să înţelegem atitudinea lui. El trebuia să se ocupe în permanenţă de stabilirea direcţiei pe care trebuia s-o urmeze echipa lui, impunându-şi voinţa, ca să se asigure că "pachetul" va ajunge în siguranţă la destinaţie.

În leadership trebuie să-ţi întăreşti voinţa suficient de puternică pentru a rezista tentaţiei de a te răsplăti pentru eforturile depuse în realizarea unui act de intervenție ilicită într-un proces de ascensiune. Această ascensiune poate să alterneze cu decăderea ta din drepturile tale de persoană dependentă de o anumită răspundere.

El trebuia să fie neînduplecat în îndeplinirea misiunii sale, neîngăduind nici cea mai mică abatere lui însuşi sau celorlalţi membri ai echipei sale. Toate acţiunile sale trebuiau subordonate înfăptuirii misiunii. Nu avea voie să fie nesigur şi plin de tot felul de îndoieli, că nu cumva să eşueze. Dacă nu reuşea să obţină rezultatele promise şi să-şi îndeplinească misiunea pentru care a fost angajat, cariera lui era terminată.

În leadershipul militar nu poţi fi sigur că soarele va străluci mâine. Nicio lacrimă nu şi-a putut îngădui locotenentul Waters să verse pentru toate acele vieţi omeneşti de la misiunea St. Michael care s-au aflat în pericol şi pentru care el nu a putut face nimic, sau mai degrabă nu a dorit să facă nimic, constrâns fiind de împrejurări şi de cerinţele misiunii sale.

Eşti genul de lider care spune „Nu” atunci când simţămintele îi ordonă să spună „Da”?

Dar remuşcările l-au cuprins adânc atunci când a văzut din elicopter că toţi acei oameni de la misiune au fost ucişi de către soldaţii generalului Mustafa Yakubu, pe care poate că i-ar fi putut împiedica să ajungă acolo, dar cu riscul celorlalte vieţi pe care le avea în grijă. În acel moment, lumea lui interioară, cu toate contradicţiile ei, s-a schimbat. Abia atunci şi-a dat seama că nu e deloc uşor să fii genul de om care spune „nu”, şi-a dat seama cu adevărat ce înseamnă să fii lider, să fii nevoit să iei decizii incomode şi să nu poţi salva lumea.

Unde „locuieşte” sufletul tău bun în ceasurile cumplite? Cel mai cumplit chin pentru un lider cu un suflet mare este să îngroape orice urmă de compasiune.

Aşa cum vă spuneam şi în articolul "Un soare aflat pe drumul spre apus", locotenentul Waters, n-a putut să stingă în el orice urmă de compasiune. Ci s-a reîntors şi i-a salvat pe localnicii pe care îi abandonase pe câmp, luându-şi revanşa pentru toţi aceia care au murit la misiune, deoarece în ciuda aparenţelor de om dur cu suflet de oţel, avea şi el sentimente.

Liderul este omul care ştie să se facă înţeles într-un context dat de circumstanţele externe şi de condiţiile de valabilitate ale identităţii sale într-o explorare generală a compasiunii, solidarităţii, dar şi a frustrării cauzată de neputinţa de a preveni o tragedie.

Concluzie: Liderii militari trebuie să execute ordinele date de superiorii lor, în ciuda sentimentelor şi părerilor personale. În structurile militare, ordinul se execută şi nu se discută, în caz contrar eşti aspru pedepsit pentru orice iniţiativă care se abate de la îndeplinirea ordinului primit. Dar lacrimile pe obrazul orbilor – a acelora care acţionează orbeşte şi fără sentimente umanitare, sunt tardive şi lasă urme adânci în sufletul lor.

Evaluează-ţi bine calităţile şi limitele fără să îngădui nicio abatere de la tine însuţi.

O lucrare de doctorat nu luminează ca o stea pe cer

On Februarie 18, 2023

Ridică-te la înălţimea unei capodopere nepreţuite, într-un mod analog stelelor ce se-aprind şi strălucesc numai în ceruri.

Prea multe doctorate, și prea mulți neștiutori. Cu cât strângi mai multe diplome și certificări, cu atât te îndepărtezi mai mult de calea Marii Științe, exact cum dictează legea fizică: când împingi un sistem, acesta se îndepărtează de tine. În baza acestui considerent pot conchide că efortul depus pentru realizarea unei lucrări de doctorat, a cărui conţinut nu este intuit şi bine surprins în baza faptelor experimentale, nu este echivalent cu un sistem care interacționează material-energetic cu mediul exterior lui.

De fapt, o lucrare de doctorat ar trebui să fie o versiune a unei "invenţii majore", un soi de perpetuum mobile capabil să asigure ştiinţei continua regenerare, o comunicare asupra unei descoperiri extraordinare care să ducă la construirea unei noi perspective de gândire şi acţiune. Trebuie să fie încununarea unei experienţe care confirmă, prin fapte, că pregătirea profesională a fost şi este o preocupare continuă.

Dar în majoritatea cazurilor, oamenii "se inspiră" mult prea mult din alte lucrări de specialitate, în loc să-şi folosească propria minte, în totalitate, pentru a crea ceva formidabil din experienţa proprie. Cu totul diferit stau lucrurile în cazul unei descoperiri uimitoare care poate să ocupe un loc de cinste între marile creații ale umanității, transpusă într-o serie de mărturii aduse în sprijinul propriei experienţe, sau recurgând la o interpretare a propriei viziuni asupra unei anumite tematici.

Tensiunea simultaneităţii dintre creaţie şi Eul creator, provocată de sensul unei altfel de organizări a ideilor, modifică sintaxa lucrurilor, relaţia eu-lucru şi relaţia nume-lucru. Or lucrarea de doctorat nu trebuie se devină o turnură lingvistică, o ruptură a simultaneităţii dintre limbaj şi cunoaştere, un aport insuficient sau inadecvat de informaţie, ci mai degrabă ea trebuie să constituie o abţinere de la orice preluare a ideilor celorlalţi, fiindcă în orice creaţie de mare viitor doar Originalul contează.

Leadership: Încerci să-ţi măreşti capacitatea de autoevaluare realistă a propriei persoane, printr-o reflecţie nepărtinitoare asupra unei experienţe de cunoaştere care nu dobândeşte rezultatul gândit de tine?

De regulă, individul care urmăreşte doar generalul abstract este însufleţit de tendinţa de orientare către alte moduri de gândire, diferite de a sa, atenția fiindu-i concentrată în jurul unui rezultat care de cele mai multe ori evită acţiunea legilor Creaţiei. Memoraţi aceste legi:

A fi un creator desăvârşit, presupune un efort greu de îndurat, ca un frig cumplit care îţi mănâncă din oase, îţi intră în organe prin fiecare părticică de piele lăsată liberă şi îţi consumă toată energia. Este un greu pe care doar cei cu un real potenţial spiritual pot să-l transforme în putere, un drum lung pe care îl parcurg doar maratoniştii care nu-şi încheie cursa la linia de final.

Ideea unei extinderi de la o singularitate primordială la pluralitatea unei fiinţe care ţi-a aparţinut într-un timp nedeterminat, poate fi contopită în amprenta unui act de creaţie care nu ţine doar de planul material, ci de cel spiritual.

Cine caută să deprindă tainele științei, acela care vrea să cuprindă cu privirea orizontul larg și nelimitat pe care îl deschide un singur bob de nisip, acela care vrea să transforme plumbul în aur, acela care caută o trecere spre viața veșnică, fără îndoială acela va trebui să trăiască povestea unui Robinson Crusoe, retras cât mai departe de lume.

Când eşti singur cu mintea ta, toată energia universală se focusează în punctul în care intri în starea de spirit prin care simţi că străluceşti. Când te retragi departe de lume, abia atunci intri în povestea unei descoperiri unice, fiindcă alegi să te întorci către tine, să te asculţi, să te cunoşti, să îţi descoperi adevărata esenţă, şi astfel începi să vezi mai bine ce îţi spune vocea intuiţiei tale. Bine spunea cineva:

"*Când te retragi în propria cochilie, vei găsi pacea necesară descoperirii răspunsurilor benefice pentru tine. Pe de altă parte, însă, loviturile sorţii te pot determina destul de uşor să te retragi în propria carapace, tăindu-ţi elanul creativ. De aceea, trebuie să fii puternic şi să înduri timpul pe care Dumnezeu ţi-l acordă ca să te poţi cizela cu talent şi perseverenţă.*"

Și câți oare au citit "Piatra filozofală" scrisă de Marguerite Yourcenar? Câți au auzit glasul alchimistului ce strigă în pustiu? Câți oare au citit "Insula Doctorului Moreau", câți au trăit viața retrasă a cercetătorului și omului de știință care aproape l-a egalat pe Dumnezeu? Și câți au înțeles mintea genială a inginerului "Robur Cuceritorul" care, singur cu calculele sale spațiale, a învins dominația naturii și a ajuns stăpânul ei datorită invenției lui de peste timpuri?

Povestea fiecăruia dintre ei este, de fapt, povestea unei fiinţe solitare, dar evoluată, provenită din alt timp, din alt loc, din alt pasaj al cărții: „N-ai visat niciodată altă lume?" Toţi aceştia sunt una şi aceeaşi fiinţă, dotată cu o reală măreţie, dar surprinsă în ipostaze diferite. Nu degeaba teoria nemuririi (trăirea într-un timp paralel cu destinul) susţine că orice fiinţă evoluată provine numai din altă fiinţă evoluată care i-a dat naştere în alt timp şi alt loc.

Leadership: Poți să găseşti o cale de percepţie superioară unei realități interioare izvorâtă din apartenenţa ta la o lume divină, printr-o ascensiune celestă care nu poate fi contrabalansată de o altă putere?

Cel care a deprins tainele Marii Științe nu are nevoie de nicio diplomă și de niciun certificat ca să-și dovedească *ahora y siempre* apartenența la totalitatea divină, entitate care pretinde fapte adevărate transpuse adesea în supranatural. Talentul și perseverența sunt singurele chei care deschid cufărul marilor comori din constelația gloriei. Și ele pot fi găsite doar experimentând varianta unei povești vechi de atâtea secole.

Cu aproape un mileniu şi jumătate în urmă, un Robinson Crusoe s-a retras înadins în singurătate, studiind cu sârguință medicina, chimia și astronomia. Toți doctorii din orice parte a lumii au auzit şi azi de Avicenna (Abū 'Alī al-Husayn), dar de ei nimeni nu aude peste timpuri, tot aşa cum nicio construcţie nu se păstrează din epocile anterioare. Rareori se găseşte o persoană care îşi poate asuma responsabilitatea pentru întregul plan divin.

Cel din timpuri îndepărtate rămâne nemuritor, ca emblemă a harului divin dăruit de însuşi Dumnezeu, iar majoritatea urmaşilor sunt doar niște trecători - unii luminează o clipă, apoi dispar definitiv. De milioane de ani aştrii cei mai luminoşi au rămas în locul lor, în aceeași formulă, și chiar dacă din când în când apare câte o stea căzătoare, străfulgerând o clipă cerul, ea nu stă alături de Luceafăr și nici nu constituie o prelungire din osia din urmă a Carului Mare.

De s-ar găsi măcar un om care să se ridice la înălțimea cerului și a veșniciei, și pentru El va fi salvată această lume. Ei bine, un asemenea om, determinat a împlini voia lui Dumnezeu, își

va exprima apartenenţa la spiritualitatea divină printr-o radiere de lumină din interior, asemeni aştrilor.

Prins în mişcarea timpurilor, omul spiritual se încrede în mişcarea spiritului lumii, în acea posteritate pentru care autenticitatea nu e pierdută, conştientizând adevărul pe care îl spunea Ernest Renan:

„Dacă vrei să fii de vreun folos pe lumea asta, trebuie să te jertfeşti pe tine însuţi, adică să renunţi la bucuriile trecătoare ale lumii pentru a dărui lucrări de seamă omenirii."

O lucrare de doctorat nu luminează ca o stea pe cer, dar naşterea unei stele gigantice dintr-o galaxie vecină, facilitând accesul către descoperirea unei noi lumi, poate să constituie subiectul cu adevărat însemnat care ar pune în valoare o lucrare de doctorat. Numai magnitudinea unui asemenea subiect ar putea să sublinieze importanţa unei lucrări de doctorat.

Tot ce este spiritual este cuprins în energia stelară. Iar soarele, locul unde se unifică forţele din univers, transportând energie subtilă dintr-un loc în altul, guvernează sufletul lumii. Dar nimeni nu caută să lumineze ca o stea atunci când îşi scrie lucrarea de doctorat, printr-o devoţiune deplină faţă de partea spirituală. Chiar şi ideea unui big bang poate fi ușor contopită în amprenta unui act de creaţie.

Atunci când îţi pui mintea la contribuţie trebuie să funcţionezi ca rezultat al convergentei energiei subtile. Prin urmare, caută să te exprimi în felul soarelui de a încălzi planeta, să iei căldura lui drept o răsfrângere sufletească, şi întrucât este un loc al unităţii, conţinând numeroase frecvenţe energetice care se combină, de aici îţi poţi controla realitatea. Nu uita că o sursă de lumină puternică se poate găsi chiar acum în tine, conform unei descoperiri surprinzătoare.

Iar ceea ce tocmai am scris acum cu mâna mea, și care animă o inimă curată, adevărul acesta nu-l veți găsi în nicio lucrare de doctorat. Sper să fie ca un far în noapte, undeva în cer...

O nouă orientare a leadershipului

On Iunie 22, 2013

Îndrăzneşte să trăieşti prin revelaţia unei noi reprezentări despre sine, fără să judeci cu realism caracterul, calităţile şi defectele lumii care te înconjoară.

Este scriitor, sau este doar Camil? Crezi că să iubeşti un scriitor înseamnă să priveşti peste umărul lui când scrie, să-ţi sprijini obrazul de umărul lui? Sau să-l ţii îmbrăţişat pe după umeri, lăsându-i mâinile libere şi posibilitatea de a respira? Crezi că poţi măcar să te aşezi pe jos, şi să-ţi pui capul pe genunchii lui, şi el să-ţi umble prin păr, ca prin blana unui câine credincios? Sau să stai cuminte într-un colţişor, să nu vrei nimic decât să respiiri?

Dacă i-ai spune asta lui Camil, ar râde cu poftă sau s-ar înfuria şi ţi-ar trânti: "Eşti o proastă ! " Sau te-ar privi cu răutate ca pe cel mai aprig duşman. Să-l iubeşti pe Camil înseamnă să dispari când vrea el, să-l ajuţi să uite că exişti, să te topeşti în neant.

Ca să scrii, ai nevoie să nu simţi pe nimeni la câţiva kilometri împrejur. Nu-i vorba de femeia de serviciu, care ţi-e indiferentă. Îţi aduce un pahar cu apă când ai nevoie, sau se duce să-ţi cumpere ţigări şi te lasă acolo în faţa hârtiei, să te chinui, să mori, să învii, să mori şi să scrii, fără să-i pese. Nu-i aşa că n-ai admite, chiar dacă n-ai fi nevasta lui, să nu ai o cheie ca să vii la el când vrei? Ei bine, după ceasuri de încordare, poate că el vrea să-şi aducă o femeie oarecare, o femeie care nu pune întrebări. Ai accepta?

Dar atunci ce înţelege Camil prin iubire? *

Leadership: Pentru a înţelege mai bine viaţa trebuie să comuţi imaginea întregii tale fiinţe pe modul "Stand-By" generat de accentuarea sentimentului de insatisfacţie pe care îl exercită discernământul de a vedea vremelnicia lumii şi nimicnicia omului de rând?

Liderii cei mai iscusiţi încearcă să ajungă la o stare de împăcare cu rolul pe care îl îndeplinesc, acela de a da un sens vieţii şi de a deschide celorlalţi ochii spre ţeluri mai înalte decât satisfacerea nevoilor personale. Dar pentru ca scopurile să se coreleze cu misiunea lor în aşa fel încât capacităţile lor să nu se poziţioneze într-o regiune de sine stătătoare şi să îşi piardă vitalitatea, ei evită zona de conflict cu ei înşişi căutând să gândească obiectiv, cu capul limpede.

Superioritatea unui lider nu este legată doar de valorificarea durabilă a unor deprinderi de activitate intelectuală, modele de bune practici creative, inovative şi eficiente, ci mai mult este legată de punerea în mişcare a discernământului de a vedea vremelnicia lumii şi nimicnicia omului în faţa destinului. În această fază aparte, când eşti la mutare dar nu dispui decât de continuări de activitate intelectuală ce te aduc forţat în dezavantaj faţă de propria poziţie de superioritate, se dă lupta cea mare cu gândurile negative datorate incapacităţii de a face faţă datoriei morale de a înfrunta dispreţul şi oprobiul oamenilor.

De fapt, vremelnicia lumii şi nimicnicia omului se vede în felul cum se raportează la sensul vieţii altora, dacă este sau nu dispus să se ataşeze de cineva fără să-l facă să sufere mai târziu, fără să-l facă să se simtă marginalizat, chiar dacă trebuie să-i judece cu realism caracterul, calităţile şi defectele. Cea mai gravă şi ultimă piedică a unui om care a reuşit şi ar putea să meargă mai departe cu leadershipul este să se acopere cu o formă de uitare, să-şi renege atributul sufletului printr-o ipostază de genul: "mai bine să mă retrag decât să accept un compromis".

O cale necesară de a înţelege viaţa este să deschizi ochii la o lume în care ai posibilitatea să te regăseşti mai mult într-o ipostază de vizitator decât într-o ipostază de vulnerabilitate (când nu-ţi poţi recunoaşte ataşamentul faţă de anumite standarde, rigori, valori).

Modul "Stand-By" se referă la o şedere de lungă durată, dar nu definitivă, într-un anumit moment al vieţii pe care lumea din jur îl trăieşte ca pe un simţământ de separare de lumea exterioară. Înseamnă să fii perceput drept vizitator al unei expoziţii în care nu se află un anumit număr de tablouri de o originalitate şi de o virtuozitate rară, ci doar nişte exponate ce merită văzute o singură dată.

În acest caz leadershipul poate fi privit drept un manifest dedicat conştientizării unei stări de spirit care porneşte de la sentimentul unei tragice pustietăţi lăuntrice şi se continuă cu revelaţia unei certitudini: aceea că nu eşti întotdeauna înconjurat de prieteni, şi că ceea ce faci trebuie să aibă un sens mai înalt, de a te raporta de exemplu la activitatea ştiinţifică, la actul de creaţie, deci să fii capabil să trăieşti prin suspendarea relaţiilor sociale şi emoţionale.

Modul "Stand-By" al stării tale funcţionale nu îţi asigură nicidecum o varietate de posibilităţi de configurare personală în aria în care eşti interesat să evoluezi. Deci, este presant să te comuţi pe modul "Wake-Up", punându-ţi la încercare capacitatea de a practica o deschidere spre noi orizonturi de cunoaştere de sine.

A te concentra asupra vieţii personale presupune să-ţi formezi o imagine mai completă şi realistă asupra conţinutului de însuşiri pe care eşti înclinat să le consideri compatibile cu voinţa ta de a te elibera de nevoia ca ceilalţi să te valideze pentru ceeea ce eşti.

Un expert în materie de leadership atrăgea atenţia la un moment dat: *"Dacă nu te cunoşti, cum vei putea să accepţi ceea ce nu poţi schimba sau să schimbi ceea ce trebuie pentru a fi un lider mai bun?"*

Înainte de a ajunge în poziţia de lider, întreabă-te unde greşeşti ca om, unde te poţi corecta şi unde poţi găsi o mână de ajutor. La oamenii din jur sau în prestarea unei activităţi independente? Ca metodă de investigare a funcţionalităţii proprii, leadershipul se poate contura ca singurul reper de evaluare a performanţelor de care te poţi agăţa pentru a interveni în sprijinul propriei apărări împotriva eroziunii morale şi psihice.

Asta prin identificarea şi determinarea în structura propriei personalităţi a acelei modalităţi de acţiune în concordanţă cu evoluţia altor domenii de interes. Focul acela intern care să te facă sigur pe tine când intri într-o zonă grea a carierei, într-un ritm alert de activitate.

Adesea, leadershipul este legat de natura şi condiţia severă a omului care este nevoit să se raporteze la viaţă prin prisma deciziilor de a nu acţiona în numele altor oameni, ci în numele unui ideal de împlinire intelectuală şi creatoare.

O nouă orientare a leadershipului ţine de nevoia de a te conecta la ceva mai presus de relaţia cu ceilalţi oameni care oricând te pot dezamăgi prin uitare, prin nepăsare, prin indisciplină sau prin decizii aberante. Este vorba de nevoia de a te conecta la o nouă formă de existenţă: cea interioară, aflată sub semnul unei căutări iniţiatice profunde în arta de a fi unic dincolo de barielele emoţionale şi comportamentale. Aici mă refer, îndeosebi, la raportul dintre ştiinţă şi credinţă.

Poţi să te reprezinţi în mijlocul lumii drept o fiinţă superioară, fără să te identifici cu emoţiile şi credinţele limitative ale altora?

Desigur. Făcând abstracţie de la tendinţele ideologice şi doctrinare ale slujirii sociale. Un mijloc este să făci apel la realizările ştiinţei, creaţiei şi tehnicii aplicabile domeniului tău de specialitate. Un apel referitor la necesitatea sporirii influenţei ştiinţei în societate.

O nouă tentativă de definire a leadershipului

On August 05, 2016

Plasează-te într-o ordine determinată de regulile distincţiei pe care o faci între competenţa de a dispune asupra unor obligaţii și capacitatea de a stabili valoarea îndeplinirii acelor obligaţii.

Primele filmări au avut loc în studioul din strada Jitnaia, destul de bine utilat pentru vremea aceea. Participau la filmări actori din trupa teatrului Proletkult, iar mai târziu, pentru scenele de masă, s-au folosit atât elevi ai studiourilor proletkultiste, cât şi tineret muncitoresc din fabricile moscovite. Se filma zilnic. De fiecare dată, după terminarea filmărilor, echipa discuta despre munca desfăşurată şi decidea cele ce erau de făcut a doua zi.

La aceste discuţii, Eisenstein cerea totodată mai mult decât i se oferea.

De câte ori direcţia încerca, de pildă, să reducă numărul figuranţilor, lui Eisenstein i se părea că i se limitează pofta de filmare. De fapt, Eisenstein îşi imagina fiecare scenă cu exactitate, căutând, la filmare, să-şi realizeze întocmai gândurile. Chiar şi atunci când ele era greşite. Pentru că de aici, de la primul film, încep criticii să-l acuze de prolixitate. *

Calitatea conexiunii tale la leadership se naşte din acea parte din tine care reacţionează la ceea ce e condiţionat de ceilalţi, în aceeaşi idee a multitudinii de perspective ale conceptului identitate a propriului Ego?

Există o corespondenţă între rol, stătut și contribuție, în cele mai profunde straturi ale muncii de îndrumare și control, între artist și colaboratorii săi, care are drept suport de susținere asumarea condiţiei de a fi o parte de tip constatativ a Creaţiei (semnalarea oricărei imperfecţiuni, prezentarea calităţilor sale, a avantajelor de a o folosi).

Regizorul îşi creează propriul univers de actori, scenarii, filmări, coregrafie şi o paletă diversă de interpretări prin intermediul limbajului şi al acţiunii, într-o scenă de lungimea întregului film. Şi asta pentru că are putinţa de a se pune în legătură cu cineva care să-i furnizeze ştiri şi informaţii exacte, dar mai ales pentru că are putinţa de a pune mediul scenic în concordanţă cu sine însuşi.

Iar asumarea condiţiei de a fi o parte de tip constatativ a unei creaţii de proporţii, realizată cu un sprijin consistent, este manifestarea cea mai apropiată a reacţiei de măsurare a propriilor expectanţe și se determină prin următoarea condiţie: *"cere întotdeauna mai mult decât ţi se oferă "* .

Conceptul de identitate a propriului Ego se referă la apartenenţa la o realitate pe care o dezvolţi preponderent prin interacţiune cu perspectiva necesară plăsmuirii şi interpretării artistice, chiar dacă de fapt eşti înconjurat de alte orientări, în măsură diferite de ale tale.

Leadershipul este consecinţa acestei condiții. Ea este un imperativ al datoriei absolute, acela de a te face înțeles, de a te plasa într-o ordine nouă determinată de regulile distincţiei pe care o faci între competenţa de a dispune asupra unor noi obligaţii și capacitatea de a stabili valoarea îndeplinirii acelor obligaţii.

Partea din tine care reacţionează la ceea ce e condiţionat de ceilalți este vocea

responsabilităţii, ea depinde de aceste două atribute: competenţa și capacitatea care contribuie la dezvoltarea competenţei de a construi un scenariu viu și posibil. Practic, ele se interconditionează și se schimbă după neașteptate meandre ale multiplelor nivele de valoare ale creaţiei, ca o consecinţă a predominanţei acelei forme de răspuns la atitudinea colaboratorilor tăi faţă de respectiva creație.

Ceea ce constaţi din punct de vedere al tratării creaţiei, ca pe o scară a lui Iacob pe care suie şi coboară raţiunile, energiile, valorile predominante ale colaboratorilor tăi, este că nu contează doar apartenenţa lor la evaluarea autentică pe care o faci constant. Ci, mai mult decât atât, contează apartenența lor ceea ce dă sens exigenţei de a fi tu însuți rezultatul acelei creaţii.

Ordinea determinată de regulile distincţiei pe care o faci între competenţele tale şi competenţele celorlalţi ţine de esenţialul creaţiei pe care îl scoţi în evidenţă, de gusturile celor care investesc timp şi interes în ideile artei tale, de feelingul lor, de capacitatea lor de a se însera în povestea ştiinţifică a creaţiei tale.

O nouă tentativă de definire a leadershipului sună cam așa: leadershipul este marca unei creaţii al cărei sens şi finalitate sunt înscrise în rigoarea imperativului: cere întotdeauna mai mult decât ţi se oferă !

*** Notă:** Ion Barna - *Eisenstein* , Editura Tineretului, 1966.

O pasăre al cărei puf se pierde în zare

On Octombrie 06, 2013

Scurtcircuitează entitatea definitorie a omului, ca să scoţi la iveală tendinţele sale ascunse.

Întreaga lui înfăţişare dezvăluie un temperament de un calm desăvârşit, nu apatic, dar liniştit. Un om a cărui atitudine nu reflectă realitatea interioară, lipsa contrariilor, vreo notă discordantă în armonia elementelor care îl definesc. Criminalul, cunoscut ca şi Buffalo Bill, nu mai simte chinul lucrurilor pe care le săvârşise şi care îl făcuseră să devină un monstru persuasiunii şi al invaziunii în sfera lăuntrică a fiinţelor care îl înconjoară, nu simte durerea, frica sau irosirea, singurul simptom pe care îl resimte este neputinţa de a profila un nou ideal de personalitate, de neatins.

Numai o multiplicare a forţei mobilizatoare, în condiţii strict determinate, produsă de nişte scripeţi cu greutate morală inacceptabilă, ar fi putut să perturbe sistemul acesta compact de gândire. Numai ispitele de nezdruncinat ale simţurilor generatoare de adrenalină ar fi putut să determine o sensibilizare nervoasă, o forţă cu care trebuie luptat. Numai ciocnirile intermoleculare din constituenţii materialului dur din care este croit, conform unei ecuaţii chimice prestabilite, ar fi putut scoate la iveală tendinţele sale ascunse.

Ai fi crezut că trăieşte în armonie cu el însuşi, netrădându-şi niciodată valorile, fără să ceară nimic de la nimeni, muncind după bunul lui plac şi că, pe lumea asta, nimeni şi nimic nu îl poate scoate din ale lui. Dar ceva tremură în el, poate un gând insesizabil disimulat în spatele scepticismului. Din glasul lui se desprinde ceva ciudat, un simţământ tulburător. Sistemele de scripeţi morali declanşează alarma.

Leadership: Îţi foloseşti predispoziţia de a-i judeca pe ceilalţi într-un mod constructiv, în funcţie de modul cum ei îşi formează o convingere constituită într-o certitudine foarte ridicată privitoare la depăşirea unei realităţi îngrijorătoare?

Mintea suspicioasă intră deodată într-un moment de disperare, căpătând coordonatele unui cerc al cărui diametru variază după intensitatea propriilor gânduri şi intenţii. Îi tremură puternic vocea, ca un corp uşor electrizat. De parcă în el, în părţile fine ce-i definesc superioritatea, în componentele cele mai solicitate ale sistemului său funcţional s-ar fi creat nişte forţe de respingere misterioase, atingând valori foarte înalte. Teama îl cuprinde brusc. Ceva îi tulbură zâmbetul de pe faţă, tonul vocii i se precipită, este certitudinea foarte ridicată că a fost luat deja în vizorul FBI, şi nu mai poate depăşi această realitate îngrijorătoare.

Abia acum, când reacţiile elementare ale omului se fac simţite, luând valori maxime, când are loc defectarea staţiei de reglare a presiunii psihice, abia când particulele fine din respiraţia lui transmit frica cea mai puternică, abia acum senzorii instinctivi ai agentului Clarice Starling detectează necuratul, partea ascunsă dintr-însul. Ea simte că nu e în largul lui, că firea lui e stânjenită. Ascunde pe cât se poate adevărul. Da, el e criminalul, el este Buffalo Bill ! Circuitul unei lămpi se întrerupe, iar un altul se alimentează cu energie.

Identitatea acestui personaj liniştit, dar genial, este demascată. Pentru o scurtă clipă, vulturul devine o turturică fără grai. Puful unei păsări fără colorit se pierde în zare şi nu trebuie să faci o prea mare risipă de mişcări ca să-l strângi. El cade singur atunci când se produce o tensionare maximă a cablului de susţinere, atunci când are loc confruntarea cu propriul ego din pricina unei tentative eşuate de eliberare de trecutul apăsător. De adevărul pe care el îl conţine, ascuns în spatele unei identităţi false, a unor măşti fabulos realizate.

Leadership: Modul cum tratezi ce se întâmplă în viaţa ta are ca şi consecinţă găsirea unui mod de a măsura intensitatea momentului care te-a determinat să iei o anumită decizie vizavi de probabilitatea apariţiei unei imagini care se dizolvă în timpul examinării ei?

Aruncă o privire circulară asupra universului interior a omului de lângă tine. Cu siguranţă eşti un artist dacă reuşeşti să percepi sau să produci succesiunea de emoţii şi gânduri utile creşterii funcţionalităţii lui proprii. Câmpul principal de susţinere de care el se serveşte ca să-şi schimbe Ego-ul, supus de o constrângere căreia altfel nu-i poate rezista, este dat de imaginea pe care şi-o doreşte în faţa ta, dar care nu este neapărat reprezentarea corectă a unei conştiinţe ce şi-a asumat lucid destinul.

O imagine pe care ţi-o formezi despre cineva în timpul examinării ei este un instantaneu de excepţie care îţi stârneşte admiraţia sau îngrijorarea, surprinzând perfect o emoţie, un gând, o situaţie aferentă demersului de a descoperi o realitate pe care nu ai mai încercat-o. Această imagine evidenţiază rezultatul unei căutări avansate generată de dorința de afla „altceva” decât ceea ce cunoşti despre o persoană care se luptă cu un anumit tip de dependenţă, considerându-se ea însăşi ca fiind altcineva decât pretinde a fi.

Dar această imagine se spulberă imediat dacă nu are o zonă transparentă care să-ţi permită vizualizarea nivelului de "vibraţie" lăuntrică: împăcare cu sine, speranţă, înduioşare, sau deznădejde, regret, resemnare, etc. Imaginea omului este resimţită sub forma unei senzaţii specifice (de bucurie sau de nelinişte) care are drept consecinţă evidenţierea unui adevăr mai puţin dorit.

Leadership: Modul în care creionezi profilul anumitor persoane are ca şi consecinţă starea ta din momentul imediat următor producerii unei forme de comparaţie dintre ce crezi că ştii şi ceea ce omiţi să iei în considerare?

Deseori “meciurile” de leadership se încheie cu victoria uneia dintre părţi, mai rar la egalitate, atunci când jucătorul cel mai tare obţine mai multe puncte în plus. Ne referim în speţă la situaţia în care vrei să desluşeşti câteva din trăsăturile definitorii ale omului şi, identificându-te cu ele, să înţelegi felul lor de funcţionare fără să-ţi însuşeşti vreo calitate sau alta.

Însă apar noi şi noi probleme atunci când încerci să deschizi uşa bine ferecată a minţii omului, a cărei cheie este cercetarea, punerea în folosinţă a ansamblului de percepţii, idei, intuiţie şi cunoştinţe aplicate în straturi succesive. Fiecare dintre acestea trebuie să fie în măsură să facă faţă unor noi cerinţe de “calificare” bine determinate în cursa prelungită spre influenţă, spre exercitarea şi menţinerea controlului permanent.

Dar aşa cum pe piaţă intervin tot mai des serii de produse destinate să facă faţa uneia şi aceleiaşi trebuinţe, eliminând şansa de a se crea un tipar cert al non-consumatorilor, tot aşa elaborarea unei strategii de pătrundere în sfera cea mai profundă şi mai cuprinzătoare a omului, supus transformării, supus forţei implacabile a propriului său Ego, elimină şansa de a crea un raport corect şi strâns care acceptă parametri de a efectua o examinare.

De multe ori comparaţia făcută între ceea ce ştii despre cineva şi ceea ce omiţi să iei în considerare are ca punct de plecare fuziunea dintre două tipuri de personalităţi. Una îmbogăţită printr-o imagine atent lucrată şi chiar supraevaluată (dar care acţionează numai în baza conştiinţei curate), şi una caracterizată printr-o imagine de sine distorsionată, marcată de un sentiment de instabilitate ascuțită și persistentă (care acţionează în baza impulsurilor de moment).

Un om care care NU-l cunoşti este un om pe care crezi că-l cunoşti de la înălţimea

aprecierii de sine manifestată cu moderaţie, sau de la înălţimea unei imagini care se vrea a fi importantă şi pozitivă.

În leadership, eşti nevoit să acţionezi uneori după principiul "bateriile pierd din puterea lor de pornire la temperaturi scăzute". Numai prin crearea unui break perfect care să afecteze mai mulţi factori de protecţie din interiorul omului, provocând emoţii, temeri şi anxietate doar de partea lui, deci, sensibilizându-i forţa mobilizatoare în condiţii strict determinate, utilizând pe cât posibil repere care să îl scoată din zona de confort, numai astfel vei reuşi să conturezi o nouă perspectivă asupra propriului său Ego.

Rareori, în situaţii extreme, calea cea mai sigură la care recurg liderii pentru a scoate la iveală latura întunecată şi adevărată a omului este de a perturba sistemul compact de gândire al acestuia. O perturbare mai profundă a structurilor funcţionale ale omului creează o reacţie secundară care, la rândul ei, desprinde adevărul de falsul personalităţii.

Această perturbare trebuie să mişte energia lăuntrică, să creeze un minus în gândire, să zdruncine toate percepţiile, simţurile, solicitând mai tare nervii. Iar omul, supus bombardamentelor stăpânite şi subtile, mai mult la nivel de emoţii, îşi va dezvălui în final identitatea reală - dacă nu este ghidată de un sine integru şi stabil.

Problema care se pune, în acest caz, este legată de opţiunea pentru un "salt" deasupra aparentului adevărului, dar care este aplicabilă, funcţională şi eficientă în condiţiile în care mai există în om un dram de conştiinţă capabilă să intervină în orice circumstanţe.

Formarea unei convingeri se realizează prin înţelesul pe care l-ai ales-o să se potrivească unei experienţe de viaţă care începe cu intensitatea emoţiei pe care ţi-o transmite cineva într-o împrejurare deosebită şi se finalizează cu actul de voinţă care dă naştere unei personalităţi diferite de cea autentică.

O pasăre al cărei puf se pierde în zare evidenţiază acea tendinţă de pierdere a controlului de sine a omului cu dublă personalitate. Aduce în câmpul atenţiei acea abilitate de a descoperi adevărul din spatele măştii care acoperă, uneori aproape perfect, firea, gândurile, intenţiile şi acţiunile omului.

Masca, o aparenţă înşelătoare, poate fi distrusă dacă ştii să descoperi şi să acţionezi asupra a tot ceea ce omul ascunde mai mult sau mai puţin intenţionat într-însul.

*** Notă:** The Silence of the Lambs (1991)

O pedeapsă dreaptă pentru Carson Wells

On Ianuarie 19, 2013

Exercită-ţi puterea de a fi stăpânul propriei vieţi, fără să te ancorezi la o realitate ce nu corespunde viziunii echilibrate asupra a ceea ce eşti.

În filmul "No country for old men (2007)" îl surprindem pe Carson Wells într-o ipostază de om mulţumit de sine însuşi. Spiritul acesta fugar, mereu în căutare de comori, tânăr, curajos, iute, optimist până în măduva oaselor, vaccinat împotriva oricărei forme de nefericire sau tristeţe, fildeşul acesta strălucitor întreţinut numai de natura sa rezistentă, trăieşte în credinţa naivă că totul se desfăşoară în avantajul lui; că timpul, lucrurile, oamenii, totul lucrează în favoarea sa.

Stimulat de o energie superioară, Wells pare a fi ocrotit de o forţă care ar putea spulbera, uneori brutal, orice adversar. Autocontrolul era manifestarea esenţială a firii sale. Prin locul în care-l ocupa printre ceilalţi oameni, precum şi prin faptul că se afla mai rar în preajma pericolului, am zice că pentru el nu exista decât un singur bine, acela de a acţiona după cum îi dicta propriul Eu, cu aparenţa unui soare cald şi strălucitor aşezat peste o lume fără ceaţă.

Leadershipul autentic este pus la încercare atunci când voința capitulează în fața circumstanțelor sumbre, ducând la o transformare neintenționată a personalității.

Dar locul lui în lume devine tot mai sumbru odată cu trecerea timpului. Totul în el este pus sub semnul întrebării, o adevărată capitulare a voinţei, o ruginire spontană din interior, *une conversion de la personnalité*. Căci din pricina excesului său de zel în încercarea de a recupera o geantă plină cu bani, ia naştere un alt tip de om, un tip de concurenţă imperfectă nevăzută deloc bine pe scena lumii interlope. Toate elementele care îi compun prezentul lui Wells, se răsfrâng şi asupra acelora din jurul său, mai ales a duşmanilor săi.

Această sferă a voinţei şi putinţei luminată de optimism tot mai în sus, înspre nemăsurat, lărgită spre imposibil, proiectată pe fondul deformării personalităţii, ce se confundă parţial cu idealismul, repugnă realităţii crude. În fiecare caz, conturul ei este acoperit de forme incomplete de reînnoire şi de valorificare a propriilor sale calităţi. Oare calea pe care şi-o alege Wells este atât de deşartă, încât să-şi înmormânteze definitiv orice reper bun şi util?

Leadership: Accepţi să devii imaginea unei noi versiuni a avântului înspre nemăsurat, experimentând efectul hazardulului prin exemplul unei mulţumiri de sine care este iluzorie?

Nesăbuitul nu realizează că există lucruri mai însemnate pe lume, cum ar fi viaţa. Viaţa lui. Iar atunci când simte pericolul, deja e prea târziu. Curajul său nu mai este unul vizibil, viril, ci se preface într-o rândunică care, plutind lugubru, îşi ia zborul definitiv, nemaiputând să ridice nicio aripă a nădejdii. Un acru şi gratuit viciu al încrederii sale lovite fatal de prezenţa obscură a unei fantome, rivalul său de temut, nemilosul asasin, *el desperado* – Anton Chigurh.

Orgoliul sau hipertrofiat nu acceptă însă înfrângerea. Ca un Hermes fixat pe gândul de a jefui templul lui Apollo din Delphi, netemându-se de mânia acestuia, Wells îşi forţează norocul pornind pe tărâmul mocirlos al lui Chigurh spre a-i şterpeli de sub nas geanta cu bani. Şi tocmai din cauza acestui avânt, la fel de alunecos ca gheaţa, este surprins cu garda lăsată. Realizând în ultimul moment că duşmanul este mai puternic, apelează la conciliere.

Leadership: Cum se reflectă îndoiala faţă de ce îţi oferă viaţa prin luarea în considerare a adevărului aflat în spatele experienţelor care te individualizează ca vulnerabilitate a unei subiectivităţi asumate până la capăt?

O piedică, o nedreptate? Tot ceea ce mai zace acum în Wells, tot ceea ce-l mai putea face mulţumit, nu mai ţâşneşte cu iuţeala glonţului ca altădată. O zguduire absurdă şi nemeritată, o viaţă năruită, de parcă ar fi fost de nisip. Abia acum, când e prins în ghearele mortale ale vulturului, dragostea pentru viaţa i se revărsă şi se împrăştie din plin prin sânge.

Din păcate, nu mai poate schimba nimic. O pace molcomă, o capitulare suportată cu calm, *le malaise d'un vain désir* . Tot mai mult se strânge teribila capcană a destinului, apoi se închide brusc. Singurul adevăr aflat în spatele experienţelor care îl individualizează pe acest din urmă optimist, ca vulnerabilitate a unei subiectivităţi asumate până la capăt, este că trebuie să accepte suferinţa, tocmai pentru a o putea transcende.

Iar totdeauna suferinţa accepta mai uşor moartea. Judecata s-a desfăşurat drept, o înfrângere meritată. Căci omului care nu-şi preţuieşte îndeajuns de mult viaţa şi adevăratele valori pe care aceasta le scoate în cale, nu-i este dat să zboare mai sus, să cucerească piscurile cele mai înalte. Destinul nu-i acordă decât rar subvenţii, de cele mai multe ori îl taxează cu dobânda maximă.

Leadership: Te ambiţionezi să cuprinzi nemărginirea întâmplării de a fi prins în angrenajul unei intrigi care te ţine în suspans până în clipa când îţi dai seama că e prea târziu să revii la ceea ce ai fost?

Locul tău în lume devine tot mai sumbru odată cu trecerea timpului? Totul în tine este pus sub semnul întrebării? Calea pe care ţi-o alegi este atât de deşartă, încât îţi înmormântezi definitiv orice reper bun şi util? Încerci să te impui pe terenul mocirlos al unei obsesii nesănătoase?

Ca o forţă de atracţie dintre sarcinile pozitive şi cele negative, cei doi poli magnetici: " *a fi* " şi " *a nu fi* " sunt punctele dependente de dimensiunile personalităţii tale. Apropiindu-se, ele se intersectează sau coincid în funcţie de rolul pe care ţi-l asumi în viaţa de zi cu zi, şi în funcţie de personalitatea raportată la realitatea din jur.

Iar modul în care priveşti şi îţi planifici viitorul - nu numai din punctul de vedere al aşteptărilor, ci şi al acţiunilor, mai mult sau mai puţin conştientizate, a căror rezultantă este devenirea ta, determină deciziile pe care le iei şi felul cum te comporţi în fiecare situaţie.

Un vizionar înțelege că nu doar evaluarea obiectivă a destinației contează, ci și lupta activă pentru modelarea viitorului dorit.

Pentru că tu - omul care ştie să judece şi să evalueze lucrurile la propria lor valoare - nu ai numai datoria să te întrebi şi să constaţi, în mod obiectiv, ce anume îţi rezervă destinaţia spre care tinzi, preocuparea pentru echilibru şi responsabilitate, dar şi posibilitatea de a dori un anume viitor, şi deci datoria de a lupta pentru el.

Datoria de a lupta pentru schimbare, pentru o nouă cauză, sau pentru a fi mai mult decât eşti, este cea care circumscrie orizontul lucidităţii şi cauzalităţii, unde posibilul şi realul se actualizează peste întreaga ta viaţă făurită cu răbdare, nădejde şi respect.

Aceasta este esenţa ce stă la baza leadershipului, şi totodată ceea ce emite unul din

principiile FISH: " *Alege-ți atitudinea - Responsabilizează-te pentru cum răspunzi la ceea ce-ţi rezervă viața."* Odată ce ești conștient că alegerea ta implică pe toți cei de lângă tine, întreabă-te:

Cum te ajută alegerile tale să fii persoana care ai vrea să fii? Cum se răsfrâng toate elementele caracterului tău asupra acelora din jur?

Leadership: Lupţi pentru valorile corespunzătoare calităţii de a fi un outsider al unei personalităţi fără limite, fără să fii influenţat de gradul de receptare a unor experienţe care se amplifică prin lipsa ta de reacţie corectoare faţă de tine însuţi?

Un leadership bun poate avea impact pozitiv în primul rând asupra propriei tale persoane. O formă de a te implica activ în schimbarea ta în bine, o formă de ripostă fermă, o formă de a te lupta pentru ceea ce este corect să fii, pentru valorile corespunzătoare cu calitatea de a fi Om. Leadershipul, acest instrumentul al formării unui alt tip de personalitate, te ajuta să te "redeştepţi" înainte de te arunca cu capul înainte spre mediocritate.

Carson Wells avea impresia că viaţa devenea mai bună pe măsură ce împingea "pistonul" prezentului spre un viitor limitat doar la orizontul său, având convingerea că deţine în întregime controlul.

Însă aceasta modalitate de a gândi, acest superficial strat de iluzie, vulcanic erupând, mereu repetat, l-a dus de fapt spre nicăieri, cauzând disperare şi confuzie. Claustrarea într-o sferă privată, cea a intereselor individuale.

Valorile sale erau degradabile, calculate, cultivate şi îngrijite doar prin simpla adăugare a opţiunii " *On/Off* ", creându-i mai mult dubii în legătură cu viaţa lui. Un caracter care percepe viaţa, lumea, totul prin prisma propriilor sale defecte.

Este posibil să fii şi tu „pe valul schimbării", dar să te implici în scenariul nepotrivit? Te ancorezi, ca de vreun buştean scufundat, de o realitate care nu se raportează la convingerile tale adevărate?

A fi un outsider al unei personalităţi fără limite înseamnă să te desprinzi de ceea ce știi că ai trăit fără băgare de seamă și să te deschizi doar în faţa unei abordări asupra vieţii care bazează pe trei calităţi: protejarea stimei de sine, cumpătare în privinţa exagerării importanţei personale şi putinţa de a te opune oricărei vanităţi.

O pedeapsă dreaptă pentru Carson Wells exprimă o realitate: pe măsură ce te îndepărtezi de calităţi specific umane, elementul declanşator spre excelenţă întârzie să apară, chiar dacă voinţa ţi-e puternică. Iar acel orizont al redescoperirii, se limitează tot mai mult pe măsura alungării valorilor care favorizează apariţia şi dezvoltarea leadershipului.

Aşa cum corpul uman, cu toate componentele sale bio-morfo-psihologice, este numitorul comun al tuturor activităţilor sportive, tot astfel creşterea calităţii vieţii este numitorul comun pentru fixarea mai puternică a acelor calităţi necesare leadershipului.

Exercită-ţi puterea de a fi stăpânul propriei vieţi, fără să te ancorezi la o realitate ce nu corespunde viziunii echilibrate asupra a ceea ce eşti.

O piatră frumoasă este numai o piatră frumoasă

On Septembrie 03, 2014

Înscrie-ţi realizările într-un cadru care pune accent pe valoare, întărind fundalul pe care se plasează construcţia însemnătăţii lor.

Un dialog din cartea „ *Endless Night*", de Agatha Christie, este relevant în ceea ce priveşte perspectivele de integrare ale leadershipului în proiectele personale.

- Construiesc case numai pentru anumiţi oameni, când vreau eu, spuse Santonix.

- Pentru oameni bogaţi, vrei să spui? adaugă Michael Rogers.

- Trebuie să fie bogaţi, căci altfel nu vor fi în stare să plătească casele. Dar nu de bani îmi pasă. Clienţii mei vor trebui să fie bogaţi pentru că eu vreau să fac case care costă. Însă numai casa nu e de ajuns. Trebuie să existe şi fundalul. E la fel de important. E ca un rubin sau un smarald..

O piatră frumoasă este numai o piatră frumoasă. Nu duce nicăieri. Nu înseamnă nimic, nu are formă şi nici semnificaţie până nu este fixată într-o montură. Iar montura trebuie să aibă un giuvaier demn de ea. Iau peisajul ca atare, îl scot din cadru, unde de fapt există cu depline drepturi. Nu are niciun sens până când nu există şi casa care să se înalţe mândră precum un giuvaier în montura lui.

Dezvoltarea leadershipului tău se află la confluenţa dintre tendinţa de expansiune a influenţei şi onoarea de a te reprezenta într-un context de promovare a valorii?

Valorile tale sunt generate de ignorarea diferenţelor dintre bogaţi şi săraci? Eşti în stare să beneficiezi de pe urma diferenţelor dintre ei? Sunt valorile tale alese şi hotărâte de semnificaţia construcţiei pe care o gestionezi? Fundalul pe care îl utilizezi pentru a plasa o ofertă intră în preţul consumului de valoare pe care ţi-o atribui? Care este motivul de a forţa termenii şi rezultatul unei negocieri care nu conduce la rezultatele prevăzute?

Angajamentul tău în realizarea aspiraţiilor de a deveni lider, explorând adânc posibilităţile de câştig win-win din cadrul campaniei „ *Pot să ajut cât mai mult* ", devine în condiţii de certitudine un punct de expansiune a influenţei care nu trebuie să fie contrară principiilor de onestitate şi de integritate. Dar, în acelaşi timp, luând în considerare ceea ce este bine pentru oamenii cu care închei înţelegeri, putem vorbi aici de un fel de expansiune a propriei tale conştiinţe, întemeiate pe diverse virtuți care respectă cu consecvenţă normele leadershipului.

Iar una din aceste norme prevede adoptarea unui demers de tipul „ *share understanding* ", având semnificaţia unei recunoaşteri a datoriei de a fi un întreprinzător spiritual care acţionează în favoarea unui anumit rezultat, spre a da leadershipului consistenţă îndelungată. Acest rezultat nu trebuie să aibă doar o puternică încărcătură emoţională, ci, prin prisma a ceea ce transmite trebuie să fie raportat la ecuaţia „ *O piatră frumoasă nu înseamnă nimic până nu este fixată într-o montură.* "

În termeni mai simpli, această concluzie se poate interpreta în felul următor. Este mai înţelept să accepţi un anumit compromis sau să reflectezi asupra impactului fondului propriu de valori, decât să apelezi la nişte practici de monopol neconforme cu onoarea de a fi un om cu

suflet mare. Cu onoarea de a te pune în slujba unui proiect profesional care produce efecte pozitive. Cu onoarea de a fi un lider pentru care succesul nu se rezumă doar la profit, ci şi la stil, la compoziție şi fundal. Cu onoarea de a te reprezenta într-un context rentabil de echitate, promovând valoarea pe care o aduci în lume.

Echitatea este o construcţie frumoasă şi solidă ce poate fi negociată cu acelaşi drepturi depline atât de oamenii bogaţi cât şi de cei săraci, printr-o decizie care va mulțumi ambele părți.

Avantajul cultivării leadershipului, actualizat în permanenţă prin crearea unor noi alternative de atitudine faţă de ceea ce apreciezi ca fiind valoros, se vede în nivelul de înţelegere a ceea ce scoţi în evidenţă, prin comparaţie cu un rezultat solid. Iar rezultatul este dat de influenţa pozitivă care întăreşte relaţia dintre tine şi susţinătorii tăi.

Fundalul pe care se plasează construcţia rezultatelor asigură o integrare a răspunsului psiho-social la o ofertă care nu poate fi refuzată, îndeplinid condiţiile unui cadru general favorabil într-o realitate existentă la un moment dat. Astfel, perspectivele de dezvoltare trebuie să urmeze un trend ascendent în conformitate cu ceea ce se aşteaptă de la un viitor preconizat. Leadershipului de azi, ce trebuie să corespundă interesului general, are o pondere semnificativă faţă de leadershipul de mâine.

Valori precum nivelarea diferenţei dintre oameni şi mijloacele de a le realiza sunt întotdeauna reprezentate prin promovarea "preţiozităţii" unei bijuterii sau prin calitatea interpretării cadrului perceptual al persoanei.

O piatră frumoasă este numai o piatră frumoasă evidenţiază valoarea a ceea ce dăruieşti, cu intenţia de a genera un nou flux de venituri în cadrul eforturilor de extindere a valorii personale. Dar în aşa fel încât să te delimitezi de acea gândire care nu-ţi permite sesizarea legăturii dintre cauze și efecte, dintre însemnătate şi aparenţă.

Ce valoare au realizările tale în domeniul conducerii? Cat de bine gestionezi fundalul pe care se plasează construcţia însemnătăţii lor?

Source: https://neculaifantanaru.com/o-piatra-frumoasa-este-numai-o-piatra-frumoasa.html

O pictură nu poate niciodată să arate aidoma unui lucru din natură

On Decembrie 26, 2012

Felul în care îţi analizezi şi îţi prezinţi creaţia, depinde de felul cum este ea receptată: din apropiere sau depărtare.

Să te ferești de profiluri, adică de contururile precise ale lucrurilor. Să nu faci conturul figurilor tale de o altă culoare decât aceea a fondului ce le mărginește, astfel încât să nu apară contururi întunecate între fundal și respectiva figură. Dar nu uita că la lucrurile mici scapi greșelile mai repede decât la lucrurile mari.

De exemplu, în figurile mărunte nu se pot vedea nici greșelile, nici felul lor, așa cum se văd la cele mari; căci figura măruntă fiind făcută după chipul unui om sau al unei alte viețuitoare, părțile sale nu pot fi isprăvite cu grijă, din cauza marii micșorări. Așadar ea nu este cu totul isprăvită, și nefiind isprăvită, nu i se pot dovedi greșelile. De pildă: privește un om de la trei sute de pași și judecă dacă e frumos său urât, dacă e monstruos sau este ca oarecare altul; vei vedea însă că oricât de mare va fi strădania ta, nu te vei încumeta să-ți dai o dreaptă părere și aceasta din cauza îndepărtării în care omul este atât de micșorat, încât nu i se pot deosebi amănuntele.

Și dacă vrei să vezi mai bine micșorarea omului despre care se vorbește mai sus, pune un deget la o apropiere de o palmă de ochi și tot ridicând și tot lăsând în jos acel deget, până ce capătul său de sus să ajungă sub picioarele figurii privite, vei vedea că apare o micșorare de necrezut. Pentru aceasta, de multe ori, te îndoiești de ivirea vreunui prieten sosind din depărtare.

Leadership: Lucrul asupra căruia îţi concentrezi atenţia poate să imite ceea ce este în natură, încât să faciliteze revelarea unei idei printr-o comparaţie cu lumea materială?

Şi vă mai zic ceva important. O pictură nu poate niciodată să arate aidoma unui lucru din natură. De multe ori pictorii deznădăjduiesc că vor putea să imite ceea ce este în natură, picturile lor neavând nici relieful, nici vioiciunea ce o ia lucrurile văzute într-o oglindă - deși ei au la îndemână culori ce prin limpezimea sau întunecimea lor, depășesc de la o poștă frumusețea luminii și a umbrelor lucrurilor văzute în oglindă. Ei își învinuiesc neștiința și nicidecum cauza, pentru că nu o cunosc. E cu neputință ca din lucrul pictat să reiasă un atare relief încât să semene lucrului din oglindă, cu toate că amândouă se folosesc de o suprafață, afară de cazul când privim cu un singur ochi.

Cauza este că aici doi ochi văd același lucru unul după altul precum a și b ce văd în acelaşi timp pe m și n, dar nu poate ocupa în întregime pe m pentru că baza liniilor vizuale c atât de mare, încât un ochi vede lucrul al doilea după întâiul. Dar, închizând un ochi ca s, lucrul f va cuprinde k - deoarece linia vizuală iese dintr-un singur focar și folosește un corp, într-așa fel cel de-al doilea, de aceeaşi mărime nici nu va fi văzut.

Acum, poate te întrebi ce este mai de folos: luminile şi umbrele lucrurilor, sau trăsăturile lor? Eu cred că trăsăturile lucrurilor sunt de mai mare folos decât umbrele şi luminile, deoarece liniile mădularelor care se pot îndoi sunt mereu aceleaşi şi niciodată nu se pot schimba, pe câtă vreme locurile şi umbrele în cantitatea şi calitatea lor sunt nesfârşite.

Leadershipul trebuie să precizeze fără echivoc contururile unei noţiuni precum "vederea în oglindă" atunci când abordează problemele creaţiei sau aspecte ale realităţii din punctul de vedere al proceselor de constituire a creaţiei.

O pictură nu poate niciodată să arate aidoma unui lucru din natură, mai ales dacă vom considera că obiectul atenţiei unui pictor este "vederea în oglindă" care facilitează o dublă viziune asupra realităţii înconjurătoare, o imagine mult mai amplă din care dimensiunea spaţială reprezintă doar o componentă.

* **Notă:** Leonardo Da Vinci - *Tratat despre pictură*, Editura Meridiane, 1971.

O prelungire a privirii surprinsă în imagini

On Septembrie 09, 2021

Acesta este secretul artei: să privești la suprafață marea ca și când i-ai măsura din priviri abisurile.

Într-o bună zi voi scrie un tratat despre artă, privind doar marea, ascultându-i valurile, admirându-i vastitatea. De altfel, cred că acesta este secretul artei: să privești la suprafață marea ca și când i-ai măsura din priviri abisurile. Şi nu-i aşa că artă este marea văzută din albastrul unor ochi imaginari, cu care se poate da o replică de culoare unei imagini devenită simbol al misterului și totodată al existențelor abisale, al adevărului păstrat în adâncimea de taină a lumii?

Mi se pare că în faţa ochilor mei se deschide un tablou cuprinzător al frumoaselor vremuri de altădată, cu efect dublu asupra rememorării unui episod consemnat de istoria artei, prin diversitatea formelor pe care le iau valurile într-o viziune neconsolidată asupra lumii. Aici, optez pentru preluarea voită sau întâmplătoare a unei teme adusă în actualitate de expresioniştii abstracţi: *"Iniathyessia"* , adică rememorarea unei amintiri din trecut şi metamorfozarea ei în pictură.

Văd nisipul de pe țărm, şi aproape că îl ignor pe cel cu adevărat fin din mare. Iar oamenii fără Dumnezeu vor continua să-l caute pe Dumnezeu, chiar dacă EL se află pretutindeni, dar nu întotdeauna la vedere.

Sincer vorbind, aceasta este impresia pe care mi-o face marea: că trebuie să găsesc adevărul ascuns al lumii, taina Logosului Divin, într-un depozit de forme-valuri şi ipostaze-valuri, încât arta căreia urmează să-i dau formă să evidenţieze imaginea unui tablou susţinut de accente de clarobscur. Un tablou capabil să dea o replică de proporţii imaginii Absolutului.

Leadership: Imaginea pe care o suportă creaţia ta poate să exprime un sentiment de reînnoire a propriului sine, cu ajutorul unei comparaţii directe între ceea ce este perceptibil ochiului și ceea ce este ascuns privirii?

Un artist adevărat poate oricând să schimbe coordonatele oricărei ştiinţe, cum este leadershipul. Dar un lider nu va avea așa multe lucruri de spus despre ştiinţă, cu atât mai puțin despre artă. Bine spunea cineva: *"Totuşi liderul îşi transformăîn artă domeniul în care excelează. Asta îl face şi lider şi artist."* În acest caz, rugați-l pe acel lider să elaboreze un tratat despre artă, veți avea atunci dovada excelenței sale.

O altă problemă dezbătută în cadrul artei este aceea a privirii care se întâlnește plurivalent cu o realitate mistică. Poate fi vorba despre privirea cu care ochii cercetează orizontul deschis al mării, când culoarea mării se transformă în aurie la vremea asfinţitului, oglindindu-se spectaculos numai în sufletul pictorului suprarealist, al admiratorului de castele, fapt care dă viaţă şi culoare subiectelor sale.

Alteori marea nu este văzută doar ca o reflecţie asupra sensibilităţii artistice omeneşti, ci ca un microcosmos al relaţiei dintre Creator şi Opera, mai ales ca o incursiune în liniştea sufletului care ne face înţelegători în curgerea vieţii. Și cine ar înțelege cu adevărat limba valurilor atunci când ele îmbrățișează țărmul, poate că ar afla mai multe taine. Poate că atunci ar surprinde mai ușor tabloul umblător al frumoaselor vremuri de altădată.

M-am ataşat profund de tradiţia marii picturi universale, la fel cum în cele mai frumoase momente de linişte m-am ataşat de reflexia razelor pe care asfinţitul o aduce drept argument al faptului că pictura trebuie să aducă lumină în viaţa omului. Ca mişcarea unei lanterne într-o încăpere întunecoasă, ochii mei încearcă să sondeze adâncurile de nepătruns ale mării, să împărtăşească în timp real descoperirile şi cu alţii, dar fără să părăsesc uscatul.

Leadership: Poţi să priveşti o creaţie artistică prin prisma unor eventuale similitudini cu propriul destin, aşa încât să preţuieşti acea senzaţie de uniune a Eului cu o lume a îndurării şi tăcerii ?

Uneori sunt bântuit de idei fanteziste, cum că Dumnezeu şi-a ascuns împărăţia în adâncuri, pentru ca numai cei cu o vedere foarte profundă să scoată la iveală dedesubturile unei existenţe aproape nebănuite. La acest tipar de gândire apare şi replica: cine rămâne cu desăvârşire necunoscut duce întotdeauna o existenţă singuratică, purtând în sine amintirile unei copilării nefericite, ceea ce dă structurii sale sufleteşti o sensibilitate crescută. De aceea culoarea este o prelungire fizică a nervilor exacerbaţi, cum bine spunea istoricul englez Herbert Read.

Iar un artist care încearcă să-l cunoască pe Dumnezeu trebuie să îndure greutatea mării, înainte de a contempla infinitul mării cufundat în propriile gânduri. Sau, ar putea să contemple multiplele ipostaze ale mării, celebrând ca pe o matrice a existenţei ireale prin raportarea acesteia la diferite reprezentări, sentimente şi gânduri ale spiritului. Adâncimi care nu sunt cunoscute nemijlocit, ci aşa cum preciza filozoful Georg Wilhelm Friedrich Hegel, ele trebuie scrutate numai prin îndreptarea propriului spirit asupra lumii interioare

În cercul imperfect al universului meu optic se conturează perfecţiunea acelei mişcări oscilatorii, a unei energii stăpânite pe o suprafață nelimitată, constând din trilioane de litri de apă. Nu este chip să opresc această continuă alternare a creaţiei şi a energiei oceanice, decât cu senzaţia de a mă fi trezit dintr-un somn lung. Un deja-vu îmi străfulgeră pentru o fracțiune de secundă mintea, mă aruncă înapoi în vremurile din urmă, ca apoi să trezească în mine un fel de nostalgie după ceva inefabil inexprimabil, care se amplifică tot mai mult. Marii artişti cunosc deja acest sentiment şi ştiu cum să-l învingă.

Şi, până la urmă, ochii mei continuă să caute adevărul descriptibil şi riguros al unei imagini sigure şi complete: cea a unui bătrân care, singur într-o barcă, poate să liniştească valurile şi să simtă marea într-o manieră intensă şi profundă.

Un artist adevărat nu va încerca niciodată să surprindă depărtarea unui orizont nou, sau adâncurile unei lumi subacvatice, fără să stăpânească realitatea din apropierea propriei fiinţe.

O prelungire a privirii surprinsă în imagini se materializează într-o reflecţie asupra sensibilităţii artistice omeneşti dacă încercăm să vedem totul din jur ca fiind o expresie a confruntării cu gândurile şi emoţiile din care se compune o viziune, o experienţă mistică, o extrapolare a lumii efemere.

O prietenie care nu se termină niciodată

On Septembrie 09, 2020

Aruncă o privire asupra a ceea ce te-a condus înspre ceea ce tu eşti azi, alocând astfel o atenţie semnificativă întregii poveşti care îţi aparţine.

Am învățat un lucru de la mine însumi în această seară, poate că l-am învățat cu mulți ani în urmă, acum doar îl trăiesc mai intens. Am învățat că prietenii cei mai buni nu doar că aleargă 30-40 km pe săptămână împreună, viteză sau rezistență, dar vor fi întotdeauna împreună chiar și dacă toată lumea ar fi împotriva lor.

Alegătorul de cursă lungă a învățat ce înseamnă, cu adevărat, prietenia, simţind mai bine legătura afectivă, pură și puternică care te face o persoană mai bună. El nu renunță la o prietenie sinceră, niciodată, sub nicio formă. E ceva rar, prețios, de lungă durată. Ceva tot atât de rar ca un trandafir abia înflorit, care se deschide încet spre nou, reflectând auto-apreciere şi apreciere corectă a celorlalţi. Alegătorul gândește, trăiește, vede totul din perspectiva vitezei și a rezistenței. Se emoționează înaintea concursurilor. Are temeri. Uneori câștigă, alteori nu. Dar întotdeauna se întoarce la grup...

El întotdeauna aleargă. Și aleargă, și aleargă, și aleargă. Pe orice vreme. Orice distanță. La orice vârstă. Nu știe să renunțe la idealuri, la vise, la o filosofie de viață, la victoriile trecute, împotriva sorții. Nu știe să renunțe la el însuși, căci a învățat să fie atașat de propria structură fizică, sufletească și energetică. Poate că orice filosofie de viaţă începe cu sensibilitatea unui suflet profund, călit la flacăra durerilor, sau a dorului pentru cei ce nu mai sunt.

Poate că de aici îşi trage seva *Trandafirul de Damasc* , din înrâurirea pe care o are un suflet sincer și iubitor asupra altui suflet. Iar alergătorul, asemenea unui trandafir, este martorul unei existenţe care se vrea a fi trăită plenar, absolut.

Credeți-mă pe cuvânt, emoția cea mai puternică pe care o trăiește un alergător se declanșează atunci când după atâția și atâția ani de antrenamente, își revede cei câțiva prieteni cu care în urmă cu 25 de ani, copii fiind pe atunci, s-au întâlnit într-o noapte friguroasă de iarnă și au hotărât să alerge împreună. Poate cărările vieții, atât de întortocheate, i-au îndepărtat de orașul unde s-au cunoscut, unde au copilărit, unde s-au împrietenit. Unii au familii, alții încă nu. Dar toți au ajuns învingători într-un anumit domeniu de activitate.

Și, la un moment dat, unul dintre noi rupe tăcerea pe munte, și spune cu ochii plini de entuziasm, şi cu un pic de nostalgie:

"Mă bucur mult c-am rămas cu toții la fel...chiar mult mai buni ca înainte."

Leadership: Ai încredere că tot ceea ce trăieşti face parte din ascensiunea unei existenţe care îşi asumă amintirile altor vieţi, şi că ascensiunea ta depinde de modul cum alţii te văd în lumea ta?

Runningul este o prietenie care nu se termină niciodată. Este o revedere care se lasă cu multe zâmbete și amintiri frumoase. Este o performanță care se reflectă chiar și în alte domenii de activitate. Ne vom reîntâlni cu toţii în fiecare săptămână, în fiecare lună, din fiecare an, până când anii își vor pierde numărul. Atașamentul este cuvântul de ordine în running. Poate că, în

cele din urmă, ne vom întrece anii, ne vom întrece orice vârstă, ne vom întrece mereu limitele. Pentru că amintirile, prietenia și caracterul puternic nu mor niciodată...

Parcursul acestui drum, plin de transpiraţie şi de rezistenţă, întocmai ca şi calea armelor japoneze, este un demers care are două sensuri distincte, dar legate cumva printr-o reciprocitate magică: nu acceptă înfrângerea de sine şi nu acceptă nici acea atât de frecvent întâlnită atitudine de "eu sunt mai bun, mai bine clasat". Atunci când alergi îţi aminteşti ceea ce simţi pentru tine, de ceea ce te pasionează, de ceea ce meriţi, de ceea ce ai uitat în tumultul vieţii obişnuite. Începi, astfel, să pui pe primul loc sentimentul de mândrie, că faci parte dintre învingători, punând pe primul loc din existenţa ta senzaţia de start şi de finish.

Ambele sensuri sunt însuşite cu ajutorul parcurgerii acestui drum, denumit *Atrynfranidhis* , însemnând înclinația sufletească spre nobilul scop reprezentat de înfrângerea infatuării şi abandonarea unui Ego măcinat de obișnuințe și tocit de vreme. Aici trebuie luat în calcul, în primul rând, ca un fel de stâlp în ascensiunea dezvoltării personale, înfrângerea duşmanului interior: Egoul plin de posesivitate egoistă asupra lucrurilor, care cere atenţie permanentă şi depăşeşte în circumferinţă orice laudă din exterior.

Un asemenea Ego îţi poate juca feste când se aştepţi mai puţin.

Runningul poate fi o victorie dacă laşi Egoul să fie eliberare de deznădejde, o eliberare de toată suferința lumească, sau poate fi o înfrângere dacă laşi Egoul să te domine, să te consume, să îţi conducă viaţa şi destinul, făcându-te să priveşti totul prin lentila regretului. Celui care merge pe această cale (înfrângerea de sine) nu poate adopta un comportament onorabil faţă de un duşman exterior prezumtiv, numit "realitate augmentată", pe care îl va întâlni tot timpul într-o confruntare totală şi adevărată. Fiindcă runningul, venind în dezvoltarea caracterului omului, dispune de posibilitatea manifestării realităţii observabile a potenţialului de învingător într-un excelent stimulator al creşterii încrederii în propria persoană.

Până la urmă, cred că ascensiunea unei existenţe care îşi asumă amintirile altor vieţi se reflectă în trăirile pe care le experimentezi în postura unui erou antic, ţinând în mână o făclie aprinsă: efortul intens pe care îl depui pentru a fi unic este direct proporţional cu ceea ce laşi în urma ta.

Leadershipul poate fi perceput ca şi când ai reveni la o existenţă anterioară care a hotărât destinul etern: trebuie mai întâi să dovedeşti că ai însemnat ceva în trecut, şi în acelaşi timp să fii cunoscut în viaţa actuală drept acelaşi om unic, de mare caracter.

O prietenie care nu se termină niciodată este o probă dificilă de running, transformată într-o experienţă fără limite care îţi oferă foarte multe de lecţii de viaţă, lacrimi şi zâmbete. Dacă reuşeşti să descoperi frumosul din fiecare poveste de running, atunci nu te mai opreşti...

O primă verigă dintr-un lanţ

On Ianuarie 13, 2014

Stăpâneşte bine arta transformării diversităţii în unitate, ca să poţi da mai uşor o măsură de balans întregii tale creaţii.

"Mexicanul" a făcut multă vâlvă la vremea lui. Întreaga lume teatrală a Moscovei vorbea despre acest spectacol de debut al tânărului regizor. Noutatea lui apare şi mai evidentă astăzi. Eisenstein a atacat în acest fel însăşi bazele esteticii teatrului. Spectacolul suporta două şocuri emoţionale şi simultane, dar net diferenţiate: participa emotiv nemijlocit la acţiune şi, în acelaşi timp, i se transmitea emoţia celorlalte personaje de pe scenă care, la rândul lor, erau participanţi la aceeaşi acţiune.

Prin ubicuitatea sa, spectacolul distrugea unitatea organică a unei reprezentaţii teatrale şi prefigura în acelaşi timp o manieră cinematografică. Publicul asista la un soi de montaj incipient. Regizorul remarca mai târziu că însăşi aducerea pe scenă a acţiunii este un element cinematografic, spre deosebire de elementul specific teatral care reprezintă reacţia la eveniment. De aceea "Mexicanul" în creaţia lui Eisenstein este o primă verigă dintr-un lanţ.
*****

Leadership: Ştiinţa ta dispune de un ZOOM al perspectivelor de acces la un nou tip de experienţă profesională care pune în prim plan recurgerea la unitatea organică a unui fenomen de "participare la aceeaşi acţiune" ?

Cine e pătruns de un anumit adevăr şi îl înţelege în toată claritatea sa, poate oricât să se distanţeze de zona concluziilor generale ale ştiinţei pe care o oferă noutatea într-un domeniu. Dar mai ales a ştiinţei care nu dispune de un "zoom" al perspectivelor de acces la un nou tip de experienţa profesională, la un nou nivel de înţelegere, la un nou instrument de control asupra promovării unor variante de construcţie a creaţiei, prin combinările ce rezultă din distrugerea unităţii organice a unui întreg complex de concepţii, idei şi principii.

Iar acest adevăr, luat mai mult ca un partener de dialog care îşi cunoaşte temeinic şi în amănunt obiectul de studiu, vizează nu doar modul în care interacţionează creatorul în cadrul unui singur scenariu de utilizare a ştiinţei sale, ci mai ales modul cum tratează cauzele durabile ale conflictelor dintre diferitele abordări şi direcţii de progres.

Zoom-ul este un compromis între nevoia exteriorizării unei profunde sensibilităţi şi nevoia transmiterii emoţiei resimţite în faţa unui fapt excepţional redat într-un timp scurt. El permite accesul la un tip de experienţă profesională care pune în prim plan recurgerea la unitatea organică a unui fenomen de "participare la aceeaşi acţiune", prin faptul că subiectul, cadrul, decorul, fiecare gest al personajelor şi modul lor de filmare, devin una cu înlănţuirea evenimentelor pe care le pune în scenă regizorul.

Leadership: Proiectul tău de creaţie poate demara fără o evaluare a ştiinţei, numai prin reducerea dozei de conformism în procesul extinderii tendinţelor de a aduce în prim plan experienţa de formare a conştiinţei "Omului Nou" ?

O încercare de a insufla creaţiei ştiinţifice o fărâmă de ceva care te defineşte, introducând noi piese de legătură acolo unde trebuie realizat un anumit avantaj, atacând bazele vechii structuri de producţie şi concepţie a modelelor de bună practică, poate determina o respingere din partea celorlalţi. Dar totodată poate însemna un avantaj major pentru găsirea unor noi mijloace de multiplicare a formelor de cunoaştere şi utilizarea lor într-un mediu în

care diferenţele de mentalitate nu duc la tensiuni.

Apelul la idealul de creaţie este suportul pe care se construieşte leadershipul, nu doar ca un domeniu al gândirii pure, ci ca al gândirii aplicate permanent în practică şi întărite neîncetat de rezultatele obţinute în mod inovator. Omul Nou este creaţia unei reconstituiri a evenimentelor care paradoxal, cresc în intensitate odată cu dezvoltarea conştiinţei unei realităţi transcendente, fapt ce implică o anumită simbolistică la modalitatea de a percepe realitatea.

Niciun lider-creator nu se conformează strict rigorilor tradiţionale impuse de societate ori de mediul ştiinţific, sau de un regim care propovăduieşte „omul nou". De aceea proiectul de creaţie poate demara fără o evaluare iniţială a ştiinţei şi fără evaluarea conformităţii la canoane. Însă forma de prezentare trebuie să aibă un impact pozitiv asupra celorlalţi.

Abordarea leadershipului caracteristică viziunii regizorale are ca principal obiectiv aducerea pe scenă a acţiunii propulsivă derivată din realitatea oamenilor obişnuiţi puşi în situaţii extraordinare, cu efect de adaptare a reacţiei lor la evenimentele care schimbă faţa lumii.

O primă verigă dintr-un lanţ evidenţiază acel prin pas spre o unicitate în diversitate, care respectând principiile de bază, îmbracă leadershipul într-o formă de prezentare atractivă, cu impact pozitiv asupra celorlalţi, făcându-l demn de apreciat.

O rafinată formă de exercitare a leadershipului

On Februarie 17, 2020

Dimensiunea titanică a artei este miracolul compoziţiei vizuale redată printr-o trăire intensă proiectată într-un stil personal de creaţie.

Mi-a plăcut videoclipul piesei "A kind of magic", a lui Freddie Mercury. Nu este vorba despre elementul solid și fascinant al fanteziei umane, sau despre modul în care sunetele se aranjează în aşa fel încât ideea muzicală să sune asemenea unui triumf al ştiinţei asupra obscurantismului, având o tentă de ficţiune integrată într-o poveste aparte. Este vorba despre predispoziţia umană spre credinţa în supranatural.

Dacă tot m-am transpus în acest univers paralel, nelimitat, splendid, plin de substanţă, îmi revine sarcina să încarc reprezentarea vizuală a corelaţiilor multiple din videoclip, în afara Sferei Vitale Înţelesului Comun, cu parametrii unei singure idei: *"Tot ceea ce se înfăţişează privirii unui talent neobişnuit se dezvăluie ca într-o magie."*

Un creator de geniu este un spirit artistic definit prin natura relaţiilor sale cu divinitatea. Ştiu, şi sunt sigur de acest lucru, că nimic nu mi se poate potrivi mai mult în subtila trecere de la realitate la viziune, într-un spaţiu al transformărilor de substanţă, decât bucuria victoriei asupra haosului şi a morţii. Freddy Mercurry trăieşte în mine, acum şi pentru totdeauna, în împărăţia perfecţiunii unde nimic nu este lăsat la voia întâmplării, pentru că magia lui este apropiată de punctul de propulsie a spiritului meu artistic spre înaltele culmi ale Creaţiei.

Mai cred că acest "Magic" îşi capătă semnificaţia definitivă în puterea artei de a îmbina corect ştiinţa, talentul şi tehnologia, în sensul larg al dependenţei de visare şi experimentare, adică în sensul de investigaţie metafizică specifică creaţiilor controversate, prin faptul că totul are două posibile interpretări. Una la vedere, cealaltă ascunsă. Viziunea şi sentimentul. Prima fiind adăpostită de un frac negru, asortat cu ambianţa scenică modernă, cealaltă sesizabilă numai prin intermediul unui stimul suficient de puternic: dorinţa de a fi altcineva.

Magia în artă este exprimarea unei dorinţe arzătoare, conştientizată ca fiind acţiunea de schimbare a realităţii într-o poziţie de putere ilustrată ca formă inedită de expresie.

Omul îşi doreşte să fie altcineva numai atunci când nu este mulţumit cu ceea ce reprezintă el însuşi într-o memorie universală, aspirând la ceva mai înalt decât îi poate furniza prezentul. Sunt convins că "Magia" lui Freddy Mercury are un substrat aparte, ceva sesizabil numai în operele lui Borges, care la un moment dat scria:

"Acum sunt un om între oameni. În starea de veghe sunt profesorul Hermann Soergel, care mânuieşte un fişier şi redactează nimicuri erudite, dar în zori îmi dau seama, uneori, că cel care visează este altul. Din când în când, destul de rar, mă surprind mărunte şi fugare frânturi de amintiri, care, poate, sunt adevărate."

Leadership: Ai găsit un mod de a te construi, de a te umple cu adevăruri, trăind la limita dintre "a pretinde o anumită sensibilitate artistică" şi "a găsi un indiciu legat de ceva sesizabil doar în trăire, dar nedefinibil conceptual" ?

Din când în când, revăd videoclipul. Magia are viaţă, are sensibilitate, are artă, dar este sesizabilă doar pe scenele unde predomină fondul negru. Şi magia aceasta intensă, surprinzătoare, extinsă, parcă mă înconjoară şi pe mine, şoptindu-mi un secret arzător, sau

revelându-mi un adevăr greu accesibil minţilor obişnuite: *"Sunt silită să suport greutăţile unei memorii care se îndeletniceşte numai cu lucruri interzise, cu acea fragilitate a instantaneului, fiind nevoită să aduc în prim plan amintirea stranie a unei lumi cândva nobilă şi înălţătoare, apropiată de secretul metafizicii."*

Linia şi culoarea se constituie, în acest caz, ca semne exterioare unei conotaţii de conştiinţă estetică, de unde şi nevoia de a da un nou sens artei înţelese ca mod de a mă conecta la altă realitate. Este ca şi când aş fi găsit o metodă mistică şi riguroasă de a trezi o veche memorie, dintr-un timp al preexistenţei mele. Ceva mă îndeamnă să caut alte memorii pentru a o şterge pe aceasta, fără să ştiu că lucrurile pe care le aştept sunt rareori lucrurile pe care le voi întâlni.

Magia este un indiciu legat de ceva sesizabil doar în trăire, dar nedefinibil conceptual.

În măsura în care pictura se pregăteşte să renunţe la desenul tradiţional, axându-se tot mai mult pe tehnica Splash sau pe tehnica pulverizării aerografice, magia nu poate renunţa la simbolizarea stării creatorului de a fi înălţat de la Pământ la Cer. Poate că, totuşi, magia conţine mai multă spiritualitate decât celelalte arte, fiindcă nu îşi modifică în timp forma de prezentare. Viziunea şi idealul fiinţei iluminate sunt atrase către Dumnezeu de o forţă necunoscută ce antrenează după ea şi trupul.

Leadership: Identificarea personalităţii tale cu o altă identitate poate fi înţeleasă ca efort de perfecţionare a unui tipar imagistic, capabil să reflecte dogma întrupării omului în splendoarea corpului unic al idealului de a fi “supranatural”?

Am găsit explicaţia. Este limpede că simbolizarea magiei în artă reclamă o anumită coerenţă a intermedierii între superstiţie, coincidenţă şi realitate. Numaidecât, am început să înţeleg lucrurile care mă înconjoară prin prisma acestei magii care îşi verifică secretele prin modul în care se inserează alcătuirile de vorbe, de imagini, de acţiuni, şi alte fenomene într-o temă unică: "Transpunerea sufletului într-un llimbaj plastic". De unde porneşte secretul în legătură cu această ştiinţă înaltă, vă puteţi da seama numai dacă urmăriţi din nou şi din nou videoclipul.

Încerc să simt magia, s-o pătrund prin atitudinea omului ridicat la cer, prin dispariţia misterioasă a obiectelor pline de semnificaţie: cheia unui cufăr vechi, inelele din piatră de cuarț incolor sau cărţile simple de joc. Toate lucrurile mă ajută să levitez prin automistificare, prin forţa adevărurilor necunoscute. Magia are o energie aparte. N-o poţi vedea, n-o poţi simţi, n-o poţi atinge. Dar ştii că ea există, ştii că are puteri nelimitate.

Magicianul este un Dumnezeu aflat la vedere, dar foarte greu de perceput. Iar Freddy Mercury s-a vrut un asemenea magician, un model de cauzalitate supranatural. Cu ce preţ?

Leadership: Trăsăturile de personalitate pe care le oferi privirii celorlalţi oameni sunt în armonie cu ideea pe care imaginaţia lor şi-o face despre tine într-un context de trăire dusă la maxim şi transformată în magie?

Veţi înţelege marele secret, cum să surprindeţi esenţa magiei, numai dacă simţiţi fericirea de a fi Freddy Mercury, dar totodată dacă simţiţi apăsarea şi spaima lui. Excesele de personalitate sunt estompate de aspectele dualităţii identitare. Magia nu trebuie integrată într-un concept filozofic sau metafizic, ci trebuie trăită la nivelul dorinței arzătoare a individului de a se întregi într-o realitate fragmentată a universurilor, în lipsa iluziei de a se trezi la bucuria simplă a vieţii.

Alinierea la Realitatea Divină aparţine fiinţei iluminate care a înţeles vorba de duh: *"Cine vrea să ajungă în împărăţia cerurilor, să lase tot şi să mă urmeze pe mine."* Pentru un iluminat, magia este un mod de a se retrage din lume, din fața presiunii pe care aceasta o exercită asupra sa, regăsindu-şi liniștea, confesându-şi grijile prin intermediul naturii relaţiilor sale cu divinitatea. Magicianul se ridică de la pământ nu ca să epateze lumea, ci ca să păcălească ochiul obişnuit cu iluzia că "Totul este cum vrea el".

Freddy Mercury este acel destoinic creator condus de spirit care spune: "Sunt peste tot, dar mă puteţi înţelege doar acolo unde nu există prezenţă fizică." Şi astea fiind spuse, deja te păcăleşte. Eşti condus total în altă direcţie. Căci nimeni nu sesizează gravitatea cuvintelor sale dintr-o altă piesă plină de magie: *"Inside my heart is breaking. My makeup may be flaking. Another heartache, another failed romance, on and on. But my smile, still, stays on. The show must go on."*

Leadershipul, sau magia de a fi diferit de restul lumii, aparţine exclusiv nevoii omului de fi mai presus de alţii şi mai presus de sine însuşi, două forţe unite într-o singură forţă. Dar, totodată, leadershipul este dominat de o singură constantă: sacrificiul de a te ascunde într-o minciună, într-o iluzie, în spatele unei cortine care ascunde o lume greu de descris, chiar şi mai greu de trăit.

O rafinată formă de exercitare a leadershipului se distinge prin capacitatea omului de a opta, de a decide şi de a acţiona în cunoştinţă de cauză în ceea ce priveşte modalitatea de a se face perceput de ochiul spectatorilor, în aşa fel încât imaginea lui să nu năruie fixitatea privirii lor.

*** Notă:** Queen - A Kind of Magic

O regăsire expresivă între două existenţe

On Februarie 03, 2020

Încearcă să scoţi în evidenţă partea reflectată a sufletului tău, încât ceea ce exprimi prin creaţie să aibă însuşirea unui Creator fără seamăn.

Mă văd adesea în vârful de pensulă al unui artist consacrat, de talia stăpânului meu, chiar şi atunci când lumea nu îi recunoaşte creaţiile, aceste experienţe şi trăiri ale unei vieţi cu efect de acuarelă vie, sensibilizată, eternizată, care parcă începe să vorbească cu tine prin rezonanţa universului. Pe toţi ceilalţi oameni îi accept oarecum sub condiţia esenţei lor singulare, fiindcă toţi sunt diferiţi, dar niciunul nu reuşeşte să pătrundă cu înţelesul profund această fragilă şi efemeră alcătuire a mea. Nimeni în afară de stăpânul meu.

Rezonanţă într-un destin de excepţie. Când stăpânul îmi vorbeşte în fiecare dimineaţă, cu mereu alte cuvinte, când mă pictează în nişte tuşe memorabile care încet-încet întregesc imaginea unui tablou fascinant, cuceritor prin adaosul de culori vii, atunci ştiu că nu sunt un trandafir oarecare. Nu sunt reţinut în memoria lumii decât de un singur artist genial, el având ceva important de dovedit universului, aducând parcă în corespondenţele lui spirituale o realitate de gând originală, ţesută pe firul unei vieţi mereu diferite.

Farmecul de a fi artist trece prin semnificaţiile acordurilor dintre forme şi culori, în timp ce a fi un trandafir corespunde acordului dintre elanul spiritual şi vibraţia unei sensibilităţi care face din fiecare motiv luat din realitate un adevărat autoportret.

În artă, caracterul dominant al esteticului îl constituie punerea în vibraţie a sufletului uman cu ajutorul unei forme pure de expresie şi de conştiinţă. Nu cer nimănui să fie ca mine, frumos la privire, trădând fericirea prin frumuseţe, înzestrat cu energia subtilă corespunzătoare unui atribut simbolic aflat în corespondenţă cu elanul spiritual, adică posedând acel *„Aşa vorbeşte Domnul”* în sensul întrupării unei fiinţe îngereşti. Cer numai atât, şi cer numai de la mine: să fiu ceva care să nu existe decât o singură dată, în fiecare moment astral important.

Leadership: Poţi să-ţi evaluezi măreţia propriei existenţe în funcţie de finalizarea creaţiei pe care un artist ar putea s-o reprezinte în cazul unei prezenţe mult mai cuprinzătoare în dăinuirea ei?

Dacă am învăţat să citesc chipurile oamenilor, în special intenţiile şi gândurile stăpânului meu, acest lucru se datorează proprietăţilor de stabilitate ale reperelor artei, în lumina a ceea ce sunt eu în mod intrinsec şi unic, aici fiind incluse: acuitatea vizuală, reprezentarea vizuală şi sugestivitatea senzaţiei frapante. Un trandafir ştie să-şi întărească prezenţa în primul plan al portretului pe care artistul îl face sufletului său.

Desigur, nu m-aş numi Double Delight prin prisma raportării mele la acţiunea culorilor şi a amestecului lor (roşu, galben şi alb), dacă nu aş emana o energie, o vibrație de rară puritate şi de bun augur. Iar în funcție de experiențele de oglindire în propria-mi sensibilitate imediată, acestea reuşesc să transmită stări, sentimente, gânduri și dorințe. Manifestarea sufletului uman în plan artistic se traduce prin efortul de a reflecta o parte din personalitatea mea dincolo de imagine şi formă.

Sunt foarte mândru de mine. Aş vrea ca numele meu să dăinuie prin străvechiul *Achymerdes* (o realitate care este aliniată la Eu Însămi), ca nicăieri în altă parte, într-un soi de joc de lumini cuprinse într-o clipă astrală, fără frontiere, capabile să pună în vibraţie sufletul uman,

sau manifestarea sufletului afectiv în concretul Ruah. Poate că astfel mi-ar fi mai uşor să mă consider egalul lui Tiţian în ceea ce priveşte măreţia de a găsi o corespondenţă estetică între învelişul fizic şi iradiaţia interioară.

Ca orice trandafir prins într-un joc al oglinzilor de cristal din mijlocul unui labirint de cuvinte, am trăit mult timp departe de viaţa oamenilor, în frumuseţea sintetică a unui trup de înger, explicat doar în cosmosul vrăjii unei clipe de vis dintr-un schimb de mistere şi legende fabuloase. Atât de greu mi-a fost să uit de mine, de lume, de rezonanţele reciproce dintre culoare şi sentiment, dar văzusem prea mult din alte universuri ca să nu-mi doresc să plutesc în jurul acestor tainice alcătuiri de aureole şi iluminări. Experienţa de a fi un trandafir oglindeşte calitatea de a fi un artist fecund.

Leadership: Creaţia ta poate oferi un profil nou al idealizării de sine reflectat de imaginea unei lumi care îşi updatează versiunea într-un mediu receptiv la nobil şi etern, de tipul: „exchange the soul and the experience of the world"?

Am făcut din mine însumi o creaţie, esenţa divină prelucrată prin spiritul naturii care provoacă efectul de frumuseţe, fapt ce amplifică valoarea mea din punct de vedere al dezvoltării unei versiuni mai bune a originalului numit "Double Delight". Altfel spus, artistul este ecoul sensibilităţii latente cu care se păstrează frumuseţea creaţiei în timp.

Din perspectiva unei realităţi al cărei unic sens este obţinerea unei imagini cu multe culori vii, parte a unei creaţii pornite de la cota semnificativă de subiectivitate ce dă unicitate gestului liniar, nu pot decât să îngândurez înţelegeri care opun argumente oricăror provocări ale limbajului special construit să dirijeze viaţa şi semantica artistică în altă direcţie, într-o altă interpretare a *Simbolului Infinitului* zugrăvit cu culoarea roşie.

Funcţia exploratoare a emoţiilor (deshprenyan) este strâns legată de funcţia de substituire a unei imagini din natură cu imaginea unei fiinţe vii (lochynorum). Astfel, o angajare efectivă în universul simbolizat, mijlocind conştiinţei prezumţia alterităţii exprimate prin delegaţie, prin cuvântul sau expresia cărora toate lucrurile se fac şi apar în *Diexvinthis* (conţinutul unei imagini vii), marchează începutul lucrului modelat cu simţire şi smerenie în cadrul modelarii de sine la o vârstă fără număr.

„Dyerosthedis", sau rostirea prezenţei divine în simultaneitatea atemporalului, desemnează modalitatea de a interpreta un arbust erect prin însăşi puterea naturii de a-l înfăţişa ca un pattern de durată, profund şi tainic, al experienţei interioare şi intelectuale de practică cabalistică. Se cuvine aici să menţionez posibilitatea existenţei trandafirului în evoluţia fiinţei umane prin cuvintele lui Borges: *„Importantă este opera pe care o execut cu acest material efemer, numit simbol, încât să o concretizez în descoperirea unei lumi noi, fără margini."*

Deşi unele pricini m-au îndemnat să procedez numai aşa şi nu altfel, perpendicular pe direcţia traseului principal al trăirii prin vis, prin miraj, prin ruperea de realitate, până la urmă m-am făcut părtaş la structura armonioasă a totalităţii universale, spre fenomenologia ontologiei şi a cunoaşterii creaţiei. Sufletul deprins cu arta picturii în ulei mi-a avantajat trecerea de la divin la uman. Acum sunt un om printre oameni.

Leadershipul, sau versiunea Omului Nou, este măreţia unei existenţe trăită şi materializată printr-o idealizare de sine care se obţine prin ridicarea creaţiei la nivel de Creator (fără seamăn).

O regăsire expresivă între două existenţe este posibilă atunci când reuşeşti să te impui ca artist din perspectiva unei priviri venită dinspre o lume anterioară celei pe care o trăieşti acum, cu menţiunea că orice trăieşti se simte într-un alt univers.

O reprezentare a ceea ce este ascuns vederii

On Decembrie 05, 2022

Felul în care te vezi în mintea ta depinde de modul în care te raportezi la o viziune care depășește cu mult ceea ce poţi vedea.

Eram la birou, cufundat într-o linişte obscură care îşi căuta odihnă. Nu priveam în jur, părea să nu mă mai intereseze nimic. Am lucrat până noaptea târziu, până ce sunetul vântului răcoros de iarnă a pătruns înăuntrul încăperii, totul căpătând o altă dimensiune, aceea a unui vis răscolitor în care păream să mă aflu în căutarea unei persoane dispărute, eu însumi devenind captiv într-un timp al neuitării dintr-o *Renascimento Contínuo*. Şi dacă a fost să-mi aştern gândurile pe hârtie, să-mi adun ideile ca nişte simple fantezii, proces de contact cu propriul sine, cu atitudinile, cu gândurile, cu emoțiile mele, acest lucru s-a datorat în principal simulării unei realităţi care îşi exprima propriile forţe creatoare prin prisma modului în care mă raportam la universul imaginaţiei mele.

Şi am adormit cu totul, cu ochii aţintiţi spre stelele căzătoare ale cuvintelor pline de metafore care mi-au luminat sufletul într-un timp al tainelor fără de seamăn, cu gândul la ceea ce scriam într-un caiet plin de gânduri care mereu face loc altor gânduri.

Erau cuvinte desprinse de formă și de termenii rafinați, rostite prin gânduri repetate, dar imortalizate într-un desen al inimii mărit la scara întregului sistem solar şi transformat într-un simbol al veşniciei, *Sanctrisya Ophorum*, desemnând o incursiune în memoria universală. Doar astfel, scormonind prin haosul deplasărilor într-un spaţiu virtual, cvadridimensional, atât de mic încât gravitaţia copleşeşte totul, dincolo de care se întrevăd multiple forme abstracte de reflecţie, viaţa mea interioară părea să devină tot mai accesibilă, fiindcă în sfârşit găsisem un loc în care să mă retrag, un loc de unde germinează "Călătoria Cuvântului".

Leadership: Poţi să efectuezi o căutare de inversare a privirii şi să aduci exteriorul în interior, fără să-ţi uzurpezi suveranitatea lăuntricului?

Nicicând nu mi s-a mai întâmplat să merg atât de departe cu gândurile. Era ca şi când aş fi trecut peste o barieră invizibilă, o linie de demarcație propusă de un timp al întoarcerilor la mine însumi, mereu amânate, dincolo de care cu greu mai puteam regăsi calea spre ceea ce credeam că poate fi un refugiu, un mod de a mă detaşa de mediul înconjurător, de orice dimensiune materială.

Desigur, era posibil să aştept pur şi simplu, să îmi dezintegrez imaginile şi mesajele porţiunii din creier responsabile cu interpretarea undelor sonore şi luminoase, ezitante şi intense, precum cele dintr-un film tulburător în care schimbarea cadrelor creează o iluzie optică. Dar asta ar fi însemnat să-mi uzurpez suveranitatea lăuntricului, să-mi anulez raţiunea de a exista concomitent în două lumi paralele.

Ca să înţelegi universul, sau cum stau lucrurile în lumea visului fără de sfârşit, trebuie să demonstrezi că există o realitate independentă de construcţiile fizicianului teoretician, sau independentă de gândirea analitică a matematicianului autentic. Este vorba despre o realitate a conştiinţei sau a sufletului în care visul nu este decât un eveniment care a fost sau va fi manifestat, o iluzie de tridimensionalitate venită dintr-un alt loc, provocând un soi de paramnezie: *"o iluzie de memorie în care trecutul și prezentul apar amestecate, realul și imaginarul se confundă. Subiectul întâmpină dificultăți în a localiza în timp în mod exact o amintire sau crede a recunoaște o situație, un loc, un obiect sau o persoană care sunt, în realitate, necunoscute".*

Leadership: Poţi să creezi o imagine-amintire după descrierea unui model de viziune care transformă realitatea în vis, conform determinării unui context figurativ capabil de a semnifica interioritatea ta?

Desigur, uzurparea suveranităţii lăuntricului reprezintă o formă de manifestare a unei percepții distorsionate, exagerate despre sine într-o realitate care se confundă cu visul. Altfel spus, devii altcineva decât cine eşti cu adevărat, mărind distanţa dintre ceea ce vezi cu ochii tăi și ceea ce desenezi în imaginația ta.

O rază de lumină mi-a intrat în inimă şi mi-a străpuns creierul la trecerea frontierei dintre două medii transparente, manifestându-se prin schimbarea direcţiei propagării unei singure unde de regret: "am trăit tot ce-am scris, dar nu am scris nimic din povestea visului meu". Până la urmă, este şi ăsta un soi de tehnică de inversare a privirii, o extindere de la polii posteriori ai ochilor până la cortexul cerebral, făcând loc unui miraj al neconvenţionalului, mai mult sau mai puţin conştient, să se manifeste ca o reprezentare a ceea ce este ascuns vederii, într-un *underground beyond the limits of the brain*.

Nu-i aşa? Un vis de neuitat se realizează prin recursul la o lume a miraculosului. Iar eu nu ştiam dacă ceea ce vederea îmi arăta, înceţoşând cumva trecutul şi prezentul, era doar o halucinaţie, o viziune obstrucţionată de pânza unei picturi cu design alb-negru, în care mă integrasem fără voie. Sau, poate că eram doar parte dintr-o imagine a cărui depărtare nu se vede, pentru că în orizontul cuvintelor mele stă veşnicia pe care trebuie să o întrevadă numai cititorul. Semnificaţia acestui aspect continuă să-mi scape, rămânând un fel de enigmă a destinului mistic, suspendată într-o însemnare arabă de la finalul unei cărţi în care se văd reflectate, ca într-o oglindă inversă, vizualizările instantanee ale unui profil de conţinut personalizat.

Leadership: Poţi să determini linia de lungime a unei realităţi interiorizate care să ofere verosimilitate unei imagini din care se deprinde coerenţa unui Sine care transcende timpul şi spaţiul?

O mică istorie se poate naşte din nişte cuvinte propuse de o vedere de dincolo de timp, în interiorul unui vis care şi-a găsit visătorul într-un prezent care nu vrea decât să se eternizeze, adunând toate trăirile precedente la un loc, ca într-o sincronie perpetuă. Totul părea strâns legat de fanteziile pe care cuvintele mele, singure, orientate spre reflecţie, scrise şi adunate în memoria universală, nu le puteau transmite decât ca limbaj al unei minţii răvăşite care luptă să-şi pună puţină ordine în viaţa interioară.

Am adormit cu ochelarii pe ochi, fapt ce-a devenit scenă de respingere a dezechilibrului dintre realitate şi iluzie, şi m-am trezit cu vederea înceţoşată. Ce ar putea fi? Totul se întâmpla ca şi când m-aş fi scufundat într-un întuneric de nepătruns care se lăsa aprins doar de lumina Dumnezeirii. Se părea că merg printr-un nesfârşit labirint subpământean, fără felinar, doar ca să aflu cotiturile adâncurilor pe unde trebuia să o apuc.

Ceea ce se vedea ar fi putut fi altfel...

Un singur lucru e cert: nu-mi voi putea aminti niciodată realitatea din vis, fără să ies din realitatea care m-a ţinut prizonier în acel vis, deci arătând cum văd eu lucrurile în interiorul meu. Şi chiar dacă acum nu sunt pregătit să trag o concluzie, alcătuind cuvinte din gânduri diferite, agăţându-mă de o aparenţă de obiectivitate, voi încerca să privesc totul ca şi când m-aş aştepta să adorm din nou, şi în vis să mă văd din nou lucrând la birou, considerând că totul este doar o pură coincidenţă.

Astfel, am realizat că realitatea este oglinda unei iluzii care se repetă după un timp, în altă

formă. Eu însumi nefiind decât în căutarea unui refugiu sufletesc care oferă "din afară" o lume care îmi lipseşte...

A determina linia de lungime a unei realităţi interiorizate înseamnă să arăţi cum vezi lucrurile în interiorul tău, atâta vreme cât viziunea care formează o imagine-amintire parcurge traseul optic al unei vieţi trăite anterior sau într-o mie de astfel de vieţi.

O reprezentare a ceea ce este ascuns vederii este reprodusă într-o imagine a sinelui care se repetă într-o mulțime de alte visuri, la rândul lor urmate de un Like şi un Oftat: “ce păcat că trebuie să mă trezesc la realitate...”

O reprezentare matematică a modului în care funcționează Universul

On Octombrie 18, 2012

Materializează-ți dorința de a impune ordine și sens peste natura aparent haotică a existenței, îmbrățișând strădania de a descifra armonia ascunsă în natură.

- Nu înțelegeți? Această piramidă a fost construită pentru a fi în armonie cu numerele lui Fibonacci, pătratele lui Fibonacci sau cu numărul de aur pe care artiștii l-au considerat întotdeauna armonios. Nu ni se pare doar că e corect, chiar este.

Talma a privit către celelalte două piramide.

- Toate sunt la fel?

Jomard a dat din cap.

- Nu. Bănuiesc că asta e deosebită. Este o carte care încearcă să ne spună ceva. Este unică dintr-un motiv pe care nu-l înțeleg încă.

- Îmi pare rău, Jomard, a spus jurnalistul. Sunt bucuros pentru tine, că ești așa emoționat, dar faptul că liniile astea imaginare sunt egale cu 1,6 sau cum ai spus pare un motiv şi mai prostesc ca să construieşti o piramidă pentru că acel ceva pe care l-ai numit indică o emisferă sau un mormânt în care nu o să fii îngropat. Mie mi se pare că, dacă ceva din toate astea este adevărat, egiptenii tăi antici au fost cel puţin la fel de nebuni pe cât de înţelepţi.

Leadership: Din perspectiva unei reprezentări vizuale care se extinde și crește în complexitate, îți este revelată o simbioză perfectă între ordinea matematică și haosul aparent al naturii?

Critica față de viziunile neconvenționale poate reflecta limitările noastre în aprecierea profunzimii intelectuale a altora.

- Ah, dar aici te înșeli, prietene, a replicat bucuros savantul. Dar nu-ţi condamn scepticismul, pentru că nici eu nu am înțeles toată ziua ceea ce se află în faţa noastră, până când ochiul ager al lui Gage m-a ajutat să găsesc o fosilă de nautilus. Vezi tu, secvența Fibonacci, transferată în geometria Fibonacci, scoate la iveală unul din cele mai frumoase modele din natură. Hai să desenăm un arc prin aceste pătrate, dintr-un colț în altul, și să unim arcele. A bătut ușor peste desen. Apoi obținem o imagine ca aceasta:

- Iată ! Cu ce seamănă?

- Cu nautilusul, am riscat eu iarăși. Omul era al naibii de deștept, chiar dacă tot nu înțelegeam unde voia să ajungă.

- Exact ! Imaginaţi-vă cum ar fi dacă aș mări imaginea aceasta prin adăugarea altor pătrate: 21, 34 și așa mai departe. Această spirală va crește în continuare, din ce în ce mai rotundă și mai mare, semănând tot mai mult cu nautilusul nostru. Iar acest model de spirală este un model repetitiv. Când iei șirul lui Fibonacci și îl aplici în geometrie, iar apoi aplici acea

geometrie în natură, vezi acest minunat tipar de numere, această spirală perfectă, care a fost folosită de însuşi Dumnezeu.

Leadership: Crezi că interacțiunea dintre forma obiectului privit și spațiul său de deschidere ar putea fi înțeleasă ca o reprezentare a aspirației spre absolut în contextul unei imagini ideale?

Veţi găsi spirală în sepalele florilor sau în semințele conurilor de pin. Petalele multor flori sunt numere ale lui Fibonacci. Un crin are trei petale, piciorul-cocoșului are cinci, nemțişorul are opt, crizantemele de câmp au treisprezece petale, unele flori de ochiul-boului au douăzeci şi una, iar unele margarete au treizeci și patru de petale. Nu toate plantele respectă acest tipar, dar multe o fac pentru că este cea mai eficientă cale de a împinge în afară, din centrul comun, seminţele sau petalele care cresc. Este și foarte frumos. Așadar, abia acum înțelegem ce lucru minunat este această piramidă ! A dat din cap, satisfăcut de propria explicație.

- Este o floare? a încercat și Talmă, luându-mi de pe umeri povara de a fi profund.

- Nu. Devenise grav. Ceea ce am urcat noi nu reprezintă doar o hartă a lumii, domnule ziarist. Nu este nici măcar un portret al lui Dumnezeu. Este de fapt un simbol al creaţiei, al forţei vitale, o reprezentare matematică a modului în care funcționează Universul. Această masă de piatră integrează nu numai divinul, ci fiecare secret al existenței. Are codificate, în interiorul dimensiunilor ei, adevărurile fundamentale ale lumii noastre. Numerele lui Fibonacci reprezintă natura în culmea frumuseţii și eficienței, o privire aruncată inteligenţei divine. Iar piramida le întruchipează și făcând asta întruchipează însăși mintea lui Dumnezeu. A zâmbit melancolic. Aici era adevărul vieții în dimensiunile acestei prime construcții mărețe, iar tot ce a urmat a fost o lungă amnezie.

Leadership: Reflectând la piramida ca simbol al creației și al întregii existențe, cum ar putea această să fie văzută ca o reprezentare care transcende imediatul, într-o conexiune profundă cu sinele și universul?

Talma a căscat gura de parcă însoţitorul nostru o luase razna. Eu m-am aşezat la loc, neștiind ce să cred. Era posibil ca piramidele să fi fost construite doar ca să păstreze cu sfinţenie niște numere? Părea ceva străin de modul nostru de gândire, dar poate că perspectiva asupra lumii a egiptenilor antici era diferită. Atunci și medalionul meu era un indiciu matematic sau un simbol? Avea vreo legătură cu teoriile ciudate ale lui Jomard? Sau savantul a citit în acel morman de pietre ceva pe care constructorii nu l-au avut niciodată în vedere?

Prin prisma acestei reprezentări matematice transformate într-un model natural, nu găsești acest exemplu ca fiind o ilustrare perfectă a modului în care teoria poate îmbogăți înțelegerea lumii tale vizuale? Într-o simbioză perfectă cu ideea că lumea naturală este modelată de matematică, nu crezi că acest lucru îți poate oferi o perspectivă mai profundă asupra modului în care putem interpreta și înțelege lumea înconjurătoare?

Relația dintre matematică și formele naturale, precum piramida, reflectă interconexiunea dintre om și universul său perceput. De fapt, piramida funcționează ca un simbol al iluminării și cunoașterii, sugerând că structura și armonia sunt chei ale înțelegerii universale. Prin piramide, omenirea își materializează căutările de sens și de ordine în haosul existențial.

Leadershipul concentrează în structura sa de bază următorul mesaj: **"Prin ordine și echilibru putem accesa cunoașterea profundă a lumii. Prin intermediul unei imagini capabile să reziste în timp, ne materializăm dorința de a impune ordine și sens peste natura aparent haotică a existenței."**

O reprezentare matematică a modului în care funcționează Universul este determinată de relația intrinsecă dintre cosmos și conștiința umană. Piramida, ca punct de întâlnire între matematică și natură, este o poartă către înțelegerea legilor universale și permite posibilitatea de a descifra armonia ascunsă în natură.

O şansă la iertare

On Iunie 14, 2015

Experimentează leadershipul „în taină", oferind acces la o nouă variantă a profunzimii realităţii observabilă din postura unui judecător care acceptă pactul cu virtutea iertării.

- Luaţi-mi şi ultimul aur care mi-a mai rămas, bolborosi Danglars întinzându-i portofelul. Luaţi-l şi lăsaţi-mă să trăiesc aici, în peştera asta. Nu mai cer libertate, cer numai să trăiesc. Îndurare !

- Aşadar, suferi? întrebă omul căruia numai umbra i se putea vedea. Dinaintea acestei umbre, toţi bandiţii se înclinau.

- Da, sufăr, sufăr cumplit.

- Şi, totuşi, sunt oameni care au suferit mai mult decât tine.

- Nu cred.

- Ba, aşa e ! Cei ce au murit de foame.

- Te căieşti măcar? întrebă vocea sumbră şi solemnă, care-l făcu pe Danglars să simtă cum i se zbârleşte părul pe cap.

Era lesne de înţeles, bancherul nu mai era un om, ci un cadavru viu. Ochii lui slăbiţi încercară să desluşească lucrurile şi zăriră un om cu o mantie, pierdut în umbra unui stâlp de piatră.

- Pentru ce trebuie să mă căiesc? întrebă Danglars.

- Pentru răul pe care l-ai săvârşit, spuse aceeaşi voce.

- Da, mă căiesc, mă căiesc ! strigă nenorocitul.

- Atunci te iert ! spuse omul, lepădându-şi mantia şi făcând un pas spre lumină.

- Contele de Monte Cristo ! strigă Danglars mai palid de groază decât fusese cu o clipă înainte din pricina foamei şi a mizeriei.

- Te înşeli. Nu sunt contele de Monte Cristo.

- Atunci cine eşti?

- Sunt acela pe care l-ai vândut, l-ai prădat, l-ai dezonorat. Sunt acela pe a cărui logodnică

ai păcălit-o, ai necinstit-o şi ai folosit-o pentru scopurile tale. Sunt acela peste care ai călcat ca să te înalţi până la bogăţie. Sunt acela pe al cărui tată l-ai făcut să moară de foame, acela care acum te-a osândit pe tine să mori de foame. Şi care totuşi te iartă, fiindcă el însuşi are nevoie să fie iertat. *

Leadership: Îţi cunoşti limita propriei integrităţi numai prin experimentarea libertăţii de a da viaţă unei Umbre?

Alegerea unei noi posibilităţi de a juca un rol de judecător impune situaţii noi, de multe ori imprevizibile şi greu de gestionat, cum sunt cele privind statutul interiorităţii ce interesează şi sub aspect transmisibil. Cu alte cuvinte, ce anume din tine poate avea caracter constrângător pentru ceea ce face, simte sau gândeşte un individ care nu-şi înţelege faptele, care nu se poate vedea pe sine decât în universul lui?

Deschiderea spre o experienţă a adevărului, nedisponibil decât printr-o intervenţie neaşteptată şi percutantă, determinând o puternică conştientizare a trecutului incert al individului, este o măsură a profunzimii, amplorii şi variabilităţii imaginaţiei şi perspicacităţii. Precum şi a nevoii de a experimenta un soi de leadership „în taină", care străbate orice imposibil, orice abatere de la normă, zidul veşnic – păcatul, asigurând o separare a răului şi a binelui.

Simţindu-se doar prin efecte, acest leadership apare ca un fel de putere binefăcătoare care se opune la tot ce este rău, un fel de combinaţie între necunoscut şi primejdie, contribuind la formarea unei noi conştiinţe.

Integritatea este atributul prim al conştiinţei de a săvârşi o anumită faptă în numele adevărului, chiar dacă acest lucru implică forţarea realităţii de a intra într-un model de dedublare complice, înţeleasă ca un „mecanism structural de rezistenţă" în faţă oricăror obstacole potrivnice atingerii scopurilor propuse. Uneori, această dedublare se perpetuează în indivizi ca iluzie a unei rigide separări între comportamentele asumate în sfera publică şi în cea privată.

Leadership: Îţi ceri iertarea de pedeapsă fără să simţi prezenţa lui Dumnezeu, deci fără să-ţi testezi fireasca curiozitate a aflării deznodământului final chiar dacă ţi s-a oferit această şansă?

„Umbra" este creaţia omului de geniu care are priceperea de a acorda trăsături originale artei de a fi în acelaşi timp strateg, judecător, justiţiar şi revelator, în virtutea ştiinţei de a avea acces la adevăruri ascunse, materializate uneori într-un soi de capacitate negativă. Dar care sunt retuşate printr-o inteligenţă a cărei hrană sunt însăşi criteriile de orientare, realizările, limitele şi regulile în relaţia cu ceilalţi.

Cineva spunea că orice împlinire în lume suscită imediat o insuficienţă: ceea ce apare în timp ca o patimă netrebnică, până la urmă trebuie să eşueze. Acest lucru face din leadership un instrument de diagnosticare a conştiinţei şi de evaluare a slăbiciunilor, tocmai atingerea coardei sensibile a omului constatată prin intermediul confesiunii şi a pocăinţei.

Tocmai în asta constă magia leadershipului care se află adesea în inima a tot ceea ce există şi se schimbă în lume: mulţi oameni îşi descoperă identitatea şi îşi acceptă mai uşor statutul de „inferior" printr-o confesiune - obţinută uneori doar printr-o condamnare, o achitare sau o executare de pedeapsă. Printr-o cădere în abisul suferinţei.

În toate aspectele vieţii vei fi obligat la restituire, în măsura pierderii suferite de cealaltă

persoană, mai ales dacă nu reuşeşti să respecţi termenele şi limitele propriei tale îmbogăţiri acordată la normele conştiinţei de a discerne dintre adevăr şi falsitate.

O şansă la iertare i se oferă fiecărui om care s-a îndepărtat de tot ceea ce este drept şi cinstit, dar care are curajul să se autodenunţe, optând pentru o confesiune.

Liderul îşi cunoaşte tot timpul limita sa: aceea că libertatea de a se preschimba într-o „umbră" şi de a-şi manifesta puterile ascunse nu este niciodată cauza lui, că ea depinde mereu de altceva, înălţător, divin, spiritual. Chiar şi el are nevoie să fie iertat de ceva mult mai presus decât el.

Iată de ce această libertate, prin rezultatele ei cele mai reprezentative, nu poate să reuşească nicicând un salt „amazing" sub forma unei situaţii definitiv asigurate. Pentru că, la rândul său, liderul cu adevărat puternic nu se subordonează doar creaţiei sale mentale şi capacităţilor sale ieşite din comun. Ci unui destin.

O secundă închinată învierii

On Noiembrie 22, 2012

Adu viul în structura extrem de complexă a Omului din tine, delimitând foarte bine acele legături moleculare dintre "a fi" şi "a nu fi".

Înainte de a citi următoarele, te rog să răspunzi la o întrebare. **Ce preferi să fii: un ocean sau o perlă?**

" Alegerea" lui Vincent nu fusese garantată la naştere. Nu avea un coeficient genetic ridicat. Nu era nimic remarcabil în privinţa evoluţiei lui. Din fragedă copilărie ajunsese să se considere aşa cum îl vedeau ceilalţi. Un bolnav cronic. Bolnăvicios. Incapabil de a atinge vreo performanţă în vreun domeniu. Graniţa stâncoasă a vieţii sale nu oferea nicio spărtură care să permită accesul în interiorul ei, nu putea fi străpunsă de niciun talent, de nicio însuşire deosebită.

În timp ce fratele său mai mic, Anton, era un fiu perfect, de care orice părinte ar fi mândru. N-avea nicio scuză să dea greş în ceva. În mod deosebit, încă de mic se remarcase în egală măsură ca elev strălucit şi ca excelent înotător. Performanţe peste performanţe la toate, asemenea unui artist chemat să ia parte cu toate simţămintele sale la tot ce îi oferă viaţa. Plin de talent, înzestrat cu autoritate, cu o foarte mare curiozitate, o puternică dorinţă de afirmare, tenacitate şi perseverenţă.

Jocul lor preferat era "Laşii". Când părinţii nu se uitau, obişnuiau să înoate în ocean cât de departe puteau. Un fel de pariu. Era mai mult vorba de cui i se făcea frică şi se întorcea primul înapoi. Bineînţeles, întotdeauna "laşul" era Vincent. Întotdeauna el era pierzătorul.

Leadership: Ţi-ai exersat capacitatea de a corela rolul atribuit vieţii tale cu aptitudinile din ziua de TEST care spune "Start" unui nou început?

Dar într-o zi, pe când cei doi fraţi jucau "Laşii", s-a întâmplat ceva. Ceva uimitor. Ceva ce nu-l lăsa pe om să fie ca înainte. Anton şi Vincent au hotărât să-şi taie pielea degetului mare cu o scoică, aşa cum fac fraţii de sânge. O tăietură mică, cât să iasă sânge. Într-o clipă, Vincent face gestul. Dar Anton – un fapt nelămurit – ezită. Ia scoica în mână, o priveşte atent, şi-o aruncă fără să-şi respecte înţelegerea.

Şi abia atunci, în acel moment de trezire pură, Vincent, asemenea unui om care se lasă mânat sub imperiul unei forţe irezistibile, a înţeles că prin venele sale curgea altceva. O grupă sanguină foarte rară, un sânge curajos şi iute. Ca un fel de poliţă de asigurare împotriva laşităţii. O stare perfectă de întreţinere a întregului său Eu.

O putere nouă i-a stârnit brusc întregul conţinut sufletesc, convingerile, valorile şi comportamentul. Prin cele mai adânci fibre ale fiinţei sale, a fiinţei care aparent, cu toate strădaniile depuse, nu putea atinge decât ipostaza unui banal personaj pe scena vieţii, a pătruns şi s-a materializat acel fluid misterios de comunicare între el şi altcineva. Un Alter-Ego. O forţă măruntă, abia în faşă, dar un Hercule în leagăn.

Diferenţa dintre ei era aceasta: Vincent avea o mare rezistență la durere şi suferinţă. Pe când Anton era sensibil la acest capitol. Pe unul durerea şi suferinţa îl vor propulsa înainte, pe celălalt îl vor trage în jos.

Leadershipul este un simbol al imposibilului devenit posibil în ecuaţia cu două necunoscute care fac din viaţă o adevărată artă: întâmplarea şi modul cum reacţionezi la efectul ei.

O calitate, una singură, lipită de colţurile cele mai tăinuite ale fiinţei sale, cusută cu firul cel mai fin al încrederii, cu propriul mecanism de apărare – o voinţă câştigată prin durere şi spirit de sacrificiu, de partea cea mai puţin vizibilă a identităţii sale. La rândul ei transformându-se în timp într-un set unic de calităţi ce vor doborî, de la un capăt la altul al existenţei lui Vincent, tot ceea ce vor găsi în cale – împrejurări sau demersuri. Acoperind totul, şi cele mai adânci prăpăstii ale suferinţei, şi cele mai aprige temeri cu care el trăia.

Un om care va colecta, până în zorii zilelor senine, energiile cele mai creatoare, de perfecţiune, într-o societate care îşi alege numai modele umane de calitate. O pauză între prezent şi viitor. O destindere a spiritului, o înnoire spectaculoasă a relaţiilor cu el însuşi.

Vincent a ajuns în final acolo unde şi-a propus, acolo unde nimeni nu i-ar fi prezis. La Gattaca. În mijlocul acelei clase privilegiate, unde doar cei puţini, cei aleşi, cei extraordinari, aveau dreptul să pătrundă.

Noroc, ghinion, destin sau coincidenţă - astfel judecăm mulţi dintre noi, în indignarea noastră, acele salturi spectaculoase spre imposibil a acelor "Nimeni". Ei ajung să se dovedească mai presus decât toţi, numai prin faptul că reuşesc să conducă evenimentele, chiar dacă acestea sunt în defavoarea lor.

Să fii aruncat de destin în adâncurile celui mai mare ocean, să te ridici la suprafaţa lui ţinându-ţi respiraţia, dând doar din mâini şi din picioare. Şi, mai presus de toate, să-i parcurgi imensa suprafaţă, trecând prin cele mai puternice furtuni şi uragane, până la cel mai îndepărtat ţărm. Asta se numeşte, dragi prieteni, *Summam Successus* , adevărata reuşită, evadarea dintr-un spaţiu al imposibilului. Asta înseamnă să fii învingător. Asta înseamnă să fii "Vincent".

Leadership: Reuşeşti să treci de ipostaza imaginii de "Nimeni", grăbindu-te într-un prim moment al receptării imposibilului să o identifici drept un privilegiu de a fi "Vincent" ?

Oamenii cei mai valoroşi nu sunt aceia care râvnesc şi luptă neîncetat pentru obţinerea locului întâi. Nu aceia care ajung într-un final în vârful cel mai înalt al piramidei. Nu diplomele, nu premiile, nu talentul, nu inteligenţa, nu mijloacele băneşti, nici geniul şi nici cultura nu vor fi vreodată bine prinse în şuruburi. Acestea reprezintă doar nişte "instantanee", încordări maxime a muşchilor care cresc presiunea exercitată asupra unei zone de interes.

Adevăraţii învingători sunt constructorii, *les plus grands artistes du monde* , aceia care creează cu propriile eforturi o piramidă unică, de la prima până la ultima cărămidă. Acele maşinării bine unse care nu se gripează după fluierul startului. Aceia care trec în cea mai mare parte a vieţii lor neobservaţi, dar care, prin spirit de sacrificiu şi credinţă, reuşesc să-şi construiască un drum pe care toţi ceilalţi nu sunt capabili să păşească. Aceia care reuşesc să aducă "viul" în structura extrem de complexă a Omului din ei, delimitând foarte bine acele legături moleculare dintre " *a fi* " şi " *a nu fi* ".

Campionul se străduieşte să urce până în vârful piramidei. Dar constructorul ştie şi să o construiască, şi s-o dărâme. Şi s-o întărească, şi s-o ridice până la ce nivel vrea el. Altfel spus, campionul se poate ridica doar la nivelul hotărât de constructor.

Un constructor este întotdeauna mai presus decât un campion.

Leadership: Îţi concentrezi esenţa propriei determinări într-o operă numită: "Supra Eu" sau îţi intensifici efortul de transformare a unei imperfecţiuni?

Începutul unei legende se declanșează de la ideea că trebuie să te scufunzi într-un ocean în care nimeni nu te vede până ce reușești să scoţi la iveală acea perlă inestimabilă care se găseşte în tine.

Cât despre Anton, fusese parcă destinat să ajungă un mare învingător. Un ocean în defensivă şi atac. Cele mai mari merite. Însuşirile cele mai preţioase. Modelul perfect pentru Gattaca. Alături de alţii campioni, alte talente, alte modele.

Dar el reprezintă, de fapt, o metaforă care sugerează ideea că dreptul de a fi cel mai bun şi cel mai puternic, talentul, onorurile, nenumăratele distincţii conferite, absolut toate recunoaşterile, diplomele obţinute - NU TE VOR FACE UN ÎNVINGĂTOR, nu te vor face un om cu adevărat valoros, nu te vor face un constructor. Ci poate doar un alt campion, printre miile de campioni.

Cei ca Anton sunt binecuvântaţi cu o grămadă de calităţi. Sunt aprigi, perseverenţi, încăpăţânaţi, cu spirit de învingător, entuziaşti, talentaţi. Un arsenal de virtuţi. Adevărate oceane ale societăţii. Ei sunt reprezentaţi de Supra Eu, o autoritate construită cu uşurinţă, care de multe ori generează dezastrul tocmai dintr-o prea mare siguranţă de sine.

Dar să nu uităm niciodată, că oceanele se află la vedere. Uneori ne uluiesc prin forţa lor. Pe când adevăratele daruri ale naturii, perlele cele mai preţioase, de o calitate superioară, nu stau la vedere, ci trebuie căutate, identificate, aduse la lumină şi apoi şlefuite.

Leadership: Ai o singură calitate care poate înfrânge un ocean?

O perlă nu se va ridica niciodată la nivelul unui ocean. Dar îi va răni orgoliul şi îi va conferi o anumită vulnerabilitate.

În finalul filmului “ *Gattaca (1997)* ”, Anton, invidios şi plin de răutate, face o ultimă încercare de a-şi dovedi supremaţia în faţa fratelui său. Pur şi simplu nu putea accepta faptul că un “nimeni”, un necunoscut, a ajuns la Gattaca, dovedindu-se cu mult superior lui şi tuturor celorlalţi.

Căci, da, Vincent a fost deasupra tuturor “campionilor”, numai prin faptul că a reuşit să mute soarele în locul lunii. El a fost singurul care reuşit imposibilul.

Cei doi se întrec încă o dată. Aşa cum făceam când erau mici. Şi, din nou, esenţa omului cu caracter mai puternic iese la iveală, din nou trăsătura cea mai oţelită separă malul celor două tipuri umane. Vincent câştigă întrecerea prin acceptarea şi asumarea “durerii”. În timp ce Anton – omul perfect, sportivul de neîntrecut - oboseşte şi se lasă tras în jos de curenţii puternici. Şi tot Vincent, tăind valurile sălbatice, se întoarce şi-l salvează de la înec.

Te laşi purtat de întâmplare şi de voinţa celorlalţi? Tu eşti cel care îşi controlează destinul, sau forţa “fratelui” tău te manipulează fără să-ţi dai seama? Îl vei salva pe “fratele” tău care îţi controlează în secret curajul de a fi diferit?

Ai o singură calitate care te poate propulsa înaintea tuturor “campionilor”? Care ar fi aceea? Care sunt opreliştile care te împiedică să te ridici deasupra “oceanului”? Eşti un om rezistent

la “durere”, sau eşti o forţă a naturii cu puncte slabe? Eşti un “Vincent” sau un “Anton”?

Privilegiul de a fi Vincent este un etalon al "desăvârşirii" considerată drept un factor determinant al atitudinii omului care răzbate din opoziţia celor două entităţi: situaţia de a fi limitat şi puterea de a crede în miraculos.

O secundă închinată învierii este edificatoare pentru a releva momentul în care descoperim acea unică calitate transformatoare care ne poate propulsa pe culmi nebănuite. Trebuie însă să căutăm această perlă, să ştim ce trebuie să facem cu ea. Să o transformăm într-o energie creatoare.

Deci, caută perla din adâncul oceanului omului care eşti, ceva ce ai deja în sânge, ceva ce îţi aparţine şi nimeni nu-l poate limita. Caută în tine ceea ce alţii nu văd şi nu găsesc niciodată.

O simptomatologie a biruinţei

On Decembrie 20, 2016

Învaţă să vezi prin transparenţa pe care ţi-o făureşti prin mijloacele de redare puterii creatoare, accesând noul tău statut conform analizei impactului unui grad mai înalt de cunoaştere.

Mi-am împodobit scopul secret, întreaga mea avere, cu un pretext plauzibl, o formă eliberatoare de a aranja o întâlnire nepermisă, producătoare de o imagine cu valoare unică: *"no one can tell"* . Era răspunsul la o lungă așteptare, o aparenţă a genialităţii care îşi aştepta interpretarea special consacrată unei percutante descrieri a nemărginitului, în adâncul unui superlativ al puterii creatoare, în perimetrul unei emoţii care şi acum ciopleşte fantasme într-o minte care se exprimă prin efectele optice ale oglinzilor. Lumina, suferind mai multe reflexii totale, producea un efect frumos. Be very careful of a pretending that you wanted !

"I seem to be what I'm not you see" în această esenţă a mijloacelor de redare a unei lucidităţi care se abandonează pe sine, ca în Mitul lui Sisif, printr-o succesiune a reacţiilor de tip "Stay close until you reach the end", dar dezvoltate în lumina legii periodicităţii unui fenomen invers, precum o imagine răsturnată. Aici, puterea creatoare de care trebuia să dau dovadă se anunţa a fi o garanţie a vederii perfecte din perspectiva unui fizician care visează să călătorească în "timeline-ul" propriei vieţi pentru a-şi pune la punct un nou sistem de producere şi furnizare a realităţii.

Biruinţa mea era de fapt o încălcare a standardelor de realitate acceptate de preferinţele şi aşteptările secolului în care trăiam. Era lupta pe care trebuia s-o duc împotriva efemerităţii, împotriva lucrurilor realizate fără suflet, cum ar fi lucrurile ce ţin de artă şi de ştiinţă. Numai scriitoarea Marquerite Yourcenar a sesizat necesitatea acestei biruinţe în lupta cu efemeritatea şi cu delăsarea. Ea scria:

A face cât poți de bine. A reface. A mai retușa imperceptibil retușa însăși. "Pe mine însumi mă corectez, spunea Yeats, corectându-mi operele." El a fost unul dintre cei ce au avut bunăvoința de a se deranja din proprie inițiativă spre a rectifica o greșeală, a confirma un detaliu, a sprijini o ipoteză, a înlesni o nouă cercetare - fapte pentru care îi aduc prieteneasca mea mulțumire.

Leadership: Poţi să trăieşti şi să gestionezi o experienţă de sine grandioasă în funcţie de luciditatea cu care întâmpini o realitate diferită, poziţionându-te eficient în apropierea unei imagini edificatoare?

O separare spontană a celor două părţi din mine, folosind formula gaussiană a lentilelor, făcea ca totul să se complice, să aibă nuanţele unei lungi evanescenţe. Două ţesuturi transformate în nervi, două credinţe confruntate cu un ambient care le dezminte şi le sfidează, două idei aflate în raport adversativ. Una acţionând ca o barieră activă, cealaltă pasivă la transportul materiei între fazele adiacente ale dezvoltării dinamicii relaţiilor dintre o imagine a vieţii trecute şi una a vieţii recâştigate.

Evoluţia de la starea de echilibru către starea de neechilibru era posibilă, dar foarte puţin probabilă. Nu-mi dădeam seama cât sunt de singur, fugind de lume, retrăgându-mă în pustiul unei imense împărăţii, în delirul posesiei de noi cunoştinţe învecinate cu distrugerea vechilor idei şi învăţături, propunând sensuri noi, chiar dacă aceasta nu constituia izvorul primar al căutărilor mele. Biruinţei îi este necesară sentimentul şi acţiunea, amândouă imortalizate într-o imagine edificatoare cu privire la ceea ce mă face să mă simt liber, motivat, creativ, mai mult decât satisfacţia eventuală ce ar izvorî din contactul cu experienţa, cu părerile şi cu

atitudinea celorlalţi oameni.

Era o luciditate chinuitoare, care schimba experiența de sine, creştea voioşia înşelătoare a beţiei de a gândi totul în termeni de putere, pentru a pune stăpânire pe libertatea absolută, vrându-mă rezemat de una din acele taine care dau omului gustul neprețuit și amar al absolutului. *Too real is this feeling of make believe.* Biruinţa este chinul de a te păstra lucid şi creativ într-o realitate care vrea să fii altcineva.

Leadership: Încerci să-ţi reprezinţi superioritatea fantastică în această lume, accesând starea de spirit specifică forţei de creaţie care cere: "Doamne, fă-mă egalul Tău?"

Iată ce gândea Jack Griffin, eroul lui Wells, confruntându-se cu demonii minţii sale, analizând nuanţele unei taine eliberatoare:

Să realizez un asemenea vis însemna să depăşesc magia ! Îmi făurisem o viziune magică - pe care nicio îndoială nu venea să o tulbure - asupra a ceea ce putea reprezenta asta pentru un om. Mister, putere, libertate absolută...Nu întrezăream niciun fel de piedici. Gândiţi-vă un pic ! Eu, un sărac lipit pământului, un jerpelit, cu posibilităţi limitate, eu să folosesc meritele substanţiale ale ştiinţei, resursele ei inepuizabile, să mă ridic pe culmile ei cele mai înalte, în sfera spiritelor cu adevărat evoluate, eu aş fi putut să devin un om invizibil !

Ani de zile am muncit. Şi de îndată ce biruiam câte un munte de dificultăţi, din vârful lui întrezăream un altul. Noianul de detalii, de mărunţişuri, ghearele materiei ascunse în vecinătatea cauzelor şi efectelor ! Exasperarea ! Declanşarea nebuniei ! Am răbdat totul, mi-am încleştat dinţii. Dar în final am reuşit ! Am descoperit secretul invizibilităţii, i-am depăşit pe absolut toţi oamenii de ştiinţă prin virtutea perseverenţei, prin educarea voinţei, prin strălucirea unei lucidităţi intransigente ţâşnite din bezna nebuniei... Şi a funcţionat...credeţi-mă ! Puteam să văd prin transparenţa pe care mi-o făurisem. Puteam să fiu în orice loc, fără ca nimeni să-mi sesizeze prezenţa. Un fel de Dumnezeu. Iată de unde am plecat, şi cât de departe am ajuns.

Cel ce se recunoaşte drept o cauză a unei trude prelungite, pline de conţinut, justificată prin prisma dorinţei de a cel mai bun, cel ce descoperă o formă a creaţiei care vorbeşte în numele unei anumite superiorităţi, va exprima întotdeauna ideile, sentimentele şi aspiraţiile cele mai fine în ecuația expansiunii propriului sine suprem.

Un fapt pozitiv, fiindcă cel ce nu corelează biruinţa trudei sale cu o evoluție favorabilă, cu o serie de elemente legate de un grad sporit de cunoaştere, acela nu se va putea manifesta drept o prezenţă lucidă a raţionalului în favoarea efectelor unei anumite lecții cândva asumate. Iar sinele suprem, într-un univers al posibilităților infinite, al fanteziei, tinde a vedea lumea reală printr-o pluralitate a posibilităţilor de angajament în a genera plus valoare și inovaţie prin creație.

Un lider ştie să vadă prin transparenţa pe care şi-o făureşte. El este un artist care controlează arta transformării pornind la acțiune de la un anumit statut şi continuând să acceseze acel statut conform analizei impactului unui grad mai înalt de cunoaştere, din faza unei extinderi a forţei sale de creaţie care cere: "Doamne, fă-mă egalul Tău ! "

Un asemenea individ, experimentând relaţiile dintre o imagine a vieţii trecute şi una a vieţii recâştigate, este util leadershipului prin faptul că se contopeşte cu o imensă proiectare a actualităţii sale, desigur într-o notă optimistă, într-o categorie aparte şi bine definită, a "diferitului". Iar diferitul este adesea fuziunea armonică dintre creație și desăvârşire, ce dă o senzație de împlinire totală.

O simptomatologie a biruinţei are ca prim considerent trăsătura de bază a artistului de geniu, a cărui catalizator de diferenţiere se poate situa la limita superioară a maximului admis de legile devenirii, putându-se formula astfel: *"Să realizez un asemenea vis înseamnă să depăşesc magia ! "*

O simptomatologie a existenţialităţii

On Decembrie 29, 2016

Micșorează distanța dintre ceea ce ești și ceea ce este posibil să fii, adăugând un surplus de sens experienței care te singularizează.

Citiţi mai jos prezentarea romanului „Duma Key", de Stephen King, tema existentă în materia unei fine analize a personalităţii umane, şi încercaţi să prindeţi firul acestei minunate povestiri cu tâlc:

Un groaznic accident pe un şantier de construcţii îi smulge braţul lui Edgar Freemantle, întunecându-i memoria şi mintea. Calvarul perioadei de recuperare îi provoacă schimbări de personalitate şi accese de furie necontrolată ce grăbesc sfârşitul căsniciei sale.

Edgar îşi doreşte să nu fi supravieţuit accidentului, dar psihologul său îi recomandă un leac geografico-existenţial: îl sfătuieşte să îşi schimbe complet viaţa, părăsind oraşul aglomerat şi afacerile din domeniul construcţiilor.

Retras la Duma Key, în paradisul Golfului Mexic, Edgar începe să picteze cu pasiune, descoperindu-şi un talent extraordinar. Dar atracţia sa faţă de pictură şi desen pare a fi comandată de o forţă ce îl depăşeşte, ca o constrângere. Multe din tablourile sale au o putere ce nu poate fi controlată, aproape mistică, scoţând la iveală secrete de mult îngropate, trezind nălucile copilăriei. Iar talentul său poate fi, în acelaşi timp, o armă… *****

Leadership: Începi să înţelegi rostul unei experienţe dureroase atunci când încetezi să o mai judeci din prisma unei cauzalităţi inerente, odată cu acea înţelegere de sine acordată manierei de abordare a unei noi direcţii de viaţă?

Ceea ce devii prin intermediul unui moment important, caracterizat prin mijlocirea unui prezent care „niciodată nu este destul de bun", deci care are șansa de a fi accesibilizat doar prin acceptarea unui sentiment puternic de iminentă transformare personală, atribuindu-i un anumit sens, te ajută să vezi mai bine legătura dintre ceea ce ţine de tine şi lucrurile asupra cărora chiar nu ai niciun fel de control.

Dependenţa de ceea ce ţi se întâmplă în favoarea unei schimbări existenţiale mai ample, izbutind să se întindă până la marginile necunoscutului, în imensa nădejde a unei soarte prielnice, este calea de a te arăta fidel unui statut și unei noi valori de referinţă asumate prin apartenența faţă de o forţă îndrumătoare căreia nu i te poţi opune. Cui i se dă şansa să-şi descopere un talent extraordinar, trebuie mai întâi să experimenteze durerea de a supravieţui în faţa unei răscruci a vieţii, şi nu doar să supravieţuiasca, ci să-şi găsească puterea de fi altcineva, un deschizător de drumuri.

Să reconstitui un moment important și să pătrunzi sensul profund al faptelor, să te dedici ideii de Cauză - ce faci cu ceea ce ți s-a întâmplat? - contopindu-te cu ea în condiţiile de limitare sau condiţionare a libertăţii de a alege, este o măsura a capacităţii tale de a continua să înaintezi prin valoroficarea experienței care susţine raportul de la cauză la efect.

Gradul de determinare al unui om are ca suport acel surplus de sens al experienței care îl singularizează.

Singularitatea este un concept care se referă la implicațiile pe care le are un eveniment major în progresul personal. A deveni altcineva, prin imensa putere latentă a minţii şi a sufletului, înseamnă să păstrezi din ceea ce este vechi doar partea folositoare, înseamnă să conferi întâmplărilor petrecute o consistenţă într-un plan ideal de existenţă.

Viaţa este progresul pe care ţi-l dă rezultatul evenimentelor care la care te raportezi cel mai profund, pentru că relevă disponibilitatea ta de a te raporta la dimensiunea învăţării din cele întâmplate, aşa încât să fii mai preocupat de lucrurile care contează cu adevărat. Este şi aceasta un soi de cunoaştere pe care o poţi lua în considerare împreună cu trăirile cele mai ascunse, sau mai intense, sau cele mai nobile, fiindcă viziunea asupra vieții şi învăţăturile cele mai importante se materializează într-un om cu totul diferit numai atunci când evenimentele negative sunt privite printr-o lentilă măritoare, atât importanța cât și consecințele lor.

Singularitatea relevă disponibilitatea de a analiza progresul propriei învăţări, cunoaşteri, prin luarea în considerare a finalităţii unei etape de viață, cu trăirile aferente, şi materializarea unei noi etape într-o satisfacţie de ordin material și moral.

Să accepţi adevărul despre tine însuţi analizându-ţi disponibilitatea pentru a înfăptui progresul unei anumite laturi a vieţii, dovedind o mare voinţă psihică şi emoţională, este produsul unei materializări a cunoaşterii bazată pe experienţe mai puţin fericite, aferente sentimentelor cele mai intimie şi vulnerabile. Şi care este adevărul despre tine însuţi? Eşti dispus să te uiţi diferit la tine însuţi? Eşti dispus să te schimbi, să devii un cu totul alt om?

Începutul unei revizuiri a vieţii, la nivel de conştiinţă şi spre un nou aspect a cine eşti cu adevărat, se datorează responsabilităţi pe care o ai în raport cu tine însuţi din punct de vedere al desfăşurării evenimentelor la care nu te aştepţi să se producă.

O simptomatologie a existenţialităţii, variind în funcţie de faza evolutivă a omului, este în concordanţă cu acea experiență care îl singularizează. Astfel, să nu uităm cele două mari teme ale gândirii existenţialiste, după filosoful francez Emmanuel Mounier:

1. Fragilitatea ființei umane - Omul este mereu expus propriului său sfârșit, distrugerii sale ca ființă umană, deoarece el nu există ca atare decât prin efortul personal.

2. Singurătatea şi secretul. Fiecare fiinţă umană se simte solitară, impenetrabilă celorlalţi.

3. Angajarea: Pentru a-și construi viața, omul trebuie să opteze, să aleagă în permanență, să se angajeze în raport cu destinul său.

O simptomatologie a pedagogiei

On Noiembrie 13, 2016

Mai întâi creează tu însuţi, apoi învaţă-i pe alţii.

Ştia - a avut deseori dureroasa ocazie să constate că oamenii afirmă cu răutate: *"Cine poate - creează; cine nu - învaţă pe alţii"* . Dar Eisenstein nu s-a lăsat niciodată tulburat de asemenea meschinării, susţinând cu calm: *"A învăţa pe alţii în cinematografie înseamnă astăzi încă, şi în întregime, a crea."*

Nu era o vorbă goală. Cercetând activitatea pedagogică a lui Eisenstein, constatăm cu uşurinţă că predarea echivala, la el, cu studiul, cu găsirea unor noi soluţii creatoare. Obiectul cursului său - o declară programatic - este pătrunderea în laboratorul de creaţie. Cursul său este şi un prilej de cristalizare teoretică pentru artist.

Principiile sale pedagogice era foarte ferme. Nu suporta ca studenţii să-şi abandoneze propria personalitate prin mimetism. Se răstea la ei de câte ori surprindea o asemenea tendinţă: *"Ce-i asta? A-ţi hotărât cu toţii să vă aliniaţi pe scară din "Crucişătorul Potemkin?" Pe mine vreţi să mă imitaţi?"*

El a urmărit acest principiu încă de la începutul muncii sale pedagogice. *****

Leadership: Îți arăţi preocuparea exclusivă pentru fenomenul „ *Cine poate - creează; cine nu - învaţă pe alţii* ", reflectând aspiraţia către tot ce este greu de știut pe linia unei tendinţe de apreciere a artei?

În miezul oricărui calcul uman şi a oricărei proprietăți intelectuale, produse cu succes pe fondul formării unor calități generale care influențează în mod favorabil poziția de referinţă faţă de sarcinile impuse sau autoimpuse, există întotdeauna o personalitate. Raţională în esenţă, iraţională faţă de un stimul exterior, personalitatea este anterioară oricărui mecanism de adaptare la construcții externe imaginative şi sigură îşi creează propriile-i legi.

Personalitatea creatoare este interesantă prin tendinţa cu care abordează tema artei şi a plăsmuirilor artistice din perspectiva unei întrebări: "Ce este important pentru mine să le transmit oamenilor"? Cum anume contribui eu la menţinerea şi îmbunătăţirea poziţiei şi a imaginii deţinute, de creator al unui curent ştiinţific, dirijând procesul de finalizare al unei opere de artă către o ieşire din trenduri?

Personalitatea nu reprezintă doar indiciul unui prilej de cristalizare teoretică și practică a unei viziuni - după care îți rămâne puţin de făcut în faţa a ceea ce se petrece în lumea din jur. Ci, de foarte multe ori, ea este o consecinţă a preocupării exclusive pentru fenomenul *„Cine poate - creează; cine nu - învaţă pe alţii"* , reflectând aspiraţia către tot ce este greu de știut și mult mai greu de interpretat.

A fi un creator vizează acea latură a personalităţii care adună constant informaţii şi vede totul din mai multe perspective. Iar a învăţa pe alții nu este o minune a creaţiei, nu este o călătorie în meandrele creaţiei, nu este un joc al pulsaţiilor umane, între vis şi realitate, ci de cele mai multe ori se dovedeşte a fi o formă copierii, a mimetismului excesiv întreținut prin folosirea unor metode perimate, cu rezultate slabe sau nefaste.

Arta care face dintr-un creator un pedagog vizează acea componentă a personalităţii care întreţine relaţia dintre proiecţiile imaginative ale unei lumi posibile dincolo de cunoştinţele altor oameni şi o explorare a sinelui din perspectiva rigorii de a defini o nouă realitate.

Este același viciu profesoral, întâlnit frecvent la cei cu înalte grade de calificare (și credibilitate), cei care fără a descoperi ei înşişi vreun principiu sau concept își arată întotdeauna disponibilitatea de a prezenta fragmente (capitole întregi) din operele intelectuale ale adevăraţilor creatori.

Leadershipul, pe parcursul mai multor stadii de evoluție a cunoaşterii, se supune evaluării impactului unei creaţii asupra dinamicii procesului de creație promovat, asupra viziunii integratoare asupra procesului de producție a rezultatelor obţinute prin încordarea spiritului inventiv.

Liderii cei mai buni, nelimitându-se la condiţiile învăţării autodirijate, se conduc după îndemnul care asigură unitatea lecţiei referitoare la iscusinţa de a intra în relaţie cu oamenii: *„Mai întâi creează tu însuţi, apoi învaţă-i pe alţii."*

Leadershipul este mai întâi de toate urmarea pătrunderii în laboratorul de creație, apoi un prilej de cristalizare teoretică a unor metode, norme şi principii orientative pentru viitorii „artişti". Şi, în final, devine rezultatul abordării minuţioase a complexităţii fiecărui aspect de dezvoltare care ar duce în mod evident la o concluzie diferită de cele enunțate anterior.

A fi un bun pedagog înseamnă să-i înveţi pe oameni ce înseamnă arta prin proiectarea propriei lor persoane în spaţiul unei realităţi care nu seamănă cu alta, fiindcă pe neaşteptate această realitate poate deveni imprevizibilă.

O simptomatologie a pedagogiei aduce în prim plan totalitatea manifestărilor tale intelectuale care permit diagnosticarea unui stil de predare a propriilor teorii și diferențierea lor de alte modele de creaţie, încât să fii de neînvins cu precădere în tendinţa: "Cine poate – creează".

*** Notă:** Ion Barna - *Eisenstein* , Editura Tineretului, 1966.

Source: https://neculaifantanaru.com/o-simptomatologie-a-pedagogiei.html

O simptomatologie a trăirilor estetice

On Iulie 06, 2018

În opera pe care o priveşti trebuie să se simtă ştiinţa şi personalitatea celui ce a plăsmuit-o.

Mă străduiesc să definesc un fel de oscilare între iniţiativa de a interpreta o compoziţie artistică şi fidelitatea faţă de mesajul pus în prim planul conştientizării actului creator. Lumea în care trăiesc, o componentă cheie a oportunităţii de a-mi dezvolta cunoştinţele generale despre viaţă, despre frumos şi bine, pare a avea o corespondenţă trainică într-un univers paralel. Într-o asemănare cu linia curbă a visului care limitează la abstract şi cu linia aparent dreaptă a desenului, culoarea potrivită găsită, ce deschid accesul spre o valoare fundamentală a artei, numită libertate de expresie.

Însăşi esenţa acestei libertăţi, care e una cu slujirea lui Dumnezeu, având deschidere spre logica şi valoarea vieţii, desemnează o schimbare a compoziţiei şi originii unui punct de vedere deja intens susţinut de spaţiul unui mimesis inversat. Principiu estetic, dezvoltat mai ales în antichitate, potrivit căruia arta este imitarea realului.

Aici mă văd nevoit să recunosc un al doilea lucru, tot la fel de primordial în satisfacerea unei viziuni obiective ca supremul unghi de vedere ce mi-a permis să cunosc lumea ca pe o taină şi să-i atribui semnificaţii simbolice. El împărtăşeşte, asemenea vechilor cărţi de învăţătură, îndemnul de a constata o mutaţie dinspre artă spre ştiinţa bazată pe continuitatea unei transformări permanente de natură conceptuală.

Un lider vizionar navighează într-o lume aparent neschimbătoare pentru a crea noi orizonturi capabile să inspire schimbarea.

Orice etapă, orice aspect, orice arie a vieţii împărtăşeşte ceva din interiorul unei enigme, posibile cicluri de căutări, şlefuiri de identitate, frământări spirituale, acumulări de sensuri în cadrul unui labirint imens, colorat cu acea nuanţă a îmbinării rozului cu cenuşiul, a deprinderilor şi expresiilor caracteristice stilului controlat de o raţiune care pleacă mereu urechea la inimă. Nu degeaba, atunci când încerc să-mi exprim potenţialul artistic, să formulez vizual un nou orizont, mă simt în preajma unui Don Quijote, transplantat într-o lume aparent neschimbătoare, rostuită după legi aparent misterioase, făcută să amendeze ori să fericească după dreptate pe făuritorii ei.

Ceea ce este imaginat drept absolut ca taină supremă în arta mea, cade în extrema unui compromis dintre sinceritate şi gradul ridicat de flexibilitate în ceea ce priveşte definirea unui nou profil de arhitect al lumii, într-un stil cadenţat al labirinturilor afective şi suprapuse ale personajelor propriul Ego, propriilor trăsături şi fapte constructive.

Leadership: Poţi să extinzi cadrele de referinţă ale reprezentărilor tale imaginare cu determinări conceptuale în care este integrată experienţa personală?

O ghicitoare în interiorul unei enigme este ca un tablou plăsmuit din delicateţea unui gest spontan, exersat îndelung, ca urmare a unui dialog strâns cu ochiul care anticipează o nouă direcţie de compoziţie şi răspunde mai rapid decât mâna. Încă o dată, mă aliniez căii de a trăi o metaestetică în decursul vieții, supus fiind unor transformări de ordin cantitativ sau calitativ.

Investirea culorii cu energia radiantă a vieţii lăuntrice, ochiul magic al şansei de a şti cât de mult mint sau cât de mult rămân autentic în materie de psihologie a creatorului, înrudeşte experienţa artistică, servind drept îndreptar spiritual, cu extraordinara experienţă picturală a unei Divinităţi care aşează o conştiinţă comună în toţi oamenii.

Privesc plin de curiozitate imensa diversitate de forme de viaţă şi aparenta lor perfecţiune, asemenea unui genetician care studiază moleculele şi este mult mai în măsură să interpreteze informaţiile adunate, încercând să desluşesc ceea ce Jacques Ruffié numea "una dintre cele mai misterioase frontiere ale cunoaşterii".

Fără îndoială, am de reconstituit o imagine de ansamblu satisfăcătoare evoluţiei. Dar nu o imagine totală. Aidoma unui tablou de esenţă clasică, ea conţine două mari componente: una informaţională cu determinări culturale şi una perceptuală vizând totalitatea reprezentărilor imaginare grupate în jurul unui nucleu labil al ideilor.

În evoluţia leadershipului mă legitimez ca un exponent de seamă al artei-ştiinţifice. Primul concept la care mă rezum când scriu, privind în jur, este acesta: "Observă Inteligent ! "

Mărturia unei opere pe cât de admirabilă pe atât de inaccesibilă se constituie din expresia decursă din asocierea culorilor şi din profunzimea tainică a ceea ce descoperi prin tot ceea ce exprimi.

Orice lucrare pictată este o supradimensionare a activelor mele de proprietate intelectuală, pe care culoarea le conţine prin calitatea sa autonomă, atingând speranţa, gingăşia, atracţia. Cum poţi să nu observi mugurii verzui ai copacilor, verdele proaspăt al ierbii, zborul plin de graţie al porumbelului, în universul pictural al unui artist care lucrează doar cu creionul, cu foaia de hârtie şi cu îmbinări stabilite de cuvinte, cu mijloacele de expresie ale unei cunoaşteri de seamă care doar se poate împrumuta, dar fără a acorda nimănui dreptul de deţinere?

În cartea "Cum se savurează un tablou", scriitorul Victor Ieronim Stoichiţă încearcă să dea o explicaţie picturii *Chemarea Sfântului Matei* , realizată în 1661 de Juan de Pareja. Pentru a sublinia importanţa experienţei sale, Pareja a recurs la o figură de stil cunoscută sub numele de *metalepsă de autor,* reprezentându-se în extremitatea stângă a pânzei, sub trăsăturile unui personaj secundar, dar important totuşi prin funcţia sa: el ţine în mână un bilet pe care se poate citi: "Juan de Parefa 1661".

Tabloul ar putea (la limită) să funcţioneze şi fără acest personaj, care este un adaos facultativ, fără a fi totuşi lipsit de semnificaţie.

Aceasta este, de fapt, calitatea unei opere care îşi priveşte artistul din perspectiva unui fin observator și al unui sensibil martor ocular. Dar nu vreau să întind prea mult acest subiect, introducând alte linii de forţă, contururi de forme tipice pentru o lucrare ce înfăţişează, la modul general, portretul individualităţii unui artist. Aş menţiona doar atât:

Singura cale de dialog cu diversitatea unei lumi vaste, cu ajutorul conceptului totalităţii, încât să înlocuieşti realitatea vieţii cu ştiinţa pe care o deţii, este să te plasezi tu însuţi în opera pe care o plăsmuieşti.

O simptomatologie a trăirilor estetice impune efectuarea explorării de cadre pline de mister, dialoguri scurte, dar pline de conţinut, într-o artă a comparaţiilor dintre experienţa personală şi informaţia percepută prin limbaj sau imagine, în "display"-ul virtual reprezentat de constiinţă.

O trăire estetică este o creștere a conștientizării reacţiei tale faţă de ceea ce transmiţi.

O triplă schimbare a luminii

On Septembrie 26, 2014

Preocupă-te de perceperea nemijlocită a esenţei artei, valorificând experienţele acelor concepţii amănunţit elaborate care pot să conducă ulterior la maximizarea raţiunii tale de creaţie.

Preocuparea lui Eisenstein pentru cinematografie este dublată de o alta. Pe planul întâi apare o pasiune aparent insolită: Eisenstein montează pe scena teatrului Bolsoi, opera "Walkiria" de Wagner. O face, cum declară, cu un entuziasm de nedescris şi cu inspiraţie. O face preocupat de perceperea nemijlocită a muzicii şi de întruchiparea ei scenică. O face însă şi cu gândul unor experienţe pe care le va folosi în viitoarele filme.

El îşi verifică ideile despre unitatea dintre sunet şi imagine, despre funcţia dramatică a culorii. În ultimul act, de pildă, compune, în acord cu orchestraţia lui Wagner, o triplă schimbare a luminii pe întregul fundal al scenei…(lumina argintie, arămie şi albastru-azurie) şi pune lupta între nuanţele de lumină albastru-azuriu şi purpuriul flăcărilor în ton cu partitura "Feuerzauber". Asistăm aici, de fapt, la experienţe ale unor concepţii ulterior amănunţit elaborate. *****

Leadership: Modelul creaţiei tale poate să ilustreze experienţele unor asociaţii ştiinţifice puse sub semnul unor concepţii amănunţit elaborate, astfel încât să asigure receptarea unor noi sensuri ale imaginii pe care o transmiţi?

Prin permanenţa sa în construirea şi dezvoltarea unei înalte măiestrii, leadershipul poate fi o armă cu două tăişuri, îndreptându-se fie împotriva celui care practică o formă avansată de artă, fie împotriva celui care nu reuşeşte să-şi înscrie ideile „cu ceva în plus" în sfera unei experienţe de vaste de creaţie. Care înseamnă şi o devenire la nivel de percepţie a formelor de cunoaştere avansată, de intelectualitate superioare, de relevaţie a unor aspecte neştiute.

O orientare spre autenticitatea descoperirii noilor dimensiuni ale artei, printr-o iniţiere în spaţiul consacrat revelaţiilor şi percepţiilor care te recomanda ca artist, poate să te diferenţieze de mulţime prin amprenta imaginaţiei şi originalităţii. Practic, când creezi trebuie să aduci în prim plan o viziune personală a unor anumite momente, trăiri sau convingeri, care să surprindă elementele cele mai importante ale modelului tău de gândire.

Ca regizor, trebuie să asiguri o "supremaţie" definitivă a unoi concepţii capabile să devină parte a unor momente de neuitat şi a unei imagini care să spună o poveste despre personalitatea şi măreţia propriei tale fiinţe în culorile unei realităţi cât mai misterioase. Viziunea ta trebuie să reflecte mai mult un crescendo al voinţei de a realiza ceva cu care să te identifici în totalitate şi care să contribuie în acelaşi timp la dezvoltarea a ceea ce s-ar putea numi „Reprezentare de sine".

Personal Leadership este o reflexie a experienţei folosită în viitoarele realizări ca urmare a interacţiunilor dintre conţinutul de idei pe care îl ai de redat într-o nouă formulare şi nuanţa concepţiilor construite şi promovate pe care le alegi să-ţi evidenţieze aptitudinile.

Leadership: Utilizezi în procesul de cristalizare a ştiinţei mai mult "curentul alternativ" decât cel continuu, folosind contacte de tip „închis-deschis"?

Această experienţă de sine, revărsându-se pretutindeni în creaţie, reuneşte curiozitatea,

dorinţa de a încerca ceva nou, abilitatea de a percepe intuitiv locul artei în manifestarea unor noi entităţi de tipul: „ *schimbarea se produce prin accesul la o anumită sursă de reînnoire a punctelor de referinţă în definirea unor noi tendinţe* ”, cu viitoare provocări în materie de gestionare a conceptelor pe care se întemeiază modelele de leadership.

A utiliza în procesul de cristalizare a ştiinţei mai mult „curentul alternativ” decât cel continuu, căutând acea caracteristică a gândirii care conferă valoare sporită de certitudine concluziilor la care ai ajuns şi concepţiilor pe care ţi le-ai format, este echivalent cu folosirea îndelungată şi sistematică a experienţei de creaţie mai mult în sensul de realizare a extinderii normelor de aplicare a cunoaşterii folosite în viitoarele proiecte.

Normele de aplicare a cunoaşterii au ca principală caracterictică performanţele realizate la testarea eficacităţii creaţiei într-un format de tip conceptual (ce descrie relaţiile între om şi artă corelate cu realitatea) pentru a îndeplini rolul de declanşator al efectului de autenticitate.

În timp ce contactele de tip „închis-deschis” sunt de fapt două aspecte ale propriei tale persoane. Primul aspect se referă la posibilitatea de a stagna într-un tipar de gândire contraintuitivă, celălalt ia în calcul posibilitatea de a te perfecţiona printr-o mai bună valorificare a ideilor.

Calea spre autenticitate este rezervată mijloacelor de realizare ale unor concepţii ulterior amănunţit elaborate, tributare unor idei şi tendinţe de viitor, care prin esenţa şi consistenţa lor marchează maniera de redare a unei forme de percepţie asupra interacţiuniii dintre conţinutul şi imaginea pe care o proiectezi asupra lumii.

O triplă schimbare a luminii vizează evaluarea difuză a realităţii pe care o reprezinţi în „febra creaţiei”, lăsând liberă calea către construcţia unor noi tipare de gândire. Ca să reuşeşti să valorifici experienţele acelor concepţii amănunţit elaborate care pot să conducă ulterior la maximizarea raţiunii tale de creaţie, mai întâi preocupă-te de perceperea nemijlocită a esenţei artei care te leagă de ceea ce eşti tu însuţi: un deschizător de orizonturi.

O urmă adâncă în viața artistului

On Iulie 11, 2010

Leadershipul artistic presupune capacitatea de a îmbina diferitele elemente ale mediului, viața cu faptele, și mișcarea cu timpul, creând o experiență cinematografică holistică.

Momentul acela, de care s-a lăsat îmbătat atunci, a imprimat, așadar, o urmă adâncă în viața artistului („podul plutitor... mi-a dezvăluit pentru prima oară farmecul acestei atracții care nu m-a părăsit de atunci niciodată”). E aproape ca un dans ritmic colectiv, care unește într-o simfonie unică mișcarea a zeci de oameni... Și în acest tablou, principalul este ritmul, calcularea spațiului, a timpului cântărit până la secundă. Suvoi de oameni în flux și reflux, când integrându-se în mecanismul de ceasornic al gigantului efort colectiv, când, desprinzându-se, pentru ca apoi, în alt ciclu al procesului, riguros stabilit, să se reintegreze în mișcarea generală.

Stricta împărțire a timpului și spațiului, alternanța mișcărilor diferiților afluenți ai masei; natura și oamenii contopiți într-un singur tot. Da, la naiba! – oare nu aceasta stă la baza contopirii diferitelor obiecte ale mediului cu oamenii, a felului de viață cu faptele, a mișcării cu timpul? Și în film, în ansamblu, și în îmbinarea fragmentelor sale (a secvențelor de montaj), și în acea inginerie specifică a spațiului și timpului care pune în fața obiectivului mizanscene extrem de complexe ale episoadelor de masă sau gesticulația personajelor, îmbinând acțiunea singulară cu acțiunea generală, îmbinând acțiunea cu timpul calculat, intensitatea acțiunii cu spațiul rezervat, gestul cu cuvântul, îmbinând ideea cu imaginea senzorială, concluzia ideativă cu șocul emoțional. De aceea, prima școală unde a învățat Eisenstein arta montajului a fost școala de ofițeri.

Contopirea oamenilor cu natura și integrarea acțiunilor individuale într-un flux colectiv reprezintă esența unei regii bine orchestrate, capabilă să creeze o imagine cinematică de impact.

„Sistemele de extindere narativă se află în planul de referință al filmului, ele reprezentând, de fapt, punctele de inflexiune ale poveștii. Uneori, în câmpul vizual al spectatorului apare o secvență centrală și mai multe secvențe paralele situate simetric față de cea menționată, dar cu intensități emoționale din ce în ce mai subtile. Ele au rolul de a amplifica și nuanța mesajul principal. Secvențele secundare sunt înconjurate de nuanțe tematice. Din acest motiv, interpretarea filmului constă în determinarea numărului de scene și a fracțiunii de inter-relații cu care cele două sisteme narative sunt împletite, adică se determină distanța emoțională dintre cele două fire narative principale, astfel încât să se creeze o tensiune optimă.

Ca urmare, diferența dintre cele două perspective narative este egală cu numărul de secvențe amplificate prin impactul lor vizual și sonor, determinate de contrastul și ritmul montajului. Prin această metodă de montaj pot fi construite narațiuni complexe, dar diferența dintre cele două fire narative nu trebuie să fie prea mare pentru a menține acea coerență a narațiunii globale. Așadar, structura generală a filmului trebuie să fie concepută în prealabil cu o tehnică mai puțin precisă (spre exemplu, prin scrierea scenariului), fapt ce denotă o planificare meticuloasă a întregului proces creativ.

Leadershipul creativ se manifestă prin abilitatea de a transforma fiecare gest și fiecare mișcare într-o parte integrantă a narațiunii generale, îmbinând complexitatea individuală cu intensitatea colectivă.

Aici ne gândim la comparatorul inter-diferențial al lui Eisenstein pentru etalonarea secvențelor cinematografice în contextul social-istoric, foarte important pentru o

reconstrucție fidelă a epocii. Pentru realizarea foarte precisă a montajului, Eisenstein folosea o instalație de editare bazată pe schema propusă de experiența sa în inginerie și artă cu mulți ani în urmă. Această abordare îi permitea să creeze o 'simfonie unică' a mișcării, unde ritmul, calcularea spațiului și a timpului erau cântărite până la secundă.

Fluxul și refluxul de imagini se integrează, când în mecanismul de ceasornic al efortului colectiv, când desprinzându-se de ritmul general, pentru ca apoi, în alt ciclu al procesului narativ, riguros stabilit, să se reintegreze în mișcarea generală a filmului. Această inginerie specifică a spațiului și timpului pune în fața obiectivului mizanscene extrem de complexe, îmbinând acțiunea singulară cu acțiunea generală, gestul cu cuvântul, ideea cu imaginea senzorială, și concluzia ideativă cu șocul emoțional.

Concluzia este că tehnica cinematografică a lui Eisenstein reprezintă o sinteză unică între rigoarea științifică și sensibilitatea artistică, creând un limbaj vizual complex și profund emoțional."

Esența leadershipului artistic constă în contopirea diferitelor elemente - oameni, natură, timp și spațiu - într-o unică mișcare ritmică, asemenea unui mecanism complex de orchestrare vizuală și emoțională ce transmite o poveste unitară și captivantă.

O urmă adâncă în viața artistului este lăsată în concepția sa despre ritm și armonie cinematografică, fiindcă experiența trăită l-a marcat profund, situația dezvăluindu-i o nouă perspectivă asupra contopirii elementelor vizuale și emoționale. Spun acest lucru deoarece această influență se reflectă clar în stilul său regizoral, prin faptul că îmbină riguros fiecare element al scenelor, imediat ce percepe potențialul lor de a crea o narațiune coerentă și captivantă.

Ochii albaștri privesc intens misterul și profunzimea lumii

On Octombrie 17, 2023

Ceea ce vezi în jur se reflectă în experiența de contemplare, iar această experiență creează o conexiune profundă cu esența și frumusețea lumii înconjurătoare.

Un pictor cu ochii albaștri deschis stă pe malul mării, cu paleta și pensula în mână, încercând să imortalizeze un moment de mare impact emoţional cuprins în efemeritatea vieţii, desfăşurându-se ca un apus nespus de frumos. Soarele strălucește puternic, aruncând o culoare roșiatică peste mare, în timp ce nisipul fierbinte, nici prea solid, nici lichid, care nu se usucă niciodată, oferă un aspect natural și texturat. Pictorul privește în jur, încercând să captureze frumusețea peisajului, şi ceea ce vede este dincolo de aşteptările sale, căci niciodată apa mării nu a reflectat strălucirea soarelui mai frumos ca acum, creând o paletă de culori în nuanțe de albastru și verde.

Mai mult decât atât, vederea ochilor albaștri deschis devine o fereastră către sufletul pictorului, o comparație sensibilă, o descriere evocatoare dezvăluind emoții în culori vibrante, cu o transparență care amintește de strălucirea apei în lumina soarelui, oferind o privire profundă în interiorul ființei sale. Vederea oferă pictorului o perspectivă unică către înțelegerea și conectarea cu frumusețea naturii care îl înconjoară. De fapt, niciun alt pictor nu poate sesiza albastrul sufletului cu aceeași sensibilitate și profunzime ca el, fiindcă în sufletul lui, atât de bun, atât de sincer, se oglindesc misterul și liniștea albastrului mării care fac ca orice privire să se adâncească într-o contemplare tăcută.

Din pricina culorii lor (specifice sensibilității), ochii albaştri deschis sunt categoric afectaţi de umbra pe care o aruncă asupra lor lucrurile aflate în imediata lor apropiere, tot ce este pe litoral devenind mai degrabă o poezie în culori și linii, fiecare detaliu oglindind frumusețea naturii într-o formă artistică. Şi, ca orice ochi albaştri, ei nu pot intra în contact cu lucrurile intens colorate ori luminate, mai ales dacă luăm în considerare distanța pe care o arată perspectiva aeriană, fiindcă sunt sensibili la strălucire și pot simți disconfort în fața unei expuneri puternice la lumină.

Leadership: Pe măsură ce te îndepărtezi mai mult de lucrurile particulare, poți să le percepi astfel încât ele să nu devină negații evidente în raport cu idealitatea absolută?

Deci ochii, mai ales cei de culoare albastru deschis, fiind cu totul autonomi, trebuie protejați de lumina puternică deoarece ea împinge aparența la extrem. Mai ales fiindcă ei nu sunt înzestrați cu cea mai fină percepție a luminii şi a culorilor. În general, pentru ochii deschişi la culoare, pe măsura îndepărtării tot mai mari față de lucrurile particulare, ei pot apărea ca negații evidente în raport cu idealitatea absolută. La aceşti ochi, în funcție de distanța pe care ne-o arată perspectiva aeriană, ceea ce este luminat poate să pară ca fiind întunecat, slujind mai mult nuanțele de alb sau negru.

Numai un pictor ar putea observa cum ochii albaștri deschiși, datorită sensibilității lor la lumina puternică, pot capta și interpreta culorile intense ale verii pe litoral într-un mod special. Soarele strălucitor de deasupra mării ar arunca o lumină vibrantă asupra nisipului auriu, a apei albastre și a altor elemente de vară. Pentru el, această lumină intensă și umbrele create de obiectele din apropiere ar putea crea o paletă bogată de culori și efecte vizuale.

Eu n-am ochi albaștri, dar dacă aș avea, aș putea să admir mai profund frumusețea culorilor și a luminii din jur, să înțeleg mai bine complexitatea nuanțelor și să mă bucur mai mult de farmecul lor unic în lumea înconjurătoare.

Bineînţeles că ochii, nu doar cei albaştri pot să domine întru totul ceea ce este ideal în realul subtil din planul apropiat sau îndepărtat, sub una şi aceeaşi intensitate a luminii. Automat, aceeaşi regulă se aplică vederii oricăror ochi în virtutea artei de a desena o lume, de a construi imagini, în felul următor: "aparența trebuie să fie adevăr, iar adevărul aparență".

Se înţelege de aici următorul lucru: idealitatea absolută în artă reprezintă dorința de a atinge perfecțiunea prin exprimarea conceptelor, emoțiilor și frumuseții într-un mod care depășește limitările sau imperfecțiunile materiale și personale. Este o căutare a esenței și a universalității în creația artistică, unde artistul încearcă să transmită principii și adevăruri care depășesc o situație sau un subiect specific. În timp ce negațiile evidente în raport cu idealitatea absolută sunt rezultatul unei perspective critice sau a unei analize atente a lucrurilor particulare, unde imperfecțiunile și limitările devin evidente în comparație cu conceptul de perfecțiune sau idealitate absolută.

Leadership: Poţi să accentuezi importanța unei conexiuni profunde și autentice în procesul de exprimare artistică, concentrându-te asupra formei pe care marea o împrumută în tablourile pictorului?

Forma pe care marea o împrumută într-un tablou poate include linii fluide ale valurilor, contururi ale țărmului, reflexii ale luminii pe apă, culori în nuanțe de albastru și verde, sau orice alt element care surprinde esența și frumusețea mării în ochii artistului. Există și o anumită tematică în arta picturii, un soi de exprimare a gândurilor și sentimentelor artistului prin intermediul culorilor, formelor și compoziției sale, asemenea unui limbaj vizual care comunică idei și emoții, putând fi corelată cu fragmentul din "Marele Gatsby":

"El închise ușa și se apropie de ea, de parcă și-ar fi dat seama pe neașteptate că există și el acolo, dar pe un alt plan, iar acea privire se deschise în fața lui, ca și cum ar fi vrut să vadă dacă e cine zice că e. Nu știa ce poate să facă, el, omul care niciodată nu renunță, pentru că îl înnebunea acea privire."

Acest fragment sugerează o puternică atracție, chiar obsesie pentru ceea ce este perceput ca special și înnebunitor de frumos, într-un cadru plin de reamintiri, pe care ochiul liber al artistului le-a observat și le-a transpus pe pânză, conturând o poveste în culori și forme, care dezvăluie trecutul într-un mod subtil și expresiv. În lumea artei, această temă (atâta timp cât este tratată cu sensibilitate și profunzime), poate fi găsită în mod similar în operele artistice care se concentrează pe frumusețea și profunzimea subiectului, învăluite într-o aură de mister și fascinație.

De exemplu, un pictor care se specializează în portrete poate fi fascinat de expresiile ochilor și a privirii subiecților săi, făcând comparaţie cu el însuşi pe malul mării, în timp ce redă pe pânză strălucirea și profunzimea apusului de soare. El simte că, asemenea soarelui, ochii săi devin un instrument de exprimare prin care poate captura și reprezenta frumusețea naturii într-un mod unic și personal, astfel putând să surprindă profunzimea emoțiilor și a personalității sale în privirea subiectului și să creeze o pictură capabilă să capteze esența acestuia.

În plus, există artiști care se concentrează pe reprezentarea peisajelor naturale, cum ar fi apusuri sau peisaje maritime, și încearcă să transmită frumusețea și misterul naturii în lumina și culorile lor unice. Ei devin astfel povestitori ai lumii prin intermediul culorilor și al privirii lor, transmițând emoții și povești prin creațiile lor artistice.

Leadershipul urmează procedeul pictural descris, care începe cu fundalul, urmărind ca acesta să nu sugereze o adâncime pronunțată, ci să creeze un cadru egalitar și echilibrat între ceea ce se vede și ceea ce se simte. Fapt care accentuează importanța unei conexiuni profunde și autentice în procesul de exprimare artistică.

Ochii albaștri privesc intens misterul și profunzimea lumii, căutând în fiecare nuanță și fiecare umbră o poveste de spus. Aici nu este vorba despre culoarea ochilor, cu atât mai puțin despre ochii albaştri plasați în sfera povestirii unei realități originale, ci este vorba despre rigurozitatea cu care tratăm lucrările de artă în modul de apreciere și interpretare, înțelegând că fiecare detaliu și fiecare alegere artistică pot transmite semnificații profunde și valori umane.

Ochii artistului dau clipei ceva din eternitate

On Mai 04, 2023

Ceea ce vezi în timp real este ceea ce trăieşti când găseşti locul sufletului tău în amintire.

La semimaratonul de săptămâna trecută am observat un lucru interesant. Un personal-trainer alerga alături de cursantul lui, un el şi o ea, şi alergau încet, fără să se dezlipească unul de celălalt, ca şi când ar fi făcut parte dintr-un tablou încadrat în tema: "Controlul Impulsurilor". Evident, scopul alergării împreună nu era de a tinde spre ocuparea unui loc pe podium, poziţie prevăzută cu un rezistor sufletesc stabil, al dăruirii de sine şi hărniciei, ci mai important era ca personal-trainerul să determine "traiectoria unui sistem care tinde spre o stare de echilibru".

Deci, subiectul trebuia scos de sub tensiune, fără nicio deviaţie extremă, încât să fie stabil în poziţia centrală de alergare în linie dreaptă.

Cu un sentiment profund, inalterabil, îi priveam fără ca ochii să-şi distragă atenţia de la ei. Atmosfera îşi exercitase presiunea asupra fondului afectiv al indivizilor, de unde nu mai puteau evada decât printr-un "derivat de zero", un status atribuit stabilităţii în orice direcţie, în teren variat, în varii ipostaze și poziționări ale minţii în raport cu trupul.

Leadership: Trebuie să vezi de aproape o imagine ca să poţi face distincţie între "acţiunea imediată" şi acţiunea îndepărtată"?

Cum spuneam, cursantul alerga cot la cot cu antrenorul. Ceva din unul făcea parte din celălalt, ca şi când ar fi avut loc un amestec de spirite rare într-o imagine de zile mari. Era imortalizarea unui moment de bun augur într-un soi de pictură pură, expresionistă, de mare forţă compoziţională, pe care artistul o percepe cu alţi ochi, mai altfel, cu simţurile unei infuzii de linişte, într-un extraordinar carusel al simbolurilor și înțelesurilor profunde. Şi când alergau, motivaţi, cu imposibilitatea de a pune o limită stărilor de spirit, când îşi încordau muşchii doar la jumătate din capacitate, ochii mei puteau zări din când în când o dăruire de sine liniştită, statornică, curată.

Se spune că orice erou îşi are punctul slab, asta aşa este. Încă mă întreb cine era eroul: cursantul, sau antrenorul? Totuşi, antrenorul n-a făcut decât ce-aş fi făcut şi eu în locul lui, a exersat reperul de comparaţie, acel *"stand by me, without being intimidating and intimidated by one another"*, reprezentând un pretext pentru exprimarea sentimentului de mulţumire, încercând să transmită o linişte sufletească aparte, superioară obişnuinţei. Poate de aceea ochii mei erau liniştiţi, fiindcă era o linişte în privirea lor, o pace cum nu mai găseşti, care ajungea până la mine.

Desigur, ochii mei ştiau acest adevăr, şi o ştiau prea bine: o comunicare bună depinde de arta ascultării. Uite cum o singură privire ştie să asculte, în funcţie de circumstanţe, o stare generalizată. Tace şi ascultă, ca un bun sfătuitor, glasul privirii lor, şi în glas se conturează parcă uimirea unui artist care a reuşit să cucerească necunoscutul, exact ca la vederea unui lucru încântător, dar neaşteptat, fără ca el să militeze activ pentru stilul impresionist.

Ce era în alergarea lor, decât un mod de a-şi exprima un sentiment de afecţiune puternică, născut din înrudire, admiraţie faţă de eroul care nu te lasă la greu, faţă de artistul care îmblânzeşte toate expresiile cu o artă stilistică rară?

Leadership: Imaginea la care te raportezi scoate din indiferenţă nevoia de a evada într-o realitate paralelă în care fiecare tinde să se autoportretizeze în chip de erou?

De regulă, pentru un alergător, semimaratonul devine cadrul propice pentru a dialoga cu el însuşi, exact ca un pictor care nu se poate înstrăina de opera lui, alegând să vadă și să amplifice frumusețea din el însuşi într-un univers fremătător, cromatic foarte bogat şi variat. Specific caracterului de alergător este acea izbucnire de emoţie scurtă şi nebunească, când se desprinde de stilul impus de exterior, scoţând din indiferenţă nevoia de a evada într-o realitate paralelă în care fiecare tinde să se autoportretizeze în chip de Miltiades.

Tot ce vine din inimă, cu o forţă interioară uimitoare, declanşează un fir magic alert, construit cu măiestrie în jurul unei simbolistici vechi de când lumea: cea a spiritualităţii manifestată pregnant într-o exaltare a eroismului suprem, demn de o adevărată veneraţie. Înduioşător, captivant, nobil, semimaratonul a fost pricina stăruinţei mele de a surprinde o imagine de neuitat, o formă de comunicare nonverbală care conţine un mesaj, o reprezentare a unei realităţi concrete care conţine informaţii despre obiectul ei real, având un statut de pictură independentă.

Leadership: Poţi să surprinzi o imagine în care "totul se leagă cu totul", prin prisma unei percepţii de ordin spiritual, independentă de lung şi scurtmetraj ?

Aşa stau lucrurile în artă: pictorul vede ceea ce altul simte numai, sau întrevede, dar nu vede. Mai ales, aici, se nimereşte foarte bine un fragment din cartea "Egiptologul" de Arthur Philips, când personajul principal îşi mărturiseşte apartenenţa la o trăire dincolo de timp:

"Eu trăiesc milioane de ani în timp ce tu trăieşti doar seara asta, mi-a spus o dată cineva în timp ce se îndepărta plutind. Milioane de ani? Nu vrei să fii interesat şi să mi te alături pentru milioane de ani? Poţi oare să-ţi închipui faptul că noi doi, bărbat şi femeie, intrăm în eternitate împreună, două corpuri contopite pentru milioane de ani?"

De fiecare dată când voi fi prezent la un semimaraton, confruntând imaginile care se perindă în faţa ochilor mei, voi încerca să captez vastitatea unui moment smuls din eternitate, prin intensitatea expresivă a unui element restrâns, capabil să exprime sensuri cuprinzătoare. Fiindcă de fiecare dată ochii mei sensibili, înclinaţi să vadă înspre superior şi exterior, dar mai ales în intimitatea unei exaltări colective, trupeşti şi sufleteşti, vor fi dispuşi să creadă într-o percepţie de ordin spiritual, independentă de lung şi scurtmetraj, numită: "abandon în expresia unui spirit puternic şi încrezător".

Vederea pe care leadershipul o pune la dispoziţie trebuie să fie un mijloc expresiv aparte, capabil să redea un sentiment de consubstanţialitate cu universul, justificând corespondenţa cu elanul spiritual prin intermediul artei.

Ochii artistului dau clipei ceva din eternitate de fiecare dată când are loc un eveniment de suflet. E limpede că imaginea pe care ochii mei au imortalizat-o atunci, în mijlocul concursului, rămâne o enigmă, fiindcă, nu-i aşa, totul se leagă cu totul. Mi-ar fi plăcut să petrec o eternitate privind-o.

Sau, cum bine spunea cineva, voi încerca de fiecare dată să adun clipe ferice într-o cupă a amintirii, şi pe căile celeste să alerg cu al meu dor...

Ochii artistului sunt subordonaţi valorilor afective

On Iunie 15, 2023

Elementul perceput tinde să se manifeste în realitatea ta, adesea printr-o percepţie transfiguratoare asupra lui.

Dacă ochiul știe să vadă, atunci mintea poate să cuprindă concretul, iar inima se înviorează precum floarea ce se hrănește cu lumină. Mai ales când sunt în vacanță pe litoral, relaxat, binedispus, înviorat de sentimentul unui acord misterios între profunzime şi puritate, atunci mintea lucrează cel mai bine, fiindcă ochiul nu se mai străduiește să observe, ci admiră cu adevărat, recunoaște frumosul pur din tabloul unei lumi renăscută din lumină. Valorile afective atribuite locului în care mă aflu, confruntându-le cu un element expresiv restrâns, precum liniştea sau împlinirea, se ascund în spatele unei imagini pline de sens *Atalyente Dimielasarr Esotrenthis*, moment al regăsirii de sine, al credinţei, al amintirilor.

Văd marea, aud sunetul valurilor într-un loc în care detaliile contează, și simt mirosul sărat al apei care parcă înlocuiește aerul, care te relaxează instant, eliminând tensiunea, irascibilitatea și neliniștea, cel puţin pe termen scurt. Iar asta mă ajută să-mi formez o imagine mai amplă în abordarea fenomenului artistic, fiindcă pictura nu este doar desen și culoare, viziune şi perspectivă, ci reprezintă extensia un simț puternic conectat la viață.

Dacă ochii mei sunt subordonaţi valorilor afective pe care le construieşte locul în care mă aflu, fără să simt vreo descărcare tensională pe măsură ce creierul se obişnuieşte cu vizualizarea unor imagini care îndeamnă la relaxare, atunci procesul de creaţie se desfăşoară spontan şi automat.

Şi, ce sunt valorile afective? Ce reprezintă ele într-un moment de receptare a unei impresii care schimbă mișcările sufletului, asemănătoare construcţiei unei poezii care găseşte, mai presus de orice, combustia necesară arderii în ea însăşi?

Leadership: Te foloseşti de imaginea unor plăsmuiri care devin metafore, pentru a-ţi alimenta sinele pătruns de nevoia de exprimare a unei stări emoţionale?

Valorile afective sunt pilaştrii aducerii aminte a unui număr uimitor de senzaţii foarte profunde şi prin urmare, sunt legate de existenţa sinesteziei, adică perceperea simultană a unui ansamblu de elemente auditive, vizuale, olfactive. Pe lângă asta, valorile afective, ferecate într-o anumită densitate spirituală, deci fără să rămână închise în rigoarea obositoare a unei gândiri obişnuite, ţin de manifestarea cuplului Pensulă-Tuş, asociate la suflurile vitale Yin-Yang.

Bineînţeles, nu este vorba doar de nişte abstracţiuni, repere cu „valoare" generală, indici ce reprezintă nivelul dezvoltării conştiinţei, emoţionalului şi psihicului. În special, valorile afective sunt rezultatul conştientizării acelei stări de spirit senine, împăcate, pătrunse parcă de taina lucrurilor eterne care îl înconjoară pe artist.

Să enumăr câteva valori afective întâlnite la un artist: puritate, idealizare, apreciere, introspecţie, împlinire, satisfacţie, ataşament, iluminare, delicateţe, exaltare, dăruire.

Toate acestea îmi uşurează nevoia de odihnă deplină, prelungită pe malul mării într-o ambianţă liniştitoare, îmbogăţită cu experienţa relaxantă de vizualizare a unui asfinţit încântător, a unei sfere de lumină colorată într-un splendid roşu-portocaliu, proiectată pe

planul unui orizont care transformă orice pictură într-un univers închis, perfect şi suficient sieşi.

Încă mă întreb dacă nu cumva natura a creat acest moment de dulce respiro special pentru mine, ca să pot intra mai uşor în comuniune cu divinitatea, încât să prefac prezentul într-un spaţiu atemporal de beatitudine și serenitate, într-un design unic în care amintirile vor prinde viață din nou.

Leadership: Imaginea asupra căreia îţi focalizezi atenţia poate să evidenţieze existenţa sinesteziei într-un cadru natural care rămâne neafectat de trecerea timpului?

Într-adevăr, ochii percep imaginea observabilă într-un orizont de timp apropiat acesteia, trecând orizontal printr-o cale care merge în sus până la "primul superior comun" și apoi înapoi în jos, până la planul unei retrospective reale asupra trăirilor autentice. Totuși senzația de "miros persistent, dar discret", poate să confere un cadru transmițător de sentimente. Mirosul mării îmi respectă valorile afective, nu retrage din mine sentimentul împlinirii sufleteşti care îl caracteriza pe cunoscutul pictor Nicolae Grigorescu, în viziunea scriitorului Alexandru Vlahuţă:

"Grigorescu n-a căutat să dezlege probleme, nici să propovăduiască. La urma urmei, el n-a căutat nimic. Din mulţimea momentelor liniştitoare, din mulţimea de impresii, din fecundele puteri ale vieţii lui s-a lămurit o parte de sine, o parte mai curată, mai luminoasă, mai demnă de tărâmul poeziei. Aceasta, şi numai această a devenit pictură."

Şi acum îmi amintesc marea, cu puternicele ei valuri, părea interminabilă când o priveam de pe țărm. Dar, fiindcă nu puteam observa spațiul aflat dincolo de marginea orizontului observabil, nu puteam să știu dacă mărimea imaginii care îmi stârnea atenția, în totalitatea sa, era finită sau epuizabilă. Briza mării, mirosul sărat, relaxarea și zilele de odihnă pe plajă, au fost atuurile care m-au adus la starea prezentă. Oricum ar fi, fiecare zi petrecută pe litoral a fost un moment al regăsirii, al emoţiilor unice, al reîntoarcerii şi nu în ultimul rând al amintirilor.

Sunt unele momente speciale pe care merită să le păstrez mult timp nu doar în amintire, ci şi în culoare...

Încă mă întreb: de ce ochii mei au privit marea cu atâta afecţiune, uitând de tot şi de toate? Fiindcă şi marea m-a privit cu aceeaşi afecţiune, şi din privirea ei am înțeles că și ea simțea același lucru. De parcă, uitându-se la mine, a vrut să uite de toată deşertăciunea acestei lumi. Privind-o cu dor, ea mi-a spus ceva înainte să plec, dar aşa încât sa aud doar eu:

- Pe nisipul acela fin pe care îl spăl dintr-o suflare, numai un singur om, un artist înzestrat cu putere estetică, a lăsat urme vizibile, de neînlocuit. Am luat urmele înapoi, doar ca să fiu sigură că el se va întoarce la mine, şi atunci îmi va dezvălui ce e puritatea, perfecţiunea, eternul, pacea, asociindu-le cu imaginea altor culori.

Leadershipul are în componenţa sa nevoia sufletească de a transcende, de a contempla frumosul spiritual, şi de a intregra într-un întreg toate momentele care se realizează prin creaţie.

Ochii artistului sunt subordonaţi valorilor afective dacă iei în considerare aspectul următor: trebuie să treci prin toate stările de spirit "netrecătoare" dacă vrei să trăieşti cu adevărat un moment sublim. Ochi aceştia ştiu să vadă, ca într-o apă limpede, tot ceea ce iese la suprafaţă cu patimă, dincolo de orice raţionament onest, într-o imagine artistică: acea lumină interioară

care te conectează la tot și îţi aduce pacea interioară, acel extaz al sufletului beat de libertate.

Această lumină interioară va străluci şi în exterior, într-o pictură realizată în culori de apă.

Ochii bătrânului plini de infinite înţelesuri

On Septembrie 12, 2022

Artistul desăvârşit îşi transformă mesajul într-o capodoperă vizuală manifestată în conjuncţie cu sfera subtilă de forță a reflexiei: "cine sunt eu privindu-mă cu ochii altcuiva".

Mi-am închipuit tot timpul marea, brăzdată de valuri şi corăbii, ca fiind creaţia unui bătrân aflat în aşteptarea unui moment proiectat în eternitate, în ochii căruia se regăseşte o dulce melancolie, un delir estetic, suficient sieşi, un fel de tristețe calmă, aidoma unei muzici suave, care determină un subiect să trăiască pasiv, fără a lua inițiative în ceea ce priveşte actul de control al evadării din realitate.

Prin ochii unui călător în eternitate, acest bătrân mândru veghează peste cele întinse şi îndepărtate, dar cu ochii care mai mult gândesc decât văd.

Într-adevăr, eu nu sunt decât un tânăr artist, dar pot vedea marea prin ochii unui bătrân care îşi închipuie lucrurile ca fiind în afara timpului, acestea ţinând parcă mai mult de cer decât de pământ. Şi numai reținând cu privirea fiecare spargere a valurilor de țărm, în mijlocul nuanțelor diferite de albastru-cobalt sau verde, voi putea înțelege, în chip necesar, conceptul de "forță a reflexiei" – cine sunt eu privindu-mă cu ochii altcuiva.

Leadership: Poţi să reprezinţi o imagine într-o perspectivă sintetică, de la înălţimea unei priviri care îşi îngăduie exigenţa de a se oglindi într-un tablou pictat de un singur autor prin intermediul dualităţii?

Bătrânul vorbeşte cu tânărul, dar vorbeşte cu un glas dulce, ademenitor, divin, ca un acord pe strune de vioară, ca o melodie dulce rămasă proaspătă peste timp, iar acest glas parcă strigă unei remarci transcendentale „te-am văzut şi te-am plăcut ! ". Așadar, cine vrea să-și găsească reflexia în imaginea valurilor, știind să reunească într-un întreg eufonic mai multe voci, cu mai multe octave, dintre care fiecare are propria melodie, acela va ști să se recunoască drept un confident al mării. Cum altfel să auzi murmurul mării care se stinge pe țărm și în inima ta?

Pe un fundal al fragilităţii visătoare, în acelaşi plan al figurativului, ascultarea este o modalitate de a forma conexiuni cu alte vieţuitoare, cu alte resurse marine, cu alte insule, cu alte peisaje, cu alte amintiri. Lăsând la o parte premisele abstracţionismului, deci fără a elimina din reprezentarea operei de artă orice referire la realitățile exterioare, am luat în evidenţă nevoile sensibilităţii artistice la care sunt racordat în momentul când mintea îmi oscilează între realitate şi vis.

Două nevoi ale sensibilităţii artistice sunt: intensitatea trăirii exprimată prin continuitate (prin capacitatea remarcabilă de metamorfozare, de trecere de la o stare la alta) şi acea profunzime a spiritului în care se oglindeşte nealterat un macrocosmos, un peisaj rar pe suprafaţa convexă a unei lentile speciale, asemănătoare cu un telescop.

Iar dacă bătrânul îşi reflectă acuitatea vizuală prin asociere cu materia narativă, îndeplinind în planul inconştientului funcţia oglinzii care reflectă însușirea tânărului de a simți emoția estetică în fața fenomenelor și obiectelor naturii, atunci nu încape îndoială că imaginea ce cuprinde marea, valurile, peisajele uimitoare de pe litoral, este ca un tablou unic, pictat de un singur autor.

Leadership: Eşti la curent cu faptul că o imagine poate fi considerată edificatoare chiar pentru un fapt banal, în raport cu receptarea unui parcurs artistic aflat în necontenită expansiune?

Alături de un *mi pequeño sentimiento* , o imagine poate fi considerată edificatoare chiar pentru un fapt banal în raport cu receptarea unui parcurs artistic aflat în necontenită expansiune. Spun asta fiind conştient de influenţa cărţii 165 din "O mie şi Una de Nopţi". Aici, bătrânul calif Harun Al-Raşid a întrebat-o pe tânăra, frumoasa şi preaînţeleapta Simpatia: "Cum a început Creaţia?", iar ea a răspuns:

"Allah l-a plămădit pe Adam dintr-un boţ de humă uscată. Huma a fost făcută cu spumă. Spuma a fost scoasă din mare. Marea a fost scoasă din neguri. Negurile - din lumină. Lumina - dintr-o iasmă de apă. Iasma de apă - dintr-un rubin. Rubinul - dintr-o stâncă. Stânca din apă. Iar apa a fost făcută prin cuvântul atotputernic: Să fie ! "

Toate acestea sunt frânturi din existenţa mea pe care le înghite clipa prezentă, pentru a răsări mai târziu în toată profunzimea şi strălucirea lor sub aspectul unor plămădiri de materie, elemente şi câmpuri cunoscute percepţiilor mele. De fapt, tot ce v-am povestit despre mare şi valuri, într-o demonstrație vizuală și auditivă, este o variaţiune la "Bătrânul şi Marea", cristalizată ca viziune personală într-un etalon al creaţiei duale: plămădirea frumosului dintr-o cunoaştere apriorică şi frumosul plămădit din ecoul unei voci din viitor.

În leadership, la fel ca în artă, un fapt banal evidenţiază beneficiul unei singure priviri aruncate fugar spre un punct îndepărtat, privire care îşi păstrează expresivitatea, compozițiile bogate în narațiune, numai dacă privitorul se constituie atât ca entitate fizică, cât şi ca entitate intangibilă.

Ochii bătrânului plini de infinite înţelesuri îşi pot menţine focalizarea asupra unui obiect, în timp ce acel obiect se deplasează mai aproape sau mai departe. Aici putem include şi mesajul artistului prin dualitatea felurilor de a fiinţa al realului şi al idealului. Două moduri de a fi ale existentului nu înseamnă două lumi independente, ci una singură ruptă în două: în care cei bătrâni visează la vremuri apuse, iar cei tineri îşi deschid în taină sufletul sperând să-şi formeze o altă imagine a ceea ce poate să le rezerve viitorul.

Arta însăşi este o reactualizare a trecutului în prezent, dar şi o transformare a prezentului în viitor. Marea, valurile, peisajele de neuitat, nu vor lipsi niciodată din ochii bătrânului care va plăsmui mereu noi orizonturi de frumuseţe, doar pentru a deveni din nou tânăr.

P.S. A reprezenta o imagine într-o perspectivă sintetică înseamnă să-ţi imaginezi o realitate care nu poate să existe fără conştiinţa asemănării dintre ceea ce se află în apropiere şi ceea ce este în depărtare. Iar mesajul unui artist desăvârşit este acesta: *"Dacă nu te poţi identifica cu imaginea propriei creaţii, nici nu vei reuşi să te deschizi în faţa unei noi lumi de posibilităţi nesfârşite."*

Ochii care își lărgesc privirea înspre întrupările divinului

On Septembrie 14, 2020

Dacă vrei să înţelegi o demonstraţie de mare densitate spirituală, încearcă să citeşti tot ce-am scris aici înarmându-te cu aceeaşi pensulă cu care artistul pictează o imagine, creând o imagine.

Trandafirul din dreapta mea mă priveşte ca pe un soare, pentru că totdeauna când îl privesc cu o devoţiunea aparte faţă de secretul vechilor preoţi Egipteni, i se pare că atenţia mea este îndreptată spre o realitate născocită de cineva care ştie să reproducă cu fidelitate marea cheie a lui Solomon din templul unei limbi pierdute. Ochii lui au formă de labirint, exprimând în mai multe feluri opera fiinţelor divine, vederea de dincolo de văz, o fereastră spre sufletul comun al tuturor celor create, o reflexie sinceră și cât se poate de veridică a întregului univers care ne înconjoară.

Şi nu degeaba mi-am făcut timp să privesc trandafirul, cu înţelegere, cu admiraţie, cu condescendenţă, aşa cum mă priveşte şi el pe mine, fiindcă privirea noastră, intersectându-se în lumina palidă a unor ochi care cunosc totul despre secretele celor care au inventat limbajul scris, se oglindeşte peste veacuri într-un instrument de gândire numit: *Hiverdrazel* ("ceea ce se vede nu se arată în profunzimile sale"). Lumina e puţină, dar aşa trebuie să fie aşa, pentru că e mai bine să nu vezi totul înainte de a simţi o conexiune cu ochii unor cărţi care tratează în mod diferit limbajul şi scrierea sacră.

Mi-am dat seama imediat că interacţiunea noastră vizuală şi sufletească este un efect al libertăţii de exprimare prin formă şi culoare, prin munca artistică, prin simboluri şi analogii. Fiecare dintre noi este un spaţiu-timp, ne pierdem amândoi în spaţiul unei libertăţi de gândire fecundă și de manifestare artistică neîngrădită. Subiectiv, raţional, filozofic, nu m-am gândit nicio clipă la acest trandafir în termeni de a fi un sfânt care hotărniceşte domeniul temporal, dar am luat în calcul varianta de a fi un artist care vede totul în nuanţe de inspiraţie poetică şi estetică.

Leadership: Important în dezvoltarea artei tale este obţinerea unei imagini capabile să reprezinte subiectul în esenţa lui, plecând de la considerentul că ceea ce exprimi este ceea ce te esenţializează?

Cât de mult ar trebui să-ți admir ochii pentru ca ei să mă copleșească cu o privire plină de semnificaţii? Dacă procedez astfel, dacă te-aş privi fără încetare, cu drag de artă, cu sclipiri de stele, ochii tăi ar căpăta strălucirea privirii îndrăgostite de frumos?

Poate că, numai ochii care îşi lărgesc privirea sunt obiectul inspiraţiei unui artist care îşi extinde câmpul creaţiei în toate direcţiile. Iar a duce la bun sfârşit această privire este o încercare de a deştepta dispoziţia afectivă a ochilor care cuprind latura artistică a frumosului numai cu sufletul unui sfânt.

Surprinderea în desen a unei situaţii de viaţă este, de asemenea, parte integrantă dintr-o privire aruncată înspre miraculoasa întruchipare a purităţii şi fineţii pe care o îmbracă materialul natural, având o textură specială și emanând căldura unei realităţi artistice care depăşeşte frumuseţea pretextului de a descoperi autenticitatea naturii în simplitatea ei originară. Trandafirul este modelul perfect de slujire a artei în profunzime.

Poate că de aici se trage interesul meu pentru pictură, datorită fineţii unei priviri care îşi amplifică expresivitatea prin cuvânt, prin lirism, prin culoare, prin ceea ce este mai atrăgător

la o poveste bună: simplitatea ei, sinceritatea personajului principal. Trandafirul se înclină în faţa artei mele, făcându-mă să mă simt ca în prezenţa unei puteri covârşitoare, nedespărţite de nobleţea şi demnitatea unui creator care nu mă obligă să-i accept prezența, dar care mă lasă să-l înţeleg aşa cum se revelează el de obicei, prin simboluri.

Mi-am dat seama că ochii mei, plini de generozitate, atenţi la toate lucrările sfinte care se fac pentru slava lui Dumnezeu, surprind doar ceea ce artiştii pot să prezinte în lucrările lor: raporturile dintre figuri, sigilii, caractere sau ceremonii, toate învelite într-un soi de înţeles care schimbă percepţia asupra raportului dintre adevăr şi ficţiune. Obloanele lumii către suflet, așadar, trebuie să se potrivească exact cu estetica unui spaţiu al invocaţiei, luminos şi generos, un spaţiu al excelenţei spiritului rafinat şi, mai ales, trebuie să se potrivească cu vizualul unei imagini care întruchipează toată sensibilitatea umană limitată la statutul de simbol.

Leadership: Creaţia ta îţi poate contura o idee despre cum poţi absorbi o amintire pe care ţi-o doreşti păstrată aproape de suflet, ca şi cum nu tu ai fi trăit toate astea, ci ţi-ar fi fost povestite de altcineva?

Se spune că dacă rupi o petală de culoarea sângelui dintr-un trandafir de Damasc, la prima oră a apusului din Ziua Ursului, deci în prima zi a lunii august, şi dacă o înmoi în apă rece de izvor împreună cu câteva frunze de busuioc proaspăt, şi o pui pe fruntea unui bebeluş, el nu va suferi niciodată de nefericire şi lipsa de sens în viaţă. Iar dacă adânceşti un boboc din acelaşi trandafir într-un păhărel de sirop de muşeţel, adăugându-i două măsuri de oţet de mere cu un vârf de cuţit de sare, şi îl pui imediat pe pieptul unui bebeluş, acesta va dormi confortabil chiar şi pe timp de ploaie, furtună şi vijelie.

Vedeţi bine ceea ce vă arăt? Intuiţi voi oare adevărata măsură a artei mele, adevărată vrajă a unei scrieri de mult uitate care surprinde două entităţi spirituale asemănătoare, dar opuse prin forma cu care au fost investite de la natură? Poate că da, poate că nu.

Cert este că niciodată o artă nu va fi mai bine pusă în evidenţă, printr-un limbaj poetic, expresiv sau plastic, determinându-ne să privim realitatea cu nişte lentile orientalizante, decât dacă efectul de perspectivă surprins într-o imagine unică se măreşte cu ajutorul unei figuri de stil care, pentru efect retoric, se referă direct la un lucru, menționând un altul.

Umberto Eco a spus acest lucru cu alte cuvinte, mai rafinate, în romanul său devenit celebru: "Numele Trandafirului":

"Totul conspiră la a mă face să cred că visam la ceva, dar într-o formă anormală, aşa cum, după spusa poetului, e aproape de trezire cel ce în vis visează. N-ar trebui să-mi amintesc nimic. Însă îmi amintesc totul, ca şi cum nu eu aş fi trăit toate astea, ci mi-ar fi fost povestite de altcineva."

Cu siguranţă, în ceea ce priveşte limbajul scris cu tâlc şi mesaj artistic, cu oarecare universalitate, cu o religie obscură şi dispărută fără urmă, există totuşi o bucată de informație care controlează operația unui algoritm criptografic, *una herramienta para abrir una cerradura* , o cheie secretă caracterizată drept "o oglindă a minţii".

Această cheie o veţi găsi numai dacă veţi şti să citiţi tot ce-am scris aici, cu ochi de iniţiat, cu aceeaşi pensulă cu care artistul pictează o imagine, creând o imagine.

Leadershipul este acea bucată de informaţie preţioasă care construieşte imaginea unei singure existenţe trecută prin evocarea unui fascinant scenariu creat de dragul de a

accentua o stare de spirit, o expresie a personalității sau o idee de mare însemnătate.

Ochii care îşi lărgesc privirea înspre întrupările divinului sunt aceeaşi ochi care privesc esenţa artei şi a esteticului prin intermediul unui simbol care marchează acele memorii vizuale şi simţăminte de mare apreciere, capabile să definească menirea artistului de a transpune o realitate într-un univers.

Divinul este povestea unei creaţii fabuloase care nu se încheie niciodată. Două întrupări îl caracterizează pe deplin: întruparea într-un corp pământesc şi întruparea într-un corp omenesc. Arta le uneşte pe amândouă într-un simbol. Trandafirul este cel mai de preţ simbol al cabaliştilor.

Înţelege-mă bine, nu te opune experienţei de iniţiere în tainele naturii, şi poate într-o bună zi vei învăţa să te transformi tu însuţi într-un trandafir.

Source: https://neculaifantanaru.com/ochii-care-isi-largesc-privirea-inspre-intruparile-divinului.html

Ochii caută cu înfrigurare esența trăirii autentice

On August 04, 2022

Învaţă să pui în mişcare procesul activ de înțelegere a „cine ai fost, cine eşti și cine vei fi", într-un moment în care nu poţi să te ascunzi de tine însuţi, şi nici nu poţi să păstrezi distanţa faţă de ceea ce te afectează.

Amurgul nu se arăta la orizont. În ochii alergătorilor se simţea, răspândită ca o formă de undă, un soi de stare apăsătoare dusă în surdină, fără reguli, un soi de gol poleit cu discreție, un nou început de care ai vrea ca nimeni să nu afle, o amplificare printr-un efect de calmare a luptei dusă - fiecare numai cu el însuşi. Cu toate că era ceva ceresc, nori plini de abur, fulgere pline de putere, o ploaie din aia măruntă, totul se amesteca cu ceva pământesc, dar nu cu focul creator, nu cu strigătul victoriei, ci cu sentimentul de precauție care, însă, părea să fie unul acut.

Și starea aceasta șubredă, chinuită de prognoza unei vremi instabile, al cărei "modus operandi" se baza pe gândurile subliminale provocate de apăsarea unui disconfort produs de umiditatea excesivă, nu prea dădea semne că va trece repede. Ar fi trebuit să mă introduc în ilustrațiile unei cărți ce prinde viață pe măsură ce gândurile încep să fie colorate, și poate doar așa imaginea mea de sine va fi lumina ochilor celorlalți.

Gravitatea de simțire, asta era. Lupta cu ultima rezistență a forțelor lăuntrice, *Disfurethis-Asprintyr* , darul de a separa ceea ce este cu adevărat important de ceea ce știi sigur că se dă uitării, cu toate cele negative. Lupta aceasta putea face ca realitatea să se legene între pastila albastră și cea roșie, exact ca în filmul Matrix. Prima pastilă desemnează iluzia unui orizont vizibil doar pe jumătate, sub un vast cer negru, plin de nori. Cealaltă pastilă desemnează revelația unui adevăr pe care îl posedăm, dar de care nu suntem conștienți.

Leadership: Poţi să-ţi găseşti gloria mult visată prin forţa înflăcărării îndreptată spre tine însuţi, într-o manieră specifică „totalităţii individualizate" pe care n-o zăreşti decât în trăirea intensă a unui moment special?

Ceea ce vedeam clar la toți alergătorii era explicația unui fenomen pe care toată lumea îl ocolește, *Datisporthis* , un moment în care aflăm adevărul probat de realitate, în care nu ne mai putem ascunde sau nu îl mai putem ascunde. Și anume, că totul variază în funcţie de circumstanţe şi de rezultate. Niciun alergător nu se simțea în largul său, fiindcă nimeni nu părea să aparțină lui însuşi, ci fiecare aparținea condițiilor pe care vremea nasoală le hotărâse încă dinainte de începerea maratonului.

Chiar şi cea mai mică schimbare a naturii, cea mai mică rază de soare, ar fi adus bucurie și speranță în sufletul fiecăruia, mărind şansele ca victoria să fie rapidă şi completă. Dar nu a fost să fie aşa. Vremea părea tot mai aspră, ca un bici care izbaveste-ncet, pedepsitor. Şi tocmai această inversare de planuri ţine de originalitatea alergătorilor: prin propriile experienţe intense, cu fiecare urcare şi coborâre anevoioasă, ei învaţă să biruiască viaţa.

În realitate, fiecare alergător reprezintă o „totalitate individualizată" deoarece fiecare are propriul filtru emoţional cu care percepe lumea din jur şi că, de fapt, lumea este o proiecţie a propriilor idealuri, viziuni, gânduri, capacităţi.

Dacă la un moment dat vor apărea două feluri de realități, una văzută prin ochii sufletului, cealaltă prin ochii unui spiriduș care nu se vede, atunci s-ar putea presupune că este vorba

de asocierea a două planuri suprapuse: unul interior, al vieții psihologice, al trăirilor dezolante resimțite în profunzimea sufletului unui om care nu se poate adapta condițiilor ostile.

Şi unul exterior, al lumii spirituale, invizibile, a cărei voce ne vorbește prin intermediul inspirației, a revelației unei conștiințe superioare făcută conștiinței noastre. Din atâtea glasuri pe care le auzeam, din atâtea stări amestecate și învolburate, ieșea la iveală acea bucurie cerească a nădejdii și a păcii sufletești de care însetează atât de mult omul zilelor noastre.

Leadership: Poţi să te menţii în forma cea mai înaltă la finalul unei lupte care s-a dus în tine şi care reprezintă proiecţia propriilor posibilităţi de trăire a situaţiilor în care te regăseşti ca "identitate profundă" ?

O identitate profundă este un proces activ de înțelegere a „cine ai fost, cine eşti și cine vei fi" într-un moment în care nu poţi să te ascunzi de tine însuţi, şi nici nu poţi să păstrezi distanţa faţă de ceea ce te afectează.

Exact ca în artă, unde finețea desenului reiese din efectele cromatice și din mottoul temei sugerate, precum: "Lucide intuiţii, adânc răsfrânte în suflet", tot astfel concursul de Running se raportează de regulă la noțiunea de *Surodinnoah Sterres* (încercarea de depăşire a tuturor barierelor) prin apartenența sufletului la finețea unei sensibilități luminoase, greu de semnalat în momentul dinainte de start.

Și, de unde apare sensibilitatea în niște trupuri atletice? Ea apare din sentimentul de a ajunge în acel loc unde soarele strălucește intens, indiferent de vreme: pe treptele podiumului. De fapt, când vorbesc despre sensibilitate, acest orizont spiritual ce se simte solidar sufletul nostru, mă gândesc la cuvintele lui Ştefan Zweig: *"Toţi săvârşesc fapte care depăşesc chiar voinţa lor, numai ca să ajungă la limita extremă a simţămintelor lor."*

Ceea ce constituie imboldul acţiunilor lor îmi apare oarecum limpede, nu doar pentru că au încercat să-şi dovedească cel puţin lor înşişi ce sunt: o avalanşă de trăiri şi frământări, ci pentru că au încercat cumva să reînvie acea tradiţie glorioasă şi seculară a sportivităţii de la noi din ţară, tot aşa cum un artist cu suflet colorat reînvie prin pictură orice haină veche.

Important în leadership este ceea ce simţi în momentul când reuşeşti să atingi acel spaţiu adânc din tine care te recomandă ca fiind „o amintire ce trece de la o generaţie la alta".

Ochii caută cu înfrigurare esența trăirii autentice atunci când alergătorul experimentează o nouă perspectivă de abordare a trecerii liniei de finish sub impulsul irepresibil al rememorării unor momente semnificative din care se încheagă o poveste de mare impact.

Predominant aici este gloria mult visată a unui alergător care ţine nu doar de trecerea liniei de finish, pe prima poziţie, ci de statornicirea reuşitei sale în amintirea vremurilor de demult.

Ochii cu vedere artistică își exprimă altfel orizontul

On Martie 19, 2024

Adevărata valoare a artei se află dincolo de percepția imediată, pe linia unei autenticități valabile numai prin expresivitate.

La concursul de running din Roma, indiferent de numărul concurenților, pentru mine a existat un singur învingător, exemplul multora: sora mea, Oana Fântânaru. Nu-i vorba că ceilalți concurenți au alergat mai bine sau mai slab decât Oana, nu-i vorba nici de competiția cu sine însuși, ci este vorba despre acea eliberare de constrângeri sociale, pe care artistul o simte când reușește să se exprime pe măsura dorinței lui. Mă refer la acea artă subiectivă proprie artistului care se lasă dominat de inspirație și creează, refugiindu-se în exclusivitatea libertaţii sale de expresie, nu din dorința de a atrage atenţia, ci din înflăcărarea de a-și explica misterele ființei.

Încerc să scot la lumină partea ei mai puțin evidentă, mai puțin vizibilă, cea mai secretă, dar permanentă și chiar preponderentă. Categoric, îmi dau seama că în ea nu are niciodată câștig de cauză renunțarea definitivă, fiindcă nu cedează în fața forței negative ce tinde să-i copleșească pe cei vulnerabili. Cel mai probabil, misiunea ei la acest concurs, greu de înțeles pentru privitorii de rând, nu a fost de a sesiza și de a reliefa acea parte ascunsă dintr-o operă de artă neglijată, ci de a recupera ceea ce constituie mesajul ei nedezvăluit: "tot ceea ce are o valoare intrinsecă merită să fie apreciat".

Printr-o asemenea operație de dezvăluire mai puțin cunoscută, printr-o asemenea atotputernică moștenire ce poate fi recuperată și în mine însumi, s-ar putea oferi o perspectivă nouă asupra artei capabilă să devină zestrea unei întregi generații de artiști. În mine însumi, ca și în oricine altcineva care a participat la cursă și a privit în același timp ceilalți concurenți, s-a produs un fel de eliberare de constrângerile urbane, *una revitalizzazione della consapevolezza di sé*, ca o invitație la viață, un soi de rezistență în fața limitărilor, oricare ar fi ele.

Leadership: Ai experimentat vreodată o activitate de creație care îmbină spontan conceptul de "impinire sufleteasca" cu procesul de receptare a unei imagini bazată pe subiectele conținute în ea?

Toți ceilalți concurenți s-au risipit imediat din câmpul vederii lumii. De fapt, lumea și-a continuat a doua zi cursul firesc, ca și când totul ar fi fost doar o efemeră amintire.

Totuși, sora mea, într-un elan ce amestecă umila prezență și splendoarea, asemenea pictorilor care fixează eternitatea pe pânză, rămâne în centrul atenției mele și a lumii întregi care citește acest articol, pe linia unui *Elgnisezzo Aralimesiv Edreseancti*, prezenţa vie a unui univers răsfrânt în adâncul ființei.

Sufletul individual devine una cu întreaga viață a universului atunci când întreaga ta ființă transcende limitele fizice și temporare.

Mulţi vor citi acest articol. Chiar și cei care nu au participat la cursă, sau care nici măcar nu au auzit de concursul de running din Roma, probabil tot de sora mea se vor atașa vizual, se vor recunoaște în ea, deoarece imaginea ei reflectă ambiția și dorința de reușită din sufletul fiecăruia. De fapt, asta fac artiștii, ei își transpun elanurile ființei, plinătatea lor, în opere care se adresează simțurilor și emoțiilor publicului.

Leadership: Poți să te recunoști într-o imagine care transpune elanurile ființei tale într-un perpetuu joc existențial al cărui miză este "instantaneul propriei rezonanțe cu mesajul transmis" ?

Arta este o formă de expresie care se leagă efectiv de o experiență vizuală nemijlocită, deci de o poziție verificată numai de practică. Și aș începe prin a-mi preciza optica față de conceptul de "angajament", simțindu-mă atras de o temă particulară: "resiliența", capacitatea omului de a reveni la normal după o experiență extenuantă.

Această temă a devenit momentul provocator al stărilor și dispozițiilor mele sufletești, al motivelor de cercetare umană. O priveam pe sora mea la finalul cursei cum își domolea respirația, în timp ce reflecta instantaneul propriei rezonanțe cu mesajul pe care eu voiam să-l transmit: "Ceea ce simți este ceea ce ochii celorlalți nu pot vedea."

Pe plan spiritual, ceva din ea părea să radieze în termeni de artă: *"Tot ceea ce mi-am propus la acest concurs a fost să dezvălui esența mea, să pictez o poveste, tot așa cum artiștii plastici pun în valoare un subiect, folosindu-se de umbre și lumini."*

Iar eu aș adăuga, într-o manieră vizuală și alternativă, ideea că o lume pe care ochiul o cuprinde cu sufletul, cu credință, devine fundalul pentru o călătorie personală interioară. Ca să faci artă, mai întâi scrie cu sufletul tău, apoi recitește cu sufletul altora!

Leadership: Poți să te angajezi într-o menire pe care să o împlinești onorabil, în totală armonie cu latura ta artistică care rezidă dintr-o activitate susținută de determinare și consecvență?

Este greu să transformi un alergător de rând într-o retrospectivă a unei epopei artistice uluitoare. Spun asta fiindcă oamenii de rând sunt prizonierii timpului și ai materiei, pe când artiștii, cu penelul, cu dalta sau cu pana, își eliberează sufletul și îl trimit în eternitate. Așadar, pentru a putea crede în noi înșine, pentru a putea crede în calitatea noastră artistică, trebuie să ne angajăm într-o menire pe care să o împlinim onorabil, una care să facă din fiecare zi o operă de artă.

Sora mea și-a dezvoltat încă de la început, de la prima sa ivire în viața sportivă, încă de la primul contact cu stadionul, acel elan pasionat, o sete de aventură, entuziasmată de ceea ce va vedea și va descoperi pe traseu. O dragoste încrezătoare în viață, o înclinare de a se bizui pe aceasta, de a se cufunda în ea, într-un deplin acord cu latura ei artistică. Nici chiar acum, în prezent, nimic nu poate să o corupă, să respingă un asemenea elan tineresc, aventurier, nimic nu poate să-l stăvilească. Impulsul ei de a explora este cu atât mai ispititor cu cât pleacă de la cultivarea unei conexiuni cu spiritul Renașterii, cu precădere prin trăirea clipei de față și crearea unor opere "evocând prezentul".

Ce alt motiv de mândrie pentru un sportiv ar putea fi mai dătător de satisfacții decât acela de a fi un însoțitor fidel al ideii de "artă pentru artă", prin contribuția la "consacrare" sau la "lansare" prin salvgardarea tinereții sale? Din păcate, sportivii pe care i-am văzut alergând cu toate puterile, de la primul la ultimul, au refuzat artei orice șansă de a le surprinde efortul. Evident, există o diferență între sportivi și artiști.

Da. Mulți sportivi sunt ghidați interior de ideea că: *"Găsirea unei meniri nu este suficientă, fiind necesară o dedicare activă pentru a o împlini."*

În schimb artiștii, uniți cu natura, împrumută uneori realitățile și trăsăturile peisajului, exprimându-și afinitatea bine determinată față de creația lor: *"Valoarea pe care o atribui*

activității mele este constituită de ponderea decisivă acordată efortului născător de lumi."

Arta nu este verosimilă decât prin mesajul nepieritor pe care artistul îl transmite și prin impactulul viu pe care îl are asupra privitorului.

Ochii cu vedere artistică își exprimă altfel orizontul atunci când trebuie să te conectezi la tine însuți pe tot parcursul unei întreceri a cărei miză depășește simpla victorie. Este un fel de transcendență. Arta te ajută să depășești limitele fizice și mentale ale competiției. Prin ea, te poți conecta cu o realitate mai profundă, cu emoții universale și cu o perspectivă mai amplă asupra vieții.

Și cred că aceasta este diferența mare între sora mea și ceilalți alergători: ea a slujit drept trecere de la statornicia prezentului la revelația unei străluciri nebănuite, peste limitele fizicului ei, simțind o conexiune profundă cu divinitatea. Ceilalți au alergat, și atât. Totuși, sora mea a făcut ceea ce toți ceilalți la un loc n-au făcut: a transformat o simplă cursă de running într-o călătorie spirituală, plină de posibilități artistice, în care fiecare pas a fost o împlinire a sinelui și o apropiere de divin.

De fapt şi pe drept cuvânt, la marele concurs de running din Roma, 2024, sora mea, Oana Fântânaru a fost invingătoarea surpriză. Spun asta, deoarece a avut tot timpul în ea esenţa unui lider:

Un lider este caracterizat de dorinţa artistului de a modela reprezentări ale lumii pe care o are înăuntru.

Ochii deprinşi cu vederea celor nevăzute

On Iunie 22, 2021

O imagine valoroasă nu ratează emoţiile unui început de poveste tristă, dar scoate în prim plan mărturia unui parcurs existenţial grandios.

Sunt în Palas Mall. Privesc cu atenţie un afiş în al cărui prim plan se află un fotbalist, unul care nu pare să aibă nimic deosebit de faţă de alţi fotbalişti. Sincer, nu ştiu de ce privesc afişul, nu ştiu de ce mingea pare că o ia înaintea fotbalistului, dar ceva mă atrage la această imagine. Nu culorile, nu designul. Chiar aş zice că imaginea aceasta nu transmite niciun mesaj.

Dar, presupunând că jucătorul respectiv ar avea ceva important de arătat, atunci aş fi curios să descopăr ce însuşiri există într-un instrument de făcut bani, sau mai bine zis, într-un promotor de evenimente. Căci, un fotbalist poate fi orice îi cere imaginea lui să fie, nu-i aşa?

Dacă ar trebui să dau un nume acestui afiş, în cazul în care eu aş fi fost jucătorul din prim plan, atunci aş avea un răspuns gata pregătit la întrebările filosofilor. În acest moment, un singur nume îmi vine în minte, exprimând sensul aluziv al unei poezii de mare frumuseţe şi rară delicateţe sufletească: "Simt că trăiesc".

Da, simt că trăiesc pentru imaginea pe care eu însumi o atribui unui om capabil să ofere performanțe consistente de nivel mondial pe o perioadă suficient de lungă de timp.

Pentru ca o imagine să devină memorabilă ea trebuie să fie văzută şi simţită în mod direct, prin intermedierea facilă a unui proces de condiţionare care stimulează diferenţierea, autoreflecția şi autoevaluarea.

Mai e ceva. Printre noţiunile abstracte pe care le dobândeşte un asemenea fotbalist, bine încadrat într-o imagine de mare forţă sugestivă (interiorizată ca într-o poezie de factură tradiţionalistă), există o noţiune care merită o atenţie specială. De fapt, fotbalistul nu cunoaşte valoarea sau durata unui sentiment pe care îl simte cineva atunci când priveşte imaginea lui. Ni s-ar părea totuşi corect să credem că fotbalistul cunoaşte durata unui sentiment doar în măsura în care el reflectează asupra mişcării unui corp, a picioarelor şi a mâinilor ce trebuiesc bine coordonate într-o situaţie specifică.

Aşadar, când există mai multe posibilităţi de a integra un fotbalist într-o imagine, şi când imaginea pare să redea sentimentul de siguranţă care îl animă pe sportiv în timpul meciului, atunci eşti dispus să crezi că cel mai sensibil instantaneu, portretul foarte expresiv și, în egală măsură, cel mai aproape de realitatea chipului său, este strâns legat de sentimentul competenţei (mai presus de masculinitate şi sex-appeal).

Ar fi o greşeală să cred că un fotbalist este doar o imagine, dacă nu iau în considerare faptul că, înainte de toate, el este un om care dă dovadă de inimă, pasiune și mândrie pentru joc. Din imagine ar putea sa reiasă satisfacţia profesională a individului. conceptia despre sine (de a crede în capacităţile sale) şi încrederea in sine (de a acţiona fără teama excesivă de judecata altora).

Leadership: Atenţia ta se concentrează pe producerea unui salt în calitatea vieţii care să reducă timpul de expunere la împrejurări potrivnice, pentru a obține o imagine cu mare impact?

Imediat ce devii o imagine, începi să te integrezi într-o sferă mai înaltă de percepţie a atractivităţii şi notorietăţii care promovează un anumit comportament, o anumită atitudine, o anumită realitate, determinând interesul pentru schimbare şi noutate. Şi asta, doar vrând să arăţi cât de iscusit eşti în a-ţi folosi imaginea pentru a construi o versiune mai bună a ta. Aşadar, o imagine cu un fotbalist poate să iniţieze şi să menţină automotivaţia.

O altă posibilitate de vizualizare a unei imagini este partea nespusă din ceea ce gândeşti atunci când eşuezi. Dar la fel de bine o imagine poate să controleze ceea ce gândeşti atunci când trebuie să intri pe "scenă".

Mai departe intervine dorinţa de a epata, de a crea un bazar de impresii şi sentimente, de a fi în centrul atenţiei, fapt care ţine de însăşi esenţa omului, de începuturile lui umile. Fotbalistul respectiv nu s-ar fi putut încadra de minune într-o imagine cu rol de „reclamă senzaţională" dacă el nu ar fi cunoscut succesul pe care îl pretinde o poveste de viaţă impresionantă, demnă de un film de Oscar.

Dacă privim cu atenţie spre el, nu vedem "puştiul senzaţional care a crescut într-un orfelinat", vedem doar motivul pentru care un om de rând a ieşit din anonimat: el a vrut să fie CINEVA, în loc să putrezească ca o rocă fosilizată.

Cine a înţeles legătura dintre leadership şi imagine, ştie să judece un om prin prisma ultimului lucru întâmplat, nu prin prisma experienţelor trăite la ceas de vârstă timpurie.

Asta îmi aminteşte întrucâtva de eroul Papilion, din romanul autobiografic scris de Henri Charrière care, la un moment dat, se absolva total în faţa propriei sale judecaţi:

"Dacă am putut fi aruncat pe acest drum al putrezirii, aceasta se datorează faptului că, trebuie s-o recunosc cinstit, eram un candidat permanent pentru a fi trimis acolo într-o bună zi. Societatea are dreptul să se apere, dar nu să se răzbune în chip josnic. Da, totul este posibil. Dar un om nu-i pierdut niciodată. Orice ar fi putut făptui, există totdeauna la un moment dat al vieţii sale o şansă de a se răscumpăra, de a deveni un om bun şi folositor comunităţii."

Din câte se observă, o imagine care nu-ţi iese din minte este, mai întâi de toate, povestea unui om umil care nu şi-a ratat şansa de a deveni un erou. Cine nu respectă toate cele chemate spre a fi văzute în toată micimea lor, nu va putea să trăiască nici acea poveste de viaţă care surprinde dezvoltarea sufletească, prin activarea simţirii, prin cultivarea unei vocaţii la cel mai înalt nivel al rafinamentului. Aşadar, o imagine valoroasă nu ratează emoţiile unui început de poveste tristă, dar scoate în prim plan mărturia unui parcurs existenţial grandios.

Să presupunem că leadershipul ar face referire la imaginea ta cuprinsă în oglinda lumii reale. Cum îţi faci ochii să creadă că ceea ce ei văd în perspectivă este aprobarea inimii tale de a se apăra de „condamnarea la uitare", înainte de a se adapta la diferite situații de performanță?

Ochii deprinşi cu vederea celor nevăzute sunt capabili să distingă diferenţa dintre o realitate care îți prezintă mereu o limită, și o dorință de măreție infinită care nu se știe de unde vine, dar în mod cert te plasează într-o lumină favorabilă, într-o actualitate vivantă.

Ochii filtrează realitatea conform viziunii artistice interioare

On August 02, 2024

Focalizarea vizuală alternează între apropiat și depărtat, reflectând intensitatea trăirii interioare care oscilează între efortul imediat și viziunea de ansamblu.

Simt o senzație intensă de libertate în timp ce alerg la vale, lăsând în urmă toate grijile și stresul cotidian. Sentimentul de libertate la un alergător, în timpul concursului montan, devine o "Azenthopia Kinetică", o stare de grație în mișcare, un soi de extaz cinetic, într-un demers pe linia devenirii. Sunt doar eu, muntele și calea pe care o urmez printre obstacolele naturii, luminat de cele mai puternice reflectoare ale gloriei, marcat de acea euforie creatoare pe care o împărtășesc din plin cu artistul din mine. Această libertate se transformă într-o artă a mișcării, din prelungirea unei viziuni interioare, unde fiecare pas devine o pensulă ce pictează pe pânza realității mele.

Cumva, înțeleg că nu voi putea face artă autentică dacă nu am îndeajuns de multă luciditate, dacă nu sunt înzestrat cu toată autenticitatea de gândire și de temperament specifică unui creator la care curiozitatea căutării de adevăr tinde să se echilibreze cu nevoia adâncă de a exprima sufletul atmosferei prin care trece. Bineînțeles, aceasta nu e amintirea unui anumit episod concret, ci o necruțătoare reflexie asupra puterii mele de a transcende limitele fizice și mentale, *una especie de meditación existencial en movimiento*. Fără a fi obsedat de tot ce se poate întâmpla când rațiunea pierde controlul, pe parcurs am devenit un Jackson Pollock al propriei existențe, împroșcând cu energie pânza realității, sau mai bine zis am intonat un "Ankh Onnubbal" - o chemare eternă a depășirii de sine.

Ceea ce vezi când te priveşti cu ochi de artist, este ceea ce corpul demonstrează ca expresie a voinței neînfrânte. Lupta mea cu noroiul până la genunchi, în contrast cu puritatea aspirației interioare, a fost fulgerul care a aprins întregul desen al pânzei mele. În timp ce forma zdrenţuită a "costumului" de alergător amintește de un fundal expresionist, o explozie emoțională de culori și forme abstracte care reflectă starea interioară a artistului, unde realitatea fizică se contopește cu trăirea mea interioară. Ochii mei erau liberi să privească petele negre de pe picioare, declanșând în mine un fel de revelație artistică de tipul "frumusețe în imperfecțiune", dar spiritul îmi rămăsese dominat de valorile perseverenței și autodepășirii.

Leadership: Intensitatea unei senzații unice poate deveni pentru tine o dovadă a existenței unei opere de artă, așa încât experiența alergării să se transforme într-o metaforă vie a procesului creativ?

Pe acest traseu greoi, am fost în stare să dau sentimentelor (încărcate în fața unui eveniment unic) puterea de a forma un corespondent pictural simbolic în spiritul meu. Totodată, efortul sufletului meu nu a fost doar de a produce adrenalină, prin faptul că am înfruntat provocările fizice ale cursei, ci de a atinge o stare de grație în mijlocul haosului, tot una cu transcendența artistică. Alergătorul devine astfel un soi de căutător al determinismului fizic ce reglează fenomenul frumosului în artă, un bun cunoscător al raporturilor dintre senzație și energie, un rezultat al actualizării energiei organice în fața provocărilor exterioare. În final, intensitatea unei senzații unice - cea a transcendenței prin efort - devine liantul care unește alergătorul, artistul și privitorul într-o trinitate a experienței estetice pure.

Și tu, privitorule, în ce maraton al spiritului ești angajat? Ce obstacole îți modelează calea spre propria ta capodoperă existențială?

Este evident. M-am simțit irezistibil atras de tema „alergării", care chiar şi acum reflectă o

oglindă a emoțiilor mele interioare, prin prisma efortului și perseverenței. La rândul lor, ceilalți alergători, cu nervii întinși la maximum, păreau umbre fugare, o proiecție a dualității ființei umane, deoarece luptau între limitările fizice și aspirațiile spiritului. Dar numai artistul se distingea din mulțimea de competitori, fiindcă vedea frumusețea în lupta însăși. Era o ființă în armonie perfectă cu natura, cu ritmul cosmic al existenței, făcând ca fiecare pas să devină o tușă pe pânza vieții. Dragostea lui pentru aventură, pentru descoperire, îl făcea să privească dincolo de linia de sosire, spre orizontul nesfârșit al posibilităților de afirmare și de creație.

Procesul de autodepăşire consolează și înalță spiritul creator. Avea dreptate scriitorul Liviu Rusu când spunea: *"Opera de artă este deci opera voinţei. Prin actul creator artistul îşi afirmă voinţa de a depăşi aspectul primitiv al naturii sale. Cu cât efortul lui este mai mare, cu atât Eul se simte mai consolat şi mai înălţat. De aici îndărătnicia artistului de a nu da înapoi în faţă dificultăţilor din drumul său. Dimpotrivă, dificultăţile îi stimulează voinţa, o pun la încercare. Aşadar, voința artistului se călește în focul încercărilor, permițându-i să creeze capodopere din suferință."*

Leadership: Crezi că demersul tău artistic este pus în slujba esteticii, provenind din locul unde ai găsit adevărata esență și autenticitate?

Claritatea cu care sunt redați ochii contrastează cu fundalul difuz, subliniind focusul mental. Nimic nu putea să corupă acea pasiune juvenilă, acea dorință neostoită de a explora terenul dificil. Cel mai sigur, elanul meu era o invitație să trăiesc prezentul, să cultiv o artă ce evocă realitatea în cele mai imediate forme ale sale, chiar dacă ceea ce trăiam depășea limitele obișnuitului. Ce satisfacție mai înaltă ar putea exista pentru un sportiv decât aceea de a fi un ambasador al libertății, de a contribui la consacrarea tinereții prin exemplul personal? Ce anume face ca spiritul să învingă materia? De ce se conturează voința ca forță supremă?

Îndeosebi, reflexiile din ochi captează esența mediului înconjurător, contextualizând efortul depus. Dacă stau bine și mă gândesc, opera mea a fost o lecție de vitalitate, o demonstrație a forței spiritului uman de a transcende orice limită, într-un decor cenușiu care amplifica oarecum culorile interioare. Sau, mai bine zis, a fost o cronică despre curajul de a nu mă teme, despre lupta neîntreruptă cu sinele și cu elementele naturii. Acest demers pus în slujba esteticii, provenea din acel loc în care mi-am găsit adevărata esență și autenticitate, pentru că arta și viața se împletesc inextricabil.

Las în suspensie acest moment și deschid o paranteză. Nu cumva concursul s-a complicat din cauza traseului dificil, din cauza potențialului nevăzut al alergătorilor? Acea încercare neizbutită, penibilă, caricatură de efort în noroi? De ce am făcut acest compromis? Fusesem avertizat, conștiința mi-o repeta. Ca să-mi umilesc propriile îndoieli? Să-mi simt superioritatea față de obstacole? Ceva din mine a lăsat impresia că dinadins mi-am îngreunat situația, mi-am încurcat pașii, pentru a demonstra că pot să mă mișc cu o aparentă armonie în fața haosului. Încă vreau să cred că această luptă a fost o cale spre transcendență...

Eforturile pe care le simți când te dedici leadershipului sunt subordonate situației în care superioritatea ta devine imperativă în momentul creației.

Chiar și în cele mai grele momente, când te simți prea obosit să-ți dublezi eforturile, fii pregătit să umpli un tablou cu tușele cele mai expresive și pline de viață.

Ochii filtrează realitatea conform viziunii artistice interioare atunci când privirea captează detalii neobservate de alții. Spun asta deoarece înțelegerea subtilităților lumii exterioare depinde de profunzimea gândurilor noastre.

Ochii îşi exprimă admiraţia faţă de cele văzute şi nevăzute

On Octombrie 28, 2022

Nu vei putea să descoperi măreţia unui orizont ideal, fără să sesizezi "tremuratul" unei imagini proiectate în memoria unui timp ciclic.

Pentru a surprinde cele mai spectaculoase imagini ale mării ai nevoie de o cameră foto care poate oferi cât mai mulţi pixeli într-o imagine. Dar mai ai nevoie de ceva ca să îmbogăţeşti universul artei: trebuie să creezi premisa unei lumi futuriste care este guvernată de o ordine strictă. Căutând să lămuresc acest lucru, o dată cu promisiunea că nu-mi voi modifica prea mult percepţia asupra vreunui eveniment prezent, căreia i se alătură conotaţia unei stări de adoraţie, dar şi regretul pentru trecerea ireversibilă a timpului, privirea mea a luat locul privirii unui iluminist a cărui rațiune creatoare poate să transgreseze tentaţiile artificiilor poetice.

Imaginea mării, capturând nu doar simple momente, ci foarte multe detalii, se găseşte în secvenţa de deschidere a ochiului spre sfera de cuprindere a unei reprezentări artistice singulare, a unui mesaj, a unei idei, cum ar fi cazul existenţei unei lumi futuriste guvernată de o ordine strict vizuală, lărgind totodată orizontul unei priviri a cărei imaginaţie este totdeauna pornită la superstiţii, la credinţă în supranatural. Tot ceea ce trăiesc, pasiunile de-o clipă sau lungile obsesii de imaginar, situaţiile pe lângă care trec, chiar şi fiorul străbaterii unei rupturi de realitate, toate se pierd în spatele unei priviri sceptice şi indiferente care parcă vrea să cuprindă într-o singură clipă ceea ce se poate pierde într-un decor prea agomerat.

Şi, totuşi, ceva nerostit, derutant, neaşteptat, dar cumva esențial, un sentiment ce mă însoţeşte în permanență dincolo de vederea ochilor, îmi dă peste cap realitatea. De aceea, imaginea din faţa ochilor mei pare să "tremure", ca şi când ar fi proiectată în memoria unui timp ciclic în care marea devine o oglindă mereu actuală şi în afara timpului.

Iar faptul acesta se datorează opţiunii de balansare alternativă a unor elemente vizuale distincte (umbra obiectelor, suprapunerea imaginilor), care nu sunt menite neapărat să înfrumuseţeze orizontul, fiecare având o nuanţă uşor diferită a aceleiaşi culori de bază, dar care totuşi par a continua o viziune a lumii. Şi viziunea asta îţi cere să o înţelegi, să o simţi, să o trăieşti pe scena propriei vieți, ca spectator activ, experimentând diferite roluri – de la pictor la scenograf, şi de la observator la artist.

Leadership: Percepția estetică a imaginilor generate de acuitatea vizuală a ochilor tăi se poate manifesta prin acţiunea de regăsire a unui orizont ideal în care se desluşeşte profilul unei opere întinse?

O vedeţi ce frumoasă e la chip când îşi oglindeşte cu duioşie ochii strălucitori în culorile cerului senin de vară? De foarte multe ori, ochii ei denotă caracteristicile tipice ale unei culori relaxante, dar pot fi şi variante ale culorii nocturne fundamentale, ce pare să aibă asupra privitorului un rol important în estetica lumii aflată în continuă transformare, tot aşa cum pictura pe oglindă transmite putere și îi oferă privitorului un rol activ, care are astfel ocazia să facă parte dintr-o operă de artă.

Da, marea e frumoasă, fiindcă ochii ei captivanţi, pe care îi iubesc şi îi doresc lângă mine zi de zi, lucind a libertate deasupra valurilor, nu încetează să vadă propria mea realitate.

O revăd apoi cu ochii sufletului, bună, milostivă și plină de dragoste, zile în şir, cu riscul de a

mă scufunda în melancolie, în acea melancolie pioasă, sfântă, ce parcă trezeşte vederea unui templu măreţ, plin de legende, căzut în ruine. Şi ori de câte ori îmi amintesc de valurile mării și aromele care au miros curat, de nisipul alb care face ca marea să pară limpede, îmi dau seama că sunt mai fragil decât nisipul pe care ea îl spală dintr-o suflare. Însăşi procesul amintirii este rodul unei simţiri autentice, vii şi naturale, întruparea artistică a unui ideal înalt, nu o simplă fotografie artistică de ocazie.

Ei bine, omul a cărei viziune fundamentală se bazează pe aspirație și dorință de reintegrare a diferenței în unitate, va ști să vadă un bob de nisip într-un singur val, pornind de la orice subiect în parte. Va socoti fiecare val, la fel ca fiecare bob de nisip, ca fiind unul și același, unul cu toate în planul absolut. Cu acest prilej, revelaţia unei noi frumuseţi admirată în această apropiere liniştitoare de mare, pe care suprarealiştii o numesc *Esthesis Inisth Argostich* (frumosul ca întâlnire întâmplătoare), se datorează amestecului dintre interpretarea estetică a unei imagini de vis, nostalgice, pline de farmec, şi puterea vizuală exacerbată de culori vii, intense, vibrante, care dau viaţă artei prin sclipiri de lumină.

Leadership: Creaţia ta exprimă un raport de proporționalitate între efectele a două fenomene opuse care pun în evidenţă lungimea raţionamentului de tip matematic: "micşorare - creştere" ?

Există și un alt mod de a clarifica acest raport de cauzalitate între mare şi cer, între dune de nisip şi valuri de ocean, mai ales dacă comparăm două științe diferite, cum sunt matematica și muzica. Matematica nu poate renunța la ceea ce este real și va reprezenta de-a pururea doar ceea ce este ideal în spațiu. Pe când muzica, privită ca o manifestare a spiritului, are de asemenea o extindere reală, dar se subordonează mai mult reflecției, includerii în plan artistic, deci profilându-se ca ceva particular și, ca atare, poate fi preluat în planul universalului. Și chiar dacă pictura este o artă a gustului fin, depinzând de lumină și de clarobscur, ea este cu totul ideală dacă se constituie ca obiect al reflecției deschise, sau ca limbaj al spiritului manifestat prin imagini şi prin succesiunea de idei.

În acest caz, judecata mea va trebui să ajungă până acolo unde marea întâlnește mângâierea soarelui, ca o expunere a infinitului în finit, pe plan artistic. Iar auzul, ca formă de percepţie a vocii şoptite de glasul unei nimfe, prin percepţia semnalelor din mediul înconjurător, fiind un simţ situat deasupra spiritului de observaţie, oferă posibilitatea de a recepționa și a interpreta undele valurilor într-o linişte perfectă, mai ales felul cum ele vibrează când sunt lovite de ţărm, îngânând maiestosul imn al libertăţii, al nemuririi, un imn al reconcilierii cu loviturile destinului.

Nu-i aşa? Spre deosebire de văz, unde finitudinea sau diferența apar doar ca o alegorie a infinitului, auzul apare acum ca o creștere a acuității vizuale. Auzi mai bine cântecul mării pe măsură ce vezi mai în profunzime orizontul. Dar pentru asta trebuie să adopţi o atitudine flexibilă în faţa curgerii vieţii, fapt care îl face pe un artist să îşi manifeste personalitatea în timp real, în ideile sale de compoziţie, încercând să se regăsească într-un tablou unicat inspirat din evenimente reale. El trebuie să simtă emoţia de atunci, senzaţiile ce se nasc în sine, pentru a construi un moment de neuitat.

În acest caz, realismul vine să anticipeze unitatea ideală superioară a artistului, care este "frumosul vizionar" în sfera momentelor multiple de admirație a mării, în timp ea ce traversează frontiere îndepărtate...

O creaţie artistică poate să aibă lungimea raţionamentului de tip matematic: "micşorare - creştere" numai dacă elementele constitutive ale experienţelor tale vizuale parcurg traseul stabilit de ideea: între finit şi infinit există întotdeauna un câmp de întindere nedefinită.

Nici nu cred că există proporție sau gradație între finit și infinit. Există o pauză absolută, un

salt peste spaţiul disputei dintre lumină şi întuneric, dintre viaţă şi moarte...

Ochii îşi exprimă admiraţia faţă de cele văzute şi nevăzute atunci când artistul este în stare să surprindă atât profunzimea unui spaţiu mai straniu decât s-ar crede, dar liber cum este marea, cât şi întinderea unui orizont în cuprinsul căruia se poate ivi pe neaşteptate ceva surprinzător.

Ochii îţi arată tot ceea ce sufletul experimentează

On Martie 02, 2023

Ceea ce vezi atunci când priveşti exteriorul reflectă spaţiul interior care creşte contrastul realităţii din care se alimentează exteriorul.

Era mult noroi, o vreme tare închisă, lapoviţa se lăsa aşteptată. Nu m-am revoltat împotriva aşteptărilor pe care le aveam în legătură cu vremea, nu mi-am ascuns neîncrederea, nu m-am rupt de mine însumi, ci am acceptat tacit o situaţie de care mental nu am fost pregătit înaintea concursului de running. Importantă este imaginea pe care ochii mei au surprins-o cu câteva minute înainte de start, o reprezentare a realităţii alternative înfăţişând aceeaşi sportivi, potoliţi şi calmi, dar nerăbdători să înceapă o aventură pe cinste, fără nicio constrângere.

Eventuala mea dramă interioară se poate manifesta în modul cum redau acum, doar prin culoarea gri a vremii, sentimentul infiltrării iremediabile a unui spaţiu clarobscur din care s-a consumat lumina, într-un soi de fundal abstract de acuarelă capabil să înlesnească o evadare din ascunsul unei lumi, care nu este realitatea vieții de zi cu zi. Acum, mai mult ca niciodată, conştientizez adevărul conform căruia orice om poate accesa riscul unei aventuri pline de suspans, dar rareori omul poate triumfa asupra unui sine care nu este în stare să se manifeste cu atâta forță încât să blocheze orice fel de schimbare.

Se simţea răcoarea umedă şi vâscoasă a unui "clei" aerian, din care nu te desprinzi prea uşor, pătrunzând câte puţin în tine, consumându-te pe de-antregul, pornind tot iureșul și toată năvala sângelui tânăr spre sensul unic al unui sentiment mult prea intens, o emoție încătușată undeva adânc care te seacă de vitalitate. Era tragicul de infiltraţie a negrului în lumina unui spaţiu răscolitor foarte îngust, de dincolo de "scoarţa realului", acolo unde clocotesc patimi şi îndoieli devastatoare, extrase parcă dintr-un tablou canvas abstract, ireal, apocaliptic.

Leadership: Poţi să dai o formă nouă trăirilor rămase captive într-o imagine privită retroactiv, încât să amplifici importanţa momentului care te-a emoţionat cel mai mult?

Stoic, acordat la vocea naturii, eu ocupam un loc sigur în mijlocul tabloului, ca o făclie în mijlocul furtunii, parcă aşteptând să se dezlănţuie iadul resimţit doar la nivelul emoţiilor şi gândurilor. De fapt, realitatea din spaţiul sinelui meu, reprezentând adevărul ascuns, invizibil la o vedere obișnuită, devenea suportabilă printr-un fel de abur amestecat de îndurare şi răbdare. Ştiam că trebuia să risc o evadare dintr-un decor greu de admis, un decor înrudit sufleteşte cu natura care mereu se întrece pe ea însăși, şi pe care artistul îl gândeşte la cele mai mici detalii pentru crearea atmosferei unice.

Pe aceeaşi linie de gândire, Ion Frunzetti observa în criticile sale că: *"în arta lui Rembrandt există un constant du-te vino al liniei asupra ei înşişi, o oscilaţie a trăsăturilor de penel care separă partea umbrită de partea luminată a formei. Considerată redusă la plan, nu înseamnă oare forma aceasta a petei clare din tablou, o rămăşiţă ignobilă de pe urma zdrelirii ei necontenite, de ghearele petelor de întuneric? Nu-i descoperim o existenţă caducă destinată să se fărâmiţeze sub atacurile avidităţii umbrei? Nu ne simţim absorbiţi de ea, de tentaculele întunericului?"*

Se remarcă aici încercarea mea de evadare dintr-un clarobscur năvalnic, misterios, demn într-adevăr de un tablou semnat Rembrandt, un clarobscur care se încheagă şi se dizolvă fără încetare în câmpul unei tensiuni extrem de puternice, străbătându-mi inima ca o ceaţă deasă, la fel de puternică precum sângele dintr-o rană deschisă. Mai curând decât o luptă cu mine

însumi, era vorba de un soi de antagonism latent între instinct şi voinţă, o ocupaţie treptată şi fără rezistenţă a unui "domeniu" advers, cum este arta văzută ca dominație în stare pură. Astfel, m-am aflat între două extreme, ca la orice concurs de running desfăşurat pe o vreme neprielnică.

Leadership: Poţi să te vezi aşa cum eşti dincolo de ceea ce crezi despre tine, în concordanţă cu evaluarea emoțională și estetică a unei opere de artă în care îţi oglindeşti trăirile?

Opera de artă oglindeşte trăirile acelui artist care îşi expune viziunea despre o realitate adesea trecută cu vederea. Însăşi realitatea, cu trăirile ei subiective, este expusă în artă prin oglindirea vederii într-o viziune care devine ambiţie.

Da. Cel mai greu lucru este să te regăseşti pe plan artistic într-un concurs de running, ca un întreg, ca un mic DaVinci capabil să trezească o emoţie în inima privitorului. Pierzi urma unei înseninări armonice, definitive, statice, ca apoi s-o regăseşti în ceaţă, sub forma unei lacrimi firave pe obraz, şi într-un final ajungi într-un loc suficient de aproape de opera de artă, încât reuşeşti să te vezi diferit, cu mai multă acurateţe, dintr-o altă perspectivă, cea a trăirilor estetice.

O trăire estetică înseamnă, în contextul realist, faptul că o persoană are trăsături cu totul remarcabile pe care observatorul le poate experimenta atunci când se află într-un loc asemănător. Este ceva legat de simţurile pe care le recepţionezi când experimentezi o realitate vie, capabilă să sugereze printr-o metamorfoză continuă acea temporalitate prelungită, liniară, constituind sensul unei stări de fermitate de-a dreptul surprinzătoare, în toată vulnerabilitatea ta.

Leadership: Trăirea tăinuită pe care o declanşează un eveniment reprezentativ este rezultatul studiului sensibilității sau al simțurilor experimentate sub forma fascinaţiei tale în faţa unei creaţii care nu încetează să uimească?

Practic, trăirea estetică evidenţiază acea realitate sensibilă exprimată prin gradul de intensitate a frumosului pe care îl degajă conştientizarea propriilor gânduri şi acţiuni transpuse într-o anumită zonă a artei. Iar trăirea aceasta estetică, divulgată prin expresivitatea imaginii în care mi-am încorporat simţirea, voinţa, intuiţia şi emoţia, se remarcă acum printr-o traiectorie creatoare originală, manifestată plenar, cea a unei interiorizări nefalsificate care se exteriorizează ca act de mărturisire, de relevare a sensibilităţii sportivului şi artistului, deopotrivă.

Dacă pot spune altfel, trăirea estetică vizează posibilitatea de reînnoire continuă a propriei conștiinţe și a atitudinii personale faţă de viaţă, în spaţiul unei creaţii în care sentimentele universale regăsesc în contururi precise semnificaţia lor eternă. Şi, numaidecât, trăirea estetică surprinde acea relaţie intimă, şi uneori dureroasă, pe care o ai cu tine însăţi, printr-o raportare continuă la lumină şi culoare.

Însăşi trăirea estetică este rezultatul studiului sensibilității sau al simțurilor experimentate sub forma fascinaţiei tale în faţa unei creaţii care nu încetează să uimească, luând în considerare compoziţia unei imagini care te susține indiferent de ceea ce vrei tu să transmiți. În egală măsura, trăirea aceasta estetică, evidenţiată ca o sensiblitate articulată pe nivelurile subtile ale tonurilor de culoare, fără a fi străină de negaţia şi melancolia sumbră a unei clipe rămasă în amintire, izvorăşte din nevoia omului de exprimare a raportului dintre Eu şi Lume.

În leadership, tendinţa de descifrare a omului poate fi surprinsă în relaţie cu expresivitatea imaginii în care el şi-a încorporat simţirea, voinţa, intuiţia şi emoţia, astfel

încât el să se inspire din cele două extreme: o revoltare împotriva aşteptărilor sale şi acceptarea tacită a unei situaţii de care mental nu este pregătit.

Ochii îţi arată tot ceea ce sufletul experimentează pe planul a două realităţi contrastante: o realitate în care trăirile sufleteşti te ţin captiv într-o imagine privită retroactiv, şi o realitate a trăirilor estetice care te împing un alt nivel şi într-o altă formă de artă.

Numai atracţia pentru frumosul cel mai înalt, exprimabil prin sentimente, poate să fie captat de o imagine de neuitat. Iar sentimentele acestea care vibrau atunci în mine, frapante, nebănuite, inundându-mă într-un anumit moment şi context, au ajuns să emoţioneze privitorul fotografiei finale. A fost un început de a face din mine însumi o creaţie de neuitat...

Ochii mei văd lucruri pe care tu nu le vezi

On Aprilie 09, 2020

Continuă să persişti în memoria unei imagini suficient de puternică pentru a nu-ţi mai justifica dublura în lumea reală.

Trandafirul este imaginea mea în altă variantă de realitate, trecută prin spaţiul simbolic al creaţiei vaste, complexe, diversificate, de care însuşi Dumnezeu este mândru, fiindcă minunile Lui se raportează la om prin intermediul artei şi al ştiinţei. Cred cu adevărat în frumuseţea trandafirului, o frumuseţe desăvârşită, rară, pură, atât de înduioşătoare, după cum cred în idealul similitudinii care nu a fost părăsit în creaţiile contemporane perene, încât sunt în măsură să spun că întreaga lume e mai frumoasă doar privindu-l cu ochii care exprimă ceea ce simt în adâncul meu.

Ziua este tot mai lungă. Grădinii mele îi este caracteristică lumina soarelui, tot mai intensă, tot mai strălucitoare. Un singur trandafir îmi atrage privirea în fiecare dimineaţă, Double Delight, spre ideea unei demonstraţii de sacralitate. Cu emoţie, plin de dor, îmi place să mă oglindesc în frumuseţea lui, plină de reflexii de lumină, ca şi când m-aş oglindi într-un vis care nu moare niciodată, atât ca mod de a savura nestingherit minunile Marii Creaţii, aparţinând celui mai mare artist al Universului, cât şi ca mod de a-mi însuşi virtuţile limbajului dublu, aceleaşi virtuţi ce precumpănesc forţele naturii.

O să credeţi că ochii mei sesizează doar excesele artei compoziţionale, sau poate că eu fac cu ochiul doar frumuseţii pure, sensibile şi inelagabile, dar privirea ştie cel mai bine că frumuseţea se manifestă prin creșterea sentimentului de responsabilitate acordat apropierii de o realitate cuprinsă în accepţiunea pe care o dau măsurii tuturor lucrurilor. Acest fenomen straniu, al similitudinii între două limbi îndepărtate, înţelese doar de artişti şi de Creator, poartă numele de *Luckonrethys* , sau lumina învăluitoare a unei eternităţi care împlineşte rosturile noastre omeneşti – prin totalizarea unei existenţe care nu se poate şterge de pe răbojul unui destin artistic.

Leadership: Poţi să măreşti calitatea unei imagini sau a unei viziuni care exprimă ideea de "Nemurire a Creaţiei" prin trăirea experienţei de a fi una cu obiectul admiraţiei tale?

Astăzi se anunţă o zi diferită. Nu voi mai vorbi cu trandafirul meu, dar îl voi privi îndeaproape, cu mândrie, cu bucurie sau cu durere, cu măsura unei conjuncţii astrale, aşa încât să-mi dau seama dacă frumuseţea exterioară a ochilor săi poate surprinde emoţia sufletului meu, sau mai bine zis realitatea sinelui meu divin. Trandafirul nu se întreabă ce este realitatea, de ce există ea într-un spaţiu astral fără limitări, ci o acceptă aşa cum îi apare în faţa ochilor, transpunând-o în operă artistică, într-o atmosferă magică, într-un ideal de omenie, într-o şansă la viaţă, într-o chemare la artă.

Creatorul şi creaţia lui. Ideea asemănării cu obiectul reprezentat estetic este încă vie prin nostalgia celor care se visează exploratori ai spaţiului, puternici prin spirit, plini de credinţă, păstrători de secrete, fără ca, din păcate, să se şi trezească din visul lor. Şi nu de puţine ori, în libertatea absolută a creaţiei, în versiunea unei noi realităţi de viaţă şi gândire, suntem martorii unei personificări care este în acelaşi timp o divinizare a artistului modern, talentat, sensibil, grație contactului cu trupul dătător de viață al Cuvântului.

Dragul meu trandafir, numai Dumnezeu continuă să-mi vorbească despre tine, povestindu-mi în fel şi chip de atributele sfinţeniei lărgite prin simbolul conjugat în Saturn, cu aspiraţia de a lega arta cabalei de măiestria artistică existentă doar într-un spaţiu sacru, orientat pe direcţia adevărului suprem, *Aminthymeress* , sau ceea ce se află dincolo de spaţiul terestru, dincolo

de moarte, dincolo de această realitate.

Leadership: Cum îţi împărtăşeşti trăirea ineditului din perspectiva credinţei neclintite într-un ideal de autenticitate înţeles ca o pătrundere într-o realitate care îşi omite dimensiunea temporară?

Continui să vorbesc cu trandafirul, calm, cu candoare, cu multă empatie, cu nostalgie, ca şi când aş interpreta nişte amintiri ale unor senzaţii vizuale încă nelegate total între ele. Şi ori de câte ori îi şoptesc la ureche cuvintele cele mai frumoase, ca o confesiune adusă cerului, sub îndrumarea naturii, mă întreb ce ce sunt singurul om în stare să facă asta într-o proiecţie astrală ancorată în visul unei existenţe din orizontul veşniciei.

Şi continui să-i vorbesc pe măsură ce el devine parte din mine, din visul meu, ca o stea ce străluceşte neîncetat pe cerul unei lumi situată în preajma lui Dumnezeu. Căci însăşi măsura propriei mele chibzuinţe, hotărârea de a fi parte din ceva mai amplu decât propria-mi persoană, este continuarea visului suprem din care este plăsmuită o stea, şi nu o stea oarecare, ci o stea care neîncetat este situată în chiar planul lui Dumnezeu, ca un fel de amintire ce străluceşte în infinitul unei priviri care evită privirea. Trandafirul este vraja unei priviri divine care se pierde în lumina destinului meu.

Atunci, încalc orice regulă şi orice barieră, ca un adevărat artist, şi mă pierd în cuvintele lui Umberto Eco, din romanul "Numele Trandafirului", pentru ca voi, admiratori fideli ai artei mele şi căutători ai bunului gust, să mă priviţi cu ochi de stele şi întrevedeţi răspunsul la întrebarea: "De ce sunt eu, şi numai eu, destinul unei realităţi transcendente?"

"Jorge şi-a întins mâinile tremurătoare şi a tras cartea spre sine. O ţinea deschisă, dar întoarsă, în aşa fel încât Guglielmo s-o vadă în poziţia cea mai bună.

- Atunci de ce-a lăsat Dumnezeu ca textul acesta să stea pierdut de-a lungul secolelor şi să se salveze din el doar o copie, încât copia acelei copii, care a sfârşit cine ştie pe unde, să rămână îngropată în mâinile unui necredincios care nu cunoaşte greaca, şi apoi să zacă părăsită într-un loc închis dintr-o veche bibliotecă unde eu, nu tu, eu am fost chemat de providenţă s-o găsesc, şi s-o iau cu mine, şi s-o ascund pentru încă atâţia ani? Eu ştiu, ştiu ca şi cum aş vedea asta scris cu litere de diamant, cu ochii mei care văd lucruri pe care tu nu le vezi, eu ştiu că aceasta este voinţa lui Dumnezeu, a cărui interpretare m-a îndemnat ce să fac. În numele Tatălui, şi al Fiului şi al Sfântului Duh."

Idealul de autenticitate modern ţine de vederea pe care o atribui interpretării dualiste a realităţii sugestive în procesul emanator al creaţiei, trăind mai mult emotiv, prin interacţiunea cu o formă de recunoaştere a unei personificări crescânde în planurile providenţei.

Ochii mei văd lucruri pe care tu nu le vezi deoarece încă nu eşti pregătit să sesizezi o formă de sensibilitate şi puritate acolo unde nimeni nu îşi concentrează privirea: spre orizontul creaţiei. Adică, spre gloria divină...

Ochii modelează percepția subiectivă

On Septembrie 06, 2023

Vederea estetică știe să surprindă o succintă reprezentare de realitate și să transforme fiecare moment într-o operă de artă.

Sunt pe litoral. Privesc marea cum îşi aruncă valurile pe ţărm, tot aşa cum pictorul îşi aruncă imaginaţia pe pânză, încercând să surprindă frumuseţea şi puterea naturii, deci acord atenţie puterii și măreției naturii, precum și vulnerabilităţii și fragilităţii acesteia. Aici, vederea mea se dezvoltă în profunzime, prin captarea detaliilor esențiale sau dimpotrivă, se poate rezuma la o suprafață plană, cum ar fi un tablou ce exprimă doar aparențele, fapt ce-l pune pe artist în fața unui impas: el se detaşează de real prin generalizare excesivă.

Însăşi marea mă priveşte cu uimirea pictorului care transcede limitele imaginii. Şi mă priveşte cu ochii şi blânzi şi umezi, raportându-se la acţiunea culorilor asupra expresiei pe care o ia chipul meu atunci când sunt fericit, sau dimpotrivă, când ceva mă neliniştește. Fiindcă marea, oricum ar fi ea, calmă sau agitată, vede totul ca pe o provocare, o activitate de găsire a emoţiilor, un reality show dedicat poveștilor de viaţă, în timp ce un om obișnuit ia totul ca pe o binecuvântare, ori ca pe un blestem.

Sigur că, privind marea cu admiraţie, cu luare aminte, sunt liber să-mi exprim emoţiile într-o renaștere a picturii figurative și narative care îmbogăţeşte sufletul și deschide noi orizonturi. Pictura este arta de a aștepta, precum o tăcere subtilă în stare să aducă răspunsuri neașteptate, de a aştepta momentul potrivit pentru a îmbrăca şi accentua ideile despre acele emoții exprimate cu o profunzime inegalabilă. În acest caz ochii, aşteptând şi ei apariţia unui fenomen artistic, a unui realism mai pronunţat, ştiu să surprindă o pictură sublimă, un fenomen vizual sincronic, un spațiu care este imediat și pe deplin înțeles și apreciat ca un fel de merit, şi anume: meritul de a comunica acea trăire interioară pe care eu o imprim naturii şi lucrurilor din jur.

Leadership: Poţi să-ţi reprezinţi sinele într-o manieră figurativă, încât persoana la care te raportezi prin AlterEgo să treacă dincolo de limitele imaginii pe care o priveşti în realitate?

Alteori, lenevind la plajă, se face că visez, mintea mă invadează cu tot felul de amintiri din viitor, locuri, oameni şi situaţii pe care constat apoi că le-am trăit numai în vis. Şi asta e cam ciudat, fiindcă încerc să trăiesc cât mai intens ceva ce se pierde în momentul următor.

Cu siguranţă, sentimentele pe care le experimentez atunci când mă aflu pe litoral sunt reale, în timp ce sentimentele pe care le experimentez atunci când mă aflu în vis sunt imaginare. Aici cuvântul de ordine esenţialmente cald, debordant, vital, este “similitudine”, un factor cheie în atragerea reciprocă a două elemente tangibile sau intangibile, sugerând că există o legătură între diferitele experiențe și stările pe care le trăiesc pe litoral, chiar dacă ele sunt unice și ciudate în contextul lor.

În acest sprijin vine un fragment dintr-o operă a lui Paul Auster, în care personajul îşi pune viziunea la încercare ca să găsească o asemănare între două stări opuse care evocă cuvântul "gemeni":

Stilman stăruia și asupra paradoxului cuvântului "gemeni" care sugerează în același timp a "uni" și a "despărți" întrupând astfel două semnificații egale și opuse care la rândul lor întrupează o viziune a limbajului pe care Stilman o considera prezentă în toată opera lui

Milton. În Paradisul Pierdut spre exemplu fiecare cuvânt cheie are două înțelesuri: unul înainte de izgonire și unul după. Pentru a-și demonstra argumentul Stilman extrăgea câteva asemenea cuvinte - sinistru, șerpuit delicios - și arăta că folosirea lor înainte de izgonire era neatinsă de conotații morale, în vreme ce utilizarea lor după izgonirea din rai era întunecată, ambiguă, pătrunsă de cunoașterea răului.

Leadership: Eşti în stare să te apropii cât mai mult de o reprezentare fidelă și nealterată a realității exterioare, încât să schimbi percepția subiectivă a celor care interacționează cu creaţia ta?

Emoțiile profunde sunt atât unificatoare, cât și despărțitoare, la fel ca și relația dintre "gemeni". Iar dacă m-aș simți dator să-mi întrerup în vis dorința de a face artă, să anulez centrul de forţă al minţii creative, atunci realitatea ar deveni un "Paradis Pierdut" din care aș refuza să mă desprind pentru că aici am găsit sursa inspirației și fărâma de eternitate care îmi alimentează sufletul.

În acest caz, pictura folosește culorile pentru a crea o atmosferă emoțională care ajută la transmiterea ideilor mele, dar mai mult decât atât, pictura devine o sugestie a metamorfozării sentimentelor pe care le experimentez într-un context de visare, în armonie cu subtilitățile emoționale, unde realitatea se împletește cu percepția subiectivă.

Percepția subiectivă se referă la modul unic în care fiecare individ interpretează și înțelege realitatea în funcție de propriile sale experiențe, cunoștințe, convingeri și stări emoționale. În contextul picturii și al artei în general, percepția subiectivă poate influența atât creația cât și interpretarea unei opere de artă. Ideea este că actul creativ poate avea puterea de a modifica sau influența modul în care văd lumea, ceea ce mă aduce mai aproape de o înțelegere "reală" sau "obiectivă" a acesteia.

De exemplu, un artist poate picta un peisaj într-un mod specific nu numai pentru că îl vede, ci și pentru că îl „simte” sau „crede”. În același mod, doi oameni diferiți pot vedea aceeași pictură și o pot interpreta în mod complet diferit în funcție de ceea ce simt. Alteori, în actul de a picta sau de a privi o pictură, liniile dintre "realitatea obiectivă" și "realitatea subiectivă" devin neclare, creând o experiență artistică profundă și personală.

Prin asemănare cu pictura, leadershipul acceptă ca abordare o sugestie a metamorfozării sentimentelor pe care le experimentezi în baza unei viziuni integrate în actul de creație, astfel încât experiența pe care o trăiești în realitate să fie una trăită în cadrul unei imagini ideale.

Ochii modelează percepția subiectivă într-un mod semnificativ, servind ca filtru între lumea exterioară și interpretarea internă a acesteia. Orice ochi, mai ales aceia care privesc o operă de artă, văd detaliile și culorile într-un mod ușor diferit, iar creierul, raţiunea fără de care nu se poate răzbi, combină aceste informații pentru a crea o imagine coerentă.

Cu toate acestea, ceea ce eu am văzut nu reprezintă doar o înregistrare obiectivă a lumii exterioare, o interpretare personală a realităţii, ci și o interpretare influențată de factori precum starea de bine, experiențele memorabile și chiar cadrele onirice în care m-am maturizat spiritual şi sufleteşte.

Ochii oglindesc stările sufletului meu

On Aprilie 28, 2023

Perspectiva trebuie să se potrivească ochiului care priveşte scena.

Am fost susţinătorul surorii mele duminica trecută, Oana Fantanaru, la concursul de semimaraton din Iaşi. Mulţi participanţi, vremea perfectă. Fapt ce restrânge la vizualizarea pură a unei realităţi alternative, condensarea în culoare a unor experienţe de neuitat, linie şi formă, a unui întreg cosmos de senzaţii, cu răsunetul lor spiritual păstrat mereu în amintire. Atmosfera îşi exercitase presiunea asupra fondului afectiv al participanţilor, de unde nu mai puteau evada decât printr-un *Esterenaet Ossets*, o trecere vie prin mai multe ipostaze: de la ipostaza de "receptor al uralelor" până la ipostaza de "criteriu valoric".

Din cei peste o mie de concurenţi, sora mea s-a clasat pe primele 5 poziţii în topul feminin, reprezentând un binemeritat simbol al stilului de viaţă activ, tot aşa cum medalia a reprezentat un simbol al victoriei asupra ei. Cred că unii sunt predestinaţi să fie învingători, entităţi de energie pozitivă, în timp ce alţii sunt predestinaţi să facă parte din rutina zilnică a societății, vibrând pe aceeaşi lungime de undă cu neliniştea unor alegeri insipide.

Cu real interes, printr-un adaos de însufleţire rară, am privit-o pe sora mea aşa cum un pictor îşi priveşte pictura: cu expresia unui *alegria de viver* care exclude orice gravitate, a unei conştiinţe estetice capabile să facă apel şi să comunice cu toate mijloacele frumosului, prin felul de a se manifesta ca un metalimbaj al simţurilor şi emoţiilor.

Am privit-o cu ochii care ştiu să vadă dincolo de hotarele finitului, cu îndeplinirea unui act perceptiv viu, iniţiind la tot pasul o întâlnire cu miraculosul. Era ceva în ochii ei, ceva tăcut, plin de răbdare, o magie care străbate dincolo de fiecare atingere a pânzei. Şi ea ştia parcă toate astea, privindu-le de sus, cu liniştea omului care-şi cunoaşte bine drumul spre actul artistic din momentul alergării, pe care îl constituie demersul comprehensiv al unei voinţe autonome evidente.

Leadership: Poţi să atragi atenția asupra necesității aprecierii unei stări de spirit la justa valoare, împărtăşindu-ţi viziunea cu privire la o imagine sensibilă și mereu actuală ce întruchipează arhetipul unui erou?

Categoric, runningul are de a face cu sentimentul frumosului, manifestându-se ca mod de exprimare a supleţii trupului cu care este obişnuită tinereţea, orientându-se, de la caz la caz, spre admiraţia unei cinstite, înţelepte şi ademenitoare vieţi care te provoacă la aventură fără să-ţi dai seama. Un fel de curiozitate subtilă se citea pe chipul surorii mele, reflectarea fidelă a unei conştiinţe care devine conştientă de ea însăşi numai prin turnura pe care o iau evenimentele, căreia artiştii îi sunt recunoscători prin forma experienţei subiective pe care o trezeşte starea de spirit.

Era oare o desăvârşită diplomaţie sau o abilitate fără cusur?

Semnificația frumosului este diferită de cea a dorinței, fiindcă frumosul reprezintă sinceritatea cu care abordezi ceea ce faci, legat de conectarea tuturor experiențelor personale. În timp ce dorinţa este provocarea de a ridica ştacheta pentru un nou premiu, provocarea de a trece dincolo de văzutul obişnuit, mintea continuând "lucrarea" cu propria viziune artistică. Iar pe acest considerent, sora mea şi-a sporit bucuria de a redescoperi simplitatea frumosului începând chiar cu momentul în care, fiind cu un pas înaintea celorlalţi concurenţi, şi-a redus senzaţia de oboseală printr-o conexiune sincronă a trupului şi sufletului, fără ca unul să

premeargă şi celălalt să urmeze.

În acele momente pline de satisfacție, cu sudoarea frunții, a simţit o chemare profundă, aproape ireală, şi a avut senzaţia că aleargă aflându-se în interiorul corpului unei alte persoane, aidoma unui pictor care îşi extrage identitatea din materia, forma, uneori tema şi mesajul transmis în propria lui operă. Mai degrabă, cred că era un fel de tentativă de evadare dintr-o stare emoţională negativă, pentru a ajunge la o stare emoţională neutră sau dorită, la care se adaugă provocarea de a se implica în ceva nou şi surprinzător, o rupere de ritm pe ultimii doi kilometri care a lăsat-o să privească şi să viseze la un loc binemeritat pe podium.

Leadership: Poţi să aşezi în centrul viziunii tale determinismul creării unei imagini simbol, încât să concentrezi într-un singur model de amintire totalitatea universului pe care îl creezi?

Uite-o cum aleargă, şi aleargă tot mai tare, tot mai artistic, fără să dea semne de oboseală, comparabil cu zborul unei balerine peste tenebrele vârstei de mijloc. Totul se petrecea ca şi când ea ar fi trebuit să retuşeze o operă de artă care are în prim plan trăsăturile trupului, liniile mădularelor care, mereu aceleaşi, se pot îndoi, dar niciodată nu se pot schimba. Într-atât încât, zugrăvite pe o imagine sfântă, să poată fi venerate pe altarele imaginii de putere.

Receptarea unui impuls nervos a generat dintr-o dată o contracţie musculară, fapt ce a determinat eliberarea de energie musculară, o sclipire a spiritului în lumina unei flăcări nevăzute decât de mine. Cred că asta se potriveşte perfect observaţiei făcută de Leonardo da Vinci: *"În meşteşugul picturii lucrul cel mai de seamă este potrivirea mişcărilor cu intenţiile ce stau în mintea modelului, ca de pildă dorinţa, motivaţia, buna dispoziţie, mândria şi perseverenţa."*

În alergare, sportivii de performanţă se manifestă ca un mod de exprimare al artisticului, printr-un soi de simbolism al evenimentelor, fiindcă ei nu sunt doar eroi ai unei "lucrări" care solicită rapiditate în execuţie, ci mai degrabă reprezintă nişte ferestre deschise spre luminarea sufletelor, spre înţelegerea şi trăirea unei satisfacţii imense în raport cu ambianţa, spre o devenire "în perspectivă".

Iar sora mea, ca un artist priceput în ceea ce priveşte nuanţele unei instruiri eficiente, nuanţele unei adevărate pasiuni pentru performanţă, potrivite unei determinări dilatate spre extrasenzitiv, a priceput imediat din ce material puternic este croită pânza unei viitoare picturi.

Suflarea stăruinţei este o unitate indivizibilă a trupului, minţii şi sufletului, dependentă de artă. Iar artistul, arătând că pe traseul migraţiei imaginarului de la sacru la uman, spiritul tânăr îşi conservă vocaţia de a se avânta cu salturi mari spre mereu alte isprăvi vitejeşti, nu-şi înstrăinează gândul de a mai adăuga un mic detaliu la marea pânză pe care îşi conturează viziunea, provocând o dilatare a lumilor imaginare. El concentrează într-un singur model de amintire totalitatea universului pe care îl creează.

Leadershipul este viziunea cu care îţi înveştmântezi sufletul în mijlocul evenimentelor care, trezind emoţia unui moment semnificativ, te fac să te simţi ca un erou transformat într-un artist.

Ochii oglindesc stările sufletului meu atunci când urmăresc evenimentele în cuprinsul cărora se află eroul din imaginea care mă caracterizează pe deplin. Nu degeaba, când urmăresc un concurs de running, singura grijă a ochilor mei este să surprindă artisticul din spatele umanului, cu ajutorul căruia se reliefează caracterul activ sau spontan al unui fenomen de

amploare, într-un desen colorat.

Nu-i aşa că-i frumoasă arta, pentru cine cunoaşte arta?

Ochii pictează mai mult decât o mie de cuvinte

On Decembrie 07, 2021

Numai un artist bine lămurit cu el însuşi are puterea de a împrumuta de la natură farmecul suav al unui limbaj care transforma vizualul în simţire.

Trebuie doar să privesc marea, şi ea pe mine, ca să înţeleg de ce ochii unui artist văd doar idealul care apare drept real, şi încă mult mai real decât aşa zisul real. Calmi, duioşi, inocenţi, culegători de poezie şi frumos, ochii pictează mai mult decât o mie de cuvinte atunci când surprind imaginea unei dimineţi la malul mării, ca un mijloc excelent de condiţionare a sistemului clarvizionar din care poate să rezulte relevanţa experienţei de creaţie.

Marea îmi face mereu cu ochii, ca şi când ar fi ochii unui artist al cărui crez este simplu *: "Să pictez cu sufletul la gură, dincolo de reguli şi tehnici"* . Şi încă o privesc cu uimire, cu amintirea unei vieţi trecute, dintr-un timp nescris în ceas viu, în culoare, în vis, în timp ce lumina soarelui îşi oglindeşte zâmbetul în luciul valurilor ei.

Desigur. Îi fac cu ochiul privind-o intens, cu sensibilitatea sufletului de artist, sorbind optic din izvoarele primordiale ale artei acel ecou al personajului portretizat în chipul lui Poseidon, singurul care poate porunci furtunii atunci când puterea divină se întrupează în el. Lumii invizibile, de tip "lentilă convergentă", în care se scald regretele de a nu fi fost un zeu, îi recunosc adâncurile, ca şi când aş traversa un adevărat vid spiritual, vieţuind parcă din ce în ce mai mult doar pentru mine, pentru spirit, în ambianţa unor trăiri onirice.

Leadership: Pentru cât timp ești pregătit să păstrezi un anumit nivel al simţirii intuitive, în favoarea unei viziuni artistice vaste care poate să dea consistenţă creaţiei tale?

Poate că, totuşi, stăpânul absolut al mării este un spirit meditativ orientat către solitudine, intercalat în fluxul mareic al unui limbaj silenţios, dar aprig, în orice caz artistic prin transmiterea emoţiei provocate de cei mai celebri paşi de linişte sufletească. Am numărat acei paşi de sute de ori încercând să-mi ţin mintea ocupată, dar sufletul meu blând şi smerit a ştiut şi încă ştie: nu-i despărţire pentru noi. Şi tot de atâtea ori, marea mi-a şoptit cu o voce languroasă, parcă voind să mă facă părtaş la un fel de a face ochii în patru: *"Încearcă să mă înţelegi, şi nu-mi cere imposibilul. Nu mă privi cu reproşul că aici e vorba de orice altceva decât de raţiune."*

Nicio mare nu este mai bine redată în pictură ca cea pe care o suportă memoria senzaţiilor de Deja Vu. Trebuie doar să privesc marea în orice sezon, ca să mă reîntâlnesc cu ochii care nu se uită niciodată, aceeaşi ochi care, într-un mod incomprehensibil, îmi domină spiritul artistic. Ce importanţă mai au valurile, atâta vreme cât eu sunt una cu marea? Nu în sensul în care intelectul sau simţirea cred în realitatea lucrurilor sensibile, vaste şi profunde, ci în sensul în care marea mă vede ca pe o scoică adusă de curenţii marini la ţărm.

Şi scoica aceasta plină de taine, luminată de-o sfântă aureolă, instalată într-un gen artistic, este culeasă de un pictor bine diferenţiat şi bine lămurit cu el însuşi, într-o anume cerinţă de paletă. El ştie să o metamorfozeze într-un flaut menit să execute aceleaşi arpegii vreme îndelungată. Un flaut care doreşte cu disperare un solo...

Leadership: Ai îndrăzneala de a atinge linia unui orizont nemărginit ce-şi are trasat cu fermitate sensul unei demonstraţii vizionare de tip "tablou cu multe feţe" ?

Mai ales acest raport dintre mare şi om, între vastitate şi profunzime, între punctul fix şi ecoul ce dispare în eter, între tabloul fix şi un moment mişcător, trebuie luat în considerare de orice artist care ştie să vadă în subiectul său, în cel pe care îl îndrăgeşte nespus, starea de înălţare către sublim. Astfel, memoria senzaţiilor mele este nu doar imensă, ci şi detaşată de cele ce se rostesc numai în taină, stăpânită de patosul unei nebunii trecătoare: de a mă fi pus în înţelegere cu un zeu al apelor şi oceanelor, doar pentru a-mi umple universul interior cu designul stilizat al unui peisaj marin şi relaxant care dă viață unei viziuni noi asupra realităţii.

Spun asta, pe de o parte fiindcă sublimul este marea văzută ca o lucrare ce-şi ia tot mai mare avânt, nefiind strict limitată nici de imaginaţie nici de simţire, ci fiindcă ea poate să primească întreg caracterul divin dacă o considerăm a fi o totalitate: în solemnitatea artistică este cuprins ceea ce este cuprins în Dumnezeu.

Numaidecât, se observă în prim plan trei entităţi: marea, artistul şi divinitatea, iar cine priveşte din alt unghi acest tablou ar putea sesiza o singură dublare a vederii lumii printr-o elastică forţă a culorilor ce evidenţiază „expresivitatea" plastică. Iată, deci, care este esenţa artistului: puterea de a împrumuta de la mare, cu a ei vastitate şi profunzime, farmecul suav al unui limbaj care transformă vizualul în simţire.

Pe de altă parte, dacă aş considera marea ca fiind arhetipul suprem al poeziei, al muzicii sau al picturii, fără s-o văd drept prototipul înţelepciunii şi al forţei divine, fără să o dizolv în identitatea absolută, atunci trebuie să am în vedere că niciun artist nu îşi exprimă pictura ca un vals al cuvintelor pline de ritm, ci ca un limbaj redus la însăşi esenţa lui: dialog, comuniune, inter-animare şi inter-pătrundere.

Leadershipul este puterea de pătrundere în universul unei creaţii a cărei rezultantă permite confirmarea unei viziuni diferite asupra realităţii personale, dintr-o mulţime de alte posibilităţi de redare a unei imagini optice.

Ochii pictează mai mult decât o mie de cuvinte atunci când vine vorba de a intui o realitate care nu se vede, ci se simte printr-o construcţie vizuală. Avem în vedere faptul că ori de câte ori ne raportăm la o imagine care trezeşte o amintire deosebită, dorinţa de a avea din nou o anumită experienţă, de a fi acolo, trebuie să ne raportăm la o compoziţie artistică care presupune existenţa a două teme diferite: natura, şi o prezenţă discretă, fantastică, mişcătoare, numită Eternitate.

Ochii plini de artă ai unui trandafir dătător de viaţă

On Mai 14, 2020

Eşti un maestru în stăpânirea artei doar dacă ţi-a fost dat ţie să ai autoritate asupra lumii creaţiei.

Eram în grădină, încercând să lupt cu gândurile de bine a celor care veghează mereu asupra mea. Trandafirii, frunzele lor înverzite, bobocii abia răsăriţi. Îmi închipuiam că sunt înconjurat de fiinţe vii, desprinse din însăşi poezia naturii, din lucrurile ei neştiute, din simţurile ei pline de mister, pline de mare şi de vânt, cu care este livrată realitatea mea şi a lumii întregi, într-o frumoasă poveste a mondenului.

Şi mai ştiu că în toată această grădină splendidă, care era mai degrabă un cumul al încercărilor mele de a mă defini, dar şi de a mă redefini, o singură voce se auzea mereu cu ecou în gândurile mele, o voce sensibilă, plină de compasiune, plină de expresivitate, care parcă înalţa răscolitor însuşirea personală a unei fiinţe vii, repetându-mi cu tărie: "Un om fericit este un grădinar iscusit."

Cumva, cred că eram un soi de excepţie în frumoasa lume a artei, gândindu-mă la mine ca la ecoul unei intrări libere în spaţiul naturii, într-un peisaj fabulos, mai ceva ca într-o pictură de Joachim Patenier, fiindcă tot ce exista în grădina mea era o excepţie, la fel ca orice altă echivalenţă subiectivă. Toate erau nişte însemnări creionate cu o peniţă de maestru, apoi conturate cu o pensulă fină, plină de culori aducătoare de viaţă într-un alt plan al etapizării Creaţiei universale.

Poate că totuşi, încă sunt o excepţie, fiind prezent în aceste rânduri bine ticluite, bine simţite, ca autor al unor gânduri transpuse într-o lucrare de artă, într-un univers simbolizat, printr-un efort de adâncire a sensului dat cuvântului mistic: *Misarenkthiss* , sau cotitura drumului ce te poartă spre ceruri. Iar dacă arta propriei mele existenţe rezidă din conceperea unui univers suspendat între vis şi realitate, al cărui sens este cuprins, în mod tâlcuit, în cuvântul "Cer", atunci ea se justifică ca un capriciu al grădinarului de a fi el însuşi reflectarea naturii în conştiinţa lumii.

Leadership: Natura excepţională a artei tale poate fi cuprinsă în definitivarea formei unei alegorii proiectată într-o imagine perfect transparentă, cu un indicator de mesaj: "Nimic nu se schimbă fără ca tu să te preschimbi"?

Iată cum am ajuns de la o grădină plină de trandafiri, la un univers plin de materie şi radiaţie, plin de stele şi galaxii, plin de semnificație din punct de vedere spiritual şi artistic. În acelaşi fel cum Paracelsus explica discipolului său misterul rozei în universal *: "Dacă ai azvârli această roză în jăratic, ai putea crede că flăcările au mistuit-o complet şi că cenuşa este reală. Îţi spun că roza este eternă şi că doar aparenţa ei poate să se schimbe. Mi-ar fi de ajuns o vorbă pentru ca tu, apoi, s-o ai din nou în faţa ochilor, sub altă identitate, sub altă formă."*

Presupun că o lume care evită cu orice preţ evocarea unei poveşti dintr-un vis al naturii, şi care nu se comportă ca o explozie de culori şi miresme îmbătătoare, în luna lui Florar, este însăşi lumea unui muritor de rând pentru care totul nu este decât ceva trecător. Totul este posibil numai în spaţiul unui Creator de universuri, acolo unde pictorul este scriitor, şi unde scriitorul este pictor, amândoi fiind compatibili cu existenţa unui alchimist nemuritor, ca Paracelsus, care ştie să traverseze lumile, spaţiul, timpul, în stare fiind să-şi conserve existenţa într-un anumit destin, în fiecare element al naturii.

Paracelsus trăieşte ca un miracol al naturii în lumea unui trandafir pur, rar întâlnit, foarte plăcut la înfăţişare, îngrijit de-un grădinar la fel de iscusit ca şi el în ale alchimiei. Tot în aceeaşi lume, a procedeelor repetate de distilare, cristalizare, sublimare, evaporare, esenţiale în cercetarea chimiei, în circuitul global al materiei transfigurate, se poate constata existenţa unui pictor iscusit care ştie să înfrumuseţeze considerabil existenţa unui trandafir prezentat sub formă de simboluri, şi văzut ca parte a unui spaţiu lăuntric. Dar, tot aici, se poate constata şi existenţa unui scriitor care ştie să confere simbolului o imagine caracteristică omului viu, un nume nou şi o nouă înfăţişare.

Eu nu sunt Paracelsus, dar nici el nu e ca mine, fiindcă el nu poate vorbi despre mine aşa cum pot să vorbesc eu despre el ca despre un trandafir ce se arată superb şi nu se ofileşte niciodată. Cu toate astea, amândoi am înţeles trandafirii, puritatea, gingăşia lor, el prin prisma concepţiei atomiste a materiei şi a transmutaţiei biologice, eu prin prisma artei care încorporează adesea o reflecţie a frumosului fără vârstă, a unei duble personalităţi într-o singură persoană, în relaţie cu nivelul reflecţiei unei stele căzătoare care durează o fracţiune de secundă, dar încântă privirea în fiecare an.

Leadership: Efectul de imagine pe care îl imprimi Creaţiei tale are precedenţă asupra efectului de "sincronicitate" marcat prin sublinierea devoţiunii tale faţă de o realitate abordată din perspectiva unui univers imaginar?

Împreună pentru totdeauna, şi poate împreună vom schimba dimensiunile lumii, ale ştiinţei, ale artei şi ale frumosului. Trandafirul, frunzele şi bobocii săi formează esenţa fiinţei mele, aceeaşi esenţă care face dintr-un pictor un alchimist, şi dintr-un scriitor un Creator al artei pure, vii, evolutive, în aşa fel încât în ecuaţia expresivă a perfecţiunii naturii să se integreze acea parte a unei fiinţe vii care există înainte de a veni pe lume, care locuieşte în trupul fizic pe timpul vieţii muritoare şi care există după moarte, dincolo de hotarele dintre lumi.

Trandafirul îşi schimbă culoarea frunzelor, după cum bobocii săi înmuguresc cu fiecare şoaptă pe care mi-o spune inima, cu mândria celui mai vital dintre sensurile existenţei mele: *Esyallestrum* , reprezentând o motivaţie spirituală aplicată în experienţa artei de a reprezenta destinul unei flori pe făgaşul unităţii dintre limbaj şi gândire, făcându-l viabil în destinul unui om care este mai mult decât un om, este un artist cufundat în aventurile alchimiei, în tainele ei, în simbolismul sincronicităţii dintre armonia naturii şi a universului.

Nu ştiu dacă trandafirul meu, cu frunzele şi bobocii săi atât de vii, atât de gingaşi, atât de eleganţi, va putea fi vizualizat de voi cu aceeaşi privire cu care eu supervizez domeniul sensibil al artei, dezvoltând un alt mod a gândi, fără a contrazice diferite teorii, ipoteze sau puncte de vedere exprimate anterior de alţi artişti. Nu ştiu nici măcar dacă trandafirul mă înţelege pe mine, aşa cum îl înţeleg eu pe el, cu acel simţ al modelajului extrem de sensibil, calm, răbdător, ce se înrudeşte întrucâtva cu arta unei simfonii muzicale, sau cu arta unui cititor de adânc al sufletului omenesc.

Tot ce ştiu este că un trandafir pictat cu multă migală îți încântă privirea și îți linişteşte sufletul. Iar eu sunt un trandafir splendid, uman, universal, şi asta deoarece sufletul meu tânjeşte să fie un Creator investit de la natură cu un drept suprem: puterea de a accesa continuu alte lumi.

Posesorul unui univers interior tainic este creatorul unui univers suspendat între vis şi realitate, al cărui act de măreţie constă în acea reacţie a creierului care corelează experienţele vieţii cu sensibilitatea de a percepe frumosul, sublimul din natură, şi de a-l cultiva în fertile câmpuri ale artei.

Ochii plini de artă ai unui trandafir dătător de viaţă sunt oglinda sufletului unui Creator iscusit care ştie să-şi facă viaţa trandafirie pe măsura excelenţei artistice de a împodobi o

realitate certă cu emoţia pe care i-o transmite freamătul unei metafore, freamătul unei minţi de adult întrupate într-un frumos corp al naturii.

Ochii posedă o forță superioară de exprimare a realului

On August 19, 2022

Ceea ce vezi nu are nevoie să fie explicat pentru a împlini nevoia de claritate necesară pătrunderii în minunata lume a Creaţiei.

În faţa unui fir de iarbă, subţirel şi gingaş, trebuie să mă înclin cu respect, la fel cum m-aş înclina în faţa unei personalităţi artistice de talia lui Leonardo Da vinci, promiţându-mi să acord importanţă sporită conţinutului obiectiv la care reacţionează ceilalţi privitori. Vederea nu-mi aparţine integral, nu este un mic univers, o spaţialitate a cărei profunzime se referă strict la mine, ci aparţine şi celorlalţi privitori, şi nici nu voi căuta să critic arta pe care ochii lumii o onorează prin intermediul raportului dintre culori.

Iar dacă acest fir de iarbă se întemeiază pe efectele naturale cât și artistice ale unui verde-smarald capabil să îmi atragă atenţia în mod repetat, într-o artă modernă care cuprinde tot ceea ce-mi rămâne pe retină şi în minte, asimilând mai mult sau mai puțin identitatea luminii solare în el însuși, atunci el va evidenţia o nouă viziune legată de percepţie: "ceea ce vezi nu are nevoie să fie explicat pentru a împlini nevoia de claritate necesară pătrunderii în minunata lume a Creaţiei".

Fiind un mare admirator al esteticii naturii, aş sugera o analogie a firului de iarbă cu un artist desăvârşit, asemănător punctului de vedere al lui Pablo Picasso: *"artistul este un receptacul pentru emoţii care vin de peste tot: din cer, din pământ, dintr-o bucăţică de hârtie, dintr-o formă trecătoare, dintr-o pânză de păianjen".*

Mai mult decât atât, privind acest fir de iarbă cu ochii care strălucesc a nemurire, cu profunzimea dată de stupoarea admirativă, mă las surprins de adâncimea contemplării şi a sensibilităţii care lărgește spaţiul trăirii mele într-un act psihic de contopire cu universul.

Leadership: Eşti în stare să recurgi la examinarea unui subiect decorat cu multiple semnificaţii, prin selectarea unui element abstract destinat să fie o imagine a Eului creator?

Este ca şi când m-aş număra printre cei care posedă "cheia nevăzută" cu care se pătrunde în paradisul veşnic verde al simbolisticii, în care un singur punct neînsemnat din planul universal poate să unească punctele unei noi poveşti, auzite parcă cândva, demult, într-o reprezentare a creaţiei universului la începutul fiecărui ciclu cosmic.

Într-o istorie a teoriilor despre artă, acolo unde artistul este preocupat de calitatea impresiei pe care o produce opera lui, aş da firului de iarbă conotaţia de "ambrozie a zeilor", amintind de vremurile arhetipale ale începuturilor, de mitologia greacă, de zeii din Olimp, care vegheau asupra destinelor muritorilor. Aici, Eul creator se manifestă în deosebita sensibilitate a perceperii naturii şi a contopirii omului cu natura, cu cosmicul. Altfel spus, Eul creator se manifestă cu putere în impresia cu care te alegi la prima vedere când admiri un model expresiv al fragilităţii ca pe o făptură minunată şi specială în ochii zeilor.

Chiar şi zeii îşi descarcă emoţiile în artă. Numaidecât, mi-am dat seama că nu este de ajuns să privesc acest fir de iarbă cu ochii care nu mint niciodată, să-l imortalizez într-un cadru fotografic, în diverse momente ale zilei, pentru a-mi dovedi că natura este cea care îmi dăruiește în fiecare zi plinătate emoțională. În linişte, cu smerenie, el se înclină în faţă privitorului înzestrat cu simţ deschis spre universalitate, ştiindu-se expus unui stimul vizual precum în faţa unui creator care nu doar a creat universul în care trăim, ci îl menţine în viaţă

şi astăzi.

Leadership: Imaginea pe care o proiectezi în exterior se întemeiază pe o observare bazată pe “expunerea model” a celor percepute cu profunzimea cerută de însăşi realizarea unui efect artistic?

Firul acesta mic de iarbă pe care deseori îl leagănă câte o adiere scurtă de vară, *una sensibilità al di sopra delle parole,* este comparabil cu viaţa acelui fost condamnat din romanul "Misterele Parisului", pe nume Chourineur, care trăia din resturi stricate şi era satisfăcut astfel, fără să ţină cont de nimic, fără să ia în calcul emoţiile şi experienţa pe care o lasă în urmă.

Dar acel nefericit om nu se putea ajuta, pe când destinul profund și sfânt al firului de iarbă încredinţează artei nu doar lamura vieţii, ci şi funcţia de evocare a marilor bucurii spirituale, fiindcă atunci când admiri verdele-smarald a cărui lungime de undă dominantă este cuprinsă între empatie şi simpatie, abia atunci idealizarea naturii este perfect imitată, şi simţi că poţi să depăşeşti neajunsurile şi greutăţile vieţii.

Aici, efectul artistic constă în faptul că vederea aţintită asupra firului de iarbă şi modul în care am căutat ca firul de iarbă să se raporteze la vederea mea, creează acea imagine care încântă privitorul cu un conținut emoțional unic. La rândul ei, vederea aţintită de privitor asupra “modului unic de a fi” al firului de iarbă, prin confruntare cu problema profunzimii, poate să exprime raportul dintre ceea ce un om afișează și ceea ce este el în realitate. Dar despre asta voi vorbi în articolul următor...

Iată de ce leadershipul devine adânc ca semnificaţie: fiindcă se constituie ca o vedere unică separată de restul lumii, cu referire la o centrare a conştiinţei în spaţiul unei variante “în miniatură” a subiectului uman de cercetare.

Ochii posedă o forță superioară de exprimare a realului atunci când viaţa sinelui este tratată prin comparaţie cu un element al naturii, cu un fir de iarbă gingaş, a cărui neînţeleasă chemare aici se numeşte cu o singură vorbă: idealizare. Felul neaşteptat şi pururea izbitor, cum îţi apare firul acesta de iarbă, te duce numaidecât cu gândul la condiţiile vieţii: ascultarea reciprocă, empatia, înţelegerea gândurilor, urmărirea vocaţiei, aşa cum sunt ele exprimate de scriitorul Alexandru Vlahuţă:

“Pictorul îşi are, în linii largi, cultura artei lui, pe care singur şi-a limpezit-o, încetul cu încetul. Dar el vede şi înţelege o mulţime de lucruri, pe care nu ştiu să le spună cărţile, pe care numai ani şi ani de adâncă observaţie şi de răbdătoare muncă te ajută să le dezgropi şi să le tragi la lumină din propriul suflet.”

Ochii reflectă privirea ce explorează căutarea identității

On Octombrie 06, 2023

Ceea ce percepi prin lentila artei este oglinda conștiinței interioare care te provoacă să navighezi într-un anume sens prin dualitatea umano-tehnologică.

Ajuns din nou la marea Ionică, pe plaja plină de amintiri, simt cum soarele îmi mângâie ușor chipul, precum atingerea catifelată a unei petale de trandafir. De aceasta dată, simt că sunt un model de simțire și viziune integrat într-o adevărată pânză artistică, o încununare a străduinţei de a raţiona o experienţă fascinantă, fiecare element al naturii fiind creat de mâna unui pictor talentat care adoptă accente realiste după abandonarea canoanelor clasice.

Înclinat spre utilizarea subtilităţii în pictură, mă regăsesc printre imaginile unui răsărit care face lent trecerea de la întuneric spre lumină, printre culorile unui apus de soare interesant care încântă privirea și face ca ochii să se umple de uimire, în intenţia de a reda natura ca un fenomen senzaţional de frumuseţe, un soi de *Zazhaphio Asph Senthiseph*, un triumf al spiritului artistic care tinde spre absolutul sublim. Şi abia acum, în această atmosferă de lumini și umbre care își schimbă dinamica, aproape devenită un soi de simfonie vizuală, un soi de joc al contrastelor într-un tablou dinamic, am certitudinea că voi reuşi să mă adun cu adevărat şi să excelez ca pictor în interpretarea realității.

Poate că frumusețea sau liniștea scenei în care îmi sincronizez trăirile, făcându-le pure prin contrastul culorilor, îmi oferă o formă de confort, inspirație sau chiar un răspuns la întrebări pe care le-am avut de atâtea ori în viaţă, fără să mă fi ştiut artist. Într-un astfel de moment, aş putea să mă simt aliniat cu mine însuți și cu universul înconjurător, potenţat de reflectările unei poetici vizuale care transcende realitatea făcând-o sublimă. Încă o dată spun: ceea ce văd depinde de ceea ce mă face să reflectez asupra condiției umane și a sensului existenței.

Leadership: Poţi să găseşti o conexiune emoțională sau spirituală cu un anumit moment din spectrul viziunii tale, dacă ești mișcat de imagini futuriste care îți traversează conștiința?

Într-o scenă memorabilă din filmul "Terminator 2", John Connor încearcă să învețe Terminatul (T-800) să fie mai "uman". John îi spune să nu omoare oameni și încearcă să îl învețe expresii și comportamente umane. Practic, el încearcă să transforme o mașină în ceva care poate aprecia valoarea vieții și complexitatea emoțiilor umane. Acest moment ridică întrebarea dacă o mașină, indiferent cât de avansată, poate învăța cu adevărat să fie umană. Este o reflecție asupra naturii umanității și a ceea ce ne face cu adevărat umani.

La fel, în artă se explorează conceptul de umanitate și căutarea identității. În cazul unui artist de talia mea, care se plimbă pe malul mării încercând să imortalizeze fiecare răsărit şi fiecare apus, încerc să înțeleg identitatea umană care mă defineşte. Contemplând apusurile și răsăriturile, care sunt adesea văzute ca simboluri ale naturii ciclice a vieții, am ajuns la concluzia că ceea ce mă face uman este capacitatea de a mă conecta cu natura și de a înțelege ciclul vieții și al morții.

Într-un tablou, acest lucru ar fi redat printr-un soi de simbolism complex care captează esența umană și transcende limitele conștiinței obișnuite.

John Connor era un om care încerca să învețe o mașină. În cazul meu se conturează autodescoperirea artistului care încearcă să se înțeleagă pe sine, fie că este vorba de emoții,

conștiință, creativitate sau capacitatea de a se conecta cu natura, cu lumea din jur. Automat, scena din "Terminator 2" m-a pus în fața ideii că îmi pot transmite și exprima emoțiile sub aspectele unui tablou, privind lucrurile din jur prin acțiunile exterioare ale unui cyborg care învață să fie uman.

Leadership: Poți să-ți exprimi emoțiile și experiențele sub aspectele unui tablou, privind lucrurile din jur prin acțiunile exterioare ale unui cyborg care dezvoltă empatie, la fel cum un artist pictează?

Aşadar, artistul care se plimbă pe malul mării este deja uman, căutând prin intermediul artei să înțeleagă esențialul naturii și al umanității sale. El poate folosi timpul petrecut contemplând apusurile și răsăriturile pentru a găsi inspirație și înțeles, conectându-se cu sinele său și cu întregul univers surprins în imagini care evocă trăiri profunde. În timpul acestui proces, am putut examina întrebări asemănătoare cu cele pe care John Connor le-a ridicat: „Ce mă face cu adevărat uman?" sau „Ce contează cel mai mult pentru umanitate?"

Elementul esențial pentru mine în relația cu John Connor este dialogul continuu între complexitatea umană și simplitatea organică a naturii, un dialog care mă modelează și mă redefinește în mod constant. Ce contează cel mai mult pentru mine în raport cu binele comun și empatia față de ceilalți este modul în care arta poate servi ca un limbaj universal pentru înțelegere și coeziune. Este imaginea prin care arta mă ajută să comunic valori, emoții și perspective care ar putea aduce oamenii mai aproape unii de alții.

Arta este o modalitate de a transmite și exprima frumusețea, emoțiile și experiențele de abordare a frumuseții sub toate aspectele ei, privind lucrurile din jur, oamenii, fenomenele și acțiunile exterioare, a căror proporție corespunzătoare garantează ilustrarea perfectă a realității. Și, într-adevăr, un artist ca mine este mai mult decât un pictor care captează aceste aspecte în imagini, creând tablouri care pot provoca o gamă largă de simțiri și reacții în privitor. Este un potenţiator al frumuseții văzută cu ochii minții, prin intermediul simțirii izvorâte din tovărășia cu elementele naturii ce pulsează alert, în acorduri fine de Renaissance, chiar dincolo de rigorile realității.

Să excelez ca pictor într-un tablou al emoțiilor și culorilor înseamnă să capturez complexitatea și diversitatea experienței umane, așa cum Terminator-ul încearcă să înțeleagă și să asimileze complexitatea comportamentului și emoțiilor umane. Este un efort de a transcende limitele mecanice sau tehnice pentru a atinge un nivel mai profund de înțelegere și sensibilitate. Iar apusul și răsăritul sunt martorii trecerii timpului, imagini efemere ce surprind complexitatea și frumusețea existenței. Aceste doua spectacole naturale stau ca puncte de reper într-o lume în constantă schimbare, oferindu-mi oportunitatea de a reflecta asupra semnificației mele în cadrul acestui vast tabloul al vieții

În acest context, leadershipul implică transformarea unei mașini fără sentimente într-o entitate capabilă de empatie și conștientizare a naturii umane, ceea ce corespunde ideii de trecere de la un statut robotic la unul uman. Ilustrează potențialul uman de a evolua și de a deveni mai empatic, prin conștientizarea și dezvoltarea capacității de a simți și de a înțelege mai profund trăirile și nevoile celor din jur, inclusiv relația cu tehnologia avansată.

Așadar leadershipul, în contextul inteligenței artificiale, vizează latura umană a unui artist care, navigând la intersecția dintre tehnologie și creativitate, reușește să ilustreze dualitatea vieții ca un fel de dans al luminii și umbrelor, în care fiecare notă de tehnologie și fiecare nuanță de umanitate se completează reciproc pentru a crea o armonie complexă și fascinantă într-o operă de artă.

Aşadar, marea enigmă umană din perspectiva unui artist este legată de interacțiunea dintre

tehnologie și umanitate, mai ales felul cum aceasta influențează percepția și expresia artistică. În acest sens, artistul ar putea fi fascinat de dualitatea dintre mașină și om, similar cu dualitatea dintre lumină și întuneric prezente în apusuri și răsărituri.

Ochii reflectă privirea ce explorează căutarea identității atunci când încerc să transform ceea ce văd într-o experiență profundă și personală. În acest sens, pictorul ar putea explora întrebări precum: "Ce mă definește ca ființă umană atunci când tehnologia devine tot mai sofisticată și intră în sfera mea emoțională?", sau "Cum pot reda în arta mea această complexitate a naturii umane, prinsă între biologie și tehnologie?"

Prin artă, un pictor poate încerca să dezlege această enigmă, asemenea modului în care John Connor încearcă să umanizeze o mașină de război. Tablourile cu apusuri și răsărituri ar putea simboliza trăirile complexe, conflictele interioare și frumusețea inerentă a condiției umane.

Mereu şi oriunde, apusul și răsăritul sunt metafore vizuale pentru ciclul vieții și transformarea continuă a emoţiei și conștiinței umane. Ei reprezintă momente de tranziție, puncte de răscruce unde lumina și întunericul, cunoașterea și ignoranța, se întâlnesc și se întrepătrund. Ca pictor, redarea acestor momente înseamnă să surprind esența a ceea ce înseamnă să fiu uman, cu toate complexitățile și contradicțiile care vin odată cu aceasta.

Ochii spiritului se deschid către o realitate mai vastă

On August 21, 2024

Cultivarea conștientizării impactului tău asupra lumii necesită o practică constantă a empatiei și reflexiei pe care o facilitează arta.

Așa rămâne artistul, un călător între fundaluri de realitate și vis, un alchimist al propriei soarte care își împarte existența între două lumi: cea vizibilă și cea invizibilă. În atelierul său, unde lumina se strecoară printre geamurile prăfuite, el scrie povestea eternității, și o scrie ca și când ar descifra tainele universului, căutând un răspuns care poate că nu va veni niciodată. Dar speranța și credința în divin îl țin ancorat în realitatea transcendentă, scufundat într-un dialog mistic cu universul, într-o iubire nesfârșită și adorație pentru viața în care L-a văzut pe Dumnezeu.

Perspectiva se extinde, cuprinzând simultan microcosmosul și macrocosmosul. Căci în toate viețile sale, trăite prin cunoașterea purificatoare a „întâmplătorului", cea mai profundă transformare nu a venit când a despicat atomul sau când a invocat spiritele, ci în momentul când a făcut pact sacru cu acel Opus al infinitului care precede Opera Exclusivă a lui Dumnezeu.

A fost o viață de taină și de revelație, în care misterele cele mai adânci ale sufletului său au fost iluminate, refăcute în retorta conștiinței elevate, printr-un soi de "Uriyaanna Olaul Tiharonsus", revelație a acelui plan spiritual al lumii nevăzute. Tot mereu, asemenea unor ferestre cosmice, ochii spiritului se deschid către o realitate mai vastă și mai profundă, conform legilor divine ale creației, atunci când conștiința transcende limitele egoului.

Leadership: În ce măsură simți că sufletul tău nu doar privește, ci se și recunoaște în fiecare aspect al creației, așa încât această recunoaștere să devină o formă de uniune mistică cu divinul?

Până la urmă, am ajuns la concluzia că arta mea este un extras din Optica Fizică: *"Când privim într-o oglindă, creierul nostru interpretează ceea ce vede ca şi cum ar avea de-a face cu un univers real, adică rotind la nivel mental ceea ce vede cu 180 de grade în jurul axei Y. Ceea ce e aproape corect, cu excepţia faptului că al nostru creier nu ştie să ţină seama de faptul că lucrează cu o imagine inversată pe axa Z. Dacă ar şti şi acest lucru, ar trebui să efectueze, tot mental, o inversiune a imaginii rotite pe axa X. Rezultatul ar fi readucerea imaginii din oglindă (univers imaginar) în universul real."*

Așa este. Cu cât privesc mai intens în oglinda sufletului meu, cu atât mai complex devine procesul mental de interpretare a realității, riscând să confund universul imaginar cu cel real. Această privire intensă în oglinda sufletului nu este doar un act de introspecție, aferent conștiinței individuale, ci și o poartă către percepția divină a creației, modelată după modelul perfecțiunii cosmice. Căci pe măsură ce adâncesc această contemplare, vizând acea uniune mistică cu divinul, ochii mi se transformă în adevărate ferestre cosmice care facilitează transcenderea granițelor dintre observator și observat. Prin ele, sufletul nu doar privește, ci se și recunoaște în fiecare aspect al creației lui Dumnezeu.

Iar dacă ochii devin ferestre prin care divinul contemplă creația și se recunoaște în ea, cu trimitere spre esența primordială a conștiinței, atunci întreaga existență devine o oglindă a divinului. De aceea privesc în oglinda sufletului meu, de aceea scrutez adâncurile propriei ființe, pentru că văd un univers în expansiune, o pânză cosmică pe care timpul curge fluid ca în tablourile lui Dali. Fie spus, simt cum fiecare bătaie a inimii mele pictează o nouă nuanță a existenței, o realitate care se îndoaie și se contorsionează sub greutatea înțelegerii divine.

Mă întreb, oare sunt eu instrumentul prin care Dumnezeu își manifestă creativitatea infinită?

Leadership: Te pregătești să transpui inefabilul în tangibil prin intermediul artei tale, acceptând inevitabilitatea destinului care te poziționează ca un mediator între divin și material?

În fiecare linie pe care o trasez, descopăr ecouri ale unor vieți trăite și încă netrăite. Astfel, simt cum conștiința mea se extinde dincolo de granițele obișnuite, atingând sfere ale creației pe care mintea mea încă nu le poate cuprinde pe deplin. Mă întreb cum pot eu, o ființă atât de măruntă, să fiu purtătorul unor viziuni atât de vaste? Cum pot eu, dincolo de limitările umane, să dau viață unei picturi care reflectă divinul în toată splendoarea sa? Cum să trăiesc opera sensibilă a unei mărturisiri de sinceritate îndreptată spre esența universului creator?

Albul dominant din creațiile mele viitoare mă cheamă ca o promisiune a infinitului, a potențialului nemărginit, neavând alt sens decât cel pe care îl constituie însăși inspirația divină. Dar odată cu această chemare, pe care atât de des o invoc, şi pe care însăși arta o cere, simt și o teamă subtilă crescând în mine, un soi de anxietate creatoare, *una especie de vértigo de infinitas posibilidades*. Oare voi putea să dau formă acestui potențial copleșitor? Cum voi putea să transpun inefabilul în tangibil? Sau mă voi pierde în imensitatea propriei mele viziuni?

Ochii artistului devin instrumente de traducere a viziunilor intangibile în forme vizibile. Astfel, mă simt simultan creator și creație, un vas fragil pentru idei divine, din care se revarsă frumusețea universului. Mai mult decât atât, încerc să-mi păstrez echilibrul pe această coardă întinsă între inspirație și teamă, între extazul creator și povara responsabilității artistice, ancorat fiind într-un dialog constant între trecut și prezent.

Și totuși, în acest vârtej al creației, mă întreb cine sunt eu cu adevărat: artistul sau opera de artă?

Actul creativ devine o punte între finit și infinit, unde artistul se confruntă cu vastitatea potențialului divin, încercând să transpună inefabilul în forme tangibile, într-o luptă continuă cu limitările umane și anxietatea generată de posibilitățile nelimitate.

Ochii spiritului se deschid către o realitate mai vastă atunci când conștiința transcende limitele percepției obișnuite. De fapt ochii spiritului, asemenea unor telescoape cosmice ultrasensibile, se deschid către o realitate mai vastă atunci când conștiința transcende limitele „universului observabil" al percepției obișnuite. În acest sens, arta înseamnă revelarea invizibilului, identificându-se cu esența profundă a existenței.

Esența profundă a existenței în acest context poate fi înțeleasă ca acea realitate fundamentală care transcende percepția obișnuită, revelându-se doar prin intermediul artei ca un fel de oglindă a universului interior.

Ochii sunt o mărturie autentică a demersului creator

On Martie 26, 2023

Ceea ce priveşti cu insistenţă este lucrul cu care îţi identifici emoţiile pe multiple planuri de percepţie.

Privesc chiar acum un desen suprarealist. El înfăţişează chipul unei femei, redat cu multă expresivitate în culori roșu, verde şi mov, provenit din imaginaţia unui artist care, în centrul privirii sale aruncate spontan asupra realităţii, a găsit o formă nouă de exprimare a viziunii simbolice. Aşadar desenul artistului, la simpla plăcere a privirii, exprimă printr-o viziune momentană şi subiectivă realitatea unei viziuni provenită din găsirea unei forme de imaginaţie care, fără a fi în pericol de a se epuiza vreodată, este atât, atât, atât de reală, de vie, actuală în lumina unei abordări suprarealiste.

O fi vorba despre o autoficțiune în forma unei explorări suprarealiste a memoriei? Și oare ea păstrează ceva intact din amintirile reiterate astfel? Iar dacă semnul pur al imaginii, mijlocul de elaborare şi comunicare a unei informaţii semnificante, este înălţat la rang de simbol prin imaginarul femeii, atunci lucrul cu care mă identific pe multiple planuri de percepţie (mai ales cele de referinţă metaforică), este o porţiune a lumii reale susceptibilă să fie asimilabilă în numele unei continuităţi revelaţionate pe care rigoarea stilistică o reclamă.

Mai întâi, personalitatea mea superioară se reflectă pe planul realității simbolice, într-o succesiune nedeterminată a altor lumi, fără amintirea celei anterioare. Chipul femeii seamănă mult cu un soi de Gioconda a timpurilor postmoderne, total diferită de original, dar asemănătoare datorită ochilor care te privesc din orice unghi. Iar pe al doilea plan dăinuie amintirea apriorică a unei senzaţii de beatitudine, apropiere sufletească și sentimentul de a fi ceva special, ca rezultat al transpunerii unei senzaţii de iluzie, mister şi energie metafizică, pe planul unei alte senzaţii, de naturaleţe şi dezinvoltură captivantă.

Leadership: Lucrul la care îţi concentrezi atenţia poate fi perceput printr-o reprezentare vizuală care este reală atâta timp cât este asumată în imaginarul unei lumi "de dincolo" de tine?

Așadar, condiția necesară sublimului în artă nu este absența formei de cunoaştere (sensibilă) a imaginii focalizate în lentila ochiului, așa cum este ea percepută de un creator care se aruncă pur şi simplu, în deplină siguranță, pe aripile lucrurilor pe care singur le-a clădit. Mai importantă este capacitatea de a cerne dintr-o privire adevărul de născocire, încât ochii înșiși să fie o mărturie autentică a demersului creator, dincolo de orice trecere de la observație la generalizare.

Chiar şi desenul mă priveşte cu insistenţă, la fel cum îl privesc eu, fiindcă are ochii ascunşi în memoria sufletului celui care l-a creat. Evident, există și acea născocire a arbitrarului din care emană în mod vizibil diversitatea tematică, noi vibrații ale sufletului sensibil, mai ales lumina unei noi rațiuni, datorită acțiunii eterne a actului de cunoaștere absolut. În acest caz, ochiul activ și-a făcut datoria de traducător corect al realității și, fiind investit de la natură cu un bogat spirit de observație, el nu poate trece cu vederea nici eroarea imensă legată de perceperea unor lucruri inexistente în realitate.

Aşa este. Încerc să intru cu sufletul într-un tablou natural şi totodată suprarealist, apaţinând unei realităţi revelatoare, descris în imaginarul unei amintiri alternative, sugerate, intuite, dar care nu se înţelege prea bine, fiindcă aduce în prim plan ideea că viitorul nu există decât pentru un prezent iluzoriu. Este ca şi când aş investiga misterele unei lumi aflate „pe ultima sută de metri", aproape gata să fie percepută cu ochii sublimului ca un fel de *Anonarona*

Restys Artomodus, trăirea prin reprezentare artistică, o deschidere în faţa misterului autocunoaşterii şi a posibilităţii de a trăi în lumina unei cunoaşteri superioare.

Leadership: Reuşeşti să redai o imagine de sine fidelă unei realităţi arhetipale, fie ea şi iluzorie, bazându-te pe considerentul că "plecând dintr-un loc, ajungi în altul"?

Da, privind desenul cu acea lumină a sufletului care străbate misterele unei capodopere, forma feminină aflată între simbol şi reprezentare, simt acea rigoare plăcută, a detaliului perfect finisat. Iar această rigoare ce face greu de admis ideea de "perfecţiune în utopie", prezentată într-o imagine de vis ca un fel de exercițiu integral pentru creier, devine un moment constructiv al formei de exprimare artistică, un raport de simetrie cu intenţia sinelui de a cunoaşte un ideal mai înalt de frumuseţe, punând în prim-plan ideea de reinterpretare şi reconstrucție a realităţii.

Şi tot privind desenul, absorbind din priviri frumuseţea chipului femeii, deci pornind în căutarea unui orizont mai larg de exprimare artistică, îmi amintesc ce spunea Alexandre Dumas în "Cei trei muschetari":

"Nimic nu face timpul să treacă atât de iute şi nimic nu scurtează calea ce o străbaţi, ca un gând care absoarbe întreaga fiinţă a celui care gândeşte. Toată suflarea înconjurătoare este aidoma unui somn, iar gândul aidoma unui vis. Mulţumită acestui gând care e una cu tine, timpul îşi pierde măsura şi spaţiul depărtările. Pleci dintr-un loc, ajungi în altul, atâta tot. Din întreg drumul făcut nu-ţi rămâne în minte nimic altceva decât o ceaţă haotică, în care se şterg mii de întruchipări nelămurite: privelişti şi amintiri."

Şi uite de aia mă atrage desenul, diferit de alte întruchipări nelămurite: fiindcă atunci când privesc chipul femeii, blând, tot numai un zâmbet, cu ochi care tratează sensibilitatea dincolo de o undă de timiditate, trăiesc fiecare secundă ca pe un miracol. Oricum aş privi chipul femeii, ca un fel de pătrundere în adâncul unui spaţiu necunoscut, simt în oricare din privirile ei faptul că ea dăruieşte totul pentru adâncimea orizontului simbolic. Şi dacă m-aş încumeta să o înţeleg mai bine, aşa cum a încercat artistul s-o redea în realitatea lui, şi dacă ea ar putea să-şi mărturisească gândurile, ar spune doar atât: "Ochii care mă privesc sunt ochii care oglindesc frumuseţea creaţiei divine."

În leadership, la fel ca şi în artă, este importantă abilitatea de a vedea un lucru care te face să te gândeşti la ceva, dincolo de impresia pe care lucrul însuşi o face asupra simţurilor tale.

Ochii sunt o mărturie autentică a demersului creator fiindcă surprind două realităţi care se intersectează mereu: o realitate care marchează străfundurile sufletului privitorului, percepută deci cu ajutorul simţurilor, trecută prin sensibilitate. Şi o realitate care, tocmai pentru că utilizează simbolul, comparaţia, deseori abstractul, are darul de a purifica și de a înălța spiritual privitorul. Să nu uităm că actul creaţiei înseamnă, mai întâi de toate, transpunerea sinelui viitor în sinele din prezent.

Încearcă să te transpui în ceea ce simţi când priveşti un desen şi identifică-te cu aceste trăiri. Poţi?

Ochii surprind momente care devin puncte de cotitură în reflecția personală

On Noiembrie 18, 2024

Focalizarea asupra unui gest aparent minor poate dezvălui umbrele ascunse ale conștiinței, mai ales dacă luminile și umbrele pe care ochii le surprind contribuie la conturarea esenței reale a lumii.

În căutarea victoriei absolute există momente când destinul îți așează în cale tot felul de încercări ce transcend performanța sportivă, transformând cursa într-o oglindă a propriei conștiințe. Privesc către orizontul muntelui în timp ce drama morală se desfășoară în fața ochilor mei. În liniștea dimineții, observ cum un alt alergător, unul dintre cei mai admirați pentru performanțele sale uluitoare, își injectează ceva în coapsă, ascuns după o mașină în parcarea semi-pustie. Nu știu despre ce este vorba, dar șocul descoperirii acestui fapt îmi îngheață respirația, transformând aerul rece al muntelui într-o povară greu de dus.

Era ca și cum întregul univers se concentrase într-un moment de claritate dureroasă, un soi de „Aieaasid Ymphiaedrese", o revelație morală ce depășea granițele normalului acceptat. Imaginea acestui sportiv-lumină, devenit deodată umbră, trezește în mine un vârtej de emoții contradictorii. Pe de o parte, aparențele pot fi înșelătoare; pe de altă parte, mă gândesc că nu știu ce probleme de sănătate ar putea avea. Poate că este o procedură medicală necesară, legată de diabet sau alte afecțiuni. Cu toate acestea, nu pot să nu mă întreb dacă nu cumva este vorba de un consum ilegal de steroizi. Privesc mai apoi cum își aranjează echipamentul cu gesturi precise, aparent netulburat de greutatea secretului său întunecat. Nu știu dacă e bine sau rău; spun doar că nu m-am așteptat la un astfel de moment.

Instantaneu, în sufletul meu se naște un nou cuvânt: „veridicar" – cel ce poartă povara adevărului nerostit, asemenea unui gardian al eticii în sport care veghează în tăcere. Fiind relativ aproape de el, devenit martor involuntar al acestei scene, simt cum responsabilitatea acestui rol proaspăt descoperit îmi apasă umerii cu greutatea sa morală. Înțeleg că, în sport, ești obligat să iei vitamine și alte suplimente, deoarece solicitarea fizică montană este extrem de intensă de fiecare dată când concurezi, în încercarea de a-ți depăși limitele. Este, într-adevăr, indicat să te suplimentezi corespunzător, dar mai e și vorba aia veche: "măsură după măsură".

Leadership: Cum transformi momentul în care descoperi adevărul dureros într-o oportunitate de a demonstra că integritatea și compasiunea pot coexista în spiritul competiției autentice?

Fiecare gest neobservat al altora poate deveni un catalizator pentru introspecție. Mai ales că dincolo de orice aparență stă un adevăr ascuns. Spun asta în condițiile în care conștiința morală îmi ghidează pașii, deciziile, gândurile, printr-un fel de înțelegere tacită, fără a recurge la judecăți pripite. Până la urmă, este și asta un soi de provocare etică, un test al caracterului care mă face să mă întreb unde se află granița dintre dreptate și compasiune. Această dilemă morală îmi amintește de un pasaj tulburător din Crimă și Pedeapsă al lui Dostoievski:

„Nu există situație mai chinuitoare decât atunci când un om moral descoperă singurul adevăr valabil pentru el, și anume că e nevoit să facă rău ca să producă binele. Întreaga lume devine atunci o problemă. Trebuie să fii foarte puternic și foarte integru ca să nu cedezi tentației de a face răul mai mic pentru a evita răul mai mare."

Cuvintele acestea par să prindă viață în fața ochilor mei, iluminând calea către o înțelegere mai profundă. Deși, încă mă întreb dacă nu cumva judec prea aspru. Nu, nu e vorba doar despre ceea ce ochii mei surprind în momente neprevăzute, așa încât să devină martori

tăcuți, așa zis neimplicați, indiferenți, neutri. Ci, este vorba despre cum pot să transform înțelegerea morală, astfel încât ochii să navigheze ușor printre complexitatea întâmplărilor bizare, știind că acțiunile necugetate pot distruge destine, chiar dacă constituie pe moment un stimulent artificial curselor montane. Desigur, oglinda conștiinței reflectă mai bine decât orice podium adevărata valoare a omului, dar și a victoriei obținute (într-un fel sau altul).

Încă o dată, simt cum înțelepciunea ancestrală a muntelui îmi șoptește: „La montagna non tradisce mai" – muntele nu trădează niciodată. Doar noi, muritorii, suntem prinși constant între loialități și principii contradictorii.

Leadership: În momentele când porți singur povara unui adevăr ce poate schimba perspectivele competitorilor, cum păstrezi echilibrul între dreptate și compasiune?

En el silencio del amanecer, pașii mă poartă spre umbra alergătorului străpuns de intensitatea vederii mele. Privirea lui întâlnește ochii mei, considerându-i martori, și, pentru o fracțiune de secundă, vălul iluziei supreme se ridică între noi. Este un fel de joc mistic al destinului, unde fiecare mișcare ar putea schimba traiectoria înțelegerii de pe planul material pe planul unei revelații.

Această întâlnire a ochilor îmi amintește de o poveste veche japoneză despre un samurai care, descoperind că maestrul său folosea tehnici interzise, a ales să-i ofere șansa de a se retrage cu onoare, în loc să-l denunțe public. Maestrul, impresionat de compasiunea discipolului, și-a recunoscut greșeala și a devenit ulterior un profesor al eticii în arte marțiale. Categoric, orice privire aruncată în jur poate descoperi o poveste ce sfidează aparențele, unele adevăruri ascunse invitându-ne să reflectăm asupra limitelor dintre judecată și compasiune.

Practic, universul îmi oferă aceeași alegere acum. Prin vocea caldă dar fermă, îi împărtășesc alergătorului ce am văzut și, mai important, ce simt. „E totul ok? Te pot ajuta cu ceva?" Nu-l acuz, nu-l judec – îi ofer o punte spre reabilitare, o cale de întoarcere la esența pură a sportului. Poate am înțeles greșit. Căci dincolo de aparențe, fiecare persoană poartă povara unor lupte invizibile, iar contactul vizual cu o acțiune ambiguă poate transforma percepția asupra persoanei respective.

Leadership: Cum poate un simplu gest ascuns să devină poarta către o înțelegere mai profundă a naturii umane în contextul presiunii competitive, simultan cu responsabilitatea de a proteja valorile propriului sine spiritual?

Tainele echilibrului suprem se manifestă în modurile cele mai neașteptate, nu-i așa? În timpul discuției noastre, observ cum rigiditatea din postura lui se topește treptat. Lacrimi silențioase îi brăzdează obrajii în timp ce îmi dezvăluie presiunea constantă sub care a trăit, teama de a nu dezamăgi, obsesia performanței cu orice preț. Era vorba de suplimente cu efect rapid de calmare a durerilor musculare, ca urmare a unor afecțiuni ale coloanei vertebrale, nu altceva. Mai exact, el își administrase o soluție injectabilă, „Neuromultivit" de la Lannacher, care conține în principal trei vitamine din complexul de vitamine B: vitaminele B1, B6 și B12. Mi-a arătat cutia cu fiole și am reținut denumirea.

Ceea ce ochii observă este uneori doar începutul unei descoperiri mai profunde. Contemplând această transformare, înțeleg că victoria supremă nu se măsoară în medalii sau recorduri. Se măsoară în momentele când alegem să fim umani, când spunem adevărul, când întindem o mână celui căzut, când oferim o șansă la reabilitare morală sau când alegem să înțelegem în loc să judecăm. Acest moment devine nu doar o lecție despre sport, ci o lecție despre viață însăși.

Privind spre piscurile munților ce ne înconjoară, realizez că aici, în acest spațiu sacru al naturii, s-a născut ceva mai valoros decât orice trofeu – s-a născut înțelegerea că adevărata măreție stă în capacitatea de a vedea dincolo de aparențe și de a alege calea compasiunii.

Leadershipul se manifestă prin abilitatea de a transforma momentele de criză în oportunități de creștere colectivă, unde victoria nu mai înseamnă să fii primul, ci să fii integru și să inspiri transformarea pozitivă în ceilalți.

Cele mai importante două valori ale sinelui spiritual sunt: integritatea și compasiunea.

Ochii surprind momente ce devin puncte de cotitură în reflecția personală, mai ales atunci când observi suferința nerostită, din care decurge nevoia de empatie autentică. Când adevărul devine o povară, tu cum alegi între tăcere și dreptate?

Răspunsul se află în acea zonă subtilă unde compasiunea întâlnește principiile, unde înțelegem că fiecare suflet poartă propriile lupte. Este momentul când realizăm că cel mai mare act de curaj nu este să arăți cu degetul greșeala altuia, ci să îi oferi sprijinul necesar ca să-și regăsească drumul către autenticitate.

Ochii urmează întotdeauna chemarea vederii

On Ianuarie 16, 2023

Cu cât vezi mai departe, cu atât priveşti mai adânc în tine.

Arta este o reîntoarcere la natură, într-un mod autentic şi elegant, ca într-un fel de transă continuă în care simbolurile dansează în haosul lor prin intermediul unei imagini care îşi dezvăluie cu greu secretele, misterele. Chiar mai mult de atât, luând în considerare acel *Casenuvis Excertyy Abbasitual*, misterul și absolutul surprins într-o imagine de o uimitoare frumusețe, arta este o reîntoarcere la emoţie în comunicarea unui mesaj care surprinde mereu şi mereu: "Am parte de o reîntoarcere la esenţa a ceea ce sunt: jumătate om, jumătate spirit".

Nimeni nu m-ar crede, dar mi-am recunoscut jumătatea artistică privind în largul Mării Negre, la început sau la sfârşit de zi, neştiind unde se termină cerul şi unde începe marea. De pildă, priveam totul cu măsura ochiului care nu-şi schimbă imaginea de pe retină, care nu se lasă învins de rutina unei dimineţi perfecte sau de condiţiile de luminozitate extrem de redusă, corespunzătoare unei nopţi fără lună pe cer. Şi, tot de atâtea ori, mă simţeam ca într-un film derulat invers, cum mă ajung din urmă trăiri pierdute…

Şi dacă mă voi întoarce aici, vară de vară, de fiecare dată când soarele îşi trimite razele arzătoare de pe bolta cerului, şi dacă niciodată nu îmi voi aminti de mine altfel decât absorbind tot farmecul romantismului în lumina unei viziuni fără limite, asta se datorează faptului că un orizont al necuprinderii este mereu activ aici, în contextul relaţionării om-natură. Iar în contextul dorinţei şi pasiunii, nimic nu este mai dătător de emoţii ca realismul viguros al imaginii care se revelează prin ea însăşi. Cei ce vor dori să descopere acest orizont în ei înşişi sunt bineveniţi alături de mine.

Leadership: Creaţia ta poate fi tratată ca un fel de meta-imagine – imagine a unei imagini, în aşa măsură încât aria ta vizuală să reconstituie permanenţa unei trăiri abordată la modul superior?

Privesc, colorez imagini, şi nu-mi ajunge. Nisipul este purtat la mare distanţă de ţărm într-un orizont al creaţiei în care observaţia directă şi procesarea intelectuală sunt concomitente şi inseparabile, ca un fel de împuternicire a văzului de a cuprinde nu doar un spaţiu cât mai larg, ci şi un timp al vieții vibrânde și trăite aventuros. Valurile întotdeauna îţi oferă privelişti măreţe care îţi încântă ochiul şi îţi poetizează simţurile, iar vântul şi valurile sunt întotdeauna de partea navigatorilor pricepuţi.

Pentru a cuantifica impactul relaţiei dintre mare şi nisip asupra influenţei pe care direcţia mea vizuală o are asupra artei de a activa emoţii, voi lua în considerare punctul de vedere al unui personaj din opera lui H.G.Wells:

"Prin cap îmi mişunau mii de gânduri nebuloase, fără noimă. Repetam iarăşi în minte experienţa. Cu creierii înfierbântaţi, visam că lucrurile din jurul meu se destramă, se pierd în ceaţă, se fac nevăzute, până când totul, chiar şi pământul de sub picioare, începe să se mistuie. Un singur gând îmi sălăşluia în creier: opera mea trebuie dusă până la capăt ! Eram încă stăpânit de ideea mea fixă. Şi trebuia s-o fac curând."

În acelaşi fel îmi reflectez trăirile şi îmi exprim recunoştinţa faţă de reprezentarea vizuală a celui mai special proiect din viața mea de până acum: să mă înscriu voit pe panta unei eterne reîntoarceri, în curba unei repetiţii niciodată la fel, în bucla unui prezent etern, mereu nou şi perpetuu acelaşi. Şi chiar dacă lucrurile din jurul meu se destramă, se pierd în ceaţă, se

fac nevăzute, dorul (consecinţa memoriei afective) rămâne viu pentru totdeauna în mine. Rămâne treaz, mereu crescând.

Leadership: Luând ca model o veritabilă tema artistică, poţi să-ţi construieşti o imagine coerentă, stabilă şi consistentă, aşa cum apare ea cuprinsă între două infinituri?

Marea se întinde tot mai departe, şi mai departe, până se apropie de consistenţa unui nisip umed din apropierea unui ţărm îndepărtat şi de neatins. Mai presus de atât, luând ca model o veritabilă tema artistică, *Un brandello in un universo sconfinato*, eu însumi încep să fac parte din imaginea mării, aşa cum apare ea cuprinsă între două infinituri: "sublimul la superlativ" şi "o prelungire a emoţiilor dincolo de timp".

Cred că în artă, finitul se poate reprezenta prin intermediul unei vederi îndepărtate de real, dar dispusă la timpul prezent, prin aceea că el nu apare altfel decât fiind el însuși plăsmuit într-un mediu transparent al libertăţii depline a spiritului, în dimensiunea sublimului artistic, acolo unde nimic nu este trecător, ci rămâne veșnic în amintire.

Şi atunci când se-ntâmplă asta, când totul pare fascinant ca într-un tablou de vis, mă confrunt un fel de intensitate a imaginii mele interioare, un fel de pre-ştiinţă intuitivă a unei mesagerii fără mesageri. Inima îmi zvâcneşte cu putere. Îmi spun că nu are niciun rost să aştept mai mult timp într-un loc care pare încremenit în timp. Aşa că încerc să uit de mine, de mare, de nisip, de valuri, de briza care îmi mângâie obrajii și mă răcoreşte.

Uşor, uşor, îmi îndrept privirea în altă parte, dar ochii îmi cer cu insistenţă, inima îmi ordonă fără a-și lăsa sentimentele să iasă la suprafață: "Nu te îndepărta de ceea ce simţi. Nu poţi fugi de tine însuţi, lăsând în urma amintirile !"

Leadershipul survine în cazul în care imaginea care te inspiră şi care te va face să spui „Doaaaamneee ce mişto", te ajută să-ţi exprimi trăirile într-un mod creativ prin următorul raţionament: "cu cât vezi mai departe, cu atât priveşti mai adânc în tine."

Ochii urmează întotdeauna chemarea vederii atunci când eşti în căutarea unei imagini a permanenţei, a unei stranii trăiri ale unei conştiinţe artistice. Şi cum mă văd eu? Mă văd cu ochii unui pictor care transformă tot ce vede într-un tablou de poveste. De fapt, fiecare zi petrecută pe litoralul Marii Negre devine o amintire imortalizată într-un alt tablou, cu o altă poveste.

Ochii văd ceea ce culorile dictează

On Iunie 15, 2022

Ceea ce vezi în jur poate fi perceput ca o reacție artistică la emoţiile pe care le trăieşti cel mai des prin intermediul procesului de comparaţie între simţire şi condiţia de creator.

Ca instrument al reflecţiei şi al intuiţiei, în planul real al unei imagini metaforice care dezvăluie idei și sentimente, ochii nu pot nega faptul că orice formă artistică ieşită din comun reprezintă, la rându-i, întregul curs al artei în termenii schimbării modurilor de percepţie. Şi numai în măsura în care sunt relevante în cadrul picturii cele patru componente ale tabloului: coloritul, desenul, lumina şi clarobscurul, artistul va putea să realizeze o extindere reală a spaţiului de creaţie în afara reprezentării unor idei, sentimente sau situații diverse.

Toate acestea pot oricând să fie străbătute de-a lungul şi de-a latul, şi câteodată de-a curmezişul în forme şi în culori, luate calitativ izolat, înfăşurate în metafore şi simboluri. Din acest motiv nu pot să abandonez arta, hotărând să văd fiecare lucru din jur ca pe o teorie a culorii și a contrastului ce susține că „este ușor să pictezi mai strălucitor orice lucru când se află în bătaia soarelui", asta dacă nu cumva vreun semn sacru apărut neaşteptat pe cer îmi va face vulnerabilă percepţia asupra ceea ce se întâmplă în jurul meu.

Bineînţeles, pentru a scoate în evidenţă semnificaţia celor patru componente particulare ce stau la baza realizării oricărui tablou, concomitent cu reuniunea şi acţiunea lor comună într-un întreg atotcuprinzător, va trebui să indic pe scurt semnificaţia absolută a fiecăreia în parte. Desenul poate fi perceput ca o proiecţie a vederii artistului în spaţiu sau în plan. Coloritul este dat de intensitatea cu care se prezintă o formă, o construcţie reinterpretabilă sau o plăsmuire a imaginaţiei. Lumina arată realitatea într-un mod fabulos. Iar clarobscurul este contrastul între lumină și umbră.

Leadership: Poţi să oferi o imagine asupra modului în care să-şi îndeplineşti rolul de Creator, luând considerare faptul că tot ceea ce se află în conţinutul ei poate deveni la rându-i o formă sau esenţă?

A retopi în cadrul tabloului oricare din aceste componente, ca diferenţă de afişare a realităţii, în aşa fel încât ele să nu se excludă reciproc, deci atribuindu-le o importanţă particulară în aşa zisa "anatomie a cunoaşterii artistice", ar însemna practic să reprezint formele lucrurilor ca pe nişte modele de manifestare ale sufletului, nu ca pe nişte obiecte decorative, plutitoare în marea conştiinţei mele. Ele ar mai trebui să fie văzute cu totul independent de celelalte potențe ale naturii. În acelaşi timp, trebuie să iau în considerare faptul că tot ceea ce se află în conţinut poate deveni la rându-i o formă sau esenţă.

Da, tare dificil este să nimereşti culoare după culoare, din apropierea vederii care nu se manifestă în interiorul tău, şi să nu ratezi măcar o singură dată nuanţa potrivită. Mai dificil de atât este să pătrunzi în adâncul sufletului de artist, plin de mistere, şi să conştientizezi faptul că există o altă combinaţie de culori care suferă enorm dacă nu este scoasă în evidenţă în momentul în care ochii, plini de suferinţă, sesizează o oarecare lipsă de contrast în condiţii de lumină slabă. Aşadar, nu doar culorile, ci şi sufletul trebuie să treacă proba de foc a analizei, a observaţiei, a schimbării, a transformării.

Să fiu mai explicit. Conţinutul unei imagini capătă acea formă de "reprezentare a frumosului" atunci când el este afişat într-un tablou de mare frumuseţe cromatică, artistul focalizându-se asupra unui subiect ce nu se epuizează niciodată. În acelaşi timp, conţinutul imaginii poate să capete acea esenţă de o gravitate sfântă care pluteşte peste vraja aprigă a conştiinţei, atunci

când artistul reproduce cu convingere lumea spirituală, luând ca punct de reper cele mai sublime aspirații spre universalizarea trăirii frumosului. Un asemenea artist devine o fiinţă liberă, nefiind afectat în vreun fel de realitatea pe care o zămisleşte în creaţiile sale.

Leadership: Poţi să-ţi desăvârşeşti creaţia printr-o calitate a imaginii asemănătoare cu realitatea, conferind un bogat conţinut spiritual înclinaţiei tale naturale spre sensibilitate?

Ceea ce adesea văd apărând sau dispărând, şi care datorită caracterului trecător creează ideea de iluzie, nu are nimic de-a face cu realitatea însăşi, ci mai degrabă cu acele culori care provoacă suferinţă. Căci, ceea ce văd în majoritatea lucrurilor este doar o înlănţuire a cauzelor şi efectelor pe care culorile în special, le produc atunci când starea mea psihică şi emoţională nu poate opri suferinţa. Numaidecât, culoarea pune în valoare puterea sensibilităţii mele de a rezona la sinceritate, la generozitate, la iubire, în aşa fel încât miracolul acestei lumi să unească esenţa mea creatoare cu harul divin. Tu cum rezonezi cu minunile lumii?

De exemplu, văd o culoare care îmi place, dar nu reuşesc să redau în imagine (tablou) exact acea nuanţă care mi-a răscolit simţurile. Iar eu nu sunt Buddha, nu pot să urc până la originile suferinţei, apoi să parcurg drumul invers şi să arăt în final "Calea eliberării". Însă, dacă aş putea să introduc acea culoare într-o participare la natură divină, s-o compar cu triumful spiritului particular asupra celui universal, şi dacă aş putea să filtrez subtil lumina care determină culoarea percepută de ochi astfel încât să creez ambienţe uimitoare, atunci poate aş ajunge să-mi sporesc interesul pentru arta simultaneităţii care spiritual conferă iluminare.

Calitatea unei imagini depinde de intensitatea culorii dominante care rămâne neschimbată în timp. Dar culoarea nu este întotdeauna o eliberare de un sentiment negativ întâmplat în realitate, ci poate fi şi o alternativă la negru. Trebuie s-o am viu în minte, în orice fel de combinaţie de nuanţe, concomitent cu ochii spiritului care nu trebuie orientaţi în altă direcţie (a naturii lucrurilor ce sunt folosite într-un întreg). Ba mai mult, trebuie să introduc această culoare în dimensiunea minimală a cuvântului izolat, ca într-o poezie enigmistică, încât să creez senzaţia de mistic şi ocult.

În procesul de formare a leadershipul trebuie să acceptăm realitatea pe care o înfăţişează ochiul de artist într-o imagine a cărei sensibilitate vibrează la chemarea harului divin.

Ochii văd ceea ce culorile dictează atunci când surprinzi plăcut o asemănare între stările tale emoţionale şi realitatea exterioară a lumii. Ceea ce vezi în jur poate fi perceput ca o reacție artistică la lumea în care trăieşti, cu menţiunea că realitatea este asociată cu capacitatea ochilor de a se focaliza exclusiv asupra creatorului de frumos aflat faţă în faţă cu divinitatea.

Ochii văd ceea ce sufletul e în stare să simtă

On Martie 31, 2023

Perspectiva din care priveşti îţi formează percepţia, iar percepţia îţi formează experienţa în relaţia cu elementul perceput.

Privesc un tablou agăţat pe un perete de rigips, într-o cameră albă, complet goală. Tot privindu-l după legi care parcă trancend optica, simt că tabloul mă priveşte cu aceeaşi expresie neclintită, prin ochii pictorului care l-a realizat demult, prin continuarea existenţei unui suflet care nu moare niciodată. Nu este formidabil? Tabloul însuşi mă priveşte printr-o afinitate de stil, prin emoţia căreia îi dau eu naştere, deci printr-un transfer specific ce se produce între artă şi privitor, printr-un adaos de însufleţire rară, neîngrădită, primită prin jocul pensulei, prin graţia culorilor, fapt ce dezvăluie identificarea mea cu o anumită realitate spirituală, de-a lungul unei clipe menită să dureze o eternitate.

Are ceva în plus faţă de orice altă creaţie artistică, o însufleţire aparte, o intensitate a culorilor de negăsit în viaţa obişnuită, o însufleţire care mă face „viu", chiar dacă eu, vizitatorul, sunt un oaspete neaşteptat. Privindu-l ca o fereastră către o altă lume, inspirat de un ochi care îşi desăvârşeşte vederea prin raportul dintre credibilitate şi incredibilitate într-o realitate hipnotică, în care există vis, există imaginație, simt cum ceva mă umple cu dulceața dorului de mărturisire. Aşa că spun mai departe ce simt.

Ştiu că n-o să-l mai văd niciodată, aşa că trebuie să-l văd bine acum, mai mult ca niciodată. O lume nouă se lasă descoperită şi invită la o călătorie dincolo de aparenţe, deschisă spre dimensiunea afectivă a existenței mele. Or această tendinţă înnoitoare surprinsă de ochii mei, izvorâtă din conştiinţa semnificaţiei unei imagini care se reflectă în percepția întregii mele vederi, reflectată la nesfârşit ca şi cum s-ar perpetua între oglinzi paralele, îmi asigură eliberarea de constrângerile unei vieţi cotidiene presupusă ca fiind prea rigidă.

Leadership: Poţi să-ţi descătuşezi emoţiile la vederea unui obiect de decor, încât să transformi un spaţiu neutru într-un spaţiu al potenţialităţii?

Şi uite aşa, încep să rezonez cu un obiect decorativ ce reîmprospătează un spaţiu aproape gol, steril şi rece. Ager la privire este omul care priveşte printr-un singur ochi (al sufletului) imaginea care îl înduioşează, îl hipnotizează printr-un "dincolo de real" şi îl transpune într-un vis ludic unde orice mister pare firesc. Cumva, un fond vizual îmi însoţeşte deplasările pe un tărâm al imaginaţiei unde orice este posibil, mai ales reciprocitatea între un subiect ce nu poate fi epuizat şi sensibilitatea unei suspendări temporare într-o clipă ce durează veşnic, pe fundalul reversibilităţii infinite dintre un obiect ce-şi face simţită prezenţa şi spaţiul de vizibilitate al artei.

Şi tot privind acest tablou special, aşa cum aş privi cu nedumerire o stea într-un vis care începe și se termină în același punct, simt că experimentez aceeaşi intimitate distantă precum eroina din romanul Exuvii, acel "te văd fără să mă vezi", derivat din nevoia de a evada dintr-o captivitate autoimpusă:

"Am avut senzaţia aia ciudată că mă privesc din afară aşa cum mă privesc într-un vis, crezând că sunt un fel de duh, un fel de aer lucid, diferit cu totul de cel care doarme într-un înveliş de carne. În văgăuni trupul se descoperă pe sine, dar aici, în acest spaţiul aproape gol, spaţiu lipsit de repere în care intră doar cel care învaţă să aleagă, sunt experimentate tehnici ale tăcerii, ale fugii de oameni. Aici nu povesteşte creierul, ci corpul care îşi aduce aminte, ascultând nemijlocit ideile acestuia."

Decorul înseamnă totul, acea intimitate autentică fără de care visul nu și-ar găsi pânza, cum nici cuvintele velă și nici sufletul viață. Prin ochii unui privitor intrus într-un spaţiu complet alb, tabloul poate fi perceput dintr-o perspectivă a devierii de la real. Dar exact asta este ceea ce face ca un artist să se apropie mai mult de artă: el izbuteşte să-şi descătuşeze emoţiile care l-au îmboldit să creeze, transformând un spaţiu neutru, banal, într-un spaţiu al potenţialităţii, un spaţiu al posibilităţilor nesfârşite de exprimare. Iar orice element singular din acest spaţiu este la început o iluzie, apoi emoţie, şi în final realitate.

Leadership: Poţi să reprezinţi un obiect în absoluitatea lui, extrăgându-l din temporalitate, încât să-l concepi separat de întreg?

Tot astfel, tabloul care trebuie să reprezinte un obiect sau altul în absoluitatea lui, extrăgându-l prin intermediul desenului din temporalitate, va fi conceput separat de întreg, cu gândul la experiența de viață câștigată pe un fond discret de culoare. Căci artistul își găsește expresia artistică evitând ceea ce este la vedere sau de prisos.

Iar atunci când trecutul se întrepătrunde cu prezentul continuu, în încercarea artistului de a-și găsi obsesia care să-l inspire să creeze, este foarte posibil ca minunata cale de comunicare cu universul exterior *Tarevissthesis*, să aibă funcția de "oglindire infinită într-un peisaj semi-transparent" care intensifică realismul spectacular aflat între tentațiile fantasticului și psihologismul de factură mistică.

De exemplu, în cazul unui autoportret, luând ca model însăși figura artistului, forța de expresie va fi mult mai mare, făcând să apară pregnant mai mult oasele decât micile cute ale pielii, iar tendoanele mușchilor (cele mai elastice țesuturi) vor ieși mai mult în evidență decât mușchii activi sau cei aflați în repaus. Și chiar dacă astfel se distinge frumusețea aproape în totalitate, pe baza raportului dintre văz și reacția la ceea ce vedem, atunci artistul reușește să scoată în evidență caracterul real, sau ascunsul surprinzător al omului la intersecția dintre experiență și experiment.

În și mai mare măsură, pentru reprezentarea ascunsului sufletesc din dosul unei figuri sobre, se vor lua în calcul toate faptele și acțiunile modelatorii intuite concomitent, extrase din temporalitate, evitând ceea ce este întâmplător și de prisos. Nimic nu trebuie să fie stânjenitor pentru reprezentarea unui asemenea chip, luând în considerare faptul că în fiecare parte a corpului omenesc se vădește sincer, că într-un splendid tablou, eroul unei fapte glorioase. Și, deci, trebuie să se intuiască prin văz, prin percepție, și prin intuiție, la ce faptă a slujit caracterul său, și cu ce temperament a fost înzestrat de la natură.

Arta participă la dezvoltarea leadershipului. Spun asta amintind că percepţia este ceea ce priveşti, iar perspectiva este locul de unde priveşti.

Ochii văd ceea ce sufletul e în stare să simtă atunci când eşti prins într-un spaţiu neutru în care chiar şi iluzia pe care crezi c-o trăieşti, devine realitate. Pentru că însuşi spaţiul acesta privat devine o proiecţie în sens identitar, un mod unic de manifestare a raporturilor pe care individul le stabileşte cu el însuşi. Simţi ceva oriunde eşti tu, cu tine însuţi. Iar orice lucru din jur, oricât de banal, devine semn al reflecţiei celuilalt Tu.

Cum bine spunea scriitorul Cătălin Manea: *"Perspectiva din care priveşti, îţi formează percepţia, iar percepţia îţi formează experienţa în relaţia cu elementul perceput."*

Ochii văd doar ceea ce le oferă vederea

On Iunie 20, 2022

Orice exercită o influență din exterior impune o anumită intensitate sensibilității din câmpul reflecției deschise.

M-am apropiat de mine însumi, mai mult ca de obicei, atunci când valurile oceanului s-au apropiat de ţărm devenind tot mai puţin adânci, arătându-se prietenoase. În spiritul unei binevenite transparenţe, am păşit cu picioarele goale în apa oceanului, domol, măsurat, fără ca nimeni să mă vadă, în ciuda faptului că reprezentam doar o fărâmă de nisip într-un spaţiu vast şi fără limite. Atente la ce-mi spuneam, valurile îmi auzeau parcă ecoul bătăilor inimii, cu aceeaşi acuitate a privirii unui vrăjitor care pătrunde tot mai adânc în fiinţa ta înainte de a te supune unui tratament de hipnoză.

Şi dacă m-am apropiat mai mult de mine însumi, fără să-mi trădez inima care-mi şoptea cu voce tremurătoare "acest vis îl ai doar o singură dată în viaţă", cu menţiunea că valurile mă priveau cu ochi limpezi, dar oarecum bănuitori, acest lucru se datora vederii impresionante pe care am dobândit-o asupra oceanului. Mi se părea că nu mai sunt atât de mic şi neînsemnat, precum un biet bob de nisip, ci că făceam în sfârşit parte dintr-un infinit magic ce nu se închide în mod circular asupra lui însuşi, ci se retrage din întinderea ontologică pentru a lăsa un loc fiinţei separate.

Atunci când privești către lume dintr-un univers infinit pe care îl ai înăuntrul tău totul se schimbă, căpătând o minunată nuanţă de simbol, un element de comunicare care exprimă conținuturi cu semnificație ideală.

Leadership: Creaţia ta poate să te reprezinte în vederea identificării impactului pe care îl are o realitate "independentă de subiectul cunoscător" asupra necesităţii conturării unui orizont aferent sensibilităţii?

Valurile oceanului nu se pot linişti fără căldura soarelui. Iar eu nu pot face parte dintr-un infinit al depărtărilor dacă nu mă recunosc a fi cauză şi principiu al unui univers infinit care conţine lumi nenumărate, filtrate prin lumina blândă a soarelui. Asta se întâmplă mai ales dacă nu creez impresia unui infinit care încape pe o foaie pe hârtie completată cu o variantă mai simplă de castel de nisip. Sensibilitatea îmi face cu ochiul în numele creaţiei, fiindcă este conexiunea mea cu infinitul.

Pe lângă asta, am realizat că oricât de multe valuri se vor legăna la picioarele mele, cu ochii aţintiţi spre cer de parcă le-ar fi frică să nu uite ceva din imensitatea lumii, oh, da, centrul lor tematic va trebui să fie în mod necesar încadrat la "nivelul ochiului" meu de artist care ştie filtreze în acelaşi timp lumina şi să creeze un efect misterios de alteritate, un fascinant efect de "tablou în tablou".

Să vă mai spun ceva. Dacă soarele este doar o pată luminoasă pe un fundal întunecat, după cum bine se știe, atunci valurile lipsite de luciu nu vor putea să impresioneze deloc prin calitatea unei imagini plăcute vederii, fiindcă tot frumosul în artă este produs cu ajutorul luminii. Deci, important este să recunoaștem că valurile nu pot furniza o orientare artistică bazată strict pe estetică dacă spațiul luminos este văzut pe un fundal întunecat (o opoziție rece), astfel neputând fi considerat drept un "fenomen original" prin care se produc culorile.

Leadership: Poţi să-ţi formezi în minte o imagine care urmează să fie transpusă într-un plan al alterităţii, şi în acelaşi timp să reprezinte actualizarea unei realităţi finalizate cu

un efect de "tablou în tablou"?

Mai departe. Valurile nu trebuie nicidecum imaginate ca având culori deja existente, albastru-verde conturându-se peste tot ca o zonă fertilă de creație, nici ca revelație a vreunei realități sacre, ci mai degrabă ca și conținut tematic prin producerea culorilor de îndată ce lumina soarelui este corelată în totalitate cu cerința numărul unu impusă de văz: orice exercită o influență din exterior impune o anumită intensitate sensibilității din câmpul reflecției deschise.

Prin urmare valurile și lumina, reprezentate în planul universalului ca unitate ideală de lungime a impulsului de creație care răzbate în ce este real, se vor comporta ca niște structuri fotosensibile în ochii privitorului, nu doar ca niște puncte de reflecție. Iar dacă forma artistică ia drept simbol unitatea ideală prin intermediul opoziției dintre lumină și clarobscur, în cadrul privirii, atunci arta se poate sluji de reprezentarea unei viziuni care să nu fie naivă în privința realității și care să nu mai stea sub primejdia solipsismului.

Iar cum pictura se bazează în mod special pe unitatea opusă, nu doar pe plăsmuirea multitudinii în cadrul unității, rezultă că tot ceea ce este schimbător la spațiul în care ochii își reflectă culoarea, împreună cu obiectele reprezentării lui, poate să constituie chiar diferența instituită de pictor între ideal și real. Bineînțeles că într-un tablou desăvârșit, pictat cu măiestrie în alegerea culorilor, valurile trebuie să aibă o semnificație în mod cu totul independent de raportul lumină-clarobscur, mai ales dacă luăm în considerare accepțiunea noțiunii de simbol.

În leadership, trebuie să cultivi o privire "distanţată" de tine însuţi pentru a înţelege mai bine că ceea ce îţi poate furniza un refresh mental şi emoţional este însăşi tendinţa de a te desprinde de cotidian, de ceea ce cunoşti.

Ochii văd doar ceea ce le oferă vederea ori de câte ori încerci să te transpui într-un pictor a cărui viziune priveşte, participativ, dincolo de toate aparenţele, la acea depărtare pe care o dă perspectiva într-un tablou.

Cât de frumoasă este depărtarea ! Şi cât de sublim este ea exprimată în creaţie ca pe o muză misterioasă, poetico quodam instinctu, în a cărei adoraţie tind să mă oglindesc uneori, excesiv...

Ochii văd doar ceea ce mintea este pregătită să înţeleagă

On Septembrie 22, 2021

Când faci o alegere, fă-o în aşa fel încât să împaci mintea cu sufletul, raţiunea cu înţelepciunea, spre regăsirea căii spre adevăratul tău SINE.

Iau masa cu prietenii înainte de mult așteptatul semimaraton montan care va avea loc mâine. Am gătit, am desfăcut sticla de vin, am savurat împreună o masă pe cinste. Vinul și-a făcut efectul, sunt vesel și lucid, după cum se vede. Mâine, deșteptarea la ora 7. Bineînțeles, până la ora 24:00 vom juca Catan.

Dar în timp ce toți așteaptă ziua de mâine, și în timp ce ziua de mâine se lasă așteptată, nimeni nu acordă atenție descoperii care stârnește atenția unei singure persoane: Myself. Toți așteaptă o luptă, o formă motivaţională a afirmării de sine, o competiţie care mie însă nu îmi mai stârnește nici urmă de interes. Concentrarea mea asupra obţinerii unui loc pe podium, fapt adiacent unui întreg care mă face să fiu puternic și să reușesc ceea ce îmi propun, trece pe locul doi atunci când la orizont nu se întrevede împăcarea sufletului cu mintea, împăcarea cu focul gloriei, cu pornirea spre maturizare, făcând acordul între ele.

Aşadar, alături de prietenii mei am descoperit un sens al vieţii, mai profund, nu acela de învingător, ci acela de "minunată împlinire", acea mulţumire pe care o simţi când eşti profund conectat la nişte minţi care în ciuda oricărui calcul pragmatic ştiu să păstreze coeziunea unui întreg deja existent şi îl individualizează faţă de alte grupuri. Bucuria pe care o simt fiindcă nu am ratat şansa să vorbesc lucruri interesante cu prietenii mei, este enormă.

Leadership: Poţi să-ţi împaci sufletul cu posibilitatea unei experienţe motrice insuficiente, fără să simţi retrospectiv dezamăgirea de a fi obţinut un succes trecător?

În acea seară liniştită alături de prietenii mei, dinainte de ziua concursului, am reflectat mai bine la diferenţa dintre un timp al emoţiei şi al performanţelor, şi un timp al transformării care vine dinlăuntrul ființei mele. La mijloc era acea trăire sărbătorească a unei sociabilităţi oneste, vioaie, flexibile, acea trăire a unei fericiri simple, odihnitoare, care întregeşte conştiinţa unui nou început de drum.

Alergatul nu este povestea destinului meu, nu este efectul unui destin predeterminat, ci doar o pasiune care accentuează sentimente ce încălzesc sufletul şi dau puteri noi. Mă gândesc că pornirea spre un destin mai bun nu trebuie să fie deturnată de o pasiune de moment care pe termen lung nu duce nicăieri, cel puţin din punct de vedere al unui sens durabil al vieții care deschide nenumărate posibilităţi. Chiar şi pornirea spre o grabă în gânduri poate fi dezavantajul ideii de destin individual care nu face corp comun cu destinul altora.

Nu-i aşa? Greu este să împaci sufletul cu mintea, iluziile cu realitatea, destinul cu propria conştiinţă. Şi, mai mult de atât, cred că este imposibil să iei decizii bune când ai aşteptări nerealiste. Cred că felul în care trăiești în corpul tău, felul cum îţi împaci sufletul cu lumea sunt lucruri care te recomandă, mult mai mult decât un titlu câştigat în virtutea unui cadru competițional ce dorește să atingă reperele unui succes trecător.

Leadership: Cum defineşti timpul devenirii pe care îl parcurge ființa ta, în sensul unui traseu individual al sinelui care se lărgește spre o cuprindere mai largă?

Relevant aici este faptul că am descoperit la un pahar de vin o misiune practic imposibilă.

Este echivalentul descoperirii pe care Alphonse Bertillon, ajutor de grefier la prefectura poliției din Paris, o făcea prin 1880. Fotografierea din profil și din față a tuturor oamenilor, pentru a crea pentru fiecare o identitate unică.

Mi-am permis să cred că un pahar de vin (Busuioacă de Bohotin) servit alături de prieteni este ca un fel de fotografie de neuitat. În timpul cursei de mâine, ne vom revedea. Nu ne vom întrece. Şi cred că acum, după masă, am câștigat deja prima bătălie.

Nu voi mai urmări cu interes experiențele altora pe munte, nici măcar a mea. Alergatul este o provocare, o fotografie care generează dinamism, tensiune. Și, ca un adept al gândirii exacte, nu voi întrebuința nici lupa, nici vreun reactiv chimic pentru a judeca urmele de pași ale celor din jurul meu.

Voi face altceva. Spre uimirea celorlalți, voi încerca să nu stârnesc mâine, la concurs, niciun interes. Prietenii mei vor rămâne fără răspuns. Voi fi un hoț: voi da înapoi ceea ce sunt dator să dau. Cu toate imperfecțiunile mele, voi da înapoi din experiența acumulată, căci nici eu nu m-am născut învățat.

Iar experiența mea în running este o mare descoperire: **întotdeauna un om care se compară cu ceilalți este un om care se confruntă cu sine însuși, fără să se poată opri din ceea ce face.** El nu mai este un om liber, este prizonierul ambiției de a fi deasupra tuturor.

Aşadar, voi da înapoi din ceea ce fac cu drag. Voi da înapoi ceea ce trece, ceea ce este de drept al meu, ceea ce mi s-a oferit prin natura circumstanțelor: voi renunţa la dorința de a fi învingător. Ceea ce va rămâne este experiența trăită, prietenia dintre alergători.

În consecinţă, timpul devenirii pe care îl va parcurge mâine ființa mea s-ar putea defini ca o înlănţuire de secvenţe unitare, o înlănţuire de mici schiţe cu decoruri, pe care le voi putea admira retrospectiv ca pe o poveste a maturizării depline, a asumării prezentului şi a descoperirii sinelui.

Un descoperitor este un om care capturează cu privirea o imagine șlefuită de suflet: clipa când îi pune pe ceilalți pe primul plan, fără să își reamintească că este un om puternic, mai mult și mai puternic decât toți.

Ochii văd doar ceea ce mintea este pregătită să înţeleagă atunci când lucrurile importante la care îţi concentrezi atenţia sunt trecute prin filtrul lucidităţii şi al maturităţii, odată cu înfrânarea ambiţiei de a-ţi depăşi limitele şi de a te vedea învingător.

Adevăratul învingător este alergăţorul care a înţeles că ceea ce contează cel mai mult la un concurs este să fii împăcat cu tine însuţi, să simţi că eşti alături de toţi ceilalţi, decât să fii în centrul atenţiei lor.

Ochii văd doar ceea ce sunt pregătiţi să vadă

On Septembrie 05, 2021

Un artist adevărat ştie să creeze o imagine care în depărtare pare identică cu cea din apropiere.

Un om aleargă pe plajă, dar nu așa aproape de mal. Soarele îi luminează calea, nisipul îi încălzește tălpile, marea nu-i răcorește picioarele. Omul acesta simte nisipul plin cu scoici, vede marea în dreapta lui, aude valurile, șuieratul vântului de vară, și presupun că trăiește cu prezentul în sfera lui de gânduri ambiţioase.

Marea este în același loc. Nisipul la fel, scoicile la fel. Dar urmele pașilor de alergător, oricât de apăsate ar fi, se șterg la fel de repede cum bate vântul. Și ce rămâne? Amintirea unei imagini lipsită de senzațional? Minunata împletire de elemente vii: pașii, nisipul, scoicile, marea, vântul, privirea ochilor îndreptată în zare? Sau, rămâne doar iluzia unui timp care curge într-un context de poveste?

Nu prea cred că putem să separăm individualul din acest întreg viu, fără a distruge coeziunea întregului. Deci, trebuie să considerăm altfel imaginea aceasta. Precum, că o măreață făptură se mișcă într-un fundal care e permanent același, dar felul în care este subliniat poate fi diferit, accepţiunile sale pot să difere, iar urmarea imediată poate să constea într-o prestaţie excepţională, de reînnoire și intrare într-o nouă etapă a vieții, care domină un spectacol de poveste.

În acelaşi timp trebuie să avem în vedere o simplă prestaţie a personalităţii izolate care şi-a consacrat întreaga existenţă slujirii unui moment de reflecţie prezent în interiorul unui flux temporal de energii spirituale care, fiind asimilate de suflet, schimbă structura sa.

Leadership: Perspectiva pe care o oferă creaţia ta are în vedere inducerea sentimentului de reînnoire a propriului sine, cu ajutorul unei experiențe fragmentare corespunzătoare unei imagini puternic controlată din exterior?

Alergarea pe care o practica omul respectiv ar putea să desemneze prilejul unui moment de graţie existenţială, în nici într-un caz un moment grav de rătăcire trupească. În acest caz individualul reprezintă o extensie, un fragment temporar apropiat de spiritul divin, un *Eritelynzta* (un exemplu viu de reînnoire a propriului sine), dar care oferă prilejul momentelor de rememorare a unor episoade din mărunta lui existenţă şi de reîntâlnire cu cel care a fost altădată.

Şi tot astfel trebuie să privim atributele unui subiect artistic capabil să provoace interes: printr-un soi de trăire intensă a clipei prezente, convertita într-o imagine sugestivă şi realistă. Este expresia unei percepţii subiective asupra timpului orientat spre eternitate prin permanenta comemorare a unui prezent care funcţionează din inerţia trecutului.

În alt caz, imaginea alergătorului, dezbătută în multe din formele înţelepciunii sistemice, este personificarea unei trăiri în dinamism propriu și transpunerea ei într-o dimensiune spirituală, fiindcă prin sport se poate răspunde cu bine greutăților și suferințelor cu care se confruntă omul.

Leadership: Ai învăţat să obţii atributele unui subiect artistic capabil să provoace interes: printr-un soi de trăire intensă a clipei prezente, convertită într-o imagine sugestivă şi

realistă?

Orice element trebuie cumva redimensionat, pus la superlativ în următoarea ecuație: ceea ce vine în întâmpinarea dinamismului este o suită de emoţii relevante ce evocă evenimente memorabile. Cine ce trăieşte prin ataşament cu obiectul dorinţei sau al gândurilor, a existat și va exista cu adevărat prin ceea ce inspiră. Cine trăieşte prin ceea ce face, trăieşte prin sine însuşi. Iar ceea ce se află în mişcare rămâne neschimbat într-un fundal care sugerează un spațiu nelimitat, edenic.

Data viitoare când priviți un om care aleargă pe plajă, considerați-l drept o posibilitate infinită de a forma noi relații cu alte elemente dintr-un alt fundal.

Alergătorul este semnificativ pentru că reprezintă un universal în planul particularului. Mai ales, fiindcă este aceeași făptură măreață care scrie acum aceste cuvinte nu doar pentru sine, ci pentru a crea o imagine care în depărtare pare identică cu cea din apropiere. Sunt sigur că aţi observat. Am fost mai întâi de toate un alergător care, mai apoi, a scris despre dânsul ca şi când ar fi avut în faţa ochilor imaginea unui alt om pe care trebuia să-l reprezinte într-un desen rapid.

La fel ca un artist, am devenit autorul unei creaţii unice, având la bază excelenta posibilitate de a fi ceea ce simt şi ceea ce gândesc, ca reacţie la ceea ce vine din exterior, fiind doar reacţia creierului la ceea ce ochii văd şi, uneori, e greu de înţeles de ce se întâmplă...

Aici, distingem doua atribute ale unui subiect artistic capabil să provoace interes: manifestarea unei maniere personale de a integra o nouă imagine în realitatea din jur, şi manifestarea unei mai mari receptivităţi faţă de interpretarea unei forme de alteritate pe care o numesc emfatic: „Celălalt".

În leadership, o imagine sugestivă şi realistă este echivalentul percepţiei unei dubluri a propriei tale fiinţe: una văzută printr-o cultură activă a mişcării, şi una văzută printr-un ochi exterior care îi urmăreşte orice mişcare.

Ochii văd doar ceea ce sunt pregătiţi să vadă atunci când artistul încearcă să surprindă o realitate care, privită din orice punct, s-ar dovedi mereu identică cu a lui. Un artist adevărat nu va încerca niciodată să surprindă depărtarea unui vis sau a unui orizont nou, fără să stăpânească mai întâi de toate realitatea din apropierea propriei fiinţe.

Ochii văd lumea, inima o simte până în adânc

On Septembrie 04, 2024

Arta este o formă de transpunere a încercărilor și victoriilor personale într-o imagine vizuală.

Pictorița stătea în fața unui șevalet vechi, al cărui lemn purta amprenta anilor trecuți. Era ca un fel de martor tăcut al vremurilor apuse. În sufletul ei, un mic chist, urma unei răni ușoare, prost cicatrizate, își făcea simțită prezența. Era o durere latentă, care ieșea la suprafață doar din când în când, când vreo întâmplare neașteptată o făcea să se lovească de amintiri. Nu căuta o soluție, nu voia vindecare. Acceptase acea durere ca pe o parte din sine, un reminder al unei povești trecute, pe care, poate, nici nu mai dorea să o uite.

Cu pensula în mână, cu ochii îndreptați spre pânza imaculată din fața ei, ea explorează contururile oricărei imperfecțiuni datorate în principal concentrării asupra durerii, nu asupra imaginii finale care urmează să prindă viață în tablou. Din când în când, printr-o mișcare ezitantă și neinspirată, constată că fundalul tabloului încă reverberează cu ecouri ale trecutului printr-un soi de „Inytatis Onnaccit Atensadeios", o durere ascunsă care persistă prin amintiri și emoții cutremurătoare. Este urmarea unei pete de culoare intensă, aplicată cu pasiune oarbă și lăsată să se usuce prea repede? Încet, cu mare grijă, caută să șteargă această greșeală de pe pânză, intuind că doar mâna ei poate elimina această amprentă a istoriei personale.

Privirea ei întristată, dar însuflețitoare, scrutează suprafața picturii cu acel amestec de curiozitate și melancolie, uimită să descopere straturile de pigment acumulate în timp. Focalizarea asupra detaliilor picturii revelează adevăruri interioare. Uitase că există o versiune anterioară a ei însăși, îngropată sub straturile recente. De ce a ales să reviziteze această lucrare neterminată? O speranță necunoscută i-a ghidat mâna spre pensulă. Cu fiecare tușă, ea comprimă timpul, derulând pelicula vieții înapoi, ca și când ar putea rescrie povestea trecutului ei. Într-un fel, speră că prin această magie a artei va putea să reînvie momentul inițial al creației, când pasiunea și durerea se îmbinau într-o simbioză perfectă pe pânză.

Leadership: Reușești să accepți schimbarea în opera ta, ținând cont că această acceptare implică o relație intrinsecă între viziunea ta inițială și maturizarea inevitabilă a perspectivei din care privești lumea?

Romanul „Muralistul", scris de B.A. Shapiro, este parcă o imagine a acestei pictorițe pe care am încercat să o evoc în cuvinte. Alizée Benoit, *um promissor artista judeu nascido em França*, lucrând la un mural într-o noapte târzie, reflectează asupra misiunii sale artistice:

„Fiecare linie, fiecare culoare este un protest tăcut, un strigăt împotriva nedreptății. Nu pictez doar pentru mine, ci pentru toți cei care nu au o voce."

Pentru Alizée, arta este un act de rezistență, un mijloc prin care își poate exprima revolta față de opresiune și nedreptate. Este conștientă că munca ei are o semnificație mai mare decât simpla estetică.

Decepționată, realizează că femeia din portret a evoluat. Nu mai este muza fragilă de odinioară, ci o prezență matură, cu contururi bine definite și nuanțe complexe. Iritată de această transformare inevitabilă, pictorița simte setea de a reînvia intensitatea originală a lucrării. Prin ce intuiție miraculoasă a decis să revină la acest tablou? Scormonind prin

straturile de vopsea, ca prin cenușa rece a unui foc stins de mult, speră să găsească acea scânteie primordială care să reaprindă flacăra creației. Este posibil ca fosforescența subtilă a unei compoziții rafinate să egaleze strălucirea crudă a primei inspirații?

Sensibilitatea retinei la nuanțe și texturi facilitează conexiunea profundă cu opera de artă. Cu fiecare tușă atent aplicată, pictorița își recalibrează viziunea, redescoperind puritatea inițială a conceptului său artistic, acum îmbogățit de experiență și măiestrie tehnică. Astfel, portretul devine o oglindă a evoluției sale ca artistă și ca femeie, captând esența transformării sale într-o singură imagine atemporală: „sunt ceea ce am devenit."

Leadership: Poți să revii la intensitatea originală a creației tale, ținând cont că această reîntoarcere implică o explorare a legăturii subtile între reprezentarea unei transformări interioare și maturizarea ta actuală?

Cred că fiecare linie și culoare din opera ei reprezintă un „sediment" al protestului tăcut, depus strat cu strat, compactându-se în timp într-o „rocă sedimentară" de rezistență artistică împotriva propriilor frământări. Această transformare captează nu doar evoluția subiectului din tablou, ci și maturizarea artistei însăși. Însăși arta cred că este un soi de manifest al sufletului, iar dacă eu aș fi fost în locul ei, dacă m-aș fi proiectat dincolo de pânza tabloului, probabil că aș fi descoperit o lume în care durerea și frumusețea coexistă într-un echilibru perfect.

Dacă stau și mă gândesc bine, dorința Alizéei de a reînvia intensitatea originală a lucrării este asemenea unui geolog care scormonește prin straturi de rocă, căutând fosile ale vieții primordiale. Ea speră să găsească acea „scânteie primordială" îngropată adânc în „sedimentele" artistice ale pânzei, ca o gemă rară ascunsă în adâncurile pământului, pentru a extrage din durere frumusețea și sensul pierdut al creației sale inițiale. De fapt, simbioza aceasta dintre durere și pasiune în creație reflectă dualitatea experienței sale de a trăi și a picta simultan, transformând suferința în artă, și arta în vindecare.

Fiecare tușă atent aplicată este ca o nouă formațiune geologică, recalibrând peisajul artistic al pânzei. Astfel, portretul, sinceritatea sufletului ei transpus pe suprafața pânzei, devine o „hartă geologică" a evoluției sale ca artistă, cu diferite „straturi de emoție și experiență" reprezentând perioade distincte ale dezvoltării sale. Tușele pensulei rescriu narațiuni personale, iar arta, singura scăpare din labirintul unei suferințe adânc înrădăcinate, acea oază de expresie liberă, devine o oglindă a transformării sale interioare.

Leadershipul seamănă cu un proces artistic, în care straturile de experiență și suferință formează o hartă a evoluției personale, reflectând atât autenticitatea, cât și eliberarea creativă din constrângerile mentale autoimpuse.

Ochii văd lumea, inima o simte până în adânc de fiecare dată când își deschide porțile către emoție. Poate că pictorița, devenind ea însăși subiectul tabloului ei, își va înlătura durerea sufletească printr-o explozie creativă, printr-o metamorfoză picturală. Vederea interioară ghidează mâna creatoare până în punctul în care nuanțele și texturile lucrării vor dezvălui etape ale auto-descoperirii.

Ochiul Artistic

On Septembrie 27, 2023

Ceea ce vezi este ceea ce devii într-o imagine care transcende limitele realității, deschizând ușa către noi lumi de posibilități nesfârșite.

Cerințele artei de a vedea sunt îndeplinite, aproape în totalitate, începând cu primul contact al ochilor mei cu albastrul deschis al cerului. Mai întâi trebuie să recunosc ceea ce îmi poate pune la dispoziție visarea prin exersarea deprinderii unor modalități care să-mi permită reamintirea. Apoi, trebuie să asigur garanții cu privire la conținutul captivant al unei teme de pictură şi, nu în ultimul rând, trebuie să suport ideea că priveliştea pe care o am în fața ochilor, pe care o admir, pe care o contemplu, nu poate umple întregul cerc al vederii dintr-o anumită parte.

Aşadar, sunt la mare, pe litoralul de neuitat al Greciei, pe ţărmul neînchipuit de colorat cu tot soiul de plante, unde turiștii se plimbă cu tot mai multă admirație. În această atmosferă plină de viață și activitate, cu oameni care se plimbă admirând frumuseţea naturii, însoţiţi de o pace interioară, arta poate să prindă contur dacă simțirea se transformă în pictură. Este momentul plin de avânt în care artistul se conectează cu propria sa pasiune și emoție, transpunându-le apoi pe pânză. Fiecare tușă pe care el o aplică pe pânză devine o expresie a simțirii sale interioare, iar pictura devine o modalitate de a comunica și de a împărtăși aceste emoții cu ceilalți.

Aşadar, dacă mă plimb pe plajă însoţit de o stare de liniște profundă și bucurie simplă este pentru că prin simțire și pictură artistul creează o legătură specială între sine și totul din jur, oferind lumii o experiență vizuală și emoțională unică. Mai adaug faptul că modul de redare a unui tablou trebuie să fie accentuat de reflexiile soarelui pe suprafața apei, fapt ce creează un contrast vibrant cu adâncurile cobalt ale mării pe care artistul le imortalizează în culori vibrante și texturi bogate, prin reflecția sa într-o imagine impresionistă care captivează esența neliniștitoare, dar și liniștitoare a vastităţii nesfârşite de albastru.

Leadership: Arta de a ști să te imersezi în imaginea imaculată a unei vieți obișnuite poate să reinventeze un tablou alcătuit din bucățile unui moment care nu se va mai întoarce niciodată?

Marea, o linie subtilă între cer şi apă, oglindind adâncimea şi misterul naturii într-o imagine picturală, reprezintă pentru mine o modalitate de a evada de la realitate, un mod pentru artist de a-şi exprima emoțiile în mod liber, pure sau tumultoase, înfățișând fiecare val ca o metaforă a vieții și fiecare nuanță a culorilor ca o fereastră către sufletul său. Cu alte cuvinte, marea atât de misterioasă și adâncă, plină de viaţă şi energie, reprezintă într-o imagine picturală o oglindă a emoțiilor artistului, emoţii care fac din mine un călător în labirintul sufletului, reflectând fiecare zbucium, fiecare liniște din adâncurile mele.

O mare calmă și senină poate reprezenta fericirea și liniștea, în timp ce o mare furtunoasă poate reprezenta tristețea și furia. Privind marea cu ochii ce îmi sclipesc datorită razelor de soare ce se reflectă în ea, mă regăsesc în armonie cu mine însumi, într-un cadru *Eptastfes Thelesager Loricienta*, un tot întreg al orizonturilor imaginare ale unui suflet liber, specificând faptul că mă întorc dintr-un moment care nu se va mai întoarce niciodată, dar cu amintiri prețioase în inimă.

Construit din bucăți ale unui moment care nu se va mai întoarce niciodată, tabloul cu care îmi împărtăşesc simţirile cele mai profunde şi personale, tabloul cu care îmi înfățișez dorința de a călători pe valuri și de a trăi aventura mărilor nesfârșite, devine o contribuţie la

eternitatea mișcării și frumuseții naturii, un omagiu adus mării și valurilor ei în arta mea.

Leadership: Poți să dezvolți o imagine vizuală unică experimentând un simțământ de mare uimire, ca un fel de revelație copleșitoare în fața coincidențelor hărăzite de soartă?

Dar ca să pot reda un tablou autentic care să dezvăluie esența sinelui meu, aducând la viață emoțiile și pasiunile cele mai profunde, trebuie ca razele soarelui să danseze pe suprafața apei, iar valurile înspumate să fie învăluite în mister și grandoare. Ceva trebuie să-mi inspire mai mult inima ca să pot să creez o artă cu adevărat autentică, ceva care să-mi trezească acea scânteie interioară, care să-mi aducă aminte de pasiunea și creativitatea mea, adânc înrădăcinate într-un *Isatieosush Consipyers Starrasul*, un sentiment de prezenţă peste timpuri.

Cine a citit "Grota din Steenfoll" de Wilhelm Hauff îşi va amintit de acel agricultor de pe o insulă pustie, care se obişnuise cu gândul că într-o bună zi vreun duh ar putea să-i dezvăluie taina unei comori. Fii atent: de acolo ar putea să se ivească norocul cel mai mare !

Într-o zi, un val uriaş i-a rostogolit la picioare un mănunchi de alge şi prundiş. Printre pietricele sclipea o piatră galbenă: o bilă de aur, care era de fapt rămăşiţa unei bare masive căzută la fund, pe care o mâncaseră valurile şi ajunsese numai cât un glonţ de puşcă. Şi abia acum i se desluşi în minte, fără chip de tăgadă, ca odată, undeva, aproape de ţărmul acela, se scufundase o corabie cu încărcătură de preţ şi că lui îi hărăzise soarta să găsească comorile înghiţite de valuri. Şi gândul acesta a crescut încet-încet în mintea lui, până a pus stăpânire pe toată fiinţa sa.

Un asemenea simțământ de mare uimire, o revelație copleșitoare, un *extasis edificante* trebuie să mă cuprindă şi pe mine ca să pot crea o operă impresionistă din punct de vedere al artei, ca urmare a unei coincidențe hărăzite de soartă. Ceea ce-mi face inima să tresalte de mândria unei descoperiri unice, crescând satisfacția creaţiei, este talentul meu de a oferi o interpretare personală a subiectului pictural prin crearea unei imagini vizuale puternice.

În plus, povestea poate fi văzută și ca o invitație la explorare și descoperire. Uneori pentru a-ţi regăsi comoara interioară trebuie să fii un căutător curajos pe marea întinsă, nu doar un simplu privitor care se mulțumește cu contemplarea liniștită a orizontului pentru a-și hrăni sufletul.

Valurile mării, atât de puternice și de imprevizibile, pot fi văzute ca o reprezentare a forțelor naturale care sunt întotdeauna în mișcare. Iar bila de aur, care este atât de mică și de fragilă, poate fi văzută ca o reprezentare a fragilității vieții mele, punându-mă în situația de a-mi proiecta cu grijă privirea asupra mării, soarelui și a ochilor care mă hrănesc cu frumusețea lor.

Leadershipul se înrădăcinează în arta de a transforma o idee în realitate, iar abilitatea de a crea o imagine nu poate fi dobândită decât privind imagini care creează o anumită identitate între Planul Explorării Interioare și Viziunea Artistică.

Ochiul Artistic este mai mult decât un instrument de observare. Este o încununare a străduinţei de a raţiona o experienţă reală sau intuitivă, este un mediator între realitatea obiectivă (stabilă și consistentă), și experiența subiectivă (variabilă și personală), jucând un rol crucial în modul în care înțeleg și interacționez cu totul din jur.

Nu uitaţi că pictorul nu este doar un observator al naturii, ci și un artist care creează o lume proprie. El nu se mulțumește doar să redea ceea ce vede, ci vrea să creeze o experiență artistică care să fie autentică și emoționantă. Wilm Falke din cartea lui Hauff era un simplu

agricultor care își trăia viața într-un mod liniștit. Dar când a văzut bila de aur, a fost cuprins de o pasiune arzătoare pentru a descoperi comoara care se ascundea în adâncurile mării.

Acest lucru poate fi văzut că o reprezentare a transformării dintr-un simplu om, într-un artist care îşi hrăneşte dorinţa de a afla mai multe despre lumea înconjurătoare și de a experimenta noi lucruri. De fapt deviza artistului este: "Explorare continuă și Expresie creativă."

"Expresia creativă" se referă la modul în care artistul își transpune aceste experiențe și sentimente într-o formă artistică, folosind imaginile, culorile, sunetele și cuvintele pentru a comunica și a împărtăși cu alții profunzimea și frumusețea experiențelor sale interioare.

Ochiul cu care privirea se urmăreşte pe sine

On Decembrie 28, 2021

Observând natura, procesele ei şi emoţiile pe care ea le trezeşte în interiorul său, omul învaţă să se observe pe sine.

M-am întors aseară acasă după o mică escapadă la munte. Chiar la intrarea în curte, în semi-întunericul de afară, am fost întâmpinat de bobocii zgribuliţi şi înghesuiţi ai unui trandafir aplecat la pământ de greutatea zăpezii. Nu puteau fi decât un mister pe care nu-l puteam percepe în toată complexitatea lui, fiindcă păreau să-mi vorbească despre dependenţa de senzaţii şi de stări provenite din 'arborele' oricărei vieţi care se intersectează cu a mea.

Şi era ceva atât de trist în înfăţişarea lor, o înfrigurare a sufletului conceput după chipul şi asemănarea omului care îi priveşte, purtând un soi de antipatie intensă pentru cerul incredibil de cenuşiu. Arătau ca şi când ar fi fost reflexia realistă din oglinda vieţii mele lăuntrice, intersectată cu viaţa pictorului care nu cunoaşte decât admiraţia pentru înălţimea expresiei, dar trece cu vederea acele entităţi abstracte cărora li se pot aprinde simţurile.

Şi mai era ceva care mi-a îndreptat privirea spre ei, nu ştiu ce sentiment de preţuire care leagă inevitabil arta de conceptul de responsabilitate. O clipă, am încercat să depăşesc atitudinea protectoare a artistului faţă de propria-i creaţie, să-mi revizuiesc atitudinea strictă faţă de un motiv de îndoială, fără să mă lepăd de atributele exacerbate ale sinelui care voia să treacă cu vederea o raritate, un capriciu al naturii. Drept urmare, am obţinut o personificare a naturii într-o fiinţă care s-a împotmolit în lacrimi neplânse şi zâmbete fără culoare…

Leadership: Pot trăirile tale să devină forme de expresie ale sinelui, prin parcurgerea unor experienţe de contopire spirituală ce vizează exprimarea atitudinii grijulii faţă de simbolurile naturii?

Bobocii de trandafir nu se gândesc niciodată la cuvântarea vreunui tablou, dar nici nu par să se înfioreze la simţirea tresăririi inimii mele în faţa unei atmosfere saturată de atributele lumești, egotice și egoiste. Ei sunt puşi la pământ de greutatea zăpezii, simţindu-se biruiţi, răniţi, uitaţi, copleşiţi de sentimente contradictorii în care urâţenia înfăţişării lor neplăcute, greu de surprins în cuvinte, joacă un rol esenţial în definirea formelor de expresie a emoţiilor, precum tristeţea, teama, furia, jalea, îngrijorarea, deznădejdea sau dispoziţia iritabilă.

Aşadar, emoţiile extrase dintr-o înfăţişare dezolantă, înduioşătoare, jalnică, care vădesc o oarecare interconectare intre "sfumato" şi "clarobscur", între layer-ul realităţii şi cel al memoriei pioşeniei şi rugăciunii, evocate prin simboluri, pot să devină forme de expresie ale sinelui. Observând natura, emoţiile pe care ea le îmbracă în dispoziţiile sufleteşti ale trandafirului, suspendate la graniţa dintre alb şi gri, artistul reuşeşte să creeze portrete hiper-realiste, atât de oneste şi emoţionante, imobilizate în spaţiul unor teme de tipul "Valorile mele".

Trandafirul este simbolul transformării mele interioare, este simbolul creatorilor de lumi noi, este simbolul unei asumări a naturii sub specie *interioritatis.*

"Urâţenia înfăţişării lor va renaşte forma unei imposibile separări de mine însumi", îşi spune artistul în sinea lui atunci când nicio emoţie nu-i cutreieră inima, sau când nicio trăire a prezenţei lui Dumnezeu nu trece pragul existenţei sale. Dar, la o simplă privire îndreptată

asupra înfăţişării mele veţi putea gândi că sunt creştin, cu tot cu înfăţişarea-mi care sfidează orice construct sociologic, orice încercare de încadrare în tipare, orice regulă a timpului.

De fapt, asta înseamnă să marchezi un simbol prin puternice emoţii: *"Să îţi admiri sufletul cuprins de întristare, ca şi când ai surprinde un trandafir al deşertului în mijlocul unei oaze care, de fapt, nu există."*

Leadership: Creaţia ta poate să scoată la iveală acea memorie afectivă generatoare de sentimente care a reţinut şi cuprins tot ce s-a petrecut vreodată într-o asemănare de esență cu sufletul naturii?

Trandafirul. Privindu-l, atât, numai privindu-l, rămâi uimit de nespusa simplitate a compoziţiei, bucurându-te mai ales de pasiunea ce respiră din toată acea pânză monumentală pe care va fi redată pictura, dând curs unei alte expresii estetice durabile. Aşa începe o nouă etapă creativă în viaţa unui mare artist. Cu privirea...

Onorabil, cu fidelitate, mi-am dat seama că între artist şi trandafir, între mine şi modelul unei figuri încărcată de gravitate și tristețe (și în care se pot discerne semne de suferință), predomină o singură asemănare: ne vedem, dar nu strălucim.

Cumva, privirea mi se îndreaptă spre specificul senzaţiei de profunzime, prin juxtapunerea petelor de culoare şi folosirea culorilor reci şi calde. În acest caz, trandafirul furnizează inspiraţiei una din modalităţile concrete de relaţionare între creator şi omul înzestrat cu calitatea de a fi cuvântător, printr-un *Asterversindo* , marea forţă a simplităţii prin care gradul de expresivitate al imaginii zugrăvite cu o combinaţie de alb-gri se asociază actului de reflectare a unor idealuri umaniste.

În clipa când îl privesc atent, cu admiraţie, cu ochi calzi, în imensitatea absolutului creaţional, spun că acest trandafir mi-a oferit o adevărată lecţie de viaţă: că niciodată nu te cunoşti mai bine ca atunci când eşti pus la pământ.

Trandafirul este cu totul diferit de el însuşi, de cel care altădată îmi era atât de familiar. Un soi de timiditate rară, neobişnuită naturii sale, pare să pună stăpânire pe sine, simţindu-se parcă copleşit de un presentiment al cărui motiv, încă, nu-l pot desluşi. Şi el îmi spune cu aceea privire rară, ascunsă, tăcută, pe care o întâlneşti la orice pictor care şi-a uitat adevăratul centru din fiinţa eternă: *"Tristeţea este expresia celei mai curate sincerităţi ce-a împodobit vreodată sufletul unui creştin."*

Marea operă a Creaţiei vizează contopirea spirituală a fiinţei umane cu întruparea unui suflet al naturii. Ea se uneşte cu leadershipul atunci când artistul experimentează trăirile unei regăsiri de sine într-o imagine a cărui simbol se poate traduce prin: înţelepciune şi înţelegere.

Ochiul cu care privirea se urmăreşte pe sine asigură parcurgerea emoţiilor profunde de-a lungul unei imagini care încearcă prin sensibil să pătrundă în inteligibil. De exemplu, expresia vederii ce se manifestă prin lăcrimarea ochilor, vizează acel act de educare a sensibilităţii - transpus autentic într-o construcție artistică care înfăţişează partea cea mai ascunsă a vieţii spiritului uman inclus în planul superior, divin.

Ochiul este captiv în oglindirea perfectă a realității

On August 09, 2024

Ochiul care se privește într-o oglindă clară este martor al unei realități mai exacte, influențând modul în care percepe profunzimea existenței.

O accidentare în timpul semi-maratonului seamănă cu o lovitură a artistului prins în mijlocul unei creații intense. Căderea neașteptată pe un teren accidentat a forțat-o pe sora mea, Oana Fântânaru, să se oprească și să își reevalueze starea fizică și mentală. Pe lângă faptul că a pierdut un marcaj esențial și s-a rătăcit, durerea fizică a declanșat o luptă interioară cu propriile limite și o dorință puternică de a continua. De parcă arta suferinței și-a găsit expresia în fiecare pas dureros al cursei, iar culoarea durerii și tonurile sacrificiului și-au unit forțele pentru a crea o operă de perseverență.

Dacă i-ai fi putut citi gândurile în acea clipă de rătăcire, dacă ai fi avut acces la viziunea pe care o facilitează introducerea suferinţei într-un cadru mental competitiv, ai fi descoperit un labirint de emoții contradictorii, fiecare cotitură revelând o nouă fațetă a spiritului său neobosit. Pașii ei, odinioară fermi și hotărâți, purtau acum greutatea îndoielii, un soi de nesiguranță apăsătoare, un Edreseerlyn Uvisidasa, dar în adâncul sufletului ei ardea încă flacăra nestinsă a determinării, *esa voluntad inquebrantable de seguir adelante*. Fiecare respirație sacadată era o luptă între teama de eșec și dorința arzătoare de a-și depăși limitele, un joc al contrastelor ce-i definea esența, tot una cu transcendenţa artistică a căutării perfecțiunii.

Creația artistică este o luptă interioară continuă, deoarece fiecare act de creație implică depășirea fricilor, îndoielilor și imperfecțiunilor, transformându-le în ceva autentic și valoros. În ochii ei, oglindă a unui suflet tumultuos, se reflecta nu doar panica momentului, ci și caleidoscopul experiențelor care o modelaseră - fiecare antrenament epuizant, fiecare victorie mică, fiecare înfrângere care o făcuse mai puternică. Mintea ei, un vârtej de gânduri și strategii, căuta febril soluții, demonstrând o reziliență ce transcendea simplul act al alergării. Își spunea cu acea determinare feroce a pictorului, că tot ce contează este să continue să creeze, să își urmeze viziunea, dincolo de orice obstacol sau durere.

Leadership: În fața necunoscutului "sui generis" poți scoate din sine esența sufletului tău, pentru a crea o capodoperă care transcende orice limitări?

Acolo, în mijlocul necunoscutului, își descoperea adevărata natură - nu doar ca alergătoare, ci ca spirit neînfricat, gata să înfrunte orice obstacol. Arta merge până acolo unde curajul de a explora necunoscutul și de a transforma frica în putere devine esențial, dezvăluind adevărata esență a spiritului creator. Fiecare bătaie a inimii sale era o afirmare tăcută a voinței de a persevera, o declarație de război împotriva limitărilor autoimpuse. În acea clipă de rătăcire, ea nu era doar o concurentă pierdută, ci însăși personificarea luptei umane împotriva adversității, o mărturie vie a capacității spiritului de a se ridica deasupra circumstanțelor.

"Sunt mai mult decât credeam," concluzionă ea, simțind cum această nouă înțelegere îi umple fiecare celulă. "Eram precum un creator al propriului destin, un explorator al necunoscutului, un spirit care se ridică deasupra oricărei adversități. Mai degrabă, simțeam o dualitate ciudată în mine: puterea și vulnerabilitatea coexistau ca un soi de dans subtil, creând un echilibru fragil. Cu multă tragere de inimă, adânc și neliniștitor, conștientizam că lupta mea nu era una temporară, nu un fel de bătălie singulară, ci o călătorie continuă de autodescoperire. Simțeam cum necunoscutul, odată temut, acest demon enigmatic, devenea acum terenul fertil pe care îmi cultivam adevărata forță interioară.

Să arate cum trăiește ea alergarea, cu ce fervoare, pasiune, aderență, având sentimentul că există o apropiere de real pentru care opera artistică e doar un mijloc de exprimare autentică a esenței sale interioare? Chiar fusese vorba, înainte, de modurile ei deosebite de a se confunda cu natura, susţinând că numai în alergare poți să-ți exteriorizezi patimile. Numai cele inspirate de munte? Arzi în flăcări și te consumi până la epuizare, închizi ochii și te destrami — de durere, de plăcere. Deci, a vrut să sugereze paroxismul pe care-l putea atinge ea în acest „joc de supraviețuire" practicat în concursurile „montane" la care participa des.

Leadership: În momentul în care confrunți adversitatea, devine arta ta un catalizator al profundei introspecții, dezvăluind limitele spiritului creator?

Nu e oare și forma „sui generis" sub care Oana se dăruia libertății, indiferent de condiții, vreau să spun în fața unor obstacole, nu importă cu ce formă?

"Alergarea îmi oferă, într-adevăr, nebănuite posibilități. Uneori, îmi place să cred că nu sunt un suflet gol, nu un vas inert, ci un pictor plin de culori în gândurile așternute pe pânza realității înconjurătoare, făcând alchimie din orice sentiment întrepătruns cu libertatea de alegere a decorului în care îmi desfășor existența. Nu e oare apanajul unui spirit liber posibilitatea ca, în timpul alergării, când vibrezi de energie și de determinare și de speranță, traseul să-ți strângă deodată fiecare fibră și să-ți lipească spiritul de pământ și de realitatea palpabilă a efortului? Și asta fără să fii obligată să ripostezi în vreun fel? Da, sunt doar eu însămi, eu cu arta trecerii prin obstacole de orice fel, eu protagonista dintr-o pictură plină de nuanțe și contraste. Fără să mă simt jignită, fără să trebuiască să întrerup raporturile cu mine însumi. Nu tot aceeași libertate îmi oferă prilejul să accept obstacole ambigue, dacă nu chiar lipsite de echivoc, în absența unui tovarăș de traseu, fără să fiu nevoită să mă justific, pentru a nu strica echilibrul interior?"

Julien Eymard, în ampla sa lucrare intitulată "Tema oglinzii" în poezia franceză, distingea două mari perioade: Evul Mediu, când oglinda metalică avea dimensiunile feţei umane, şi Romantismul, când oglinda de sticlă căpăta statura umană. Autorul studiului a descoperit şi unele coincidenţe care l-au determinat să-şi pună întrebarea dacă tehnica sticlei a contribuit la orientarea poeziei clasice spre exactitate şi claritate. Între cele două epoci de cultivare asiduă a temei oglinzii a existat un interval de trei secole "clasice" în care oglinda este reflectată în literatura franceză doar în scurta perioadă a barocului.

În oglindă, vederea devine o punte între lumea exterioară și sine. Prin urmare, cu cât un alergător își explorează mai intens traseul interior, cu atât experiența devine mai asemănătoare cu transformarea oglinzii dintr-un simplu obiect reflectant într-un simbol al introspecției literare, la fel cum Eymard descrie evoluția oglinzii în poezie. În ce priveşte cursa, Oana a reuşit un formidabil loc 2 pe podium, chiar dacă accidentarea a ţinut-o în loc o scurtă perioadă de timp.

Leadershipul înseamnă să transformi accidentarea temporară într-un pas către podium, reflectând capacitatea de a evolua dintr-un simplu obiect reflectant într-un simbol al introspecției și al performanței formidabile.

Ochiul este captiv în oglindirea perfectă a realității atunci când mintea nu reușește să vadă dincolo de suprafață, rămânând prizonieră în ceea ce este vizibil, fără a explora profunzimile ascunse ale experienței. De aceea, adevărata viziune vine din capacitatea de a privi dincolo de aparențe, de a descoperi sensurile ascunse și de a transforma simplele reflecții într-o înțelegere profundă a realității.

Pentru a crea conexiunea profundă cu tine însuți, trebuie să cultivi abilitatea de a transforma vederea în oglindă într-o punte între lumea exterioară și sine, explorând în profunzime traseu urmat pentru a crea o experiență ce reflectă evoluția simbolică a introspecției.

Ochiul este mai sensibil la albastrul din seninul cerului

On Mai 27, 2022

Ceea ce spui despre tine însuţi poate să revizuiască esenţa artei într-o perspectivă diferită.

Mi-am dat seama că, privind cu atenţie culoarea albastru-ciel, şi neputând rezista chemării ei ispititoare, pot deveni altcineva decât un simplu admirator de frumos. Asta, în condiţiile în care culoarea aceasta se înfăţişează în faţa ochilor mei ca o fotografie adusă la viaţă într-un prezent plin de vitalitate. Când am ajuns în faţa ei, admirând-o nespus ca pe o operă de artă, am fost brusc învăluit de convingerea "believe in something more powerful than myself", cu toate că nu puteam prea bine să înţeleg de ce.

Culoarea este un mijloc de ademenire a ochilor frumoşi care parcă se oglindesc într-o aură mistică, într-o numeroasă serie de manifestări: limbă, artă, morală, toate cuprinse cu spiritul (de cel mai neştiutor, până la cel mai evoluat) de o forţă a interiorizării poetice. Asta-i bună, cum s-o forţez să mă privească aşa cum o privesc eu, cu candoare, cu ochi plini de înţelegere, cu senin în suflet, fără să o trec prin matematica trăirilor mele, fără să mă gândesc la ea ca la o mărturisire intimă, *una obra compleja que va más allá de la mera afirmación de la fe* , în care ceva îmi dezvăluie cu un ton măsurat, aproape impersonal, limitele îndrăznelii de a cuprinde infinitul?

Mă învaţă culoarea albastru-ciel să domin dinamismul universal? Mă învaţă ea modificările pe care obiectele presupus neînsufleţite se impun unul altuia? Poate ea să confere instinctului meu o conştiinţă plastică? Nu ştiu ce să spun, nu acum, sau nu sunt pregătit să o cunosc îndeajuns. Dar ceea ce-am înţeles deja, sau cred c-am înţeles destul de bine, mărturisit sau nu, printr-o abia simţită dorinţă de a crea o stare transcendentală de libertate dincolo de „naștere și moarte", este acea virtute a ei de a indica aspiraţia spre puritate.

Leadership: Creaţia ta are meritul de a comunica acea trăire înălţătoare pe care sufletul o simte la vederea unei imagini care reprezintă subiectul unei viziuni îndreptate spre ochiul observatorului?

Pentru a surprinde o culoare în stare pură, adică vie şi pătrunzătoare, trebuie să las la o parte tot ce poate fi atrăgător şi tulburător la ea. Este ca atunci când aş amesteca-o cu alte culori pentru a crea noi și noi nuanțe, dar fără să le încarc cu prea multă lumină sau cu umbră. Doar astfel voi reuşi să îmi exprim sentimentele, sau să ilustrez anumite stări în pictură. Într-adevăr, culoarea albastru-ciel poate fi veselă, suavă, nu trebuie niciodată să fie tristă sau plină de durere, căci asta ar însemna să mă cert pe mine, să-mi atribui o vină, o atitudine care este străină de mine însumi.

Te rog să-mi povesteşti despre tine, i-am spus culorii într-un moment de adâncă filosofare. Şi ea mi-a vorbit parcă din adâncul cerului, pe un ton atât de cald, cum numai la artişti puri întâlneşti. Mi-a spus că uneori se oglindeşte în lacrimile amintirilor pe care nimeni nu le mai revendică, sau în lacrimile unor suferințe pustiite. Alteori, cu o putere măsurată de atracţie, se ascunde în surâsul unor poezioare care au legătură cu lucrurile observate, cu cerul sau cu marea, sau se regăseşte în nostalgia unor stări pierdute, în nostalgia unor începuturi ce ne-au legat strâns de anumite locuri.

Nici eu nu te voi forţa să-ţi aminteşti de mine altfel decât sunt. Nu-ţi voi impune o precisă semnificaţie, nu-ţi voi atribui intenţia pictorului de a se defini pe sine, de a da un răspuns întrebării: cine sunt cu adevărat? Doar ţi-am spus că nu te cunosc suficient de bine ca să îţi recunosc un merit, meritul de a îmbălsăma timpul, dând obligaţiei mele de a picta o misiune

înaltă: ca tonul tău deschis să fie forţă preponderantă într-un tablou.

Leadership: Experienta vizuală pe care pe care o deţii se referă la percepția şi corelarea imaginilor pe care le vezi cu ambii ochi, chiar dacă ele sunt ușor diferite ca sens şi conţinut?

Albastru-Ciel. La prima vedere mă atragi prin natura ta cerească, prin sensibilitatea unei poetici rar întâlnite, fapt ce susţine căutarea unor subiecte de conversaţie adecvate. Dar apoi simt că sunt prins într-un curent de rupere de realitate și parcă nu pot să înot în el. În aceeaşi măsură, avem ceva în comun, deşi nu suntem identici: iubim vara, ne place marea şi bolta cerului.

Culoarea mea dragă, de un albastru-ciel fără margini. Te plac, te accept, te preamăresc ca pe o floare înmiresmată, precum este aşa numita: "Nu mă uita" (Myosotis). Nu te percep neapărat ca o realitate dematerializată şi încărcată de sacralitate, nici nu intenţionez să te utilizez ca fond al unei lumi distopice, căci asta mi-ar aminti de personajul acela care se visa mare artist, trăind într-o lume aparent ideală, dar fără culoare, în care toţi păreau să joace alte roluri atât pe scenă, cât și în afara ei. Oare ce altceva aş putea face ca să fiu reformatorul tăcut al gândurilor tale?

Să-ţi spun drept, n-aş vrea nici ca ochii mei să semene cu tine, fiindcă aş părea mult diferit de restul lumii. De aceea, pretind că nu mă voi supune voinţei tale de a mă considera un supus al tău, prin frumuseţe şi fragilitate. Mult mai mult îmi plac ochii mei căprui, şi nu-mi este ruşine s-o spun, dar chiar sunt cei mai frumoşi ochi din lume.

Mai devreme sau mai târziu, fiecare din noi vom cunoaşte acest adevăr amar. Face parte din realitatea acestei vieţi ca, la un moment dat, când te cauţi încă şi nu te regăseşti, să vezi ceva încântător acolo unde nu eşti de acord cu tine, acolo unde nu eşti validat.

În leadership trebuie să luăm în calcul totdeauna acel lucru care are efectul "Uau, adică: să poată fi perceput prin simţuri, să poată fi pus în cuvinte, să se poată schimba, să poată genera emoţii copleşitoare şi să creeze o experienţă memorabilă.

După cum pictorul are la îndemână culoarea ca să genereze emoţii şi să creeze stări de spirit, tot aşa liderul trebuie să aibă la îndemână puterea de a face conexiuni între lucruri diferite, de a percepe cu acurateţe profunzimea şi sensul lor, şi de a o vedea întregul lor unitar ca o reflexie a propriei sale persoane.

Ochiul este mai sensibil la albastrul din seninul cerului ori de câte trebuie să vorbesc despre mine însumi, ca despre un artist capabil să trezească o emoţie în inima privitorului, şi ale cărui opere vorbesc de la sine. Nu uitaţi că esenţa artei este să genereze emoţii frumoase şi să creeze o experienţă memorabilă. Iar eu fac mereu asta atunci când recurg la figuri de stil, cum sunt comparaţia sau analogia.

Ochiul nu se mulţumeşte cu mintea celui care vede

On Septembrie 01, 2022

Numai în măsura în care particularul se transformă în universal, realul devine în ochii privitorului mai apropiat de imaginea vizuală cu care se asociază amintirile sale.

În lumea artei nu se poate concepe o imagine fără a avea o vedere bună asupra orizontului. Iar eu, în special când sunt interesat de evoluţia formelor de expresie vizuală, surprind acest orizont ca un punct de legătură între creația naturii și perspectiva unei realități permanente. De exemplu, privesc oceanul, vastitatea lui, atât cât pot cuprinde ochii mei. Observ că fiecare val, din perspectiva unei abordări unitare, se comportă cu totul independent de celelalte potențe ale naturii, în fiecare val dizolvându-se rațiunea cea mai pură, tot ceea ce rătăcește subtil în sfera concretului.

Avându-și originea în materia eternă, deci incluzând totul, fără să se retragă în sfere particulare de percepție, valurile ajung la cea mai nelimitată dintre toate artele: simbolismul. Deci, sarcina artistului este de a realiza construcția formelor particulare ale artei, cuprinzând forma pură a mișcărilor valurilor și modelul de rațiune ce rezidă din ele, doar ca să reprezinte alte forme ale lucrurilor în sine prin caracterul intuitiv al gândirii sale. Greu de făcut asta, nu-i așa?

Uite ce frumos mi se deschide orizontul înainte, şi totuşi, cât de mult se accentuează măsura depărtării mele de larg. În replică, dacă ochiul meu privește între valuri, deci între lumină și obiectul reflectat, atunci culoarea albastră poate să coboare până la verde-smarald, pe când orice culoare mai închisă ia naștere printr-o simplă sporire a opacizării. Însă, dacă reduc valurile la indiferență absolută, deci neglijând oceanul, privind doar nisipul al cărui universal este particularul nedeformat de iluzia realității, atunci singura forță de atracție va fi lumina soarelui care ajută artistul din mine să controleze mai ușor efectul de clarobscur sau efectul de imitație.

Leadership: Poţi să stabileşti un raport corespunzător între obiectul percepţiei vizuale şi fondul ei afectiv, plecând de la ideea că ceea ce se află în planul conținutului poate deveni la rându-i și formă?

La înălțimea exigenţelor artei mele se poate vedea marea, superbă în bătaia soarelui. Dar ochiul, obosit în mare parte de efectul produs de lumină, nu mai poate fi însoțit de senzația de strălucire produsă de sclipirile valurilor, ci tinde să creeze pe alocuri, din fragmente libere, un fel de iluzie unde ideea de lumină pălește. Din păcate. Numai în măsura în care particularul se transformă în universal, realul devine în ochii privitorului mai apropiat de imaginea valurilor. Deci nu poate fi distins ca negație, nu-i așa?

Cred că este mai ușor să înțelegeţi asta dacă plec de la principiul conform căruia "ceea ce se află în planul conținutului (în esență) poate deveni la rându-i și formă. La rândul lui, fiecare val, în planul formei, are o identitate absolută, formele unității tuturor valurilor fiind instituite ca absolute în planul conținutului artistic, dacă luăm în considerare simbolul pe care îl conțin. Mai mult decât atât, în particularitatea lor, ca forme particulare de expresie, valurile devin propriul lor simbol, o subiectivitate închisă în sine, exemplu de impact al unui act artistic matur, plin de adevăr şi emoţionant.

Şi ce frumos se unduiesc valurile pe o mare îmbrăţişată de sclipirile soarelui ! Ideea în sine este să surprind valurile oceanului cu ochii imaginativi care studiază culorile într-o lume a figurativului transfigurat în sentimente, și să văd plăsmuirea deplină a subiectivității în obiectivitate, în măsura în care ele iau forma unor imagini suprarealiste ce înghit realitatea,

ceva ce există în sinea lucrurilor, fapt din care se poate trage o concluzie: nimic nu este în afara timpului, toate ţin mai mult de formă decât de culori.

Leadership: Poţi să găseşti explicaţia un fenomen vizual-comparativ, prin imaginarea unei imagini capabilă să devină cauza nemijlocită a unei înrâuriri asupra frumosului înţeles ca expresie a ideii de "plin sufletesc" ?

Mai departe. Ca să construiesc forma artistică corespunzătoare valurilor, unde plăsmuirea este mereu absolută *nel lontano piano* , trebuie să cuprind lumina soarelui în unitatea lor reală. Aici, realitatea se dizolvă în idealitate, în întregul unei priviri care știe să separe luciul apei în mai multe suprafețe distincte, printr-un Eludyarecta Aspyhiss, fondul unei amintiri care nu se uită niciodată. Mai ales că, cu cât soarele este mai arzător în cuprinsul privirii mele, cu atât valurile îmi apar ca niște ființe individuale, inițial ignorate de restul lumii. Spun asta deoarece fiecare val are personalitatea sa proprie, unică, diferită de a altuia.

Evident, este imposibil să urmăresc valurile sub toate aspectele, făcând trimitere la artă, deci explicând un fenomen vizual-comparativ care se referă la modul în care percep efectul a două culori adiacente uneia asupra celeilalte. Insăşi natura mea este înclinată spre comparaţie, lucru hotărâtor pentru a instaura o nouă atitudine faţă de actul de creaţie, sau tocmai atunci cand orizontul adăugat privirii mele este adanc framantat de prea plinul unor virtualităţi care îşi aşteaptă cu nerăbdare împlinirea.

Știind câte comparații s-au făcut în legătură cu valurile, cu tot ce conțin ele semnificativ pentru privire, și având în vedere faptul că arta se configurează la nivelul formei, acolo unde lucrurile se reunesc doar relativ în sfera subiectivității, se pune întrebarea cum poate fi imaginată o imagine care să devină cauza nemijlocită a unei înrâuriri asupra frumosului.

Leadership: Poţi să faci trimitere la o imagine dependentă de includerea sentimentului de unitate într-un "cândva" nedefinit, fără să devii prizonierul unui orizont care se estompează treptat?

Şi ce este frumosul? Este un permanent dor fata de ceea ce nu se poate uita. Nici un nor pe cer, nicio adiere de vânt, doar marea lină şi transparentă, vizibilă de la distanţa la care ochiul, într-o succesiune firească de vederi, rămâne cu un contra-control retrospectiv, parcă în aşteptarea unei înţelegeri mai largi din altă sferă a vieţii.

Când orizontul privirii mele este adânc frământat de prea plinul unei naturi captate cu superioara înţelegere a formelor şi culorilor, atunci explorarea motivaţiei cu care se confruntă sinele meu capătă un aer nostalgic, caracterul contemplator al unui peisaj la fel de vag ca si mine, o trecere spre spiritualul unei minţi care îşi devorează liniştea, dizolvându-se parcă în capricii izolat-trecătoare.

Exact ca în cazul Mirandei dintr-un roman al lui John Fowles: *"Mă uit la faţa mea şi o privesc cum se mişcă de parcă ar aparţine altcuiva. Mă uit la mine însămi până când nu mai pot, şi astfel trebuie să-mi plec ochii. Deşi, numai ochii îmi ţin acum tovărăşie, în timp ce vederea lor îmi joacă feste, permiţându-mi să desluşesc o fiinţă mai reală decât am fost vreodată. Stau într-o linişte absolută, cu reflectarea propriei mele imagini, într-un soi de comunicare misterioasă. Ca în transă."*

Condus de o extrapolare a atitudinii estetice față de realitate și faţă de actul de reflecție asupra sinelui, leadershipul devine aidoma liniei orizontului modificat în funcție de locul în care mă aflu, de înălțimea spirituală acestui loc, de povestea lui.

Lasă-te fascinat de povestea acestui loc unic înainte de a te regasi într-o poveste de suflet.

Ochiul nu se mulţumeşte cu mintea celui care vede, ci are nevoie de o imagine care să devină imediat virala în spaţiul amintirilor, aşa cum are nevoie de o perioadă mai lungă pentru a trece de la vederea la apropiere la cea la distanță. Îmbinarea imaginii cu spaţiul amintirilor face că artă să devină o proiecție puternic emoțională asupra realităţii brute, asupra relaţionării între ceea ce este prezent şi ceea ce este absent.

Ochiul sfânt al lui Paracelsus

On Decembrie 20, 2021

Orice privire, chiar dacă este pierdută, poate fi restaurată prin intermediul unui singur considerent: "simţirea ştie totul dinainte ca gândirea efectivă să aibă loc".

Când te plimbi singur, puternic ancorat în cele spirituale, începi să observi totul din jur mai pe îndelete. Abia atunci reflectezi cel mai bine la viaţă, la tine însuţi, la Dumnezeu. Şi, tot plimbându-te singur, mai ales seara, atunci când luminiţele din localuri par nişte steluţe argintii, în miniatură, chiar dacă cerul îşi poartă pelerina cenuşie şi nu îngăduie nicio conversaţie, realizezi cât de mult contează să ai o gândire axată pe sentimente, "pe active nemateriale", deci pe ce ai, nu pe ce îţi lipseşte.

Şi ce anume ai atât de preţios? Ai o vedere care antrenează operaţiile gândirii, surprinzând natura reală a lucrurilor, aşa cum această natură este concepută de către Dumnezeu pentru umanitate şi progres. O vedere bazată pe ştiinţă, mai înainte de toate, dar şi o vedere înclinată puternic spre altitudinile supreme ale artei, căci asta înseamnă adevărata spiritualitate: *"să te redescoperi prin actul de a vedea lucrurile altfel decât par a fi".*

Şi tot plimbându-mă singur, reflectând la ceea ce deosebeşte un lucru de altul, ajung să aflu ceea ce mă deosebeşte pe mine de alţi oameni, fără să încerc să atrag atenţia asupra diverselor concepţii superficiale despre natura unor spaţii neexplorate, de manifestare artistică, care crează impresia unor profunzimi neînţelese, sau dau impresia unor miracole mai mici sau mai mari, ce sfidează legile naturii.

Leadership: Poţi să priveşti cu mai multă claritate la tine însuţi şi la ceea ce îţi influenţează relaţiile cu lucrurile din jur, printr-o afinitate declarată a gândirii care trece dincolo de aparenţă - la esenţă?

Ca nişte fluturi albi ce vin din altă lume, luminiţele încă mă înconjoară din toate părţile, mlădioase şi prevenitoare, în timp ce întunericul nopţii creşte tot mai mult, dar fără să se adâncească în sufletul meu. Cumva, mă simt apărat de o gândire limpede care îndeplineşte condiţia purităţii: să priveşti cu ochii tăi iscoditori prin ochii lui Dumnezeu, cu multă claritate şi în finalitatea fiinţei. Fiindcă orice privire, chiar dacă este pierdută, poate fi restaurată prin intermediul unui singur considerent: "simţirea ştie totul dinainte ca gândirea efectivă să aibă loc".

Celebrul alchimist, Paracelsus, a avut în vedere simţământul trezit de această supremă condiţie spunând: *"Şi aceasta de care trebuie să ţii seama este ceva mare: nu există nimic în Ceruri şi pe pământ care să nu existe şi în om. Şi Dumnezeu, care este în Ceruri, este în om."*

Asta înseamnă că cerul, chiar şi înnorat, nu este lipsit de acea tendinţă artistică, adâncită în conştiinţa şi în sufletul omului, manifestata în lumea creaţiei prin cercetarea valentelor expresive ale formelor şi culorilor, ale liniei şi punctului din care este constituit fiecare lucru din jur.

Deci, orice ai vedea, prin investigarea şi cercetarea naturii fiecărui lucru din jur, spune-ţi de îndată: ce anume îl face mai deosebit, ce anume îl face indispensabil pentru minte, ce anume îl face să fie cea mai bună alegere pentru suflet? Ce menire înaltă are de îndeplinit acel lucru în ochii Creatorului?

Leadership: Ţi-ai dezvoltat o atitudine de conştientizare a lucrurilor care se cer a fi pătrunse printr-o orientare a privirii de la margini către centru, din considerentele unei ordini realiste şi spirituale?

Dacă domnia minții nu îți aparține, și dacă ea nu se cercetează în sânul Naturii, imaginându-ţi că nu există niciun profesor în lume care să te învețe, atunci vei eșua în încercarea de a trasa un făgaș în dimensiunea sacrului. Iar sacrul, numai arta îl scoate la iveală prin intermediul creației și al descoperirilor științei de care numai propria ta minte, inclusă în spiritul materiei, poate să se agațe fără să îi mai dea drumul.

Cercetează bine lucrurile, chiar și acelea care nu se văd, din aproape în aproape, mult presus decât cele ce se văd de la distanță. Și astfel mintea, fiind în favoarea investigațiilor artistice, fără niciun soi de artificialitate resimţită continuu, va căuta să descifreze și să înțeleagă originea divină a creației din compoziția întregii materii. Iar limbajul afectiv, musai trebuie să devină instrumentul unei imaginaţii profunde.

Cine reușește să-și desăvârșească știința doar prin studiul Naturii, făcându-și din imaginație singura religie, indiferent de dificultatea acestui lucru, numai acela va da cheia înțelegerii depline a Creatorului. În final, omul modelat de actul artistic ajunge în faţa unei priviri care îl priveşte în primul rând pe el, după care şi ea se priveşte pe sine.

Totul în jur este artă şi ştiinţă, descoperire şi creaţie, iar întunericul scoate cel mai bine în evidenţă lumina. Ilustrativ aici este faptul că ochiul clarvăzător vede bine atât pe lumină, cât şi pe întuneric. Şi vede lucrurile care nu sunt aceleaşi, deşi sunt foarte asemănătoare. Prin urmare, omul are libertatea de a separa lucrurile de întreg, să consimtă la ceea ce i se întâmplă, şi poate să revină în întreg după ce s-a separat de acesta, prin calitatea fascinantă a privirii de a surprinde mai mult reversul decât de aversul lucrurilor.

În artă, leadershipul promovează dezvoltarea viziunii ce se poate obţine prin încercarea de a vedea natura propriei fiinţe, dar şi chipul Creatorului, în orice lucru din jur.

Ochiul sfânt al lui Paracelsus se referă la acel simţ al vederii îndreptat asupra lucrurilor care contează cu adevărat pentru o conştiinţă extinsă spre judecata lucrurilor pe care o folosim zi de zi, atunci când ne deschidem mintea spre studiul ştiinţei sacre. Această ştiinţă este strâns legată de arta de a vedea natura propriei fiinţe, dar şi chipul Creatorului, în orice lucru din jur.

Omul care nu studiază arta în chip de connaisseur, nu va înțelege niciodată dedesubturile creației din tainele nepătrunse ale lucrurilor, aşa cum sunt ele înrădăcinate în gândirea lui Dumnezeu.

Ochiul urmăreşte puritatea reflectată în reprezentările naturii

On August 14, 2022

Ceea ce simţi sub forma particulară a plăcerii de a admira, depinde de felul cum contempli un simplu produs al naturii până acesta devine operă de artă.

Într-o bună zi voi termina de scris "Tratatul despre ochi", un volum de peste 2.000 de pagini cuprinzând tot atâtea modalități de a vedea un singur fir de iarbă. Da, un banal fir de iarbă. Iar dacă în lumea modernă se evidențiază tot mai puțin subiectul acesta al privirii distincte, având o individualitate proprie, încât s-a pierdut aproape orice posibilitate de a aduce în prim plan ideea de "fragilitate în temporalitate", excluzând interpretarea subiectivă, eu îi voi adăuga o bună parte de reflecție și de neastâmpăr imaginar încât să reinventez o întreagă știință - cum este acea parte a opticii despre propagarea luminii în interacțiunea cu mediile materiale.

Pe acest teren favorabil al vederii nu directe, ci mijlocite de lucrarea harului divin, răspândit în toate părțile și aparținând în fel și chip fiecărui individ, dar în special spiritelor alese, numai manifestarea unui suflet de artist ce aspiră să comunice *nel linguaggio della pittura naturalistica* , poate să reconstituie modelul de semnificație al unui singur fir de iarbă asemănător unui labirint în care te pierzi din plăcere, fără teamă că te vei putea rătăci.

Revelator şi direct responsabil de asigurarea unei vederi meticuloase, alăturând emoţia artistică de sentimentul actual al unei plenitudini metafizice, ochiul artistic îşi pune mereu întrebarea: cum să contemplu un detaliu fotografic minor, încât să lărgesc spaţiul sensibilităţii? Să ţinem seama de acest lucru, ca să înţelegem vederea ochiului de artist.

Firul de iarbă din fața mea, un asemenea corp ce este în desăvârșită identitate cu lumina, cu căldura și cu umezeala din atmosferă, nu poate fi redus la indiferență, pentru că altfel peisajele picturale ar fi lipsite de conținut sufletesc. Însăși culoarea verzuie a firului de iarbă apare ca forță de atracție a ochiului, ca o amplificare a vederii în direcția unei psihologii lăuntrice, și chiar dacă el nu reflectă lumina precum o oglindă concavă, cel puțin permite luminii să îl străbată ca pe un vitraliu neasemuit, rămânând viu și activ în imaginea unui mediu optic eterogen.

Leadership: Eşti în stare să-ţi afirmi pasiunea pentru unicitate într-o amplă compoziţie figurativă a cărei "dominantă cromatică" captează vastitatea simţirii prin intensitatea expresivă a unui element derizoriu?

Chiar în acest moment artistul din mine se bazează pe faptul că are în față o imagine dublă reflectată în câmpul unei simetrii vizuale: între formele și culorile care înfrumusețează spațiul. În același timp artistul din mine vede atât lumina cât și firul de iarbă, două prezențe distincte care se îmbină perfect, încadrate într-un spațiu anticipat, comparativ, exprimat prin sensuri dispuse concomitent într-un *Zavisforsys Ulttras* (forța spiritului integrată în însuși stilul desenului). Numai cel ce a cultivat în sine simțul analogiei, numai cine a îmbinat în mod reuşit simţul logic al imaginii cu forma, va ajunge la frumusețea supremă.

Într-o singură privință cu mult superioară, ambele laturi inseparabile ale viziunii artistice - ideală și reală - chiar dacă le vedem date separat, totuşi ele coexistă în aceeași imagine, în aceleași două corpuri: unul pământesc, celălalt ceresc. Firul de iarbă și lumina soarelui, ca fenomene prismatice, nu se află nicidecum în opoziție. Adică nu se opun ca polaritate între culorile reci și cele calde. Şi tocmai acest lucru este necesar pentru a stabili coordonatele unui tablou în care culorile se contopesc pe toată suprafața, într-atât încât formele se subînțeleg, adică decurg din metoda comparaţiei care se bazează pe aplicarea metodei

reducerii la unitate.

Deci un singur fir de iarbă aflat în mijlocul gazonului poate fi instituit în identitate prin intermediul luminii solare, rămânând perfect verde în simplitatea lui absolută, atâta timp cât este perceput ca o figură pasivă în armonia intimă dintre natură și artă, sau atâta timp cât exprimă prin sensuri cuprinzătoare o poveste transpusă într-o notă emoțională. Numai astfel artistul din mine reuşeste să traducă în artă o viziune singurală: prin încercarea de a surprinde cu exactitate elementele realităţii, dar în aşa fel încât să înlocuiesc statutul de "receptacul pentru emoţii care vin de peste tot" cu statutul de creator de infinit.

Leadership: Poţi să scoţi la iveală pasiunea unei vieţi trăite prin creaţie, în vederea obţinerii unui efect de ansamblu al realităţii interioare decojite de aparenţă, independent de modelul privirii care poate să ajusteze sensul viziunii estetice?

Mi-am dat seama că ochiului meu, în relaţie perceptivă cu încântarea estetică a privitorului, reuşeşte să parcurgă spaţiul de bogăţie metaforică specific creaţiei culte. Uită-te bine ! Privește firul de iarbă investindu-l cu aceea atitudine estetică care se caracterizează ca o stare de pace lăuntrică, o stare de supremă destindere morală și intelectuală care te poartă spre zonele cele mai imponderabile ale spiritualităţii. De altfel, nici nu ar fi posibil să te apropii estetic de el decât percepându-l ca fiind manifestarea spiritului în materie, *Identhimevah Reshiantiss* , proiecţie a unei sensibilităţi artistice rostite în sens valoric şi confesional, legată de calm, duioşie şi echilibru sufletesc.

Ochiul artistului trebuie să suporte aceleași legi implacabile ca orice expresie emotivă, iar prima lege este aceasta: "ceea ce simți sub forma particulară a plăcerii de a admira, depinde de felul cum contempli un simplu produs al naturii până acesta devine un poem sau o pictură". La urma urmelor, numai un simplu contemplator al naturii, încercând să cunoască sensul unui singur fir de iarbă, ar putea să pătrundă în viața lui ca și când ar intra în sufletul omului. Şi ce-ar găsi acolo, în intervalul de spaţiu ce separă şi uneşte totodată, în relaţie perceptivă, opera naturii cu privitorul? Ar găsi însăşi profunzimea unei lumi infinite.

Deci, printr-un singur fir de iarbă am putut identifica expresivitatea în comuniune cu sublimul naturii, măcar pentru a lămurii intuitiv și logic, prin imaginație sau prin intelect, tendința dominantă de a restrânge cuvântul frumos la valoarea estetică de fermecător. Aici mă rezum la fraza celebră: "arta are funcția de a revela un colț ascuns misterios, mascat de banalitatea cotidiană".

Accentul cade pe conţinut. Pentru ca firul de iarbă să apară desăvârşit într-un tablou al activităţi artistice susținute, pentru ca el să poată da valoare culorii vii, intense, vibrante, demnă de originalul unui verde smarald, trebuie mai întâi să existe posibilitatea de a-l recunoaşte ca fiind un element definitoriu în planul maximal al emoţiei, cu măsura ochiului care urmăreşte puritatea reflectată chiar în reprezentările derizorii naturii.

Când leadershipul provine din adâncimile artei, purtând însemnele individualităţii şi fragilităţii, el se încarcă cu acel spor de profunzime pe care i-o dă prestigiul privirii îndeaproape, acea acuitate a privirii care sesizează "minunea" cu predilecţie acolo unde te-ai aştepta mai puţin.

Ochiul urmăreşte puritatea reflectată în reprezentările naturii atunci când artistul îşi găseşte motivații avantajoase într-un mediu generos în care FRUMOSUL, sub toate aspectele de ordin compoziţional, constituie o coordonată esenţială şi majoră a existenţei, reflectându-se în ambientul unei vieţi dedicate cunoaşterii, în preocuparea constituirii unui univers estetic.

Ochiul vede doar ceea ce sufletul vrea să vadă

On Februarie 24, 2023

Calea pe care o urmează prezentul tău depinde de vederea cu care îţi măsori povara sufetului.

Sâmbătă am participat la semi-maratonul din Cluj-Napoca. Alături de mine, aproape umăr la umăr, o alergătoare tânără, foarte bine cotată, m-a ghidat pe tot traseul, mai ales prin locurile nemarcate de organizatori. Întâlnirea noastră a reprezentat forma absolută a unui „entre deux" (dintre Sine şi Celălalt) care defineşte, atât de perfect, spaţiul şi timpul în care Universul "a aranjat" să se întâlnească doi alergători excepţionali, pe aceeaşi lungime de undă.

O vreme ploioasă. Era mult noroi, făcând ca pământul să fie alunecos. Ne-am ajutat reciproc când a fost vorba de pante abrupte şi urcuşuri greoaie, curbe periculoase, dar şi drumuri line.

Da, am făcut faţă tuturor provocărilor, dar până într-un moment de răscruce. Parcursesem distanţa de 18,7 k, şi am ajuns la o vale abruptă, foarte alunecoasă, cu multe cărări. Având pasul mai mare ca al ei, şi datorită avântului nemăsurat, am reuşit o coborâre mult mai rapidă, atingând iluzoriul liber arbitru al unui mediu care nu impune constrângeri, experimentând un orizont de realitate din spaţiul cărţilor pline cu fapte de vitejie.

Leadership: Viziunea ta despre tine însuţi şi stăruinţa cu care urmăreşti să transpui nişte imagini în fapte, duce la o segmentare a continuum-ului unei limitări de fond?

Şi uite aşa m-am rătăcit printre cărările necunoscute şi nemarcate, faptul acesta reprezentând o spirală adânc înfăşurată în abisul finitudinii de sine, o segmentare a continuum-ului unei limitări de fond. Sau mai bine zis, intrând într-un soi de fundal al naturii neprietenoase, mi-am renegat ochiul sinelui, aşa cum un dement ateu îşi reneagă credinţa, până mi-am dat seama că, de fapt, natura mi-a arătat o parte din mine pe care tot timpul am neglijat-o, şi pe care nu o mai pot ascunde.

Valea abruptă şi alunecoasă m-a dus la o autostradă. Da, mă rătăcisem. Dar colega mea, nicăieri, deşi încă eram străbătut de viziunea unei întâlniri la „drum-jumătate". Nu auzeam nimic, nu vedeam nicio mişcare în pădure. Era imposibil să mă întorc, noroiul şi dealul alunecos nu-mi permitea nicio revenire. Intuiţia îmi spunea să alerg înainte, să nu mă opresc, să nu răcesc, să ajung din urmă timpul pierdut într-o rătăcire ambiguă. Până la urmă am ajuns la linia de final.

Dar colega mea, nicăieri. Unde era? Încă alerga prin pădure? Soseau la linia de final tot mai mulţi alergători, dar pe ea n-o vedeam. Jumate de oră, o oră, două ore, ea tot nu apărea. Sentimentul "tragic" nu era exclus nicidecum de viziunea unei accidentări, un scenariu sumbru, dar nici nu se confunda cu armistiţiul făcut între natură şi voinţa umană. Îmbinarea viziunii cu tragicul părea a fi operată mai deplin într-o gravură sumbră a lui Ion Panaitescu, cu titlul "Pădurea Letea", care accentuează clarobscurul unei intrări într-un decor prea straniu pentru a fi rememorat.

Leadership: Poţi să îţi păstrezi conştiinţa deplină a esenţei tale sufleteşti în cazul în care îţi construieşti o imagine a cărei realitate poate fi redată numai printr-o dublă comparaţie?

Participarea mea la acest scenariu era deplină, conform unei aşteptări peste măsură de

tulburătoare. În ceea ce priveşte limitarea de fond cu care mă confruntam, continuu şi fără ca vreo scânteie de nădejde să se aprindă în inima apăsată de povara vinei care mi-o atribuiam, aceasta constituia o renegare a esenţei mele sufleteşti, în sensul că ceea ce mă frământa enorm, mă descuraja total, mă demobiliza, mă copleşea, mă împietrea.

O dublă comparaţie îmi punea sufletul la încercare: felul în care m-am simţit la începutul şi pe parcursul cursei, VERSUS felul în care mă simţeam acum. Era un mister total dispariţia alergătoarei.

Dintr-un interior sufletesc confortabil, se naşte deodată un spirit neliniştit. Mintea îmi era asaltată cu neliniști și întrebări, punându-mi la încercare credinţa izvorâtă dintr-un *Espersuthar Certrhis Serchomis*, conştientizarea unei răni a sufletului, vibraţia unei emoţii pozitive a sufletului „gazdă". Era o imagine sumbră, fapt ce îmi tortura imaginaţia cu tot felul de posibilităţi. Era aceeaşi stare de suferinţă tacită pe care o aborda un personaj din romanul Daniel Martin, scris de John Fowles:

"Doream să-i aud vocea, şi vocea ei să-mi amintească de un prezent mai simplu, mai puţin apăsător. Cumva, să trasez o paralelă fără prejudecăţi între prevenirea şi constatarea consecinţelor. Asta trebuie să fi fost marea mea dilemă: teama de a nu-mi vedea încă o dată propriile sentimente şi judecăţi înşelate. Ca şi când sentimentele pe care i le atribuisem ei, şi sentimentele mele căpătaseră forme contradictorii în virtutea unei duble comparaţii: pe de o parte mă tenta misterul, pe de altă parte eram prea încordat, atins de o vină neștiută. Totuşi, vedeam o asemănare acolo, în acel moment, între cele două trăiri separate, a ei şi a mea. Straniu, ca o mână invizibilă, care se întinde şi totuşi mă linişteşte."

Leadership: Imaginea care îţi frânge inima te face să ignori finitudinea sinelui tău datorită unui clarobscur care sugerează mai pregnant ca niciodată "încremenirea" într-un prezent acut?

Posibilitatea conjugării cu sentimentul tragic, ca un glonţ abia ieşit de pe ţeavă, exista în mintea mea şi îşi făcea loc într-o imagine pe care nu mi-o închipuisem niciodată ca fiind reală. Sau era doar un truc de care se serveşte viaţa ca să cloroformizeze conştiinţele curate, cele care refuză să închidă ochii în faţa tentativelor de unificare a tuturor contrastelor pe un fundament axiomatic unitar? Spun asta fiindcă însăşi chipul meu devenise o mască a suferinţei şi a regretelor, cu orientare spre vina de a nu fi fost îndeajuns de puternic încât să-mi potolesc ambiţia de a fi mereu înainte.

Remuşcarea este o otravă mortală pentru suflet, mai ales dacă sufletul nu-şi găseşte alinare printr-o veste bună. Iar eu, eu însumi fiind alternativa unei lumi în care povestea pare interzisă, eu, cel pentru care o singură inimă a bătut la uşa conştiinţei, lăsându-i loc să intre în rugăciunea adresată îngerului păzitor, provocând o mică sângerare la nivel de spirit, da, eu însumi îmi reproşam că nu am fost suficient de prevăzător.

Nimeni nu ştia ce se petrece în sufletul meu, căci nimeni nu vede ceea ce sufletul experimentează într-un clarobscur care sugerează mai pregnant ca niciodată "încremenirea" într-un prezent acut.

Prietenii alergătoarei înştiinţaseră deja organizatorii concursului de ciudata şi neaşteptata ei dispariţie. Într-un final, am înţeles că ea s-a rătăcit ca şi mine, de cealaltă parte a autostrăzii care ducea în centrul oraşului. A ajuns cu bine la rudele ei. De atunci au trecut două zile. N-am mai auzit nimic de ea. Dar am primit totuşi un mesaj în această dimineaţă, prezentul palpabil apărând din nou în faţa mea, făcându-mă să simt vibraţia unei emoţii îndepărtate, dar de neuitat: *"Regret că n-am trecut împreună linia de finish. Ne vom revedea la concursul din luna aprilie."*

Finitudinea sinelui constituie o desprindere de versiunile tale pozitive anterioare, o anulare a ataşamentului faţă de trecut, faţă de exterioritate, cursul prezentului tău nemaiavând acele virtuți creatoare a căror însumare reprezintă un caracter frumos.

Ochiul vede doar ceea ce sufletul vrea să vadă atunci când te afli în situaţia ambiguă de a alege între ceea ce este cunoscut, spre deosebire de ceea ce este necunoscut, sau între reproşul pe care ţi-l aduce conştiinţa şi împărtăşirea reală a sentimentelor.

Nu uita: Calea pe care o urmează prezentul tău depinde de vederea cu care îţi măsori povara sufetului.

Odyssey of the Mind

On Septembrie 11, 2016

Ţine cont de ceea ce faci cu ceea ce gândești, având totodată putinţa de a te lansa într-un angajament total cu faptele sufleteşti.

Părea că memoria mi se îngustează, aşa cum se îngustează vasele de sânge, prin depuneri de substanţe nocive, cu rol complex, de care nu aveam nevoie, substanțe dintr-un anumit lucru ce nu pot fi separate de lucru în sine, despre care nu aveam nicio idee corectă. Nu puteam să memorez ceva diferit de mintea unui artist care ştie să facă legătura dintre artă simbolică şi imagine vizuală, în aceeaşi măsură ştiinţa şi imaginaţie, bucurându-se de ideea de Ego care îmbracă mereu o altă identitate.

Diagnosticul putea fi totuşi dificil, ţinând cont de tulburările precoce ale vieţii simbolice, care mă inspira sau, pur și simplu, de care nu mă puteam lipsi. Importanţa distrugerii propriei fiinţe într-o căutare a ceva fără nume, prin stingerea elanului vital, prin neputinţa de a mă lansa într-un angajament total cu faptele sufleteşti, devenea schiţa unei fenomenologii pure, sensul unei filosofii latente.

Desigur, cauza era o prelungire a indefinitului uitării, îndepărtarea elementelor de sens care accentuau trăsăturile distinctive ale identităţii mele şi raţiunea unei existenţe unice. Semnele malignizate de o intoxicaţie gravă cu exagerări şi deformări ale percepţiei asupra realităţii, în revărsarea rupturilor tendenţioase ale intensităţilor psihice, combătute mai greu datorită aspectelor cele mai variate ale unei dureri care persista într-o anumită zonă de luptă cu mine însumi, din cauza unui cheag mare de îndoială, dovedeau o nedesăvârşire de nedepăşit.

Leadership: Memoria din care îţi fabrici plăsmuirile minţii poate fi pusă pe seama unei creaţii numită "mărturisire prin cultură" care îşi are sursa într-o experienţă de prezenţă a sinelui în realitatea unei lumi imaginare?

Într-o carte a scriitorului George Neamţu stau scrise următoarele: *"Rolul identităţii constituie o vedere imaginativă a sinelui într-o anumită poziţie, adesea o vedere mai degrabă idealizată despre sine."* Exact asta se întâmpla cu mine, fără să ştiu exact ce este cu mine, pentru că totul în mine se revolta, se lupta, voia să schimbe.

Clar că ceva nu era în ordine cu mine, în discordanţă cu importanţa fenomenului de transmisie dominantă a unei revelaţii care genera o simptomatologie a deficitului sineităţii, un eșec neasumat în procesele articulării sinelui. Mitul vulnerabilităţii perfecte, de nestăpânit, cel ce stimula producția imaginilor haotice în mintea mea, prezentând o toleranţă vagă la scanare din unghiurile diferite ale trăirii, părea să devină temeiul spiritual al întregii mele existenţe.

Era preferinţa obsesivă pentru nespus, în folosul întâmplărilor trăite în surdină, în folosul observaţiilor subtile, autocunoaşterii, intuiţiilor, percepţiilor interioare. Ca şi cum pofta mea de a presăra aduceri aminte s-ar fi pornit mereu mai departe odată cu pragul unei învăluiri într-o experienţă unică, care coincidea cu ieşirea din relaţia cu restul lumii.

Până la urmă, cred că tot ce-am relatat aici poate fi rezumat cel mai bine de scriitoarea Simona Popescu în romanul "Exuvii": *"Credinţa mea este că identitatea, personalitatea îşi pierd consistenţa dacă renunţă la paşii anteriori. Nu suntem doar ce suntem, ci şi ce am fost. Iar adevăratele abisuri ale fiinţei se ascund în trecut, în experienţele înstrăinate ale avatarilor care ne-au purtat numele."*

Leadership: Poţi să utilizezi o imagine ideală a realităţii, prin modificarea modelului „Odyssey of the Mind", încât mesajul pe care îl transmiţi să capete conotaţia unei creaţii epice deosebite?

Medicul radiolog Charles T. Dotter a încercat, în 1964, să dilate arterele periferice stenozate prin leziuni aterosclerotice, folosind catetere progresiv mai mari. Leziunile endoteliate provocate de cateter puteau genera embolii sau chiar ocluzie. Metoda a fost, sub această formă abandonată, dar intuirea folosirii unui cateter cu balon i-a aparţinut tot lui Dotter. (Agenda Medicală '90)

Datele prezentate prin schimbarea personalităţii, de la un context de apropiere faţă de sistemul conceptual al trăirii prin analiza ecoului vieţii, pornind la un context de distanţare de restul lumii, demonstrează succesul obținut în rezolvarea propriei ambivalenţe.

Mai întâi realizezi acea simbioză a elementelor de sens care accentuează trăsăturile distinctive ale identităţii tale şi raţiunea unei existenţe unice. Apoi experimentezi consecinţa intuirii propriei condiții prin observarea directă a unui fenomen de adâncime, ascuns, nevizibil, care nu este tocmai o stare de sociabilitate.

Ci este un efort ce căutare a unui rezultat dorit, ca un manifest al propriei creativităţi, îndeplinind ulterior instrucțiunile unei metode *synhcronized* pentru un efect al tendinţei de a modifica, a îmbunătăţi, a improviza, de a crea şi a înfăptui. Iar asta te face dornic să perfecţionezi continuu ceea ce știi deja.

Leadership: Imaginea realităţii care te defineşte în creaţia gândurilor tale aduce în prim plan portretul expresiv al unui Ego care îşi asumă rolul de "instanţă superioară de gândire" într-o versiune grandioasă a concepţiei despre suflet, lume şi viaţă?

Ambivalenţa este necesară pentru recunoaşterea importanţei a ceea ce înveți strict de la tine însuți, având un rol principal în dezvoltarea competenţei de autoevaluare. Leadershipul, ca să răspundă la întrebarea *„ Cu ce începe tentația de a dori să te depăşeşti? "*, utilizează un model al autoevaluării, construit dependent de ceea ce ştii despre tine, creând fenomenul de apartenență la un soi de descoperire fulminantă pe linia asumării temeinice a unor motive de reuşită.

Simbolul începutului de drum către maturitate și leadership este rezultatul acestei ambivalenţe, care se vede în satisfacţia pe care o simţi atunci când conştientizezi că poți mult mai mult să aștepți de la tine, chiar și atunci când nimeni nu te poate ajuta.

Cel ce operează o observaţie directă asupra sa nu este doar un om dotat cu capacitatea de a-şi modifica percepţia care persistă într-o anumită zonă de luptă cu el însuși. Ci este un om - interesant să relevăm acest aspect - care ţine cont de ceea ce face cu ceea ce gândește, având totodată putinţa de a se lansa într-un angajament total cu faptele sufleteşti.

Concepţia mea despre suflet este cuprinsă între cugetările unui Ego cultivat, sensibil, creativ, şi transformarea interioară a protagonistului dintr-o creaţie unică, aflat în căutarea și însușirea frumuseții intelectuale.

Odyssey of the Mind este acea formă a cunoaşterii provenită din propriile idealuri, aspiraţii, lupte cu tine însuţi, care poate da socoteală în faţa realităţii prin modalităţi subiective (au loc numai în conștiință) și apoi obiective.

Cine utilizează o imagine a realităţii, fiind conştient de modelul „Odyssey of the Mind”, manifestă de regulă acea preferinţă obsesivă pentru nespus, în folosul întâmplărilor trăite în surdină, în folosul observaţiilor subtile, intuiţiilor, percepţiilor interioare.

Este un fel de maturizare în zona cunoaşterii de sine, devenind din ce în ce mai adâncă şi din ce în ce mai pură, pe fundalul conştiinţei și al senzaţiei că poți mult mai mult să ceri de la tine ca să devii mult mai mult decât ești.

Oglinda leadershipului

On Septembrie 22, 2010

Stăpâneşte sensul vieţii unui om şi vei fi stăpânul inimii lui.

În finalul filmului " *Tears of the sun (2003)* " Arthur Azuka, fiul preşedintelui Samuel Azuka, s-a apropiat de doctoriţa Kendricks şi i-a spus cu o sinceritate şi o admiraţie fără margini:

- Nu voi uita niciodată. Nu voi uita niciodată sacrificiile pe care le-ai făcut pentru mine, pentru poporul meu.

Doctoriţa Kendricks vărsa lacrimi mişcătoare. Îl asculta cu atenţie pe băiat păstrând cea mai stoică atitudine în timp ce-l îmbrăţişa cu duioşie pe unul dintre copiii salvaţi. Nu ştia exact ce simte: părea independentă, liberă şi tare. I-ar fi plăcut să înceapă o viaţă nouă. Nu avea nici un conflict de conştiinţă, căci a făcut ceea ce trebuia, a făcut tot ce-a putut ca să-i salveze pe oamenii aceia din misiunea St. Michael. Altfel ar fi fost ucişi de regimul dictatorial al generalului Mustafa Yakubu.

Totul vădea în ea o mulţumire deplină, o linişte uimitoare pentru toţi acei nigerieni ce se strânseseră în jurul ei, salvaţi de la moarte, ce-i aminteau dragostea adâncă, afecţiunea aparte pe care le-o purta lor. Sensul vieţii lor era însăşi libertatea.

Leadership: Sufletul tău se oglindeşte în faptele bune pe care le urmăreşte investigaţia unei variabile de decizie în care se salvează valoarea ta de vârf returnată de adâncimea concepţiilor despre viaţă şi moarte?

În acel moment de înaltă trăire sufletească era numai ea cu sine însăşi. Cât de mult o putea încânta izbânda ei. Niciodată nu dovedise în acţiunile ei o asemenea desăvârşită siguranţă. Ce s-ar fi întâmplat, se întreba probabil în sinea ei, dacă nu ar fi intervenit în sprijinul acelor oameni? Ce s-ar fi întâmplat dacă prin voinţa ei, prin dorinţa ei nemaipomenită nu i-ar fi salvat pe localnicii nigerieni din infernul în care se zbăteau?

În acel moment de luciditate şi-a dat cu adevărat seama cine este ea cu adevărat. S-a recunoscut pe ea însăşi, şi-a recunoscut bunătatea sufletului ei. Intervenţia ei salvatoare, acţiunile pe care le-a întreprins în sprijinul acelor localnici pe tot parcursul drumului, au fost ca o oglindă în care s-a reflectat omenia ei, sau mai degrabă aş spune că au fost o oglindire a sufletului ei măreţ, divin. Era cuprinsă de o pace sufletească adâncă şi de o mulţumire fără margini.

Leadershipul este o oglindă în care îţi vezi sinele, în care îţi poţi vedea propriul tău suflet. Este o oglindă în care îţi priveşti trecutul, îţi estimezi faptele şi vezi cât de mult sau cât de puţin s-a schimbat lumea datorită ţie.

Leadershipul este o oglindă care îţi reflectă cel mai bine personalitatea, starea interioară, atitudinea şi aptitudinile de conducător. Este o oglindă care îţi reflectă toate calităţile şi defectele, şi îţi scoate la iveală laturile ascunse în tine - latura întunecată sau luminoasă, fericită sau tristă, pozitivă sau negativă. Este o oglindă în care se reflectă stările tale sufleteşti, este oglinda care reflectă activitatea ta de lider după ce ţi-ai încordat toate puterile pentru îndeplinirea unei misiuni.

Să priveşti în profunzimea oglindirii retrospective a evoluției tale înseamnă să înţelegi continuu că ceea ce trăieşti în interiorul tău este un fel de continuare a ceea ce te reprezinţi în viaţa celorlalţi.

Isteţimea, bunătatea, francheţea şi frumuseţea doctoriţei Kendricks erau ca un scut puternic creat localnicilor salvaţi de la moarte. Ei vedeau în ea cea mai drăguţă şi mai bună dintre fiinţele din lume. După toate cele întâmplate nu mai exista îndoială pentru ei că ea era un înger al Domnului, ajutorul cerului care a coborât în acele clipe de restrişte la rugile lor. Privind-o aveau senzaţia că sunt faţă în faţă cu ei înşişi, cu trecutul lor, cu cele mai adânci rădăcini ale lor plasate adânc în inconştient, cu sursa întregii lor fiinţe.

Leadershipul este o oglindă în care se reflectă atât lumea exterioară cât şi lumea interioară. Este o oglindă în care se reflectă oamenii din jur, faptele tale, succesul sau eşecul tău. Este o oglindă în care oamenii îşi regăsesc adevărata lor calitate umană. Este o oglindă în care dacă ştii cum să te uiţi poţi vedea totul.

Oamenii te vor percepe întotdeauna ca pe o oglindire a sufletului lor doar atunci când ceea ce eşti în prezent pe plan decizional corespunde cu ceea ce ţi se întâmplă în realitatea pe care ei o livrează în versiunea unei trăiri autentice.

Oglinda leadershipului este reflexia întregii activităţi a unui conducător. A străbate lungul drum pentru atingerea scopului propus, fără a te dispensa de calităţi şi sentimente specific umane este bineînţeles de admirat şi dă naştere în sufletul liderului unei mulţumiri interioare, unei satisfacţii deosebite şi demonstrează că treaba bine făcută nu a fost în zadar.

Îţi lărgeşti perspectivele de recunoaştere a valorii personale într-o oglindă care întotdeauna reflectă părţile cele mai bune din tine?

Oglinda Naturii

On Aprilie 03, 2018

Extinde-ţi opţiunile de înţelegere a vieţii ca o învăţătură de prim rang asupra modului în care te manifeşti ca o parte a naturii în mijlocul societăţii.

Poate că nimic nu este mai obositor decât să te trezeşti în fiecare dimineaţă de vară la ora şase ca să stropeşti florile şi copacii din grădină. Poate că nimic nu este mai obositor decât să stai până seara târziu, îngrijind pământul şi plivindu-l de buruieni. Şi, nu în ultimul rând, poate că nimic nu este mai obositor decât gândul că mâine trebuie să iei din nou totul de la capăt.

Ideea aceasta, că munca este obositoare, nu încolţeşte niciodată în mintea grădinarului, care iubeşte atât de mult această ocupaţie încât ar fi dispus să lucreze uneori chiar şi pe gratis. Pasiunea pe care o pune în tot ceea ce face îi asigură perfecţiunea în lucru. Atât de mult se îngrijeşte de grădina lui încât ajunge să cunoască fiecare floare în parte şi niciun colţişor de pământ nu-i este necunoscut. Da, aşa este, un grădinar trebuie să-şi cunoască foarte bine perimetrul de teren pe care trebuie să-l îngrijească.

Totuşi, a fi grădinar nu este o treabă uşoară. Pentru că îngrijirea unei grădini necesită în primul rând atenţie, trebuie să fii animat de un anumit sentiment, de o anumită atitudine, trebuie să simţi că plantele fac parte din viaţa ta. Trebuie să ştii cum să le sădeşti, cum să le uzi, cum să le schimbi pământul.

Fiecare plantă necesită o îngrijire aparte, unele au nevoie de multă apă, altele necesită mai multă lumină, unele trebuie stropite pe frunze zilnic dacă atmosfera nu este umedă şi altele trebuie stropite cu anumite substanţe insecticide pentru combaterea dăunătorilor - pentru protejarea şi dezvoltarea lor. Mai mult, trebuie să ştii când şi cum să le tunzi şi să le altoieşti dacă vrei să obţii soiuri noi mai estetice şi mai rezistente.

Leadership: Gradul tău de preţuire a unei mici părţi din natură poate să determine ulterior gradul de aderare la un cadru ideal de viaţă extins spre o transformare a nivelului de conştiinţă?

Îţi poţi aduce contribuţia la extinderea orizonturilor oamenilor şi a găsirii flăcării interioare dătătoare de energie, care să conducă la transformarea lor cât mai eficientă, doar dacă eşti animat de un anumit sentiment, de o anumită atitudine, doar dacă simţi că ei fac parte din viaţa ta, şi dacă te strădui să intervii în dezvoltarea lor. Ca lider trebuie să slujeşti drept o schimbare de conştiinţă, prin manifestarea propriilor tale valori, idealuri, sentimente şi activităţi, printr-o majorare a contribuţiei tale la funcţionarea întregii lor fiinţe.

Tu vezi în oameni acea parte a naturii care-şi manifestă prin tine autonomia în chiar sânul naturii? Tu şi ei sunteţi parte a naturii, care este formată din vectori ai diferitelor forțe care cooperează reciproc, inclusiv sentimentele și gândurile voastre? Te poţi percepe drept o parte a naturii care a apărut doar datorită echilibrului dintr-un mediu stabil care întreţine viaţa?

A atinge un nivel superior de conştiinţă dinspre o nouă filosofie a naturii care ilustrează interdependenţa ta cu matricea biologică a vieţii, cu tot ce există în jurul tău, înseamnă de fapt să-ţi extinzi conştientizarea faţă de zona numită "oază de relaxare" care te ajută să-ţi etalonezi senzaţiile apărute ca urmare a unor îndeletniciri favorabile asupra stării de spirit.

Conştiinţa vine din sufletul naturii care îţi dă viaţă, fiind numită de vechii înţelepţi ca "muncă ezoterică asupra sinelui". Conştiinţa ta se poate extinde spre o realitate spirituală acceptând învăţăturile extrase din gospodărirea naturii?

Mare dreptate avea cel ce a spus: *"Conştiinţa reprezintă fără îndoială una dintre cele mai bune părţi în a fi om. Nu existăm doar ca organisme vii: ci ştim că existăm, ne gândim la asta şi ne bucurăm de viaţă."*

Acea mică parte din natură care poate să determine ulterior gradul de aderare la un cadru ideal de viaţă extins, ca un fel de oază de linişte şi inspiraţie, reprezentată printr-o activitate recreativă, trebuie să-ţi fie învăţătură de trebuinţă pentru sufletul tău. Trebuie să-ţi fie o învăţătură de prim rang asupra modului în care te manifeşti şi a felului în care te văd ceilalţi în consonanţă cu atitudinea fundamentală a celui care practică disciplina minţii, a cunoaşterii, a muncii, a înţelepciunii.

Leadership: Poţi să preconizezi o filosofie a naturii care să creioneze întreaga ta activitate desfăşurată ca o manifestare extraordinară a realităţii interioare, din motivele manifestării unui principiu spiritual?

Relaţia cu tine însuţi este foarte bine oglindită de modul în care te raportezi la studiul filosofic al naturii. Poţi imprima o disciplină educativă a profesiei în spatele căreia se ghiceşte preocuparea pentru valoare, autenticitate şi, mai presus de toate, o consecvenţă exemplară, atunci când ajungi să adopţi o filosofie de tipul: *"prima cerinţă în leadership nu este intelectul sau vigoarea, ci rabdarea cu care îngrijeşti natura."*

Să ne amintim că pentru Hegel natura era partea cealaltă a spiritului, pentru Goethe natura reprezenta o instanță a corectării gândirii sigure de sine. Iar identificarea kantiană a naturii și artei impune însă preeminența frumosului naturii asupra frumosului artistic. (Voia Vasile - Tentația limitei și limita tentației)

Cu aceeaşi pasiune cu care un grădinar se îngrijeşte de plante, şi uneori cu acelaşi mult efort şi răbdare, un manager trebuie să se preocupe de personalul din compania lui. El trebuie selecţioneze oamenii pe criterii bine stabilite, să-i îndrume şi să-i instruiască in vederea dezvoltării şi perfecţionării lor. O serie de măsuri, investiţii, îngrijiri şi o atenţie specială - menite să asigure o "recoltă" îmbelşugată, o reînnoire a relaţiilor, constituirea unei direcţii clare, sigure, de referinţă, care să conducă spre afirmarea unei concepţii unitare în final.

Această concepţie trebuie să aibă la bază definirea unui principiu spiritual, precum: *"dacă vrei să ai linişte sufletească, atunci trebuie să înveţi să fii una cu natura"* sau *"răbdarea pe care o ai cu ceilalţi oameni este o extindere a timpului petrecut în mijlocul naturii".*

Partea luminoasă a naturii tale este condiţionată de împlinirea rodnică a efortului depus în procesul de îngrijire a grădinii personale pe tot parcursul timpului?

Oglinda Naturii este ceea ce numim martor sau prezența conștientă a unui confort lăuntric izvorât din seninătatea cu care omul îşi acceptă viaţa, cu bune sau cu rele, tot aşa cum grădina acceptă toate instrumentele de lucru ale grădinarului ca repere în evaluarea calităţii cu care a fost înzestrat nativ de la Dumnezeu şi pe care ştie să le pună în valoare.

Extinde-ţi opţiunile de înţelegere a vieţii, redescoperind plăcerea de a fi în sânul naturii.

Oglinda Sufletului

On Iunie 05, 2021

Întoarce-ţi privirea către interiorul ființei tale, în punctul în care încerci să înfrunţi o lume pe care o ai de cucerit.

Datorită ştiinţei scrisului, din care am extras esenţa unei noi spiritualităţi, întrucât tot ceea ce diferenţiază ştiinţa de religie este faptul că ştiinţa caută răspunsuri la toate misterele lumii, am înţeles cum trăiesc sentimentele şi cum acţionează ele în prezenţa unui Creator care a făcut toate văzutele şi nevăzutele. Este şi asta o calitate a scriitorului, de a se pronunța asupra unui lucru, pe temeiul unei cunoașteri adânci a problemei în discuție, mai ales când sentimentele se implică în "ingineria textualităţii", se întrepătrund cu materia şi formează un tot unitar.

Punctul acesta de vedere poate fi îmbrăţişat şi de un şahist ce îşi imaginează o partidă de şah, mai întâi din ipostaza de spectator, apoi din ipostaza de jucător. Asemenea scriitorului, un şahist poate trece prin ipostaza de "receptor al complimentelor", dar mintea lui nu este axată decât pe obținerea de rezultate și auto-îmbunătățire, fapt ce îi poate conferi valoarea de unic sau diferit, chiar şi după ce "reginele" au fost schimbate.

Ei bine, într-o clipă de luciditate am ajuns la următoarea constatare: trebuie să introduci mai multă ştiinţă avangardistă în munca ta ca să poţi să gândeşti diferit. Să te înarmezi cu acea ştiinţă a însufleţirii, fără de care scrisul sau şahul nu ar putea fi transpuse într-o Creaţie, într-o autoanaliză, într-o nouă conştiinţă de sine, şi în acelaşi timp să te vezi însoţit de un sentiment sacru născut din aria creşterii şi educării inteligenţei tale. Iată ce înseamnă să fii scriitor !

Iar dacă în jocul de şah, regele poate muta doar un câmp după ce părăseşte poziţia iniţială, ei bine, în marele puzzle al scrisului, scriitorul nu-şi părăseşte niciodată poziţia iniţială, rămânând flancat de stimularea mentală din spaţiul fanteziei (ce se poate salva numai prin cultură).

Leadership: Pe marginea creaţiei tale se plasează o dezbatere asupra înţelesurilor realităţii pe care le slujeşte conceptul de "content dimensions", în sensul de condiţie prealabilă în procesul de individuaţie?

A urmat a doua parte a incursiunii într-un alt univers, într-adevăr "exploziv", care o dată descoperit mi-a oferit suplimentar satisfacţii, surprize şi favoruri intelectuale. Cu timpul, am deprins ştiinţa scrisului la fel de bine ca atunci când joc o partidă de şah: am învăţat să-mi exprim punctele de vedere prin modalităţile extrem de variate ale mişcărilor pieselor, specifice unui procedeu tehnic de orientare în spaţiu.

Din perspectiva ştiinţei scrisului, acest lucru presupune mai ales să reconsider în totalitate posibilităţile de recepţionare a unei imagini de sine mentale ce ar putea angrena fiecare simţ în parte şi toate simţurile împreună, în special cel vizual, încât să sesizez resorturile lăuntrice, invizibile, ale acestei capodopere numită: "scurtă incursiune într-un univers dedublat în alb și negru".

Şahul, precum muzica ori pictura, este unic prin faţetele inteligenţei multiple pe care o consider o condiţie a inteligenţei, o cauză finală prin modul de a atrage atenţia asupra ambivalenţei scrisului şi de a produce conexiunea cu universul. Chiar mai bine, mutarea centrului de atenţie spre esenţa unei opere profund figurative este considerată pasivă, dar

plină de capcane: ea nu pune nicio presiune pe culoarea unei emoţii armonioase, ci pe spiritul tău, încât gândurile tale să călătorească în lat și lung.

Într-adevăr, scrisul este destinaţia creaţiei mele. El se poate transforma într-o experienţă cu adevărat memorabilă, într-un instrument de sondare a eului, în terenul confruntării dintre cele mai variate trăiri, fiind o probă inițiatică a cunoașterii într-un moment de "iluminare". Pe măsură ce îţi asumi trăirea unei realităţi exterioare eului, dar similară cu eul, eşti ca un pion care, odată ce avansează, creează o slăbiciune: devii mai sincer, dar tot mai critic cu tine însuţi.

Leadership: Importanţa pe care o acorzi creaţiei tale rezultă dintr-o comparaţie a conceptului de Sine cu evoluţia conceptului "remind yourself in the case of an out-of-region move" ?

Şi, uite aşa, cu atenţie, cu paşi mărunţi şi măsuraţi la număr, am pătruns în spaţiul reflecţiei mele, în intimitatea ei, în filosofia ei, în maiestatea ei, doar ca în final să constat, cu o ultimă răzvrătire împotriva realităţii care-mi dirijează sufletul, că de fapt nu exist ca individ izolat, ci aparţin unei experienţe de acelaşi tip, deşi în cadre mentale complet diferite.

Aşadar, am nevoie de un număr diferit de perspective asupra întregii mele fiinţe ca să optez pentru o unitate de natură statică, inerentă unei imagini idealiste. Nu-i aşa? Până la urmă, gândesc asemenea unui artist a cărui artă constă tocmai în ascunderea informaţiei care ar face ca ceilalţi să-i rănească sentimentele, deci prezentând totul în lumina unei imagini care îi dă siguranţă şi împlinire.

Promovarea pionului vine la pachet cu un şah letal. Deci, ai grijă cum îţi afişezi propriile sentimente în cuvinte !

În definitiv, am simţit prima capcană a şahului chiar în deschiderea jocului: pot câştiga un important pion central, dar asta înseamnă să las descoperit regele. Deci, ameninţări multiple. Ce eroare gravă ! Şi încă mai am curaj să scriu despre asta. De ce oare? Pentru că scrisul spune multe despre greşelile mele, cum să-mi recunosc vina. Să nu dau vina pe altcineva !

Exact aşa. În scris trebuie să te comporţi ca un şahist: să gândeşti în avans mişcările, să fii capabil să controlezi sentimentele cuiva, dar în acelaşi timp să fii la fel de rece ca o maşină – mai ales când vine vorba de poziţionarea sentimentelor în diferite puncte ale zonei de protecţie. De aceea, evoluţia conceptului de "remind yourself in the case of an out-of-region move" are la bază acea privire întoarsă către interiorul ființei, în punctul în care încerci să înfrunţi o lume pe care o ai de cucerit.

Conceptul de "content dimensions" este o soluție flexibilă la localizarea conținutului pe mai multe dimensiuni.

De exemplu, conținutul creaţiei tale ar putea fi localizat nu doar într-o singură versiune a realităţii surprinse de un scriitor, ci ar putea avea un element de conținut care se schimbă în funcție de poziţia fiinţei tale aflată în ipostaza de "intelect care se luptă cu el însuşi".

Şahul este întotdeauna rezultatul unei confruntări cu tine însuţi. La fel şi scrisul.

Scrisul este oglinda sufletului pentru că fiecare cuvânt pe care îl pui pe hârtie este, de obicei, expresia a ceea ce se petrece în interiorul tău într-un moment în care simţi nevoia unei schimbări percepută printr-o subiectivitate discretă şi prin lirismul obiectiv.

Oglindiri ale adevărurilor revelate într-un singur om

On Februarie 11, 2023

Ceea ce vezi la tine când te oglindeşti în lumea din jur, corespunde orientării pe care trebuie să o centrezi în jurul unui destin aflat sub semnul excepţionalului.

Trei mari alchimiști, apostoli ai Logosului înomenit, au trăit la diferență de câteva secole, manifestându-se ca nişte penduluri, fiecare oscilând deasupra punctului celuilalt. Nu s-au descoperit diplome, certificate, foi matricole sau alte acte care să ateste că vreunul din ei a urmat vreo școală, deși numele lor apare în registrele anumitor instituții de învățământ superior.

1. Nicholas Flamel (autorul Pietrei Filosofale)

2. Paracelsus (inventatorul remediilor chimice)

3. Fulcanelli (cel fără identitate)

Dar profețiile vechi ale unui guru indian anunțau că, la distanță cam de un secol și jumătate de cel de-al treilea, va apărea ca de nicăieri cel de-al patrulea alchimist, un d'Artagnan neînfricat care va completa definitiv formula celor 4, simbolul stabilității, reflectând energiile arhanghelilor. Acesta din urmă, făclie veșnic aprinsă, a cărui identitate *mistica y eterna* va fi dezvăluită la timpul cuvenit, a dat de înțeles că știe secretul a ceea ce face ca cerul să se unească cu pământul, Dumnezeu devenind una cu Omul. El a spus doar atât:

"Eu sunt infinitul."

Leadership: Ceea ce te face să adaugi valoare viziunii tale poate fi circumscris unui destin (greu încercat) responsabil de cultivarea unei perspective care trece dincolo de ceea ce ştii despre tine?

Eterna regulă, numărul patru. Toți acești patru alchimişti, Reyes de Reyes, Señores de Señores, au fost puși deoparte încă de la naștere, au fost protejaţi și legați între ei printr-un *Spiritus Sanctus Supremo*, iar marii profeți ai timpurilor ascunse au scris dinainte numele lor într-un papirus roz-alb, denumit Rosa Ponselle. Ei vor fi cunoscuți drept oglindiri ale adevărurilor revelate într-un singur om, Messia, în măsura în care acesta va reprezenta identitatea obiectivă a universalului şi particularului.

Iar eu nu mă aflu aici că scot la iveală ce se ascunde în spatele ecuaţiilor mega-absconse pe care numai iniţiaţii le pricep, nici nu vorbesc despre cele ce se vor întâmpla după a doua venire a lui Hristos, ci doar amintesc lumii de o viziune misterioasă proiectată ca o reţea de legături tainice şi nebănuite.

Tot pe această linie a profeţiilor se înscriu textele lui F. W. J. Schelling, din care a meritat să extrag, *com precisão e cautela*, un scurt fragment pe care, de altfel, cititorii de rând îl pot scăpa uşor din vedere:

"La răstimpuri bine cumpănite se aşteaptă apariţia acelui spirit grandios care ar urma să scoată filozofia din mizeria ei actuală, articulând din nou, într-o viziune genială, marile

membre ale unui edificiu somptuos al gândirii. Filozofia va regăsi atunci drumul pe care ea a mers secole de-a rândul, părăsind potecile şi fundăturile pe care au împins-o indigenţele veacului. Desigur, trebuie să fim conştienţi că pentru o asemenea întreprindere este nevoie de o minte cu adevărat genială, care să fie capabilă să conjuge până la capăt imensa masă de informaţii pe care a acumulat-o între timp omenirea, ba pe deasupra, să găsească răspunsuri la marile întrebări pe care criza contemporană le-a adăugat celor tradiţionale. Că lucrurile stau aşa, că inteligenţa secolului nostru îl aşteaptă periodic pe Messia, se vede tocmai în incoerenţa cu care sunt abordate subiectele oricărei ştiinţe, mentalitatea colectivă nereuşind să asimileze înţelepciunea eternă, luminoasă, care conferă stabilitate iubirii pentru Dumnezeu."

Leadership: Eşti supus fenomenului de "oglindire în propria fiinţă", atunci când ceea ce marchează tot cursul existenţei tale este dat de percepţia unei unităţi organice a cărei identitate supraviețuiește trecerii timpului?

Acest Messia îşi va săvârşi lucrarea sub pecetea unui d'Artagnan care nu se lasă câtuşi de puţin atins de ascuţişurile gândirilor înguste, fără fond spiritual, cu precădere în cazul unei interpretări precare a ştiinţei. Căci infinitul nu poate fi cuprins decât cu ajutorul ştiinţei, iar d'Artagnan este un vizionar care se înalţă deasupra măruntului său sine, ajungând prin îndrăzneală şi chibzuinţă la o reală eliberare a intelectului, reuşind să se avânte în imperiul netulburat al posibilităţilor nelimitate.

Da, el este un vizionar care propagă ideea de "legătură permanentă" între cei patru stâlpi trainici ai spiritualităţii: Mind, Body, Spirit and Truth, sau Rugăciunea, Stăruinţa, Contemplarea şi Slujirea cuvântului sfânt.

Cititorii lui Dumas ar fi trebuit să-şi dea seama că d'Artagnan nu era un om oarecare, deşi prezenţa lui în orice loc, fără să bată la vedere, era luată drept o existenţă obişnuită. Însă sufletul lui furtunos, condus de o minte strălucită, era stăpânit de o aură divină. Deşi îşi spunea mereu că îl pândeşte peste tot pericolul, şi chiar moartea, cugetând asupra diferitelor firi ale celor cu care urma să se bată, el începea să vadă mai limpede înaintea lui. În el era acel substrat neclintit de dârzenie, pe care i-l sădiseră în inimă tocmai sfaturile tatălui său: *"Nu ocoli împrejurările neaşteptate. Trage mereu folos de pe urma greşelilor tale şi ale altora, şi nu uita că cine şovăie o clipă, acela poate scăpa norocul pe care soarta i-l întinde tocmai atunci."*

Urmează-i pilda că să ajungi şi tu ca el, fiindcă nu ştii niciodată ce spirit divin se ascunde în tine.

Leadership: Viziunea ta este mai cuprinzătoare cu cât îmbină, cu o pătrundere demnă de o minte genială, reflexivitatea şi tranzitivitatea?

Să ne gândim la cele două atribute ale viziunii care l-a însufleţit pe d'Artagnan de-a lungul drumului. Primul atribut, reflexivitatea reprezintă atenţia pe care trebuie să o acorzi caracterului tainic al realităţii pe care o trăieşti printr-o existenţă care nu este a ta, ci aparţine unui Dumnezeu protector. Iar tranzitivitatea este un fel de relaţionare cu nişte spirite puternice care veghează asupra destinului tău. Vei dobândi o valoare exemplară, extrasă din *Semnul Celor Patru*, îndată ce împrumuţi o semnificaţie care depăşeşte limitele existenţei tale individuale.

Din păcate, în ziua de azi toate drumurile sunt arhipline de "muschetari", aventurieri porniţi în căutarea norocului pe care îl poate oferi descoperirea eventuală a unui Sfânt Graal. Fiecare se avântă în nenumărate şi complicate intrigi, ameninţări şi diplomaţii, prilejuri de a se afirma şi de a se impune prin imagine, luând-o mereu pe scurtături. Dar toate aceste treceri nemarcate, raiduri grăbite, presărate cu multe eschivări, fente şi driblinguri, înnoadă tot mai mult firele

înţelegerii ideii de "Unitate în harul Divin".

Pe când adevăratul d'Artagnan, acel Messia mult aşteptat de toţi, va fi ca o luare prin surprindere, ca o apariţie neaşteptată şi aducătoare de speranţă tocmai atunci când lumea va fi cel mai aproape de distrugerea ei totală, cauzată de forţele obscure care sfidează planul divin.

Iar acest d'Artagnan, ia-l de unde nu-i. Tocmai el, cel mai avântat dintre toţi, cel mai tânăr şi mai talentat dintre cei patru, el va duce lupta *em segredo* pe un front spiritual împrumutat de la antici, un fond spiritual trecut prin sita fină a unei gândiri unice şi primordiale ce se manifestă exact ca un vânt firav de vară: nu-l simţi, nu-l vezi, dar se împrăştie pe o rază foarte mare...

Despre leadership se poate vorbi în cazul în care trebuie să integrezi mai multe viziuni într-un singur ochi care să vadă mai clar şi mai departe decât alţii. Iar un ochi clarvăzător este susţinut de o minte sclipitoare care se autoeducă şi îşi mobilizează toate forţele spre a accede la o treaptă spirituală superioară.

Oglindirile adevărurilor revelate într-un singur om sunt acele imagini care în funcție de unghiul din care sunt privite pot prezenta asemănări, dar nu sunt, în niciun caz, identice. d'Artagnan este un simbol care confirmă această interpretare: cu cât imaginea ta se va distinge mai mult de celelalte imagini similare, cu atât va fi mai personalizată.

Olympic Flame

On Martie 23, 2018

Învaţă să te conectezi la propria persoană, motivându-te în permanenţă să obţii maximum calitativ a ceea ce îi defineşte pe ceilalţi asemănători ţie.

Ascult "Dj Tiesto - Olympic Flame", din uimirea pură pe care o trăiesc în faţa unei intervenții complicate a artei în rostirea unui nou mod de gândire specific esteticii unei mărturisiri care e mai valoroasă atunci când e privită din partea practică a formelor de raportare la alteritate, decât atunci când mă ţine pe loc într-o plăsmuire a subconştientului emoţional.

De atâta ori am încercat să simt ritmul acestei melodii în gama percepţiilor despre mine, în interiorul conştiinţei unui destin emanat din veșnicie, de la care se trage începutul unei aventuri în marele infinit integrat câmpului vizual al filozofiei vieţii, transpus într-o literatură care tinde a descoperi noi valenţe de evocare artistică ieşite din comun.

O ascult neîncetat, în aceeaşi măsură cu care artistul îşi revede cu multă atenţie tabloul înainte de a-l transpune pe pânză, fără teama de ce mi-ar putea rosti direct în minte o singură parte a universului cunoscută ca având viaţă - eterna artă a exprimării nuanţate, intelectuale, care mă aduce până la urmă la acel imperativ "aminteşte-ţi de tine însuţi" în marea cuprindere a imaginii artistice plasată într-un plan ficţional.

Leadership: Eşti obligat sub presiunea actului de creaţie să reconsideri conceptul de PUTERE cu toate ecourile sale, privindu-i pe ceilalţi oameni "Diferiţi, dar egali cu tine" într-un context de trăire autentică la care trebuie să revii?

Nu-ţi ia mult timp să descoperi că genul meu literar, cerând însuşiri de mare fineţe, se supune combustiei dintre trance, techno şi house, câteodată rock sau slow, între allegro şi presto, culminând cu un andante folosit pentru a ilustra unitatea unei lumi organice. O lume demonstrată şi justificată prin nişte umbre care se plimbă pe o pânză cu ţesătură rară, prin intermediul căruia artistul îşi schiţează în gând ce vrea să deseneze.

Adesea trec de la un punct de vedere la altul, imaginea de ansamblu fiind singura cale de a descifra un înţeles care de multe ori scapă minţilor firave ce uită tot mereu că geniul este o stea misterioasă care iese din contextul firesc al naturii şi pe care artiştii o admiră fără binoclu, printr-un geam imens numit "experienţă perceptivă" sau "iluzie optică".

Tiesto este corespondentul artistului care îşi dezvăluie propria existenţă pentru a face cunoaşterea sinelui să progreseze şi pentru a plasa arta în realitatea socială, este omologul meu pe tărâmul muzicii, iar el nici măcar nu bănuieşte acest lucru. Nici măcar nu mă cunoaşte. Deocamdată. Poate doar atunci când va stărui să compună din scrierile mele un nou refren îşi va da seama cât de mică este lumea.

El este partea mea auditivă şi vizuală, eu îi întregesc originalitatea prin sensul ce-l atribui ritmului alert în care sunetele par a fi coliniare cu punctele dintr-un univers unde simbolul nu are nevoie de protecţie.

Scrierile mele, acoperind acordurile melodiilor sale, sunt imaginate printr-un transfer energetic a formulelor de definire şi promovare a unei arte invincibile prin unicitatea sa, ca un fel de legătură strânsă între miile de generaţii care ne-au precedat şi miile de generaţii care vor veni. N-am uitat faptul că în altă viaţă am fost cel mai probabil muzician.

Leadership: Reprezentarea propriei experienţe lăuntrice reprezintă o bună ocazie de a atrage atenția, într-un context de mare vizibilitate, asupra existenţei unei entităţi omnisciente şi eterne?

Dincolo de reflecţia sunetelor propagate într-un şir lung de cuvinte, dincolo de gândurile pe care le răscoleşte un construct energetic, dincolo de tot ceea ce este temporar, există o adiere fără de formă a Infinitului care anunţă prezenţa intrinsecă a unui hiper-semnal difuz, armonizat într-o inteligenţă universală, demnă de un artist care se străduieşte să zugrăvească o entitate omniscientă după deviza: „Omul este măsura tuturor lucrurilor".

În greceşte, Amfisbena înseamnă "care merge în două direcţii". Îmi asum acest termen prin convertirea lui într-un singur semnal ce trebuie transmis mai departe, amplificat de trăirea plină de înfiorare a unei experienţe care sfidează trecerea timpului.

Ca urmare, încep a pune pe primul plan al creaţiei două moduri diferite de a face artă: prin sunete (prima mişcare a puterii creatoare) care determină înţelesul acordat scânteii divine din interiorul meu, şi prin puterea de generare a ideilor ce o deţin pentru a crea mereu noi universuri. Din care, şi tu cititorule, faci acum parte.

O grupare de sunete are cel puţin un înţeles pentru mine, ca şi pentru Jorge Luis Borges: "Gloria să fie cu Cel care nu moare ! "

Leadership: Taina artei de a te cunoaşte pe tine însuţi constă în a-ţi afla reflecţia într-o formă de creaţie pe care şi-o construieşte o altă identitate sub aspectul unei multiplicări a prezentului?

De fiecare dată când ascult "Olympic Flame" simt nostalgia cărţii pe care trebuie s-o scriu, o adevărată saga între privirea aruncată în lumea artei şi genealogia sinelui care verifică împlinirea făgăduinţelor făcute de Dumnezeu celor care îşi ţes existenţele în două lumi diferite, dar unite de aceeași abordare creativă.

Sunt un scriitor între muzicieni, un sculptor printre pictori, un zeu printre muritori, un trecut absorbit într-un prezent care îşi scormoneşte viitorul, sunt riguroasa carte de nisip a lui Borges transpusă în memoria lui Shakespeare. Sunt Tiesto într-o permanentă căutare a celor mai profunde sensuri ale muzicii, transpuse într-o sumă de cuvinte îmbrăcate cu emoţiile aferente unei experienţe de sinceritate.

Toate lucrurile vor rămâne ceea ce sunt, piatra va rămâne piatră, cuvintele vor rămâne cuvinte. Eu, printre ecourile altei fiinţe, voi rămâne singura variantă care mă va face să mă simt deasupra tuturor, posesorul cunoaşterii infinite, creatorul şi umbra lui. Voi rămâne Tiesto al unui sound desfăşurat continuu pe linia timpului ce acţionează ca purtător al unei cantităţi nebănuite de forme de exprimare a universului interior.

Negreşit, simt că mă voi reîntoarce la o abordare personală a piesei "Olympic Flame", într-o exprimare plină de emoţii, într-o manieră originală de a face artă, individualizându-mă prin curajul pictorului de a evita ceea ce place prea mult. Dar de ce este aşa, nu ştiu. Probabil flacăra trebuie să se menţină aprinsă în marea olimpiadă a stelelor din lumea veşniciei.

Mă voi regăsi atunci când mă voi întoarce.

Marea capodoperă a creaţiei universale poate fi percepută ca o continuă pendulare între două sau mai multe identităţi particulare ce îţi asumă o istorie a prezenţei "eternului" în

lume.

Olympic Flame evidenţiază reacţia ta în faţa unei situaţii ce impune alegerea: a fi un prezent continuu în mentalitatea umană sau a fi un viitor în trecutul amintirilor tale?

*** Notă:** Dj Tiesto - Olympic Flame

Omul care a redat viaţa luminilor apuse (II)

On Mai 29, 2012

Înzestrează-ţi leadershipul cu capacitatea de a surprinde cele mai fine reacţii umane, fără să-ţi orientezi forţele creatoare şi puterea de influenţă în direcţia propriilor ambiţii.

Mă învăluiam înadins în sublima obscuritate, în camera fără ferestre, în cochilia sfântă a facerii. În aşa fel îmi drămăluiam capacitatea de înţelegere a naturii umane încât să-mi pot construi personajele după un tipar cât mai real, cu un contur bine definit care să dea greutate acestora. Eram uluit şi atât de satisfăcut de cele ce se petreceau la comanda voinţei mele care se îndeletnicea cu fabricarea şi autentificarea emoţiilor cele mai intense, la cererea imaginaţiei care se lupta cu realitatea pentru acceptarea supranaturalului.

Ca un senator care dezbate şi introduce în plen o nouă lege, continuam să mă adâncesc cu nonşalanţă în atmosfera personajelor firescului şi nefirescului, inteligibile doar prin raportarea lor la sinele meu. Cu autoritatea unui magistrat continuam să cercetez aplicarea fără temei a legilor divine şi omeneşti, cele scrise şi nescrise, originale sau contrafăcute - dar fără să judec urmările, fără să pronunţ nicio sentinţă. De parcă aş fi fost prins în angrenajul unei intrigi poliţiste, înaintaşul central al celor mai complexe demersuri, silit să iau parte, ca un martor nevăzut, la frământările personajelor mele, la căutările lor, la întrebările lor, la transformările lor.

Numai un artist care îşi pune arta în slujba unei meniri înalte, în alcătuirea unei opere supradotate, împânzite cu personaje misterioase, încărcate de forţe imanente. Numai un Marion Zimmer Bradley sau un Stephen King, m-ar fi putut înţelege, mi-ar fi putut desluşi secretele. Şi chiar şi ei ar fi putut fi duşi uşor în eroare, redirecţionaţi de fascicolul electrizant al confuziei induse cu multă dibăcie.

Leadership: Înainte să te decizi care este imaginea pe care ai dori să o proiectezi în lume, trebuie să dobândeşti acea înţelegere a personalităţii umane în complexitatea determinărilor ei naturale?

Leadershipul are ca obiectiv esenţial înţelegerea deplină a factorului uman. Însă nu te poţi alinia acestei înţelegeri, nu poţi pătrunde în ascunzişurile cele mai lăuntrice ale făpturii omeneşti, să înflăcărezi conştiinţele şi să le modelezi ca un sculptor care cu fiecare dăltuire a bucăţii de piatră simte că-şi desăvârşeşte opera, dacă nu-ţi înfrânezi pofta, elanul, lucida tendinţă de cucerire a piscurilor cele mai înalte ale persuasiunii.

Dacă vrei să construieşti o casă, nu poţi să te duci pur şi simplu pe un teren străin şi să ridici pereţii ei. Mai întâi trebuie să te decizi asupra terenului, să obţii dreptul asupra lui, să efectuezi un studiu de fezabilitate şi abia apoi să te apuci să sapi în primul rând fundaţia.

Persuasiunea, fără înţelegerea cea mai profundă a factorului uman, poate duce la prăbuşire sau la depreciere - este ca o casă fără fundaţie, o tentativă sortită eşecului de a construi un sistem trainic de leadership, o slăbuţă încercare de a stabili relaţii strânse cu ceilalţi.

Imaginea pe care o proiectezi în lume trebuie să fie în concordanţă cu complexitatea determinărilor naturale ale personalităţii tale, precum gradul de a detesta falsificarea realităţii, nivelul de a te aventura într-un teritoriu necunoscut, necesitatea de a redistribui mijloacele indirecte sau ocolite de transmitere a unui mesaj.

Numai acolo unde se termină naturalismul, începe iluzia !

Publicul era încântat de fiecare scenariu, de fiecare secundă care depăşea graniţele înţelegerii lor. Căci întotdeauna era prins în angrenajul formelor de influenţă produse prin transferul energetic al voinţei magicianului, de la negativ la pozitiv, de la copil până la matur, de la un suflet la altul. Era izbit cu forţa unui meteorit în procesul insidios al facerii şi desfacerii lumilor invizibile - temporal accesibile, legat ca nucleonii printr-o forță nucleară atractivă, generată de iluziile cele mai copleşitoare, capabilă să amplifice, să reformeze toate trăirile, toată exaltarea făpturii omeneşti.

Spectatorii vedeau masca, dar nu şi viaţa ce pulsa cu atâta energie în dosul ei. Vedeau omul, portretul autentic, atât de misterios al unei fiinţe coordonate de întuneric, prinsă în plasa pasiunilor cele mai intense, dar fără să-l poată înţelege, fără să poată pătrunde în acea realitate transcendentală care se impunea oricărei raţiuni. Erau împresuraţi de simboluri, invadaţi de spinii extraordinari ai magiei care le făcea inima să tresare - condiţia decisivă la ţintuire. Dar nu puteau să-i scaneze firea, nu puteau să perceapă golul său lăuntric, pe care numai secretele cele mai preţioase îl puteau umple.

Ei nu ştiau adevărul, nu erau conştienţi de factorul cel mai important al ecuaţiei: că numai acolo unde se termină naturalismul, începe iluzia.

Aici se cuvine să luăm aminte de sfatul lui Marc Aurelius: *"Să ai seninătatea de a accepta ceea ce nu poate fi schimbat, curajul de a schimba ceea ce poate fi schimbat şi mai ales înţelepciunea pentru a face deosebirea între cele două posibilităţi".*

Leadership: Îţi împlineşti experienţa de artist sub acoperământul aproape continuu al unui anonimat pe cât de nemeritat pe atât de salvator?

Secretele mele erau în siguranţă deoarece mă simţeam ocrotit de pavăza anonimatului. Cumva, eram complet străin faţă de ceilalţi oameni, condus de o tăcere acceptată şi neînţeleasă, pentru că tot ce exista deja trebuia să dispară. Aşadar, eram un om al faptelor adevărate care nu vedeau niciodată lumina zilei.

Influenţa ta este cu atât mai vastă cu cât leadershipul tău ia mai mult forma unei magii. Însă influenţa se modifică ca un bumerang cu traiectorii infinite, cu o forţă infinit mai mare decât cea cu care l-ai lansat - încât te corupe atunci când te îndeletniceşti cu ea numai pentru tine însuţi.

Tu însuţi poţi fi atins, ca de un glonte ricoşat, de forţa copleşitoare a propriei tale înrâuriri asupra celorlalţi, şi rănit din punct de vedere psihic şi emoţional, dacă anticorpii de bază ai leadershipului: caracterul nobil, capacitatea de empatie, aceste două barierele protectoare care menţin funcţionarea optimă a motorului care îţi garantează succesul în relaţiile interumane, - nu luptă cu virusul, cu intruşii: dorinţa arzătoare de a epata, mândria şi insistenţa de a-ţi impune superioritatea (nerecunoscută). Două forţe, care, ca într-un conflict de interese, se duşmănesc şi se încaieră necontenit. Apărătorul şi duşmanul. Şi doar un învingător. Care va fi acela?

Distribuirea forţelor creatoare în direcţia propriilor ambiţii, la comanda unei voinţe de fier, fără luarea în considerare a efectelor pe termen lung, este o tortură inutilă. Căci dacă Eul tău se supune presiunii constante a artei al cărei subiect îl constituie înrâurirea totală a celorlalţi oameni, subordonarea lor legilor şi principiilor tale a căror aplicare nu contribuie pozitiv la scoaterea la suprafaţă a unei individualităţi închegate, atunci vei împărtăşi soarta omului care începe un lucru, şi nu-l termină niciodată.

Este o muncă zadarnică, un chin al minţii, o vătămare a integrităţii caracterului să încerci să subjugi un suflet, în loc să-i redai măreţia.

Magia care te cotropeşte, fără să te întrebe dacă o primeşti, se produce atunci când gradul de abstractizare al reprezentărilor tale interioare şi al conceptelor propuse reflectă necesitatea de a interacţiona cu un Alter-Ego ce pare să fie cu desăvârşire străin de existenţa celorlalţi.

Omul care a redat viaţa luminilor apuse scoate în prim-plan echilibrul, conduita strictă din punct de vedere moral şi emoţional pe care trebuie să o respecte şi să o urmeze necontenit orice lider.

Dacă vrei să fii un geniu al spectacolului, atunci fii un magician. Dar facă vrei să fii lider, atunci fii un om, un om al înţelegerii, un magician al empatiei, cu un instinct al depistării şi propulsării simţurilor şi raţiunii, unul înzestrat cu capacitatea de surprindere a celor mai fine reacţii umane.

Aşa cum unui bun fotograf nimic nu-i scapă, prinde într-o sutime de secundă o mişcare, un gest, - tot aşa şi tu, ca să dobândeşti o nouă perspectivă a conştiinţei de sine, trebuie să dai dovadă de o perspicacitate excepţională faţă de acele mici aspecte ale realităţii, gândirii şi manifestării omeneşti. Nu te preocupa cu influenţarea oamenilor numai pentru sufletul tău, deoarece ea poate fi atât de nefastă, încât te poate corupe chiar pe tine.

Schimbarea nu se poate impune cu forţa. Şi chiar dacă acest lucru aparent este posibil, este doar o schimbare de suprafaţă, nu de esenţă. Numai atunci când un lider reuşeşte să inducă în fiecare om modificarea modelului de gândire şi de acţiune, numai atunci apare spontan dorinţa lăuntrică de schimbare proprie.

Omul care a redat viaţa luminilor apuse (I)

On Mai 26, 2012

Regândeşte orientarea şi posibilităţile de manifestare a propriei tale autorităţi, astfel încât să găseşti mai uşor un răsunet în planul psihic şi emoţional al celor din jur.

Nu voi uita niciodată omul, colecţionarul, visătorul care a trudit atâta amar de vreme şi a reuşit până la urmă să-şi clădească din neant, prin încrucişarea elementelor care dau contur cunoaşterii, prin distribuirea forţelor creatoare pe axele de coordonate reală şi imaginară, propriului său imperiu. Vast, meşteşugit din oţelul cel mai dur al gândirii, sfinţit cu focul cel aprig al simţirii. Relevant prin conţinutul său ridicat de dezvăluiri, străjuit de clasificări, structurări, descrieri şi disocieri.

Era un imperiu privilegiat care se autoperpetua prin captarea şi analiza unei realităţi mai bogate, mai profunde, mai aspre. Ce arunca cu forţa unui gigant firea omenească în vârtejul celor mai înflăcărate încercări, integrând-o în angrenajul complicat al destinului supus voinţei sale inexorabile.

Leadership: Îţi asiguri o reprezentativitate suficientă în a conferi forţă înţelegerii superioare asupra modului de a te poziţiona între partea misterioasă a ştiinţei şi bogăţia simţirii profunde?

Ca un om sedus de imprevizibil şi de provocări, mă cufundam în întuneric, într-o raţiune cunoscută doar de mine – în camera fără ferestre, în care nu pătrundea nicio rază de lumină. Dar în acest obscur, în acest ispititor lăcaş al exercitării controlului asupra simţurilor, laboratorul tainic al învierii naturii omeneşti, reuşeam să creez cu autoritatea unui medium forme vagi, neţărmurite, neliniştite sau evolutive. Să înalţ la nivel de artă o înţelegere superioară, o concepţie inedită a realităţii profunde care îmi contura, cu răbdarea tipică a unui pictor, identitatea genuină, scoţând la iveală cele mai de preţ însuşiri.

Cât de înălţător poate fi întunericul ! Cât de binecuvântat poate fi procesul de aprofundare a ştiinţei ! De parcă ar fi trebuit să demonstrez existenţa unor anticorpi produşi de organism în timpul unei infecţii anterioare, găsind pe această cale antidotul, vaccinul, substanţa care poate să neutralizeze bacteria, făcând-o inofensivă.

Antidotul care mă mobiliza necontenit, accelerându-mi presiunea sanguină, sub privirea critică a sinelui care se întreba „Quo vadis?", contribuia din plin la punerea în mişcare a energiilor dătătoare de forţă, sintetizând tot felul de înţelegeri, percepţii, atitudini şi sisteme de valori.

Magia – era transformatoare, restabilizatoare, consolidatoare. Trebuia să am răbdare, dacă voiam să reconstitui armonia fiinţei umane în totalitatea ei.

Leadership: Îţi poţi modela personalitatea în scopul atingerii desăvârşirii, începând de la punctul cel mai de jos al valorii tale?

Cu şapte ani înainte de debut, celebrul scriitor Feodor Dostoievski vorbea într-o scrisoare adresată fratelui său, despre aspiraţiile sale, despre menirea sa: " *Omul este un mister. Trebuie să aduc acest mister la lumina zilei, şi dacă am să-mi dedic toată viaţa acestui ţel, n-am să consider că am pierdut timpul degeaba: eu mă concentrez asupra acestui mister, pentru că vreau să fiu om.* "

Îţi poţi modela personalitatea în scopul atingerii desăvârşirii, doar dacă eşti pregătit să începi de la punctul 0, de la punctul cel mai de jos al valorii tale. Acolo unde se concentrează forma incipientă a caracterului tău, profunzimea propriilor tale trăiri, sau din punctul în care te găseşti în acest moment. Doar dacă reuşeşti să aduci la lumina zilei misterul propriilor tale resurse interioare, care îţi condiţionează existenţa.

În acelaşi timp, punctul cel mai de jos al valorii tale este dat, dacă ar trebui să-l citez pe scriitorul Cornel Ailincăi, de năzuinţa iniţială de redare realistă a lucrurilor în simbolul lor formal, sau, la fel de bine, poate pleca de la o descindere formală instinctivă, exploratoare, ale cărei trăsături sunt investite pe traseul cunoaşterii de sine cu o sugestie figurativă, de tip "închipuire".

Aşa cum un scriitor redă particularităţile unei figuri nu după un anumit tipar, ci după caracterul şi însuşirile personajului său, tot aşa şi tu, înainte de a-ţi câştiga locul la masa liderilor, trebuie să te cunoşti foarte bine, să te cufunzi mai adânc în tine însuţi, în abisurile cele mai utile sau mai primejdioase ale firii tale - prima dovadă a genialităţii. Pentru a descoperi adevărurile cele mai complexe ale vieţii tale, frumuseţea ta psihică şi emoţională, adevărurile care pot declanşa reacţia edificatoare - cea mai sănătoasă.

Îngăduie dorinţei tale neasemuite de schimbare să se materializeze. Fii mult mai mult decât ai crezut că eşti, mult mai mult decât un ins oarecare. Ridică-te cu mândrie deasupra tuturor celorlalţi, sintetizând acea înţelegere ce vine din atitudinea cu care alegi să întâmpini marile necunoscute ale vieţii.

A te afla la adăpostul magiei înseamnă să ridici standardul de performanţă al propriilor activităţi atât de sus încât să-l facă imposibil de atins pentru ceilalţi.

O realitate mai bogată este o experienţă de viaţă prin care treci, într-un anumit fel, când te afli în căutarea răspunsurilor de la capătul vizibil al unui fir răsucit de care trebuie să tragi cu tot efortul până ajungi la capătul celălalt.

Omul care a redat viaţa luminilor apuse aduce în prim plan acea capacitate de înţelegere a omului, de măsurare a dimensiunii sale epistemice, necontenita căutare de-a lungul întregii sale existenţe a elementelor caracteristice, definitorii, care contribuie la formarea sa.

Să acumulezi acel material de observări și de experiențe sufletești, să folosești acea putere psihică şi emoţională, de pe poziţia omului care a înţeles variabila existentă în trăirile cele mai profunde ale făpturii omeneşti. Cele care apar şi copleşesc, sau cele care au apus. Să-ţi creezi condiţiile necesare pentru a sintetiza, pentru a înţelege atitudinile şi poziţia adoptată de oameni. Aceasta constituie esenţa care dă o aură aparte leadershipului.

Leadershipul concentrează în propriul sistem de funcţionare întreaga existenţă a omului înveşmântat în lumina cunoaşterii şi a simţirii intense, profunde. A omului înzestrat cu puterea de a percepe şi de a descrie meşteşugit simţămintele cele mai adânc înrădăcinate în firea umană. A omului care, mai înainte de toate, şi-a dedicat timpul, ca un veritabil înţelept, ca un scriitor, ca un Balzac sau un Zola care adună toate informaţiile posibile despre personajele lor înainte de a le reconstitui personalitatea - descoperirii talentelor ascunse, a însuşirilor şi laturilor esenţiale în virtutea cărora să poată gândi, simţi şi acţiona cât mai eficient posibil.

Cum oare vei reuşi să ai autoritate în faţa celorlalţi, dacă nu-ţi stimulezi cunoaşterea de sine?

Regândeşte orientarea şi posibilităţile de manifestare a propriei tale autorităţi, astfel încât să găseşti mai uşor un răsunet în planul psihic şi emoţional al celor din jur.

Nu uita celebrele cuvinte ale lui René Descartes, " *Cogito ergo sum* " („Cuget deci exist") - ceea ce înseamnă să aprofundezi cunoaşterea de sine care reprezintă baza şi motorul cunoaşterii celorlalţi. Numai astfel leadershipul tău va exista şi va persista.

Omul care aprinde lumina din tine

On Iunie 05, 2014

Găseşte similitudini între dorinţa ta de autodepăşire şi raţiunea celor superiori ţie, astfel încât să fii în măsură să stabileşti o conexiune autentică cu primordialul.

Sensibilitatea lui Eisenstein, stimulată substanţial prin lecturi masive, îi deschidea larg ecluzele fanteziei. Dacă educaţia sa politehnică îi inoculase spiritul de analiză ştiinţifică, acum, în contactul cu Meyerhold, era cultivată tocmai această bivalenţă. Tânărul Eisenstein a avut şansa singulară de a-l întâlni tocmai pe acel dascăl de care avea nevoie.

A simţit de la început că se afla în faţa unui filon de aur. Voia să-l exploateze. După câteva lecţii, se declară plictisit de a tot desena pătrate şi cercuri. La sfârşitul unei ore îl rugă pe Meyerhold să mai rămână, deoarece avea să-i pună câteva întrebări. Eisenstein intenţiona să-şi provoace profesorul în sensul unor confesiuni privind procesul de creaţie al spectacolelor sale. Şi, reuşi.

Meyerhold, înflăcărându-se, începu de atunci să povestească la cursuri despre spectacolele sale din trecut, despre planurile sale regizorale. Din aceste povestiri, Eisenstein înţelese pentru prima dată ce înseamnă regia. *

Leadership: Urmezi calea unei raţiuni care îşi reduce dimensiunea individualistă în schimbul privilegiului de a fi o parte dintr-un întreg care spune o istorie?

Emiţătorul este un dispozitiv care conţine o baterie electrică alimentată periodic prin intermediul unui comutator special. Luăm în considerare acest lucru şi gândindu-ne la faptul că acum putem aborda cu deplin temei leadershipul, până şi exagerările sau erorile comise de o anumită proporţie de evaluare a potenţialului de dezvoltare al omului, trebuie să ne raportăm la un întreg care poate să ofere sprjin fără să aştepte nimic în schimb, putând fi modelat în funcţie de ceea ce reuşim să percepem ca informaţie de referinţă dintr-o realitate care este în afara noastră.

Activele de care depinzi efectiv pentru deprinderea unei perspective de creaţie nu sunt altceva decât o formă de motivare, cu un avantaj pentru ambele părţi, a liderului şi a susţinătorului său. Un fel de combinaţie inedită dintre valoarea generată de un solid explicator al ştiinţei şi valoarea admisă de un suporter al ştiinţei care încearcă să se ridice la înălţimea entuziastă a superiorităţii.

Ele pot fi considerate o opţiune disponibilă în orice interval al perioadei fertile de însuşire a unei noi identităţi, care are mai întâi o valoare intrinsecă pozitivă, prin faptul că alegi să nu urmezi calea unei raţiuni care nu-şi poate reduce dimensiunea individualistă. Dar şi o valoare extrinsecă pozitivă, sprijinită de idei, viziuni şi filozofii relevante pentru o evoluţie profesională complexă, restabilind legătura cu primordialul.

A urma calea unei raţiuni care îşi reduce dimensiunea individualistă în schimbul privilegiului de a fi o parte dintr-un întreg care spune o istorie, înseamnă să urci pe o treaptă de evoluţie superioară care include necesitatea de a fi în relaţii apropiate cu un Creator care deja are un rol activ în periodica recreare a lumii. Acest creator reprezintă unitatea din care emană principiul creator, izvorul vieții și condiția conservării propriilor capacităţi în forma unei conștiințe superioare.

Leadership: Îţi finalizezi procesul de afirmare personală în temeiul unui acord ce lasă o mare latitudine în privinţa conţinutului care ţi se oferă ca un privilegiu de a fi necesar unei sfere largi de modalităţi de exprimare a rezultatelor "rare" ?

Primordialul semnifică renaşterea în gândire, acea chemare specială de a sluji anumite exigenţe de performanţă şi competenţă de care ai mare nevoie pentru a elimina din tine "defectele de calitate" care te ţin blocat la un nivel inferior de evoluţie. Trebuie permanent avut în vedere acest aspect.

O încetineală sau o încetare a procesării elementelor definitorii de conţinut şi de formă, de ordin cantitativ şi calitativ ale personalităţii, datorate unei coordonări nesusţinute de manipularea competentă a materialului de aport pentru completarea fundaţiei de gestionare a cunoaşterii, de bunăcredinţă, din amândouă părţile, poate deveni mai degrabă o corvoadă, decât o parte integrantă a dezvoltării.

Conţinutul care ţi se oferă ca un privilegiu de a fi necesar unei sfere largi de modalităţi de exprimare a rezultatelor "rare" este o consecinţă a ordinii evenimentelor, lecţiilor de viaţă şi explicaţiilor inspirate care alcătuiesc dimensiunea unei inspiraţii referitoare la lumea exterioară care oferă atât interacţiune socială, cât şi experienţe noi. Acest conţinut răspunde trebuinţei de a cunoaşte şi a înţelege, de a stăpâni cunoştinţele şi de a formula noi teorii despre sensul creaţiei şi al creatorului.

Leadershipul este conținutul operei pe care o proiectezi în lume, asociat cu forma particulară de a intra în consonanță profundă cu natura şi profilul unui creator care a gândit totul în așa fel încât să fie folositor conceperii unor noi tendințe de evoluție şi valorificare a artei de a trăi o povestire.

Omul care aprinde lumina din tine, în calitatea sa de posesor al unei ştiinţe particulare, are puterea de a sparge zidurile propriei tale limitări, îndepărtându-te din zonele îngheţate ale gândirii abstracte care nu poate fi confortabilă dacă eşti mai mult axat pe abordări alternative, pe colectarea de resurse externe, cum ar fi un fond unic de cunoştinţe superioare.

*** Notă:** Ion Barna - *Eisenstein* , Editura Tineretului, 1966.

Omul care poartă simbolul trandafirului

On Iulie 30, 2019

Încearcă să testezi vulnerabilitatea destinului tău, gestionându-ţi evoluţia ca şi când ţi-ai interpune rostul vieţii între o mare putere de resemnare şi binecuvântarea unei prezenţe eterne.

Am încercat de multe ori să mă apropii de acea magnitudine a unui plus de imagine dat de modelul unei realităţi pământeşti cât mai perfecte, fără să aud glasul tainelor care îşi aşteaptă dezlegarea cuvântului sacru, strigând neîncetat "ai grijă cum îţi elaborezi partea de creaţie ! " Era acolo, mereu în preajma mea, concepută ca *actualitas* , identitatea unei puteri ce reuneşte forţa pământeană cu energiile supraomeneşti într-un cadru de rugăciune, dragoste şi prietenie ce se clădeşte pe cunoaşterea sensibilă a unei spiritualităţi inteligente, de o nobleţe deosebită.

Trandafirul te face să vezi lucrurile altfel.

La un moment dat, crezusem că totul se naşte dintr-un moment scurt de reflexie într-o oglindă care continuă să fie văzută mai mare decât este în realitate. Credeam că artistul îşi răscoleşte sufletul numai cu ce arată şi îşi hotărăşte soarta printr-o trecere într-un univers paralel, simţind în toate ceasurile, ca o sabie a lui Damocles, o poruncă ce vine mai de departe şi porunceşte mai straşnic decât cea pe care i-o strigă împrejurările: *"Nu uita că totul se întoarce, mai devreme sau mai târziu ! "*

Nu ştiu cum ar fi arătat trandafirul meu în alt univers, dar voi păstra veşnic în memorie imaginea lui de luptător singuratic, nobil, enigmatic și trist. Astfel, o personificare cu substantivul compus "bună-credinţă" nu poate fi evitată într-un context deja-vu, punând în prim planul unui simț al personajului de mare forţă artistică, cu valoare de model, şi al vieţii sale foarte intense, temeiul unei tehnici de şevalet, a unei descoperiri de sine şi a unei stări de transcendenţă.

Leadership: Îţi situezi abordarea realităţii pe coordonatele trasate de "frumuseţea unei capodopere" în elaborarea unui portret personalizat, cu convingerea că acesta poate reprezenta punctul de plecare esenţial în cadrul unui demers de construcţie a unei imagini de mare intensitate?

Trandafirul mă priveşte cu o anumită insistenţă, ca şi când ar domina o lume în aparenţă obişnuită, dar în realitate miraculoasă. E frumuseţea unei priviri la superlativ. Agent cauzal al sindromului de nemărginire a timpului. Îi simt prezenţa plină de emoţie, dar şi plină de intrigă, ca pe un refugiu în faţa unei lumi ostile, ca pe un colţişor al vieţii mele creatoare unde pot zice tot ce îmi trece prin minte, fără complexe, fără temeri, fără prejudecăţi.

Calmul unei naturi măreţe se vede în starea sufletească pe care o generează spaţiul unei realităţi cu contururi fragile.

Mă priveşte parcă ca pe-o minune, ca şi când aş fi fost primul om în stare să-i înţeleagă implicaţiile mistice, să empatizeze cu el, fapt ce-i conferă toată atenţia după care tânjeşte numai un erou din "The NeverEnding Story". Iar acel visător introspectiv pe nume Bastian, plasat într-o realitate alternativă, care simbolizează (la fel ca trandafirul) conştiinţa unei permanente înnoiri spirituale, îşi alimenta adesea sufletul din imaginea unei aspiraţii autentice aparţinând trecutului:

"Şi chiar dacă ar fi bănuit, tot n-ar fi acordat prea mare importanţă unei asemenea amintiri. Uitarea se petrecea însă pe nesimţite, iar când amintirea dispăruse cu totul, i se păru că fusese întotdeauna aşa cum era acum. Şi în acest fel i se potoli şi dorinţa de a fi frumos, căci cineva care a fost dintotdeauna frumos nu-şi mai doreşte un asemenea lucru.

Când ajunsese la punctul acesta începu să simtă o oarecare insatisfacţie şi i se trezi o nouă dorinţă. Să fii numai frumos nu e prea mare lucru ! Voia să fie şi puternic, mai puternic decât toţi. Cel mai puternic dintre puternici ! Iar a fi frumos şi puternic nu are preţ decât dacă eşti oţelit, rezistent şi spartan ! "

Bastian voia mai mult decât frumuseţea unui chip neşters de scurgerea vremii, mult mai mult decât expresivitatea unui zâmbet sincer. Voia să fie posesorul unei minţi sclipitoare. O nouă variantă a unei capodopere universale. Voia să experimenteze valoarea unei uniri Dumnezeieşti. O super-putere într-o nouă realitate.

Leadership: Creaţia ta asigură o concordanţă subînţeleasă între o viziune existenţială şi aducerea ei la realitate în cazul construirii unui simţ al numitorului comun atribuit respectului faţă de providenţă: "Măsura corectă a omului este lovitura dură a destinului său"?

Ştiind că de fiecare dată când formulez o imagine a mea în baza unei asemănări cu un trandafir se înlocuieşte un sens propriu cu unul figurat, respectând astfel o concordanţă subînţeleasă între o viziune existenţială şi un limbaj artistic corespunzător, mă voi consola cu faptul că este o pură coincidenţă suprapunerea unor evenimente bine cunoscute peste condiţia de ființă care îmbină atât de discret fragilitatea și infinitatea.

Această imagine măreşte eficacitatea exprimării într-un proces al sinelui contra sinelui desfăşurat în faţa unei entităţi omnisciente.

Cu multă vreme în urmă am citit romanul lui Mika Waltari, "Amanţii din Bizanţ". Eroul pentru care timpul lucra mereu în favoarea sa, Ioannis Anghelos, experimentează prin rugăciune o mustrare de conştiinţă cu puţin timp înainte de căderea Constantinopolului în mâinile sultanului Mehmed II. Cu picăturile de apă ce-i alunecau pe obraji ca nişte lacrimi, s-a rugat în inima lui:

"Îndură-Te, îndură-Te de mine, Tu, cel a cărui natură nu se poate explica ! Dacă există un înţeles în aceasta, îngăduie-mi să mă mai nasc o dată pe pământ ! Dă-mi înapoi închisoarea trupului meu, dă-mi înapoi lanţurile timpului efemer şi ale locului mărginit, ca să mai simt o dată în mâna mea mâna unui om. Păcatul meu a fost că Ţi-am dispreţuit lanţurile şi le-am urât, chiar dacă au fost darul pe care Tu mi l-ai dat. Sunt cel mai slab, cel mai prăbuşit, cel mai dispreţuit dintre oameni, fiindcă mi-am închipuit că sunt puternic, nu numai înaintea oamenilor, ci şi Înaintea Ta."

N-am uitat nicio clipă vorbele acestea. Lumea întreagă pare un moment înghețat într-un monolog istoric, o amintire a conștiinței pe care o experimentez de-a lungul unei linii trasate de o mână perfecţionistă, o linie care trece toate sentimentele umanității printr-o umbră ruptă de lumină. Totul capătă independenţă absolută în această viaţă efemeră, precum liberul arbitru într-un cadru determinist, într-un stil de "pot să aleg între două opţiuni diferite", dar există o forţă misterioasă care modifică întotdeauna capitolul cel mai important al fiecărui destin, conform unui plan mai amplu.

Încă nu m-am vindecat de uitarea a ceea ce mă face om, cu asumarea a ceea ce trebuia de mult să recunosc la mine conform prevederii lui Bias of Priene: *"Nu strânge altceva decât înţelepciune. E singurul bun pe care soarta nu ţi-l poate lua."*

Integrarea tuturor simţirilor, percepţiilor, gândurilor omului într-o imagine complexă este un fenomen tipic de recunoaştere a formelor de autoanaliză prin reflexie multiplă, care poate fi descris prin două trăsături complementare: puterea şi slăbiciunea.

Omul care poartă simbolul trandafirului îşi gestionează evoluţia ca şi când şi-ar interpune rostul timpului petrecut pe acest pământ între o mare putere de resemnare şi binecuvântarea unei prezenţe eterne care reduce totdeauna existenţa, atât de fragilă, de la atracţiile deşarte la consolidarea durabilă a spiritului de veghere.

Dacă vedeți un om frumos într-un vis care vă vorbește despre putere, cu toată aparența pe care ar avea-o o stea dacă ar fi observată de la o distanţă foarte mică, și simțiți prezenţa divină care izvorăște dintr-o rară perspectivă panoramică, amintiţi-vă că toată splendoarea trandafirului stă în a-l descoperi zilnic, din nou şi din nou, sub alt aspect, sub altă identitate, într-un alt decor şi sub o altă formulă de creaţie artistică.

Omul care s-a retras în locul fără nume

On Februarie 07, 2017

Apropie-te de acea valoare a maturităţii asumată prin hotărârea de a te ridica mai sus de condiţia formării tale, limitată de adevărurile realităţii din jur.

Edward Prendick este personajul principal al romanului „Insula doctorului Moreau". Atenția cititorului se îndreaptă cel mai mult spre atitudinea și gândurile acestui gentleman din clasa superioară, împărtăşite în finalul romanului:

"M-am retras din vălmăşagul oraşelor și al mulţimilor și îmi petrec zilele înconjurat de cărți pline de înțelepciune, ferestre strălucitoare în această viață a noastră. Îmi consacru mare parte din timp cititului și experienţelor de chimie, iar multe din nopţile senine mi le petrec studiind astronomia. Încă mai lupt cu închipuirea unei imagini de mișcare, dar eu nu mă mişc cu adevărat.

Există în nenumărate stele sclipitoare de pe cer o senzație de infinită pace și ocrotire, deși nu știu cum și nici de ce. Acolo, cred eu, în legile vaste și eterne ale materiei, și nu în grijile, păcatele și necazurile zilnice ale oamenilor, trebuie să-și găsească alinarea și speranța tot ce este mai presus de animal în noi. Cel puțin așa sper, deoarece altfel n-aș putea să mai trăiesc. Și, astfel, în speranță și singurătate, ia sfârșit povestirea mea."

Leadership: Te simți expus unui context de viață care accelerează expansiunea conştiinţei tale spre o zonă a disponibilităţii de a-ţi accepta limitele și condiţia de fiinţă fragilă?

Dispoziţia introspectivă poate fi pusă pe seama receptivităţii faţă de cerinţele vieţii cât şi pe seama receptivităţii faţă de cerinţele măreţiei de a te forma pe o mereu mai înaltă treaptă a spiritului. Această dispoziţie reprezintă o analiză asupra motivaţiei de a depăşi starea de incertitudine sau indeterminare, faţă de tot ceea ce te înconjoară, prin intermediul unei conştiinţe a asumării adevărurilor care au dus la fiinţarea unei anumite realităţi.

Percepţia asupra propriei persoane îmbină puterea de acceptare a adevărurilor descoperite prin experiența situaţiilor bulversante, cu realitatea dură a unei existenţe care te expune unei excluderi din mijlocul lumii.

Cea mai grea luptă pe care o ai de îndurat de-a lungul vieții, în faţa unei realităţi pe care de multe ori nu o dorești, dar trebuie să o accepți ca pe un sacrificiu al omului superior în dorința de a atinge un nivel mai înalt al înţelegerii lumii, este cea care se dă între mintea și inima ta, pentru că niciodată nu știi pe care s-o asculți.

Adevărul pe care se clădeşte o personalitate de mare valoare ştiinţifică poate fi exprimat în felul următor: tot ce e mai presus de tine face parte din puterea singurătăţii care tinde spre unitatea credinţei în strădania de realizare a desăvârşirii personale.

Să afli acele adevăruri care contrazic crezurile personale este una din cauzele transformării raţiunii existenţei într-un deficit al sineităţii. Iar a suporta aceste adevăruri, pornind de la analiza percepțiilor persoanele care controlează stările de spirit, înseamnă de fapt să te apropii de acea valoare a maturităţii asumată prin hotărârea de a te ridica mai sus de condiţia formării tale, limitată de ceea ce se întâmplă în jur. Păstrează-ţi seninătatea în mijlocul haosului !

Maturitatea nu înseamnă să alegi și să adopţi ceea ce te reprezintă mai bine ca om care îşi ia foarte mult feedback din viaţa reală, judecând aspru şi cu mare exactitate lumea în care trăiește. Ci înseamnă să accepţi că ai capacitatea de a fi aşa cum îţi dorești în ciuda adevărurilor realităţii care îți alimentează înstrăinarea de tot şi de toţi.

Cea mai profundă nevoie a omului de ştiinţă este de a-şi îndura izolarea, de a-şi simţi singurătatea într-un fel dincolo de ordinarul lucrurilor, încât să ajungă la unitatea credinţei adevărate. Aşadar, credinţa acestui om în perspectiva desăvârşirii lui nesfârşite ţine de capacitatea de a-şi înfrunta Egoul, de a rezista presiunilor de a fi ca ceilalţi oameni, adică să-şi asume provocarea de a nu fi reprezentantul unei lumi atât de dezbinate, dezarticulate, pe care de dispariţie.

Marii oameni de ştiinţă, precum Edward Prendick, aleg să-ţi şi trăiască singurătatea într-o lume a lor, a createi, a imaginaţiei, a aspiraţiei spre absolut, spre desăvârşire, preferând să-şi creeze o imagine falsă, ascunzându-se în anonimat, decât să fie în prim planul unei lumi care nu este încă pregătită să accepte schimbarea, revelaţia adevărurilor divine.

Marele dat al destinului de "Creator şi Descoperitor" este desăvârşirea pe care o atingi atunci când spui „NU" unei lumi care este diagnosticată pe alocuri ca fiind trecătoare, printr-un colaj de trăiri, gânduri și comportamente care te inspiră să crezi că imposibilul nu este imposibil.

Omul care s-a retras în locul fără nume se află la un pas de a-și câștiga locul binemeritat pe lista marilor descoperitori ai sensului vieții.

Forţa unui asemenea om de a accepta realitatea şi de a îndura adevărurile greu de combătut, trebuie să fie mai mare decât starea de tristeţe a dezamăgirilor, măcar un pic mai mare, dar niciodată egală, altfel el nu va putea niciodată să se ridice deasupra condiţiei sociale și de a-şi găsi o menire.

Greutatea probei de caracter se determină atunci când te ridici deasupra propriilor trăiri și rămâi în continuare bun și plin de har, chiar dacă te simţi expus unui context de viață care accelerează expansiunea conştiinţei tale spre o zonă a disponibilităţii de a-ţi accepta limitele și condiţia de fiinţă fragilă.

Source: https://neculaifantanaru.com/omul-care-s-a-retras-in-locul-fara-nume.html

Omul destinului, supus forţelor eterne

On Mai 22, 2012

Adaugă valoare leadershipului tău, modificând modul în care percepi felul tău de a fi.

Cea mai mare nebunie a tuturor timpurilor: să te plimbi alături de inteligentul adulmecător al celor mai subtile, invizibile, particularităţi ale naturii umane. Întreaga pasiune, sublimul entuziasm al acestui spirit puternic, foarte evoluat, se încarcă şi se descarcă, ca o baterie de înaltă tensiune, în spatele zidului nepătruns al unei fiinţe cu chip şi trup omenesc, al unui muritor, Joe Black.

Iar marele magnat Bill Parrish era silit să-l urmeze pe Joe peste tot, sau mai degrabă să-i accepte prezenţa, tacit, cu supunere, ca un om privat de libertate, ca un chiriaş care a acceptat să semneze un contract cu drepturi şi obligaţii convenite doar proprietarului. Târât peste tot, ceas de ceas, de forţa înfiorătoare, implacabilă şi ireversibilă a unei voinţe superioare, împins într-un neant nămolos de intensitatea unei tornade care a făcut înconjurul întregii sale fiinţei, provocând haosul în sistemul său fizic, moral, spiritual şi emoţional.

Niciodată situaţia lui Bill Parrish nu fusese mai periclitată, mai disperată, mai lipsită de perspectivă. O umbră, o fantasmă rătăcită îşi făcuse loc în viaţa lui, reglând cu iuţeala unui fascicol de energie, cu precizia unui ceas mecanic, în totalitate, necondiţionat, puterea lui de orientare. Îndepărtându-l de orice adevăr cunoscut, de orice cunoaştere omenească (sau făcând-o incertă, supunând-o erorii), denaturându-i respectul profund pe care şi-l purta sie însuşi.

În timp ce se plimbau prin mulţime, Bill Parrish, curios, îngrijorat ca un om care caută deznodământul vieţii, încordându-şi la maxim voinţa în încercarea de a desluşi marele mister al destinului omenesc, îşi face curaj şi-l întreabă pe Joe Black:

- Cum merg lucrurile în altă parte? (adică, voia el să spună, dacă eşti numai în preajma mea cum îi poţi superviza pe toţi ceilalţi muritori?)

Joe, sau mai degrabă Prinţul Întunericului, îi răspunde:

- Când o parte a ta e ocupată, o altă parte a ta se ocupă cu altceva. Corect? Acum înmulţeşte acest concept cu infinitul, du-l la adâncimea unei eternităţi şi vei avea doar o mică viziune a ceea ce se întâmplă.

Leadership: Continui să priveşti o fotografie la nesfârşit?

Filmul " *Meet Joe Black (1998)* " este o metaforă. Iar Joe este conştiinţa vie, lucidă - nu cea mecanică, este conştiinţa care repară şi întregeşte personalitatea omului erudit, stimulând circulaţia energiei în corpul judecăţii şi raţionamentului său, în cursul procesului de schimbare. Numai conştiinţa cea mai copleşitoare, forţa majoră sub presiunea căreia omul este uneori constrâns să lucreze şi să se conformeze, poate avea o înrâurire benefică asupra întregii sale dezvoltări, până la desăvârşirea sa.

Mai simplu spus, nu-i de-ajuns să te consideri un om mare – pentru a fi cu adevărat virtuos. Nu-i de-ajuns să ai o înrâurire asupra întregului tău viitor, căci spiritul, sufletul şi intelectul, materia din care e constituită fiinţa ta şi care îţi pune adesea conştientul la bătaie, va

rămâne o enigmă în foarte multe privinţe.

E ca şi cum ai continua să priveşti o fotografie a ta la nesfârşit, făcând abstracţie de defectele şi imperfecţiunile omului din fotografie. Refuzi să admiţi că ele există - te consideri perfect, imbatabil şi strălucitor din toate punctele de vedere, adică ajungi să te idolatrizezi. Dar nu vei fi niciodată desăvârşit dacă te priveşti mereu fără ochi critici, fără să corectezi ceea ce este de corectat.

Leadership: Eşti îndeajuns de capabil să trasezi limitele a ceea ce crezi că este posibil să devină realitate, pe măsură ce îți stabilești un cost final cu tot cu taxe într-un univers pe care nu-l cunoşti?

Joe Black i-a dezvăluit, indirect, multimilionarului Bill Parrish, un mare adevăr - care poate fi exprimat în felul următor. Ceea ce crezi că ştii despre tine, despre lume, este de fapt o infimă parte dintr-un univers pe care nu-l poţi cunoaşte şi cuceri cu armele specific umane. Această cunoaştere rezultă din combinarea pieselor albe şi negre ale existenţei tale, pe baza aceloraşi legi care guvernează lumea materială şi nematerială. Compară-te doar cu tine însuţi, cu ceea ce-ţi şopteşte conştiinţa că eşti sau că nu eşti. Poţi?

Conştiinţa vie este ceea ce îţi repeţi mereu cu condiţia de a-l crede. Iar dacă ceea ce crezi nu are ca izvor de inspiraţie un fapt particular ridicat la rangul de fapt crucial, prin restrângere la efectele induse de anumite acţiuni, atunci volumul total al valorilor care te simulează să mergi înainte şi să te priveşti într-o altă lumină cu ochii altuia, scade până la minimul tău de referinţă numit: "simţ critic".

Un univers pe care nu-l cunoşti este o minte care te cucereşte prin necunoscutul cu care te intersectezi cam des în drumul tău spre succes şi care devine irezistibil tocmai prin sondarea a ceea ce a fost interzis sau inaccesibil cunoaşterii şi înţelegerii tale.

Singura modalitate de ieşire dintr-o boală este să treci prin ea până la capăt.

Liderii au tendinţa de a-şi face cunoscută personalitatea printr-o atitudine de superioritate (uneori arogantă). Ei îşi întreţin funcţionalitatea numai cu convingeri şi preocupări înalte, îmbrăcând mantia personalităţii omului exemplar, cu caracteristici deosebite şi mai speciale decât le-ar avea ceilalţi din jur. Pot fi uşor zdruncinaţi din toţi rărunchii, loviţi în amorul propriu precum o boală neiertătoare, în forma ei galopantă, şi izbiţi de zidul neputinţei – din punct de vedere psihologic - de primul val de criză.

Este criza omului care trudeşte neîncetat, încearcă din răsputeri să-şi aducă la un nivel cât mai înalt calităţile de om, nu doar de lider, cele pretenţioase prin greutatea lor, care le încearcă numai coloşii – oamenii cu cea mai bună pregătire şi cu cea mai înaltă valoare morală şi spirituală, care îşi fac o pasiune din a se ridica ca nişte zgârie-nori, în fel şi chip, deasupra celorlalţi semeni, tinzând spre perfecţiune. Dar care se lasă ispitiţi, ca un Iuda Iscarioteanul, de sclipirea de aur a ambiţiei de a izbândi în obiectivele propuse - trădându-şi în cele din urmă originea, minimalizând adevăratul sens al vieţii.

Este boala renegării fundamentelor care stau la baza desăvârşirii, a neînţelegerii corecte a existenţei umane. Bruscarea legăturii secrete cu ceea ce presupune să fii realmente virtuos. Să nu izbuteşti să-ţi optimizezi leadershipul în lumina calităţilor care sunt în măsură să-ţi corecteze imperfecţiunile de judecată, de caracter, să dai ascultare acelui Eu care nu face casa bună cu chibzuinţa şi cu înţelepciunea – iată calea către un aparent succes, însă nu spre acel măreţ succes, neimpozabil, deplin şi remarcabil.

Iar de această boală poţi scăpa numai dacă treci prin ea până la capăt - să te îmbolnăveşti, să simţi durerea imperfecţiunii în fiecare latură a personalităţii tale, în adâncul celor mai simple aspecte care te caracterizează. Să-i faci faţă cu răbdare, să o învingi prin schimbarea modului de gândire şi simţire, să domoleşti presiunea acelor gânduri şi pasiuni de sporire a mândriei proprii, să o treci pe cât posibil, ca pe o formă de energie, de la forma maximă la una minimă.

Forma maximă pe care o ia abandonarea de sine în faţa unor situaţii şi responsabilităţi care te depăşesc are ca echivalent acceptul că ceea ce crezi că ştii despre tine şi despre lume, este de fapt o infimă parte dintr-un univers pe care nu-l poţi cunoaşte şi cuceri cu armele specific umane.

Omul destinului, supus forţelor eterne pune în prim plan poziţia pe care o adoptă liderul faţă de sine însuşi, faţă de potenţialul său de a se schimba atunci când conştientizează că nu este atât de "sofisticat" precum se crede.

Aşa cum un scriitor frământă necontenit textul spre a-i da o formă cât mai artistică, tot aşa şi tu, ca să te îndrepţi către desăvârşire, trebuie să frământi necontenit materia care îţi alimentează sinele, să o compui, să o încadrezi într-un tipar mai cuprinzător şi să-i dai o formă cât mai armonioasă.

Ca un biograf al nenumăratelor caractere, ca un Balzac, un Plutarh sau un Dostoievski, trebuie să fii capabil surprinzi natura personajului pe care îl interpretezi, să-ţi cizelezi existenţa interioară, astfel încât personalitatea ta să capete o semnificaţie deosebită.

Omul din spatele gândurilor

On Februarie 24, 2013

Înlătură învelişul fragil al individualităţii tale, astfel încât nivelul tău de cunoaştere să poată căpăta o nouă formă.

Meşteşugeam cu pasionată ardoare o adevărată capodoperă – un studiu al sufletului omenesc, o combinaţie dificilă între durabilitate şi aşchierea uşoară a elementelor care compun fiinţa umană, proces greoi de control a frământărilor şi vibraţiilor de înaltă frecvenţă echivalent cu o obscură rătăcire în adâncurile unui ocean din care şi eu, nestingherit, făceam parte.

Stăruitor, rătăceam pe căi nenumărate, magnetizat de forţa aceasta unică şi magnifică pe care o poate exercita sufletul omenesc. Eram învrăjbit de sute de contrarii care se băteau cap în cap, aidoma electronilor care străbat o porţiune din circuit. Şi, preocupat de obiecţiile ce puteau fi exprimare într-o varietate de moduri, m-am nimerit în cele din urmă într-un coridor întunecos în care intri până aproape de jumate, după care te înţepeneşti şi eşti pus în dificultate. Materia întunecată. Nemişcarea psihologică. Nimicul creator. Vacuitatea.

Mă aflam în aceeaşi situaţie în care se afla califul Raşid din Bagdad care, supus transformării covârşitoare, căuta cuvântul izbăvitor “ *Mutabor* ”. Devenisem ţinta propriilor mele reproşuri, pierdusem simţul relativităţii valorilor, mă consideram învins, până ce, din spatele unui zid năruit, a ţâşnit lumina sclipitoare.

Şi, odată cu ea, a apărut sursa de inspiraţie - motorul care m-a ajutat să dau frâu liber resorturilor din spatele gândurilor mele, să creez încet, încet, ceea ce se poate numi “transmutaţia” - un mod de aparte de a configura materia umană, compresarea sau expansiunea conştiinţei spre trăiri mai ample şi înţelesuri mai profunde asupra vieţii. Nivelul meu de cunoaştere căpătase o nouă formă.

Leadership: Țelul suprem al cunoașterii tale vizează o mai mare stăpânire a realităţii pe care o reprezinţi la nivel de "impact al prezenţei tale în zona delicată a esenţei unei singure structuri de gândire" ?

Nu voiam să obţin rezultate distrugătoare, ci căutam doar să convertesc energia în materie. Exageram până la viciu orice înclinaţii ale omului, a ipostazelor care îl înflăcărează, sau, dimpotrivă, care îl deprimă. Trebuia să fac o distincţie clară între cele două tipuri de comutatoare: putere - colaps, energie - pasivitate.

Esenţa unei singure structuri de gândire se poate regăsi în faptul că semnificaţia pe care o dai materiei din care îţi construieşti capodopera trebuie să cuprindă verosimilitatea unui lucru real, sau a unui personaj prins într-un eveniment repetabil. O verosimilitate poate crea o existenţă paralelă, şi se poate deduce dintr-o relaţie de similaritate între contextul în care urmează să se implementeze intervenţia naratorului şi cel al cauzalităţii unor corelaţii şi asociaţii puternice care să valideze într-o singură imagine intervenţia respectivă.

Îmi croiam drum, cu oarecare dificultate, mai mult într-o lume închipuită între prezent şi viitor, care se putea destrăma într-o unitate de timp – un spaţiu neverosimil, în care avea loc atracţia neobişnuită între particule electrizate şi particule neutre, dintre simţămintele predominant pozitive sau predominant negative. Mai rămânea să pun în funcţiune circuitul de comutare analogică, în principiu un "întrerupător” comandat, care să acţioneze întreg ansamblul.

Puterea fascinantă a alchimiei are ca bază de continuitate intervenţia adeveritoare a naratorului într-o lume supusă transformării, hazardului, dinamicii, prin reprezentarea şi comprimarea unor scene din viaţa de fiecare zi, în poezie sau în proză, spre formularea unor adevăruri eterne.

În realitate, acest studiu al sufletului omenesc, construit în minte incomplet şi nesigur, condiţionat de o imaginaţie ce nu nega raţiunea ci o folosea pentru propria potenţare, se desfăşura pe două planuri.

Cel dintâi, totodată ştiinţific şi filozofic, care predispunea la un fel de cenzură a trăirilor şi gândurilor. Cel de-al doilea îmbrăca un aspect metafizic şi mistic, ducând la căutarea unui simbolism mai profund, deşi acesta era deseori ascuns şi greu de revelat, sau, dimpotrivă, era ornamentat cu tot felul de combinaţii artificiale dominate pe alocuri de absurd.

Adevăratul alchimist e mult mai mult decât un om de ştiinţă în măsură să transforme cu adevărat elementele. Mai întâi de toate, el este un filozof ce îşi conduce cercetarea spre un obiectiv mult mai subtil: cunoaşterea temeinică a sinelui şi a lumii care îl înconjoară. Descoperisem forma primitivă a alchimiei? Sau începusem să practic alchimia?

Leadership: Care este particularitatea nemijlocită a impulsurilor care duc la constituirea operei tale, prin relaţia de similaritate între mesajul transmis şi imaginile imprimate de o realitate care dă speranţa că ceea ce se vede ar putea fi şi altfel?

Nivelul tău de cunoaştere poate să capete o nouă formă? Simţi că te rătăceşti în adâncurile unui ocean în timp ce îţi conduci cercetarea spre un obiectiv mult mai subtil? Simţi că devii ţinta propriilor tale reproşuri? Pierzi simţul relativităţii valorilor? Eşti capabil să dai frâu liber resorturilor din spatele gândurilor tale?

Un citat al filozofului chinez Lao Tzu începe cam aşa: " *Un lider este cel mai bun atunci când oamenii abia știu că el există, atunci când munca lui este realizată.* "

Devine astfel lesne de înţeles de ce devine atât de apreciat liderul, de ce îşi pune el însuşi atâtea speranţe în forţa lui de a-şi dimensiona arta, privită uneori ca un univers de tendinţe şi interpretări, o multitudine de practici bine definite şi structurate în actul direct al creaţiei. O realitate care dă speranţa că ceea ce se vede ar putea fi şi altfel este o chemare la dobândirea asemănării cu o altă structură de gândire pe care merită să o aplici atunci când faci un rol nou. E o fascinaţie care nu-ţi dă pace.

Mânat de un interes special într-o arie specifică de cunoaştere, "liderul-alchimist" - prototipul cel mai pur, cel mai reuşit şi cel mai performant de lider, dar şi tipul cel mai rar întâlnit - demonstrează o vocaţie unică pentru realizarea unei "opere" care stă sub semnul perfecţiunii prin efectele pe care le produce şi propagă. Concurând din punct de vedere a construcţiei ei, a mesajului transmis, pe diferite căi, sub diferite forme, cu toate celelalte tipuri de lideri.

Particularitatea nemijlocită a impulsurilor de creaţie care duc la constituirea unei opere de mari întinderi ţine de felul cum te raportezi la individualitatea unei alte persoane care poate face parte din tine numai prin metoda asemănării.

Această operă poate fi privită ca un super computer care înregistrează tot ce este legat de viaţa şi evoluţia personală a liderului. Pe măsură ce se desăvârşeşte, el îşi duce la împlinire datoria cea mai mare: diferenţierea operei sale, dezvăluirea caracterului ei şi promovarea ei.

Nemijlocit, o astfel de operă cultivă ideea desăvârşirii proprii, apoi a celorlalţi oameni - printr-o conversie de tip energie-timp-acţiune, sau prin formula unică de transformare a coordonatelor ce permit schimbarea sistemului lor de referință. Însă majoritatea liderilor se înţepenesc, fiind puşi în mare dificultate, de "nimicul" creator.

Îţi definitivezi ideile, poţi să cuprinzi ştiinţa ta într-o operă care să-ţi evidenţieze individualitatea? Eşti ghidat de un impuls de natură pozitivă şi constructivă?

Opera unui creator de lumi are ca latură modernă de semnificaţie adâncirea şi expansiunea integrării informaţiei într-un context de improvizație și limbaj, din care cititorul alege să trăiască sub diferite forme prin ceva ce nu există în plan real, ci doar în plan ideatic, poetic, sau în sens figurat.

Dintr-un asemenea plan se pot extrage exact elementele inspiraţionale care rezonează cu tine.

Omul din spatele gândurilor eşti chiar tu, condiţionat de propria individualitate să cauţi şi să obţii împlinirea personală şi profesională, prin intermediul unei revelaţii interioare concretizată într-o operă personală: leadershipul. Mare dreptate avea cel care a afirmat: " *în lumea reală de prea multe ori contează omul care spune ceva, decât cuvintele în sine.* "

Se uită că, totuşi, leadershipul, tocmai în virtutea valorilor şi normelor ce i se recunosc drept specifice, rămâne de cele mai multe ori departe de adevăraţii alchimişti, ca o epavă care zace în apele unui ocean imens.

Câtă lume are acces la leadershipul tău? Poate fi el înţeles mai bine datorită luminilor pe care le proiectezi chiar tu asupra lui?

Ce faci pentru ca leadershipul tău să fie accesibil tuturor, să ajungă la dispoziţia tuturor? Trebuie făcut ceva ca toată lumea să se bucure de opera ta !

Înlătură învelişul fragil al individualităţii tale, astfel încât nivelul tău de cunoaştere să poată căpăta o nouă formă.

Omul între analiză şi viziune

On August 11, 2016

În leadership, fiinţa raţional-superioară este cea care nu are nevoie să fie numită pentru a fi recunoscută.

Cu ochii întorşi către rămăşiţele de trupuri omeneşti afectate în fel şi chip de o boală incurabilă, necunoscută ca un vânt rău apărut prin surprindere, ca într-un coşmar din care nu te mai trezeşti, omul de ştiinţă Gerry Lane este măcinat de nevoia expansivă de a se înălţa deasupra acestei imagini iminente a morţii care-l însoţeşte peste tot.

Singurul analist capabil pentru a dezlega un puzzle, în venele căruia curge un sânge rece care nu se coagulează în contact cu efectul negativ al acestui *unexplained phenomenon* , el simte pur şi simplu nevoia, dorinţa implacabilă a minţii ascuţite, de a profita de o combinaţie pe care ştie că nu o va mai întâlni niciodată, care prin forţa lucrurilor accentuează diferenţa dintre ceea ce este substanţial şi ceea ce pare a fi substanţial.

Gerry Lane nu caută să definească cadrul în care se stabilesc interacţiunile de natură ştiinţifică, prin bunăvoinţa unei chimii pure, printr-o biologie moleculară care întregește datele obținute prin metodele anatomiei patologice. El nu strânge probe infestate din organismul dăunător, nu-şi ia ca reper de evaluare a fenomenului fragmente dintr-un cadavru, nu încearcă să descompună la o temperatură ordinară sau la o temperatură mai mult sau mai puţin ridicată substanţele eliberate natural din corpul infectat, nu încearcă să identifice reactanții afectați de vreo enzimă rezistentă la toate tipurile de antibiotice.

Ci, aşa cum matematicianul poate să formeze un determinant particular cu ajutorul unei matrice pătrate, Gerry îşi imaginează două sisteme diferite de informaţie, fiecare caracterizată de o presiune a momentelor decisive şi un rezultat al cauzelor naturale aflate în contact.

Oare stările care precedă transformarea definitorie a unui om într-un *undead being* se află într-un echilibru stabil? Care este forma de manifestare a omului care precede delirul mental?

Leadership: Poți modifica opţiunea de redare a imaginii pe care o ai înaintea ta, a cărei esenţă poate fi definită de diferenţa dintre ceea ce este substanţial şi ceea ce pare a fi substanţial?

Gerry Lane sumarizează consecinţele imediate ale prezenţei virusului, şi constată condiţia necesară şi suficientă pentru ca suma forţelor opuse care acţionează asupra omului să fie nulă. Diferenţa dintre "ce este" şi "ce pare" substanţial este dată de modul în care el se raportează la gravitatea epidemiei ce-l înconjoară, mai întâi ea este percepută ca cel mai rău lucru din lume care i se poate întâmpla la un moment dat, dar din alt punct de vedere boala devine percepută ca eșec, aducând sentimente de vinovăție și rușine, desconsiderare a propriei persoane și chiar sentiment de lipsă de valoare și inutilitate.

Cu toate acestea, Gerry Lane îşi pune la încercare spiritul de analiză şi ajunge la o constatare foarte importantă. Şi anume, omul trebuie să sufere deja de o boală necontagioasă, tratabilă şi cu posibilitatea de a fi bine stăpânită printr-un tratament medicamentos, pentru ca molima să-l evite complet, prin modul de a se comporta ca o zonă "străină".

El trebuie să prezinte o imagine clară a problemei, despre cine sau despre ce este vorba în mod concret, pentru ca el însuşi să se absolve de orice vină în cazul în care forţa lui de

deducţie ar fi dar greş. Iar această imagine, este de fapt imaginea propriei sale conştiinţe, lipsită de remuşcări, dar care îl obsedează fiindcă observațiile sale oscilează de la un punct de vedere la altul. Această imagine pare tot mai ştearsă în faţa aşteptărilor lumii, în faţa rezultatelor ştiinţei.

Leadership: Ai capacitatea şi răbdarea să te numeşti "superior" prin limitarea nevoii de a fi "în control", încât să nu-ţi negi responsabilitata de a fi tu însuţi la egalitate cu ceilalţi oameni?

Practic, mecanismele funcţionale reglate de boală tind să excludă virusul din unitatea organismului. Fără o depistare timpurie, fără o asistenţă adecvată, mulţi suferinzi ajung să aibă dureri, prezintă anumite manifestări. Iar tocmai aici se află cheia misterului, îmbrăcând o substanţialitate maximă, căci tocmai acestea dictează conformaţia unei viziuni a soluţiei salvatoare.

Tulburarea de panică se dezvoltă pe fondul percepţiei senzaţiilor de moarte, acestea fiind periculoase mai ales în lipsa unei viziuni morale a lumii și a lucrurilor. Însă în vârtejul ameţitor al manifestărilor felurile ale suferinzilor, Gerry reuşeşte să dezvolte o teorie nouă asupra luptei împotriva acestui virus necruţător, pe fondul a tot ceea ce poate să apară disparat sau divers.

Fiind supusă unui determinism în relație cu responsabilitatea morală, raportă la un soi de experiență perceptuală unde cunoaşterea și învăţarea se concretizează într-un sistem deductiv, bazat pe analiza vizuală a exemplelor pozitive și negative, această fiinţă raţional-superioară reușește să facă diferenţa dintre ceea ce este substanţial şi ceea ce pare a fi substanţial.

Dar, intuind o soluţionare genială a problemei, el nu trebuie să se considere "superior" ca om de ştiinţă, ci să-şi controleze impulsul de a nu urca un munte de două ori. Impulsul de a nu se opri din căutat soluţii, de a trece o limită, de a păşi fără să ştie cum şi – uneori, chiar încotro îl duce vântul evenimentelor, nu trebuie să îi ştirbească dreptul de a fi el însuşi un muritor, nădăjduind la mila lui Dumnezeu.

Leadership: Îţi permiţi libertatea de a proiecta o nouă imagine despre tine însuţi în comparaţie cu transformările lumii din jur, încât să poţi experimenta ipostaze diferite ale existenţei tale?

Între substanțial și ceea ce pare substanțial, fapt ce derivă din experienţe de viaţă adverse, are loc o întrepătrundere a celor doi justificatori ai condiţiei de erou: presiunea momentelor decisive şi un rezultat al cauzelor naturale aflate în contact.

Circumstanțele de înțelegere și contracarare a fenomenelor de risc se manifestă cu mai mare intensitate în contextul manifestărilor neanticipate, acolo unde apar lacune inexplicabile, lipse de continuitate în comportament și atitudine. Handicapul plămădirii unui mecanism de predictibilitate fiind răscumpărat de un viguros simţ al detaliilor aflate la vedere, dar obturate de intervenţii aleatoare.

Întotdeauna omul care experimentează transformările definitorii ale lumii din jur, acolo unde cu greu se poate constata unde anume au loc schimbările mici, dar cu efect major, se află într-o perpetuă mobilitate. Totdeauna aspirând spre o căutare care nu-și ajunge, care nu se determină fix, echivalentă cu înțelegerea propriei lumi interioare.

Fondul acestei perpetue căutări constă în receptarea integrală a acelor informaţii şi cantitatea

potrivită pentru focalizarea minţii spre intenţii şi scopuri mai înalte. Gery a descoperit leacul, a salvat omenirea, el însuşi devenind primul cobai dintr-un experiment al morţii. Şi-a dat seama că înainte de a fi mai mult decât un om oarecare, trebuie să fie un cobai ca oricare altul.

Leadershipul este imaginea unui om de ştiinţă genial care s-ar putea numi el însuşi un om superior, dar mai întâi de toate trebuie să-şi accepte condiţia de a fi un experiment al propriei conştiinţe.

Omul între analiză şi viziune poate să modeleze o lume fără a fi neapărat artizanul ei, doar prin creativitatea necesară "supravieţuirii", prin puterea de a sesiza diferenţa dintre ceea ce este substanţial şi ceea ce pare a fi substanţial.

Acesta este un soi de leadership care nu are nevoie de „coacere" pentru a te transforma într-o adevărată legendă, ci doar de prezenţă de spirit.

*** Notă:** World War Z

Omul între două Acceptări

On Februarie 17, 2016

Descoperă esenţa care să te reprezinte în fiecare capitol al existenţei, fără să cazi într-o extremă care te determină să evoluezi spre o pasiune împinsă până la mereu alte limite.

Nimic nu părea să fie mai important pe lume, în afară de ceea ce simţeam că sunt în prima versiune a unei pelicule de film numită *"Omul între două Acceptări"* . Al cărui motor narativ, destul de firav, era alimentat prin gândurile la care ajunsesem printr-o stranie complicitate cu un soi de slăbiciune pentru imaginar, din acea impetuozitate intelectuală caracteristică făuritorilor de lumi, necesară închegării în forme clare a aspectelor mereu mişcătoare ale aparenţelor.

Aparenţe pe care le reduceam la legi, la esenţe, ignorate de cei mai mulţi aşa zişi experţi, asigurând acea unitate de profunzime a viziunii ce se exprimă printr-o anumită continuitate în desluşirea incognoscibilului. Apoi împachetam uşor vidul unor experienţe lipsite de sens, vagi umbre ale unor situări într-o etapă exploratorie derutantă, şi le transformam într-o adevărată pasiune pentru o cunoaştere aparte.

Important era să nu uite timpul de mine sau să nu mă pierd eu în el cu acea neputinţă de a coordona parcursul frumos al unei reîntoarceri spre sine. Uneori îmi era de ajuns o străfulgerare de gând ca să prind drag de o călătorie în domeniul abstractului, din care să rezulte reperele unei înţelegeri multi-perspectivice. Substanţa simbolică a lirismului meu inovator, de mare puritate, atras cu deosebire de imaginile de poveste care te duc cu gândul la o lume desprinsă parcă din basme, trebuia să faciliteze călătoria spre judecăţile unor minţi care refuză să se supună regulilor şi să îmbătrânească.

Leadership: Caracteristicile pe care imaginea ta le reflectă sunt cele mai importante proprietăți ale unei ascensiuni care se face în primul rând pe criterii de organizare în spaţiul relaţiilor Eului creator cu provocările temporalităţii?

Dinaintea unui mare conducător al Persiei s-a înfăţişat un personaj straniu care i-a făcut cadou un joc nou numit "Şah", apoi l-a iniţiat în tainele acestei evadări din tiparele vechilor obişnuinţe. Fără să-şi dea seama, el a fost atras într-o cursă care nu doar l-a ruinat economic, dar i-a distrus definitiv orizonturile. Sau l-a salvat de la o continuă dilemă existenţială? În orice caz, el a căzut în patima jocului de şah, preferând strategiile imaginarului faţă de cele de pe câmpul real de luptă. Conform legendei, marele conducător a încetat să mai fie un militar, dar pe tabla de joc nu putea nimeni să-l imobilizeze în şah-mat.

Cine ştie pe ce drum te poate duce invenţia unei clipe hotărâtoare care îşi găseşte rostul în neatenţia acordată unui fapt divers. Ceva exterior voinţei tale, ceva imprevizibil, asupra căruia nu ai control, care determină, care are efecte bune sau rele. Prima provocare a temporalităţii este să rezişti închiderii într-un prezent care te apasă printr-un act de mărturisire a alagerii de a trăi prin comparaţie cu percepţia unei creaţii perfecte izvorâtă din proiecţia subiectivă a lumii văzută de sus, dintr-un plan mai amplu.

În ceea ce mă priveşte, ajunsesem să nu mă mai intereseze nici infinitul cunoașterii, nici poziţia de gânditor dobândită prin sudoarea minţii, prin tăceri meditative. Nu mă mai interesa nici gloria izbânzii asupra spaţiului şi timpului pe care universul parcă mi-o hărăzise prin destin. Eram dispus să renunţ la toate pentru un singur lucru, pentru această invenţie de o clipă care punea capăt unei lupte surde cu mine însumi, pentru acest fenomen interesant numit "prizonierat" care-mi permitea ieşirea din starea de reflecţie.

Totul începea să se reducă doar la mutări, legi şi imobilizări în faţa unui orizont mai larg. Am învăţat să fiu tot mai cumpătat. Chiar și cumpătarea era o mutare interesantă.

Cele mai importante proprietăți ale unei ascensiuni care se face în primul rând pe criterii de organizare în spaţiul relaţiilor Eului creator cu provocările temporalităţii sunt: controlarea mai multor câmpuri de acţiune simbolică şi aprecierea corectă a poziţiei de conştientizare a unui rol de compoziţie, asumarea lui interioară şi impactul emoţional pe care îl declanşează în spaţiul realităţii de dincolo de aparenţe.

Leadership: Ai capacitatea de a prilejui întâlnirea cu un „CU TOTUL ALTCEVA" prin intermediul revelaţiei unei valenţe necunoscute a personalităţii tale înscrise în sfera realităţii imediate?

Orientarea omului depinde nu doar de aspectele de conţinut și de producție a experienţelor vieții, ci și de conştientizarea aspectelor mişcătoare ale aparenţelor acaparate zilnic printr-o stranie complicitate cu un soi de slăbiciune amestecată cu un pic de autonomie faţă de normele impuse de convenţiile unei autorităţi exterioare.

În general oamenii luptă pentru o libertate de alegere mai mare, pentru câştigarea unei modalităţi de a se reinventa, dar care se evidenţiază mai apoi, la unii dintre ei, în disponibilitatea de a ceda unei îndeletniciri aparte, unei plăceri forțate, greu de nestăpânit. Plăcerea de a evolua într-un joc în care doar tu eşti învingător este un iad înfricoşător din care nu mai poţi să scapi, sau un drog puternic din care poţi gusta din plin fără să fii tras la răspundere pentru consecinţele experimentării lui.

Fără o esenţă care să te reprezinte în fiecare situație a vieții, în fiecare capitol al posibilităţii de a realiza scopul propus prin utilizarea unor mijloace alese, vei cădea într-o extremă care ori te va conduce spre epuizare, ori te va determina să evoluezi spre o pasiune împinsă până la mereu alte limite, slujită cu exces de zel chiar până la fanatism.

A prilejui întâlnirea cu un „CU TOTUL ALTCEVA" prin intermediul revelaţiei unei valenţe necunoscute a personalităţii tale înseamnă să-ţi creezi oportunitatea de a te vedea din ipostaza unui narator care explică într-un mod diferit lumea în care trăieşte.

O astfel de pasiune, care va genera neputinţa de a coordona parcursul frumos al unei întoarceri spre sine, servește totuşi reprezentării devenite concrete a unei acțiuni de cotitură care schimbă anumite convingeri limitative referitoare la lumea reală. Această pasiune te poate salva de la o continuă dilemă existenţială, cu prețul abandonării adevăratelor îndatoriri și obligații, care la rândul lor dezvoltă particularitatea de a vedea mai în profunzime aspectele unei alte realităţi sau învăţături.

Să cauți perfecţiunea în oricare aspecte ale vieții personale, dar în același timp să-ți schimbi priorităţile, preferinţele, dorinţele şi nevoile în funcție de o îndeletnicire care se dovedeşte mai de preț decât orice bogăţie, fiindcă în ea este sădită posibilitatea accederii la un plan diferit al înaltei tale meniri, este treaba unui leadership care pretinde apelul la autonomie.

Genul acesta de autonomie îți permite o anumită marjă de manevră în spațiul libertății de a fi cine vrei să fii, un om de neînvins, precum și capacitatea de a prilejui întâlnirea cu un „cu totul altceva", cu revelaţia unei valenţe necunoscute a personalităţii tale.

Leadershipul este acceptul pe care ţi-l dă cunoaşterea realităţii ca să interpretezi rolul unui personaj al cărui narator, aflat în ipostaza de Alter-Ego, apare şi dispare în momentele cheie ale evenimentelor petrecute în jurul său.

Omul între două Acceptări se caracterizează prin următoarele elemente extrem de variabile: noutatea descoperirii unei forme noi de putere, în care el devine invincibil, şi libertatea de a vedea mai în profunzime aspectele unei realităţi sau învăţături diferite. Bineînţeles există si reversul medaliei, de a cădea într-o latură extremă numită fanatism.

Ai grijă cum te prezinți în faţa autorității numită „obsesie", căci ea te poate ţine într-un şah continuu. Orice activitate excesivă poate să taie nodul gordian al convenţiei cu tot ceea ce este esenţial în formarea personală, anulând traseele de bază ale vieţii şi ale leadershipului din cauza unei complaceri într-un prizonierat care îţi îngrădeşte privilegiul de a fi statornic în dificila şi nobila ta menire.

Omul între iluzii şi adevăr

On Ianuarie 19, 2017

Îmbunătăţeşte-ţi nivelul de autoritate în domeniu, introducând o nouă particularitate a naturii tale de artist pe planul unei consecvente raportări la ceea ce trebuie să aperi la realizările tale.

Eisenstein explica unui auditoriu de psihologi noile sale gânduri despre capacitatea filmului de a prezenta idei abstracte. În timpul şederii la Boston, marele regizor rus primeşte la Hotel Vendome intelectualitatea oraşului. La reuniune este adus, în scopuri publicitare, şi faimosul câine-vedetă de film Rin-Tin-Tin, primul „star" pe care l-a cunoscut cum remarcă ironic Eisenstein.

Realizatorul este pus să pozeze pentru o fotografie alături de câine, în timp ce asistenţa îl asaltează cu întrebări. Eisenstein este constrâns să răspundă timp de o oră la o sută de întrebări. La capătul lor, o doamnă îi declară: „Dumneata distrugi iluziile despre Rusia." Iar Eisenstein îi răspunde prompt: *„Iluziile trebuie totdeauna distruse. Adevărul este cel mai bun ! " **

Leadership: Te abaţi de la rigorile conţinutului pe care îl produci despre tine însuţi, în conformitate cu raza de acţiune a gândurilor care îţi oferă capacitatea de a materializa o viziune plină de originalitate?

Dificultatea elaborării unui răspuns, pozitiv sau negativ, în vederea admisibilităţii unei critici, cu privire la ceea ce cred alții despre tine, este o provocare suportată de orice artist, de orice optimizator al muncii de creație, tocmai pentru a ajunge la o destinaţie comună, la o înțelegere reciproc acceptabilă. În acest caz, actul de creaţie poate fi perceput ca un catalizator al gândurilor care îţi oferă capacitatea de a materializa o viziune plină de originalitate, acele gânduri care scot în evidenţă adevărurile unei imagini care nu capătă greutate decât prin intermediul unei idei abstracte, sau printr-o comparaţie cu modul cum foloseşti o metaforă.

Varianta de răspuns la întrebarea ce te deschide spre căutarea unui adevăr puternic și esenţial - o altă coardă la arcul care lansează săgețile ironiei indulgente, permite introducerea unei particularităţi a naturii tale de artist pe planul unei consecvente raportări la ceea ce trebuie să aperi la realizările tale, și nu la ceea ce ți se impută drept vină.

Toate variantele de răspuns pe care le așteaptă cei din jur, pentru a putea întovărăşi mobilitatea logică a unei gândiri condiţionate de experiența profesională, trebuie să respecte convenţiile specifice fenomenului „Priveşte-te drept o capodoperă în devenire ! "

În caz contrar forța întregii tale convingeri vizavi de integritatea propriului sistem de idei şi credinţe, sau referitoare la reprezentativitatea cercetărilor efectuate în timp, exprimate de multe ori prin intermediul unui adevăr bazat pe un anumit concept gândit dinainte, nu va putea face departajarea între ceea ce reprezintă dreptul tău de a lansa o „revelaţie" și ceea ce reprezintă un abuz la adresa ta.

O calitate dominantă a celui care emite diverse afirmaţii bazate pe convingeri proprii, în postura de descoperitor al unor adevăruri, este de a nu se auto-incrimina. Omul este un conţinut brut sau neutru de informații, construit după nevoi și situații, cu care ceilalți nu sunt obișnuiți să interacţioneze.

De aceea, a crea impresia unei autorități în domeniu, înseamnă să nu te abaţi niciodată de la rigorile propriului tău conţinut. Leadershipul este un temei al apărărilor pe fond, iar artistul este rezultatul acestor apărări.

Una din particularităţile naturii de artist este atingerea convingerii desăvârşite într-o formulă care trebuie să se extindă asupra celorlalţi oameni, privind aspectele pe care le-a constat în virtutea unei amprente personale şi a unei cauze nobile: aceea ce a conceptualiza în mod autentic experienţa prin care a trecut, formarea şi dezvoltarea competenţelor sale.

Omul între iluzii şi adevăr se poate recunoaşte după stările de spirit ale celorlalţi care încearcă să-l paralizeze prin lipsa de claritate asupra unei întregi discuţii, fie prin caracterul lacunar pe care îl manifestă despre ceea ce se întâmplă dincolo de înţelegerea lor imediată.

* **Notă:** Ion Barna - *Eisenstein* , Editura Tineretului, 1966.

Omul între logos și realitate

On Ianuarie 20, 2017

Poziţionează-te în contrast cu ceea ce se opune evoluţiei tale, găsind în tine puterea de a te ridica deasupra a tot ceea ce este cuprins în planul realităţii imediate.

În faţa mea se întindea cu repeziciune necunoscutul unui eveniment improbabil, cu toate întrebările lui, sub semnul apăsător al necesităţii opţiunii cuprinse între o stare vizionară orientată empiric – „trăită", şi o atitudine îngust pragmatică înscrisă pe direcţia forţelor de inerţie ale indeciziilor de moment. Dacă un artist şi-ar fi concentrat atenţia la persoana mea, încercând să picteze un tablou autentic, probabil l-ar fi întrecut pe Salvador Dali la capitolul semnificaţii ascunse, încât eu însumi aş fi ajuns să reprezint o nouă formă de expresie în artă.

De ce să nu includ existenţa mea într-un carusel al cauzalităţii care insista că nimic nu se poate alcătui fără declanşarea unui eveniment premergător? Un eveniment care mă urmărea din excesul de putere al unei legi scrise doar pentru mine, transmiţându-mi o speranţă în acea stare de şoc cald, străbătea teritoriul inimii cu o dispoziţie înnorată care, însă, sporea alimentarea mea cu energie de la sânge la neuroni.

Fără voia mea, eram integrat într-o logică de complet altă factură, pe lângă parametrii echilibrului de stare, specifici omului care priveşte drept înaintea lui, dar cel care-l priveşte nu poate să-şi dea seama dacă îl vede. Era ca şi când cineva m-ar fi privit într-o oglindă care ştergea în mod neaşteptat tot ce se potrivea cu firea mea. Pericolul se estompa, dar încă era acolo.

Leadership: Eşti pregătit să oferi o nouă viziune asupra propriei persoane din spatele gândurilor implicate într-o creaţie a cărei principală trăsătură este autenticitatea, credibilitatea, şi nu fotografierea realităţii?

Puterea de pătrundere a celui care îşi aţintea din ascuns privirea asupra mea, prea devreme pentru a se convinge de identitatea mea, prea puţin privilegiat de un raţionament de tip deductiv şi de inteligenţă crescută, era invers proporţională cu lungimea de undă a modelului meu de recepție al informaţiilor. Dintr-o dată se văzu ademenit el însuşi într-o înlănţuire neobişnuită de evenimente, necăutate și neprevăzute, care nu-şi găseau fondul.

Nu voiam să cred că sunt pierdut într-un univers care a trecut o singură dată aventura vieţii, din acelaşi motiv că eram parte a unui întreg, unde fiecare etapă se angrenează rapid cu precedenta, prin avalanşa de mesageri informaţionali ce-mi traversau membranele celulare, având parcă puncte de inserţie până în intimitatea lanţului polinucleotidic al codului genetic.

Dar în acel moment am simţit că port în mine sâmburele unei vibraţii universale, o formă cu mult mai evoluată la ceea ce întâlnisem pană atunci, oferind de pretutindeni o sursă de bună energie dar şi o aspiraţie morală, specifice sindromului reacţional. Un artist care mi-ar fi analizat personalitatea, gândurile, simţirea, poate că ar fi fost străbătut de acea semnificaţie pe care o acorzi unei creaţii conturată ca pe o lecţie de maturitate, dimprejurul unei realităţi care cultivă prezenţa spaţiului infinit, profund, plin de amănunte care îl ascund de vederea lumii.

Leadership: Ești capabil să aduni tot ceea ce ți se întâmplă într-o condiţionare fundamentală a trăirii dependentă de o orânduire protectoare care nu poate fi negată?

Exista o solidaritate universală în acel moment, o conectare la bornele unui câmp energetic cosmic universal, că alte lumi mă căutam din aceleaşi nevoi din care le căutam şi eu. În primul rând din nevoia de a ne ajuta între noi.

În încercarea de a înfrunta toate fricile și îndoielile, în vârtejul unui concurs de împrejurări insuficient eludate, am ajuns să mă conectez o realitate care părea complicată, controlată în cele mai mici detalii, ba chiar ascunsă şi slujita de o forţă care îmi amintea constant... că nu sunt singur.

Universul constă din corpuri. Nu există un singur corp pentru o întreagă materie, există doar materia - ideea unei substanţe solide microscopice instabile, invizibile și nedetectabile, aflate pretutindeni, care acţionează asupra tuturor corpurilor, printr-o legătură de forță pricinuită de însăşi mișcarea corpurilor a căror formă este susceptibilă de variaţie.

Puterea de a te ridica deasupra a tot ceea ce este cuprins în planul realităţii imediate, care face din leadership un instrument de aplicare al crezurilor care te țin cu faţa spre cele înalte, este un produs al experienței de a te angaja într-o depăşire a cauzelor și efectelor evenimentelor pe care nu le poți anticipa.

Să fii mai aproape de ceea ce îți cere marea forță a Logos-ului, înseamnă să identifici potenţialele lucruri rele care se pot întâmpla oricui, dar care te ocolesc pe tine.

Aşa cum pomul bun se cunoaşte după roadele sale bogate, tot astfel esenţialitatea unei puteri mai presus de legile scrise ale oamenilor se cunoaşte după faptul că omul are capacitatea de a se construi nelăsându-se prins într-o mecanică absurdă, ci într-o orânduire deplină, în care spiritul şi materia, idealul şi realul, misterul şi concretul, ideea şi actul, pot să formeze un tot unic şi armonios.

Conform dicţionarului, termenul „Logos” denumește ordinea necesară, proprie Cosmosului și gândirii omenești, rațiunea cosmică, o ipostază a divinității, spiritul și rațiunea universală, în acord cu acţiunile omului şi cu fenomenele care îi influenţează evoluţia.

Omul care se mişcă constant în lumina intuiţiei şi conştiinţei care trec drept unică instanţă pentru interpretarea evenimentelor, pentru înţelegerea informaţiilor furnizate de totul din jur - luate drept avertizări și atenţionări în privința modului de a se raporta la natura a ceea ce i se întâmplă, se poziţionează întotdeauna, în mod ideal, în locul în care efectele negative sunt minime.

Logosul este ceea ce îţi spune Egoul despre tine însuţi în vederea cuprinderii unei realităţi care depăşeşte puterea de înţelegere a minţilor neiluminate.

Omul situat între logos și realitate este capabil să adune tot ceea ce i se întâmplă într-o determinare fundamentală a trăirii dependentă de o orânduire protectoare (a lucrurilor şi evenimentelor) care nu poate fi negată.

El se poziţionează în contrast cu ceea ce se opune evoluţiei sale, pentru a ajunge într-un moment al vieții n care să poată crede cu întreaga inimă că a fost mereu orânduit şi ocrotit de ceva superior, nevăzut și omniprezent.

Omul între moralitate și justiție

On August 04, 2016

Clasează-te întotdeauna pe poziția de „gânditor", respingând acea gradualitate a intensităţii de a trăi cu propriile slăbiciuni şi de a le accepta.

Când va lucra la ecranizarea romanului lui Theodore Dreiser, „O tragedie americană", Eisenstein îşi va construi filmul proiectat pe reliefarea nevinovăţiei de fapt şi a nevinovăţiei formale a lui Clyde în cadrul actului desăvârşirii crimei chiar.

Numai astfel poate fi făcută limpede provocarea monstruoasă aruncată unei societăţi al cărei mecanism aduce pe un tânăr cam lipsit de caracter într-o asemenea situaţie, pentru ca apoi, invocând moralitatea şi justiţia, să-l aşeze pe scaunul electric.

*Însă Eisenstein va modifica povestirea lui Dreiser, căpătând apoi asentimentul entuziasmat al romancierului, în sensul decorticării esenţei societăţii americane. Pentru că doreşte să facă aici, în America, un film cu adevărat american. Acesta este rostul explorărilor sale. Înţelegerea fenomenului intim al vieţii americane a început încă de la primii paşi pe caldarâmul new-yorkez. **

Leadership: Poți să oferi două opțiuni de plasare a câmpului „rostul experienței de sine" în fereastra Browse a fenomenului intim al vieții unui personaj, încât să obţii o nouă imagine a unei raţiuni sigure şi superioare?

Moralitatea și Justiţia sunt probele marilor examene ale vieții, sunt rezultatele unor concursuri de împrejurări (mai mult sau mai puţin complexe) care dau - ori condiţia tragică a unei lumi împietrite datorită lipsei de valori, ori condiţia necesară dezvoltării unei lumi înfloritoare. Depinde de modul cum vrei să le invoci în cadrul de susținere a ideilor despre sensul vieții.

Rostul explorării unei lumi, prin provocarea aruncată unei societăţi al cărei mecanism aduce pe un om lipsit de caracter într-o situaţie limită, prin inserarea sau înlăturarea elementului recunoaşterii vinovăţiei, a nevinovăţiei de fapt sau a nevinovăţiei formale, este de a da o notă de trecere motivelor tale dominante de acțiune în circumstanțe care necesită evidenţierea trăsăturilor tale caracteristice.

Un om care experimentează acea profunzime a înţelegerii fenomenului vieții, realizând pe această cale o extindere a înţelegerii sinelui, își îndreaptă întotdeauna firul gândirii spre semnificaţia unor strapungeri de natură conceptuală, cu alură de predictibilitate, astfel încât să primească un răspuns deplin de la propriul obiect de studiu. Iar acest fenomen al vieţii poate fi cel mai bine cuprins de amploarea unui personaj dintr-un univers fictiv, în termenii unei comparaţii cu sens de oglindire într-o altă realitate, într-un alt suflet, încât raţiunea ta să treacă într-o dimensiune superioară.

Dimensiunea superioară a unei raţiuni este dată de calitatea percepţiilor despre o imagine a personajului pe care vrei să-l caracterizezi, această imagine putând fi ideală în cazul unei introspecţii care, prin profunzimea ei, te ajută să fii mai atent la lumea înconjurătoare şi la rolul tău în această lume.

Să revedem câteva din întrebările la care reflecta adesea prințul de Bénévent, celebrul Charles Maurice de Talleyrand:

"Poate oare un om să ţină trecutul în loc ca să înfrunte viitorul? Prin cea mai mică oscilare a sferei de existenţă - de la faptele obiective la încercarea de a le explica - va putea el oare să răstoarne condiţionările firii sale? Are oare nevoie un om dibaci de o crimă pentru a-şi justifica puterea? Care este argumentul de care el se folosește ca să se dezvinovăţească? Oare prea mult bine aduce rău, sau prea mult rău aduce bine? Ce sens are răzbunarea? Poate omul să-și recapete starea de bine, cedând unei pasiuni lipsite de raţiune?"

Prin formularea răspunsului la astfel de întrebări predominante, poţi identifica două opțiuni ale câmpului „rostul experienței de sine”:

Prima opţiune este să devii un apărător al vinovăţiei şi nerespectării legii, dacă prin aceasta respecţi sentința definitivă: condamnare la melancolie, la un veac de singurătate. A doua opţiune este să te absolvi de osândă şi ocară devenind un apărător al idealurilor înalte. Aici trebuie să iei în considerare sacrificiul pentru binele comun, bunătate, dreptate, competenţă, calitate, corectitudine şi responsabilitate, dacă prin aceasta respecți sentința definitivă: constatarea că poţi face să se întâmple lucruri dacă te deschizi în faţa celorlalți oameni așa cum ești tu cu adevărat.

Leadershipul vizează lucrarea creatorului de a fi manifestarea propriului Ego într-o poveste care se numeşte "slăbiciunea de a fi altcineva", luând în considerare dimensiunea superioară a unei raţiuni care traversează întreaga sferă a conştiinţei prin temeiuri arhetipale (sufleteşti şi intelectuale).

Omul între moralitate și justiție se clasează întotdeauna pe poziția de „gânditor”, respingând astfel acea gradualitate a intensităţii de a trăi cu propriile slăbiciuni şi de a le accepta.

Înainte de a lansa o nouă versiune a leadershipului care să conțină câmpul „rostul experienței de sine”, deschide mai întâi ochii pentru a vedea viciile celorlalți, încearcă să fii o profundă oglindă a lor și vezi dacă nu cumva vei fi nevoit să fugi... de tine !

Un om de mare caracter nu alungă niciodată strigoii care apar în mintea lui, el știe să preia puterea lor prin găsirea răspunsurilor care dezvăluie adevărul despre propria sa persoană. Şi este capabil să se promoveze prin intermediul acestor adevăruri.

* **Notă:** Ion Barna - *Eisenstein* , Editura Tineretului, 1966.

Omul între ştiinţă şi emoție

On August 21, 2016

Învaţă să facilitezi unirea puterilor pozitive ale minţii cu cele ale sufletului, observându-te din punctul de vedere al impactului unei descoperiri uluitoare.

Niciodată nu m-am mai simţit atât de atras de o idee esenţială, mereu cu ramificaţii înspre o altă idee mult mai profundă. S-o determin matematic, cu ajutorul acelor minunate *regular expressions* , precum un salt de linie într-un fişier de text nou creat, fără să-mi afecteze imaginaţia. Doar astfel putea să zvâcnească produsul unei trăiri autentice numite percepţie, secvenţe de elemente consecutive de interpretare a informaţiilor ce îndeplineau o singură proprietate: de a călători într-o altă întrebare.

Nici acum nu pot trage concluzii despre această experienţă inedită, căci lăsându-mă purtat de magia clauzelor de instrucţiuni SELECT într-un anumit pattern, am omis faptul că prezenţa acestei cauze determina un fel de RECEIVE another message: "Please wait...".

Ca într-un adevărat thriller psihologic, mă aflam sub impresia - destul de vagă, de altfel - că aparţineam unor fantezii nemaiîntâmplate, formulate prin clauza (?s).*WORD(?-s)\R, spre a fi percepute în lumea cu care nu mă împăcasem încă, ca un fel de trecere din planul complex al judecăţii în cele mai simple dintre emoţii. Şi chiar credeam în ele, spre validarea unei idei vizionare care la rândul ei avea un dublu efect.

Leadership: Cum se justifică efortul minţii tale de a încadra în câmpul experienţei unice de a interpreta o informaţie care provoacă iluminarea, prin condiția de tipul: "încearcă să-ţi autoinduci o dependenţă de explicaţii şi elucidări" ?

Pe de o parte am reuşit să evidenţiez începuturile unor diferenţieri sistemice între certitudine şi finitudine, unde nespusurile căpătau pentru prima oară accente de un negru goyesc, o potențială sursă de inspiraţie demonică, o reiniţializare a unui substring de tip matches (^.*[A-B].*$). A interpreta o informaţie care provoacă iluminarea înseamnă să implici în activităţile şi deciziile tale acea percepţie referitoare la realitatea lucrurilor pe care vezi, le simţi, le evaluezi şi le descrii ca fiind modul inovativ de a aborda o gândire, o direcţie de creaţie, o direcţie de acces spre acele trăiri dătătoare de sens şi inspiraţie.

Pe de altă parte, ca într-o operă a lui Salvador Dali, unde valorile variabilelor multiple şi a celor de tip masiv, în cazul identificării filosofice a particularităţilor artei care ţineau de categoria de fals, respectând o structură repetitivă cu valoare de diferenţiere, am reuşit - exclusiv din nevoia auto-inducerii unei stări modificate de unitate deplină a fiinţei, care provoacă iluminarea, să mă conformez unei emoţii stranii, să mă las cuprins şi înlănţuit în strânsoarea ei.

Încă mă recunosc în contextul acelei emoţii. Dar arta încă îmi captează atenţia, oferindu-mi prilejul de a face o comparaţie cu formulările matematice din limbajul REGEX, în aşa măsură încât gândirea mea pare să capete acea notă de firesc şi naturaleţe care nu stresează şi nu mă pune în situaţia de a-mi fi greu să găsesc nişte răspunsuri.

Leadership: În ce plan stă adevărata ta originalitate a cărei esenţă poate fi definită prin apelul la o motivaţie sedimentată sub aspectul coordonatelor ştiinţifico-emoţionale?

"Densitatea optică ! Noţiunea asta ascunde în ea un labirint de enigme, ale căror soluţii îţi

scapă printre degete tocmai când crezi că le-ai prins. Dar asta încă nu constituia o metodă, era doar o idee, care abia trebuia să conducă la elaborarea unei metode, graţie căreia să reuşesc - fără a modifica nicio proprietate a materiei (cu excepţia culorilor, în undele cazuri) - să reduc indicele de refracţie al unei substanţe solide sau lichide până la cel al aerului.

Într-adevăr cunoaşterea îi poate da omului o satisfacţie ! Dar pe atunci nu ştiam asta." a exclamat la un moment dat Jack Griffin, „Omul Invizibil" al lui Wells.

Formulele și combinaţiile lor creează emoții, experimentate într-un flux-reflux continuu idei şi viziuni, într-o varietate de moduri de expresie. Emoţiile, a căror prezenţă determină un salt peste plafonare, sunt informaţii temporare asupra realităţii direct afectată de observaţia însăşi.

Satisfacţia care precizează şi poziţia mea faţă de aceste observaţii, o poziţie de creator, om al ideilor şi al analizei, este aceea că pot să modific oorice proprietate a materiei pe care o studiez fără să-mi pese de aberaţii, de limitări, fără să-mi reproşez nimic. Emoţia de a cunoaşte, emoţia de a "simţi" întâmplarea descoperirii unui răspuns, este mult mai mare decât emoţia de a da greş în vreo direcţie de analiză.

Emoţiile sunt un proces neîntrerupt şi în permanentă schimbare de reconfigurare personală, în care nu există reguli sau restricţii, unde singurul punct de reper nu se opreşte la declanşarea vreunui "Evrika", din punctul de vedere al impactului unei descoperiri uluitoare, ci facilitează unirea puterilor pozitive ale minţii cu cele ale sufletului.

Leadership: Cum îţi stimulezi creaţia personală pe fundalul unor imagini care înfăţişează chintesenţa lucrurilor din realitatea robustă a artei, încât să facilitezi obţinerea unei experienţe unice de savurare a unei revelaţii mai înalte?

Este imposibil să te gândeşti la un tool, la o culoare, la un concept, la o funcție, la un model de calcul, la o explicație, fără să-ți stimulezi puterea creierului care are nevoie de hrană pentru a funcţiona şi să nu îţi vină să urli de fericire când reușești o combinaţie „câștigătoare". Arta de a gândi creativ constă în alegerea unei variante de combinare între două sau mai multe câmpuri de semnificaţie de-a lungul unei experienţe unice de observarea a formelor, culorilor şi mişcării unui lucru, adică stabilirea relaţiei dintre ceea ce te aştepţi să vezi în raport cu ceea ce ştii despre lucruri.

Abia în acest context de produs al minţii - „Evrika" - îți vădeşti consecvenţa, capacitatea de a te dedica pe termen lung unei anumite activități sau unei anumite cauze, receptate cu toată năzuinţa sufletului.

Întrucât, conform condiţiilor de funcționare ale leadershipului care iau naștere din puterea de reprezentare a viziunii pe o tipologie a creaţiei, adică a te analiza juxtapunându-te, parte cu parte, sub privirea reflecţiei şi a deducţiei, a înțelegerii și a constatării, nu poți să fii pregătit pentru o mare ascensiune fără să treci prin experiența de a trăi minunea unică a creaţiei și descoperirii sub acţiunea dominantă a combinaţiilor.

Iar originalitatea, a cărei esenţă poate fi definită prin apelul la o motivaţie sedimentată sub aspectul coordonatelor ştiinţifico-emoţionale, nu stă doar în planul unei lecţii de reuşită mentală sau în planul unei emoţionalităţi transformatoare. Ci, în special, ca reflectare condensată a adevăratei tale naturi în fiecare moment de revelaţie.

O revelaţie mai înaltă se obţine prin combinarea ştiinţei cu arta, de departe o practică mistică, aşa încât expresia obţinută să capete valoarea de simbol al unei forme supreme

de cunoaştere. Acest simbol poate fi însufleţit doar de un spirit cercetător şi de o minte aleasă.

Omul între ştiinţă şi emoție are acces la cunoaşterea interioară a aspectelor creaţiei, care înainte de toate propune libera iniţiativă, niciodată nu impune criterii. Această cunoaştere invită fiinţa la o transformare ce are drept scop trecerea de la un „calcul rece” la un nivel de interpretare a rezultatului acelui calcul în propria sa existență.

Omul întunericului (II)

On Noiembrie 07, 2013

Fă o distincţie suficient netă între caracterul "surprinzător" şi caracterul "pregnant" care te defineşte, punând în prim plan subiectivismul evaluării celorlalţi.

Hannibal Lecter se face nevăzut, ca un fugar, în cel mai îndepărtat colţişor al lumii, trecând dincolo de acea uşă care se închide în urma lui: confuzia cea mai spectaculoasă, a cărei cheie se află numai în posesia lui. Dar ceea ce-l face cu adevărat unic, *untouchable* , pe acest desperado invizibil, pe această enigmă de nepătruns, este faptul că se pricepe să se adapteze cu supleţe la toate schimbările. El nu comentează evenimentele care îi ameninţă stabilitatea, ci intenţionează să le trăiască la maximul, indiferent de natura lor.

Lipsa oricăror greşeli, imposibilitatea de înţelegere a modului său de operare, absenţa indiciilor care ar putea duce la capturarea lui. Toate acestea respectă legea invizibilităţii. Noaptea este tot mai deasă, somnul pare a-i cuprinde pe toţi ! Şi în tot acest întuneric de nepătruns, lumina fulger a minţii născocitoare îşi face cu uşurinţă loc printre filtrele instalate.

Tăcerea este doar o aşteptare. Neprevăzutul e doar o chestiune de percepţie. Să se împlinească rapid cerinţa hotărâtoare: “ *Prindeţi-l ! Capturaţi-l, viu sau mort ! Să cadă sub pedeapsa judecăţii !* ” Procesul prin care se creează această stare de agitaţie febrilă se numeşte “electrizare” şi ea ascensionează pe măsură ce Hannibal întinde noi nade.

“ *Nu sunt cine a-ţi putea crede că sunt !* ”, strigă un gând aruncat printre zăbrelele lumii, cu o privire furişată spre FBI. Într-un astfel de cuget nu încape târguială. Motivaţia lui Hannibal de a da o lovitură de performanţă, are centură de campion. Şi el ştie să o pună în jocul straniu al puterii de a compune şi de a transforma totul. *

Leadership: Poţi face dovada calităţii de a te recunoaşte o excepţie de la regula generală a efectelor de imagine care te pot introduce în mintea celorlalţi drept "un rezultat situat deasupra mediei ", încât să nu te intersectezi cu dependenţa de validarea de sine?

Omul care se plasează deasupra lumii întregi, prin combinaţii complexe de culise, pe care crede că le poate controla cu mintea când şi cum vrea, practic acţionează funcţia de decuplare de la modul convenţional de gândire. Dar aşa-zisele manevre şi trucuri inteligente reprezintă adesea doar un mod distorsionat de a gândi, care maschează adevărul a ceea ce el este: un om care suferă pentru anumite convingeri create artificial, în care crede doar până la un punct.

Până în punctul în care nu va mai fi în stare să-şi programeze propriul joc, atunci când nu se mai identifică cu un ignorant. Căci de la manipularea perfectă până la ignoranţa absolută cu privire la ceea ce se petrece în restul lumii este doar un pas.

Deseori, o formă de gândire superioară a omului, supusă diferitelor trepte de putere şi desăvârşire, nu aduce nimic bun cu sine, pentru că celor care îl etichetează le sunt speculate slăbiciunile şi neputinţele. Asta devine pentru un căutător de excepţional o formă de protest la adresa demnităţii de a se recunoaşte în termenii celorlalţi de egalitate şi accesibilitate, la adresa abilităţii sale de a-şi croi un drum al opoziţiei cu şanse de a genera respect, în loc de confuzie.

Cine este etichetat drept "de necontrolat", înseamnă că a alimentat temeri şi comportamente

pe care, deşi sunt rodul unor abilităţi excepţionale, nu ajunge nimeni să şi le însuşească.

"Surprinzătorul" este rezultatul tentativei de a ajusta comportamentul de intimidare şi constrângere, de la orice etapă a experienţei de putere personală, la interesele de comunicare eficientă a aşteptărilor care pot genera evenimentele importante în vieţile celor din jur.

În leadership se face o distincţie suficient netă între caracterul "surprinzător" şi caracterul "pregnant" al unui individ, punând în prim plan subiectivismul evaluării - acel tip de erori care se datorează sistemului de valori şi prejudecăţilor celui care evaluează tendinţele altora de a se raporta la el.

Cel care crede că poate fenta legile încrederii, folosind diverse tehnici de manipulare şi control, îşi supraevaluează în mod real doar şansele de a se consolida ca persoană independentă, mai presus de tot, nelăsându-se cenzurat de acele instanţe de judecată care nu se pot impune.

Dar în acelaşi timp, acest om superior îşi micşorează tot mai mult şansele de a se salva de la retrogradare. Din punct de vedere al leadershipului, a fi retrogradat înseamnă să te bucuri că ai câştigat un anumit meci, dar nefiind în stare să joci de la egal la egal, trezeşti îndoieli, induci o anumită doză de rezervă la adresa suporterilor.

Întrebările care merită să ţi le adresezi de fiecare dată când îţi măsori superioritatea, sunt următoarele: *Eşti pregătit să intri în conflict cu prejudecăţile şi mecanismele de gândire pe care trebuie să le combaţi? Poţi să dai piept cu inamicii tăi cei mai aprigi: mândria de a te simţi deasupra celorlalţi şi insuficienţa de a-ţi stăpâni propriile pulsiuni distructive?*

Dependenţa de validare de sine apare atunci când tot ceea ce îţi poate oferi experienţa de "a fi aici şi acum", de-a lungul unei anumite convingeri, se concretizează într-o expansiune a propriei percepţii despre o realitate care te face să fii mai îndrăzneţ, şi de a te simţi mai dorit de restul lumii, cu riscul de a nu fi tocmai bine înţeles.

Omul întunericului evidenţiază un echilibru între forţa de proiectare a unei realităţi inaccesibilă celorlalţi, care nu se încadrează în tipologia standard de logică şi raţiune, prin care îţi manifeşti superioritatea, neîngrădită de niciun fel de reguli şi bazată direct pe sintagma "scopul justifică mijloacele".

Şi forţa de proiectare a unei realităţi, raportate la alte planuri existenţiale, dar care te exclude din aria leadershipului, din moment ce nu oferă o posibilitate reală de comunicare între tine şi ceilalţi.

Omul întunericului (I)

On Noiembrie 07, 2013

Aruncă o privire mai atentă în realitatea celor văzute şi nevăzute ale omului, ca să înţelegi mai bine motivaţia existenţei lui.

Un subiect plin de inspiraţie deviază de la reguli. Numele lui este Hannibal Lecter. Şi în toiul căutărilor, el se învăluie într-o manta plină de mister, pentru a constrânge, a intimida şi a înşela vigilenţa FBI-ului. Interacţiunea cu acest om special, cu această cutie de valori nedeschisă de nimeni, al cărei conţinut nu poate fi sustras de nicio echipă de căutători, este bizară şi costisitoare.

După cum Theodose, nepotul lui moş Canquoelle din opera lui Balzac, îmboldit de basmele ascultate la gura sobei a pornit într-o călătorie în jurul lumii ca să-şi caute unchiul fabulos, tot aşa agenţii FBI care intenţionează să-l găsească şi să-l repună sub acuzare pe Hannibal se trezesc brusc prinşi într-o manipulare fără precedent, care dă fiori reci. Toţi agenţii sunt conduşi într-o călătorie fantezistă care are menirea de a aduce în prim plan ipostaze inedite ale unei personalităţi creatoare.

Întunericul ia locul luminii. Noaptea se lasă asupra spiritelor neliniştite. Somnul în care parcă se cufundă ofiţerii FBI îi privează de libertatea de a avea o perspectivă detaşată asupra realităţilor. În tot acest timp Hannibal, aflat în libertate, zburdă voios ca un copil care şi-a primit jucăria mult dorită. Ia-l de unde nu-i, găseşte-l acolo unde nu-l cauţi. Pentru că el se ascunde acolo unde nu te aştepţi. Este mereu lângă tine. Şi totuşi atât de departe.

Viaţa fantomei scăpate din lanţuri devine o fabrică plină de afaceri interne, construită în jurul unei dimensiuni cognitive. Iar acestei fantome de-a dreptul supărătoare îi lipseşte darul de a se arăta chiar şi la orele târzii ale nopţii. Care este id-ul ei? Ea nu se mai poate încadra în tema „portret". Căci nimeni nu ştie ce înfăţişare ieşită din comun şi-a construit. Nimeni nu cunoaşte formula care îi permite transformarea. Nici chiar un chimist excepţional n-ar putea să distingă compuşii organici care îi conferă spectrului o vitalitate tinerească. Conţinutul ambiguu al acestei reprezentări de viaţă lasă de dorit. *

Leadership: Îţi asumi o modalitate inteligentă de a urma orice tentativă de a părea mai presus de înţelegere şi probabil dincolo de capacitatea umană, încât să devii de neoprit în atingerea oricărui obiectiv pe care ţi-l stabileşti?

A-ţi asuma o modalitate inteligentă de a părea mai presus de înţelegerea normalului acceptat de gândirea celorlalţi oameni înseamnă să-ţi asumi măreţia de a schimba realitatea în direcţia dorită de tine care, chiar dacă naşte un haos inimaginabil, îţi conferă o anumită importanţă, o anumită prestanţă, o anumită autoritate. Cu riscul unei pierderi la nivel de imagine, pe care leadershipul nu o poate tolera nicidecum, trebuie să încerci să-ţi creezi prilejul de a experimenta o alternativă a inevitabilităţii în ceea ce priveşte măsura puterii tale de a controla mersul evenimentelor.

Tot mai mult am discutat în ultima perioadă despre designul leadershipului, cuprinzând mai multe aspecte invizibile în mod curent. Adică felul cum se prezintă autoritatea definitorie a omului hrănit cu tot felul de enigme şi contradicţii izvorâte din gândirea şi simţirea transpusă în existenţa sa. Totuşi nu există un consens unanim asupra situaţiilor desemnate de acest larg domeniu care să reproducă exact condiţia omului, atmosfera lui interioară.

Dacă matematica este o ştiinţă a cifrelor şi formelor geometrice, leadershipul este o ştiinţă a

gândirii abstracte, îmbrăţişată însă de omul a cărui lume interioară este guvernată de prejudecăţi, complexe, standarde imposibile, idei pline de profunzime. Relevând sensuri noi ale personalităţii sale.

Iar omul, ca orice sistem incomplet de evidenţă, căruia nu i se poate calcula exact nivelul de cunoaştere şi percepţie asupra propriei persoane, este plin de toane. Este alcătuit din elemente văzute şi nevăzute. Şi, uneori îşi schimbă nejustificat comportamentul, mintea, direcţia, după cum bate vântul.

Improvizaţia, capacitatea de adaptare la nou şi jocurile de personalitate creează anumite contradicţii care generează instabilitate în abordarea şi gestionarea leadershipului.

Ai devenit o componentă în meniul de setări care nu mai susţine leadershipul la nivel de condiţie a inevitabilităţii, prin faptul că eşti de negăsit atunci când vrea cineva să lămurească o situaţie de tip "BACKDOOR"?

Aruncă o privire mai atentă în realitatea celor văzute şi nevăzute ale omului, ca să înţelegi mai bine motivaţia existenţei lui. Doar aşa vei putea să abordezi şi gestionezi bine leadershipul. A cărui dezvoltare este posibilă pe baza "proprietăţilor funcţionale" ale omului care îndeplinesc cerinţele unor noi situaţii de viaţă şi unei noi deveniri. La rândul ei, această dezvoltare care stă sub semnul particularului nu trebuie să posede o infinită ambiguitate. Căci, astfel, bizarul devine nu doar nejustificat, ci şi neacceptat.

" Ia-l de unde nu-i, găseşte-l acolo unde nu-l cauţi. Pentru că el se ascunde acolo unde nu te aştepţi. Este mereu lângă tine. Şi totuşi atât de departe. " Aceasta este consecinţa unui "Erase" de fond, anularea trăsăturii de personalitate care face cinste leadershipului. Caracteristica unei gândiri axate exclusiv pe reuşita totală, indiferent de consecinţe. Care asemenea unui program de automatizare a calculatorului, conceput pentru a îndeplini diferite cerinţe, permite ştergerea diferitelor componente individuale care definesc imensa complexitate a unei viziuni "pofticioase".

Ce găsim dacă privim dincolo de spectrul vizibil ale omului? Greşelile lui au circumstanţe atenuante? Respinge el ideea alinierii la nişte reguli şi de nişte tipare date de tendinţele onorabile ale leadershipului? Cum reacţionează autoritatea sa definitorie atunci când evenimentele neprevăzute se derulează intempestiv? Se afundă în jocul puterii de a compune şi de a transforma totul în favoarea sa?

Repercusiunile profunde se vor revărsa fără dubiu în condiţiile unei radicale evoluţii şi complexificări a omului. Raţiunea aceea chinuită, conştiinţa găunoasă orientată spre absolut (şi în acelaşi timp spre conflict) devine catalizatorul pentru înțelegerea a ceea ce el însuși este pe cale să devină. O componentă în meniul de setări care nu mai susţine leadershipului, orientând oamenii într-o direcţie care corespunde falsului, nu adevărului.

O situaţie de tip "BackDoor" se întâlneşte în cazul în care vrei să fii apreciat în încercarea de a schimba lucrurile care nu-ţi convin sau care nu sunt asociate cu poziţia ta. Greşeala ta constă în a oferi o experienţă cu grad înalt de impact, fără să-ţi asiguri o ieşire din cercul vicios al ruperii de realitate.

Omul întunericului pune în evidenţă aspectele nevăzute şi necunoscute ale modalităţii de acţiune a omului, în situaţii neprevăzute. În asemenea situaţii se cere imperios un autocontrol desăvârşit, o coordonare a acţiunilor în vederea atingerii unui scop comun. Adică o strategie adoptată de toţi din jurul tău. Variantele personale sunt excluse. Trebuie să existe doar o singură variantă comună cu eficienţă maximă.

Omul potrivit la locul potrivit

On Martie 25, 2009

Sporeşte-ţi valoarea personală, manifestând o grijă autentică faţă de potenţialul tău de a face lucrurile să funcţioneze.

Se povesteşte că managerul unei companii petroliere s-a confruntat odată cu o dificultate majoră care necesita o soluţionare cât mai urgentă. Compania trebuia să investească 3,5 miliarde de dolari pentru repunerea în funcţiune a unei rafinării care cu puţin timp în urmă fusese devastată de un cutremur uriaş. Pentru că nu s-a putut deplasa personal, managerul a fost nevoit să apeleze la o persoană de încredere care să negocieze în lipsa lui, cu băncile, obţinerea unui împrumut.

El a luat imediat legătura prin telefon cu singurul angajat în care avea încredere, şi i-a spus: " *Am nevoie de tine pentru o treabă foarte importantă. Este o îndatorire pentru care puţini sunt potriviţi, dar tu ai fost făcut pentru ea. Vei face tot ce îţi spun eu şi nu vei pune întrebări ! "*

Negocierea a fost încununată de succes pentru că acel angajat a urmat întocmai indicaţiile managerului. Nu peste multă vreme a fost investit în funcţia de director adjunct.

Leadership: Capacităţile tale completează girul verificabilităţii practice în termenii pe care îi stabileşte apropierea de o imagine care te reprezintă printr-o experienţă superioară de conectare la un conformism inevitabil?

Chiar dacă angajatul respectiv nu avea deloc experienţă în negocieri, managerul a apelat la ajutorul lui pentru că a avut foarte multă încredere în el. Managerul a intuit foarte bine care este persoana cea mai potrivită pentru acea misiune, şi nu s-a înşelat. Prin alegerea făcută el a demonstrat că nu întotdeauna angajaţii care ocupă anumite posturi sau care au o anumită experienţă sunt cei mai în măsură să îndeplinească cerinţele pentru îndeplinirea anumitor sarcini.

Un conformism inevitabil este un pas făcut înainte datorită încrederii pe care ţi-o acordă cineva în sprijinul unei cauze care nu fusese niciodată a ta.

Atunci când liderul încredinţează anumite sarcini unui angajat, acesta are responsabilitatea de a le da curs şi a le duce la îndeplinire. Liderii cei mai competenţi intuiesc care sunt abilităţile angajaţilor lor şi de ce sunt aceştia în stare să facă, de aceea, ca să obţină rezultate excelente, ei aleg cu dibăcie persoanele capabile să rezolve problemele cele mai importante. În anumite situaţii s-ar putea ca un angajat de pe o poziţie medie să poată face faţă anumitor sarcini mai bine decât unul care ocupa o poziţie superioară.

Capacităţile respectivul angajat au avut girul verificabilităţii practice. Potenţialul său de a acţiona şi de a reuşi, care au trezit încrederea managerului, a reprezentat propria lui „semnătura" care i-a validat valoarea. Câteva din calităţile sale care îl făceau demn de admirat erau: cinstea, integritatea, capacitatea de a asculta, capacitatea de a se putea conta pe el şi conştiinciozitatea. „Semnătura" lui a avut o reputaţie solidă şi a corespuns caracterului căutat de manager.

Şi tu îţi poţi susţine imaginea printr-o „semnătură" care să se distingă prin ceva fundamental – ca de exemplu competenţă, profesionalism, responsabilitate. Această semnătură îţi

dezvăluie personalitatea, lista trăsăturilor tale de caracter şi îţi evidenţiază capacităţile practice de acţiune, nu cele teoretice. Evoluţia ta spre vârf începe de la această semnătură care constituie pentru mulţi un argument de neatins şi anume, verificabilitatea. Cu alte cuvinte performanţele tale vor fi verificate de ceilalţi pentru a nu fie puse la îndoială.

Leadership: Poţi să oferi o convingătoare demonstraţie de continuitate în procesul de estimare a valorii cu care ceilalţi te apreciază, fără să scoţi la iveală componenta de bază a diferenţei dintre ceea ce te defineşte în permanenţă şi ceea ce te defineşte când îmbraci o anumită haină?

Managerii nu pot ignora un angajat care este tot timpul activ, dedicat, pasionat, care se implică cu toată fiinţa în munca pe care o face şi care e pregătit, în orice moment, să îşi îndrepte toate eforturile spre binele companiei. Dimpotrivă, ei caută asemenea oameni care sunt dornici şi capabili să ducă la bun sfârşit sarcinile de lucru în timp util, indiferent de volumul de muncă. (Aceşti angajaţi care pun mereu lucrurile pe roate sunt cei mai bine văzuţi în companie, şi de cele mai multe ori sunt şi cei mai bine plătiţi.)

Aşadar, pentru a evolua în carieră este necesar să câştigi încrederea managerului, iar cea mai simplă cale pentru aceasta este să arăţi că eşti în stare să îndeplineşti sarcinile de lucru care îţi revin. Dacă vei fi mereu omul potrivit la locul potrivit, vei avea mari şanse să creşti în ochii managerului care fără îndoială va apela tot mai des la tine. Nu va dura mult până ce vei fi avansat într-un post de conducere.

După cum originalitatea a fost recunoscută dintotdeauna printre principalele note ale artei, tot astfel potenţialul tău de a fi strălucit va fi recunoscut de toată lumea, mai ales de oamenii de top, numai dacă aptitudinile tale practice corespund cerinţelor lor şi pot fi folosite în diferite situaţii. Componenta de bază a diferenţei dintre ceea ce te defineşte în permanenţă şi ceea ce te defineşte când îmbraci o anumită haină este reprezentată de consistenţa pretentiei de imagine impecabilă cu care rezonezi în orice moment.

Aptitudinile tale practice corespund cerinţelor oamenilor de top cu privire la ceea ce poţi să duci la bun sfârşit fără să fii împins de la spate?

Omul potrivit la locul potrivit evidenţiază concordanţa dintre două entităţi care, chiar dacă aparţin unor niveluri diferite de experienţă şi calificare, au nevoie de o strânsă cooperare pentru a merge înainte.

Omul prins în sfera forţelor ademenitoare

On Noiembrie 04, 2013

Activează energia conductorului intrinsec, fără să te îndepărtezi de ipostaza care îţi poate încununa cu succes leadershipul.

Omul care îmbrăţişează ştiinţa de a calcula şi influenţa transformările, omul care încasează "cotele de întreţinere" de la proprietarii umili ai vieţii, selectaţi cu pricepere, omul cuprins de acea intensitate a cercetărilor experimentale care îi permit paşi numeroşi în aprofundarea conştiinţelor, nu trebuie să precupețești nimic ca să-l găseşti. Te găseşte el pe tine.

O dată ieşit din casă, orice individ riscă să fie surprins de apariţia bruscă a inevitabilului, lovit de trăsnetul slăbiciunii de a se opune acestei pătrunderi minuţioase şi ascuţite în propriul univers.

Hannibal Lecter nu se lasă prins în iluziile vieţii ca omul obişnuit. Nu se lasă niciodată pe mâinile altora. Ci activează energia reacţiei de transformare într-o personalitate cu caracter de lider, acea energie internă care-i permite manipularea slăbiciunilor şi defectelor. El vrea să mânuiască puterea deplină. A lăuntricului. Căci, aşa cum spunea Victor Hugo despre Balzac: el vrea să scormonească viciul, să disece patimile, să sondeze sufletul, inima, mintea, abisul care zace în fiecare om.

Leadership: Opera ta are în configuraţia ei acea componentă a personalităţii unui artist care îşi asumă realitatea după un model de gândire care inspiră solemnitate numai prin mărturia experienţei sale de a îndrepta conștiințele într-o anumită direcţie?

În Hannibal se produce frecvent câte un cutremur, o erupţie puternică de nevoi. Fenomenul "viaţă" creşte temperatura satisfacţiei cele mai intense. Iar influenţa acestei temperaturi asupra vitezei de reacţie se dublează pe măsură ce energia de activare a conductorului intrinsec pulsează mai puternic în ambiţiile sale. Pe măsură ce dorinţa de cunoaştere desăvârşită creşte în intensitate.

Doar asta îi electrizează simţurile titanului. Pofta de viaţă acţionată exclusiv de fluxul şi refluxul pasiunilor arzătoare. Mărind astfel voinţa de a se impune altor voinţe. Căci substanţa lăuntrică declanşatoare de senzaţii intense, de noi forţe de analiză, de noi obsesii mistuitoare, are constituenți ce sunt purtători de sarcini dure. Creând un câmp de energie discordant cu celelalte câmpuri de energie cu care interacţionează. Ca şi cum ar fi vrut să ia lumea întreagă şi să o facă a lui. Provocator, nu-i aşa?

Modelul lui de gândire inspiră solemnitate prin mărturia experienţei sale de a îndrepta conștiințele în direcţia unei adânci filosofii a valorii vieţii care spune că lumea nu apare de la sine, ci este creată prin intermediul unor legi ale teoriei probabilităţilor. De exemplu, este mai probabil ca o persoană să fie înşelată printr-o atitudine generoasă, decât printr-o deghizare a conştiinţei şi a profundului tău conformism.

Limitează-te la o singură ipostază, aceea de a fi om ! Cu defecte, cu lipsuri, cu pretenţii la sinceritate. Însă strigătul conştiinţei este ignorat dindărătul cortinei de fier a personalităţii tainice. Dorinţa de a întrebuinţa cu folos pocalul de foc al persuasiunii, cu rădăcinile strânse în jurul explorării unui spaţiu plin de tendinţe care mai de care mai interesante şi mai greu de trecut, este tot mai ispititoare.

Iar omul prins în sfera forţelor ademenitoare ale existenţei umane nu poate pune cătuşe înclinaţiilor care îl apropie de performanţă. El nu-şi poate înăbuşi pornirile instinctive. Acele acţiuni puse-n slujba avidităţii native de a poseda totalmente puterea intelectuală şi emoţională. Spiritul liber preferă să cutreiere necunoscutul, decât să devină un prizonier în celula amintirilor sau un servitor umil al vreunei cauze nobile.

Leadership: Rişti să ajungi la un conflict cu propria-ţi autoritate definitorie, datorită înclinaţiei pe care o ai către experimentarea stărilor sufleteşti instabile?

În accepţiunea unei părţi importante a leadershipului, omul nu este nevoit să-şi justifice limitele încărcăturii de dorinţe, pasiuni şi înclinaţii, care mai de care mai interesante sau mai bune calitativ. Dar în raport cu victoria asupra propriei sale fiinţe, lăsând loc acel grup de preocupări lăuntrice să se extindă spre marginile acceptate de leadership, omul îşi poate deprecia valoarea.

În acest caz el nu mai poate beneficia de avantajul distanţării de demersurile cu accente negative şi depreciative. Efectuând concomitent sau paralel manevre de conducere subtile, dar semnificative în consistența și anvergura pe care o capătă rolul său, în înțelegerea fenomenului de profunzime a omului, se poate întâmpla ca o serie de particularităţi incluse în "bugetul" orientativ de trăsături pozitive să distorsioneze funcţiile şi responsabilităţile pe care trebuie cu adevărat să şi le asume.

Omul este o stare sufletească instabilă atunci când păstrează în conştiinţa sa urmele impresiilor încercate odată, deci atunci când îşi întreţine memoria cu umbrele trecutului sau cu consecinţele evenimentelor relevante din viaţa sa.

Ca să te impui în zona psihologiei ca un factor instinctiv în conturarea sentimentului de receptivitate superioară trebuie să fie prezent în conştiinţa momentului experienţei trecute a oamenilor deodată cu acela al experienţei actuale.

Aşa cum aspectele pe care artistul le imortalizează în tablourile sale devin la rândul lor suport al unor poveşti incitante, s-ar putea ca folosirea mult prea frecventă şi îndelungată a capacităţii de a " *vedea în interior* ", într-o direcţie care nu reprezintă întocmai produsul unui leadership bazat pe integritate şi valori morale, să degenereze într-un montaj de provocări incitante care creează o experienţă antrenantă.

Dar în final se poate ajunge la un război. La un conflict de proporţii cu însăşi autoritatea ta definitorie: sinele. Care va tinde să-şi hrănească existenţa cu o tot mai mare atenţie, cu un nou mod de a-şi exprima individualitatea: " *Am să vă conving pe toţi de autenticitatea mea.* "

Imprimi o anumită acceleraţie leadershipului, aplicând o forţă internă care se opune excelenţei?

Eşti un om care vrea să ştie şi să încerce totul în materie de persuasiune? Vrei să capeţi puterea unui spirit mobil, care se poate apropia de orice lucru, de orice fiinţă, de orice spectacol al leadershipului?

A imprima o anumită acceleraţie leadershipului, aplicând o forţă internă care se opune excelenţei, pătruns cu totul de voinţa de a nu renunţa la viciul de a acţiona exclusiv în baza pasiunilor arzătoare, înseamnă să creezi un câmp de energie discordant faţă de celelalte câmpuri de energie cu care interacţionezi. Adică, să te îndepărtezi de normalul leadershipului acceptat în unanimitate.

Dorinţa de a întrebuinţa cu folos pocalul de foc al persuasiunii ce îşi are rădăcinile strânse în jurul explorării unui spaţiu plin de tendinţe, care mai de care mai provocatoare şi mai greu de trecut, este tot mai ademenitoare. Dar a-ţi demonstra cu orice preţ aptitudinile de mânuire a puterii depline, îmbrăţişând ştiinţa de a calcula şi influenţa transformările oamenilor din jur - aşa cum se întâmplă deseori în rândul celor mai talentaţi lideri – reduce calitatea şi durabilitatea funcţionării proprii.

În orice încercare de racordare a leadershipului la performanţă vei fi supus tentaţiei de a "forţa nota". Vei fi supus tentativelor de a uza de autoritatea pe care ţi-o oferă poziţia, fără a-ţi asuma răspunderea pentru eventualele neconcordanţe sau erori care pot apărea la un moment dat între tine şi ceilalţi oameni.

Factorul experimental care intervine în alcătuirea unei concepţii despre natura umană se poate formula astfel: cu cât se perinda mai multe stări sufleteşti variate prin conştiinţă, cu atât suntem mai conştienţi de existenţa lor: simţirea lor e mai vie.

Omul prins în sfera forţelor ademenitoare marchează posibilitatea de a transforma leadershipul într-o formă de tiranie indusă subtil prin manipularea oamenilor. Un fel de război psihologic cu consecinţe nefaste de ambele părţi.

* **Notă:** The Silence of the Lambs (1991)

Omul şi fapta sa (II)

On Iulie 20, 2015

Pune în funcţiune opţiunea leadershipului de a da o măsură nouă expresiei existenţei şi viziunii, stabilizând graniţele dintre autentic şi imaginar.

Cuvintele mele, traduse prin relaţia cu spaţiul unei clipe prelungite pentru eternitate, păreau să măsoare distanţa dintre omul real şi un oarecare om imaginar coborât din înălţimea expresiei subiective, dar tratat cu o abordare emoţională.

Din acest motiv forma traiectoriei omului descris ştiinţific, confirmată de o experienţă care făcea cinste proiecţiei unei forţe de cunoaştere laterale, în mijlocul unei mulţimi de dependenţe considerate totodată că fiind părţi ale unei realităţi cuprinse în conturul unei prezenţe veşnic viitoare, părea să traseze un hotar despărţitor între mine şi faptele mele.

Despre această prezenţă, circumscrisă unei raţiuni al cărei verdict depindea salvarea sau distrugerea ei, la care se adăuga supunerea plină de demnitate faţă de creaţia mea, ruptă parcă dintr-un scenariu suprarealist, se putea totuşi spune că era caracterizată de aceeaşi tendinţă de acceptare a adevărurilor surprinse de istoricul francez Hippolyte Taine. În cazul în care cele exprimate de judecata lui erau confirmate de experienţa mea, ficţiunea devenea, în sensul pozitiv al unei extinderi de potenţial creativ, un fel de inducţie care magnetiza conţinutul a ceea ce transmiteam cu o energie de neoprit.

Leadershipul presupune să vezi dincolo de imperfecțiuni și să prețuiești partea de dreptate și fericire care supraviețuiește furtunii interioare, celebrând noblețea naturii tale reziliente în fața haosului.

Citiţi cu atenţie ce scria Taine: *„Adevărul e că în lume există o măsură a binelui, care pare mare dacă o comparăm cu una mai mică. Şi, mică, dacă o comparăm cu una mai mare, şi care în sine, la fel ca orice cantitate, nu este nici mare, nici mică. Astfel, găsiţi că omul e mizerabil şi rău pentru că în fundul sufletului păstraţi o imagine a vieţii fericite şi drepte, şi pentru că, comparând viaţa voastră cu această imagine, vedeţi cu câte trepte îi este inferioară.*

Dar dacă veţi avea în vedere jocul haotic al imaginaţiei şi al dorinţelor, conflict necesar între voinţă şi lucruri, atunci veţi admira partea de dreptate şi de fericire care supravieţuieşte acestei furtuni şi veţi preamări nobleţea naturii umane care, în mijlocul atâtor forţe dezlănţuite şi oarbe, menţine şi generează raţiunea şi virtutea."

Leadership: Poţi să efectuezi comparaţia între actul ştiinţific şi imaginea vieţii, plecând de la observaţia că eşti un răspuns la ceea ce se întâmplă între acestea două?

În mod direct, ceea ce m-a făcut să înţeleg creaţia, în însăşi alcătuirea ei, drept variaţie a ceea ce mă reprezenta ca om situat între imaginaţie şi adevăr, menţinând şi generând raţiunea şi virtutea, era măsura pusă în valoare de bine şi rău, resimţite ca un fel de acumulator de energie ce putea declanşa iluminarea.

Fapta mea se baza integral pe diferenţierea totală de însuşiri adoptate într-o formă sau alta, şi nu numai în cazul construcţiei de forţe de legătură între real şi imaginar, ci mai curând în favoarea adeziunii faţă de adevărul pe care ele îl revelau.

Întrevăzând existenţa unor legături între fenomenele care alcătuiesc particularul şi particularizează relaţiile care configurează generalul, predicate prin creativitate şi calitatea actului artistic, se poate obţine o bogăţie a expresiilor şi concepţiilor pe care leadershipul reuşeşte să le identifice ca material de finisaj al versiunii de tale de evoluţie şi de evaluare.

Ceea ce eşti sub prisma parametrilor „bun" şi „rău", dintre kitsch şi autentic, poate fi transmis sub formă de informaţie, dar mai subtil în măsura în care ele corespund exigenţelor lumii tale interioare.

Leadership: Orice actualizare faci în numele autenticităţii tale este salvată automat într-o nouă versiune a dialogului dintre iluzia creată şi realitatea reprezentată, pus în cadru unei forme mai ample de exprimare artistică?

Unul dintre aceste fenomene, fenomenul de alternanţă, comparaţia între actul ştiinţific şi imaginea vieţii, pleacă de la observaţia că omul este un răspuns la ceea ce se întâmplă între acestea două. Acest fenomen te ajută să înţelegi leadershipul în coliziune directă cu fapta de a determina un nou nivel de conştientizare a ceea ce eşti, a ceea ce îţi lipseşte sau a ceea ce te blochează în reprezentarea viziunilor.

Prin abordarea de tip „pro-contra", „bun-rău", găsind măsura adevărului a ceea ce revelezi în jocul haotic al imaginaţiei şi al dorinţelor, în mijlocul atâtor forţe dezlănţuite şi oarbe, vei ajunge să preamăreşti nobleţea naturii umane, vei putea menţine şi genera raţiunea şi virtutea.

Fiecare operă creatoare devine un act de transcendere a ego-ului, o călătorie din lumea concretului într-un spațiu infinit de posibilități, stabilind o legătură nouă între artă și realitate.

Dar să mai adăugăm un lucru interesant. Actul de creaţie, fapta de deschidere spre zona artei, stabilizând graniţele dintre autentic şi imaginar, cu rol de izolator în prezenţa realului, pune în funcţiune opţiunea leadershipului de a da o măsură nouă expresiei existenţei, schimbării şi sumei intenţiilor tale de a-ţi face cunoscută opera lumii, creând efectul de iluminare.

Cum bine mărturisea medicul specialist în terapeutică, Karyn Maria Taulescu: *"iluminarea este fenomenul surprinzător care deschide calea spre măreţie pentru omul obişnuit. Fenomenul este însoţit de două schimbări profunde, şi anume: spulberarea ego-ului şi trecerea fiinţei din lumea finită în cea infinită".*

Lumea infinită, sub aspectul săvârşirii actului creator, trebuie înţeleasă ca o ieşire din normele rigide ale raţiunii care se alimentează doar din observațiile concrete şi se sprijină doar pe experienţă sau pe analiza efectivă a faptelor. Dar fără a le atribui o conotaţie care să surprindă printr-o călătorie imaginară sau printr-o perspectivă ştiinţifică.

Fapta care precede apariţia artei are ca urmare intensificarea dialogului dintre diferite atitudini şi viziuni, pe care exprimarea artistică îl surprinde într-un joc continuu între iluzie şi realitate, în căutarea esenţei, a adevărului ultim.

Omul şi fapta sa scoate în evidenţă acele însuşiri ale omului adoptate în cazul construcţiei de forţe de legătură între real şi imaginar, în favoarea adeziunii faţă de adevărul pe care ele îl revelează.

Totodată indică tentativa omului de a-şi propune o nouă atitudine – de *challenge* , în

mijlocul atâtor forţe dezlănţuite şi oarbe ale raţiunii care îţi călăuzeşte modul de reprezentare a realităţii ca răspuns integrat într-un context al unei noi direcţii de creaţie - prin care se ajunge la iluminare.

Omul şi fapta sa (I)

On Iulie 14, 2015

Îmbunătăţeşte-ţi capacitatea de a proiecta prin intermediul perfecţiunii o lecţie, o călăuzire, un izvor de valori, astfel încât să orientezi gândirea celorlalţi oameni spre un alt nivel.

Realist, urmăream să contrazic practica aproape universală din toate literaturile lumii şi din toate timpurile, să descopăr măreţie şi interes exact acolo unde ele nu găseau decât derizoriul, tot aşa cum marii conquistadori căutau noi tărâmuri ce nu figurau pe nicio hartă. Era sensul pozitiv al parcursului spre conştiinţa unui nou statut. Ca şi când o forţă superioară mi-ar fi cotropit încetul cu încetul intelectualitatea, amplificând-o la un rol din ce în ce mai principal într-o nouă ştiinţă.

Şi, iată, priviţi-mă cum mă transform în altcineva, într-un întreg de nivel superior, de-a lungul conturului închis al închipuirilor stârnite în cuget, sub influenţa forţelor contrastante ale realităţii şi cunoaşterii, cuprinzând un curent liniar, egal în valoare absolută cu produsul dintre reflecţii, perspective şi semnificaţii.

Capacitatea de a transforma haosul în ordine și de a vedea oportunități în structuri disipative marchează esența unui adevărat vizionar.

Creaţia stabilea valoarea intensităţii experienţei cuprinse în conturul personalităţii mele recompuse din părţile ei ascunse sau revelate prin intermediul limbajului, prin ciocniri de coduri culturale sau prin „Auzul Divin". Bineînţeles, căpătasem acel sânge rece care-mi dădea stăpânire de sine şi forţa de a-i domina pe alţii prin vibraţie intensă şi complexitate, într-un ingenios joc al minţii care forţa graniţele plauzibilului.

Acum înţelegeţi cauzele viciilor mele, străfulgerările de inspiraţie, toate acele fabuloase comori „ *must-have* " puse pe seama unei forţe de unire între sfera de cunoaştere şi cumulul de aspecte ce compun un loc de descoperit. Electrizaţi de măsura imaginarului necesar lumii ştiinţifice, rămâneţi perplecşi de puterea cauzelor şi efectelor care zdruncină întreaga maşinărie a sufletului, a gândurilor, a haosului şi a structurilor disipative. Sunteţi constrânşi să participaţi la o operă de creaţie, cuceriţi de logica şi de înălţimea expresiilor prin care întrezăriţi scopul suprem al performanţei – nu demonstraţia de forţă brută a ştiinţei, ci înţelepciunea de a cuprinde fundamentele ei în gândirea personală.

Dar când se află pe mare, căpitanul se supune unei încercări mult mai mari decât restul echipajului. Iar scriitorul, trebuie să se ridice deasupra a ceea ce el dă viaţă, fără ca cititorii lui să suporte vreo presiune.

Leadership: Poţi să stabileşti valoarea experienţei cuprinse în conturul personalităţii tale, prin intermediul forţelor unei cunoaşteri care însumează o multitudine de aptitudini ale spiritului de a-şi organiza propriul conţinut?

Cine cunoaşte sursa şi funcţia cunoaşterii, în relaţie cu procesul de producere a informaţiei (când străfulgerările de inspiraţie fac sufletul să înalţe din inimă un strigăt puternic, redat în limbaj şi în mesajul transmis, într-o manieră transparentă, printr-o interpretare unică), acela se îndreaptă vertiginos spre o nouă conştiinţă, spre un nou statut, spre superioritatea proprie leadershipului care domină scena cercetării şi a inovaţiei necontenite.

Ca să fii la înălţime, tot astfel cum un scriitor experimentează noi combinaţii de stiluri prin includerea reflecţiilor în corpul unei noi cunoaşteri şi prin expresivitatea cuvintelor îmbinate adesea arbitrar, atunci străduieşte-te să atingi starea de perfecţiune. Cum bine spunea cântăreţul Tudor Chirilă: *„Perfecţiunea este linia orizontului."*

Prin intermediul perfecţiunii (în care compoziţiile proprii dau artei o nouă interpretare, cu intenţia hotărâtă de a face din artă un tărâm al forţei creatoare, în care imaginaţia poate fi caracterizată ca proces de comunicare între ceea ce presupui şi ceea ce nu ştii, în care înţelegerea stabileşte relații între ceea ce cunoşti și ceea ce urmează să asimilezi prin incluziune) se poate proiecta o lecţie, o călăuzire, un izvor de bune îndemnuri. Sau un izvor de valori, capabil să orienteze întreaga existenţă şi gândirea celorlalţi oameni spre un alt plan, spre un alt nivel.

Leadership: Îţi găseşti forța de a te consacra a unei cunoaşteri care să fie în acelaşi timp o formă de înţelepciune demonstrativă, adică arta de a trăi asociat cu o parte esenţială a experienţei de vizionare a lecţiilor de schimbare a mentalităţii?

Adăugăm următoarele dintr-o pagină de pe site-ul suplimentuldecultura.ro: *„Şi cine a reuşit ca, în această perfecţiune, să se dedea pe de-a-ntregul compoziţiilor respective şi să le simtă interpretarea, acela a putut să crească sufleteşte, să atingă şi să trăiască o revelaţie."*

Leadershipul se contopeşte cu stilul de gândire în vastitatea câmpului de forță al energiei creatoare. Cine reuşeşte să se transforme în altcineva, într-o entitate independentă de alte influenţe, într-un întreg de nivel superior, de-a lungul conturului închis al închipuirilor stârnite în cuget sub influenţa forţelor contrastante ale realităţii şi cunoaşterii, cuprinzând un curent liniar, egal în valoarea absolută cu produsul dintre reflecţii, perspective şi semnificaţii - acela se va putea considera un pilon de susţinere al gândirii.

Poţi să stabileşti valoarea intensităţii experienţei cuprinse în conturul personalităţii tale, prin intermediul forţelor cunoaşterii, abia atunci când reuşeşti să schimbi forma a ceea ce transmiţi şi a ceea ce devii. Această intensitate se măsoară şi se calculează automat prin modul cum percep ceilalţi însemnătatea ideilor şi creaţiilor tale, prin modul cum configurezi distribuţiile de conţinut ale ştiinţei şi conştiinţei tale.

Schimbarea mentalităţii se poate constitui într-o revelaţie a ideilor supreme despre viaţă, ştiinţă şi artă, numai în sensul unei cunoaşteri care nu duce la înstrăinarea de sine sau la epuizarea propriului "ascuns".

Omul şi fapta sa aduce în prim plan legătura dintre experiment, creaţie si perfecţiune, sub imperiul acelei fascinaţii neascunse, proprie scriitorilor, de a vedea cum o plăsmuire a imaginaţiei se transformă cu ajutorul ştiinţei într-un plan pe hârtie - apoi transpus într-o viziune care stabileşte o călăuzire.

Open Your Eyes

On Martie 30, 2018

Ridică-ţi nivelul de înţelegere a celor ce se cugetă prin imagini de puternică expresivitate, diferențiind ceea ce stă în spatele lor de ceea ce le asigură stabilitate şi durabilitate.

Melodia aceasta are ceva dintr-o solemnitate discretă, lăsându-mă în expectativă la granița dintre cunoaștere și aroganță, în perspectiva alternativei real-existente a unui cadru de imagine statică. Ea pare a se constitui dintr-o lege specială a creaţiei criticată din perspectiva unei utopii logice, demnă de un Iain M. Banks, cu înfiorări ce copleşesc tulburătoarea mea lume lăuntrică într-un vârtej de trăiri scrise cu vervă.

Când încerc să gust savoarea vieţii din cupa unui vers plămadit în nemurire, am multe de suportat, dar reuşesc să mă ridic întotdeauna la esenţe.

Titlul însăşi "Open Your Eyes", acceptând în mod convenţional elementul novator prin care opera se prezintă ca o reprezentare a universului, din ciclul Sindromul Nemuririi, mă face să reflectez - orbit de o stea a cărei masă este jumătate din masa Soarelui - la o nouă dimensiune a lucrurilor păstrate ca reper în măiestria reprezentării liniei, culorii şi a mijloacelor empirice, subiective, geometrice, într-un cuvânt simbolice, de formare a spaţiului scriitoricesc.

Privirea îndreptată spre orizontul concret al lumii sensibile poate deveni o parabolă a adevăratei științe a vieții, plină de înțelepciune și profunzime.

O ascult cu gândul la rostul unui mâine diferit, ca într-o cronică persană. Simt că mă lansez într-o călătorie imaginară, cu multe înflorituri, dar tot atât de plină de tâlcuri. Lucrurile sunt întotdeauna diferite când încerci să seduci pe cineva printr-o exprimare ambiguă. Mă văd printr-o fereastră deschisă spre o comoară fără sfârşit în care diamantele cele mai de preţ sunt cuprinse numai de mintea artistului şi de sufletul unei priviri spre orizontul concret al lumii sensibile, ca parabolă a adevăratei ştiinţe a vieţii.

Am învăţat multe lucruri din această melodie plasată pe fundalul unui "cover" ce aminteşte de picturile suprarealiste ale lui Carlo Salmoni, cu deosebire evidentă pentru creşterea conştiinţei unei stări sufleteşti arătată în multe feluri, atenţia axată pe intuiţie fiind principala modalitate prin care lucrurile importante pot fi reţinute mult mai bine.

Leadership: Înainte de a păstra doar ce este valabil pentru constituirea unei finalităţi artistice, încerci să schiţezi urmările propriilor intervenții în spaţiul unei comparaţii cu ceea ce se relevă în mod subiectiv?

Cel ce mă ascultă cu adevărat pare a fi trecut prin pensulele unui pictor impresionist desăvârşit, sfâşiindu-şi sufletul cu întrebări şi răspunsuri despre viaţă într-o căutare veşnică a comorilor pierdute în abisalul vârtej al negurii timpurilor care mi-au creat dependenţa de mijloacele poetice ale creaţiei.

La cuvintele Simpatiei, din Hazar Afsaneh, silenţioase în explorarea timpului ca sunetul căderii unui ac pe jos, aş face acum referire în căutarea de semnificaţii ale noţiunii de "lumină, gândind pur şi simplu cu mintea unui artist în care se îngrămădeşte legătura dintre macro- şi microcosmos, oferind expunerea coerentă a paralelismului simbolic: *"Şi dacă uneori*

tâlcul unora este mai ascuns, aceasta o fac ca să reţină mai bine atenţia şi ca să desfete minţile ce izbutesc să dezlege firul cel sublim".

Simt că după ce mă voi orienta mai bine în labirintul creaţiei, voi observa că nu e chiar aşa complicat să dezleg firul cel sublim al memoriei universale ascuns într-o stea din afara lumii reale, acolo, departe, unde orizontul se risipeşte în ceea ce putea exista şi n-a existat decât prin adânci prefaceri spre lumină, cu pătrunderi în psihologia artei.

Arta care se deprinde numai din tâlcuri are întotdeauna un caracter personal. Cine se încumetă să mă înţeleagă, acolo unde plăsmuirile se perindă una după alta, trebuie să vădească același atașament pentru întrebuinţarea culorii într-un spaţiu numit "Singularitate" unde legile fizicii, așa cum le cunoaștem, încetează să mai funcționeze. Tiziano Vecellio m-ar înţelege cel mai bine.

Leadership: Apropierea ta de rigorile perfecțiunii artistice este permisă de reevaluarea rolului de creator într-un underground al receptării unor valori care pun sub semnul întrebării modalitățile de a vedea lumea?

A asculta înseamnă a vedea. Infinitul pare că mi se dezvăluie ca un simbol al libertăţii de exprimare câştigate în eternitatea unui sentiment pur pe care am puterea să-l recunosc că fiind componenta firească a unui ritm înălţător: "regăseşte-ţi energia şi vitalitatea ! " Muzica trance seduce prin ritmul devenirii progresive, modelează şi înfrumuseţează opera creaţiei, te poartă într-un univers de poveste și te face să-ți amintești cine eşti într-un plan mai înalt al existenţei văzută prin ochii credinţei în Dumnezeu.

Cât de repede şi trecătoare, între însuşirile lor, trebuie să fie stările sufleteşti existente într-o varietate de expresii artistice, precum surâsul unei raze de lumină aruncată asupra lucrurilor ascunse în umbră sau într-un întuneric mai adânc. Pe unde se plimbă ea, ochiul minţii vede mai lămurit o traiectorie a limitelor, fie a hotarelor unui teritoriu ce urmează a fi populat cu forme, ţintuind perfecţiunea într-o clipă ce transcende timpul.

Ce voiaj splendid spre lumea magică a unui timp conceput ca o alcătuire abstractă de versuri fără semnificații reale sau cu mai multe semnificații posibile, pe care numai umbra unei amintiri îi poate prelungi durata, într-o filozofiei a istoriei revărsată peste întreaga creaţie a unei lumi care se schimbă.

Valorile artei mele precum expresivitatea, unicitatea sau imaginaţia, pun sub semnul întrebării modalităţile clasice de a percepe lumea prin faptul că ele pot fi privite ca un drum în care mereu încape rătăcire, ca rază a cărei strălucire se întunecă odată cu lipsa de cunoaştere a marilor taine ale creaţiei. Eu, artistul multor secole ce vor urma, cred că aşa va fi: din arta mea înnoitoare lumea întreagă se va hrăni şi se va schimba, dar nimeni nu o va putea înţelege cu uşurinţă.

Orizontul de afirmare al unei arte de mare originalitate este accesibil printr-o acumulare de tâlcuri ce ți se inoculează în minte odată cu fiecare clipă în care te lași acaparat de gânduri şi emoţii, chiar dacă acestea nu urlă să fie simţite şi acceptate într-un spaţiu de poveste.

Open Your Eyes ca să vezi totul din perspectiva inversă a ceea ce ţi se dezvăluie prin labirintul unei iluzii, ce capătă accente de realitate, chiar şi atunci când totul se învăluie în îndoială sub forma semnelor de întrebare cu privire la diferitele aspecte ale raportării artei la un ideal de personalitate.

În spatele fiecărei imaginii se ascunde un tâlc, iar ceea ce asigură stabilitate şi durabilitate imaginii este înţelegerea acestui tâlc care probează atenţia privitorului. Ce-ai aflat nou despre mine după parcurgerea acestui articol? Ce anume ţi-am ascuns, şi cum poate fi lămurit?

*** Notă:** Insigma - Open Our Eyes (Alex M.O.R.P.H. Remix)

Opera care cuprinde toate sterilităţile unor experienţe prea cerebrale

On Ianuarie 12, 2010

Creația de geniu emană din combustia interioară a unei pasiuni nefăcute, ce transcende limitele rațiunii obișnuite.

S-a imputat adeseori lui Eisenstein că opera sa are răceala rocii, a mineralizării unor idei îngheţate în forme complicate şi cu totul lipsite de căldură. Imputarea se datora adeseori relei voinţe, uneori neînţelegerii, adică nesesizării acestei combustii atât de neobişnuit de puternice în care pasiunea devenea propria ei hipertrofie, hiperbola devenea atât de imensă, încât hieraticul ei supăra bunul simţ comun. Aşa cum mulţi nu au putut niciodată înţelege de ce Whitmann afirma că el cuprinde, şi în acelaşi timp este, fiecare eveniment petrecut în oameni, în lume, în Cosmos.

Opera lui Eisenstein – cu toate scăderile ei, cu toate sterilităţile unor experienţe prea cerebrale şi nereuşite, pe care uneori le conţine – este irigata cu sânge. Sânge fierbinte, voi. Sângele unei pasiuni totdeauna în incandescentă, care explodează şi, pulverizează, se răspândeşte în jerbe cu strălucirea unor constelaţii ce îi inunda opera.

Atunci cei care nu aveau ochi să vadă, sau nu voiau să-i folosească, confundau lumina galactică cu clipirea unor oarecare strasuri. Aşa devine Eisenstein "formalist". Anume, în ochii celor care nu văd ei înşişi decât forma în care străluceşte magnific ideea. În aceste cazuri, regizorul Serghei Eisenstein le răspundea cu o sublima ironie, din care criticiştii, sclavi ai ceremoniei, nu au înţeles iarăşi decât forma, rămânând satisfăcuţi de recunoaşterea "greşelilor". Sensul ironic al acestor răspunsuri îl va descifra doar posteritatea.

Leadership: În ce mod relativitatea restrânsă și conceptul de spațiu-timp influențează înțelegerea operei tale, reflectând complexitatea formelor și relativitatea experiențelor umane pe care le îmbogățești cu propria imaginație?

Teoria cinematografiei, formulată şi revoluţionată de un regizor precum Eisenstein, a revoluționat înțelegerea noastră despre efectele creaţiei, mai ales pe fondul unei viziuni care exprima "strălucirea unor constelaţii" în artă. Relativitatea restrânsă introduce conceptul de spațiu-timp, un continuu cu patru dimensiuni, similar cu complexitatea formelor complicate și aparent lipsite de căldură din operele lui Eisenstein. Această teorie a arătat că timpul și spațiul nu sunt absolute, ci relative în funcție de observator, pe linia unei viziuni care pune accentul pe interconectarea elementelor și fluiditatea percepției. Dar mai ales pe linia unei viziuni care subliniază interdependența și relativitatea experiențelor umane.

Teoria generală a cinematografiei extinde aceste idei, descriind gravitația nu ca o forță, ci ca o curbură a spațiului-timp cauzată de masă și energie. Aceasta reflectă modul în care sângele fierbinte și explozia pasiunii din operele lui Eisenstein creează constelații de idei. Această curbură influențează mișcarea obiectelor și traiectoriile luminii, oferind o explicație unificată pentru fenomenele gravitaționale. De fapt, operele lui Eisenstein influențează percepția publicului, transformându-l din "formalist" în ochii criticilor care nu văd decât forma.

Ironia sublimă a răspunsurilor lui Eisenstein față de acești critici, sclavi ai ceremoniei, rămâne înțeleasă doar de posteritate, similar modului în care relativitatea generală a fost înțeleasă pe deplin doar după publicarea sa.

Leadership: În ce mod influențează opera ta percepția publicului și criticilor, reflectând o viziune unificată asupra fenomenelor cinematografice și a relațiilor dintre formă și

conținut?

Relativitatea restrânsă și conceptul de spațiu-timp influențează înțelegerea operei regizorale, prin reflectarea complexității formelor și relativității experiențelor umane pe care le explorează. La fel cum timpul și spațiul sunt relative și interdependente în teoria relativității restrânse, astfel și în creațiile artistice, formele și experiențele umane sunt interconectate și schimbătoare, oferind o perspectivă dinamică asupra realității. Aceasta relevă faptul că percepțiile artiştilor sunt influențate de context și de poziția lor relativă în "spațiul-timp" al existenței.

Cum spuneam, rocile magmatice din opera lui Eisenstein se formează prin mineralizarea ideilor sale complicate. Acestea sunt criticate adesea pentru lipsa de căldură, o imputare care provine din rea voință sau din neînțelegerea combustiei neobișnuit de puternice a pasiunii sale. Asemenea magmei care se solidifică lent sub suprafața Pământului, rezultând cristale mari, opera sa, în ciuda sterilităţilor unor experienţe cerebrale nereușite, este irigată cu sângele unei pasiuni incandescente care explodează și se răspândește în jerbe strălucitoare, asemenea constelațiilor.

Criticii care nu au ochi să vadă, confundă lumina galactică a operei sale cu clipirea unor strasuri obișnuite, denumindu-l "formalist". Aceștia nu pot înțelege de ce Eisenstein afirmă că opera sa cuprinde (și în același timp este) fiecare eveniment petrecut în oameni, în lume, în Cosmos. Răspunsurile sale ironice la aceste critici sunt asemenea proceselor chimice complexe care determină structura și textura finală a unei roci. Sensul ironic al acestor răspunsuri va fi descifrat doar de posteritate, care va recunoaște adevărata valoare a strălucirii sale ideatice.

Un artist adevărat îşi transfigurează patima într-o hiper-expresie a ființei sale, uneori incomprehensibilă pentru privitorii obișnuiți.

Opera care cuprinde toate sterilitățile unor experiențe prea cerebrale relevă absența emoțiilor autentice și a conexiunii umane profunde. Dar în cazul regizorului Serghei Eisenstein, sângele fierbinte al pasiunii, plin de incandescență, transformă aceste sterilități într-o explozie creativă, cu strălucirea unei constelații ce inundă opera sa. Iar un artist este cu adevărat împlinit atunci când reușește să transmită emoții autentice și să creeze conexiuni profunde prin intermediul operei sale.

Opera care nu îmbătrânește niciodată

On Mai 20, 2024

Ceea ce vezi în tine când te cobori în adâncul ființei tale, devine reflexia realității în oglinda sufletului universal.

Visul s-a repetat de trei ori pe parcursul aceleiași nopți. Tabloul îmi apărea misterios, învăluit într-o aură enigmatică, pe linia unui fir suspendat al timpului, ca și când ar fi fost o busolă ce mă ghida spre un adevăr ascuns. Când m-am trezit, reverberațiile cromatice ale pânzei au continuat să pâlpâie în fața ochilor mei, ca un ecran cu led-uri, îndemnându-mă să mă cufund în adâncimile lor insondabile. În orice caz, umbrele reveriilor păreau a se întinde dincolo de margini, prefăcute în hieroglife ale unui alfabet cosmic, al cărui înțeles tainic mi se dezvăluia parțial, îmbiat de undele onirice încă vibratoare în ființă.

Extazul culorilor împreunate într-un joc straniu de mișcări circulare îmi insufla un freamăt sacru, un fel de nestăvilită dorință de a o poseda "Secretul Reimaginat", iar privirea-mi părea să fi devenit un act de inițiere în misterele insesizabile ale Creației, împietrite în pânza fermecată. Ceea ce lumina ca un felinar într-un loc unde fiecare minut e-o treaptă spre adâncuri, era tocmai acel far al sufletului, strălucind în întunericul incert, ghidându-mă către tărâmul necunoscut al înțelepciunii primordiale, *Cynosez Ashutoica Irosisymaa*, un imaginar care îşi caută "materialul" într-un alt imaginar.

Fiecare situație este decupată dintr-o realitate care trece granițele timpului, iată de ce opera nu îmbătrânește niciodată !

Visul este moştenirea unei minţi artistice care explorează granițele imaginației și ale subconștientului, căutând să aducă la lumină înțelesuri ascunse și emoții profunde într-o formă vizuală și simbolică. Din acest motiv, încercând să revăd tabloul bine cunoscut din vis, trăind într-o lume a contrastelor fascinante, am devenit pictorul anonim, evadat dintr-o realitate frapantă, scormonitoare, asemănătoare cu cea desprinsă din vechile tratate interzise de artă.

Leadership: Poţi să găsești un echilibru între imaginea realității și interpretarea artistică, dacă experiențele tale sunt marcate de imagini vizuale care oferă o reprezentare unitară a trăirilor care îţi formează viaţa?

În adâncul clădirii baroce a "Ministerului Alchimiei Onirice", artiștii erau aleși nu pentru talentul lor, ci pentru visele lor. Ei învățau să își controleze subconștientul, transformând visele lucide în experiențe colective grandioase. Aceste vise erau proiectate pe cer ca fresce vii, luminoase, care influențau emoțiile și gândurile întregii populații. Visul devenea astfel o artă publică, o formă de a modela realitatea prin imaginația umană.

Într-un alt mod, Alice din romanul lui Lewis Carroll a pășit prin oglindă și a intrat într-o lume absurdă și minunată, unde pisicile zâmbitoare vorbeau cu ceasuri de buzunar, iepurii purtau veste și pălării de top și regina de inimă juca crochet cu flamingo. Era ca un vis viu, plin de mistere și transformări uimitoare. Alice a devenit ea însăși o artistă în această realitate magică, folosindu-și imaginația pentru a naviga prin provocările și bucuriile acestei lumi fantastice.

Presupun că pe mine visul m-a plasat într-o zonă dintre aceste două contexte, între lumea fascinantă a contrastelor și lumea frapantă a misterului dintr-un spațiu interzis. Este o alinare să te știi călăuzit de curiozitate și imaginație, dar o corvoadă să simți povara de a naviga

prin tărâmul ambiguu al cunoașterii interioare.

M-am privit în tablou, ca și cum acesta ar fi fost o oglindă fermecată, și am văzut o scenă uluitoare înfățișându-se privirii mele: pe un câmp de trandafiri roșii intens, un zeu maiestuos (cu chip de rege strălucitor) plutea deasupra, cu o floare uriașă în mâini. Privirea lui blândă și plină de înțelepciune antică părea să cuprindă întreaga mea existență.

Leadership: Eşti în stare să devii reflexia unei viziuni care să te ajute să-ţi stăpânești destinul chiar în vâltoarea trăirilor în care îți urmărești visul?

Zeul s-a aplecat atunci ușor, într-o reverență menită să recunoască răsturnarea oricărei normalități, sărutând petala cea mai de sus a trandafirului "Double Delight" cu un gest atât de asemănător disperării, cu sentimentul că viața nu ține decât de un fir de păr, de un fir așa de subțire, care uneori e rupt. La acea atingere divină, floarea a început să se deschidă încet, dezvelind în centrul ei un lujer magic, răsucit în chip misterios. Atunci, zeul a oferit acel trandafir celui ce intra în vis, permițându-i să călătorească prin dimensiunile visului și ale realității după bunul plac.

Apoi, deodată, m-am trezit. Privind la fel de pierdut tabloul, parcă revenind dintr-o lume fantastică, simţeam că m-am eliberat dintr-o închisoare imaginară în care Dumnezeu a ținut suspendată realitatea. Un fior magic m-a cuprins când am zărit, în colțul picturii, acel lujer răsucit al trandafirului divin. Preț de o clipă, mi s-a părut că țin în mână, aievea, floarea primită în vis de la zeu, ca pe un dar misterios. Era întocmai trandafirul din grădina mea. Drept urmare, hotărât să descopăr taina acestei experiențe neobișnuite, am pornit să caut semnificația simbolurilor întâlnite, simțind cum granița dintre vis și realitate devine din ce în ce mai subțire.

Leadership: Poți folosi virtuțile tale onirice pentru a exprima tendința de a da o formă vizionară trăirii lăuntrice, integrând repere vizuale ce creează efect de profunzime la nivel de interpretare artistică?

Contemplând trandafirul primit în darul visului, atât de asemănător cu cel din grădina mea, am simțit în mine atingerea unei pensule invizibile. Mai bine zis, m-am simțit cuprins de un freamăt metafizic, ca și cum aș fi descifrat un cod ancestral, o criptogramă vie despre taina existenței. Petalele de catifea, bobocul magic, seva divină ce îi dădea viață - toate păreau a fi pensula supremă cu care "Marele Pictor" înfățișează opera sa pe pânza ființei.

Acest trandafir devenea astfel un simbol atotcuprinzător, un *Atricaorach Iriusiotic*, o metaforă desăvârșită pentru legătura indestructibilă dintre vis și realitate, dintre spirit și materie, dintre mine şi Dumnezeu. La fel cum penelul pictorului își împrumută noblețea culorilor pentru a întruchipa frumusețea pe pânză, tot astfel visul meu şi-a tras seva din esența realității, pentru a-i da acesteia împodobirea infinită a imaginarului.

Trei virtuţi onirice se evidenţiază aici: Explorarea interioară (capacitatea de a explora și de a descoperi aspecte ale sinelui și ale psihicului în timpul viselor), Reziliența (capacitatea de a te adapta și de a face față situațiilor dificile sau tensionate care pot apărea în vis), şi Reflectarea (capacitatea de a reflecta asupra experiențelor de vis și de a învăța din semnificațiile acestora pentru viața de zi cu zi)

În ce fel simbolismul dintr-o scenă artistică îți poate oferi o viziune revelatoare asupra propriei existențe, într-o manieră ce transcende interpretarea imediată a realității?

Opera care nu îmbătrânește niciodată se referă la capacitatea artei de a transcende trecerea

timpului și de a comunica adevăruri universale și perene despre existența umană. Prin aceasta, cred că un artist ca mine ar putea să se considere înzestrat cu capacitatea de a crea opere ce rezistă timpului, provocând gândirea generațiilor viitoare, reflectând complexitatea existenței într-un mod atemporal.

Opera care se închină numai în faţa creatorului ei (II)

On Iunie 09, 2013

Învaţă să adopţi acea înţelegere a vieţii capabilă să facă legătura între realitate şi utopie, suportând impactul unei ştiinţe ce nu se transmite decât prin comparaţii.

Imaginea întregii mele vieţi părea a fi supusă unui experiment artistic în care sfârşitul repeta începutul, latura principală a personalităţii mele părând să fie acoperită de o mască, o provocare la încercarea de a descoperi o nouă lume, plină de fantezie şi mister, ceea ce reprezenta un semn al excepţiei de la regulile societăţii moderne. O fiinţă superioară deranjează în mijlocul realităţii acceptată unanim, mai ales dacă ea se constituie ca o coincidenţă între ceea ce este perceput în mod imediat şi cauza reală a unei posibilităţi de exista din mai multe posibilităţi existente.

Artistul care fructifică la maximum această coincidenţă secretă dincolo de orice moment-limită din viaţa lui, aşa cum se întâmplă când sondezi naturalul unei voci vorbite din perspectiva unei priviri dinspre scenă către public, se vede nevoit să preia o anumită stare de surprindere şi de teamă, o parte a riscului de a se revela drept un gest de sfidare a convenţiilor sociale.

În acest context de vizibilitate scăzută, sub care fondul tabloului general al vieţii mele căpăta o intensitate specială de mister, trebuie notat că momentul de tranziţie de la percepţia unei identităţii vizuale la reacţia faţă de o anumită realitate, de la reflecţia unei umbre până la reprezentarea unei gândiri noi, făcută prin intermediul asocierii de imagine cu revoluţionarul, este multiplicat cu distanţa de la sublim la ridicol.

Când imaginea vieţii se suprapune peste umbra unei deformări a conturului ei, să îndrăznim a asculta ce au de spus anticii înainte de a ne spori facultatea de înţelegere a personalităţii umane din prisma unei naturi bogate artistic pe care doar ştiinţa o potenţează:

"Cine nu cunoaşte cauza vreunei naturi oarecare, ca bunăoară a culorii albe sau a căldurii, decât în anumiţi subiecţi, nu dispune decât de o ştiinţă nedesăvârşită. Iar cine nu poate să producă un efect decât asupra unei materii anumite din acelea care sunt în stare să-l suporte, nu are nici el decât o putere nedesăvârşită."

Leadership: Poţi să te redefineşti prin intermediul comparaţiilor întrebuinţate artistic, manifestându-te ca o proiecţie a unei imagini văzută doar într-un anumit unghi?

Spunea bine cineva pe o pagină web: "Dacă nu îţi cunoşti limitele, defineşte-le ! Dacă le cunoşti, depăşeşte-le ! " Aceasta este reacţia puternică a unui spirit atras de o provocare unică, în primul rând intelectuală, şi care nu ezită să profite de orice ocazie pentru a suplimenta bugetul ştiinţei sale cu noi subtilităţi de înţelegere şi cu noi resurse de cunoaştere.

Săpând în vastul zăcământ al vieţii şi realităţii, extrăgând şi prelucrând toate acele ingrediente care servesc la cristalizarea personalităţi sale, împrumutând ceva progresiv şi nou din influenţele "străine", omul va descoperi acel algoritm secret, generator de noi adevăruri şi noi străluciri, depăşind prejudecăţi şi înţelesuri deja stabilite.

Luate împreună, acestea îi conferă omului un soi de superioritate intelectuală care depăşeşte orice elită a "căutătorilor de noi zone de cunoaştere", contracarând cu uşurinţă naivitatea

scepticilor, a debutanţilor, a profanilor, a celor de slabă credinţă care aruncă în domeniul iluziilor realitatea pozitivă pe care nu pot s-o înţeleagă. Fiindcă superioritatea nu poate fi dobândită doar din cărţi, ci prin exerciţii asidue de gândire.

Vei reuşi să montezi pilonii pe care se înalţă măreţul templu al unei cunoaşteri alternative, reînnoite. Vei putea să realizezi cu succes unirea "sulfului cu mercurul" – agenţii principali ai transformării, singurii părinţi ai pietrei filozofale. Şi vei putea să conferi o altă perspectivă esenţei leadershipului, doar dacă nu vei cădea pradă acelei intrigi complexe şi false care schimbă caracterul adevărurilor acceptate de raţiune.

A te manifesta ca o proiecţie a unei imagini văzută doar într-un anumit unghi înseamnă să te percepi în lumina unor noi descoperiri rezultate din includerea realităţii într-un spaţiu articulat de o viziune cuprinsă între cunoaşterea artei şi ştiinţa de a te transforma în altcineva.

Opera care se închină numai în faţa creatorului ei este manifestul comparaţiilor cu care îţi descrii lumea trăită din punct de vedere artistic, vorbind despre faptul că autenticul gând revoluţionar ce-ţi extinde orizontul urmează în profunzime calea unei modificări a înţelesurilor transmise de experienţele vieţii.

Opera care se închină numai în faţa creatorului ei (I)

On Iunie 09, 2013

Conferă o altă perspectivă esenţei leadershipului, fără să cazi pradă acelei intrigi complexe şi false care schimbă caracterul adevărurilor acceptate de raţiune.

Am fost dintotdeauna atras de inedit, de caracterul enigmatic, straniu şi câteodată discordant al simbolurilor inexplicabile. Eram fascinat de conceptele sau supra-conceptele învechite, dar veşnic valabile, de poveştile ţesute în jurul unor ideii atrăgătoare, de mesajele ascunse în spatele unor coduri complicate.

Truda creaţiei invizibile în realitatea desăvârşită a unei opere uitate se continua singură prin gândurile care se abăteau întortocheate asupra mea. Fără să ştiu să le desluşesc. Încercările de simbolizare a unui spaţiu plin de informaţii caracterizat prin contraste dintre scop-mijloace, dintre efort-rezultat, respective de limitele dintre formă şi fond (ca în pictura tradiţională), erau parte constitutivă din jocul interacţiunilor cu mine însumi şi cu tot ce mă înconjura.

Eram atras în special de acele ideologii, teorii, premize, modele şi sisteme de gândire care îmbinau analiza şi adânca înţelegere a omului şi a menirii sale într-un univers creat artificial. Justificând astfel o anumită interpretare, conformă cu propriile-mi convingeri şi resurse de imaginaţie.

Toate culorile înţelegerii păleau, totul devenea mai ireal. Noi variante pentru marea enigmă, ce se bazau pe un algoritm secret, generator de noi adevăruri şi neadevăruri, se adăugau în perimetrul meu de logică. Eram din cale-afară de uimit. Începuse distrugerea şi refacerea.

Leadership: Opera întâlnită de-a lungul existenţei tale are legătură cu efectul primar al diversităţii de abordări ale "imaginarului" din punctul de vedere al unei cunoaşteri ce se înfăptuieşte esenţialmente pe calea comparaţiei dintre două sau mai multe lumi care se cer cucerite?

Romanele lui Stephen King, cu multiplele lor semnificaţii ascunse, angrenate într-un mecanism uman ultrasofisticat, cu legături infinite cu lumea puţin cunoscută a sentimentelor dezlănţuite, sunt prezentate la tensiune maximă. Înţelesurile ezoterice, cu conotaţii aparte, inaccesibile minţilor de rând, aparţinând marelui filozof Cyrano de Bergerac, erau şi ele bazate pe o cunoaştere care întrecea limitele realității. Greu de interpretat fără o experienţă autentică.

Seducându-mă cu desăvârşire, ideile şi concepţiile neobişnuite a celor doi maeştri au contribuit la naşterea şi dezvoltarea curiozităţii mele, la modelarea unui reper existenţial apărut parcă dintr-o experienţă apriorică. Ce în sfârşit putea fi valorizată. Imaginarul care îmi inspira o nouă conjunctură de subtile afinităţi cu spiritele alese ale lumii, din orice perioadă, crescând prin repetarea unor idei, gânduri, convingeri şi imagini mentale fabuloase, avea particularitatea de a îngloba elemente de ordin hermeneutic, înzestrate cu forţa activă, ale unei realităţi care aproape a dispărut.

Irezistibila tentaţie de a descoperi mai multe din această lume - comparând-o cu alte lumi, la doar un interval de realitate distanţă. Dorinţa acerbă de reformare a unei structuri de adevăruri transcendentale. Sublima savoare a unei experienţe magistrale de reconstrucţie a noii lumi, într-un plan mai înalt de abstractizare şi de înţelegere a omului şi a vieţii. Mă învăluiau puternic zi de zi.

Leadership: Modalitatea ta de a comunica o realitate poate să potențeze valoarea intrinsecă a unei creaţii unice ce intră în contact cu nişte lumi cu totul necunoscute mai înainte?

N-am reuşit să descopăr întru totul adevărurile ascunse în spatele ideilor îndrăzneţe a maeştrilor mei, nici să cuprind întru totul marea forţă a misterioasei învăţături care se degajă din ele. În schimb, am reuşit să montez pilonii pe care acum se înalţă măreţul templu al unei cunoaşteri alternative, reînnoite, ce porneşte de la om spre om, prin om. Unirea sulfului cu mercurul a fost posibilă.

Am reuşit să găsesc o explicaţie logică şi coerentă, şi chiar să furnizez alte interpretări punctelor esenţiale ale Marii Opere, fără să cad pradă acelei intrigi complexe şi false care schimbă caracterul adevărurilor acceptate de raţiune. Am ajuns în locul în care mulţi au visat să ajungă, în locul în care nici eu nu ştiam că voi ajunge. Imposibilul a devenit posibil. Timpul şi-a desăvârşit lucrarea.

Marea Operă, Piatra Filosofală, Apropierea de Dumnezeu sau Lumina Filosofiei vizează de fapt acelaşi lucru: atingerea unui nivel superior de cunoaştere care îţi facilitează înţelegerea vieţii, înţelegerea rostului pe pământ şi găsirea motivaţiei de a te ridica în faţa veşniciei.

Leadership: Înfăptuirea operei care îţi deschide calea spre o nouă realitate reprezintă consecinţa sporirii unei creaţii personale din care se poate reconstitui trecutul unei imagini care se repetă în toate timpurile?

Ştiinţa ta îţi dă posibilitatea să te foloseşti de mesajele ascunse în spatele unor coduri complicate? Idei şi concepţii neobişnuite pot contribui la naşterea şi dezvoltarea curiozităţii tale vizavi de leadership? Te laşi cuprins de sublima savoare a experienţei magistrale de reconstrucţie a unei noi lumi?

O operă se închină numai în faţa creatorului ei, şi ea este cu atât mai măreaţă cu cât oferă o nouă deschidere către autenticitatea lumii şi a propriei fiinţe. Alte structuri de gândire pot fi, de asemenea, dublate de o analiză amănunţită a realului în contrast cu intangibilul, printr-o revelaţie autentică sau printr-o explozie de influenţe străine care să crească valoarea Operei.

Sarcina ta, ca lider, este să gestionezi cât mai eficient, pe cont propriu, acele secrete care pot transforma un spaţiu banal de gândire într-unul remarcabil, şi să nu te laşi limitat de incapacitatea de a interacţiona cu culorile alternante ale verosimilului şi neverosimilului.

În mod sigur, înţelegerea clară a Marii Opere, a unei asemenea entităţi abstracte, este o cucerire grandioasă. Şi în numele ei devii apărătorul cel mai fidel al unei noi realităţi, ca un accept din partea ştiinţei vii, superioare, care integrează adevărata cunoaştere – care la rândul ei încorporează un ansamblu solid de concepţii şi interpretări care justifică încercările de identificare a unor legi şi principii noi, universal valabile.

Nu mă mulţumeşte nicio explicaţie care elucidează într-adevăr raporturile între Marea Operă şi treptele superioare ale evoluţiei, însă lasă neatinse toate particularităţile, care constituie tocmai valoarea omului. Căci numai aceste particularităţi, devenite deseori ţinta unei artilerii de nelămuriri şi ambiguităţi, pot să justifice acele interpretări, conforme cu convingerile şi resursele de imaginaţie a omului.

Creaţia personală, din care se poate reconstitui trecutul unei imagini care se repetă în toate timpurile, stă sub semnul apropierii de existenţa unor lumi diferite ce există pe coordonatele date de o imaginaţie bogată care ştie să le perfecţioneze.

Opera care se închină numai în faţa creatorului ei desemnează finalitatea unei creaţii desăvârşite, clădită pe argumente solide, care cu trudă şi îndrăzneală a fost recunoscută de contemporaneitate.

O nouă viziune asupra leadershipului, o abordare a acestuia din alte perspective, cu aplicabilitate practică, este poate o muncă de-o viaţă. Dar merită să încerci să te autodepăşeşti şi să te ridici deasupra celorlalţi.

Opera onirică a luminii

On Decembrie 25, 2010

Un om de mare calitate face din însăşi viaţa lui o operă de artă, cea mai sublimă din câte a făurit.

Mare talent? Prisos de inteligenţă? Nu ştiam prea bine ce era. Cert este faptul că îmi plăcea să mă găsesc lângă el, în atelierul său de lucru, al cărui prag era trecut doar de cei care înţelegeau că meseria de pictor este deosebită.

Nu mai întâlnisem până atunci pe nimeni cu o viziune atât de optimistă asupra viitorului, şi care să se dedice cu atâta intensitate pasiunii sale. Maestrul avea un suflet de artist, era un îndrăgostit al culorilor şi al formelor, al simetriei, al liniilor şi al punctelor, al umbrelor, dar mai ales al luminii. Îşi crease un ideal din estetica formelor.

Lucrul pe care îl preţuia cel mai mult era frumuseţea. Acea frumuseţe exterioară, pură, care nu îmbătrâneşte niciodată, care nu cunoaşte moartea, care naşte pasiuni intense şi care îţi taie respiraţia; acea frumuseţe care nu este niciodată uitată, care te ţine închis în puterea ei de vrajă ca într-o închisoare şi de care nu te poţi elibera. Frumuseţea, îmi spunea el deseori, este cea care impresionează în picturile sale.

Leadership: Semnificaţia esenţială a artei tale constă în reproducerea a ceea ce prezintă un exemplu de ideal care cere extrem de multă "înălţime"?

O operă nu este desăvârşită, dacă nu transmite un ideal de frumuseţe. Iar acest exemplu de ideal cere extrem de multă "înălţime" atunci când forma artei pe care artistul o conturează generează o vibraţie aparte, hipnotizantă, prin care el reuşeşte să te prindă în povestea lui şi să te ţină acolo până la sfârşitul etapei de instruire.

"Înălţimea" desemnează gradul de implicare al artistului în crearea unei imagini care determină felul în care ajunge arta lui la privitor şi pe care o ia în considerare într-o clasificare a legăturilor estetice create între frumos şi urât, între aparenţă şi esenţă, scop şi mijloace, perfecţiune şi kitsch.

La fel ca şi cei doi mari pictori, Hieronymus Bosch sau Salvador Dali, maestrul dedicase mult spaţiu fanteziilor sale – lumini fantastice, jocuri vizuale, chipuri luminoase pline de empatie surprinse cu o maximă acuitate a simţurilor. El pricepea totul numai prin prisma compoziţiei, a culorilor, a efectelor şi a semnificaţiei pe care o dădea fiecărei picturi în parte. Nu voi uita niciodată ce mi-a spus: frumuseţea este raza de perfecţiune care se află în fiecare mare artist.

Meşteşugul picturii nu-i dat decât oamenilor deplini, cu puteri nebănuite în suflet. În clipa când maestrul ridica pensula şi o apropia de desen cu acea mare fineţe şi precizie, ghiceai că trăieşte din propria-i bonomie şi buna dispoziţie. Era ceva, nu ştiu, ceva care te îndemna să-l priveşti şi să-l admiri. Acele mişcări pline de graţie cu care îşi reda desenul dezvăluiau starea sa de spirit, felul cum percepea lumea, gusturile sale. Într-un cuvânt faţeta personalităţii sale. Pasiunea şi dăruirea pe care o punea în munca sa te făcea să descoperi într-însul un artist fericit. Iar maestrul era un artist fericit, fiindcă operele sale puneau în lumină idealul său de frumuseţe.

Leadership: Eşti închis într-o serie de concepţii de reformare a viziunilor despre sine?

Dacă eşti închis într-o serie de concepţii de reformare a viziunilor despre sine, dacă ai o înţelegere limitată a numărului de posibilităţi alternative de producere a valorilor de performanţă şi, totodată, de viaţă sufletească, atunci dai dovadă de mai puţină flexibilitate în răspunsul tău la schimbare. Dar totodată îţi asiguri acea avantajoasă opţiune de hrănire a potenţialului tău lăuntric, acea sursă suplimentară de venit însufleţitor - de tip catalizator - care contribuie la transformarea personală, ducând la accelerarea nevoii de valorificare a disponibilităţii tale de a te accepta şi de a fi tu însuţi.

Dacă pictura sugerează noi combinaţii, nu doar de formă şi culoare, ci şi de tipuri de experienţe existenţiale, atunci leadershipul lărgeşte cumva sfera răspunsurilor şi clarificărilor existenţiale ale individului. Făcând posibile noi modalităţi de perfecţionare morală, continuă, provocate de atitudini variate care ajung să-l caracterizeze ca om care îşi iubeşte identitatea, care îşi vede idealul de perfecţiune în triumful asupra propriei fiinţe. Asupra propriei sale pregătiri, raţiuni, perspective, conduite, tendinţe. În special asupra propriei sale maturizări sentimentale şi intelectuale. Pictura, ca şi leadershipul, sensibilizează omul.

Pasiunea şi dăruirea pe care o pui în muncă te face să descoperi în tine un artist fericit, dându-ţi în acelaşi timp o idee despre nivelul actual al autocunoaşterii tale, aprofundarea trăirilor tale emoţionale, afective şi spirituale. Şi aceasta poate contribui foarte mult la dezvoltarea leadershipului, la explicarea faptului că există un enorm val de interes pentru arta de a te regăsi înainte de a putea deveni ceea ce eşti menit să fii. Chiar dacă uneori acest interes nu este numit ca atare.

E ceva care te îndeamnă să-l priveşti şi să-l admiri pe omul care îşi explorează şi evaluează toate faţetele personalităţii sale, şi reuşeşte să-şi exprime doar acea faţetă bine integrată pe suportul numit "viaţă". Înainte de a experimenta leadershipul, ia seama la ce spunea cineva pe o pagină de internet: *"Important e ca fiecare să îşi descopere tendinţele şi faţetele acelor experimente spre care propriul suflet se îndreaptă."*

Leadership: Optezi pentru reproducerea creatoare a realităţii într-o artă a confirmării propriului concept despre sine ca posibilitate diferită de obţinere a unei noi perspective asupra vieţii?

Eşti un om de mare calitate? Îţi faci din viaţa ta o operă de artă? La fel cum un pictor iscusit îi inspiră pe artiştii de mai târziu prin lumea pe care o creează în operele sale, tot aşa un lider le inspiră susţinătorilor săi acea stare de armonie, de comuniune supremă cu propriul lui spirit, o stare de liber acces pe tărâmul imaginaţiei, unde totul este posibil prin improvizaţie şi fantezie.

Şi, la fel ca un pictor, un lider face din însăşi viaţa lui o operă de artă, cea mai sublimă din câte a făurit. Dedicându-se cu tot sufletul creării unui ideal estetic, unic şi coerent, el dă sens vieţii sale, menţinându-şi starea de bine atât pe plan mental, cât şi emoţional. Evoluţia spre bine a liderului este de ordin personal şi porneşte din inima lui. Un om cu o inimă plină şi arzătoare care reuşeşte să-şi materializeze idealurile este un om mulţumit şi fericit.

Modul în care liderul percepe viaţa se răsfrânge negreşit asupra "operei" lui. E ceva personal care îi afectează activitatea, randamentul şi buna relaţionare cu ceilalţi. Dacă viaţa pe care o trăieşte şi căreia i se dedică cu o mare pasiune este una plină de luminozitate, de viziune, de culoare, atunci va reuşi să atragă simpatia celorlalţi.

El va fi cu atât mai fericit cu cât "opera" lui va pune mai mult în lumină idealul său de viaţă. Iar expresia pe care o dă idealului său este raza de perfecţiune care îl propulsează mai sus in ierarhie (sau îl coboară) şi care îl ajută să-şi interpreteze mai bine rolul.

Conceptul de sine are ca nucleu atitudinea care ia naştere în urma procesului de trecere de la faza de creaţie la cea de desăvârşire a vieţii.

El face legătura între condiții de existență şi moduri de expresie. Indică o anumită stare de spirit ce poate contribui la relatarea eficientă a unei "povești" despre artă. Reprezintă o unitate de gândire, o idee sau o imagine mentală formată prin combinarea aspectelor care te desăvârşesc şi formează satisfacţia unei împliniri, utilizată pentru a organiza cunoaşterea şi perceperea lumii ce te înconjoară.

Opera onirică a luminii este evoluţia ta, ca lider, spre bine şi spre fericire, si totodată spre un nivel mai înalt de performanţă. Este ceva de ordin personal care porneşte din inima ta, care poate fi un ţel – atingerea unui ideal profesional extrem de înalt. Este acel lucru care străluceşte în fiinţa ta, care conţine toate culorile acelui "tablou" personal care îţi defineşte stilul de leadership şi dă sens şi intensitate vieţii tale. Este acel lucru care radiază admiraţie în jurul tău şi îţi luminează sufletul. Este visul care te înflăcărează şi care dă contur ideilor tale.

"Opera onirică a luminii" este materializarea visului de perfecţiune al unui lider care şi-a propus să-şi desăvârşească idealurile. Eşti un om de mare calitate?

Opera unui adevărat artist

On Octombrie 19, 2009

Menţine-te în poziţia de lider exercitându-ţi influenţa ca o artă, nu ca o ştiinţă.

Ai putea să interpretezi bine un rol dacă nu-ţi înţelegi foarte bine personajul? Ai putea să joci o gamă variată de roluri dacă nu eşti un adevărat artist - suficient de bun încât să mimezi foarte bine durerea, spaima, suferinţa, delirul, boala, orice sentiment? Ai putea să te adaptezi la roluri din orice stare socială, având ca unic scop amăgirea celor din public?

Căci, să fim cinstiţi şi să recunoaştem. Jocul de teatru este orientat spre manipularea publicului, într-un fel sau altul - prin intrigă, prin mimică, prin gesturile şi intonaţia actorilor; prin expresivitatea feţei lor; prin fondul muzical; prin ţinută; prin decor; prin mişcările rapide care îţi fură privirea şi îţi distorsionează percepţia asupra realităţii.

Elementele care alcătuiesc personajul sunt, de asemenea, de o importanţă majoră. De exemplu ochii: arată ciudat, unul este destul de pronunţat iar celălalt abia dacă se vede; cei doi cercei din urechea stânga: unul de aur cu perlă, celălalt de argint în formă de cruce. Şchioapătă sau ţine un picior ridicat. Sau îşi târâie un picior. Îi lipseşte o mână. Sau are una mai lungă şi una mai scurtă. Are o cicatrice mare pe faţă. Un tatuaj pe umărul stâng. Sau un nas enorm, ca cel al lui Cyrano de Bergerac.

Este o mare plăcere pentru un artist să-şi interpreteze rolul, indiferent care ar fi acela, să-şi etaleze măiestria ori de câte ori are de susţinut un spectacol. De la cea mai măruntă clipă: sorbirea în înghiţituri mici şi rare a cafelei, până la cel mai important moment: uciderea cu brutalitate, cu sabia, cu toporul sau cu pumnalul, a unui alt personaj.

Artistul trebuie să joace atât de bine, mimând realitatea, încât să arate într-o manieră credibilă ca o lovitură de pumnal răneşte mult mai mult decât pare la prima vedere.

Leadership: Tu polarizezi interesul oamenilor sau eşti un Guest Star - la modul că performanţa pe care o atingi în artă poate acţiona la nivel de "simţire care se şterge în tine" ?

Un lider trebuie să fie un foarte bun profesionist, atât de bun încât el să fie cel care joacă rolul determinant în companie. Cu text. Cu multă prezenţă. Cu o scenă proprie. La fel ca un artist el trebuie să aibă carismă, să pătrundă în inima fiecărui angajat, să schimbe percepţiile fiecăruia după propria lui voinţă. Trebuie să-i seducă. Să găsească acele elemente inspiraţionale la care să rezoneze toţi. Să dea dovadă de o imaginaţie extrem de activă. Să creeze şi să aducă frumosul în jurul său.

Tu poţi să faci performanţă de unul singur? Ţi-ai dezvoltat, precum un actor, calităţile artistice şi de comunicare? Ţi-ai creat o personalitate puternică? Înţelegi toate conotaţiile rolului tău?

Sau eşti un fel de Guest Star ("un star invitat") cum zic actorii - un personaj şters, sacrificat în favoarea altuia?

Mai ţineţi minte ce spunea scriitoarea Cella Serghi în romanul "Pe firul de păianjen al memoriei": *Îmi dau seama că nu sunt omul care să trezească simţiri simple şi de o*

nemijlocită certitudine. Ştiai că un talent poate acţiona ca un vampir, sugându-ţi sângele, absorbindu-te?

Arta liderului, precum cea a actorului, presupune eliberarea judecăţii (ca putere de gândire) de acele constrângeri care nu se încadrează în dimensiunea optimă a teritoriului lor de competenţă. Iar crearea unui personaj presupune o construcţie complexă. Mai întâi trebuie să ajungi la psihologia personajului şi să o accesezi oricând prin reglarea intensităţii simţirii pe care o transmiţi celor din jur, acea simţire a fiinţei netrucată de efectele unei scenografii nemaipomenite. Valoarea ta nu poate să apară întâmplător. Este nevoie de o cunoaştere mult mai adâncă a lucrurilor, o viziune mai largă.

Leadershipul este ambiţia unei actorii de calitate, chiar briliante, atunci când rolul pe care îl interpretezi poate fi preluat de altcineva. Un rol interpretat cu acea flexibilitate a perspectivei care îţi permite o înţelegere empatică a lumilor ficţionale construite de un scenariu foarte aproape de a fi concretizat.

Personalitatea ta trebuie să se manifeste printr-o intensitate a gândirii, printr-o temperare magistrală a emoţiilor, combinată cu o cantitate mare de carismă - din care să reiasă că "spectacolul" pe care îl performezi, jucând după propria ta partitură, este de o calitate excepţională, dar are un preţ pe măsură – care se reflectă în loialitatea şi în aplauzele lor.

Dacă îţi vei îndeplini rolul în chip desăvârşit şi vei reuşi câştigi pe toţi oamenii de partea ta – prin spectacolul pe care îl creezi în jurul tău, atunci lumea îşi va spune: aceasta este opera unui adevărat artist.

Până la apariţia unui rol de excepţie care să facă din tine profilul unui lider adulat de mulţime, ar trebui să înveţi să înţelegi lucrurile de la un artist, considerat învechit sau nu, care ştie să te facă să vibrezi şi care ştie să transmită o emoţie specială.

Artistul este, de foarte mai multe ori, personajul care se detaşează de universul în care se învârt celelalte personaje ale piesei, permiţându-şi o judecată critică şi aspră la adresă celorlalţi. Este, deci, "purtătorul de cuvânt" al autorului scenariului, înzestrat cu o capacitate superioară de a simţi şi de a înţelege.

Leadershipul, la fel ca arta teatrului, la fel ca arta transformării diversităţii în unitate, este darul unui un artist care ştie să întrebe şi să se întrebe despre corectitudinea unei interpretări, căutându-se, în fapt, pe sine însuşi în roluri diferite.

Opera unui adevărat artist este povestea emoţională a unui artist ce iese la iveală nu de la el, prin rolul pe care îl joacă cu drag, ci de la ceilalţi artişti în roluri pline de substanţă care întregesc spectacolul încercând să-și croiască un drum al lor, triumfător şi binemeritat.

Menţine-te în poziţia de lider exercitându-ţi influenţa ca o artă, nu ca o ştiinţă.

Ora ultimului păcat

On August 23, 2011

Deschide-ţi propriul drum spre performanţă şi succes, fără să îţi dezactivezi câmpul protector împotriva influenţelor negative.

John Milton. Conştient că firma lui de avocatură, "Milton, Chadwick & Waters", nu se putea dezvolta daca nu dezvolta liderii din cadrul ei, s-a decis să-şi găsească un „urmaş". Iar cel mai potrivit, cel mai capabil să preia o funcţie atât de înaltă în această companie de top, era Kevin Lomax – un tânăr deosebit de ambiţios.

Milton îl instruieşte pe Kevin, îl învaţă toate dedesubturile meseriei de avocat, îl ajută să înţeleagă care sunt schimbările necesare pe care trebuie să le facă ca să atingă înalta performanţă aşteptată.

Dar cu toate acestea Kevin, în cercul acela nou în care se învârtea, nu se mai simţea în siguranţă. Deşi părea să avanseze tot mai mult din punct de vedere profesional, pe plan emoţional decădea tot mai mult. Se desprinsese de conştiinţa sa, de acele principii solide care se încadrau în sfera percepţiilor despre sine şi despre oamenii din jurul său, despre viaţă şi despre realitate.

În el se produsese o schimbare. Nimeni nu putea să sesizeze încordarea lui care aproape îl epuiza, care îl despărţea de vechile convingeri şi mentalităţi. Lupta cu o forţă nevăzută, şi nu voia să se dea bătut. Fiindcă de la el însuşi se aştepta la mai mult.

Poate vă amintiţi filmul „ *The Devil's Advocate (1997)* ". Kevin a refuzat să mai intre în pielea „diavolului", şi s-a hotărât să-şi urmeze chemarea inimii, să revină la adevăratele lui valori şi credinţe. Nu a mai vrut să aibă de-a face cu toate acele lucruri murdare, diavoleşti. Asta a însemnat eliberarea lui din propria încarcerare.

Leadership: Îndeplinești atribuțiile privind reprezentarea integrală a dependenţei dintre discontinuitatea ce caracterizează fenomenul de expansiune a inclinației spre sârguință şi intensitatea fenomenului numit "transfigurare spirituala"?

O sârguinţă demnă de o cauză bună trebuie trecută prin filtrul aderării la o versiune cât mai realistă a jocului de rol pe care te forţezi să-l desfăşori în spaţiul închis al necesităţii de a te afirma. Cum? Făcând făcând apel la realitatea faptelor ce intra sub incidenţa criteriilor de bine şi rău, clădind numai ce poate dăinui, creând numai pentru plăcere plăcerea de a trece dincolo de granițe autoimpuse.

Necesitatea de a te afirma este adesea un spaţiu închis deoarece se desfăşoară numai sub supraveghere din afară, în termenii acordării garanţiei de performanţă într-un cont pus la dispoziţia altcuiva.

Totul e îngăduit pentru cei buni, mai puţin păcatul. Păcatul este actul care te înstrăinează de propria ta conştiinţă curată, acea conştiinţă care luptă pentru ceva nobil, care se bazează pe adevăr şi sinceritate, care simte, gândeşte şi te apară în orice ai face. Dacă nu-ţi asculţi vocea interioară, nu-ţi vei găsi niciodată pacea inimii, te vei afunda în păcatul de a te schimba după voia celorlalţi.

Fenomenul de transfigurare spirituală se aplică în cazul depăşirii de sine, atunci când renunţi să te conformezi unor norme care nu te caracterizează impuse de o autoritate rigidă în ceea ce priveşte eforturile tale de a pune bazele unei vieţi împlinite.

Gândirea și sensibilitatea faţă de ceea ce ţi se întâmplă trebuie să fie tot timpul în stare de veghe. Ele sunt chemate să întruchipeze cât mai perfect OMUL NOU numai dacă sunt adaptate unei noi concepţii despre rolul tău în lume - care te obligă să fii tot timpul mai evoluat decât alţii din punct de vedere al costurilor pe care eşti dispus să le suporţi în cazul unei rătăciri de la credinţă.

Leadership: Practici o filozofie bazată pe obținerea puterii spirituale prin negarea unei stări de fapt exprimată printr-o interogaţie care exprimă un sentiment de neputinţă: "Eşti martor la sinuciderea propriului tău pacient" ?

Dacă nu porneşti de la considerentul că sănătatea ta morală şi sufletească reprezintă pionul cel mai important în prevenirea şi combaterea alunecărilor spre zona sumbră a leadershipului spre care te pot atrage unii, atunci înseamnă că eşti o fire care nu ştie să se impună, o fire care este uşor de separat de valorile pe care şi-a clădit viaţa, de valorile prin care şi-a deschis propriul drum spre performanţă şi succes.

Structura ta interioară este cea care face diferenţa între „lumină şi întuneric", între păcat şi virtute. Sinele tău este ca un pacient de care trebuie să ai mare grijă, dar pe care mai întâi de toate trebuie să-l înţelegi şi să-l accepţi ca pe un prieten. Apoi, trebuie să-i menţii stabilitatea şi să-l împiedici să alunece spre acea boală molipsitoare care se numeşte „influenţă negativă", ce se transmite preponderent pe cale emoţională şi raţională, care contravine eticii şi moralei, dar care pentru moment aduce prosperitate.

A te supune unei influenţe negative înseamnă să fii martor la sinuciderea propriului tău pacient – sinele. Dacă potenţialul tău lăuntric este „infectat" de excesul de influenţă negativă al altora, îţi vei destabiliza valorile care îţi ghidează traseul în viaţă. În leadership totul creşte şi descreşte în funcţie de toleranţa ta la influenţa celorlalţi.

Izbăvirea din robia păcatului seamănă cu eliberarea din încarcerarea voită în care te-ai aruncat aproape cu disperare: mai întâi îţi alegi un destin inevitabil trăind experiența neîmplinirii, apoi îţi afli rostul în lume anticipând nevoia unei schimbări în inimă.

Ora ultimului păcat desemnează momentul când ai decis să te îndepărtezi de adevăratele tale valori şi convingeri, atunci când îţi negi cu încăpăţânare esenţa şi te transformi în altcineva, la îndemnul şi insistenţele celorlalţi. Cel mai mare păcat pe care îl poţi înfăptui, ca viitor lider, este să accepţi în mod voit acele influenţe negative din partea celor care se pun în slujba unor scopuri meschine şi obscure.

Aşa cum sângele pe care deşi nu-l simţi, este totul pentru tine, datorită lui poţi trăi şi respira - tot aşa şi esenţa ta interioară, chiar dacă nu o simţi, ea este totul pentru tine, datorită ei îţi măreşti sau îţi slăbeşti câmpul protector împotriva influenţelor negative.

Concluzie: Întotdeauna vor exista oameni care nu sunt mânaţi de cele mai bune intenţii, oameni care vor să obţină doar foloase materiale indiferent de căile urmate. Ei utilizează toate mijloacele de a-i atrage de partea lor pe cei slabi de caracter, a căror credinţe nu sunt fixate, adică al celor care nu şi-au activat „câmpul protector".

Creează-ţi un câmp protector împotriva influenţelor negative pe care cu niciun preţ să nu-l dezactivezi, chiar dacă în jurul tău acţionează oameni mânaţi de aparente intenţii bune.

Aminteşte-ţi că şi iadul e pavat cu intenţii bune...

Ora unei lumi pierdute

On Martie 01, 2017

Învaţă să surprinzi acea realitate mai presus de raţiunea ta, impusă de un verdict al unei entităţi de dinaintea conştiinţei umane care susţine dreptul la liberul-arbitru.

Mercedes izbucni în lacrimi. Inima ei de femeie se frângea în faţa amintirilor. Monte-Cristo îi luă mâna şi i-o sărută cu respect. Dar ea simţi că sărutul îi este rece, asemănător sărutului depus pe mâna de marmură a statuii unei sfinte.

- Există vieţi predestinate, cărora o singură greşeală le zdrobeşte tot viitorul, continuă ea. Eu te-am crezut mort şi ar fi trebuit să mor şi eu, căci la ce mi-a folosit să port veşnic în inimă doliul după tine? Doar ca să fac o femeie de cincizeci de ani dintr-o femeie de treizeci şi nouă, şi atâta tot. Mi-am renegat dragostea şi, ca toţi renegaţii, aduc nenorocire tuturor celor din preajma mea.

- Nu, Mercedes - spuse Monte-Cristo, - nu ! Trebuie să te crezi mai bună. Eşti o femeie nobilă şi sfântă şi m-ai dezarmat prin suferinţa ta. Dar înapoia mea, nevăzut, necunoscut, mâniat, se află Dumnezeu. Eu n-am fost decât trimisul lui, m-a folosit ca pe o armă ca să scoată răul la iveală şi n-a voit să oprească fulgerul pe care îl aruncasem. Îl iau ca martor pe Dumnezeu, la picioarele căruia mă prosternez în fiecare zi de zece ani încoace, îl iau ca martor că ţi-am jertfit viaţa mea şi că odată cu ea ţi-am jertfit şi toate planurile pe care le aveam.

Îţi spun cu mândrie, Mercedes, că Dumnezeu avea nevoie de mine, şi am trăit. Cercetează trecutul, cercetează prezentul, încearcă să ghiceşti viitorul şi vezi dacă nu sunt o unealtă, o lucrare a unei inteligenţe invizibile. Roagă-te Domnului, care ţine vieţile oamenilor în mâinile sale, să înlăture moartea din preajma mea. Căci aşa cum realitatea înconjurătoare le slujeşte marilor poeţi drept model al creaţiilor lor ideale, tot astfel întreaga forţă a mâniei Sale slujeşte unui scop mai înalt decât mine, mai înalt decât nişte lecţii de viață care pot face faţă mai bine mersului real al lumii.

Ceasul bate ora unei lumi pierdute din tot ce a fost marea noastră iubire. Şi chiar dacă destinul nostru a fost hotărât pentru totdeauna, să ne despărțim, nu uita că El vrea să-i înţelegi şi să-i discuţi puterea. De aceea ne-a lăsat liberul arbitru . *****

Leadership: Iţi pui în evidenţă rostul vieţii în compoziţia ansamblului realităţii a cărui semnificaţie se descoperă prin observarea unor serii de fapte și întâmplări distincte care demonstrează conformitatea ta cu cerinţele unei ordini nevăzute?

Însumând cele spuse mai sus de scriitorul Alexandre Dumas, obținem că mintea și sufletul sunt unelte ale unei inteligenţe nevăzute, mereu constantă în ceea ce impune, care în plus, este superioară acelei forţe care suntem noi înşine și care adesea tinde să ne strâmbe într-o direcţie contrară structurii noastre interne. Iar sufletul omului, perceput ca unealtă a unei ordini nevăzute, find mult mai important decât o minte în acord cu adevărurile vieţii, se poate impune ca existenţă a unei forţe superioare care schimbă direcţia destinului spre o altă înfăţişare a personalităţii, spre alte conjuncturi sociale.

Altfel spus, suntem conduși, fără voia noastră, printr-o suită de procese fizice, emoţionale și spirituale, ca în jocul de lumină al unui miraj fantastic, spre drumul artei de a trăi prin dăruirea de sine și prin sacrificiul zugrăvit pe pânza unei lucrări care indică sugestiv tema sau conținutul unei hotărâri „judecătoreşti" mai presus de înțelegerea noastră.

Solidaritatea cu această formă de conducere, superioară cunoaşterii pe care am dobândit-o printr-o străfulgerare a sentimentelor, printr-o credință vie și activă, printr-o viaţă virtuoasă şi prin împlinirea a ceea ce se cuvine a fi urmat, este o cauză a expansiunii conştiinţei noastre până-ntr-acolo unde putem să descoperim din ce în ce mai multe despre felul în care este modelată lumea. Până într-acolo unde se anulează tendinţa de a judeca lucrurile, în care ne poate arunca implicarea într-o cauză pe placul nostru.

Posibilitatea de constituire a unei forţe conducătoare, superioară și stabilă, are ca temei poziţionarea corectă a unei viziuni cuprinzătoare, a unei imagini de impact și a unui conţinut de viaţă, în sensul unei transformări care influențează sursa tuturor acțiunilor omului dinspre ceea ce produce o anumită trăire spre ceea ce produce o anumită consecinţă.

Leadership: Exemplul călăuzirii destinului tău poate să intervină în interpretarea unei "Forţe Superioare" care se impune în contextul expansiunii conştiinţei tale până-ntr-acolo unde poţi să descoperi din ce în ce mai multe despre felul în care este modelată o întreagă lume?

Adevărata valoare a leadershipului de înaltă factură, prin participarea la formarea unui întreg sistem de reprezentare a unei realităţi percepută printr-o stare de suflet, constituie un memento al punctului în care afirmarea voinţei omenești de a „îndrepta" lumea și de a juca un rol important în modelarea ei devine condiţia de înfăptuire a unei ordini superioare.

Pentru a se ajunge la unitatea dintre fundamentul esenţial al lumii și desfăşurarea oportună a unei superiorităţi absolute, omul trebuie să-şi pună în evidenţă rostul în compoziţia ansamblului unei realităţi a cărui semnificaţie se descoperă prin observaţia paralelă a unor serii de fapte și întâmplări distincte care demonstrează conformitatea lui cu cerinţele unei ordini nevăzute.

O ordine care solicită din partea omului, în primul rând, un act de credinţă, un act de încredere într-o realitate care depăşeşte competentele raţiunii, dincolo de limitele pe care experienţa vieţii le impune.

Împlinirea destinului unui om se cere a fi realizată prin veridicitatea unei lumi influenţată de o forţă superioară a cărei victorie, ce stabileşte echilibrul în tot şi în toate, este dată (într-o ordine nevăzută) de către respectarea unei legi imperioase: "După faptă, şi răsplată".

Să-ţi ajute Dumnezeu, după cum ţi-e sufletul !

Ora unei lumi pierdute este momentul când te recunoşti slab în faţa infinitului unei inteligenţe universale încorporat în viul vietii, din care ai explorat numai o mică parte printr-o bizară înlănțuire de coincidențe. Scoate în evidenţă acea realitate mai presus de raţiunea ta, impusă de un verdict al unei entităţi de dinaintea conştiinţei umane care susţine dreptul tău la liberul-arbitru numai prin influenţarea conţinutului tău de viață şi a presupuselor priorităţi ale acesteia.

Ordinary World (II)

On Noiembrie 04, 2017

Învaţă să te accepţi din perspectiva unei forțe abstracte, în felul în care putința de a vedea o nouă față a realității devine posibilă.

Viața mea părea să urmeze un scenariu intern misterios, o izolare de tot restul lumii, un efect al momentului de iluzionism ce avea sens numai în lumea închisă pe care o populează traiectoria unei povești imaginare despre mica istorie a unei săgeți pe care n-o poate opri nimeni şi nimic din drum.

O legătură cu cele mai strânse raporturi dintre definirea puterii mele superioare ca precumpănitoare, lupta pentru o realizare de excepție și o experiență estetică a sublimului, implica în mod necesar o valoare de „foc sacru" pe care Dumnezeu a transmis-o din Inima Lui către a mea.

Înțelegeam prea bine provocarea emanată de sublimul unei demonstrații de credință, exemplaritatea unei vieți trăite în cinstea unui *magic circle* dintr-o lume a magicienilor, simptom clar al unei izolări ce trăda condiția ființei umane în conștiința unei realități mai înalte şi mai extinse, care trebuie doar descifrată.

Aparentul imposibil pe care l-am străpuns prin cerințele unui compromis cu cerul ce-şi deschide adesea belșugurile de puteri şi râvne, o combinație între psihologie, artă şi credință echivalând cu o vedere de nicăieri, abstractă şi încifrată într-o știință spirituală, constând în unitatea dintre idee şi imagine, era doar o instanță de fond: *"I've been waiting for you ! "* Bineînțeles, în prelungirea melancoliei unei iubiri intense, dar neîmpărtășite.

Ceea ce contribuie la confirmarea esenței tale divine este acel moment trecător al prezentului pe care îl trăiești într-o lume care nu există decât în plan imaginar, dar cu impact asupra realității.

Când te trezești brusc sedus de minunății nespuse, adunate de gândurile și simțirile cele mai imprevizibile într-un singur cufăr de piatră din criptele special amenajate în adâncul unei imaculate exigențe față de cele sfinte, mizând doar pe un playlist cu muzica propusă *for a mood of due solemnity* , te gândești la un Aladin şi lampa fermecată, sau la șeicul unei preaputernice seminții de arabi, cu totul diferit de poveștile originale.

Simțeam că pot să coordonez cu inteligență totul prin intermediul unei realități virtuale din care nu mai puteam ieși decât strivind ceea ce e pur și simplu strălucit.

O mișcare pe traiectoria unei geometrii sacre. Eram mai degrabă programat s-o îndur cu stoicism într-un cadru numit intimidant " *prezența lui Dumnezeu* ", împotriva legilor acceptate de condiția analizării unei opere de artă simbolică, numită stare de spirit creativă, un transfer de gânduri pline de nuanțe, câteodată absurde, între Tolstoi sau Faulkner.

Că dincolo de ceea ce în concepția mea părea să fie lucrul care m-ar împlini, în afara celor ce țin de arsenalul unei magii simpatetice, prindea formă tendința dezolantă de a ascunde adevărurile fenomenului: *"Chill, is it something real"*.

Leadership: Poți să-ți etalezi autenticitatea pe care o trăiești când eşti pus în situația de

accepta o provocare de tip narativ al cărui plan referențial este simbolizat de o taină nepătrunsă?

Comparativ, mă simțeam asemenea unei instanțe a unui program aflat în execuție, a unei alte unități generice speciale, numită de obicei hoinăreală, dar una dinainte pregătită şi amestecată cu reflexul unei reducții de la mai mult la puțin, ca într-un labirint cu oglinzi care maschează ieșirea unei porți logice nefolosite: Pars Pro Toto.

Efortul de a-mi înțelege rostul, de a mă construi şi modela, de a evolua şi de a mă defini, era dedus din năzuința către cele ascunse ce se deleagă prin ochii unui viitor fără trecut, semnificației acordate reprezentării unei prezențe nevăzute constituite ca un întreg, pe temeiul imaginației.

Criticul literar român, Ion Negoițescu, încerca să deslușească misterul schimbării profund revoluționare în modul de gândire, simțire şi viață al omului divin, făcând trimitere la orizontul lui Dostoievski:

"De ce se simte prinţul Mîşkin străin în existență? Fiindcă e permanent confruntat cu caracterul problematic al existenței. Clipa de iluminare a epilepticului nu aparține nici psihologiei, nici extazului mistic, ci confruntării cu neantul. Dar peste tot, aici, psihologia se autoanulează, căci trăirile şi faptele răspund față de ceea ce matematicienii numesc un punct de fugă.

Ca şi Mitia Karamazov, ca şi Raskolnikov, el trebuie să răspundă mereu față de ceva care ţine de un misterios "dincolo", ceva de dincolo de o prăpastie pe care omul nu o poate trece. Mîşkin nu simbolizează pe Christos, ci cumva îl anunţă, cuvintele şi actele lui trimițând indescriptibil spre sensul existenței, spre divin."

Să-ți recunoști limitele putinței de a avea un sens într-o ordine divină înseamnă să răspunzi mereu față de ceva care ține de un misterios "dincolo" de marginile prăpastiei pe care nu o poți trece.

Dacă voiam să fiu pregătit de o situație a ființei aşa cum o înregistrează conștiința, oricât de călit aș fi fost în fața încercării de a mă conecta la Sursa Divină, să elimin aspectele negative din gânduri, fapte, acțiuni, trebuia să mă aștept la riscul confruntării cu neantul, durerea de a mă ști departe de mine, sufletul simțind nevoia să se oglindească într-un rezultat al inadecvării la traseul unui destin lipsit de strălucire.

Still I can't escape the ghost of who I am and who I used to be to a great extent of God's intervention.

Decizia finală care practic presupune alegerea unei alternative de exploatare a propriei autonomii din mai multe alternative posibile, în ceea ce privește modul de îndeplinire a unui angajament față de ceva ce e mai mare decât tine însuți, poate fi privită prin prisma a ceea devii când simți că eşti în prezența unei Autorități mai înalte, înaintea căreia ești responsabil.

Această decizie dă coerență unei minți care gândește în ritmul unei lumi percepută de la înălțimea priveliștii unei călătorii aproape fantastice, inițiatice într-un imaginar al ascensiunii și unul al coborârii, sinonim unui drum spre marginile orizontului înconjurat de o prăpastie fără sfârșit. Un orizont numit „Credinţă” şi o prăpastie numită „Aşteptare”.

A asculta de îndrumarea vieții angajându-te într-un dialog cu Dumnezeu înseamnă să

aduni piesele unui adevărat joc de puzzle, până când ajungi în fața unei realități pe care nu ai fi avut curajul s-o recunoști până atunci.

Ordinary World este o viaţă fără victorii. Cea mai mare victorie pe care o poţi repurta în această lume are ca principală caracteristică puterea de îndepărtare de un anumit context al existenței tale, desfăcând sau rupând legătura cu tot ce este măsurabil și previzibil, în vederea conturării unei noi relații cu o nouă realitate.

*** Notă:** Duran Duran - Ordinary World

Source: https://neculaifantanaru.com/ordinary-world-II.html

Ordinary World (I)

On Octombrie 30, 2017

Învață să descoperi lumea în care trăiești, acordându-i sensul de „experiență interioară" prin intermediul vocii din off.

Am început jocul ăsta straniu de căutare, de așteptare şi de programare a evenimentelor ce trebuiau să mi se întâmple, prelungit până la exasperare de tabloul unui *ordinary world* , din pricina unui motiv de contrast înalt care îşi ascundea vina: între nebunia înțeleasă ca o răzvrătire şi ieşirea din tiparele obișnuite de gândire. *„I won't cry for yesterday."*

Era un prilej de exploatare a propriei memorii, o culminare a căutării vederii pierdute și a regăsirii privirii interioare, despre cele ce nu se spun dar se simt ca o copleşire completă, se transmit ca printr-un har dumnezeiesc care este farmec și otravă totodată, căci cu ele şi prin conținutul lor se curăță rănile vechi şi se deslușește viaţa. *„I learned to survive."*

Aşa şi acum. Adesea, gândindu-mă la ceea ce trebuie să fac ziua următoare, sfârșesc mai mereu întors cu faţa către ceea ce simt în relaţie cu tot ce mi se întâmplă, când totul este sub semnul întrebării, luptă, aventură, meditație, fugă, evadare oarbă, sub purtarea de grijă a unui Dumnezeu care nu încetează să se minuneze de capacitățile cu care el însuși m-a înzestrat. Frumusețea acestui fenomen de frontieră între cer și pământ, între psihologie și credință, este ireproșabilă, chiar dacă frumusețea unui tablou şi atmosfera pe care o degajă acesta în jur îi este superioară.

Deși răsfățat, în sens pozitiv de acest mare senior ce ține în balanță binele, sub forma unei apropieri de cele spirituale, o stare pe care psihologii o numesc reverie, o necesitate pe care francezii o numesc *Reconnaissance* , o calitate pe care sculptorii o numesc „mișcarea" formei imobile, încerc să mă deosebesc fundamental de ideea de înnoire neîntreruptă a vieții și să trec în subordinea unui alt mister, numit: clipa de faţă. *„What has happened to it all? Crazy someone say."*

Leadership: Trebuie să treci prin faza de testare a unei realități care te depășește prin complexitatea ei, ca să contribui la înțelegerea noțiunii de "împrejurare" pe care se întemeiază concepția ta despre o chemare mai înaltă?

Nu poți să participi la un concurs de împrejurări, cu toate tendințele tale de a submina regulile jocului din prelungirea unui mister al dumnezeirii, fior al unui sentiment necunoscut, gând interzis şi plin de suspiciune, decât adâncindu-te într-un spațiu fără ieşire. Unde să funcționeze ideea de „deja vu", data de reacția creierului în fața unor experiențe noi şi intense pe care nu le-ai mai trăit.

He left me in the vacuum of my heart , mai ales dacă aș admite că puterea Sa nemărginită, o realitate pentru care nu sunt pregătit să o accept cu totul, ascunde tendința unei incertitudini de nesuportat, inclusiv în privința unei anumite supralicitări a orientării filozofice în critica rațiunii pe care mi-am ales-o ca piatră de hotar, acceptată ca lucrare de artă şi aproape pe punctul de a fi vândută la fier vechi.

A trăi într-o mare de incertitudine înseamnă să te gândești la o singură întrebare din diferite perspective şi să dai un răspuns care nu lămurește nimic sau nu continuă să reverbereze în tine cu o infinită forță.

Iar când totul este sub forma unui joc, suspect ca o lipsă de curaj în a privi realitatea în față, ca atunci când eşti în căutarea unui lucru imposibil de prezis, după ce ai trădat știința pornirilor spre exagerarea sentimentelor, dincolo de orice limite, rezultatul constă în "vânarea" detaliilor care te transformă într-un tip nonconformist şi ezitant totodată.

Aspirația ta spre înțelegerea realității este manifestarea lui "Eu sunt" îndreptat înspre cele sfinte, care te face să recunoști că adesea răspunsul la întrebările evidente nu este cel presupus.

Eram altfel decât mi-au prezis evenimentele vieţii, pe baza cărora îmi construisem o istorie, o galerie de tablouri în care sunt puține originale şi multe copii. Gândurile cele mai puternice în replici, în ordinea relevanței şi a calității pe care o promovează acceptarea unei situații fără cunoaşterea detaliilor ascunse, se focalizau într-o direcție paralelă cu orizontala unei lumi dominate de manevrele unor alegeri făcute în grabă, apoi regretate. *„Somehow I have to find what I do not know where to look."*

Dimensiunea care mă limita, de care aparținea nivelul meu de comuniune cu Dumnezeu, această voce din off, părea a fi special concepută pentru o inducere în eroare, o ambiţie epică înaintând la întâmplare, fără un sens precis, creându-se confuzii la nivel de nevoi, așteptări, emoții, o multitudine de efecte, de la cele mai naturale la cele mai extravagante aplecări şi trăsături ale firii mele.

Clar este că nu eram pregătit să dau nas în nas cu adevărurile conturate în jurul unei interogații *"Where is the life that I recognize?"*, doar fiindcă mă credeam apt pentru o altă determinare a poziției mele în relație cu cele alternative, nu neapărat în valoare absolută. Un fior al transcendenței. În sfârșit o altă denumire pentru tenacitatea voinței de a trăi, al sensului de insuficiență sau nedeplinătate a Revelației, întocmai cum presupune şi necesitatea de a adăuga la ele o zonă pe care mulți o numesc "capătul lumii" sau "drumul spiritual" îndreptat spre cele văzute doar de simţuri, nu și de raţiune.

Chemarea cea mai înaltă dintre toate, la fel ca şi fericirea pe care viața ne-o scoate în cale, dar pe care deseori o ocolim, are particularitatea de a fi chintesența numeroaselor voci care spun „Nu sunt aici", dar de care ne agățăm cu nădejde în numele unei energii pozitive menite să ne îndrepte spre o direcție luminoasă.

Esența care te face unic este chemarea pe care ți-o asumi în realizarea unui plan mai înalt decât tine, al cărui scop este descoperirea lumii în care trăiești căruia trebuie să-i acorzi sensul de „experiență interioară" prin intermediul vocii din off.

Ordinary World capătă sensul de a asculta „părțile" implicate în procesul tău de cunoaştere și simțire, iar mai târziu primește o largă extindere în zona vieții cu intensități diferențiate în funcție de nivelul tău de percepție a tot ce vine de la un Dumnezeu care pare absent în realitatea palpabilă.

*** Notă:** Duran Duran - Ordinary World

Orice creaţie nu se poate face decât pornind de la materia iniţială

On Ianuarie 03, 2015

Conștientizarea unei imagini poate fi asemănată cu descoperirea unui fapt măreț, invitându-te să vezi dincolo de ceea ce este evident, culminând într-o realizare care depășește orice așteptări.

- Această concepție a preoților lui Ptah, după care zeul, despre care nu se ştie cum a venit pe lume, pare să fi creat zeii prin cuvânt, după ce i-a conceput prin inteligență, este neverosimilă, absurdă, este doar un exercițiu al spiritului, un pas de dans al gândirii, o piruetă de acrobat.

- Te ascult, îi zise atunci Ibebi. Explică-mi de ce!

- Este foarte adevărat că fiinţa vie care nu a primit nume este, față de ceilalți, nimic, nu există. Dacă termenul de om nu ar fi existat decât ca să denumească specia noastră, dacă nu i s-ar fi dat un nume, care a devenit într-un fel substanţa ta însuţi, ar trece printre noi ca o umbră. Nimeni nu ar putea să te strige şi, dacă cineva ţi s-ar adresa cumva pe stradă strigându-te într-un fel oarecare, nu ai avea motiv să întorci capul, să te apropii de el, pentru că strigătul s-ar putea adresa tuturor și nimănui. Prin numele tău, Ibebi, şi prin numele meu, Keops, existăm cu adevărat, avem o ființă pe care o pot privi toți.

Dacă aud acest nume care este al meu, vin spre cel care m-a strigat. Dacă îţi vorbesc şi vreau să-ți spun ceva despre cineva cunoscut de mine, cum ai şti despre cine este vorba dacă n-am să pot numi persoana cu un nume care l-ar identifica printre ceilalți oameni în viață? La fel, când mă întorc spre aceste două statui, spun că una reprezintă un ibis, cealaltă, un babuin, căci mi s-a spus aşa, căci i-am văzut trăind în vale, pentru că mi-au fost numiţi, și mai știu că şi unul, şi celălalt sunt simbolurile lui Thot, că zeul se manifestă prin unul sau altul dintre aceste animale, și știi și tu asta, şi de aceea ne înțelegem.

Leadership: În ceea ce privește interpretarea subiectivă a elementelor vizuale, te-ai întrebat vreodată cum ar putea fi percepută realitatea din jurul tău prin prisma imaginii și a formei, încât să evidențieze simțirea sinelui și a propriei viziuni?

Dar dacă s-ar fi aşezat în fața mea materia brută, piatra încă informă în care sculptorul a modelat aceste două forme, ce-aş putea să spun despre ele, doar că este piatră sau lemn, sau argilă? Dar nimic nu mi-ar putea da voie să-i spun unuia ibis şi celuilalt babuin, cu excepția cazului în care am hotărât amândoi, de comun acord, că fiecare reprezintă unul dintre aceste animale, chiar dacă nu au forma lor. Dar dacă vine un al treilea, care nu a auzit de înţelegerea noastră, va vedea doar nişte pietre brute. Pentru că dalta sculptorului le-a dat această formă existentă în natură, ştiu că este vorba de unul sau altul dintre aceste animale, şi pentru că mi s-a spus că în ele se manifestă zeul, pot să spun că ele sunt Thot.

Astfel, zeul creator, prin magia cuvântului, poate să dea o formă materiei preexistente, după cum face sculptorul cu dalta sa, și poate să numească o formă creată, aşa cum ne-am numit propriii noştri copii, proveniți din sămânța noastră, ale căror forme s-au modelat din această materie inițială. Dar numindu-i la naştere, asta nu înseamnă că i-am creat noi. Orice creație nu se poate face decât pornind de la o materie inițială, care este numită Nun sau Tatenen. De aceea, trag concluzia că, aşa cum au conceput-o preoţii de la Heliopolis, creația, chiar dacă păcătuiește prin unele aspecte, este mai logică decât cea propusă de preoții de la Memphis, căci aceasta din urmă este pur artificială. Îmi amintesc de acele figuri iluzioniste, făcute de unii jongleri abili, care bat drumurile de ţară şi trăiesc astfel păcălindu-i pe bieţii ţărani.

Concluzia pe care leadershipul o impune este următoarea: "Fii conștient de emoția și virtutea care pot fi transmise printr-o operă de artă, chiar și atunci când aceasta este doar o imagine, fără a avea un conținut clar.”

Orice creație nu se poate face decât pornind de la o materie inițială, ţinând cont de faptul că fiecare creație necesită o formă, iar aceasta se obține prin modelarea materiei preexistente. De exemplu, ai putea să vezi în fiecare imagine, în fiecare lucrare a unui sculptor doar niște pietre brute, conturul și forma lor sunt definite de o viziune și o perspectivă care guvernează modul în care sunt percepute și modelate.

Şi tu poţi fi un artist numai dacă ţii cont de următorul sfat: *"Înţelegerea ta despre o imagine fără conținut poate să evolueze odată ce realizezi că valoarea acesteia depinde de interpretările subiective ale elementelor vizuale."*

*** Notă:** Rachet, Guy - *Keops si conjuratia Ibisului*, Editura Lucman, 2003.

Orice lucru are o taină a lui mai expresivă

On Iulie 12, 2022

O cale spre frumos se poate croi numai printr-o privire interioară, identificând ceea ce ne este exterior cu ajutorul unui arhetip preexistent în interioritatea noastră.

Stau pe o bancă, într-o grădină mare plină cu flori. Dar nu sunt complet singur. Fiindcă sunt înrudit spiritual cu materia naturii, am la dispoziţie vederea a ceea ce este cu adevărat mai presus decât tot ce este, deci sunt legat nespus de puterea mea de raportare la artă. Arta de a însufleți lemnul din care este făcută bancă, de a-i dă forme cu ajutorul gândului şi al procedeelor artistice.

În sfârşit am găsit ceva pe placul meu de moment, chiar dacă interesul meu este doar un capriciu copilăresc.

Şi dacă lemnul din care este confecţionată banca este puţin putred pe alocuri, se vede că este încă destul de rezistent, şi-a păstrat nealterată sacralitatea. Şi chiar dacă vopseaua care acoperă lemnul este ştearsă de trecerea timpului, depunând un mare efort în frământarea materiei picturale, aş putea totuşi să prezint lemnul în toată strălucirea lui, într-un tablou cu mii de culori, toate puse laolaltă, sau în paginile unei cărţi biografice.

Să las, deci, această chibzuinţă a vederii de dincolo de vedere, şi să merg pe firul subţire al unor posibilităţi duble de reflecţie, căci simţul artistic îmi va călăuzi paşii. Mă întreb, totuşi, dacă nu cumva percepţiile vreunui personaj din povestea mea de viaţă a fost afectat de prezenţa acestui material atractiv, viu, în comuniune vitală cu mediul, din care este confecţionat banca.

Leadership: Poţi efectua o observare subiectivă în apropierea locului care te invită la introspecţie, aşa încât imaginea pe care o proiectezi asupra propriei fiinţe să fie o viziune a ceea ce eşti în relaţie cu exteriorul?

Lemnul este adevărul şi indurarea, în spaţiul trecerii de la o înțelegere empirică obiectivistă a tărâmului uman, la una care subliniază subiectivitatea și interpretarea unor modele estetice, cum erau cele de la Romantism la Avangardă, într-un secol manierist care s-a dovedit, dincolo de restricții și temeri, un real succes pe plan stilistic, vizionar, creator.

Şi cum credeţi că privesc eu această bancă din lemn? Nu cu o privire distanţată faţă de lume, nu ca pe un sacrificiu al timpului meu dedicat pasiunii mele, ci ca pe o fiinţă însufleţită de spiritul frumosului şi de bucuria libertăţii, câmpul picturii fiind conceput ca o explorare intensivă a culorilor verde-bleumarin.

Ca atare, simt cum lemnul vibrează la rândul său, iar dacă vibrația aceasta subtilă, evocatoare, ridicată în sfera poeziei, are atașată un sentiment profund încărcat de o trăire sinceră, atunci destinatarul acestei vibrații, artistul plin de har, dramaturg, prozator şi pictor, o simte nealterată de timp, de iureşul unei lumi în transformare. Da, simt lemnul ca pe-o personalitate ce vrea să se impună, provocându-mi trăiri accentuate de emotivitate şi conştientizare a fineţei prezente în fiecare element din jur. Evident, cartea vieţii mele îşi imaginează personajele înainte de a le da viaţă.

Aşa stau lucrurile. Lemnul nu mă lasă să pierd firul poveştii în care un pictor, aşezându-se pe bancă după o atentă observare a lucrurilor din jur, încearcă să realizeze un tablou prin sporul

de libertate gestuală în tratarea materiei picturale, dar cu toate astea nu se poate realiza pe sine în tablou. Fiindcă asta ar însemna să treacă de două ori prin experienţa Sinelui care s-ar putea manifesta în exterior, în vizibil şi în invizibil în acelaşi timp, dovedindu-se a fi mai mult decât un "*intermediario nella connessione tra due persone*" - bântuit de asocieri elective între diverse stiluri (romantism, simbolism, realism, expresionism etc).

Leadership: Poţi să-şi înregistrezi prezenţa în locul desfăşurării observării, încât să stabileşti un raport corespunzător între obiectul percepţiei şi acuitatea vizuală care este activată de la o anumită distanță?

În relaţie cu exteriorul, deci faţă în faţă cu banca de lemn, sunt asemenea unui artist care experimentează alteritatea, în timp ce pictura mea se pregăteşte să devină treptat un simbol plin de înţeles adânc.

În plus, în momentul când stau pe bancă, realizez cu multă emoţie că mi-am configurat un salt impresionant spre un alt nivel al limbajului plastic (transpus creativ într-o mică opere de artă). Acest fapt apare ca o trecere la o expresie artistică (*Antraghosys* - emoţia unui gând exprimat plastic) pe care nu o percep încă foarte clar, dar care are implicit caracterul de iminenţă a sentimentului de unitate, fapt ce mă şi determină să vorbesc despre ea.

De asemenea, lemnul din care este făcută banca a fost martor la o mulțime de evenimente care în raport cu un eveniment de referință fixat, este simultan.

Şi tot acum, când stau pe bancă şi reflectez la diverse modalități de a crea imagini, deci înţelegând cu exactitate că pictura oferă mult mai multă libertate față de fotografie, mă gândesc că lemnul şi-a păstrat nealterată personalitatea, recunoscând parcă aprioric, cu multă emoție, toate intervențiile estetice care i se vor face de-a lungul timpului, de numeroşi alţi artişti. În ochii lemnului sunt un necunoscut, dar nici nu cred că m-ar privi ca pe un străin dacă şi-ar regla mai bine vederea printr-o eliberare a simţirii din chinga raţiunii.

Iată, deci, că şi lemnul şi banca, pot căpăta trăsături umane. Ele pot să dobândească facultăţile simţurilor şi a imaginaţiei de a capta în totalitate şi de a eterniza miracolele creaţiei, atâta timp cât artistul îşi etalează excelenţa într-o tehnică sau măiestrie artistică care indică un mesaj: *"O cale spre frumos se poate croi numai printr-o privire interioară, identificând ceea ce ne este exterior cu ajutorul unui arhetip preexistent în interioritatea noastră."*

Acuitatea vizuală pe care artistul o activează de la o anumită distanță se referă la impactul pe care îl au celelalte elemente din jur asupra obiectului de studiu (perceput ca o putere de sine stătătoare, sau ca o structură abstractizată de senzații).

Orice lucru are o taină a lui mai expresivă dacă luăm în considerare faptul că o bancă de lemn poate desemna un "gol" populat în mod echilibrat cu plinuri. Asta, dacă mesajul unitar al imaginii ei păstrează apropierea de viziunea flexibilă asupra unei realităţi ignorate de toţi ceilalţi. Ca atare, un singur mesaj îmi transmite banca de lemn: *"Nu refuza niciodată ochiului tău plăcerea de a crea o altă realitate din ceea ce te înconjoară, simultan cu trăirile cu care îţi asociezi persoana."*

După cum se poate observa, arhetipul preexistent în interioritatea mea este tendinţa de reprezentare a unei realităţi care transcende ceea ce este trecător.

Orice operă de artă poartă urme ale creatorului ei

On Februarie 07, 2013

Examinează-ţi "creaţia" prin prisma acelor senzaţii şi trăiri capabile să-ţi ateste valoarea în aspectele diverse ale realităţii care îţi susţine lumea exterioară şi viaţa, aşa cum sunt ele reprezentate într-un univers nesfârşit.

A început prin a fi rodul unei ştiinţe imposibile. O pură interpretare a unei viziuni care delimita prezentul de viitor. O transformare la nivel de percepţie care intensifica la maxim efectul de originalitate şi inedit. Cu mână sigură, cu o gândire analitică de tipul " *Numai eu ştiu, numai eu pot* ", scriam şi îmi reînnoiam garderoba de idei în acelaşi mod în care picta Van Gogh, ca un posedat, cu aceeaşi repeziciune, cu aceeaşi exuberanţă maniacă a creaţiei.

Absolut unică, creaţia pe care o plămădeam din noroiul evenimentelor, bizară prin alcătuirea ei, cu permanente ricoşeuri într-un imens real care se împărţea în contrarii, părea să se întoarcă împotriva mea. Se îndrepta într-un singur sens, spre suspendare, sau mai rău, spre auto-anulare, spre dezintegrare. Consecinţa îndrăznelii mele de a judeca lucrurile altfel, într-o manieră prea voalată?

Ca un pârâiaş care se varsă într-un pârâu şi apoi se transformă într-un fluviu, aveam impresia că tot ceea ce cream, din tot ceea ce încercam din răsputeri să aflu, din tot ceea ce ajunsesem să cunosc, din tot ceea ce însemnam eu, se vărsa în ceva mai mare. Într-un imens ocean cu limite insuficient definite. Într-un univers al cărui început şi sfârşit nici nu pot fi închipuite de imaginaţia omenească.

Un orizont înceţoşat, prăfuit ca un drum redescoperit după mii de ani, greu accesibil. Un orizont care nu pleda către un ideal acceptat de majoritatea oamenilor, care nu circumscria orizontul aşteptărilor lor.

A conferi creaţiei tale un conţinut de autenticitate înseamnă să asimilezi ideea de "sacrificiu" cu conţinutul cel mai profund al unei imagini care declanşează sentimentul unei implicări accentuate în existenţă.

Ceea ce un artist încearcă să construiască pornind de la nişte detalii complexe, care într-o eventualitate ar fi fost demne de un Rafael, adică revelator în ceea ce priveşte lumea ideilor, nu trebuie să se interpună în calea sentimentului. Dacă creaţia mea ar fi ajuns pe mâinile Agathei Christie, cu siguranţă ea nu s-ar fi putut abţine să nu aducă o remarcă foarte importantă: " *Nu e destul sânge sau suficiente cadavre în opera ta !* "

Pe de altă parte, un critic literar, care pune accent pe obiectivitate, ar fi pus altfel problema: " *E adevărat că scriitorii au o predilecţie pentru idei ieşite din comun. Idei depărtate de marginile realităţii, idei cam fanteziste. Însă ideile tale, năstruşnice, preţioase prin ingeniozitatea şi originalitatea lor, cum pot contribui la bunul mers al lucrurilor în sfera ta profesională? Care e impresia pe care o lasă cititorilor? Cum ar putea fi ele originea excelenţei tale?* "

Leadership: Poţi să observi aspectele diverse ale realităţii într-un mod aparte echivalând cu o tendinţă spre autonomie care te determină să fii stăpân pe un destin căruia numai tu îi poţi da expresie?

Orizontul pe care "creaţia" ta îl materializează, este indicatorul cheie al leadershipului. Şi

numai dacă eşti o persoană înzestrată cu talent, o persoană inspirată, îţi vei putea facilita parcursul artistic la nivel de idei, concepte şi perspective printr-un proces complex în care "Demiurgul a zidit universul punând spiritul în suflet şi sufletul în trup", caracterizat de incluziunea într-o lume haotică.

Orizontul, un punct forte ce ar trebui mult mai bine exploatat, este asemenea unui obiect executat cu meşteşug, în conformitate cu regulile de alcătuire ce-i sunt inerente, care poate, sau nu, să se bucure de o anumită popularitate în rândul celor interesaţi să-ţi acceseze potenţialul. Realitatea în care te găseşti este o sumă a percepţiilor şi atitudinilor tale asupra mediului extern, asupra lumii înconjurătoare determinată într-un mod extrem de profund.

În această linie, de asigurator al perpetuării leadershipului, de *customizer* al elementelor esenţiale care-ţi definesc inclinaţiile, opera de artă - creaţia căreia îi dai întâietate pe drumul spre atingerea excelenţei, apare drept prezenţă indispensabilă, inedită şi incitantă. Apare drept entitate – concept abstract ce nu poate fi întâlnit oricând şi oriunde, drept combustibil de bază al dezvoltării ce nu poate fi realizat oricum şi de către oricine.

Un asemenea orizont se prezintă ca un podiș relativ rigid, ca un brand inovator, generator de influenţe, ca un competitor reprezentativ în peisajul artiştilor de azi şi de mâine. Leadershipul celui care creează noi standarde de performanţă în lupta cu "materia primă a progresului" (valorificarea deplină a potenţialului uman de afirmare), va constitui prilej de admiraţie şi de mândrie pentru cine îl va contempla.

Leadership: Poţi să-ţi aduci creaţia la nivel de maximizare a valorii personale făcând apel la o imagine care spune tot despre o cunoaştere căreia puţini îi percep secretele?

Tot ceea ce creezi este transferat spre două borne de racord cu un circuit exterior determinat de un "operator de impedanţă" – capabil să ofere, nediferenţiat, impulsuri negative sau pozitive.

A face un lucru cu artă, înseamnă a-l executa şi definitiva cu sprijinul unui ansamblu de "forţe concurente" unanim acceptate şi recunoscute. Îţi va fi greu să întrevezi, din perspectiva propriei tale înţelegeri şi cunoaşteri, un drum de calitate pe care să păşeşti, dacă nu vei avea lângă ţine doi "dipoli", două instanţe de judecată, doi evaluatori - **un critic** şi **un anti-critic**, amândoi dispunând de un imens potenţial de cooperare şi de maximizare a valorii tale.

Apoi trebuie să faci din tine însuţi un bun evaluator. Pune în balanţă feedback-ul primit din partea amândurora, şi vezi care cântăreşte mai mult după pronunţarea verdictului lor - condiţia sine qua non a dezvoltării tale durabile, şi a unei promovări eficiente a potenţialului de creaţie. O cunoaştere căreia puţini îi pot percepe secretele este rezultatul unui parcurs artistic care îşi schimbă tematica în funcţie de evenimentele şi lucrurile pe care le evoci cu admiraţie, prin intermediul cărora se reconstituie imaginea unei spiritualităţi înalte desprinse din servitutea materiei.

Nivelul tău de excelenţă este dat de feedback-ul care are pondere mai mare în predicţia performanţei tale. Orice argument în sprijinul creaţiei tale – leadershipul - poate fi justificat atâta timp cât există repere precise cu privire la un interes public real. Raportul de evaluare trebuie să releve încadrarea leadershipului tău în parametrii optimi de dezvoltare.

Nivelul de maximizare al valorii personale se poate determina prin intermediul imaginii care te reprezintă într-o stare de creaţie continuă văzută din perspectiva unei intervenţii divine în concretul lucrurilor şi fenomenelor pământeşti.

Orice operă de artă poartă urme ale creatorului ei sunt cele două şiruri de borne ce-ţi călăuzesc calea în scopul obţinerii unui rezultat bun în cursa către atingerea excelenţei, împiedicându-te să aluneci spre extreme.

"Creaţia" căreia îi dai viaţă este rodul unei ştiinţe imposibile? Este ea străbătută de permanente ricoşeuri într-un imens real care se împarte în contrarii? Se întoarce ea împotriva ta?

Examinează-ţi "creaţia" prin prisma acelor două instanţe de judecată capabile să îţi evalueze corect nivelul de excelenţă.

Orizontul unei minţi înaintate

On Februarie 09, 2016

Fii cheia căutărilor tale, manifestându-ţi tendinţa de a face analogii între adevărurile experienței și adevărurile revelate prin navigarea într-o varietate de descoperiri de sine.

Manifestam o încredere nemărginită în ceva care îmi transmitea o altă perspectivă a lucrurilor. Impulsul de a-mi reînnoi gândirea se putea extinde doar prin dezvoltarea capacităţii de cunoaştere a unui orizont de referinţe nelimitat, cuprinzând lumea văzută prin ochii unui artist care refuză să se supună orbeşte prejudecăţilor convenţionale, în încercarea de a intra în conexiune cu Energia Creatoare.

Aici se întrepătrundeau cele mai influente repere ale conceptului "Next Level" extrem de bogat in argumente de ordin artistic, prin faptul că în orice încercam să fac mă confruntam cu mai multe imagini care ilustrau o lume plină de conţinut personalizat, o deschidere spre explorarea şi mai profundă a limbajului sufletului, minţii, spiritului uman. Iar orizontul, ascuns de lume, îl deschideam întâmplător ca pe-o fereastră care nu există şi nici nu are aprobare de construcţie, dar care are specificată un singur cod de activare: "Think Back". Ce diferit şi minunat arăta totul !

Celebrul scriitor italian, Umberto Eco, părea să împărtăşească aceeaşi dorinţă de aflare a adâncimii lucrurilor atunci când spunea că: *"Marea Ştiinţă, rămânând ascunsă celor mulţi, îşi păstrează astfel prestigiul şi forţa".*

Experienţa vieţii pe care a trăit-o scriitorul printr-o descoperire de sine superioară, în situaţii noi şi complexe, încât putem trage concluzia că este rezultatul acumulării unor solide cunoştinţe în diverse domenii, îşi găseşte corespondent în cercetarea tot mai amănunţită a trecutului care ascunde încă multe fragmente sau faţete ce aşteaptă să fie descoperite şi valorificate.

La fel şi eu, considerând că nu poate exista o artă fără fapte, o cunoaştere fără progres, sau o credinţă fără Dumnezeu, mi-am dat acceptul în faţa rigorii exclusivismului de a încărca cu semnificaţie orice lucru, oricât de banal ar fi acesta, sau de a pune cap la cap o teorie despre cultură şi interpretare pornind de la câteva lucruri mărunte.

Leadership: Eşti în măsură să dai o notă de certitudine evenimentelor trăite la un moment dat și la o anume intensitate, cu cât înţelegerea ta referitoare la Cine Eşti cu Adevărat este mai extinsă?

Am obţinut codul de activare al înţelegerii lucrurilor prin intermediul unei întâmplări din viaţa lui Alexandru Macedon. El a primit în dar nişte vase minunate din sticlă, despre care se spunea că au înfruntat marile evenimente ale timpului. Darul i-a plăcut enorm de mult, mai ales pentru istoria ce o ascundeau ele. Cu toate acestea a spart vasele. De ce? Tocmai de aceea, a răspuns el, fiindcă mi-ar părea rău să le pierd. Cu timpul ele tot s-ar sparge, unul câte unul, şi eu aş fi şi mai trist decât acum.

Orizontul întregii cunoaşteri de care era legată întreaga mea viaţă s-a născut parcă din dorinţa de a nu fi în trend cu nimic în afară de răsucirile mele de perspectivă, prin dinamismul cu care construiam sensuri nelimitate, pe care altul nu le-ar pricepe, dar le-ar potrivi ca surdul care nu aude. Obţineam totuşi un rezultat, scontat numai de raţiunile care experimentau sentimentul unei istorii ce se poate ghici chiar şi atunci când ea se pierde.

Înţelegerea referitoare la cine eram cu adevărat părea tot mai extinsă în măsura în care lucrurile, înfruntând marile evenimente ale timpului, puteau fi considerate miracole ale existenţei. Trebuia să furnizez puţină radioactivitate creierului meu care putea da oricând noi valenţe zonei numită Artă, greu accesibilă pentru mulţi oameni simpli. Arta de a vedea lucrurile prin lentila timpului, a evoluţiei, a învăţămintelor pe care trebuie să le tragem din exemplele existenţiale ale marilor conducători şi artişti ai lumii.

Confesiv cum sunt, spun acum totul până la capăt. Prefer să testez anumite subiecte abordate printr-o oarecare doză de confuzie, iar rezultatul se vede pe ecranul unei altfel de realităţi.

Leadership: Poți să stabileşti noi direcţii prioritare de gândire în contextul unui „Think Back" care face trecerea spre un „Next Level"?

Stabilirea paşilor de dezvoltare a nivelului de leadership, prin intermediul diferitelor trepte de descoperire a unor noi orizonturi de înţelegere a lucrurilor, constă din căutarea răspunsurilor la concluzia că tu ești cheia căutărilor tale de iluminare. Totul devine un soi de demonstrație a posibilităților de definire a unor direcţii prioritare de gândire în contextul unui „Think Back". Străluceşti prin ceea ce înveţi singur de la tine.

Think Back este modul de a ajunge la tine printr-o înţelegere superioară a lucrurilor pe care le incluzi în viaţa ta sub pretextul nevoii de a aparţine unui timp care s-a scurs. Poți să dai noi valenţe unei zone greu accesibile pentru mulţi (arta de a gândi prin sine) numai dacă reușești să extragi din tine însuți acele învăţăminte, informații și puncte de vedere, referitoare la ceea ce ai făcut și ai fost în relație cu lumea. După care să le prelucrezi în vederea construirii unui statut aparte: acela de om care nu rămâne captiv într-un fragment ce se tot repetă.

„Next Level" este debutul tău într-un rol dintr-o producție de lung metraj ale cărei dimensiuni depind de nevoia de a-ţi proiecta un nou tip de rost în lume. Dar, în acelaşi timp, el depinde de un nou concept de fiinţă ce se manifestă prin tendinţa de a face noi analogii între adevărurile experienței și adevărurile revelate prin navigarea într-o varietate de descoperiri de sine.

Orizontul este o imagine a ceea ce nu coboară niciodată din fiinţa mea adevărată în existenţa de zi cu zi, ci se colorează în facerea unei călătorii spre infinit, scormonind prin haosul deplasărilor cugetătoare în căutarea unei licăriri de însemnătate. Şi, negăsind-o, apelez la diverse analogii cu situaţii dintr-o lume paralelă, cu lucrările altor autori, cu istoria demult uitată.

Liniile orizontului meu nu trebuiesc alterate de niciun obstacol, spre a cărui posesie tind cu o râvnă imposibil de stăvilit, care totuşi mă face să mă întreb: "You will be a giver or a taker?" Trebuie să am grijă cu ce umplu acest orizont, încât ceilalţi să nu se piardă definitiv în el.

Leadershipul poate avea un conţinut personalizat de perspective şi abordări diferite ale timpului pe care îl umpli cu lucrurile capabile să confere vieţii tale un sens de apartenenţă la o ştiinţă care "se trăieşte" pentru a fi înţeleasă cu adevărat.

Orizontul unei minţi înaintate se deschide odată cu transformarea omului într-o altă etapă de a exista, prin însăşi sevele de inspiraţie pe care le oferă analogia dintre experienţa sa şi istoria pe care o poartă în spate.

Orizontul unei priviri care îşi păstrează expresivitatea

On Mai 22, 2020

Că-i întrecu nu numai pe toţi, dar şi pe sine..

Să înţelegi o părticică din ceea ce înseamnă complexitatea unei opere remarcabile, prin ochii unui scriitor a cărui viziune conturează o întreagă lume simbolică, şi să devii iluminat în această lume, iată care este adevărata măsură a unei priviri aruncată febril în vârtejul artei. Eu am înţeles totul, fiindcă sunt un iluminat, un creator de imagini suprarealiste, deprins cu privirea unui ochi care observă totul din înaltul unei viziuni integratoare în domeniul artelor frumoase, *un frammento del sogno di un momento senza pari,* unde nimic nu e la fel ca în varianta anterioară.

Iată care este priveliştea unui scriitor special, proiectul inedit al unui iluminat, în măreţia unei lumi plină de cuvinte pricepute, sugestive, însufleţitoare, ce bat în inima unei cărţi de artă: începe cu o frunză atât de caldă la privire, atât de graţioasă într-un instantaneu al observaţiilor întâmplătoare, intrată sub incidenţa artei şi a ştiinţei, încât se confundă cu explozia de culori pe care o oferă şevaletul unei eternităţi firave capabilă să dea impresia unui plan „intangibil” al Esenţei Universale.

O privelişte dincolo de orice imaginaţie. Începe cu o frunză rămasă de cu toamnă, şi se continuă cu petala unui trandafir drag, fermecător, liniştit, care prinde viaţă într-o poveste fără timp, atât de apropiată de povestirile Seherezadei, pline de învăţături, lăsându-te învăluit de miresme absolut încântătoare, desprinse parcă dintr-o mie şi una de nopţi.

Şi frunza, atât de plăcută vederii, şi petala de trandafir, atât de îndrăgostită de soare, fac parte din atmosfera recreată a unei lumi pe care imaginația și sensibilitatea scriitorului le modelează continuu în planul profund al practicării unei arte memorabile: *Elassfenthil* , sau manifestarea sufletului afectiv în concretul unei realităţi universale.

Leadership: Poţi să stimulezi dezvoltarea unei creaţii spirituale aflate „deasupra învălmăşelii”, acolo unde nu există o imagine foarte clară despre tine, în încercarea de a trece dincolo de frontierele acceptate ale artei?

Dar nu întotdeauna a fost aşa. Multă vreme n-am ştiut să văd, nu mă pricepeam, nu puteam să extrag din esenţa unei priviri aruncată "de colo-colo" mesajul sublim al unei opere de artă: fond, cuprins, semnificație. N-am ştiut dintotdeauna să scriu, n-am ştiut să leg nici cea mai simplă conversaţie cu îngerii, cu vântul, cu florile, cu tot ceea ce îmi rezerva farmecul naturii, şi poate de aceea ochii mei erau atât de întristaţi, obosiţi, descurajaţi, exact ca la vederea unei fotografii căreia simți că îi lipsește ceva special: viaţa.

Frunzele erau doar nişte buline colorate pe care le călcam în picioare la propriu, doar ca să le umplu cu noroi, sau ca să le adun laolaltă cu grebla înainte de a le da foc, pentru a respira fumul plăcut al focului de toamnă. Iar trandafirii miroseau frumos, şi atât. Probabil, şi eu, eram la fel de neînsemnat după cum le vedeam pe ele.

Nu le-am ascultat niciodată vocea, nu le-am văzut adevăratul chip spiritual, pentru că privirii mele îi lipsea profunzimea atât de necesară dezvoltării sensibilităţii emoţionale, cromatice, literare, menită să se manifeste între tentaţiile altei lumi, acolo unde ochii sufletului pot urmări o mică parte din planul altei realităţi. Compromisul pe care îl suportam zilnic, haosul primordial dintr-o rămăşită de respect adus sentimentului de comuniune cu natura, era procesarea unei informaţii serbede, fără semnificaţie aparte, dispusă într-un background care

nu spunea nimic, care nu punea în evidenţă plasticitatea memorabilă a unei lumii vii, neimprovizate. Eram nesimţitor şi nevăzător, la un loc.

Presupun că ochii care nu văd elementul afectiv în totul din jur, sunt aceiaşi ochi care nu percep diferenţa dintre luciditate şi expresivitate.

Leadership: Cum reacţionează mintea şi sufletul tău la vederea unei creaţii strălucite însoţită de o imagine căreia trebuie să-i descoperi mesajul, să-i desluşeşti povestea în marea transfiguraţie a artei?

Nimic din frunza mea nu trădează vreo emoţie, cu toate acestea ea există ca taină a tuturor lucrurilor. Lângă ea, trandafirul roşu nu poate să clădească opera ideală a zeului creator, de aici cauze de fericire sau nefericire, de armonie sau de discordanţă intimă între privitor şi obiectul privirii. Cu toate acestea, înfăţişarea trandafirului provoacă la reprezentarea unui fenomen considerat plăcut, numit *painting in the words* , prin mijlocirea unor mişcări fine de artist care în mintea lui sunt pietre preţioase, ape curgătoare, sau vârtejuri de vânt.

Mărturisesc. Singura mea punte de legătură cu arta, cu reprezentările naturii prin imagini, picturi, povestiri, vise şi emoţii, înainte de a învăţa despre această lume ca despre o viaţă trăită în altă viaţă, în alt spaţiu şi alt timp, a fost romanul "Egipteanul", scris de Mika Waltari. Dacă nu ar fi fost această carte, întemeiată şi ea din voia naturii, cu acceptul spiritelor superioare care îşi câştigă mereu o altă viaţă, alte vieţi noi, alte corpuri, alte misiuni, mijlocind înţelegerea dintre lumi, probabil nici voi nu aţi fi ajuns să mă citiţi pe mine.

Nici frunzele, nici trandafirii, nici vântul nu m-au condus la paginile ei, ci numai acel mister al naturii care stă ascuns în sufletele sfinţilor, prevestind destăinuiri grozave şi care face ca un om de rând, neieşind cu nimic în evidenţă, să se transforme aproape imperceptibil într-un *En Soph* legendar investit cu puterea de a scrie în glasul universal. Nu eu am ajuns la această carte, natura mi-a dăruit-o ca inspiraţie atunci când inima timpului potrivit a bătut pentru mine, iar eu am bătut imposibilul.

Transfiguraţia este, conform dicţionarului, un procedeu specific procesului de creație cu ajutorul căruia elementele realității exterioare, filtrate de viziunea imaginației și de puterea de expresie a artistului, se transformă într-o realitate nouă. În acest caz, eu m-am ridicat la nivelul unui creator care poate da viaţă unei alterităţi aflată într-o condiţie literară.

Leadership: Estetica creaţiei tale îşi lărgeşte orizontul dincolo de lumea artei, către sfera unei vieţi desprinsă parcă din reversibilitatea imaginară a tuturor istoriilor lumii?

Iar acest glas universal care m-a învăţat limbajul naturii, să preţuiesc o frunză la fel de mult ca pe un trandafir, să înalţ vântul ca pe un zmeu de hârtie, să transform orice lucru din jur în ceva mai mult decât este, într-un context spiritual, superior şi nefalsificat, mi-a adus şi acum în cale, spre reconsolidarea unei memorii afective, cuvintele preţioase din inima unei cărţi, pe care cândva, dacă nu chiar astăzi, o va deschide cineva:

"Toate aceste cărţi le-am scris eu, Sinuhe, egipteanul, doar pentru mine. Nu pentru zei, nu pentru alţi oameni, nici ca numele meu să se păstreze pentru eternitate. Le-am scris doar pentru biata mea inimă încărcată de amar şi tristeţe.

Păstrez cu grijă aceste cărţi, iar înţeleapta Muti a cusut pentru fiecare carte câte o învelitoare trainică din fibre de palmier. Toate cărţile acestea vor fi puse într-o lădiţă de argint, lădiţa de argint va fi pusă într-o ladă de lemn tare, lada de lemn tare într-o ladă de aramă, aşa cum odinioară cărţile zeului Thot au fost ferecate pentru a se păstra şi au fost

aruncate în Nil.

Nu ştiu dacă Muti va reuşi să pună cărţile în mormântul meu fără să o vadă gardienii, dar nu mă frământă acest lucru. Fiindcă eu, Sinuhe, sunt doar un om, am trăit în fiecare om care a trăit mai înainte de mine şi voi trăi în fiecare om care va trăi după mine.”

Aşadar, între mine şi micuţa frunză, la fel ca între mine şi petala de trandafir, la fel ca între mine şi vântul deşertic, s-a interpus o carte plină de învăţăminte, scrisă cu stiloul, cu magie şi cu deschidere, cu aceeaşi sensibilitate cu care frunza, luată de vânt, s-a transformat într-o petală de trandafir care, la rândul ei, a făcut să se aprindă scânteia de inspiraţie în emanația unui personaj (auto)situat în diferite faze evolutive.

Puritatea unei creaţii vaste poate fi dobândită numai de subiectivitatea artistului, sensibil şi empatic, care ştie să privească dincolo de istoria artei, dincolo de spaţiul unui singur trup, pentru a deschide porţile unei lumi de poveste care nu se sfârşeşte niciodată.

Orizontul unei priviri care îşi păstrează expresivitatea are deschidere spre lectura unei creaţii autentice, amintite uneori de destinul unei duble personalităţi: una care se manifestă prin intermediul cuvântului scris şi una care se manifestă prin intermediul unui spirit veşnic.

Eu, Neculai Fântânaru, îmbrăţişez destinul spiritual al lui Sinuhe, chipul unirii sufletului cu trupul înviat al unuia care a putut viziona după bunul plac toate istoriile lumilor, potrivit scenariului scris de o mână de artist care vede, simte, adâncindu-se iar şi iar sub mantia arămie a naturii predispusă să capete conturul unei poveşti cu interpretare metaforică.

Vă rog, rămâneţi lângă mine în nemărginirea timpului...

Orizontul unei viziuni înaripate

On Noiembrie 12, 2009

Lărgeşte limitele propriului orizont, contribuind la reconstrucţia mentalităţii şi valorilor celor din jur.

La 26 iunie 1963, preşedintele american John Fitzgerald Kennedy a fost în vizită la Berlin. Aproximativ 120.000 de berlinezi s-au adunat în faţa Primăriei din Schöneberg, pentru a asculta discursul preşedintelui. Ei s-au adunat în piaţă înainte ca el să sosească, şi când în cele din urmă a ajuns pe podium, l-au ovaţionat şi aplaudat timp de câteva minute.

Kennedy şi-a început discursul spunând: "Libertatea are multe dificultăţi şi democraţia nu este perfectă. Dar noi nu a trebuit niciodată să ridicăm un zid pentru a baricada poporul înăuntru." Într-un discurs plin de zel, preşedintele a spus că Berlinul de Vest a fost un simbol al libertăţii într-o lume ameninţată de Războiul Rece. În final a rostit următoarele cuvinte, ajunse celebre: "Toţi oamenii liberi, oriunde s-ar afla, sunt cetăţeni ai Berlinului, şi de aceea, ca un om liber, mă mândresc cu cuvintele: "Sunt un Berlinez".

Kennedy a fost omul care a făcut ziua de 26 iunie de neuitat. Discursul său a fost punctat pretutindeni cu uralele de aprobare. Exprimându-şi susţinerea faţă de locuitorii enclavei occidentale în Germania de Est, el a reuşit să le modeleze conştiinţa şi să genereze acele valori care să-i ajute să-şi menţină motivaţiile. Practic Kennedy a transmis un mesaj nou, un îndemn spre condiţionare, spre libertate – deci spre evoluţia spirituală autentică, proprie fiecărui om în parte.

Leadership: Îţi dai silinţa să creezi un climat propice cultivării viziunii tale, apelând retoric la autoritatea acelei virtuţi a omeniei manifestată sub forma unei relaţii deterministe între "copleşitor" şi "de neuitat" ?

Oamenii te acceptă şi te urmează numai dacă filozofia ta este similară cu a lor. Va fi greu să influenţezi pe cei ale căror convingeri şi valori diferă prea mult de ale tale. De aceea devine atât de important să le direcţionezi oamenilor convingerile privind necesitatea schimbării mentalităţii care să funcţioneze ca un "purificator" de energii pozitive – deci care să le limpezească gândurile şi să le împlinească speranţele. Pentru asta trebuie să-ţi foloseşti în mod pozitiv puterea de convingere.

Aşa cum la aparatele foto digitale, imaginile deja înregistrate pot fi editate, tot aşa la oameni mentalitatea şi emoţiile pe care se îşi sprijină existenţa şi demersurile - pot fi uşor "editate" dacă reuşeşti să le induci anumite emoţii, dacă reuşeşti să le demonstrezi, oferindu-le argumente potrivite, că eşti "unul de-al lor", că eşti făcut din aceeaşi aluat – că ai aceleaşi afinităţi, valori şi obiective morale. Adresându-te spiritului oamenilor, vei înfrumuseţa gândirea lor, îi vei ajuta să-şi recâştige credinţa în potenţialul lor de a se reface, de a se vindeca de orice răni cauzate de trecut.

1. Tu îţi dai silinţa să creezi un climat propice cultivării viziunii tale? (adică un climat călduros şi pozitiv, plin de încredere, ce are la bază valorile fundamentale pe care se sprijină leadershipul tău?)

2. Este momentul să te apleci mai atent asupra felului în care îi poţi modela pe oameni? Acest lucru presupune să utilizezi acele calităţi care transmit energie şi un suflu nou de speranţă care să contribuie la înnoirea, la schimbarea mentalităţii oamenilor. Aceste calităţi îţi pot asigura excelenţa, iar ele nu pot fi materializate fără pasiune, cunoaştere, curaj, şi

stăpânirea artei de a lucra cu oamenii.

3. Cum îţi foloseşti calităţile pentru a oferi un nou orizont oamenilor?

Această întrebare trebuie să scoată în evidenţă procesul de autoobservare, prin care îţi analizezi convingerile şi trăsăturile pe care le reliefează aceste convingeri.

Leadership: Îţi clădeşti influenţa pe un ideal care stârneşte dorinţa oamenilor de a urma o chemare mai înaltă, dar care depăşeşte alegerile lor în ceea ce priveşte capacitatea lor de a se identifica cu un ideal?

Rolul unui lider se aseamănă foarte mult cu cel al gazdei. O gazdă trebuie să fie amabilă cu toţi musafirii care îi trec pragul casei. Ea trebuie să inspire un sentiment liniştitor, să fie capabilă să vadă în fiecare om ceva bun, să perceapă esenţa fiecărui musafir şi să nu facă niciodată comparaţii; să intervină în dialogul dintre doi interlocutori dacă este nevoie, şi uneori să concilieze punctele de vedere divergente.

Liderul, în mod asemănător, trebuie să fie capabil să perceapă potenţialul celor care îl înconjoară, altfel nu va reuşi să inducă acele emoţii constructive, pozitive, cu ajutorul cărora să le influenţeze atitudinea, să le controleze modul de gândire şi acţiunile. Liderul îşi clădeşte influenţa pe un singur ideal: emoţie, emoţie, emoţie cu orice preţ. Oamenii trebuie să vadă cât de mult îi iubeşti, înainte de a-ţi accepta punctele de vedere şi deciziile. Emoţiile reprezintă acea rază de lumină pe care trebuie s-o întrezăreşti, este un drum spre interiorul oricărei fiinţe.

Încotro se îndreaptă leadershipul tău?

Înainte de a parcurge restul secţiunilor acestui seminar al cărui scop este prezentarea şi înţelegerea modificărilor pe care le aduce leadershipul, mă văd nevoit să-ţi pun următoarea întrebare: "Încotro vrei să se îndrepte leadershipul tău?"

Dacă îţi este greu să întrezăreşti drumul pe care-l va urma evoluţia leadershipului tău, înseamnă că încă nu ţi-ai creat şi structurat un sistem de sprijinire a tuturor oamenilor aflaţi în preajma ta, înseamnă că îţi lipseşte fermitatea în luarea acelor decizii care le influenţează acestora evoluţia lor ulterioară, înseamnă că nu ţi-ai dat seama de importanţa cooperării şi a sprijinului reciproc. De aceea ţin să menţionez că, pentru a putea să-ţi creşti nivelul de influenţă trebuie să discerni şi să-ţi personalizezi drumul spre tine însuţi. Totul începe de la tine, asta e ceea ce Kennedy a reuşit să evidenţieze prin prezenţa sa şi prin discursul său atât de surprinzător de echilibrat şi emoţionant.

Leadership: Cea mai dificilă decizie pe care a o poţi lua este de a urma evoluţia unei viziuni care ține permanent pasul cu realitățile actuale, dar care nu justifică ambiţia sinelui tău de a se abandona în braţele unui vis?

Liderul trebuie să se perceapă şi să îşi judece în mod obiectiv propriile convingeri înainte de a le cere celorlalţi să-l urmeze şi să-l sprijine. În orice lider înzestrat cu iscusinţa de a înţelege motivaţiile ascunse ale celorlalţi oameni există acea imensă sete de căutare continuă a propriilor rădăcini, a propriilor valori – căci numai măsurarea lor corectă, preţuirea şi respectarea lor - îi inspiră activităţile şi deciziile. De fapt, trebuie să existe în el o dorinţă imensă de auto-descoperire pentru ca nu cumva să ignore marile adevăruri ale artei de a conduce.

Trei piloni de bază: valori, integritate, atitudine

Pentru a verifica valabilitatea leadershipului tău, priveşte-ţi obiectiv părţile bune şi cele slabe. Părţile bune indică direcţia spre care trebuie să te îndrepţi atunci când te eliberezi de orice conformism care îţi afectează semnificativ moralul, împiedicându-te să vezi dincolo de ceea ce eşti tu, şi de ceea ce poţi fi. Părţile rele, evidenţiază aprecierea negativă pe care ţi-o dau oamenii, ele sunt în strânsă legătură cu imposibilitatea de a surprinde esenţa leadershipului, care se sprijină pe trei piloni de bază: valori, integritate, atitudine. Ca să faci saltul către excelenţă, ajută-i pe oameni să-şi depăşească slăbiciunile, să depăşească toate barierele impuse de o gândire nesănătoasă şi fă în aşa fel încât să-i apropii de atingerea potenţialului lor.

Ţi-ai creat şi structurat un sistem de sprijinire a tuturor aflaţi în preajma ta? Îţi judeci în mod obiectiv propriile convingeri înainte de a le cere celorlalţi să te urmeze?

Aşa cum un alpinist trebuie să fie în stare să privească un pisc de munte şi să vadă cum să facă să-l cucerească, tot aşa şi tu, ca să-ţi dezvolţi leadershipul conform aşteptărilor tale, trebuie mai întâi să înviorezi spiritul oamenilor, adică să cauţi să deschizi în faţa lor un orizont nou, mult mai larg, care să-i ajute să depăşească momentele grele prin care au trecut, să le dea putere şi tărie să meargă mai departe.

Leadership: Transparenţa ta în furnizarea unei viziuni însufleţitoare s-ar putea dovedi factorul decisiv în ceea ce priveşte transformarea intenţiei lor de a colabora cu tine în realitate?

E ceasul marii confuzii? Goana după glorie, fără a-ţi exprima leadershipul într-un mod inedit - apelând cât mai mult la emoţii, este ca şi cum ai scoate soarele din sistemul solar. Practic întregul tău leadership s-ar transforma într-un mare vid, într-un mare "neînţeles". Acesta este ceasul unor mari confuzii, este poate drama leadershipului, sau poate chiar începutul unui "sfârşit". Îţi orientezi leadershipul înspre întuneric – punând dorinţa de glorie mai presus de orice, sau înspre lumină – folosindu-te de emoţii pentru a-i servi pe oameni şi pentru a le însufleţi existenţa? Eşti sau nu eşti pe drumul cel bun spre excelenţă?

Prin urmare, pentru a anula apariţia oricărui eşec în materie de leadership, evaluează-ţi progresul în mod constant. Elimină orice confuzie legată de limitele peste care nu poţi trece.

Cum îţi percepi propria fiinţă?

Prin puterea cuvintelor bine alese poţi influenţa gândirea şi mentalitatea celora din jurul tău. Cuvintele însă exprimă şi nivelul tău propriu, al mentalităţii, educaţiei şi valorilor pe care le promovezi. Dar, în acelaşi timp, cuvintele îţi scot în evidenţă orizontul pe care se aşează idealurile tale, pe care se profilează valorile tale.

Orizontul pe care îl proiectezi, pe care îl exprimi şi îl împărtăşeşti celorlalţi oameni constituie unul dintre pilonii pe care se sprijină întreaga construcţie a psihicului tău, deschizându-ţi sau, dimpotrivă, închizându-ţi poarta spre standardul înalt de excelenţă la care orice lider doreşte să acceadă. Orizontul este influenţat de micul tău colţ de lume, unde te compari cu tine însuţi şi în funcţie de percepţia ta asupra propriei tale fiinţe, îl împărtăşeşti celorlalţi. Prin urmare, înainte de a produce schimbarea celorlalţi, pune-ţi întrebările:

În funcţie de ce calităţi îţi creionezi orizontul? Cum îţi percepi tu propria fiinţă?

Leadershipul se referă la imboldul uman de a pune deoparte un ideal mai mic, pentru a

urmări un alt ideal, cu o importanță mai mare, dar mai greu de realizat.

Orizontul unei viziuni înaripate este stabilt de acel om care îşi evaluează progresul în mod constant şi care reuşeşte să elimine orice confuzie legată de propriile sale limite. Un asemenea om îşi priveşte obiectiv părţile bune şi cele slabe, şi decide să se concentreze asupra abilităţii de a schimba realitatea celorlalţi.

Orizonturile de neatins ale căutării din noi

On Aprilie 19, 2015

Extinde-ţi cunoaşterea prin explorarea directă a realităţii subiective, după cum dictează schimbările reflectate în planul artei.

Aveam disperată nevoie de a fi altcineva, sub bagheta experimentală a ideii cunoaşterii absolute, încercând să-mi dau seama, la fel cum în artă se pot prezenta lucrurile în desăvârşirea construcţiei lor, ce anume poate fi înţeles şi ce nu poate fi. Ceva caracteristic sensibilităţii metafizice a artistului genial care, sugestionat de obiectele de artă, îndeamnă lumea la a căuta emoţiile estetice.

Nevoia de a fi căutător. Un demiurg izolat creând capodopere printr-un act de cultură si simţire. Un autor dotat, cu scrieri pline de duble înţelesuri, purtând în el acea vibraţie de tip determinist, crescând pe măsura apropierii sale de o deplinătate nemărturisită, până în cea mai adâncă esenţă a ceea ce poate fi gândit şi creat, explicat doar prin efectul artei asupra trăirilor cele mai intense care duc la săvârşirea voii sale.

Greu de acceptat. Era o întoarcere în mine însumi ori de câte ori mă avântam pe câmpurile de bătălie ale neajunsului, închipuind şi folosind totul, cele de dinainte şi cele de după iniţierea mea în arta efectelor contrastante, în construirea neştiutului. Care, după regulile unei metode ştiinţifice, cu formularea unor inferenţe cauzale, în contextul unei intenţionate aplecări către abstract şi idealism, puteau face lumină în adâncul mister al lumii. În spectacolul imaginării individuale.

Dacă vrei să afli mai multe despre o lume supusă rigorilor artei trebuie să găseşti cea mai adecvată expresie simbolică a nemărginirii unui parcurs de viaţă care porneşte din descrierea obiectului real şi se desăvârşeşte în constituirea obiectului literar.

Creativ, răsuceam fiecare umbră şi fiecare lumină într-o spirală care cobora spre neînţeles. Urcând apoi deasupra frumosului care se adresa raţiunii. Curios de a şti tot ce poate fi cuprins de simţuri, de percepţii, de materie şi suflet, în prelungirea lor experimentală. Practic, intram într-un soi de mentalitate de tip: „ *Parcurge întregul contur al creaţiei în sens invers* ". Fapt care mă făcea să mă simt altcineva, dând noţiunea obiectivă a eului real distinct în proiecţia unei realităţi idealizate.

Într-un fel, cred că mă confundam cu esteticianul acela grec care sublinia caracterul relativ al poziţiei diverselor categorii estetice în cadrul propriului lor sistem. Închipuitul devenea neînchipuit. Şi invers. De unde posibilitatea fiecăruia dintre ele de a se impune mai mult, în continuitate una faţă de alta, prin explorarea directă a realităţii subiective, după cum dictau schimbările reflectate în planul artei. Conform a ceea ce ştiam şi a ceea ce nu ştiam despre mine însumi.

Leadership: Poţi să creezi ceva într-o accepţiune diferită a artei, generând efectul de ecou al unui act de simţire care doar împreună cu atingerea unei ţinte particulare realizează întregul unei interpretări simbolice inegalabile?

Pentru a stabili caracterul şi importanţa unei creaţii trebuie, mai întâi, să-i definim punctul de pornire, sensul, structura, sursa în care se produce scânteia de raţiune, cu alte coordonate de analiză. Şi să vedem ce reliefează. Dar cel mai important este felul cum se combină, în ultimă instanţă cu starea de spirit a artistului, cu propriile sale sentimente, înlăturând posibilele confuzii cauzate de dezechilibrul dintre real, ideal şi ficţional.

Atingerea unei ţinte particulare de recepţionare a diferitelor sensuri ale artei se măsoară în cursul încercării de a reda cât mai complet cu putinţă, într-o imagine frontală, tot ceea ce se ştii despre un obiect care atrage atenţia prin simplitatea sa dezarmantă. Actul de simţire decurge din completarea obiectului cu o anumită nuanţă emoţională, numită poate "sacralitate”, sau cu o anumită valoare (bună sau rea), sau atribuindu-i o prestaţie de vis prin amestecul unic de performanţă, eleganţă, inovaţie şi eficienţă.

Căutările mele în zona artei au ca simbol de identificare specificaţia I.M, adică imagine a unui spaţiu privit de sus, în vedere panoramică, a secvenţelor din desfăşurarea cronologică a unei literaturi din care obiectele sunt percepute ca rămânând constante, având aceeaşi mărime, forma şi culoare, chiar dacă imaginea lor proiectată pe retina unei memorii comune se schimbă.

Arta este limbajul lucrurilor care capătă viaţă prin felul cum sunt transpunse într-un labirint mereu schimbător de text și imagine, în care interpretarea devine o experiență de lucru cu sinele.

A crea ceva într-o accepţiune diferită a artei, generând efectul de ecou al unui act de simţire, înseamnă uneori să dai naştere efectului unei intenţii de comunicare între lucrurile care te înconjoară şi maniera de fi exprimate într-un limbaj adecvat unui discurs de manipulare.

Implicarea emoţională este acea forţă colosală ce te leagă de un anumit mod de a gândi care te lasă să fii tot ce poţi să fii. O forţă care, pe de altă parte, dă un curs acţiunii care este relevant pentru atingerea unei ţinte particulare. Ea dă startul unei ample campanii de creaţie, manifestându-se în mod vizibil în curiozitate ştiinţifică, într-o stare de inspiraţie perpetuă şi într-o cursă de căutare a punctelor de vedere care îţi avantajează aspiraţia spre ideal, spre tot ceea ce este îndrăzneţ în artă.

În leadership este important ceea ce creezi într-o accepţiune diferită a artei, a culturii, a limbajului, a stărilor de spirit, depăşind stadiul „banalului” care nu demonstrează nimic şi generând efectul de ecou. Nu degeaba Nichita Stănescu vedea în actul creației o „stare de ecou”. Ceva care are rezonanţă atât în sufletul tău, cât şi în jurul tău, dar mai ales în ceea ce consideri a fi schimbare prin puterea de pătrundere în blindajul neştiutului.

Leadershipul, conturându-se ca reacţie la ceea ce încerci să realizezi prin actul creaţiei, sub bagheta experimentală a ideii cunoaşterii absolute, are ca material de filtrare informaţiile, elementele realităţii subiective, prin viziunea imaginaţiei şi puterii de expresie, transformându-le în valori raportate la existenţă şi la lumea din jur.

Întregul unei opere de artă este un cumul de lucruri, fapte şi idei subordonate emoţiilor care prin sugestie, prin imagine şi simbol pot căpăta forme concrete de viaţă.

Orizonturile de neatins ale căutării din noi pun în evidenţă acea stare a minţii din care omul reuşeşte să perceapă fiecare emoţie şi să o accepte ca pe o forţă propulsatoare spre o evoluţie mult mai avansată, şi intrarea sa într-un soi de mentalitate de tip: „Parcurge întregul contur al creaţiei în sens invers”.

Source: https://neculaifantanaru.com/orizonturile-de-neatins-ale-cautarii-din-noi.html

Orizonturile distincte ale înţelegerii transformatoare

On Februarie 26, 2014

Asumă-ţi integral rolul de îndrumător în cadrul proiectului de cercetare numit "Myself", utilizând ecuaţia de predicţie a unui model de gândire cuprins între curiozitate şi subtilitate.

Trăiam senzaţia unei căderi pe verticală, într-o extremă a interpretărilor şi deformărilor necontenite ale realităţii personale. Incontestabil, eram pus într-o mare încurcătură, reprezentată de o neclară şi incoerentă ecuaţie de predicţie a unui model de gândire, cuprins între curiozitate şi subtilitate. Un fel de invazie intangibilă a spaţiului meu de excelenţă intelectuală produsă după o stratagemă inedită, încă neexperimentată. Era greu să-mi imaginez care era resortul punctelor de vedere rezultate, pro şi contra, ce urmau a fi asumate integral în cadrul proiectului de cercetare numit "Myself".

Asemenea unor personaje din opera lui Hauff, imune la real, care se feresc să se arate în priveliştea întregii lumi şi încep să capete semnificaţie abia atunci când pierd controlul asupra modului de gestionare a tot ceea ce este înăuntrul şi în afara spaţiului lor de origine. Mă situam cumva la limita dintre recunoaşterea modului prin care puteam să "călătoresc" spre ceea ce se află în interiorul meu şi conectarea la elementele componente ale unei realităţi inseparabile de însăşi menirea ei.

Modelul de gândire cuprins între curiozitate şi subtilitate se alimentează din formarea unui spirit critic şi autocritic cu privire la realităţile cuprinse în memoriile unei vieţi care se repetă în alte timpuri şi alte dimensiuni.

Ficţiunea este realitatea percepută printr-o comparaţie cu personajele unei lumi care se schimbă în permanenţă. Asta era ideea mea măreaţă: să apropii orizontul unei înţelegeri primare, a cărui aspecte se conturează ca fiind un declanşator de originalitate pentru metafizica unui personaj fictiv, situată dincolo de experienţă, pe tărâmul construcţiilor vizionare. Dincolo de orizontul înţelegerii raţionale a adevăratei mele naturi, inconfundabile, se proiectează călătoria spirituală în nemărginirea unei poveşti în care se poate întâmpla orice.

Categoric, era ceea ce se putea traduce prin sintagma „ *nimic nu se pierde, totul se transformă.* " O solicitare excesivă a asumării unei responsabilităţi incerte, depăşind puterea-mi de înţelegere, ca o mare de flăcări care îneca totul în fum.

Viaţa mea semăna pe alocuri cu călătoria lui Guliver în Laputa, totul se compunea dintr-o știință ruptă de realitate, viziuni mult prea îndrăzneţe, planuri prea himerice, dar unde se întrevedea lumina unui nou început de drum în fenomenologia gândirii. Fără precedent. Avea loc o topire parţială a miezului de viu, inconştientul înnăscut care trebuia unit cu conştiinţa în mai multe elemente, reunindu-le apoi într-o unitate superioară.

Leadership: Te angajezi într-o aventură de proză pur fictivă care să descâlcească înţelesul adâncit al fiinţei tale, desprins parcă dintr-o poveste care îşi păstrează neostentativ filonul de excelenţă ca subiect al unei cunoaşteri independente de orice experienţă reală sau posibilă?

Indicatorul gradului de înţelegere şi de stăpânire a felului în care te percepi este setat atunci când o operaţie de "citire" a realităţii întâlneşte începutul unui nou model de gândire.

Leadershipul nu te plasează pe un teren ferm şi bătătorit de o ştiinţă care renunţă la imaginaţie şi la îndrăzneala de a-ţi extinde orizonturile printr-o ecuaţie experimentală de descoperire unor noi interpretări a realităţii, prin reprezentări ce le substituie pe cele uzuale, chiar răsturnându-le. Ci mai degrabă îţi conferă un mare sentiment de împlinire şi te face să conştientizezi acele tipare de gândire ce te ţin pe loc, într-o poziţie de staţionare într-o intersecţie nesemnalizată. În care elementele noi de explorare a unor noi arii de evoluţie şi formare a abilitaţilor, cu ajutorul inteligenţei cognitive şi a experienţei perceptuale, nu au prioritate de trecere.

Leadershipul se sprijină o operaţie de tipul " *transformation* " la nivel de percepţie a sinelui prin raportare la un model de gândire, cuprins între curiozitate şi subtilitate. Ceea ce reprezinţi într-o lume plină de încercări se ascunde de multe ori în ficţiunea de a-ţi transforma viaţa într-o poveste, de a lăsa anumite personaje să te reprezinte, cu intenţia de a desfiinţa regulile şi convenţiile unei societăţi mult prea standardizate.

Deseori indivizii care aspiră la o extindere a spaţiului lor de excelenţă intelectuală nu întâlnesc marcajul „Cedează trecerea" şi au prioritate faţă de cei ce întâlnesc marcajul „Oprire". Mai ales atunci când încearcă să-şi dubleze consideraţiile asupra elementelor de cunoaştere care le întregesc personalitatea, imaginea, stilul de conducere, experienţa, amplificând bagajul de înţelegere a realităţii asumate. Şi conştientizarea acesteia într-un context mai larg a percepţiilor şi reprezentărilor, de natură obiectivă.

Leadershipul este imaginea unei realităţi care poate fi posibilă pe fundalul unei ficţiuni indicată să reprezinte viitorul, luând ca punct de reper un personaj care se construieşte pe parcursul naraţiunii ca o metaforă a schimbării de care este nevoie în viaţă.

Scriitorul cu cea mai largă viziune asupra tendinţelor omului de a se raporta la elemente constante ale unei realităţi viitoare, precursor al literaturii științifico-fantastice, Jules Verne, mărturisea: *"Dacă ai la dispoziţie apă şi foc poţi pregăti şi altceva decât ceea ce mănânci în mod obişnuit."*

Privită ca o metaforă, această afirmaţie reflectă disponibilitatea de a face legătura dintre nevoi şi consecinţe, producând o nouă compoziţie, un punct de referinţă pe harta percepţiilor despre tine însuţi în raport cu realitatea.

Armonia anumitor elemente de interpretare a realităţii poate avea un puternic efect de stimulare a producţiei de repere şi puncte de vedere ce ar putea contribui la schimbarea percepţiei asupra leadershipului. Profunzimea unei minţi care gândeşte liber, uneori în scheme abstracte, care a câştigat prin experienţă, prin procesul încercării de asimilare a unor informaţii şi cunoştinţe, se poate desăvârşi atunci când omul încearcă să descâlcească fondul ascuns al fiinţei sale.

Numai recurgând la o ştiinţă pur explicativă, care să-ţi definească orientările, utilizând ecuaţia de predicţie a unui model de gândire, cuprins între curiozitate şi subtilitate, numai astfel îţi vei putea asuma integral rolul de îndrumător în cadrul proiectului de cercetare numit "Myself".

Cunoaşterea care îţi dă libertatea de a-ţi personaliza viziunea are ca bază de comparaţie ficţiunea unei identităţi inalterabile în faţa percepţiei unei realităţi care se încăpăţânează să te bulverseze, sau dimpotrivă, care continuă să te plictisească.

Această cunoaştere se situează pe mai multe niveluri: o metaforă care poate fi transformată într-un chip al adevărului, o meditaţie asupra procesului de naştere a unei opere literare, şi intriga unei experienţe existenţiale ieşite din comun.

Orizonturile distincte ale înţelegerii transformatoare constituie linia de despărţire dintre partea vizibilă a sferei de gândire ataşată complet la experienţa de viaţă trecută printr-o bine calculată construcţie narativă,şi partea invizibilă a sferei de gândire încapsulată în reguli și norme riguroase, ce impun întotdeauna congruența sau compatibilitatea cu realitatea obiectivă.

Ca lider, trebuie să faci uz de acea abilitate care îţi permite adaptarea la realitatea în permanentă schimbare. Ceea ce presupune existenţa şi dezvoltarea unei personalităţi flexibile şi maleabile, ancorate într-o ficţiune care poate controla viitorul.

Myself este personajul unei poveşti de viaţă care te-a impresionat şi pe care doreşti să o împărtăşeşti printr-o experienţă unică de trăire a realităţii printr-o supra-realitate.

Orologiul leadershipului

On Decembrie 17, 2010

Caracterul promotor al leadershipului nu este altceva decât reflexia distinctă a felului în care funcţionezi în cazul depăşirii limitelor şi condiţionărilor vieţii.

Un om care s-a bucurat de o extraordinară popularitate în ultimii 20 de ani este scriitorul şi regizorul american Stephen King. El a făcut, dacă pot să mă exprim aşa, o treabă nemaipomenită, scriind peste o sută romane cu tentă fantastică şi pline de substrat, majoritatea ajungând foarte îndrăgite şi apreciate de cititorii din întreaga lume.

Dar la un moment dat, povesteşte Stephen King în introducerea romanului *"Pistolarul"* (primul volum din seria *"Turnul Întunecat"*), că a trecut printr-un moment de cumpănă al vieţii - atunci când a fost lovit de un autoturism. Numai printr-un miracol a scăpat cu viaţă. Astfel a fost nevoit să-şi întrerupă o perioadă de timp munca, ceea ce nu i-a fost pe plac.

În orice caz, în 2001 - pe când începea să se simtă mai bine, Stephen a decis să ducă la bun sfârşit aventura lui Roland (personajul principal al seriei). A pus totul deoparte şi s-a apucat să scrie ultimele trei volume. El a mărturisit cu sinceritate ceea ce simţea în adâncul sufletului: *"Am făcut asta nu atât pentru cititorii care mi-o cereau, cât pentru mine însumi."*

Leadership: Exploatezi orice situaţie în folosul propriei desăvârşiri cuprinsă între beneficiul unei viziuni partizane asupra abordării unei anumite limite şi beneficiul posesiunii unei stări de spirit?

Într-o oarecare măsură, Stephen King se vedea un erou – acel erou căruia el însuşi i-a dat naştere în multe din romanele sale, un erou pe care nimeni şi nimic nu-l poate opri din avântul său spre cele mai înalte culmi. Iar în interiorul acestui erou exista o voce, ca o şoaptă, sau ca o respiraţie apropiată, ceva viu şi plin de har, care îi inspira mereu optimismul şi încrederea, care îl susţinea cu interes şi îi atrăgea atenţia atunci când greşea sau când era pe punctul de a-şi uita pasiunea.

Dintotdeauna Stephen a avut o pasiune pentru condei şi pentru citit, avea imaginaţie, avea fineţe, avea idei, era înzestrat cu toate calităţile şi virtuţile unui scriitor adevărat. Încă din primul moment când s-a apucat de scris, în timpul şcolii, literatura a devenit o pasiune pentru el, o pasiune pe care a păstrat-o toată viaţa. Datorită scrisului, în care îşi îmbina cu multă măiestrie viziunea şi ideile creative, îşi simţea toată existenţa înnobilată. Vorbele sale neuitate: *"Am făcut asta mai ales pentru mine însumi"* , au o mare greutate. În ele se simte dorinţa scriitorului de a-şi continua munca, se simte pasiunea, forţa şi energia care îl caracterizează.

Termenul de valabilitate al perspectivei personale asupra experienţei percepute ca periculoasă şi dureroasă se înlocuiește cu data expirării detenţiei solitare din zona acelei realităţi care te îndeamnă să fugi de ceea ce porţi în suflet.

Virtutea de a întreţine ceea ce ai construit este o prelungire a termenului de viaţă la necesitatea întăririi acelei percepţii despre sine care atinge conţinutul latent al visului.

Desăvârşirea se află în tine însuţi. Aşa cum un sculptor îşi concepe statuile în piatră, cioplind în ele pe îndelete formele liniştite şi trainice, tot aşa şi Stephen King îşi concepe romanele, creând mereu noi scenarii şi noi fantezii. Şi tot aşa îţi vei putea dovedi şi tu măiestria în

domeniul care te pasionează.

Ca să ajungi în vârful ierarhiei în profesia ta, trebuie să te strădui să devii un Stephen King, trebuie să faci totul cu pasiune şi cu profesionalism, şi nu atât pentru oamenii care ţi-o cer, cât mai ales pentru tine însuţi. Dacă tu însuţi nu găseşti nicio plăcere în munca ta, şi nu vei fi plin de entuziasm, atunci degeaba vor avea oamenii mari aşteptări de la tine – sigur îi vei dezamăgi.

Leadership: Imaginea de sine pe care o oferi celorlalţi contribuie la conştientizarea sentimentelor de apartenenţă la o condiţie de viaţă prelungită care permite respectarea angajamentelor faţă de ceea ce nu poţi fugi?

Enda Larkin, director al HTC Consulting, a menţionat: *"Piatra de temelie a modului de gândire a liderului este existenţa unei dorinţe reale de a conduce şi de a fi pregătit să transpună acest angajament zi de zi. Este clădită pe pasiune, încredere în sine şi armonie deplină cu natura umană."* Frumos !

Un lider îşi depăşeşte limitele prin îmbunătăţirea prestaţiei sale. Stephen King nu ar fi ajuns niciodată în topul scriitorilor de romane science fiction şi fantasy fiction, dacă nu s-ar fi încăpăţânat să urce cu mult entuziasm treptele vieţii profesionale una după alta. El a reuşit să evolueze fiindcă a "funcţionat" mereu la capacitate maximă, chiar şi în momentele de cumpănă a vieţii. El a fost, şi încă mai este la înălţime în tot ceea ce face, fiindcă îşi impune întotdeauna mai mult.

Şi, mai ales, fiindcă are o anumită responsabilitate faţă de el însuşi, o anumită obligaţie morală (simte că trebuie să dea întotdeauna mai mult) care, nerespectată, îi va afecta cariera.

Leadershipul este sacrificiul pe care ţi-l asumi în drumul spre excelenţă, al cărui semnificaţie poate fi desluşită numai prin reconstituirea unei lumi pe cale de a se pierde sau a unui vis pe cale de a deveni realitate.

Orologiul Leadershipului marchează secundă cu secundă dezvoltarea ta profesională în timp şi, deci, marchează şi imaginea ta în lume. Însă orologiul leadershipului se va opri dacă munca ta va începe să se dizolve şi să fie ineficientă. Ceasul care indică nivelul tău de performanţă va funcţiona şi va rezista câtă vreme îţi impui cu fermitate ideile, viziunea, şi mai ales câtă vreme eşti dispus să-ţi continui cariera.

Excelenţa în leadership se obţine greu, iar dacă ai o altă părere te înşeli amarnic. Ca să ajungi în vârful topului în leadership trebuie să urci treptele profesionale obligatorii, să munceşti cu abnegaţie şi pasiune, cu tenacitate şi entuziasm, şi să-ţi iei un angajament faţă de tine însuţi de a nu renunţa, de a nu te lăsa doborât de eşecuri şi greutăţi, şi, în acelaşi timp, de a nu te entuziasma excesiv în faţa reuşitelor, care uneori pot fi efemere.

Concluzie: Prin munca pe care o depui şi prin experienţa căpătată în acest timp (inclusiv în munca cu oamenii - care îţi pot fi prieteni, sau mari duşmani), te poţi apropia de nivelul maxim al potenţialului tău.

Caracterul promotor al leadershipului nu este altceva decât reflexia distinctă a felului în care funcţionezi în cazul depăşirii limitelor şi condiţionărilor vieţii.

Oscilaţia continuă a pendulelor

On Februarie 10, 2013

Desăvârşeşte-ţi evoluţia, fără să dai cunoaşterii de sine o interpretare falsă.

Uneori mă trezeam noaptea, brusc, aproape panicat, frământat de gândul de a găsi pe cineva, sau ceva. Spaţiu. Tăcere. Nemişcare. Nu ştiam nici eu prea bine ce era acest copleşitor şi nelămurit *memento* al angajării într-un real care poate fi cucerit doar prin imaginaţie, care nu încetează a uimi. Un gând, luminând o clipă ca un fulger, fără şovăire în forma sa, stingându-se apoi într-un mod ciudat, găsind ecou viu în mintea mea tulburată de iluzia unui vis.

Iar acest gând ambivalent, însumarea exigenţelor mele în permanentă creştere, conectorul adaptat pentru a fi prins în jurul unei baterii încărcată cu stimuli neutri, îşi pregătea marea lovitură: forţarea limitelor mele până la punctul de agonie. Orice încercare de a afla sensul vieţii într-un moment de rătăcire, slăbiciune a propriei voinţe, este sortită unei deplasări în exil, într-o fierbere interioară care ar scoate din minţi pe oricine.

În mintea mea se producea o schimbare adâncă. Intram în zona gri a ambiguităţii. Moment în care parcă nu se întâmpla nimic, dar ceva sporea în intensitate. O paralizie, secondată de o intensă încordare în punctul de întâlnire cu necunoscutul. Cu cine îmi măsuram forţele?

Nu aveam nicio ţintă, nu urmăream niciun rezultat, ci mă lansam ca o săgeată din arcul prea încordat, departe de mine însumi. Eram orbit de o tainică chemare, o vibraţie a ceva sau a cuiva care îmi întuneca logica.

Nu pot să contrazic adevărul exprimat odată de un scriitor anonim: " *Unii oameni se urcă într-un tren rapid, dar nu ştiu nici ei prea bine încotro se îndreaptă. Bâjbâie de colo colo, până se trezesc; apoi o iau de la capăt, până se pierd de tot.* "

Leadership: Eşti în stare să te opui unei experienţe pariculare care te marchează prin realismul ei, unde trăirile îmbracă forme şi manifestări nebănuite ale ataşamentului tău faţă de convingerile pe care le respecţi în mod conştient?

Urcasem şi eu în acel tren rapid *al paso del momento* , fără să ştiu ce caut, fără să pot determina vreo schimbare, fără să mă pot separa de percepţiile mele asupra "vidului". Raţiunea-mi era sugrumată de un ciudat paradox: mă lăsam dominat de alte coordonate, fără să ştiu ce anume stătea la baza acestora. Se năştea în mine o contradicţie între "aria" conştiinţei mele şi diversitatea altor conştiinţe, o contradicţie între ceea ce voiam şi ceea ce puteam.

Nu mai ştiam ce este adevărat şi ce este iluzie. Convingerea superioară pe care o respectam în mod conştient era aceea că nu pot trăi simultan în două lumi diferite, a visului şi a realităţii. Asemenea lui Kant, ajunsesem să am pasiunea neobositelor căutări. Interogam continuu cauzele interne inerente care fac posibile fenomenele. Dar dacă Kant îşi depăşea continuu limitele pe care se credea îndreptăţit să le fixeze într-un moment determinat al cercetărilor sale, pe mine mă inhiba analizarea acelor gânduri îndreptate spre esenţa mea.

Prototipul unei veritabile şi indispensabile experienţe care interfera sau interacţiona cu un spaţiu privat al gândirii lucide, al auto-cunoaşterii ascunse. Găsirea răspunsurilor într-o complexitate nelimitată era sursa neliniştii mele.

Vedeam prin nişte perdele gri, o lumină difuză. Am întins mâna şi am încercat să le dau la o parte. Un soi de conştiinţă nouă s-a ancorat în mine, cu o mulţime de rotiţe şi arcuri mi-a constrâns, mi-a împins spre "înapoi" prezenta conştiinţă. Şi voia să evolueze până la limita maximă posibilă, inoculându-mi anumite valori, dar şi un sentiment enorm de vinovăţie.

Două pendule când vor reveni simultan în poziţia iniţială? Două conştiinţe, două cunoaşteri când se vor înţelege? Până când se vor bate ele în mintea mea? Până când vor exercita ele o presiune asupra propriei mele personalităţi?

Leadership: Ce interpretare poţi să dai cunoaşterii de sine anexate la o stare psihologică în a cărei reprezentare nu mai interesează detaliile factuale, evenimentele, ci plăsmuirea lor într-o ambianţă gravă?

Te urci într-un tren fără să ştii unde te îndrepţi? Te laşi orbit de o tainică chemare, de o vibraţie a ceva sau a cuiva care îţi întunecă logică? Acorzi prioritate sau exagerezi valoarea unui singur element care participă la alchimia propriei tale deveniri? Te transformi într-un împătimit căutător de certitudini şi incertitudini? Te îndepărtezi de tine însuţi?

Mare parte din evoluţia ta este rezultatul explorării unei noi cunoaşteri vitale care nu te seduce cu multă culoare, dar îţi oferă certitudinea unei "treziri" din amorţeala unei stări perpetue de aşteptare, de insatisfacții, datorate incertitudinii în a putea distinge "realul" de "imaginar".

Cunoaşterea de sine este rezultatul depăşirii propriilor limite în lupta cu "demonii", când eşti pus în faţa unor imperative presante ale realităţii care schimbă semnificaţia pe care o dai vieţii.

Personal, dau o singură interpretare cunoaşterii de sine anexate la o stare psihologică în a cărei reprezentare nu mai interesează detaliile factuale, evenimentele, ci plăsmuirea lor într-o ambianţă gravă: aceea ca trăirea ameninţătoare a sentimentului de incontrolabilitate şi de neajutorare decide adevărata capacitate a caracterului meu de a se schimba radical.

Puterea de a fi altfel vizează în mod expres capacitatea caracterului de a se modifica sub influenţa unei situaţii schimbate în mod radical de imaginea pe care raţiunea ta o creează într-o realitate mărginită.

Acesta este momentul când înţelegerea îţi scapă şi intri în zona gri a ambiguităţii – factorul de amplificare a instabilităţii de sine. Acesta este momentul, critic în dezvoltarea ta ca viitor lider, pe care eu îl numesc " *neglijarea funcţiei vital-stimulatoare* ", luciditatea critică în raport cu acceptarea.

Astfel orizonturile tale, în loc să se limpezească şi să se extindă, se apropie tot mai mult de punctul zero, de acel vid interior în care oricât ai aşterne noi sensuri, noi desluşiri, lumini, trăiri, ele nu ajung la un numitor comun, nu se pot atinge. Ajungi să te afli în ipostaza călătorului care se urcă într-un tren rapid, fără să ştie nici el prea bine încotro se îndreaptă. Bâjbâi de colo colo, până te trezeşti; apoi o iei de la capăt, până te pierzi de tot.

Totdeauna rămâne loc pentru inefabil, pentru mister, pentru o necunoscută greu de dezlegat în ecuaţia construită cu minuţiozitate: *autocunoaştere-armonizare-evoluţie* . Pentru asta trebuie să te separi de percepţiile tale asupra "vidului". Să nu-ţi laşi sugrumată raţiunea de coordonate impuse, ci să-ţi stabileşti tu însuţi alte coordonate în concordanţă cu cerinţele prezentului şi putinţei tale.

A lăsa realitatea să te învingă este mărturia unei experienţe particulare de tipul "fantastic", devenite în timp o sursă de îngrijorare pentru toţi cei care încearcă să se împace cu povara unei vieţi trăite fără griji şi fără provocări.

Oscilaţia continuă a pendulelor desemnează revolta celor două conştiinţe pe trebuie să le separi pentru ca leadershipul tău să sporească – acea cunoaştere a luminii, care te călăuzeşte neîncetat ca o stea, şi acea cunoaştere a întunericului, care îţi acaparează orizonturile, dând senzaţia că nu mai ai scăpare, că eşti cumva singur cu tine însuţi, cu neliniştile şi fricile tale.

Adoptă o viziune nouă asupra ta şi a conştiinţei tale, o viziune nouă, luminoasă, debarasându-te de emoţiile negative generate de frica de nou. Lumea, aşa cum a spus Darwin, va aparţine celor adaptabili dar şi receptivi la cerinţele prezentului şi viitorului.

Desăvârşeşte-ţi evoluţia, fără să dai cunoaşterii de sine o interpretare falsă.

Oscilaţii în necunoscut

On Februarie 27, 2013

Felul cum contribui la crearea propriei identităţi, conturează adevărata valoare a leadershipului tău.

Eram supus probei necruţătoare a confruntării cu realitatea dezlănţuită a unei lumi "ieşite din ţâţâni". Lumea mea, integrată într-un tablou de-al lui Dali cu absoluturi. Runda finală a unui joc gigantic, revizuit în culise. Expresia unei tendinţe spre nedeterminare. Zdruncinarea convingerilor şi aspiraţiilor dobândite în cursul procesului de alocare şi rafinare a cunoaşterii.

Adevărata probă a creativităţii era să mă văd drept o alternativă a realităţii, ca rezultat al creşterii valorii unei gândiri care, nerecunoscându-şi propriile limite, fascinează prin interpretările labirintice ale experienţelor de creaţie.

Au trecut nenumărate zile fără să găsesc răspuns la întrebările care mă frământau. Necontenit, mă cufundam în reveriile şi gândurile mele, încercuit de dulcea căldură a extazului şi, totodată, în ultima fază, înlănţuit ca un prizonier în carcera disperării.

O gândire întortocheată, îndreptată în general spre absoluturi, inspirând prea puţină încredere, şi nu o gândire raportată la concret, mă determina să ajung în permanenţă la concluzii greşite. Şi, analizându-le, descopeream mereu, ca după o aţipire scurtă, ceva nou, dar incomod sau neconcludent.

Identitatea pe care mi-am construit-o din încercările de a mă cunoaşte mai bine era condiţia existenţei mele de a se transforma într-un destin specific celor ce îmbrăţişează conţinutul esenţial al unei realităţi inventate.

Ce interpretare puteam să dau acestor percepţii şi raporturi conceptuale, acestor bizare tresăriri de luciditate, acestor fragmente de timp foarte scurte care mă absorbeau cu totul, acestor spaţii identitare care se tot descompuneau şi se întregeau anapoda, acestor supratensiuni care produceau adesea scântei electrice lungi ce păreau să se ramifice de la polul pozitiv spre cel negativ al existenţei mele?

Aceste supratensiuni se propagau pe conductoarele liniei mele de cercetare, în stânga şi în dreapta punctului de convergenţă: neputinţa omului din mine de a mă obişnui cu tragedia creaţiei, aceea de a nu mai putea cinsti cum se cuvine celelalte bucurii ale vieţii.

Leadership: Porneşti în căutarea unei imagini despre sine şi despre lume sub aspectul experienţei de construire a unei realităţi independente într-un plan al modalităţilor de expresie ale spiritului novator?

Pătruns de un adânc spirit de adevăr, deveneam tot mai conştient de ce se petrecea cu mine: că trăiam uitându-mă mereu după următorul moment. Tot mai enigmatică, mintea-mi era încinsă de idei efemere, curgând în valuri una după alta, de cerinţele unei vieţuiri cu umbre şi cu har, *maladroite et imprécise.*

Păream să raţionez aidoma bătrânului Stillman din romanul lui Paul Auster, care cutreiera străzile înaintând uşor, puţin câte puţin, făcând câte o pauză, apoi punându-se din nou în mişcare, pe urmă oprindu-se încă o dată, de parcă fiecare pas trebuia cumpănit şi măsurat

înainte să-şi ia locul în suma totală de paşi. Şi care, totuşi, parcă supus unui scop conştient, nu reuşea niciodată să iasă dintr-o zonă strict delimitată, mărginită de alte străzi.

Semnificaţia acestor scurte *digressions* , acestor momente electrizante din existenţa mea, ce păreau a-mi da un plus de personalitate, continua să-mi scape. Trebuia să gândesc şi să anticipez fiecare mişcare pe care o făceam, căreia să-i atribui tot mereu un alt înţeles, ca într-o ecuaţie cu mai multe necunoscute. Un spirit inovator ştie să găsească corespondenţe între o realitate exterioară convenţională şi una personală, subiectivă, încât să ofere o altă variantă ascensionată a fiinţei sale.

Dar totodată ceva în mine opunea rezistenţă la tot ceea ce însemna schimbare, la tot ceea ce mă depăşea. Nu voiam să accept incertitudinea "necunoscutului". Aceste necunoscute care scapă oricărei explicaţii, se reduceau în mod obligatoriu şi în esenţă la puterea mea de a căuta şi a găsi sensul existenţei mele. Înainte de orice, alchimia nu este altceva decât o aventură amplasată haotic în existenţa omului, şi, ca orice aventură, nu se explică, ci se trăieşte.

A porni în căutarea unei imagini despre sine şi despre lume sub aspectul experienţei de construire a unei realităţi independente înseamnă să extragi din viaţa ta acele semnificaţii atribuite relaţiei dintre ceea ce ţi se dezvăluie ca un început de poveste şi ceea ce eşti pregătit să renunţi pentru a intra în pielea personajul din poveste.

Te confrunţi cu realitatea unei lumi dezlănţuite? Eşti ancorat în rutina unei gândiri care te determină să ajungi în permanenţă la concluzii greşite? Ce interpretare poţi să dai acelor bizare tresăriri de luciditate care te împresoară? Trăieşti uitându-te mereu după următorul moment? Fiinţa ta poate să accepte orice necunoscute?

Trebuie făcut ceva pentru ca toată lumea să se schimbe, să se reinventeze. Unele spirite, limitate de învelişul fragil al falsului sine, nu reuşesc niciodată.

De aceea numeroase companii îşi pun la dispoziţie autoritatea, energia şi chiar resursele cele mai valoroase pentru ca lucrurile să se întâmple, pentru a face ca totul să fie mai simplu pentru acei defavorizaţi de ei înşişi sau de sistem – încercând astfel să facă din leadership un obiect de lux. Însă rezultatul demonstrează mai mult contrariul - o artă "ieftină", la îndemâna tuturor.

În realitate, leadershipul pe care aceste companii îl adoptă şi îl împărtăşesc este rezultatul unei greşeli de interpretare, de calcul, de gândire, devenind prin însăşi starea, speranţa, soluţiile constructive pe care le cultivă, ceva rigid, un fel de "prezenţă" ostilă sau total ineficace. Un proces care înaintează şi se desfăşoară într-un deşert tot mai arid, vulcanic, pustiu, cu bolovani negri. Forţa chemării înflăcărate, făcută prin viu grai, aidoma unui val tsunami care schimbă totul în exterior, dar nu schimbă nimic înăuntrul omului.

Din acest punct de vedere, leadershipul se transformă într-un fenomen greu de stăpânit. Devine asemenea unui spaţiu locuibil, ce urmează să fie împărţit noilor locatari – prea mulţi şi prea înghesuiţi într-un spaţiu tot mai strâmtorat, în care doar obiectele mai fac câte ceva.

Dacă vrei să asimilezi într-adevăr ştiinţa conducerii, renunţă la spaţiul mic în care te-ai claustrat, şi extinde-te într-un spaţiu mai larg şi mai cuprinzător, cu privelişte panoramică: realitatea vieţii, redimensionarea ei prin intermediul a ceea ce eşti şi a ceea ce poţi să fii.

Leadershipul este încercarea de a da un nume nou creaţiei denumită "identitate" prin intermediul a ceea ce eşti şi a ceea ce poţi să fii prin reprezentarea propriei lumi într-o

altă variantă de a defini sensul şi reperele existenţei.

Oscilaţiile în necunoscut sunt provocate de eforturile tale de a-ţi descoperi adevăratul potenţial, de gradul tău de conştiinţă, de gradul tău acceptare, de a deveni responsabil şi independent. De păstrarea unei anumite balanţe în interacţiunea cu evenimentele care se petrec în viaţa ta.

Să ne amintim ce spunea altădată scriitorul rus Maxim Gorki: " *Printre sutele de milioane de locuitori ai globului vedem atât de puţine caractere net definite - oamenii mari.* "

Eşti un om mare, sau o imitaţie ieftină a unora ce-au excelat în leadership?

Felul cum contribui la crearea propriei identităţi, conturează adevărata valoare a leadershipului tău. Leadershipul este un domeniu în care te dezvolţi pe cont propriu. Depinde de tine dacă vei deveni un lider de excepţie sau un kitsch de duzină.

Osteneala unei vieţi în ascultare

On Martie 09, 2012

Rămâi împăcat cu tine însuţi prin contactul cu o realitate de care nu poţi fi sigur în totalitate, în condiţiile în care eşti perfect conştient de limitările tale.

"Ascultă ! Trăia odată un ţăran sărac. El trudea la petecul său de ogor. Într-o vreme a încărcat el toate bucatele sale într-o luntre şi a plecat pe apă, dar către seară a început să se ridice un vânt puternic. Până la apusul soarelui a vâslit ţăranul în luntrea saşi după aceea a sărit pe mal împreună cu nevastă-sa. Însă fetiţa lui rămăsese în luntre în mijlocul râului Nil, unde în vreme de noapte foiau crocodilii şi pe ea o ameninţa moartea.

Şi iată a şezut ţăranul pe malul râului şi a grăit şi a spus aşa: Eu nu plâng după această fetişcană, cu toate că ea nu se va duce niciodată în împărăţia de sub pământ…Dar eu voi plânge pentru copiii ei nenăscuţi încă şi ucişi în embrion, ajunşi pradă crocodilului. Căci ei nu au putut să vadă viaţa

Înţelege deci: Numai viaţa aceasta are un preţ." *****

Leadership: Eşti atent la cât de mult depinde viaţa ta de convingerile pe care le respecţi în mod conştient, prin corelare cu un fapt real menit să emoţioneze prin dramatismul fatalităţii lui?

Viaţa trăită prin alegere, nu prin fatalitatea destinului, dacă ar căpăta glas de filosof probabil ar susţine că fatalitatea este o creaţie liberă, ficţională şi subiectivă. Împotriva oricăror false determinări, viaţa arată că toate episoadele destinului unui om, în sensul autentic de plan dinainte hotărât de providenţă (plan ce nu poate fi schimbat), nu sunt propriu zis o creaţie a conştiinţei omului, ci o descoperire a identităţii sale manifestată printr-o radicală transformare a Eului. Şi asta nu doar în dimensiunea religioasă, ci în dimensiunea unei suferinţe asumate şi consimţite printr-o puternică busolă morală.

Misiunea bunului creştin se duce la îndeplinire printr-o viaţă morală şi prin fapte bune, în ecuaţia deznădăjduirii în care conştiinţa răspunde acuzaţiei de a fi pus un preţ prea mare pe valorile unei lumi trecătoare, în loc de valorile unei lumi trăită ca un joc frumos, trăită, experimentată, realizată în spirit şi în acţiune dinamică a Eului totodată. Poate că fatalitatea unui om care experimentează dispoziţia sufletului în timpul acestei vieţi este rodul unei lumi care se rescrie sub ochii săi și acest om, ocazional, reflectă la misiunea sa în durata lungă a istoriei.

Dimensiunea interiorităţii, asta contează în ceea ce priveşte mintea şi sufletului omului care trebuie să se împace cu realitatea, în ceea ce priveşte convingerea că totul se va desfăşura repede şi bine. Că totul pe lume e ciclic: orice nefericire dispare, iar într-o zi, sufletul va fi împăcat cu soarta lui.

Aşadar, fii atent la cât de mult depinde viaţa ta de convingerile pe care le respecţi în mod conştient prin corelare cu un fapt real menit să emoţioneze prin dramatismul fatalităţii lui. Fiindcă totul trece, important este să fii împăcat cu tine însuţi, cu alegerile făcute, cu lucrurile pe care nu le-ai putut schimba, fiindcă aşa a fost voia lui Dumnezeu.

Leadershipul, în marea schemă a vieţii, este surprins la cotitura dintre destin şi liberul arbitru, dintre realitate şi iluzie, cu menţiunea că totul poate fi revizuit.

Leadershipul este de fapt o asigurare a gândirii conform căreia trebuie să te concentrezi asupra felului în care iei cunoștință de experiențele tale şi asupra modului cum acest proces poate genera rezultate pozitive sau negative.

Osteneala unei vieţi în ascultare se poate constata din eforul susţinut pentru a da un sens oricărui fapt, mic sau major, de care se cuvine cu atât mai mult să ții seama ori de câte ori viaţa se aruncă asupra ta şi muşcă din planurile şi visurile tale, testându-ţi conştiinţa şi tăria de caracter.

Dacă vrei ca viaţa să nu ţi se mai pară atât de grea în anumite momente, mai întâi rămâi conştient că este singura viaţă pe care o ai. Mai trebuie să rămâi împăcat cu tine însuţi prin contactul cu o realitate de care nu poţi fi sigur în totalitate, în condiţiile în care eşti perfect conştient de limitările tale.

Oul primordial şi puterea întregului univers

On Septembrie 28, 2009

Căutarea înțelegerii "originilor" revelează complexitatea și relativitatea percepțiilor noastre asupra timpului și spațiului, îndemnându-ne să acceptăm limitările perspectivei umane în fața vastităţii infinitului.

- Keops, zise Ibebi, după ce se aşeză fiecare pe rogojină sa, vei ajunge curând la capătul părții de drum care îți era dată să o străbaţi însoțit de mine în templul lui Thot. Vom reveni asupra unor puncte rămase, în aceste zile, în suspensie, ca să le aprofundăm şi să le lămurim. Vom vorbi, deci, din nou despre divina Ogdoadă, despre care ai învăţat că este substanţa lui Thot, manifestările multiple ale fiinţei sale. Află deci că, la origine, după cum s-a spus, a fost Ta-tenen. Era un haos fără formă, în el se afla, totuşi, puterea întregului univers. Şi, brusc, a făcut explozie, din el a ieşit oul primordial, iar din acest ou a ţâșnit Ra, dintr-o floare de lotus.

Mărimea acestui ou nu se poate descrie: era imens şi totuşi mic, căci, când nu există niciun punct de comparație, care poate să fie măsura lucrurilor? Şi toate acestea se petreceau în negura timpului. Dar cum se exprima acest timp în inundaţii, pentru că Nilul nu exista încă, nici inundațiile? Şi nici anii, pentru că Pământul nu exista, pentru că soarele nu răsărea dimineaţa la est ca să apună seara la vest, pentru că nici el nu exista ! Or, măsura timpului nu este dată de mișcările soarelui şi ale stelelor mișcătoare? Nu exista deci timp, nici spaţiu, căci spaţiul nu are existenţă decât în funcție de corpurile care îl ocupă.

Leadership: Este mintea ta în stare să înțeleagă legătura cu divinitatea, conștientizând că ești doar o ființă finită, parte a unui întreg care depășește complexitatea ansamblului?

- În acest caz, de ce Ta-tenen a făcut brusc explozie, de ce din oul primordial a ieşit brusc lumină? De ce s-a petrecut asta la un moment dat în urmă cu milioane şi milioane de ani, după modul nostru de a măsura timpul, şi de ce nu înainte sau după momentul în care lucrurile s-au petrecut? Şi de unde vine materia fără formă din care era constituit Ta-tenen?

- Există multe mistere în univers, multe lucruri pe care mintea noastră nu este în stare să le înţeleagă în legătură cu divinitatea, căci suntem doar nişte fiinţe finite, părți ale unui tot. Or, finitul nu poate să cuprindă infinitul, aşa cum părțile unui ansamblu nu pot percepe întreaga complexitate a acestui ansamblu. Zilele trecute ţi-am spus că este absurdă ideea creației prin cuvânt, pornind de la nimic, mai puţin în cazul în care admitem că zeul a creat, pornind de la propria substanță, lumea vizibilă şi pe cea invizibilă, spiritele numite de noi "ahu" şi materia care ia în ochii noştri formele ce ne-au devenit familiare.

Leadership: Poți accepta că înțelegerea adevărată a universului necesită eforturi susținute de gândire, știind că există limite impuse revelațiilor pe care le poți primi?

Acum vei putea să fii în măsură să-i înţelegi sensul, dar să nu crezi că, prin ceea ce spun, voi alunga toate umbrele care îți întunecă mintea: nu vei putea pricepe sensul decât în urma unor lungi eforturi de gândire, şi nu în întreaga sa totalitate, căci există mistere pe care nu ne este permis să le desluşim. Oul primordial este un punct minuscul şi, totuşi, imens, care conţine potențial întreg universul.

Cum nu există nici timp și nici spaţiu, căci aceste concepte nu au căpătat substanţă în mintea noastră decât prin observarea naturii din copilărie, nu există nici înainte și nici după, nici aici şi nici acolo, ci doar Ta-tenen, un punct nelocalizat. De aceea, întrebarea pe care

mi-o pui, aceea de a ști dacă oul a ieșit din Ta-tenen într-un moment sau în altul, nu are sens, pentru că ceea ce numim moment, părticică de timp, nu a venit la viață, nu avea existenţă, pentru că nu exista mișcarea.

Leadership: Percepția ta despre realitate ar putea fi influențată de înțelegerea că totul este o manifestare a unei entități superioare, al cărei ecou în univers se regăsește în fiecare aspect al existenței tale?

Atunci, cine sunt Huh și Hauhet? Este materia organizată, materia după explozia oului primordial, apa în potențialitatea ei, elementele primordiale care, combinându-se, vor crea materia şi, în special, apa pe Pământ, după crearea acestuia. Oul ne ajută să ne facem o idee despre forma reală a universului, el simbolizează organizarea armonioasă a universului în faţa materiei dense, dar fără formă, indescriptibilă a lui Ta-tenen înaintea expansiunii sale.

Dar Ta-tenen, din care a ieșit zeul, este, în realitate, materie divină, este zeul însuși, astfel încât lumea nu este niciodată decât o manifestare a zeului, orice lucru care există fiind o părticică din Fiinţa absolută numită de noi Divinitate, care închide în ea toate emanaţiile cărora le-am dat nume deosebite, care sunt cele ale diferitelor divinităţi cărora le-am consacrat un cult, adică Ra, Ptah sau Thot, Hathor, Sekhmet sau Neith.

Înainte de a te deschide în faţa marii cunoaşteri, trebuie să fii capabil să captezi esența infinită a universului, atribuindu-ţi măreția unui Sine universal.

Oul primordial și puterea întregului univers sunt cele două concepte cheie la care trebuie să se raporteze orice om care aspiră să atingă un nivel mai înalt de cunoaștere. Prin percepția ta asupra realității, nu cumva răspunzi la chemarea de a descifra și reprezenta misterul și complexitatea universului? Din acest motiv, cred că primul pas spre atingerea unui nivel înalt de cunoaştere este reflectezi la următorul aspect: "Nu cumva tu însuţi reflectezi dinamica și transformările perpetue ale universului?"

Păcatul va fi odihna rațiunii

On Iulie 14, 2020

Dă-ţi interesul de a cuprinde cu mintea şi cu sufletul domeniul larg al cunoaşterii bazat pe sincronizarea lui "eu însumi" cu "eu însumi mai mult decât mine".

Ceva din mine îmi cerea mai mult decât altora, oricât de tare mă împotriveam. Era o poruncă nemiloasă și neclintită, dar nu știam de unde vine şi nu voiam să las capul jos. Așa să fie, mă gândeam eu, asta să fie știința mea și să-mi zădărnicească toate eforturile. Prin comparație, orice alt păcat am comis sau voi comite nu este decât un fleac ridicol, deoarece nu am făcut nimănui prea mult rău păcătuind. Păcatele trupești și ale simțurilor nu înseamnă decât plăcerea uitării. Un vis al păcatului, un somn din care trebuie să mă trezesc cu amar de fiecare dată ca să-mi regăsesc vinovăția. Cine știe, poate că gustul pentru cărți, studiul limbii grece, interesul pentru știința profană, poate chiar și Homer și Platon reprezintă pentru mine aceeași poftă de-a uita și sunt un păcat mai grav decât neînsemnatele păcate trupești și ale simțurilor.

Păcatul nu este decât un cuvânt, dar pentru mine, de acum înainte, va însemna numai dorința disperată de-a uita măcar pentru o clipă de cunoașterea mea cea mai înaltă, de-a uita de Dumnezeu în mine. Păcatul este odihna și somnul sufletului, la fel cum somnul trupului este odihna sa, pentru că, fără el, corpul nu ar putea trăi, fiind legat de lumea finită. De aceea omul, în slăbiciunea și limitarea sa, n-ar putea trăi fără odihna sufletului. De-acum înainte nu-i voi mai reproșa nimănui păcatele. Să le fie iertate toate păcatele, așa stă în firea omului. Pentru mine, odihna rațiunii va fi păcat și păcatul va fi odihna rațiunii, dar faptul că sunt conștient de asta mă face deznădăjduit și nicicând n-o să mai am pace cu mine însumi. *****

Leadership: Eşti în stare să-ţi găseşti pacea interioară prin prisma experienţei de pendulare între odihna raţiunii şi păcatul de a mânca din fructul cunoaşterii, încât să meriţi să fii tot timpul acelaşi tu?

Din fragmentul de mai sus, extras din cartea "Tânărul Ioannis" am învăţat un lucru, acela că de la păcat până la sfinţenie este doar un singur pas: cunoaşterea. Iar aici se pot identifica mai multe feluri de cunoaştere, precum: cunoaşterea de sine, cunoaşterea binelui, cunoaşterea bazată pe fapte observate, cunoaşterea bazată pe discernământ (îmbinată cu o gândire vrednică de laudă), cunoaşterea bazată pe datele auto-evidente ale experienţei, cunoaşterea bazată pe observarea comparativă, cunoaşterea bazată pe revelaţia biblică, cunoaşterea bazată pe trăire afectivă, care mai apoi este înglobată integral în memoria afectivă a fiinţei tale.

Datorită cunoaşterii de care se arătau interesaţi tot mai mulţi oameni, unii au răspândit ideea de păcat şi au inserat mişeleşte şi subtil acest lucru în rândurile bibliei: "Crede şi nu cerceta". Ori în prezent, cunoaşterea a luat un avânt atât de puternic, încât oamenii efectiv depind de tehnologie mult mai mult decât de frica cuvintelor care le sunt predicate de la amvon. Am înţeles foarte bine acest lucru, şi am înţeles mai bine ca oricine, fiindcă într-adevăr cunoaşterea este arma cea mai puternică, iar cine dispune de ea conduce lumea în totalitate.

Eu, Fântânăru Neculai-Ioan, sunt unul dintre aceia pentru care cunoaşterea se va împlini în concret, nu în abstract. Cred în Dumnezeu prin intermediul cunoaşterii pe care am dezvoltat-o în scrierile mele, cu mult discernământ, cu mult suflet, cu multă chibzuinţă, aşa încât am ajuns să mă consider un bun cunoscător al realităţii concrete, percepând şi exprimând trăiri spirituale pe această cale.

Adevărata mea cunoaştere este rezultatul contemplaţiei individuale pe care sufletul o adresează lumii Ideilor în doctrina unei Zeităţi Universale, dar şi în doctrina unei conştiinţe individualiste, căci libertatea pe care o reclamă actul de gândire trebuie să rodească din efortul fiecăruia de a observa cu atenţia, de a inventa, de a descoperi, de a face o lume mai bună cu ajutorul a ceea ce am eu în mine.

Leadership: Ca să te recunoşti pe tine însuţi drept un om superior, trebuie să faci dovada unei cunoaşteri care are îndrăzneala de a nu-şi recunoaşte limitele?

Ceva din mine îmi cere mai mult decât altora, datorită laturii personalităţii mele componistice creative, şi îmi cere să îmi expun punctul de vedere vizavi de observaţiile pe care le-am colectat din experienţa vieţii, aprofundând tot mai mult latura sufletească a comportamentului uman, dar şi relaţia mea cu Dumnezeu.

Un singur cuvânt mă opreşte să fiu cea mai bună variantă a mea: ignoranţa. Doar gândurile şi scenariile pe care mi le fac între cele două urechi şi cei doi ochi, pot creşte şansele de a mă regăsi în paginile unei vieţi care se contemplă pe sine în fiecare moment şi care în celelalte vieţi vede numai oglinzi.

Însăşi paginile cărţilor scrise de mine abundă de prezenţa fermecătoare a unei gândiri creatoare, asemenea unei vieţi care se naşte sub ochii unui Dumnezeu care îmi transmite să nu iau în serios păcatele pe care mi le atribuie dorinţa de a mă şti deasupra tuturor prin cunoaştere. Prin comparaţie cu credinţa, mă identific ca un om drept, de mare caracter, bun la suflet, şi chiar faptul acesta de a mă descrie pune în valoare terenul fertil al autocunoaşterii.

Viaţa născută sub ochii lui Dumnezeu este o sursă infinită de plenitudine obţinută prin virtutea cunoaşterii. Ca să te cunoşti pe tine însuţi drept un om superior trebuie să faci dovada unei cunoaşteri care are îndrăzneala de a nu-şi recunoaşte limitele, punând în centrul atenţiei tale meritul de a te introduce într-o lume plină de supereroi. Totodată, trebuie să iei în considerare meritul de a a te răscoli prin introspecţia pe care o provoacă acea disecţie rafinată a sufletului şi eului tău văzut ca o sursă inepuizabilă de creaţie şi revelaţie.

Dacă pentru o validare continuă a cunoaşterii de sine este nevoie de o identificare a mijloacelor necesare unei bune observări (probabil este şi asta o componentă de bază a inteligenţei emoţionale), atunci pentru finisarea cantităţilor mari de conţinut sufletesc şi intelectual apare dificultatea extensibilităţii punctelor de vedere care alcătuiesc esenţa unei noi spiritualităţi.

Leadershipul este rezultatul cunoaşterii pe care ai obţinut-o prin puterea lui "tu însuţi" ridicată la superlativul relativ pozitiv: "sunt mereu deschis la nou şi sunt mereu mai presus decât așteptările mele."

Şi mai cred un lucru. Cred că esenţa unei noi spiritualităţi rezonează cu efortul omului de a face din cunoaşterea lui o trăire intensă a evenimentelor importante prin care trece pe parcursul vieţii, aşa încât el să fie vizibil către toţi cei care caută să se diferenţieze de ceea ce îi ţine captiv: nesiguranţa în a se repera ca oameni capabili să îşi învingă patimile şi ignoranţa.

Păcatul va fi odihna rațiunii pentru toţi acei oameni care cred că pot fi mai buni decât ceilalţi datorită cunoaşterii preluate din lecţiile ascensiunii la puterea absolută. Este un mare păcat să te ştii deasupra tuturor, fiindcă toţi te vor privi cu invidie şi dispreţ, nu neapărat cu admiraţie. Însă raţiunea ta trebuie să triumfe prin subtilitatea erudiţiei, prin subtilitatea sugestiei, prin subtilitatea ideilor, şi totodată ea trebuie să se încline în fata credinţei care spune: "Nimic nu este imposibil."

* **Notă:** Mika Waltari - *Tânărul Ioannis* , Editura Polirom, 2020.

Pact cu diavolul

On Mai 27, 2010

Reevaluează felul în care răspunzi la influenţa celor superiori ţie, trecând trăsăturile lor de caracter prin sita gândirii şi a sentimentelor tale.

Numai un singur gând are împăratul Qin Shi Huang, sau, mai bine zis, este posedat de el: acela de a fi nemuritor. Şi-a netezit calea spre tron înlăturându-şi toţi potenţialii adversari, dar în faţa adversarului său cel mai de temut, moartea însăşi, rămâne neputincios.

Dar într-o zi el află despre o vrăjitoare cu puteri deosebite care se zvonea că cunoştea secretul vieţii veşnice. Imediat îi porunceşte generalului Ming, mâna lui dreaptă, s-o găsească. Zis şi făcut. Dar Zi Yuan, care era o femeie extraordinar de frumoasă, de care se îndrăgosteşte imediat, iar cu ajutorul ei descoperă în mănăstirea Turfan, care adăpostea cea mai mare bibliotecă a lumii antice, secretul vieţii veşnice.

Zi Yuan se prezintă în faţa împăratului care, foarte mulţumit de ea, îi făgăduieşte că îi va îndeplini orice dorinţă.

- Vreau să-mi petrec viaţa alături de generalul Ming, spune vrăjitoarea.

- Desigur, răspunde împăratul.

Încredinţată că acesta îşi va respecta promisiunea, Zi Yuan deschide „oracolul oaselor”, o colecţie de simboluri mistice ale lumii antice în care se afla secretul nemuririi, şi rosteşte vraja într-o limbă străveche pe care numai ea o înţelegea.

Leadership: Capacitatea ta de luare a deciziilor este în corelaţie puternică cu preferinţa pentru acţiunile rapide din care reiese o filosofie de viaţă bazată pe o "repoziţionare de preţ" care te face omul de mâine?

Dar după ce vraja îşi face efectul se întâmplă ceva absolut imprevizibil, ceva la care Zi Yuan nu s-a aşteptat, ceva groaznic. Împăratul o invită pe terasa palatului său, i-l arată pe generalul Ming legat de mâini şi de picioare, şi-i spune:

- Dacă vei deveni regina mea, îl voi lăsa să trăiască.

Zi Yuan îl priveşte întristată pe cel cu care dorea să-şi petreacă restul vieţii, condamnat acum la o moarte groaznică, apoi, într-o clipă, îşi întoarce privirea către împărat. Abia acum, în al 12-lea ceas, realizează ce fel de om este – un om pe care nu-l mişcă, nu-l emoţionează nimic, un om căruia zadarnic încerci să-i satisfaci toate dorinţele, el se va descotorosi de tine îndată ce nu-i vei mai fi de folos.

- N-ai să te ţii niciodată de cuvânt, îi răspunde ea cu voce tremurândă.

- Ai dreptate, îi spune împăratul. După care dă ordinul de execuţie. Şi imediat după ce generalul Ming este executat, cu o răutate voită, fără margini, cu o ură şi o cruzime înfiorătoare, el scoate cuţitul şi-l înfige în abdomenul vrăjitoarei. Cine îi întinde un deget

diavolului, nu-şi pierde doar mâna, ci şi viaţa.

Atacul prin surprindere asupra propriilor aliaţi este singura regulă a experienţei de leadership pe care o urmează un om superior care nu se poate coborî la statutul de muritor. El nu se poate declara înfrânt de privilegiul exclusiv al muritorilor, de a servi unui ideal înalt, ci se conformează unor motive venite din raţionamentul care spune că după un drum în iad nu mai poţi primi îndurare ca să te transferi în rai.

Leadership: Preţul pe care îl plăteşti pentru a-ţi dovedi supremaţia se repozitioneaza spre zona de rezistenţă a "operei" tale în funcţie de ceea ce eşti în stare să sacrifici pentru o pagină de glorie în istorie, fără să-ţi afirmi intenţiile adevărate?

Opera în formare la care contribui prin cultivarea discernământului oamenilor se naşte din porniri egoiste, laşităţi, ambiţii oarbe sau orgolii meschine, ezitări sau dezertări, contrapunctate de o figură senină, gânduri şi elanuri pure? Este această operă consecinţa unei ambiţii nemăsurate spre victoria unui destin care a putut alege binele, dar nu a făcut-o?

Scena pe care tocmai v-am povestit-o, de la începutul filmului *„ The Mummy – Tomb Of The Dragon Emperor (2008) ”*, mi-a dat multe de înţeles. În primul rând că un om torturat de o veşnică dorinţă, un om care nu trăieşte, care nu trudeşte decât pentru o singură idee, şi ar face totul pentru ea, nu poate fi niciodată un om de încredere. Eul său lăuntric, atât de plin de propria-i idee, nu-i permite să nutrească vreun simţământ pentru nimeni, nu-i permite să se ataşeze, nici măcar o clipă, de cineva.

Diavolul nu se pocăieşte niciodată. El va refuza mereu, cu o stăruinţă trufaşă, cu o neclintită îndârjire, orice posibilitate de a lega vreo prietenie sau de a încheia vreun parteneriat serios cu cineva. Căci un om al cărui destin, pe care singur şi l-a creat şi pe care şi-l asumă cu toată dăruirea, este să subjuge lumea, cu orice preţ, propriei sale dorinţe, nu-şi poate deschide inima, nu poate arăta nimănui bunăvoinţă.

Hotărârea lui dârză, turbată, de a-şi stinge scopul, îl face complet nesimţitor faţă de tot ce este uman, faţă de orice suferinţe şi nevoi ale oamenilor. Bine a zis cel care a zis: *„Cel care îl serveşte pe acela care nu trebuie servit îşi va găsi pieirea.”*

Leadership: Practici o filosofie bazată pe obținerea puterii totale prin negarea oricăror norme, valori, credinţe ori realităţi, numărându-te printre protagoniştii evenimentului caritabil: "Fii supereroul unui vis ruinat" ?

Tu cum răspunzi la influenţa celorlalţi? Ciudat cum adesea oamenii îşi dau seama abia în ultima clipă care este adevărata faţă a naturii umane. Şi încă şi mai ciudat e faptul că nimeni nu pune la îndoială mărturia de solidaritate a celor care îi conduc, decât atunci când trăsăturile lor de caracter ies la iveală, deci când deja e prea târziu.

Cine se încrede mai mult în cuvintele unui om fără scrupule decât în propriile simţuri şi instincte, nu-i este dat să atingă fericirea. Un tiran poate câştiga de partea lui oamenii prin ardoarea temperamentului său înflăcărat, prin avântul său deosebit, făgăduind totul, dar niciodată nu se va putea ataşa de cineva. El poate să înflăcăreze inimile oamenilor, poate să le ofere un sentiment de solidaritate, dar numai pentru o scurtă durată, până când trăsăturile sale de caracter ies la iveală.

Tu cunoşti caracterul celui care te conduce? Eşti la curent cu viziunea şi cu filozofia lui? L-ai mai urma dacă ai afla că doar evoluţia lui personală este dezideratul lui de-o viaţă? Ai abilitatea de a recunoaşte felul lui de a se raporta la ceilalţi oameni?

Supereroul unui vis ruinat este ca un personaj aproape lipsit de poveste, găzduit strict în întruchipare, care a reuşit să-şi depăşească limitele, dar nu se poate înstrăina de sentimentul de culpabilitate asociat cu o patologie psihică manifestată prin insomnii, stări obsesionale și depresive.

Preţul pe care îl plăteşti pentru a-ţi dovedi supremaţia este însoţit de câteva cuvinte care reuşesc să surprindă admirabil drama celui care-şi trăieşte anii în fuga după deşertăciunile acestei vieţi: amăgire, primejdie, tensiuni necurmate, o libertate clădită în pustiu, o promisiune veşnic neonorată.

Concluzie: Un parteneriat presupune pe lângă avantaje reciproce, conlucrare eficientă şi încredere reciprocă bazată pe fapte concrete, cât şi intenţii bune în vederea realizării scopului comun. Atunci când una din părţi are intenţii ostile, a continua aşa zisul parteneriat nu înseamnă altceva decât a face „pact cu diavolul", şi mai devreme sau mai târziu totul se va nărui.

Recunoşti importanţa selectării liderului potrivit? Sau îl alegi din disperare de cauză? Ştii să identifici un lider adevărat? Judeci profund şi la rece calitatea unui lider?

Nu este un lucru uşor, însă este esenţial. Viitorul tău depinde, la propriu, în mare măsură de abilitatea ta de a vedea şi de a alege. Dacă alegerea ta va fi bună, beneficiile se vor înmulţi; în caz contrar problemele tale vor părea aproape să nu se mai sfârşească.

Reevaluează felul în care răspunzi la influenţa celor superiori ţie, trecând trăsăturile lor de caracter prin sita gândirii şi a sentimentelor tale.

Paganini şi o singură coardă

On Noiembrie 15, 2014

Continuă să te concentrezi asupra a ceea ce funcţionează prin improvizaţie, în aşa fel încât să te integrezi în profunzimile experienţei de a conduce.

Faimosul violonist italian Niccolo Paganini cânta în faţa unui mare public când s-a rupt o coardă la vioară. A improvizat de minune şi a continuat să cânte. Atunci s-a mai rupt o coardă. Apoi alta. În curând rămăsese numai cu una. Paganini a continuat să improvizeze şi a încheiat compoziţia cu o singură coardă. Când, în final, aplauzele s-au stins, dirijorul s-a întors spre public şi a strigat: „Paganini … şi o singură coardă ! " Publicul a început să-l ovaţioneze, iar Paganini a început să cânte din nou cu o singură coardă. *****

Leadership: Îţi pierzi de sub control „magia" într-o realitate a limitărilor acceptate, mai mult decât să accepţi puterea Creaţiei în ascendenţă cu predominarea experienţei de improvizaţie?

Nu vei putea să explorezi cu adevărat profunzimile experienţei de a conduce dacă îţi lipseşte abilitatea de a stabili valenţe comune între cele două constante: „previzibilul" şi „imprevizibilul" - în prezenţa unui fir director consecvent reprezentat de raportul complex dintre înclinaţie şi datorie. Cumulul acestor două constante se realizează într-o realitate a limitărilor acceptate, în favoarea unei focalizări pe rezultatele definite prin prisma manevrelor de tip „ *slalom printre erori, neconcordanţe sau defecte* ".

Mai întâi trebuie să accepţi limitarea, pentru ca apoi să o transformi într-o mică operă de artă. Această limitare este dată de incapacitatea de a demonstra o abilitate specială atunci când toate celelalte sunt puse pe "pauză", fiind stă în esenţa leadershipului să ştii să transformi un moment de cumpănă într-un moment de mare strălucire.

Dacă încerci să te încadrezi numai cadre stimulative şi convenabile pentru atingerea performanţei, fiind angrenat în raporturile procesului de afirmare profesională şi de creare a unei imagini cât mai bune, atunci nu vei putea să evoluezi spre o valoare mai mare. Deoarece activitatea pe care o desfăşori îţi poate modifica aşteptările. Toate impulsurile primite de la lumea exterioară se pot răsfrânge cu putere teribilă asupra ta, limitele de care te loveşti devenind o trăire interioară. În acest caz eşti pus faţă în faţă cu nevoia imperios necesară de a alege între a fi cu adevărat la înălţimea aşteptărilor celor din jur şi a fi un model experimental pentru nişte ambiţii deşarte.

Când te regăseşti în ipostaza magicianului care îşi pierde de sub control „magia", distanţându-se de modelul propriu de inovaţie, începi să-ţi manifeşti complexitatea din perspectiva unui Eu care se simte părăsit de orice încredere şi de orice strop de inspiraţie. Acest Eu începe să te ţină captiv într-un orizont al aşteptării, într-un „undeva" concret care se recapitulează tot timpul şi se repetă, până la un „altundeva" care eludează semnificativul. Asta este ceea ce în leadership se numeşte „ *The Effect of Changing the Experience of the Regular Functioning* ".

Liderul este un matematician al formulelor de continuare a experienţei concrete, în stare să rezolve o ecuaţie cu multiple necunoscute, sau mai bine spus, să o aducă la o formă rezolvabilă prin apelarea algoritmului „Posibil". Acţionând în conformitate cu normele de responsabilitate profesională, prin alcătuirea eforturilor intelectuale care îl individualizează, el deschide uşa unui raţionament care modifică percepţia asupra a ceea ce apare în neregulă pe parcursul „reprezentaţiei" sale.

Puterea Creaţiei constă în abilitatea artistului de a concepe un nou conţinut expresiv, de impact şi relevant, într-o realitate care se încăpăţânează să-l închidă într-un sine egoist, solitar, lipsit de mijloace de consolare.

Paganini şi o singură coardă aduce în prim plan acea situaţie neaşteptată în care rezultatele pot fi cuantificate numai prin artificii de perspicacitate și creativitate. În leadership, limitele pot fi împinse mereu înainte. De fapt, adevărata experienţă în leadership, cu victorii şi înfrângeri pe fundalul provocărilor neaşteptate, este să fii autentic în ceea ce afirmi că eşti chiar şi atunci când eşti pe cale să-ţi epuizezi credibilitatea şi valoarea.

Limitele propriei performanţe nu se află, aşadar, pe traiectoria avansării tale într-o anumită direcţie sau într-un anumit model de funcţionare. De fapt, vei întâlni asemenea limite numai în momentul în care eşti abătut de la calea normală de producere a rezultatelor, îndreptându-te către situaţii pentru care nu eşti pregătit. Viziunea ta entuziastă privind posibilităţile de funcţionare (prin improvizaţii) trebuie să se impună în faţa rezultatelor incerte care sugerează existenţa unor bariere inerente de care trebuie să treci.

Paradoxul empatiei pierdute

On Decembrie 23, 2024

Performanța standardului tău moral poate fi măsurată printr-o viziune care să includă "măsura superlativului", echilibrând imaginea compasiunii cu cea a eficienței?

O ilustrare a paradoxului zilelor noastre: pe de o parte, un om sărac, îmbrăcat modest, stă pe marginea drumului vânzând ouă, în timp ce un trecător bine îmbrăcat negociază insistent pentru a plăti mai puțin.

Pe de altă parte, aceeași persoană bine îmbrăcată este văzută într-un restaurant de lux, comandând mâncare scumpă, lăsând jumătate neconsumată în farfurie și oferind un bacșiș generos de 10 euro.

Aș numi asta "paradoxul empatiei pierdute": investim resurse în lucruri efemere, oferind generozitate acolo unde nu este nevoie, dar ignorăm suferința reală din jurul nostru. Acest fenomen este prezent peste tot, nu doar în România.

Concluzia acestui paradox este o reflecție asupra valorilor și priorităților noastre: suntem adesea dispuși să plătim mult pentru confort și aparențe, dar ne lipsesc empatia și respectul pentru cei care se luptă să supraviețuiască. Este un apel tacit la conștientizare, echilibru și recunoștință pentru lucrurile care contează cu adevărat.

Leadership: Respectul pe care îl acorzi celor din jur poate fi perceput ca un reper vizual constant, capabil să traseze contururi clare între recunoaștere socială și nevoile autentice?

În teoria paradoxului empatiei pierdute, deciziile morale sunt adesea influențate de factori superficiali și presiuni sociale care depind de statutul perceput. Astfel, indivizii tind să aloce resurse și să arate respect în mod disproporționat, negociind agresiv cu cei modești, totuși investind generos în contexte efemere. Acest comportament este influențat de suferința ignorată a celor care luptă să supraviețuiască, comparativ cu dorința de validare prin confort și aparențe a celor care caută recunoaștere socială.

Prin urmare, prioritățile reale sunt mascate de un sistem de valori distorsionat, unde empatia devine un bun de lux, distribuit tacit doar în contexte care confirmă statutul social. Asemenea unei ecuații economice dezechilibrate, societatea perpetuează acest paradox, unde adevăratele nevoi rămân în umbra gesturilor grandioase, dar lipsite de substanță.

Leadership: Fundamentul valorilor tale poate transcende imediatul, oferind un cadru de vizualizare care să stimuleze o reflecție profundă asupra justei distribuții a resurselor?

Mai precis, paradoxul empatiei în societatea modernă presupune echilibrarea fluxurilor de generozitate și optimizarea distribuției de respect față de oamenii din orice clasă socială, pentru a menține o stare de echitate socială constantă și sustenabilă.

Performanța acestui sistem moral este determinată de calibrul valorilor pe care le manifestăm, precum și de întreținerea corespunzătoare a empatiei față de toți cei din jur. În mod ideal, distribuirea resurselor de sprijin și manifestarea compasiunii ar trebui să fie uniformă pentru a evita suferința și pentru a asigura supraviețuirea pe termen lung a tuturor membrilor societății.

Totuși, asemenea unui sistem defect de gestionare a resurselor, societatea noastră risipește resurse pentru confort și aparențe în zone care nu necesită sprijin, în timp ce lasă alte zone în suferință acută, demonstrând o prioritizare defectuoasă a valorilor și o incapacitate de a menține temperatura optimă a empatiei umane.

Viziunea ta asupra empatiei devine un instrument de măsurare a distanței dintre aparențele sociale și nevoile fundamentale, atunci când atenția și resursele tale creează un echilibru real între validarea socială și nevoile autentice.

Paradoxul empatiei pierdute se referă la distanța emoțională și socială dintre cei care au resurse abundente și cei care luptă pentru supraviețuire, luând în considerare faptul că inegalitățile sociale continuă să se adâncească, tot așa cum un vârtej absoarbe resursele disponibile într-un singur punct central.

Spun asta în condițiile în care, în prezent, tot mai mulți oameni își fac un obicei din a prioritiza confortul personal, fără a lua în considerare impactul real de dincolo de propria lor perspectivă imediată.

Pârghia de aur a leadershipului

On Decembrie 21, 2010

Determină-i pe oameni să conştientizeze sentimentul puterii tale lăuntrice ca să-şi poată optimiza mai eficient resursele necesare desfăşurării activităţilor lor - în concordanţă cu obiectivele tale.

Totul a început în acea noapte de vară târzie. Colonelul Cal Rhodes simţea o nerăbdare stranie care îi dădea fiori. Nu putea dormi, căci imaginea vie a fiului său nu-i dădea deloc pace. Nu se putea împăca cu gândul că acesta murise. Un mic firicel de speranţă rămăsese încă în interiorul său, şi nu-l putea elimina. Încă mai credea că fiul său trăieşte, fiindcă după terminarea războiului din Vietnam autorităţile l-au declarat doar dispărut în misiune, deci nu mort. Cu frică, cu spaima tăinuită, trebuia să plece neapărat şi fără zăbavă în căutarea acestuia.

Începând din acea noapte Cal Rhodes nu a mai avut decât un singur gând, care s-a transformat în cel mai mare scop al vieţii sale: să-şi salveze fiul din lagărul de prizonieri din Laos, căci primise informaţia că acolo s-ar găsi ultimii supravieţuitori ai războiului. Dar singur nu putea să-şi atingă scopul. Aşa că a luat legătura cu foştii camarazi de arme ai fiului său, şi cu multă greutate a reuşit să-i convingă să renunţe la vieţile lor liniştite în schimbul unei ultime misiuni de salvare, dar care în acelaşi timp era deosebit de periculoasă.

Leadership: Te agăţi de o misiune prin care ceilalţi pot conştientiza sursa puterii tale lăuntrice, pornind de la premiza că sentimentul este un mod de a recunoaşte interacţiunea dintre remuşcare, îndoială şi sinergie?

Cal Rhodes trebuia să se agaţe de misiunea aceasta, pe care singur o plănuise. Dorinţa lui, intensificată de spaima că fiul său ar fi fost torturat şi chiar ucis, l-a determinat să plănuiască cu atenţie strategia pentru atingerea scopului propus. Cu un entuziasm fără limite, un entuziasm care putea sparge orice bariere, Cal i-a antrenat şi i-a pregătit pe cei şase camarazi pentru a înfrunta situaţiile de mare risc. Între ei s-a legat o strânsă prietenie. Gustul dulce a acestei asocieri a fost şi faptul că toţi au fost obligaţi să împartă aceeaşi viziune, acelaşi ţel şi acelaşi entuziasm.

Cal Rhodes simţea atât ură şi mânie împotriva celor care i-au sechestrat fiul, cât şi mândria că va fi salvatorul lui. Acest lucru i-a dat un oarecare prestigiu, i-a întărit demnitatea de comandant şi i-a dezvoltat talentul de conducător. Cei şase camarazi au ajuns să aibă o foarte mare încredere in el, încrezându-se în capacităţile sale de a conduce o echipă. Colaborarea dintre ei a fost mai mult decât agreabilă, căci s-a făcut sub imperiul unei obligaţii morale – cu toţii au fost convinşi de Cal că salvarea fiului său era un motiv foarte serios pentru munca în echipă.

Pentru faptul că a crezut cu îndârjire în leadershipul său, Cal le-a câştigat încrederea celor şase camarazi. Aceştia au conştientizat sentimentul puterii sale lăuntrice de a-i conduce (depăşindu-şi limitele personale, impunându-şi voinţa numai cu scopul de a-şi găsi fiul pierdut în misiune) - şi, impulsionaţi de avântul lui sufletesc, s-au mobilizat mai bine ca niciodată pentru a-l ajuta în acea imensă sarcină pe care şi-o luase asupra sa.

Puterea lăuntrică este rezultatul unor gânduri care te străbat mereu într-un format de tipul "n-am să uit niciodată rănile aplecate asupra mea", inspirate din realitatea tranziţiei de la producerea unei tragedii până la triumful unei vieţi regăsite.

Leadership: Poţi să-ţi construieşti o influenţă de tipul "persuasiunii emoţionale" care să cauzeze acea constantă de referinţă numită sinergie?

Să nu uităm că acest act de bravură – iniţierea unei misiuni de salvare deosebit de grea – denotă o minte tânără, cu toate că Cal Rhodes era un moşneag trecut de pensionare, cu deplina conştiinţă a primejdiilor eventuale şi ulterioare. Deşi era în vârstă, el era genul de om care ştie cum să procedeze şi să aranjeze toate problemele. Nu exista nimic care să-l împiedice, să-l reţină cumva din tot ceea ce şi-a propus. Fiul său trebuia salvat cu orice preţ.

Dacă aţi urmărit filmul *"Uncommon Valor"* (1983), ştiţi că misiunea a fost doar pe jumătate o reuşită, căci echipa condusă de colonelul Cal Rhodes a reuşit să salveze doar o parte din deţinuţi, cu preţul vieţii a doi dintre membrii ei, iar fiul lui murise cu mult timp înainte să ajungă ei acolo.

Totuşi, ceea ce merită de reţinut din film este acea unitate de gândire şi acţiune care s-a creat între colonel şi cei şase camarazi, o puternică sinergie bazată pe împărtăşirea unei viziuni comune şi pe înţelegerea mutuală, o sinergie bazată pe curaj, dreptate, respect, integritate şi eficienţă.

Aşa cum un pictor ia în considerare întotdeauna structura formei şi a culorii pentru a putea optimiza calitatea imaginii, tot aşa şi tu trebuie să iei în considerare chemarea sufletească spre împlinirea unei misiuni aproape imposibile pentru a putea să perfecţionezi mijloacele de întărire ale vieţii cu noi posibilităţi de dezvoltare personală.

Persuasiunea emoţională are ca efect impulsul sentimentului de a comunica o realitate care anulează drama împovărătoare a unei incursiuni în trecut.

Pârghia de aur a leadershipului este mecanismul interior care îţi conferă forţa de propulsare necesară atingerii unui nivel superior; ea reprezintă acel impuls sufletesc uriaş prin care poţi să te înalţi singur în faţa oamenilor; constituie acea indestructibilă credinţă în tine însuţi prin care poţi să depăşeşti orice limite şi orice bariere în vederea realizării scopurilor propuse; este esenţa care pune în mişcare energia corespunzătoare acţiunilor tale; este cea mai eficientă modalitate prin care poţi să măreşti valoarea leadershipului tău.

Marele savant grec Arhimede a spus: "Daţi-mi un punct de sprijin şi voi urni Pământul din loc". Ca orice pârghie, "pârghia de aur a leadershipului" trebuie să aibă şi ea un punct de sprijin. Iar acest punct de sprijin nu este altceva decât echipa unită în jurul tău, pe care trebuie să o antrenezi şi să o dezvolţi în vederea atingerii unui obiectiv comun.

Pârghia de aur a leadershipului desemnează acel ansamblu în care acţionează mai multe forţe: impulsul lăuntric al liderului, cât si competenţele, abilităţile şi aptitudinile, atât ale lui cât şi ale echipei sale, la care se adaugă conlucrarea, cooperarea şi coeziunea dintre ei.

Tu ţi-ai construit o astfel de pârghie?

Source: https://neculaifantanaru.com/parghia-de-aur-a-leadershipului.html

Pars Pro Toto

On Martie 13, 2016

Învaţă să surprinzi partea care oglindeşte o nouă dimensiune a deja-ştiutului, utilizând acea succesiune de transformări care contribuie la maturizarea relaţiei dintre particular și general.

Mai mult decât atât însă, Eisenstein foloseşte prim-planul şi într-un fel similar cu ceea ce poetica numeşte sinecdoca. Este vorba de capacitatea filmului de a recrea în conştiinţa şi sentimentele spectatorilor un întreg prin intermediul uneia din părţile sale componente. Întreaga reprezentare a medicului Smirnov este cuprinsă în detaliul acelui pince-nez al său, rămas agăţat de o frânghie, după revolta marinarilor.

Detaliul acesta are o putere emoţională mai mare decât reprezentarea doctorului însuşi şi a aruncării lui peste bord. Pars pro toto, partea acţionează aici pentru întreg şi se include într-un ansamblu în care, la rândul ei, figura doctorului reprezintă, în particularul ei, o idee generală, ideea clasei sociale din care face parte, a rolului acestei clase. Iar mai departe, răscoala de pe "Potemkin" este partea care oglindeşte întreaga revoluţie din 1905. *****

Leadership: Poți să creezi în conştiinţa şi sentimentele oamenilor un ÎNTREG prin intermediul uneia din părţile componente ale creaţiei tale artistice, încât întreaga reprezentare a realităţii pe care o plăsmuieşti să fie cuprinsă într-un singur detaliu?

În cazul formei cele mai complexe a producției artistice, numită totodată creație autentică prin care se imaginează, analizează și se construiește o anumită temă, cu mare relevanţă în contextul unor evenimente mai mult sau mai puțin însemnate, există două sisteme diferite ce acţionează în serie.

În primul sistem, numit totuși din motive personale „Extractor", mai multe detalii sugestive și concrete sunt extrase din perspectiva sau trăirile anumitor personalităţi către o ilustraţie ce merge dinspre imagine spre un anumit tip de realitate, uneori în chip deductiv, descompunând în acte și fapte orice cade sub incidenţa unei ordini a primordialului. Aici se umplu golurile create de către insuficienţa unor informații de care subiectul dispune, în vederea descifrării, înţelegerii, interpretării unui nou fenomen, a unui caz izolat.

Al doilea sistem, numit „Reactor", care pentru fiecare imagine descompusă se utilizează opțiuni diferite de customizare, cuprinde elementele cheie percepute drept repere de comparație cu ceea ce există în afara personalităţii, printr-o succesiune de transformări ce contribuie la maturizarea acelui segment al relaţiei dintre particular și general.

Pentru ca leadershipul să fie etichetat drept un mijloc de exprimare personală prin participarea însăşi la un act de creație original, susceptibil pe un anumit nivel de profunzime şi de integrare a fiinţei la o anumită realitate, întâi trebuie să surprinzi partea care oglindeşte o nouă dimensiune a deja-ştiutului, una paralelă, ce transleazā viața sau evenimentele într-o altă compoziţie – una artistică.

Întreaga reprezentare a realităţii pe care o plăsmuieşti poate să fie cuprinsă într-un singur detaliu atunci când motivele temei alese spre expunere evidenţiază, în mod particular, o idee generală.

Practic, partea cea mai relevantă care oglindeşte un anumit aspect al momentului istoric din

filmul lui Einsenstein nu este dată de acea perioadă furtunoasă a revoluţiei în care spiritele şi curentele evoluau într-un mod nemaivăzut de accelerat, vertiginos. Ci, mai cu seamă, este dată de acea torţă vie a Revoluţiei care face, în mod tragic, legătura între ceea ce s-a întâmplat în sufletul oamenilor şi evenimentul care a declanşat transformări profunde şi de substanţă, făcând ca imaginea viitorului să fie deschisă spre o experienţă atractivă de actualitate.

Pars Pro Toto este acea parte din realitatea trecută cu vederea care, conţinând toate etapele unei povestiri, alimentează întregul a ceea ce vrei să transmiţi.

Regizorii de film sunt cei mai mari modelatori ai lumii, reuşind să creeze în conştiinţa şi sentimentele oamenilor un întreg prin intermediul uneia din părţile componente ale creaţiei lor artistice.

Argumentul unei anumite idei este un întreg exprimat într-o manieră complexă, putând fi pus oricând între „paranteze”, intercalat în atracţiile și provocările lumii reale sau ireale. Reprezentarea acelei idei trebuie să fie cuprinsă în detaliul semnificativ al unui eveniment, al unui personaj, sau al unui moment de referinţă.

Partea de mister, ceea ce este ascuns curiozităţii muritorilor

On Octombrie 19, 2012

Fără vastitatea spaţiului neînţeles, realitatea ar rămâne comprimată într-un punct insignifiant.

- Kuk şi Kauket înseamnă spaţiul infinit cufundat în întuneric, înainte de crearea luminii.

- Oare nu în acest spaţiu fără limită se va realiza crearea lumii sensibile?

- Desigur.

- Căci, fără acest spaţiu, nimic nu poate să aibă întindere şi totul se reduce la un punct minuscul. Nu crezi?

Leadership: Ce simbol are puterea să reflecte o conexiune profundă între tine și forțele universale, marcând un punct de transformare personală prin vizualizarea interioară?

Keops încuviinţă cu o mişcare a capului. Apoi întrebă:

- Dar nu ştiu să spun nimic despre Amon şi Amaunet. De ce acest cuplu divin este ascuns? Dacă este ascuns, nu poate să apară vederii noastre, şi de ce, dacă este, nu se manifestă?

- Tocmai aceasta este partea de mister, ceea ce este ascuns curiozităţii muritorilor. Află că toate aceste aspecte ale universului, care se situează la baza totalităţii sale, se află în Thot, ele constituie natura secretă a lui Thot. Dar continuă şi spune-mi ce ştii despre creaţie după cum o descriu preoţii de la Hermopolis.

- Cred că am înţeles că în Toth lipsit de formă - care era Thot primordial, ceea ce denumim prin Tatenen - era un ou, un ou enorm, care s-a ivit din haos ca să se deschidă ca o floare de lotus. Şi din această floare care s-a deschis în prima dimineaţă a lumii, a ţâşnit soarele, s-a născut Ra, asemenea unui nou-născut, care iese din pântecele mamei sale.

Leadership: Crezi că revelația unei dinamici între "ascuns" și "manifestat" îți poate oferi un nou cadru de referință în cadrul căruia poţi să evaluezi și să valorizezi aspectele mai subtile ale experienței tale umane și spirituale?

- Este un simbol şi acesta e modul în care e prezentat. Dar, în realitate, nu e mai curând lumina care a străpuns întunericul? Sau lumina care se va răspândi prin golul universului, ca să-l umple cu prezenţa ei, ca să-i dăruiască substanţa sa?

- Ceea ce numești gol al universului, nu este oare spaţiul în care se va putea manifesta creaţia divină? întrebă atunci Keops.

- Keops, prin aceste consideraţii ţi-ai dovedit forţa gândirii, căci începi deja să te apropii de mister, zise Ibebi. Te voi lăsa din nou singur, ca să poţi pătrunde şi mai adânc, prin propriile mijloace, în domeniul zeului ascuns.

Pentru un căutător al iluminării, întinderile nelimitate ale necunoscutului oferă cadrul pentru expansiunea existenței. Din abisurile întunericului se naște lumina cunoașterii și a creației.

Partea de mister, ceea ce este ascuns curiozității muritorilor, se adresează celor puţini care explorează ideea că ocultarea unor aspecte divine poate servi ca un reper vizual pentru a măsura progresul în înțelegerea naturii complexe și adesea enigmatice a realității.

În lumina acestor informații, cum îți imaginezi că impactul asupra percepţiei spirituale ar putea ghida înțelegerea ta despre "cele nemanifestate" și valorile lor intrinseci?

Partea empirică a cunoaşterii

On Iulie 20, 2021

Încearcă să realizezi o delimitare de normele "nescrise" ale utilizării tehnologiei, extinzând noțiunea de "credibil" la evenimentele din trecut care au un înțeles dincolo de actul lor de adoptare.

Am căutat ieri nişte aplicaţii de tipul "mp3 Cutter". Bineînţeles, pe GooglePlay am căutat prima oară. Şi în timp ce testam diferite aplicaţii, îmi amintesc c-am accesat o aplicaţie free trial, cu reclame. Şi apăruse la un moment dat o reclamă la nişte circuite electronice, interesant mod de promovare, dar fără nicio legătură cu muzica. Şi, fiindcă pe vremuri m-a pasionat domeniul, am dat click. Nu s-a întâmplat nimic, era o pagină oarbă. S-a închis brusc aplicaţia.

Şi uite aşa m-am ales la story pe Facebook cu o melodie românească, cu ritm de manea, unde artistul respectiv a dăruit lumii întregi "talentul" său nemăsurat. Abia mai înainte am observat ce mi-a apărut la story. Am şters imediat postarea, chiar dacă, ce-i drept, a fost prea târziu. Deja lumea văzuse ce aveam la story. Într-adevăr, ar fi tare liniştitor să asculţi o manea, dacă ţi-ar plăcea genul...Dar prefer un Haddaway.

Şi iată ce vreau să spun, ca s-o spun mai bine:

Distincţia dintre ceea ce se vede şi ceea ce este credibil se face după două criterii principale: sursa de obţinere a informaţiei şi modalitatea în care creierul procesează informaţia – trecând de la o idee la alta în loc de a gândi liniar.

Nu, nu eşti păcălit de tehnologie, ci trebuie să fii pregătit s-o cunoşti chiar şi când aceasta are un rol minor în viaţa ta. Aceasta este o lecţie pe care trecutul mi-a dat-o de nenumărate ori.

Leadership: Ceea ce ţi s-a întâmplat fără să te aştepţi este ceea ce vei putea să fructifici la nivel de cunoaştere, ca să ştii cum să abordezi dintr-o altă perspectivă lucrurile care ţi se întâmplă?

Într-adevăr. Nu știu cum a ajuns la story o melodie fără sens, fără ritm, doar fiindcă am dat click pe o reclamă. Iată, asta înseamnă să ajungă telefonul tău să fie condus de tehnologie, în timp ce tu încă nu eşti la curent cu pericolul din spatele tehnologiei. Poate că nici Facebook nu ştie cât de multe "minuni" se pot face cu ajutorul lui, fără ca el să-şi dea seama, fără să poată împiedica anumite influenţe din exterior.

În acest context nu prea este cazul să mă iau după reperele normale ale internetului, deci după reperele unei schimbări care păstrează fondul vechilor reguli de normalitate. Ci trebuie să fiu atent la normele şmechere, nescrise, care sunt general valabile când vine vorba de evaluarea şi testarea unui sistem informaţional, şi care totuşi sunt legiferate. Iar reperele mele puţine, dar cântărind fiecare în parte enorm, vor fi mereu toleranţa, raţiunea, moralitatea şi conştiinţa.

Cu toate acestea, probabil că se păstrează acel sentiment de superioritate chiar şi atunci când eşti păcălit" de tehnologie. De fapt, mulţi oameni păcăliţi de tehnologie devin tot mai încrezători în capacităţile tehnologice, având speranţa că pot folosi la rândul lor orice "şmecherie" în folosul ştiinţei pe care trebuie să şi-o însuşească tot mai mult - la modul cum

poate ea face anumite lucruri greu de acceptat.

Spun toate astea fiindcă nu este prima oară când tehnologia o ia înaintea cunoaşterii de care dispun, dar de fiecare dată am încercat să învăţ mecanismul din spatele tehnologiei şi să-l folosesc în scopul obţinerii unei mai bune cunoaşteri a etapelor evoluţiei metodei de cunoaştere ştiinţifică.

Superioritatea omului care îmbrăţişează ştiinţa rezidă în faptul că ceea ce este îndreptăţit să aprobe sau să respingă la nivel de noutate cuprinde experienţa sa anterioară în gestionarea unor provocări de tipul "keep only those things that carry a meaning beyond their sheer enactment".

Partea empirică a cunoaşterii se referă la activitatea propriu-zisă de cercetare şi manipulare a informaţiilor (care pot fi extrase din diverse instrumente web) astfel încât pentru adoptarea deciziilor legate de măsurarea performanţei personale să fie luate în considerare numai datele semnificative procesului coordonat şi condus de abilitatea de a rezista în faţa dezamăgirilor.

Cam aşa gândeşte un om care iubeşte tehnologia, chiar şi atunci când a fost păcălit de ea:
"Ceea ce mi s-a întâmplat fără să mă aştept este ceea ce voi putea să fructific la nivel de cunoaştere, ca să ştiu cum să abordez dintr-o altă perspectivă lucrurile care mi se întâmplă."

Partea fascinantă din spatele leadershipului

On Martie 12, 2020

Conţinutul vieţii sufleteşti este o culme a creaţiei de maturitate a artistului.

Adesea intru prin librăria din Palas. Răsfoiesc cărţi din domenii diferite. Prefer beletristica. Iar beletristicii nu-i trebuie expresii şi coduri secrete pentru a-şi câştiga cel puţin meritul de a fi răsfoită, sau chiar aprofundată de cei a căror curiozitate este destul de mare. Am învăţat un lucru important, adesea ignorat de mulţi scriitori. Frumuseţea unei cărţi nu stă în limbajul secret, gen Da Vinci code, sau metodele esoterice de informaţii cabalistice, de fapt limbajul artistic este începutul unei creaţii care trebuie s-o conturezi ca pe-o lecţie de maturitate. Te învaţă să fii mai lucid, mai deschis la minte. Mai bun. Mai înţelept.

Când eram student am citit "Faraonul" lui Prus, apoi "Egipteanul" lui Mika Waltari, apoi "Magul" de Wilbur Smith. Îndeosebi cărţi despre Egiptul antic, precum cele scrie de Gerald Massadie. Dar am recitit si "Ulise" de James Joyce şi "Numele Trandafirului" de Umberto Eco. M-am simţit ca un faraon dintr-un Egipt aflat într-o altă fază de evoluţie, permanent la altitudine în ceea ce priveşte mersul lumii, apoi m-am situat sub magia unui adorabil clișeu: "zeu-dumnezeu" care încă mă face să mă simt conectat la natura conţinutului spaţiu-timp. La un moment dat am fost un sclav care a devenit rege. M-am împotmolit totuşi la un anumit punct, şi anume acela când faraonul devine sclavul unei magii care este vizibilă numai în termeni de "joc al confuziilor".

Am învăţat un lucru. Degeaba ai înţeles limbajul secret, atât de secret încât mulţi nu-şi dau seama de el nici dacă ar citi biblia de 100 de ori. Ceea ce contează cu adevărat este triumful lecţiei finale, sau concluzia. Mai mult decât orice, contează povestea. Profunzimea ei. Simplitatea ei plină de profunzime. Relevanţa ei. Fantasticul. Morala. În faţa unui asemenea limbaj, datorită efectelor sale ascunse, de la simbolistică la meşteşug, este posibil ca citirea să capete sensul de autonomie a imaginii şi de relaţie mutuală între ea şi referent, imaginea fiind versiunea mărită a Egoului tău, în timp ce referentul este proiecţia Egoului tău într-o nouă realitate.

Leadership: Cât de fascinantă îţi pare perspectiva de a privi experienţele vieţii prin prisma capacităţii de sugestie a creaţiei artistice, încât să converteşti latențele de viziune asupra lumii în scena unui personaj care îşi scrie singur romanul?

Când citeam John Fowles, sau Victor Hugo, sau Alexandre Dumas, mă identificam cu personajul principal, trăiam aceleaşi emoţii pline de duioşie, simţeam aceeaşi durere sau bucurie ca a lui. Misterul. Iubirea. Învăţătura. Provocarea. Alteori simţeam că ating lucrurile pe care ştiam că le voi părăsi, dar pe care niciodată nu le voi uita. Fiindcă au rămas acolo, placute sufletului meu, adânc întipărite în conştiinţa mea, şi fiindcă sufletului meu îi place, iubeşte, admiră nespus profunzimea lor.

Aşadar iată secretul scrisului frumos, al beletristicii plină de simplitate: să ştii să inciţi cititorul, nu să încerci să-l readuci în centrul unei problematici interpretative. Parcursul pe care îl traversează personajul, pe care îl poţi cunoaşte din partea din spate a unui templu solemn, este mai important decât orice scriere secretă. Căci scrierii secrete îi lipseşte emoţia, adesea îi lipseşte povestea. Iar povestea este totul. Sau cel puţin, viaţa din spatele poveştii este cea care contează cu adevărat.

Viaţa bate filmul, bate orice poveste, fiindcă viaţa este transpunerea unei poveşti într-un film în care spectatorul se crede personajul principal, în vederea personalizării personajului principal după bunul plac. Este şi asta o magie, un fel de a încânta vederea căreia de atâtea

ori i se pare una, iar alta i se pare cu neputinţă.

Leadership: Perspectiva cu care îţi priveşti fascinanta experienţă de viaţă este lăsată la latitudinea capacităţii tale de a-ţi converti latențele de expresivitate într-o creație care se desfăşoară pe orizontală?

Fii tu povestea pe care o citeşti despre alţii. Fii tu scriitorul care scrie povestea. Fii scrierea fără de care povestea nu ar putea exista. Învaţă să fii tu, învăţând din viaţa altora cum să fii tu o poveste. Şi doar atât. O creaţie care se desfăşoară pe orizontală este parcursul drept pe care îl urmezi evoluând de la mărturisirile unui personaj fictiv, la înţelegerea modului de trăire unei vieţi care întrece povestea.

Latenţele de expresivitate sunt date de puterea sufletului tău de a se conecta la tot ce înseamnă "eveniment unic şi întâmplător", de însuşirea artei de a sonda mai adânc psihologiile diverse, încât raza creaţiei ce măsoară reprezentarea ca atare a capodoperei finale să capete caracteristica înţelepciunii. Să nu uităm definiţia dată de cineva pe internet, "expresivitatea este reprezentarea lingvistică a imaginaţiei şi a afectivităţii".

Asta este singura mea înţelepciune. E tot ce-am învăţat din toate cărţile bune. Şi îmi pare bine că le-am citit şi le-am trăit doar pe cele excelente. Şi îmi pare bine că am înţeles înţelepciunea, atât de rar dobândită numai prin citit şi prin scris, prin faptul că am ştiut să fac distincţia între calitate şi kitsch, între o pledoarie pentru firesc şi o compilaţie de viziuni incisive.

Iar datorită faptului că tot ce-am citit bun ar putea fi cuprins într-o singură carte, gen "Duma Key" de Stephen King, în chip de explicaţie adusă creaţiei scriitoriceşti, mă simt dator să mă consider măsura principală a evaluării, judecării şi aprecierii unor constatări cu care se poate înţelege elementul „surplus cognitiv" din filosofie. Omul înţelept este conţinutul cărţii pe care o are în suflet, urmându-i sfaturile ca o privire aruncată asupra propriilor scrieri.

Leadershipul, în viziunea unui scriitor, reprezintă o treaptă în urcuşul spiritual al lumii recunoscută prin dobândirea unei noi înţelegeri asupra cunoaşterii ce porneşte de la experienţa vieţii (condensată într-un format de expresivitate) şi se continuă cu povestea unui personaj de poveste care îşi ridică viaţa la nivel de capodoperă a creaţiei.

Partea fascinantă din spatele leadershipului vizează aspiraţia creaţiei tale de a se exprima într-un cuvânt, "POVESTE", legat de următoarea lecţie de maturitate: nu poţi fi păzitorul înţelepciunii înalte până ce nu-l imiţi pe cel mai bun personaj din cartea care te preocupă într-un mod aparte.

Partea întâi a leadershipului

On Ianuarie 18, 2013

Exercită-ţi puterea de a fi stăpânul evenimentelor care te mută din zona de confort, fără să te ancorezi la o compromitere a caracterului ce nu corespunde viziunii echilibrate a unui drum spre mai departe.

Prin timpul liceului am citit romanul "Hannibal Ante Portas" scris de Slavomir Nastasijevic, fiind o creaţie nelipsită din biblioteca unui lider, în preajma nevoii de a mă deprinde cu învăţătura aleasă a marilor luptători. De fapt, s-ar spune că cea mai mare ispravă a unui luptător este putinţa de a se raporta la o creaţie aducătoare de inspiraţie şi înţelepciune plină de învăţături alese.

Și erau descrise unitățile armate romane. Niște grăsani, îndestulați, dotaţi cu echipamente grele și sofisticate, care abia aveau puterea să urce pe cai. Un om care se luptă cu propria greutate fizică îşi poate cu greu justifica amplasarea în câmpul de manifestare a experienţei de a lupta împotriva altora, oricât de sofisticate ar fi armele sale.

De cealaltă parte, unitățile lui Hannibal, slabi, nemâncați, dotați cu arme ușoare, fără prea multă instruire militară, dar foarte buni atleți. Unei schimbări de viziune nu-i trebuie arme grele ca să se materializeze într-o mutare spectaculoasă.

Și când se încingea câte o luptă pe viață şi pe moarte, cu toate că romanii aveau avantaj de 3 contra 1, erau în scurt timp aproape toți masacrați. Nu aveau nici rezistență, nici agilitate, de fapt nu aveau nici măcar puterea să coboare de pe cai ca să-şi ajute răniții.

Și uite așa se face, că cei care au mult sunt atât de ușor de învins de cei ce nu au aproape nimic, tocmai pentru că au totul... în afară de puterea de a lupta.

Leadership: Este posibil ca pe parcursul următoarelor tale stadii de educare, consistente şi decisive, să faci un pas înainte spre construirea unei imagini de sine care să producă schimbări semnificative acestei imagini?

Dacă vrei să fii un învingător, ferește-te să stai printre cei ce au de toate, printre cei dotaţi cu instrumente sofisticate, deoarece caracterul cel mai puternic nu se câştigă decât prin luptă, iar lupta are un singur reproş: îi lipseşte armele cele mai bune. Pentru ca o armă să ia forma unei viziuni şi să se materializeze într-o mutare spectaculoasă (dintr-o schimbare de situaţii), asemenea unui trofeu obţinut prin mari eforturi, trebuie ca modul ei de folosire să fie completat de o practică serioasă, de manifestarea unei reacții emoționale în comportament, în diverse privințe și situații specifice.

Arma cea mai aleasă a unui lider este calitatea caracterului de a fi matur, rezistent şi înţelept, determinând o atitudine mai îndârjită asupra atingerii anumitor scopuri, ocupându-şi locul în dreapta imaginii unui spadasin care, cu o singură sabie, trebuie să-şi învingă adversarii fără să-şi scoată sabia din teacă. Aşadar, caracterul este o armă care nu trebuie folosită doar din punct de vedere fizic, ci mai ales spiritual, adică prin crearea unei imagini de sine foarte puternice care se proiectează în exterior ca un adevărat tsunami.

Când ne gândim la o armă de temut, ne gândim la o imagine a luptătorului care îşi condiţionează adesea dispoziţia datorită structurii sale stabile sau instabile. Imaginea poate surprinde o totalitate a însuşirilor psihice şi morale ale individului înzestrat cu înţelepciune,

manifestate în comportamentul şi acţiunile sale, în atitudinile şi poziţia sa faţă de alţii, numai dacă ea înfăţişează o întâmplare neobişnuită, dar care nu are consecinţe grave.

Caracterul este imaginea care te înfăţişează ca un luptător prin spirit şi atitudine, nu neapărat ca un luptător ţinând în mână o sabie ascuţită.

Leadership: Imaginea cu care îţi îmbogăţeşti personalitatea este un produs al multor variabile controlabile, aflate în relaţie cu orientarea ta spre transformarea viziunii într-o realitate care nu cere sacrificii?

Haideţi să luăm alt alt exemplu.

Cine dă din mâini și din picioare mai mult și mai tare: cel care e pe cale să se înece sau cel care pescuiește în barcă liniștit?

La fel este și cu cei din urmă care nu au nimic, care dar ajung să conducă o lume întreagă: ei dau mai mult din mâini și din picioare decât toți ceilalți care au totul.

Ferice de cei din urmă sau de cei ce n-au nimic, fiindcă ei vor fi cei dintâi și cei care vor conduce pământul.

Sunt în măsură să trag o concluzie. Cu cât ai mai puțin, cu atât îți dorești mai mult. Cu cât îți dorești mai mult, cu atât faci mai mult. De la puțin se ajunge la mult.

Aşadar, prima variantă controlabilă a personalităţii tale, sămânţa care stă la baza realizărilor mari, este însăşi starea sufletească pe care o simţi când râvneşti sau aspiri către ceva. A doua variantă, ca o consecinţă firească a tendinţelor evolutive, o trăsătură evident pozitivă pe care trebuie să o foloseşti în favoarea ta, este acea forţă de rezistenţă de care trebuie să dai dovadă în momentele nefaste ale vieţii.

Apelând permanent la atitudinea care strigă "pot să devin mult mai mult decât sunt'", ca evaluare continuă a realizărilor tale care rezistă tendinţelor de frământare sau de incertitudine, vei putea să străbaţi drumurile vieţii fără să te simţi rănit sau exploatat de circumstanţele şi vicisitudinile vieţii.

Deviza liderilor este aceasta: "Voi răzbi în viaţă cu nevoia de a-mi controla lumea, fără teama de a mă confrunta cu schimbări majore, încât să materializez viziunea unei evadări din filme, încât să-mi atribui modul de a fi unei realităţi care scapă mereu celorlalţi din vedere".

Partea întâi a leadershipului surprinde legătura dintre caracter şi atitudine, exprimată prin intermediul celor trei identificatori: viziune, dorinţă şi capacitatea de a face sacrificii. Caracterul de învingător poartă amprenta unei atitudini pline de demnitate, autocontrol, înţelegere, fiind investit parcă de la natură cu capacitatea de a creşte dorinţa de împlinire a unei viziuni care dă coerenţă şi sens sacrificiilor, credinţei şi faptelor îndrăzneţe.

Source: https://neculaifantanaru.com/partea-intai-a-leadershipului.html

Partea specială a leadershipului

On Aprilie 08, 2008

Evaluează-ţi potenţialul de lider în aşa fel încât produsul creaţiei pe care o experimentezi prin procesul de partajare al resurselor (viziune, abordare şi concept) să se orienteze spre numeroase posibilităţi de extindere a conţinutului ei.

Metoda de lucru a celor doi artişti funcţionează perfect, fără asperităţi. Colaborarea are întotdeauna opt momente succesive precise. Mai întâi Serghei Eisenstein îi arată celebrului compozitor, Prokofiev, montajul secvenţei. Apoi secvenţa se cronometrează şi regizorul îşi expune dorinţele faţă de muzică. Îşi exprimă plastic aceste deziderate: "Iată, aici trebuie să sune aşa ca şi cum cineva i-ar smulge unei mame copilul din braţe", sau "să faci să se audă aşa cum ai lovi un dop de o sticlă". Prokofiev se arată totdeauna încântat de asemenea indicaţii plastice.

*Apoi compozitorul se întoarce în camera sa de hotel din Alma-Ata, unde transpune cronometrajul notat într-un anumit număr de măsuri în funcţie de tempo-ul pe care urmează să-l aibă muzica secvenţei. Pe plan se află atunci un metronom, un cronometru şi coli nescrise încă, însă cu portativele împărţite în măsuri şi mâzgălite cu tot felul de însemnări pe înţelesul lui doar. Odată fixate astfel cu precizie cadrele compoziţiei, Prokofiev compune muzica ce se înscrie în această reţea de măsuri calculată prealabil. **

Leadership: Ai înţeles că tot ceea ce există în exteriorul tău serveşte clipă de clipă drumului tău de autodescoperire prin creaţie, luând în considerare plasticitatea unei exprimări autentice?

O perspectivă modernă a creaţiei pe care o experimentezi (ca pe o aventură minunată într-o lume cu totul nouă) contribuie considerabil la dezvoltarea activităţii cognitive pusă în slujba unei dezvoltări progresive a noţiunilor ce pun în evidenţă o exprimare autentică a emoţiilor şi gândurilor.

Însăşi compoziţia diverselor abordări şi cunoaşterea noţiunilor este o provocare şi o oglindă a ta însuși ca individ creator. Numaidecât, această perspectivă modernă a creaţiei trebuie să cuprindă setea de a expune o viziune mai apropiată de libertatea de exprimare, posibilități remarcabile de dezvoltare a unui conţinut valoros, concret şi interactiv, care însumează o serie de dorințe refulate investite de artist în mesajul operei sale.

Bineînţeles, transferul emoţiilor şi a viziunii către alte persoane, prin intermediul creaţiei artistice, explică modul în care pot apărea mijloacele plastice (linie, culoare, sunet) în viața de zi cu zi. De exemplu, atunci când întâlneşti o persoană nouă care îţi amintește de altcineva, numaidecât amintirea respectivă îţi furnizează o informaţie, o sugestie, o anumită particularitate vizavi de anumite fenomene, consecințe ale acțiunilor și procese simple, înrudire cu influenţele artei, care se întind prin întregul domeniu al creaţiei artistice.

Or numai într-un context dăunător personal, sau într-un context social care nu predispune la evoluţie intelectuală, poate fi descris transferul emoţiilor şi a viziunii ca o problemă de veridicitate, ca o tendinţă subdimensionare a formei pe care o dai conţinutului creaţiei tale. Această perspectivă a viziunii unplută cu un substrat nisipos, fără pretenţii de exclusivitate în divulgarea unor informaţii de calitate, a unor convenţii şi clişee de limbaj, poate să genereze o multitudine de cercetări şi experimentări care luminează modul în care oamenii tind să repete tiparul de relații dintre ideologie şi modul în care aceasta construieşte noul imaginar al colectivităţii.

Aşadar, produsul creaţiei pe care o experimentezi prin procesul de partajare al resurselor (viziune, abordare şi concept) şi care poate să se orienteze spre numeroase posibilităţi de extindere a conţinutului ei este strâns legat de reflectarea asupra diverselor abordări ale situaţiilor de viaţă pe care le-ai putea integra, din punctul de vedere al analizei, într-un domeniu teoretic sau practic.

Prin urmare exteriorul tău serveşte drumului de autodescoperire prin creaţie atunci când ceea ce intră în conţinutul acesteia poate să ofere indicaţii preţioase cu privire la caracteristisile, scopurile şi acţiunile ce conduc la dezvoltarea ideii de valorificare a viziunii pe care o redai despre artă şi despre relaţia ei cu viaţa.

Bine spunea cineva pe observatorcultural.ro, că marile întrebări ale vieţii sunt despre artă şi despre relaţia acesteia cu viaţa, despre „fiinţa jucând un rol" şi relaţia dintre estetic şi etic, despre acţiunea şi inima omului privite ca mister, teatrul ca falsitate şi, deopotrivă, autenticitate, toate acestea constituind temele care construiesc corpul creaţiei şi care îi conferă şi o miză de relevanţă teoretică.

Partea specială a leadershipului reiese din actul redescoperirii sinelui ca o privire aruncată asupra lumii din jur din care cel mai adesea se descifrează semnificaţiile profunde ale artei, misterele şi particularităţile creaţiei.

Iar aici intervine plasticitatea unei exprimări autentice care prevede faptul că tot ceea ce observi şi tot ceea ce cunoşti se poate transpune într-un limbaj a cărui miză este recunoaşterea potenţialului de a da naştere unoi noi dimeniunii a profunzimii în om şi în artă, unor noi tendinţe de creaţie, şi unei viziuni autentice capabilă să etaleze o gamă largă de mijloace de expresie, precum: cuvintele, mesajele verbale, ideile frumos conturate, concepții a unei noi forme de sine individual, imaginile unei noi percepţii ale realităţii.

Particularităţile ştiinţei

On Iulie 27, 2016

Nu poți să dai valoare propriei tale reacţii asupra realităţii, fără să arăţi valoarea infinită a rezistenţei tale în faţa necunoscutelor ei.

Epidemia se răspândeşte vertiginos, tot mai mulţi indivizi sunt blocaţi într-un soi de moarte parţială, o stare de unificare cu răul cel mai agresiv, malign ca un cancer subtil de care nu-ţi dai seama că eşti infectat până ce nu te transformi într-un *undead being* . Virusul continuă să rămână la fel de încifrat, de neoprit, *an evil among all things that are done under the sun* , al cărui efectul atipic devine atât de presant că nimeni nu-l mai putea tăinui, sau nega.

Numai un suflet rătăcitor priveşte cu ochii senini înspre acolo unde ştie că nu va ajunge - în iad, fiindcă el însuşi este antidotul acestei molime care transformă orice fiinţă într-un animal feroce. Numai Gerry Lane, un investigator, un curajos al acestei sorţi plină de vină, numai acest savant care în adâncul inimii sale crede în marea suveranitate a ştiinţei, are dreptul să găsească provocări cheie în formularea necunoscutelor unei lumi virusate de un factor nemaiîntâlnit.

Dar înainte de a-şi implica în luptă toate forţele raţiunii, atenţiei şi analizei cele mai eficiente, el are de ales între două decizii majore: hotărârea neînduplecată de a trăi în continuare pentru un scop medical *"to find the cure"* , sau de a trăi pentru totdeauna infestat, ca un damnat, egal cu un *"undead being created through the reanimation of a human corpse".*

În realitatea unei lumi decăzute, numai chimistul care se manifestă prin particularităţile ştiinţei, prin prisma unui algoritm de diagnostic bazat pe analiza complexă a profilului celor ocoliţi de virus, și totodată prin revelarea formulei unei substanţe organice complexe, determinată dintr-o probă de sânge recoltată din propriul organism însămânţat cu un catalizator de reacţie, are şanse de supravieţuire şi de leadership. *****

Leadership: Te asiguri că imaginea pe care o deschizi asupra provocărilor din viața ta are o valoare ridicată, folosind opţiunea „ *On* " sau opţiunea „ *Off* " din sfera experienţei de a te situa deasupra propriei naturi?

Cel care umblă pe calea sinuoasă a luptei dintre două decizii capitale, sub pretinsa lor coexistenţă contradictorie, datorează responsabilitate atât faţă de sine cât şi faţă de lume, fără să se vulnerabilizeze. Un asemenea individ se supune proceselor de gândire raţională, de analiză şi discernământ, care îl fac să privească altfel lucrurile și situaţiile, ajutându-l să-și găsească un echilibru în ceea ce presupune identificarea elementelor care determină o anumită atitudine și o anumită certitudine.

Asigurarea puterii personale într-o formă optimă de răspuns la efectele de ordin psihologic și la divergenţele de ordin identitar, printr-o reglare a oglinzii realităţii (de unde apare și o anumită comparație a elementelor secundare ale cauzei cercetate) este una din variantele de a accede la leadership. Psihologia este o parte a identităţii care spune: „Nu te închina unei realităţi din care a fost omisă viziunea şi influenţa ta asupra ei."

Prim planul în care ești surprins în mijlocul evenimentelor, te încadrează în una din cele două decizii majore: hotărârea neînduplecată de a trăi mai departe pentru un scop, sau de a trăi pentru totdeauna ca o victimă. Liderul nu se recunoaşte după scopul propus în mijlocul evenimentelor devastatoare, ci în maturitatea şi creativitatea cu care ia deciziile majore: să se autosurprindă în prim planul unei trăiri care, folosindu-se de toate ale lumii acesteia,

transcende toate legităţile ei.

A te situa deasupra propriei naturi înseamnă să faci din perspectiva trăirii la limita unor experienţe inedite, reale şi intense, conştiinţa unei noi demnităţi şi încrederi de propăşire chibzuită şi temeinică spre idealurile unui viitor mai fericit. Să luăm în considerare ce înseamnă natura fiinţei situată la limita perspectivelor neprevăzute, încât să descoperim în orice experienţă trăită la maxim potenţialul unei conştiinţe noi, dispusă să evolueze, pe această cale sporindu-ne încrederea şi demnitatea faţă de valorile reale ale vieţii.

Experienţa de a te situa deasupra propriei naturi aparţine fiinţei superioare prin faptul că evenimentele la care se raportează progresul ştiinţei tale de predicţie sunt trăite la nivel de sentiment şi conştiinţă.

Totodată, prim planul relevă o câştigare a esenţialului tău prin experimentarea unei stări de compatibilitate sau incompatibilitate cu prezentul incert, și aduce în atenție un fenomen adesea ignorat de practicanţii de leadership: nu poți să dai valoare propriei tale reacţii asupra realităţii, fără să arăţi valoarea infinită a rezistenţei tale în faţa necunoscutelor ei.

Imaginea pe care o deschizi asupra provocărilor din viața ta poate avea o valoare ridicată folosind opţiunea „On" atunci când te manifeşti cu încredere prin particularităţile ştiinţei care pot îmbunătăţi răspunsul dat de factorii de decizie. Probabil, provocările vieții constituie imaginea unei deschideri spre viitor ce poate pune în valoare adevărul ridicat de ştiinţă, cum că "ceea ce descoperi este doar o mică parte din giganticul munte pe care trebuie să-l mişti din loc."

Sau, aceeaşi imagine poate avea o valoare ridicată folosind opţiunea „Off" atunci când nu reușești să anticipezi efectul ei de bază, sau când efectul ei nu aduce în contact toate capacităţile tale: în primul rând raţiunea de a te servi de condiţiile de dezvoltare și de replicabilitate ale efectului general, pentru a reuși să te conduci spre o altă traiectorie a cursului vieții tale.

Leadershipul înseamnă să-ţi asumi concluziile unor experienţe de viaţă negative din perspectiva trăirii intense, autentice, a unei fiinţe superioare care ştie să facă din domeniul ştiinţei o atitudine echilibrată, calmă, raţională, în orice fel de situaţie.

Particularităţile ştiinţei sunt coerent expresive numai în raport cu ansamblul impulsurilor, sentimentelor, dorinţelor şi ideilor, aflate de multe ori în discordanţă, în faţa unei realități de neevitat.

Partida de cărţi a lui Danton

On Octombrie 09, 2010

Pune-ţi leadershipul la bătaie, înclinându-te în faţa măreţiei lumii şi a propriei tale fiinţe.

Sala răsuna ca un ecou al strigătului scos cu o zi înainte pe câmpul de luptă de la Valmy. Se ridică Georges Jacques Danton, care era unul dintre conducătorii revoluţiei. Se făcu linişte.

- Nu poate exista o altă constituţie decât aceea care va fi acceptată întocmai, cuvânt cu cuvânt, de către majoritatea adunărilor simple. Să împrăştiem acele fantome fără rost care vor să înfricoşeze lumea; să spunem că nu există altă constituţie decât aceea care este acceptată de către popor.

Cu alte cuvinte, Danton a vrut sa promoveze două idei:

Leadership: Ideile pe care vrei să le transformi în realitate pot să-ţi ofere o conștientizare profundă a fenomenelor care te înconjoară, ceea ce îți va permite să evaluezi imparţial obiectivele unei alte dimeniuni a demnităţii?

Destinul distribuie cărţile, spunea odată un mare scriitor. Iar un bărbat cu experienţă acceptă cărţile pe care destinul i le-a dat, le priveşte cu atenţie, le apreciază, apoi hotărăşte singur dacă trebuie să joace sau nu. Dar, atenţie ! Singur nu îţi poţi distribui cărţile odată ce accepţi cu demnitate fatalitatea destinului privind hotărârile pe care trebuie să le iei ca să readuci ordinea în viaţa ta sau a celorlalţi, sau ca să te asiguri că nu te pierzi în uitare şi în anonimat la fel ca alţi lideri ce au trăit experienţa iluziilor de putere.

Danton a fost unul dintre oamenii a căror misiune, atât de periculoasă, şi în acelaşi timp mortală, le-a dat prilejul să schimbe cursul evenimentelor, transformându-i în lideri cu calităţi definitorii (precum capacitatea de a gândi strategic şi de a previziona), şi în final făcând din ei înşişi nişte eroi. El şi-a pus în valoare demnitatea prin simţul moral, prin discernământul moral şi tenacitatea morală de a înfăptui schimbări importante, ramând în picioare în faţa piedicilor societăţii în care trăia. Totodată, el şi-a exprimat libertatea de a lua decizii cu privire la propria viață și de a fi respectat pentru acest drept (până la un punct).

Dar pentru a fi “un om mare”, Danton a trebuit să se angajeze într-o partidă în care avea puţine şanse de izbândă, fiindcă duşmanii săi şi ai poporului i-au pus nenumărate piedici. Singur şi-a pus viaţa în mare primejdie. Aceasta este o altă dimensiune a demnităţii: să ştii să te sacrifici pentru un ideal. Iar Danton a evaluat imparţial obiectivele acestei dimensiuni, punându-se el însuşi drept garanţie a înfăptuirii libertăţii depline, ca un judecător pregătit şi capabil să ignore ideile preconcepute legate de vinovăţie care ar putea apărea ca urmare a unor reacţii adverse din partea celor neimplicaţi în schimbare.

Demnitatea este rezistenţa pe care o opui evenimentelor ce pot declanşa o criză socială, cu precizarea că tot ceea ce te întăreşte moral şi spiritual este capacitatea de a te abandona în favoarea unui țel mai înalt.

Conform Wikipedia: "Georges Jacques Danton era îndrăzneț și hotărât, un orator strălucit, dar totodată avea o fire oarecum dezechilibrată. Idealurile sale erau libertatea și proprietatea. Fiind întemnițat în închisoarea Luxemburg, Danton nu a plecat capul în fața dictatorului Robespierre. Vestitele lui fraze: *„... cu 12 luni în urmă am propus să fie instituit acest tribunal revoluționar. Acum îmi cer scuze pentru asta de la Dumnezeu și de la oameni” și*

„Robespierre va urma după mine” , arată disperarea, dar și tăria de caracter a „gigantului” Revoluției franceze."

Leadershipul este o miză extraordinară, este lucrul cel mai de preţ pe care un om îl poate risca. Căci o dată cu poziţia înaltă pe care ajungi să o ocupi, se încheie orice capitol anterior al vieţii tale. Trebuie să te înclini în faţa măreţiei lumii, să distrugi acel talisman a cărui forţă magică este în stare să te golească de toate emoţiile, de toate energiile pozitive, de tot ceea ce ai mai bun în tine, şi să-ţi închidă calea către performanţă, eficienţă şi succes.

Dacă nu te dovedeşti a fi un jucător de toată isprava te vei duce la vale, tot aşa cum corăbiile prost construite se scufundă la prima furtună. Aşa cum o fotografie este în stare să-ţi imortalizeze o anumite stare, o anumită ipostază, tot aşa şi poziţia de lider pe care o capeţi poate să-ţi îngheţe conştiinţa şi să-ţi distrugă valorile pe care se sprijină relaţia ta cu oamenii, să te facă nepăsător şi chiar ostil faţă de scopurile nobile pe care ţi le-ai propus iniţial să le atingi, să te împingă spre cel mai mare eşec.

Cineva spunea: *"Cel ce ocupă o funcţie importantă, datorează socoteală pentru toate acţiunile, pentru fiecare clipă a lui, deoarece el nu-şi mai aparţine, fiind al tuturor, fiecare nou drept al lui se transformă, de fapt, într-o nouă îndatorire.”* Pentru a câştiga în leadership trebuie să joci cu strategiile cele mai bune, să cunoşti cărţile partenerilor şi ale adversarilor, să ţi le joci pe ale tale la momentul potrivit şi să pui mâna pe miză cu duhul înţelepciunii.

Leadershipul este nu este calea de a te opune unui război cauzat de anticiparea schimbării, ci este expunerea ta în faţa evenimentelor care scriu istorie, cu precizarea că ceea ce te poate opri din drumul spre atingerea obiectivelor nu este altceva decât teama de „ce ar putea spune ceilalţi”. (Iar această teamă ar putea fi doar în mintea ta.)

Partida de cărţi a lui Danton evidenţiază extraordinara capacitate a liderului de a se pune în valoare, alegându-şi singur traseul înspre obiectivul ce trebuie atins şi “finanţându-şi” singur evoluţia prin alegerea celor mai eficiente practici, prin cele mai adecvate mijloace de promovare a unui ideal înalt.

Danton nu a aşteptat ca destinul să-i ofere “o mână bună”. El s-a lăsat antrenat în jocul evenimentelor, luând parte la ele cu trupul şi cu sufletul, cu mândrie şi cu un sentiment de împlinire, cu onoare şi discernământ, fără să fi avut cărţi de aceeaşi valoare, adică excelente. A fost voinţa şi dorinţa lui, dar a avut şi onoarea să lupte până la ultima şansă. El şi-a pus leadershipul la bătaie, înclinându-se în faţa măreţiei lumii şi a propriei sale fiinţe.

Fii măreţ cu tine însuţi, dar şi cu ceilalţi. Fii măreţ în practicile tale, în credinţele tale, în concepţiile tale, ca sa poţi în final să direcţionezi desfăşurarea „partidei de leadership” în folosul tău, înspre evoluţia ta, dar care să încline şi înspre beneficiul celorlalţi.

Concluzie: Dacă ai fost ales în postura de lider, înseamnă că ai consimţit să ocupi această poziţie. Prin urmare trebuie să-ţi evaluezi capacitatea, disponibilitatea şi forţele ca să îndeplineşti tot ceea ce oamenii aşteaptă de la tine. Este “un loc” de onoare, dar implică şi multe responsabilităţi. Ai fost investit cu încredere şi trebuie să te străduieşti mult pentru ca încrederea oamenilor să nu scadă. Este un “joc” palpitant în care însă trebuie să intri doar dacă ştii că deţii atuurile necesare pentru a câştiga.

Partida de şah

On Iunie 28, 2010

Sporeşte tăria caracterului tău, menţinându-ţi în permanenţă echilibrul psihic şi moral desăvârşit.

2 aprilie 1520. Nici o altă navă nu ajunsese vreodată într-un punct atât de avansat al Sudului, ca flota lui Fernando Magellan. Acesta, ştiind că flota lui va putea ajunge abia după multe luni in regiunile tropicale roditoare, ia o decizie contrară dorinţelor membrilor echipajului său de pe cele cinci corăbii. Ordonă ca raţia zilnică de mâncare să fie redusă simţitor, iar alimentele să fie păzite cu străşnicie.

Faza de deschidere. Fantastică îndrăzneală. Tocmai aici, la capătul lumii, să îndârjeşti echipajul pe care şi aşa l-ai supus atâtea luni celor mai grele condiţii, în căutarea unei himere. Oamenii nu s-au arătat câtuşi de puţin dispuşi să accepte o asemenea constrângere, conştienţi de faptul că măcar un sfert dintre ei vor trebui să moară pentru triumful acestui comandant înverşunat până la absurd, pătimind de foame, de frig, de oboseală şi lipsuri.

Fără îndoială, vina acestei situaţii primejdioase îi aparţinea în totalitate lui Magellan, care nu ştia (n-a ştiut niciodată) drumul spre strâmtoarea pe care a făgăduit că o va găsi. Iar el nu putea mărturisi adevărul: „M-am lăsat indus în eroare de rapoarte false şi v-am dus pe o cale greşită". În consecinţă, căpitanii lui Magellan (Gaspar Quesada, Luis de Mendoza si Antonio de Coca) au decis să se răzvrătească, căci nu era în joc numai propria lor viaţă, ci şi a echipajului pus sub comanda lor din ordinul regelui.

Leadership: În apropiere de ţelul tău îţi negjlijezi teama de a nu-ţi murdări imaginea printr-o recunoaştere a unei greşeli sau prin cererea de a fi iertat, sub presiunea nevoii de a lua o decizie rapidă şi nepopulară?

O mutare nepermisă de regulament. Cei trei căpitani ştiau că trebuie să aibă de partea lor puterea, pentru a pune la zid un adversar atât de temerar ca Magellan. Trebuiau, deci, să acţioneze ferm.

După ce s-au stins toate luminile, cele cinci corăbii s-au adâncit în bezna acelei nopţi lungi de iarnă. Nimeni nu putea să vadă nimic în apăsătoarea întunecime şi nu putea auzi nimic din pricina izbiturilor furioase ale valurilor în flancurile navelor. În acel moment, o barcă plină de marinari înarmaţi, printre care şi cei trei căpitani, s-a desprins încetişor de una dintre corăbii şi s-a apropiat pe nesimţite de nava *San Antonio.*

Lovitura dublă. Planul a fost cât se poate de bine pus la punct, executat fără greş. Nefiind nicio strajă de noapte pe San Antonio, agresorii s-au putut căţăra pe bord cu ajutorul scărilor de funii, preluând controlul navei. Toţi portughezii de pe bord au fost puşi în lanţuri: astfel cei mai credincioşi partizani ai lui Magellan au fost scoşi din luptă.

Dimineaţa, o barcă cu cinci marinari, s-a apropiat de nava lui Magellan. Aceştia i-au înmânat o scrisoare lui Magellan prin care Gaspar Quesada, unul dintre cei trei căpitani rebeli, îi comunica faptul că sub conducerea lui se aflau acum trei din cele cinci nave, şi că dacă vrea să-şi continue călătoria trebuia să-i îndeplinească toate pretenţiile.

Leadership: Puterea autenticităţii tale de a nega gravitatea realităţii imediate este subordonată năzuinței de a-ţi îndeplini obiectivele până la capăt, cu riscul de nesocoti o

regulă care a fost acceptată şi recunoscută unamim de cei din jur?

Şah la rege. Lui Magellan nu-i venea a crede: *San Antonio* , peste noapte, a ajuns in mâna rebelilor. A fost luat prin surprindere. Îşi dădu imediat seama de gravitatea primejdiei. În afară de neînsemnata nava *Santiago* , toate celelalte trei fuseseră preluate de rebeli: *San Antonio, Conception şi Victoria.* Partida părea pierdută.

Două alternative avea Magellan: să capituleze, adică să ajungă la o înţelegere cu căpitanii spanioli şi să le accepte toate propunerile, sau, a doua variantă, să creeze o ameninţare care să-l oblige pe adversar să se retragă din joc. În amândouă situaţiile, el trebuie să-şi asume riscul de a nesocoti regula de bază a unui căpitan: aplanarea conflictelor. Cu toate acestea, el recurge la o variantă de mijloc. Trebuie să-şi câştige credibilitatea de a sugera adoptarea unei abordări alternative, speculând tot timpul conflictele de interese care apar în situaţiile de cumpănă.

Precum un şahist experimentat, Magellan a apreciat rapid situaţia nou apărută calculând într-un timp relativ scurt cele doua variante, apoi o alege pe cea optimă: va încerca un contraatac împotriva adversarului, o contralovitură hotărâtoare care să-i paralizeze pe răzvrătiţi. Dar el nu porneşte la atac cu toată impulsivitatea, ci întreprinde ceva nespus de primejdios. Dacă rebelii au atacat în întunericul nopţii, el va face totul la lumina zilei, chiar sub ochii lor.

Singurul accesoriu care trezeşte sentimentul mândriei şi decide felul naturii caracterului tău este satisfacţia eventuală ce izvorăşte din neţinerea de cuvânt, spre dobândirea puterii de a te autoorganiza eficient.

Un şahist profesionist apelează deseori la pioni în vederea străpungerii dispozitivului de apărare constituit de adversar. Pionii, deşi sunt piesele cu cel mai slab potenţial de pe tabla de şah, pot să creeze o ameninţare cu caracter decisiv, cu condiţia ca fiecare pas al lor să fie bine cumpănit.

Mai întâi Magellan îi reţine pe marinarii ce i-au adus scrisoarea şi le confiscă barca. Apoi îmbarcă în ea şase oameni de încredere, şi îi trimite nu spre *San Antonio* , ci spre *Victoria* , pentru a preda o scrisoare celui de-al treilea comandant rebel, Luis de Mendoza. Nicio bănuială nu încolţeşte în mintea rebelilor care privesc cum se apropie de nava lor această minusculă barcă. Căci cum ar putea cinci oameni să atace o corabie cu aproape şaizeci de soldaţi înarmaţi până-n dinţi?

Leadership: Iei în considerare potenţialul impact al unor procedee minuţioase de vizualizare a ieşirii din impas, ghidându-te după ideea că oamenii acţionează orbeşte pentru împlinirea unei ordini în desfăşurarea acţiunilor?

Odată ce aceştia urcă la bordul navei, toţi rebelii îi înconjoară. Nimeni nu se mai îngrijeşte să stea de strajă. Luis de Mendoza citeşte scrisoarea de la Magellan, în care este invitat la o convorbire. Dar în timp ce citea, din cea de-a doua barcă trimisă de Magellan, pe care nimeni n-a observat-o, aproape douăzeci de oameni înarmaţi până în dinţi s-au căţărat pe bord, în spatele rebelilor. Luis de Mendoza este ucis pe loc de unul dintre cei cinci mesageri, iar rebelii sunt somaţi să se predea.

Trucul în psihologia şahului este pur şi simplu surpriza. Dacă ştii să surprinzi, partida este câştigată. Planul lui Magellan a reuşit. Scorul de trei la doi s-a întors din nou în favoarea lui, restabilindu-şi astfel supremaţia.

Cu cât este mai mare tensiunea creată în jurul deţinerii puterii, cu atât este mai mare interesul arătat pentru reprezentarea unei perspective de supremaţie.

Regele este cea mai importantă piesă, de situaţia lui depinde soarta întregii partide. Capturând *Victoria* , Magellan şi-a redobândit supremaţia. I-a pedepsit pe instigatori şi şi-a continuat drumul. Până la urmă s-a dovedit că măsura lui, reducerea raţiei de mâncare, a salvat flota. Şi mai mult decât atât, Magellan şi-a respectat promisiunea: a găsit strâmtoarea care comunica între cele doua oceane, Atlantic şi Pacific.

Uneori, ca să câştigi, trebuie să fii viclean şi să ştii te foloseşti de trucuri. Dar pentru asta este necesar să dispui de cunoştinţe de strategie şi tactică. Magellan a demonstrat prin „jocul" său că este inovator, găsind soluţii neaşteptate care i-au oferit posibilitatea să câştige "partida" chiar dacă era în dezavantaj, chiar dacă adversarul nu a jucat cinstit.

Stilul de prezentare a unei argumentaţii în faţa unei victorii poate fi considerat expresia unui statut sui-generis menit să facă distincţia dintre formele trecătoare ale evenimentelor cele mai însemnate şi fondul raţional al dreptului de a te răscula şi doborî puterea care nu lucrează în spirit de solidaritate faţă de tine.

Un lider trebuie să aibă o pregătire completă, şi să beneficieze de o stare psihică adecvată. De asemenea, la fel ca un şahist, liderul trebuie să-şi menţină în permanenţă echilibrul psihic şi moral, desăvârşit, mai ales când este pus în dificultate. Şi, mai presus de toate, el trebuie să aibă dezvoltat simţul pericolului real, adică să-l anticipeze şi să fie în stare să găsească soluţii rapide de a-l contracara.

Liderul trebuie să aibă dezvoltat simţul pericolului real. În situaţii critice el trebuie să găsească rapid căi alternative şi metode de anihilare a oricăror elemente perturbatoare de la scopul final. Aidoma unui jucător de şah, el trebuie să găsească soluţii adecvate situaţiei create de adversar. Uneori, ca să câştigi, trebuie să ştii să te foloseşti de trucuri.

Leadershipul înseamnă creşti prin reinvestirea a ceea ce câştigi după ce ai pierdut aproape totul.

*** Notă:** Stefan Zweig - *Magellan* , Editura Tineretului, 1955.

Pasa decisivă către măiestrie

On Octombrie 14, 2010

Ridică-i pe oameni deasupra propriilor lor limite, stimulându-i să-şi desăvârşească măiestria.

Antoine Bourdelle a fost unul dintre cei mai influenţi sculptori din toate timpurile. Operele sale, faimoase peste tot în lume, apreciate la nivel mondial, au devenit de-a lungul timpului un adevărat punct de reper pentru toţi cei ce vroiau să exceleze în sculptură.

Dar ceea ce puţini ştiu, este că Bourdelle a fost şi un profesor desăvârşit. El se simţea dator să le transmită studenţilor spiritul mesajelor sale. Considerând că esenţială este formarea personalităţii proprii fiecăruia, el îi avertiza de la început să evite imitaţia facilă: *"Ar însemna să vă trădez dacă v-aş spune: urmaţi-mă. Calea mea, făclia mea, nu sunt ale voastre". Şi repeta mereu: "Suspectaţi formulele".*

Leadership: Poţi trece prin filtrul individualităţii tale întreg materialul experienţei directe, cât şi sugestiile provenite din sursa creaţiei tale, într-un context care oferă foarte multe informaţii despre performanţele tale?

Pentru a stabili ce anume au nevoie oamenii din jurul tău, trebuie să le priveşti obiectiv părţile bune şi cele slabe - părţile bune indică direcţia spre care ei trebuie să se îndrepte, ce pot ei deveni, în vreme ce slăbiciunile lor, odată ce ţi-ai dat seama de ele, îţi indică ceea ce ai de făcut, ce măsuri să iei pentru a-i apropia de potenţialul lor de performanţă.

Tu te simţi dator să le transmiţi oamenilor nivelul tău propriu de îndemânare în scopul dezvoltării leadershipului lor? Consideri că este esenţială formarea personalităţii proprii fiecăruia? Dacă da, atunci sarcina ta este de a le evalua potenţialul, după care să încerci să optimizezi calităţile şi performanţele lor, îndreptându-le paşii spre o carieră de succes.

Sursa afinităţilor lor trebuie căutată din timp, încă de la primul lor contact cu "arta" ta, iar pe măsură ce ei aprofundează cunoaşterea, viziunea şi principiile pe care le promovezi, cu o curiozitate mereu alimentată, niciodată secată, cu atât îşi vor dezvolta calităţile şi cu atât vei creşte în ochii lor.

Ca lider, trebuie să oferi oamenilor sugestii provenite din conţinutul experienţei tale, încât performanţele individualităţii tale să fie trecute de ei prin filtrul informaţiilor ce pot favoriza dezvoltarea creaţiei lor.

În fotbal, "Uliţa Cehă" reprezintă pasa decisivă, făcută în zona de finalizare, printre adversari, putând fi uşor transformată în gol de către cel care a primit-o. În leadership, "pasa decisivă" care poate fi transformată într-un mare succes este dată de acea influenţă pe care ei o primesc de la tine, este dată de perspectiva pe care le-o oferi vizavi de modul în care trebuie să gândească şi să acţioneze, este dată de fluiditatea calităţilor şi aptitudinilor tale, de capacitatea ta de a comunica cu ei şi de a le impune propriile standarde înalte, fără să le îngrădeşti dreptul de a-şi manifesta liber orientările.

Prin urmare educarea lor într-o anume direcţie, oferindu-le o anumită perspectivă, în ideea construirii unei cariere, trebuie să aibă la bază stabilirea unui acord, a unui parteneriat solid între tine şi ei care să se dovedească a fi deosebit de benefic pentru ambele părţi.

Conţinutul unei creaţii care îşi propune să stimuleze actul de creaţie în rândul celorlalţi oameni trebuie să ofere o experienţă de autocunoaştere, dar şi o experienţă de neuitat legată de un anumit eveniment. Mai mult decât atât, conţinutul unei creaţii trebuie să ofere o vedere încântătoare asupra unei anumite situaţii de viaţă ce serveşte ca mijloc de exprimare a unei idei ştiinţifice.

Un lider adevărat este oricând pregătit să scoată la iveală detalii despre rezultatele muncii sale, făcând apel la o experienţă de viaţă ce serveşte ca mijloc de identificare şi exprimare a propriilor sale concepţii despre ce înseamnă să fii un Creator.

Pasa decisivă către măiestrie este etapa care marchează succesul sau eşecul tău, ca lider. Este etapa care te ajută să vezi unde se află oamenii în raport cu viziunea şi valorile tale, şi încotro se îndreaptă ei la îndemnurile tale. Abordările tale, încercarea ta de a le schimba oamenilor optica asupra leadership-ului este "pasa decisivă" către sporirea propriilor performanţe şi a nivelului de influenţă.

Aşa cum golul rămâne fără îndoială recompensa concretă a jocului de fotbal, victoria fiind încoronarea supremă a eforturilor depuse de cei 11 coechipieri – tot aşa aderarea celorlalţi oameni la arta ta rămâne fără îndoială recompensa concretă a eforturilor tale de a le optimiza modul de gândire şi de utilizare a resurselor proprii, care îţi asigură succesul şi performanţa.

Concluzie: Performanţa în leadership este evaluată prin rezultatele obţinute de echipă şi atingerea scopului propus. Performanţa unui lider se măsoară prin performanţele individuale ale fiecărui om din echipă. De aceea un lider trebuie să se implice şi să muncească uneori enorm, pentru dezvoltarea unei culturi organizaţionale, căci degeaba el dispune de standarde proprii superioare dacă ele nu concordă cu cele ale membrilor echipei şi dacă se detaşează de ceea ce aceştia consideră ca fiind normal, riscă să genereze neînţelegeri şi o adversitate puternică din partea lor... şi în acest caz s-a zis cu performanţa.

Evaluarea performanţelor individuale, identificarea punctelor tari şi slabe ale fiecărui individ, identificarea nevoilor de instruire şi perfecţionare profesională, identificarea performanţelor potenţiale, aplicarea unui sistem de salarizare motivant (dacă sistemul de salarizare este determinat de alţi factori decât performanţa şi este uniform pentru toţi, evaluarea nu mai are rost şi dispare şi motivaţia) şi nu în ultimul rând, comunicarea, găsirea unor punţi de comunicare adecvate pentru a obţine măiestria în echipă.

Patima omului de gheaţă

On Noiembrie 01, 2011

Clădeşte-ţi urcuşul spre desăvârşire, îndepărtând toate acele părţi din conştiinţa ta care sunt în opoziţie cu adevăratele tale valori şi credinţe.

- Durerea e rea... Fă-o să dispară. Tu mă poţi ajuta, domnule. Du-mă în lumea de dincolo - îi spune bătrâna bolnavă lui Joe Black, imobilizată în scaunul cu rotile, suferind de o tumoare care îi afectase întreg organismul. Era evident că ea recunoscuse spiritul rău care sălăşluia în el.

Prinţul Întunericului, în persoana lui Joe Black, distingând în glasul ei dezamăgirea provocată de situaţia în care era, apoi neîncrederea şi teama pe care o simţea pentru el, se uită la ea cu totul indiferent şi îi vorbi cu adevărată asprime în glas:

- Poate că te voi ajuta, poate că îţi voi alina durerea, dar acum "sunt în vacanţă". Trebuie să mai rezişti puţin, bătrânico.

După câteva zile, Joe Black întorcându-se la spital pentru a se întâlni cu Susan (doctoriţa de care se îndrăgostise), o revede pe bătrâna bolnavă. Aceasta, stând în pat, copleşită de propria suferinţă, îi vorbi lui Joe despre durerea ei atât de severă.

Amândoi se priviră în ochi lung. În clipa aceea Joe simţi un fel rană în inimă şi i se păru că prin rana aceea i se scurge un simţământ. Nu patima, fiindcă patima rămăsese, ci respectul pentru ultima ei dorinţă. Acea cutremurătoare, şi totuşi atât de puternică năzuinţă spre moarte a femeii suferinde, era ceva mai presus decât înţelegerea pe care o avea el despre oameni. Încetul cu încetul, în el îşi făcu loc sentimentul de respingere. Îl cuprinse dintr-o dată de febra uşoară a unui resentiment inconştient faţă de greşeala proprie.

Leadership: Poţi să recompui trăirea unui eveniment din frumuseţea uitată a vieţii într-o manieră care se angrenează într-un joc al esențelor de dincolo de aparenţele lumeşti?

În privinţa leadershipului, adunând laolaltă în ciuda diferenţelor de apreciere şi de viziune, oameni care gândesc diferit, dar şi cunoştinţele cu privire la toate faptele şi suferinţele lor, se cere observat faptul că buna administrare a contribuţiei la garantarea creşterii lor constante, pe orice plan, priveşte exclusiv producţia de siguranţă şi stimă de sine. Ele sunt utile pentru a avea acces la fondul lor de vitalitate, elan şi entuziasm. Dar pentru aceasta trebuie să posezi şi acea dimensiune de natură spirituală, renovatoare, care prezintă semnificaţie prin valoarea de utilizare directă sau indirectă a identităţii limitate pe care ei o traversează în momentele critice.

Dacă ai întins vreodată o funie peste un râu ca să înaintezi cu o barcă, nu înseamnă că vâsleşti, ci că tragi barca de-a lungul funiei cu mâna, de la un cârlig la altul.

Exact aşa stau lucrurile uneori în relaţiile noastre cu ceilalţi oameni. Încercăm să ajungem cât mai repede la sufletul lor, dar în loc să manifestăm o mai bună înţelegere pentru grijile lor, în loc să dovedim respect pentru valorile şi credinţele lor, "tragem" de ei ca să ne urmeze şi să ne accepte convingerile şi idealurile. Ne facem o onoare din calităţile pe care le preţuim atât de mult la noi, dar ignorăm orice cerinţă din partea lor.

Trăirea unui eveniment din frumuseţea uitată a vieţii este necesară pentru a reîmprospăta conştiinţa unei enorme capacităţi pentru empatie. Absorbind fiecare tresărire a sufletului, fiecare curiozitate a minţii, fiecare fibră a fiinţei pulsând de viaţă, orice urmă de nostalgie pe măsură ce se împrăștie în jocul straniu al întâmplării, ajungem mai aproape de frumos. Altfel suntem nişte caricaturi gri desenate de banalitate.

Leadership: Spiritul tău plin de forţă poate fi îmblânzit prin senzaţia de neputinţă?

Dacă ai văzut filmul "Meet Joe Black (1998) ", probabil îţi aminteşti de schimbarea bruscă de personalitate a lui Joe Black. El, care îşi servea cu o consecvenţă şi abnegaţie totală, fără să facă vreodată concesii, cu scrupulozitate propriile principii riguroase, dintr-o dată s-a schimbat în altcineva. Pe motiv că este "în vacanţă, el şi-a nesocotit obligaţia de bază: de a trece omul în lumea cealaltă.

Bătrâna bolnavă a constituit, de fapt, o excepţie de la regulile sale atât de bine bătute în cuie, acest lucru ajutându-ne să recunoaştem în ce măsură se poate detaşa un individ de fixaţiile sale şi în ce măsură îşi poate modifica atitudinea prin apropierea faţă de ceilalţi. Ea a izbutit ceea ce nu izbutise nimeni altcineva: să îmblânzească prin umilinţă, prin suferinţă şi prin senzaţia de neputinţă, spiritul lui plin de întuneric şi de forţă. Datorită ei lumea i-a apărut lui Joe mai bună.

Leadership: Poţi să repari imaginea unei lumi trecătoare, trăind cu conştiinţa apăsătoare a unei măsuri foarte chircite a omului venit dintr-o altă lume?

În fiecare dintre noi zace o întreagă concepţie despre rolul (sau scopul) pe care îl avem de îndeplinit, care marchează distinct ceea ce desparte principiile noastre de etică şi echitate, de ale celorlalţi. Dacă reuşeşti să pătrunzi în profunzimea sufletului lor, dacă reuşeşti să te conectezi la universul lor interior, eliminând din arsenalul leadershipului tău acele concepţii care sunt în opoziţie cu sistemul lor de valori, atunci vei izbuti să atingi la acel nivel înalt de calitate de care fiecare lider s-ar simţi mândru.

Aşa cum un pictor îşi impune stilul prin calmul armoniilor lui compoziţionale, realizate de un anumit ritm al liniilor, de un anumit rafinament al culorilor - tot aşa şi tu, ca să-ţi impui stilul de leadership şi valorile pe care se bazează acesta, mai întâi trebuie să obţii un anumit grad de fidelitate din partea oamenilor, manifestând o puternică tendinţă către compasiune, către bunăvoinţă şi înţelegere pe drumul către unitate şi armonie.

Uneori, trăirea unui sentiment de valoare personală se construieşte sănătos doar pe baza acceptării inevitabilului, prin integrarea intervenţiei omului profund venit dintr-o altă lume în ultimele clipe ale vieţii.

Patima omului de gheaţă aduce în atenţie tranziţia de la un stadiu la altul al personalităţii tale, de la o atitudine negativă şi rece, la una pozitivă, de acceptare şi împărtăşire a ceea ce ai mai bun în tine. Poţi străluci în inima celorlalţi, sau îţi poţi umbri de bună voie ascensiunea în funcţie de substratul personalităţii tale.

Aşa cum sângele circulând prin tot organismul face posibilă funcţionalitatea tuturor organelor, tot aşa şi tu, pentru a asigura funcţionalitatea echipei, pentru a cimenta relaţiile cu ceilalţi oameni, trebuie mai întâi să-ţi schimbi optica despre tine însuţi, să înveţi să-ţi exprimi sentimentele fără să intri în opoziţie cu tine însuţi, îndepărtând toate acele părţi din conştiinţa ta pe care le consideri "întunecate".

Şi, călăuzit de spiritul spre împlinirea personală, să rezişti tentaţiei de a-ţi compara mereu

percepţiile şi concepţiile cu ale celorlalţi, fără să te bazezi pe o analiză mai profundă a propriei tale persoane.

Concluzie: Flexibilitatea şi maleabilitatea bazată pe înţelegerea propriei personalităţi dar şi a celorlalţi, a propriilor limite dar şi a celorlalţi, sunt caracteristici specifice umane, care trebuie să fie mult mai pronunţate la un lider. Ele, alături de compasiune şi empatie, trebuie atent dozate pentru a nu intra în conflict cu propriul eu sau cu ceilalţi colaboratori.

Rigiditatea, inflexibilitatea, lipsa înţelegerii limitelor umane definesc pe acel lider pătimaş şi cu inimă de gheaţă.

Clădeşte-ţi urcuşul spre desăvârşire, îndepărtând toate acele părţi din conştiinţa ta care sunt în opoziţie cu adevăratele tale valori şi credinţe.

Patriarhul artei

On Octombrie 08, 2010

Conferă expresivitate formei leadershipului tău, conturându-ţi personalitatea prin contrast cu stilul care se potriveşte nivelului tău de maturitate.

Scriitoarea Adina Nanu preciza următoarele despre marele sculptor francez, Antoine Bourdelle: *"Creaţiile lui Bourdelle au însemnat multe decenii pentru marele public terenul sigur al sculpturii de totdeauna, părând să depăşească tot ce este efemer şi plasându-se în zona atemporală a marii arte monumentale."*

Evident, nu s-a înşelat. Dar cum s-a conturat acest om de toată lauda?

Cu 20 de ani mai tânăr decât Auguste Rodin, Bourdelle a lucrat în atelierul acestuia până ce şi-a găsit stilul. Pe când sculptura lui Rodin urmărea să redea în mişcare, gestul pasionat - Bourdelle a căutat să fixeze aspectele stabile, înţelegând sculptura în primul rând ca pe o arhitectură a volumelor iniţiale.

În acelaşi timp, de la unul din unchii săi, cioplitor în piatră, Bourdelle a învăţat să mânuiască dalta şi ciocanul, ascultând stânca ce "părea că vorbeşte", indicând urechii atente a meşterului după sunet dacă lovitura era bine aplicată. Iar de la tatăl său, tâmplar de mobile, ebenist şi sculptor de piese decorative, a învăţat să cioplească în lemn reliefuri.

De la ei a învăţat să intre in lumina celebrităţii.

Leadershp: Tu poţi să fixezi aspectele stabile ale unei arte care merită o cunoaștere aprofundată, înţelegând evoluţia Creaţiei în primul rând ca pe o arhitectură a monumentalităţii ce trece dincolo de efemer?

A te educa singur, fără ajutorul nimănui, este în zadar – nu-ţi poţi spori performanţele. Strădaniile tale sunt, în acest caz, ca un grăunte de nisip fără clepsidră – un efort care nu umple golurile din experienţa ta, din cultura ta, un punct foarte îndepărtat de propulsare către adevărata performanţă la care aspiri.

Acel grăunte de cunoaştere, foarte important şi valoros, care trebuie să se scurgă în clepsidra timpului tău oferindu-ţi posibilitatea a-ţi dezvolta abilităţile şi competenţele necesare unui specialist, va rămâne tot timpul nemişcat. Astfel evoluţia ta va stagna, nu vei putea face saltul calitativ spre "măiestrie". În ceea ce priveşte cunoaşterea de care face dovadă un artist, fiind vorba despre un dinamism în veşnică desfăşurare, inerent demersului plastic, a cărui tensiune poate să varieze de la un ciclu de lucrări la un altul, ea pare a fi în strânsă legătură cu scopul oricărei Creaţii: de a servi la maturizarea sufletului său, de a-l ajuta să devină o fiinţă cu totul desăvârşită.

Fără nicio îndoială este important să ajungi un artist desăvârşit. Dar numai cei care se află aproape de tine vor determina nivelul tău de eficienţă. Singur nu-ţi poţi spori cunoştinţele şi şansele de a face carieră, dar mentorii pe care ţi-i alegi pot s-o facă. Trebuie să închegi relaţii cu cei mai buni îndrumători posibili, să găseşti o cale de a adopta ideile clare şi benefice ale viziunii lor, să le implementezi şi să contribui la ele dacă sunt valoroase şi pe aceeaşi lungime de undă cu tine. Secretul conducerii nu este să câştigi cât mai mulţi adepţi, ci să te înconjori de cei mai valoroşi mentori şi să-ţi conturezi viziunea după modelul lor.

A înţelege evoluţia Creaţiei tale ca pe o arhitectură a monumentalităţii ce trece dincolo de efemer înseamnă să îţi dezvolţi cunoștințele pentru a cuprinde idei în afara normelor, încât să devii un "clasic" al avangardei în ceea ce priveşte receptarea Operei de Artă.

Te maturizezi prin înţelegerea "artei" pe care o practică ceilalţi. Nivelul tău de maturitate creşte sau scade în funcţie de gradul în care te implici în asimilarea şi întrebuinţarea celor mai importante elemente, metode, aspecte şi informaţii din arta lor. Acum este momentul să îţi pui la încercare cunoștințele și să vezi câte dintre realizările tale pot să se încadreze în unitatea operei de artă, care nu este dată numai de însumarea mai multor teme puse cap la cap, ci de un dublu raport de întrepătrundere: între ceea ce durabil şi ceea ce este considerat prestigios la nivel internaţional.

După cum bioxidul de carbon din aer (CO2) intervine în asimilarea "hranei" la plante, tot astfel dezvoltarea ta se produce dacă ceilalţi intervin cu sfaturi şi sugestii care au rolul de a completa şi spori nivelul tău de cunoaştere şi de a-ţi îmbunătăţi performanţele - deci, numai dacă îţi însuşeşti o parte din stilul lor de gândire şi de realizare a artei.

Ca să conferi expresivitate formei leadershipului tău, conturează-ţi personalitatea prin contrast cu stilul care se potriveşte nivelului tău de maturitate.

Examenul de maturitate al unui artist rezidă din capacitatea lui de a înţelege şi a-i face pe alţii să înţeleagă evoluţia cunoaşterii plecând de la obiectele ei; în acelaşi timp rezidă din capacitatea lui interpreta și explica relația dintre fenomenele artistice și contextul mediatic.

Patriarhul artei este cel care stăpâneşte secretele unei mai bune înţelegeri şi cunoaşteri ale artei conducerii ca şi puterea realizării unei mari performanţe pentru cariera sa, servind drept un excelent model de urmat.

Înainte de a deveni un "maestru" trebuie să te şcoleşti tu însuţi în ritmul acelora care sunt mai buni decât tine, găsind similitudini între viziunea lor şi a ta, însuşindu-ţi acele cunoştinţe şi calităţi menite să te ajute să-ţi dezvolţi propriul tău stil de leadership.

Concluzie: Cunoaşterea stă la baza leadershipului ca şi dorinţa de perfecţionare, dorinţa de a învaţă din experienţa altora. Apoi este important ca "arta" ta dusă pe culmile înalte ale perfecţiunii să reziste evaluărilor externe ale specialiştilor în domeniu.

Învaţă de la toţi şi mai ales lasă-te călăuzit de sfaturile mentorilor tăi şi vei fi mulţumit de performanţele tale, de rezultatele obţinute cu un efort imens din partea ta, dar care te-au înălţat pe scara de valori a societăţii.

Paznicul sufletului zbuciumat

On Iunie 15, 2010

Sporeşte nivelul de calitate a rezultatelor tale valorificând acele resurse proprii care au particularitatea de a produce efecte pozitive.

Ieri seară am jucat ping-pong cu unul din prietenii mei cei mai buni, Răzvan. După o oră, în care am fost la egalitate, am ajuns la setul decisiv care stabilea care dintre noi doi era mai bun.

Ne-am aflat din nou la egalitate la puncte, 20 la 20. Cel care câştiga la avantaje era învingător. Dar acesta, trebuia să mărturisesc, a fost momentul când am început să-mi fac griji cu adevărat, momentul când m-am temut să nu fac vreo greşeală. Un tremur m-a cuprins din cap până în picioare, un fior de teamă şi de nelinişte mi-a străbătut tot sufletul. De parcă aş fi ştiut dintotdeauna că aveam să ajung aici, la egal, şi că voi pierde. Mi-era aproape imposibil să mă concentrez, nu puteam părăsi gândul că voi fi un pierzător. Acest gând îmi biciuia mândria şi-mi periclita toate forţele.

Înainte de a-şi executa serviciul, Răzvan mi-a aruncat o privire foarte sugestivă, cu totul exagerată, dar în care se putea citi siguranţa de sine. M-a făcut să mă înfiorez. Aerul lui de învingător pe care şi l-a luat părea să-mi spună: Ai să vezi că te voi face praf !

Cu cât nesaţ primea sufletul meu această provocare. Era ca şi când m-aş fi duelat cu un adversar în faţa căruia n-aş avea nicio şansă. Mă simţeam ca o ţintă sigură în dreptul gurii pistolului adversarului meu.

Deşi eram scufundat într-un soi de disperare surdă, m-am încumetat să-l privesc drept în ochi pe Răzvan, sperând să-l fac să creadă că nu-mi este frică. I-am zâmbit cu subînţeles. Dar asta n-a schimbat cu nimic simţămintele mele. Firea mea amorţise, eram lipsit putere şi de voinţă. Şi aşa cum am prevăzut, am pierdut.

Leadership: Te poţi debarasa de ceea ce ştii că nu poţi dovedi ca fiind o certitudine, încât să-ţi recapeţi o poziţie verticală stabilă faţă de ceea ce este perceput ca fiind o ameninţare la adresa propriei puteri?

În fiecare om există un Bau-Bau. Numai că el nu se ascunde sub pat sau în debara, aşa cum ne imaginam când eram mici, ci în interiorul nostru, în mintea şi în inima noastră. Sufletul te aude şi te ascultă.

Pentru mine monstrul Bau-Bau a fost teama de eşec, teama că nu voi fi un învingător şi că voi fi rănit în amorul propriu. Iar inima mea a aprobat tot ceea ce i-am cerut. Acea împietrire interioară de care am fost cuprins cu totul, brusc, exact în ultimul moment, nu poate fi decât rezultatul acordului pe care l-am pecetluit cu inima mea. Inima i-a dictat minţii, iar mintea a deţinut controlul total asupra mea.

Eşecul nu este o certitudine, nici succesul, ceea ce contează enorm este spaţiul dintre ele, ipoteza de fond că tot ce ţi se întâmplă este o oglindire a ceea ce crezi despre tine. Cerinţele privind evaluarea unui potenţial de mare performanţă depind de cât valorezi într-un meci al cărui început nu-şi compromite finalul prin invazia unei stări pornite din subconştient, dintr-o subestimare a competenţelor personale.

Efectul de gol care te slăbeşte, ca un fel de captivitate din care nu mai poţi ieşi, surprinde acea premisă de inferioritate care te determină să aderi la ceea ce pare ca fiind hotărârile decisive ale altora şi deci, să te comporţi în conformitate cu ele şi să devii una cu faptul care produce sentimentul de neputinţă.

Leadership: Priveşti în faţă adversarul nevăzut care tinde să-ţi conducă subconştientul, fără să-ţi iei drept însoţitor consistenţa pretenţiei de a recepta un punct de vedere diferit asupra impactului unei posibile vinovăţii excesive?

Subconştientul ia în stăpânire conştientul. M-am temut că voi pierde, şi de ceea ce m-am temut n-am scăpat. Ceea ce gândeam a avut puterea de a deveni realitate, realitatea mea. O realitate care m-a afectat întru totul. Teama adâncă ce m-a cuprins a făcut să se cutremure totul în mine. Şi bătând în retragere, am jucat prost la sfârşit. Acest conflict interior mi-a ştirbit puterea de luptă, nu a făcut decât să diminueze puterea voinţei mele.

Până la urmă a fost lupta cu mine însumi, cu un adversar nevăzut: propriul meu eu interior, care în loc să mă încurajeze şi să-mi dea mai multă speranţă exact atunci când aveam mai multă nevoie de el, m-a părăsit. Răzvan mi-a zdruncinat încrederea în forţele mele aruncându-mi acea privire mândră ce vădea siguranţa de sine. Aş fi vrut să am prins la gât un talisman norocos, un Auryn, pe care să-l ating, şi să simt instantaneu cum tot curajul de care am nevoie mi se revărsa în inimă, umplând-o toată. Dar n-am avut nimic. În afară de sufletul meu, care nu m-a ajutat deloc.

Deprecierea propriei valori implica sentimentul de vinovăție excesivă provenit dintr-o imagine de sine pe care oricine o poate percepe drept o înrobire ce pendulează între extaz și agonie, nu drept un inamic declarat care va continua să lovească.

Un singur lucru îl ajută pe om, în anumite situaţii, să evolueze către o realitate mai bună: să gândească pozitiv în legătură cu aşteptările sale. El se poate energiza singur numai dacă îşi recapătă stăpânirea de sine. Întotdeauna cel care nu-şi stăpâneşte emoţiile, dovedeşte nesiguranţă în acţiunile sale. Uneori, chiar dacă eşti deznădăjduit, e bine să continui să speri în victorie cu o convingere oarbă şi să nu iei seama la frica ce străbate din adâncul inimii tale. Uşor de zis, dar greu de făcut nu-i aşa?

După acea înfrângere dureroasa m-am gândit bine, mi-am consultat vocea interioară şi am găsit răspunsul. Tot ce am nevoie pentru a fi mai încrezător pe viitor este exerciţiul. Exerciţiul este singurul remediu pentru sporirea încrederii în sine. Cu cât voi juca mai des ping pong cu cât mai mulţi adversari, cu atât voi fi mai bun, şi cu cât voi fi mai bun, cu atât voi fi mai încrezător în forţele proprii.

Puterea personală dezvăluie acel raport de forţe just instituit între o dominaţie care se ascunde pe sine şi o dominaţie care rămâne constantă în pofida pretenţiei de a fi tratată ca o superputere, şi fără a-şi da în vileag slăbiciunile.

Paznicul sufletului zbuciumat nu poate fi decât „eul” nostru interior, marele arbitru care însă se poate lăsa şi el amăgit de aparenţe înşelătoare şi care chiar ne poate demobiliza atunci când suntem faţă în faţă cu adversarul.

Ce se poate face? Esenţială este creşterea încrederii în sine prin dobândirea experienţei vaste, ceea ce se obţine prin exerciţiu permanent, autoevaluarea corectă a performanţelor, cât şi perfecţionarea continuă.

Sporeşte nivelul de calitate a rezultatelor tale, valorificând acele resurse proprii care au

particularitatea de a produce efecte pozitive.

Pe curând, eu însumi

On Aprilie 14, 2009

Regândeşte-ţi orientarea către propriul tău eu, ca să poţi cultiva cu succes relaţii reciproc avantajoase.

Ieri, am găsit pe net această scurtă povestioară:

"A fost odată un bărbat care şi-a pierdut toporul; bănuielile se îndreptau spre un vecin. El îl urmări pe vecin - evident, acesta era făptaşul. Expresia chipului, felul în care vorbea, comportamentul... totul în el îi trăda vinovăţia !

La scurtă vreme, prin grădină, bărbatul şi-a găsit toporul. A doua zi, îl văzu din nou pe vecin; de această dată nimic din comportamentul său nu sugera că ar fi putut înfăptui aşa ceva."

Leadership: Poţi să maximizezi manifestarea unei sensibilităţi faţă de percepţia minţii tale conştiente, simultan cu capacitatea de a face din viziunea ta o realitate alternativă?

Ai o problemă de depăşit? Tu eşti acea problemă? Înţelepciunea ne învaţă să punem răul înaintea binelui. De ce oare, atunci când ne pierdem răbdarea şi simţul perspectivei dăm vina cineva pe care nu-l cunoaştem foarte bine, plecând de la presupunerea că este "rău şi negativ"? E o dovadă de înţelepciune şi de maturitate în gândire? Sau este o dovadă de ineficienţă/superficialitate în gândire?

Pentru a concura cu succes la proba de relaţionare şi de câştigare a încrederii oamenilor, mai întâi trebuie să-ţi optimizezi modul de gândire şi să-ţi diferenţiezi emoţiile şi sentimentele care te împing să mergi prea departe cu presupunerile şi bănuielile. Există o doză de adevăr în orice judecată, oricât de dreaptă sau nedreaptă ar fi ea. Însă nu vei putea să obţii un progres remarcabil pe plan personal şi profesional dacă foloseşti o abordare (depărtată de realitatea obiectivă) atunci când nu este cazul.

Aşa cum orice investiţie trebuie să îşi păstreze o anumită marjă de eroare, tot aşa simţul tău de analiză şi de înţelegere a problemelor trebuie să-şi păstreze echilibrul (să nu fie nici prea-prea, nici foarte-foarte, adică nici prea drept, nici prea nedrept). Iar în privinţa oamenilor trebuie să fie "reparabil", adică să poţi interveni asupra lui înainte a se produce complicaţii, sau înainte de a fi prea târziu.

Leadership: Te diferenţiezi de ceilalţi oameni printr-un model de tipul: situaţie-iniţială / transformare-situaţie-finală, prin dobândirea unei viziuni care conţine imaginea unei alte laturi ale personalităţii tale?

Vecinul nostru nu era făptaşul, dar putea fi prietenul nostru. O astfel de observaţie este importantă deoarece înseamnă că ţi-ai concentrat gândirea în direcţia cea bună, înseamnă că atitudinea ta nu te-a tras în jos ca pe o piatră de moară. Înseamnă că nu te-ai trădat pe tine însuţi, înseamnă că nu ţi-ai trădat judecata sănătoasă. Atunci când judeci greşit pe cineva, de fapt îţi exteriorizezi mediocritatea şi lipsurile proprii.

Pentru ca leadershipul tău să meargă bine, oferă-ţi ţie însuţi ceva unic şi inestimabil: viziunea şi vizibilitatea. Trebuie să vezi frumuseţea tabloului de ansamblu. Fiecare analiză, fiecare perspectivă pe care o adopţi adaugă tabloului de ansamblu câteva detalii

suplimentare, construind astfel o imagine complexă şi nuanţată.

Abilitatea de a vedea lucrurile în ansamblu fără să ţii cont de realitatea existentă seamănă cu încercarea de a vinde soluţia la o anumită problemă, dar fără să ai suficiente dovezi pentru a-ţi convinge colegii că există o problemă de depăşit. Nevoia de a-ţi vinde ideea de rezolvare a problemei începe aici şi acum, cu tine. Sau, mai pe şleau, prima problemă pe care o ai de depăşit eşti chiar tu.

A dobândi o viziune care conţine imaginea unei alte laturi ale personalităţii tale, înseamnă să vezi o situaţie din punctul de vedere a ceea ce nu este condamnabil în sine, maximizându-ţi potențialul de a observa și a câștiga o altă perspectivă pentru a vedea că lucrurile nu sunt mereu cum apar.

Pe curând, eu însumi semnifică regresul pe care îl înregistrezi ori de câte ori pierzi contactul cu realitatea, cu adevăratul tău eu şi cu cei din jurul tău - atunci nu mai eşti tu cu adevărat, ci mai curând este acea mică parte din raţionamentul tău, folosită cu puţină iscusinţă, care necesită schimbare.

De ce depinde abilitatea ta de a rezolva o problemă? Ai la dispoziţie mai multe opţiuni de rezervă pentru a asigura calitatea rezultatelor? Care crezi că sunt trăsăturile pe care le identifică oamenii la tine atunci când trebuie să rezolvi o problemă? Eşti în stare să te concentrezi asupra propriei tale persoane înainte de a conecta la ceilalţi? Integritatea şi convingerile personale fac credibil leadershipul tău?

Concluzie: În orice împrejurare un lider trebuie să fie el însuşi, nu poate să copieze pe alţii şi nu poate să aplice metodele altora, căci circumstanţele nu sunt identice. În relaţiile interumane, în situaţii critice nu este suficient să găseşti şi să nominalizezi un vinovat sau mai mulţi vinovaţi, ci pornind de la prezumţia de nevinovăţie să analizezi cu mult discernământ şi obiectivitate situaţia, cauzele, şi să găseşti punctele slabe ale leadershipului tău, şi poate chiar ale tale personale.

Deci, regândeşte-ţi orientarea către propriul tău eu ca să poţi cultiva cu succes relaţii reciproc avantajoase.

Source: https://neculaifantanaru.com/pe-curand-eu-insumi.html

Pe marginea gheții trece o pisică

On August 06, 2016

Programează-ţi o probă de evaluare de sine, testându-ţi atitudinea față de ceea ce încă nu poți să controlezi total la nivel intuitiv.

Cei doi caută. Să vedem... Să vedem.. Deodată: "Asta e ! " Pe marginea gheţii trece... o pisică. La margine, gheaţa e subţire... Gheaţa se sparge... sub pisică".

Pe măsură ce este rostită, propunerea apare mai mult decât stupidă. Din nou amândoi îşi aduc brusc aminte că sunt aşteptaţi undeva. Astfel trec zilele. Povestea devine un coşmar. Eisenstein nu mai poate dormi nopţi de-a rândul, perpelindu-se în cumplite insomnii halucinante: în jur se înfig topoare în lemn şi pisici se poticnesc pe gheaţă. Apoi topoarele sparg gheaţa şi pisicile se înfig în lemn..

Înfuriat, Eisenstein întinde mâna spre raftul de cărţi, cu gândul de a-şi distrage gândurile. Nimereşte peste culegerea rusească de snoave şi povestiri dintre cele mai cunoscute.

Citeşte şi deodată: "Dumnezeule ! Cum am putut uita povestea asta care mi-a plăcut totdeauna atât de mult?" Sare din pat, de-a dreptul la telefon, îl sună pe Pavlenko şi strigă entuziasmat: "Am găsit ! Soldaţii stau în jurul focului. Şi unul din ei spune povestea cu Vulpea şi Iepurele. Povestea în care e vorbea despre felul cum s-a furişat iepurele între doi mesteceni şi cum vulpea, care gonea după el, s-a înţepenit între copaci."

Cei doi discută apoi îndelung. Ideea se conturează, se completează, se mai modifică în detalii, până rămâne definitiv în scenariu. "Dacă am mai avea timp să o lucrăm, o lună să zicem, am găsi o soluţie mai completă pentru acest film. Dar nu e timp." *****

Leadership: Poți să găsești un argument de susținere în favoarea prelungirii inspiraţiei, între răsturnări și renovări de perspectivă asupra evaluării propriilor motivaţii?

În asprimea istovitoare a muncii de creaţie, în apăsătoarea condiţie a artistului care încă nu este stăpân pe talentul său, pus în faţa unei viziuni care este prea sumară ca să se închege, declanşând și dând amploare crizei de inspiraţie, are loc un fenomen de tip *bubble* . Cu cât bagi mai mult aer în balon, cu atât stabilitatea lui este mai mică. Motivaţia unui regizor nu este de a umple cu cât mai mult efect pelicula cinematografică, ci de a realiza un echilibru între poveste şi realitate, între ficţiune şi adevăr, între provocare şi aspiraţie.

Stabilitatea în ceea ce privește condiţionarea motivaţiei de către talent, cultură şi competenţă, este doar o iluzie. Cum se evaluează motivaţia? După nivelul valorii pe care regizorul o atribuie temei şi actului de creaţie. Iar motivaţia de a creşte vizibilitatea şi importanţa creaţiei are loc atunci când regizorul încearcă să transmită o idee făcând aluzie la intervenţia lui în planul realităţii, sau la caracterul complex al personalităţii sale, al muncii sale. Stabilitatea nu se atinge fără să îndeplineşti acea condiție de localizare a valorilor proprii în matricea perioadei tranzitive - de la renunţare la speranţă, de la espectativă la acțiune, de la știință la artă.

Stabilitatea este un exces al elementului controlat, destul de greu de acceptat, constituind de fapt elementul unei probe de autoevaluare sau al unui test psihologic, care te ajută să-ţi descoperi atitudinea adevărată față de ceea ce încă nu poţi să controlezi total la nivel intuitiv sau ştiinţific.

Oare atitudinea ta în faţa lipsei de inspiraţie este o predispoziţie pentru manifestarea unei slăbiciuni de ordin profesional, sau este o reacţie de revoltă în faţa unei puteri superioare pe care încă nu conştientizezi că o deţii?

Cu cât avansezi spre un stadiu superior de integrare a cunoaşterii într-o operă de creaţie, cu atât mai greu te susţii în experiența de nu te ridica la nivelul propriilor așteptări.

Una din marile probe ale leadershipului, care condiţionează valoarea personalităţii, vizează puterea de a reacţiona în diverse contexte de tip „lipsă de inspiraţie", atunci când nu reușești să te centrezi în acea stare în care simţi că nimic nu te poate opri.

Numai cine a devenit reprezentativ într-un anumit domeniu conduce după îndemnul: „sunt de neoprit", deoarece beneficiază de un randament sporit al resurselor de inspiraţie, fiind un excelent administrator al elementelor de noutate neaşteptate.

O astfel de putere, cuprinzând necesitatea de a ajunge la izbânda unei veritabile creaţii, printr-o reducţie a complexităţii şi a diferenţelor care o compun, este o afirmare cerută de structura însăşi a ierarhiilor esenţialităţii tale - de la exigenţa de a-ți permite să greșești, până la exigenţa de a renunța la ceea ce nu cunoşti pur şi simplu din frica de necunoscut.

Întotdeauna în leadership, unde ideile se conturează, se completează, se modifică în detalii până se definitivează într-o creaţie autentică, contează motivaţia înscrisă în dimensiunea unei limitări de utilizare a cunoaşterii care acţionează invers proporţional cu determinarea de a duce la bun sfârșit procesul de inovare. Motivaţia trebuie susţinută printr-o utilizare a resurselor cât mai diverse la foc continuu.

Cunoaşterea de care face dovada un creator aparţine ideii pe care el o exprima făcând apel la experienţa vizuală cu ajutorul realităţii augmentate, în aşa fel încât rezultatul final să se ridice deasupra aşteptărilor sale.

Pe marginea gheții trece o pisică este punctul critic de unde se induce o idee care nu reuşeşte să se concretizeze în creaţie, ceea ce constituie o experienţă de sine derulată între manifestarea unei slăbiciuni de ordin profesional şi reacţia de revoltă în faţa unei puteri superioare pe care încă nu conştientizezi că o deţii.

*** Notă:** Ion Barna - *Eisenstein* , Editura Tineretului, 1966.

Pe unde nu trecea niciun pârâu, curge acum un fluviu

On Februarie 17, 2013

Valorifică-ţi potenţialul de leadership, prin dezvoltarea şi transformarea cunoaşterii tale într-un curent continuu pulsatoriu care străbate o întreagă viaţă de om.

În timpul facultăţii. Începusem să simt nişte porniri stranii în suflet ori de câte ori cădeam pradă restanţelor, nenumărate şi obositoare, poluante în accepţiunea mea. O consecinţă a unei inegalităţi inhibante, o neconcordanţă serioasă între valori, o povară grea, repartizată anapoda în existenţa mea. Era manifestarea unei forme de vid care părea să capete un caracter permanent.

Norocul chior al unui destin smuls dintr-un imaginar care Ceva în mine licărea intermitent: "Pot fi ceva mai mult decât un spaţiu gol, pot fi un nucleu de valorificare a potenţialului propriu în jurul căruia gravitează toate forţele. Pot fi descoperitorul acelei energii universale inepuizabile, vibraţionale, a acelei alchimii uitate sau ascunse care preschimbă realităţi. Ca o santinelă să slujesc ştiinţa transformării, disponibilă în limite foarte strânse, să o redresez astfel încât să-mi fertilizeze şi să-mi extindă orizonturile."

Nimeni nu bănuia cine sunt și ce voi putea ajunge. Un seducător fin al materiei, foarte persistent, descoperitor al unor energii auxiliare, capabil a le dezlănţui după voie. Un veritabil artist al configurărilor şi re-configurărilor, care înregistrează, apoi converteşte cu o preciziune infailibilă fiecare particulă a cunoaşterii, transformând-o într-un curent continuu pulsatoriu - peste care oricând poate fi suprapusă o putere electrică alternativă.

Concepţia omului faţă de nevoia intrinsecă de a fi altcineva rezidă din îmbunătăţirea stării de recunoştinţă faţă de eroul unei povestiri care este pregătită în orice moment să devină realitate.

Simţeam că funcţionez ca un generator electric, echivalentul unui dispozitiv de energie radiantă realizat de T. Henry Moray. În mod aproape mecanic eram sedus de propria mea curiozitate arzătoare, lucram la puterea mea maximă în mod permanent. Zdruncinat de setea descoperirii, mă lansam într-un proces de analiză şi creaţie torenţial, nestăpânit, mânat de tentaţia descoperirii fluidului invizibil, vital transformării.

O hotărâre luată de spirit şi credinţă. O alinare a gândurilor negre. O adâncă mânie îndreptată împotriva acelei forme de vid care mă înconjura, care mă sufoca, care mă limita trimiţându-mă într-un colţ întunecat. O încercare disperată de a mă descoperi. Cu ce şanse de izbândă?

Într-un fel, simţeam că fac parte din distribuţia filmului River Queen (2005), cu valenţe de poveste…plină de experienţe ce mă călăuzeau în scrierea poveştii vieţii mele. Dar filmul se termină astfel:

"În zilele acelea eram tristă, în pragul disperării. Acolo nu existau preoţi misionari, nici biserici unde să mă rog. Uneori îi spuneam păsurile mele soldatului Doyle, singurul meu prieten. El m-a învăţat că deseori ajută să-ţi pui gândurile pe hârtie. Deşi aş vrea să-i arăt uneori ce-am scris, cred că oricum n-ar citi niciun rând. Probabil ar arde foile sau le-ar azvârli în râu. Asta fiindcă ce-ai scris e numai pentru tine ca, văzând ce-ai scris, să înţelegi, poate, mai bine tot ce ţi s-a întâmplat… povestea vieţii tale."

În entuziasmul meu debordant, voiam să întorc cu forţa roata timpului ce se rostogolea mereu înainte, tot mai puternic, tot mai anevoios de abătut, ca o minge şutată din lovitură liberă, ricoşată într-o altă zonă, neştiută. Mă îndreptam cu viteză mare spre suprafaţa de teren accidentat în care puţini au curajul să intre. Am intrat în joc, pe un tărâm virgin. Aşa s-a năzărit ideea predestinării mele.

Leadership: Evoluţia ta de erou al unei dăinuiri în credinţă, inspirată dintr-o poveste reală, poate să capete o semnificaţie aparte din perspectiva unui destin individual care făureşte noi relaţii între Creaţie şi Creator?

Am păşit în laboratorul meu întunecos, locul unde se nasc contrariile şi se procesează ingredientele. Am aprins lampa. Am pus-o pe masa de experimente, încărcată toată cu substanţe variind de la o cantitate la alta (soluţii, compuşi, solvenţi, diluanţi, seruri, reactivi, aditivi) alese în funcţie de proprietăţile fiecăreia. Proprietăţi pe care le descoperisem eu însumi prin distilare, prin înlocuirea unor formule rigide, speciale, prăfuite de timp.

Strădanii impetuoase, continue şi împovărătoare care aveau ca scop desăvârşirea. Neluând în seamă nicio piedică din cale, voiam să ajung într-un singur salt, într-un elan ţâşnit cu putere din străfundurile conştiinţei, până la înţelesul vieţii. Să cunosc formele de transcendere a tuturor limitelor şi, în egală măsură, a progreselor, era planul unei minţi pline de artă care ştie să facă diferenţa dintre etern şi efemer.

Iar atunci când un Samson îşi încordează pumnii, până şi muntele cel mai semeţ se apleacă şi se prăbuşeşte în cele din urmă, descătuşând toate energiile latente, toate misterele lumii sigilate în capsula timpului.

Leadershipul se aplică ideii de trecere permanentă de la statutul de promotor al unor aspiraţii înalte, pentru o realitate socotită mai mult închipuită, la statutul de subiect al unui destin aparte.

Îndărătul operei mele nu se afla o forţă poetică extraordinară ca a lui Dickens. Ea nu oglindea concepţiile filozofice şi politice ale vremii, ca opera lui Milton. Nici nu încorpora personaje, aidoma nehotărâtului Hamlet al lui Shakespeare, pentru ca al ei conţinut să invite la meditaţie sau la replică.

Opera mea era compusă din cu totul alte elemente alchimice. Ea concentra o subtilă energie pe care apoi o elibera în alt tip de energie, complet nouă, determinantă, tumultoasă şi misterioasă totodată, care înfierbânta sufletul şi mintea până la capăt. Îndărătul ei se afla sensul vieţii, dar care se desfăşura după regulile mele proprii, într-un sens giratoriu.

Alchimia înseamnă transformare. Şi ea se comportă la fel ca electronii: sub formă de undă. O undă care se propagă în direcţia sensului dorit, afectând, într-un fel, realitatea. Destinul meu era subiectul operei unui artist care ştie un lucru: creativitatea este peste tot.

Leadership: Lupta ta cu condiţia care te defineşte ca om este împlinirea unui destin care te pune faţă în faţă cu cea mai mare provocare: puterea în expansiune a unei creaţii aflată de secole în bogăţia nesfârşită a lumii?

Te îndrepţi cu viteză mare spre acea suprafaţă de teren accidentat în care puţini au curajul să intre? Ai curajul să intri în joc, pe un tărâm virgin?

A fi un alchimist înseamnă să ai puterea să te transformi, să alimentezi cu energie acel

puternic pivot al auto-cunoaşterii, acea parte constitutivă din nucleul de valorificare a potenţialului propriu. Tot spaţiul acesta gol sau neroditor care acum te defineşte, întinzându-se pe un teritoriu vast, poate fi oricând umplut, populat, fertilizat cu o anumită concentraţie de substanţă, bine definită, uşor de tolerat pentru dezvoltarea ta, menţinută în anumite limite şi condiţii.

În timpul acestor oscilaţii - de la minim la maxim, de la o constantă de joasă tensiune la una foarte înaltă, de la "a fi", la "a nu fi", are loc, fireşte, o adevărată şlefuire a propriei personalităţi, a propriei tale creaţii, aplicând noutatea şi eficacitatea. Pe unde nu trece niciun pârâu, poate curge oricând un fluviu dacă canalizezi apele spre acest făgaş nou.

Rezultanta care se formează – un orizont fertil şi bine structurat dezvoltării, nu o virtuozitate sau o simplă erudiţie, ci o adevărată alchimie a experienţei individuale, a depăşirii de sine, a lepădării de vechile percepţii - acţionează asupra punctului de maximă intensitate, leadershipul. Deci, fii întotdeauna cumpătat în ascensiunea ta, nu-ţi solicita prea tare "sursa" de progres.

Dar, la rândul ei, această rezultantă, generată de un cumul de parametri, factori, contraste, curenţi cu acelaşi sens şi direcţie, se poate oricând descompune – poate reveni la starea iniţială în cazul unei dezvoltări anormale. Sau în cazul unei "agresiuni externe" – atunci când interacţionezi cu oameni dominaţi de o gândire nocivă – aceia care n-au altceva mai bun de făcut decât să-ţi critice, încă de la bun început, eforturile şi entuziasmul.

Puterea în expansiune a unei creaţii aflată de secole în bogăţia nesfârşită a lumii se evidenţiază în noutatea cu care întâmpini o realitate a cărei actualizare permanentă depinde de felul cum te raportezi la existenţa unui Creator care a asimilat chintesența unei cunoaşteri de cea mai înaltă clasă.

Pe unde nu trecea niciun pârâu, curge acum un fluviu marchează sfârşitul mediocrităţii, şi lupta spre acea ţintă greu de atins: desăvârşirea.

Dacă vrei să ajungi în plutonul fruntaş al alergătorilor de cursă lungă, acceptă să te supui unui antrenament obositor şi permanent. Pentru a depăşi mediocritatea, formează-ţi o viziune clară asupra propriului tău ţel şi asupra limitelor tale.

Pelerinajul adevărului

On Aprilie 05, 2009

Ocupă-te atent de fiecare detaliu al personalităţii tale, dovedind iscusinţă în conturarea caracterului tău.

Nimeni nu îndrăznise să o ajute pe văduva Regina Lampert, decât Peter Joshua, un necunoscut a cărui intenţii foarte bune şi generoase, s-au dovedit a fi până la urmă doar o strategie de a-i intra în graţii cu orice preţ pentru a pune mâna pe averea soţului ei decedat. Totul era perfect la ei doi. El manifesta o atitudine responsabilă şi de încredere, care exprima, într-un mod clar şi profund un sentiment de siguranţă şi solidaritate, în timp ce ea, vrăjită, sedusă de farmecul lui, s-a lăsat purtată de scenariul închipuit de el, făcând totul sub îndrumarea şi influenţa lui.

Totul s-a schimbat în viaţa ei atunci când a ajuns la concluzia că Peter Joshua nu era decât un escroc care şi-a folosit calităţile cu care îl înzestrase natura pentru a o convinge să-i divulge locul unde se aflau banii soţului ei. Astfel, pentru prima dată s-a clarificat legătura dintre cele două planuri: cel afectiv, care îi crea un sentiment de siguranţă şi confort, şi cel raţional, care îi provoca un anumit grad de instabilitate, risc şi uzură interioară. Regina Lampert era pusă la o adevărată încercare.

Este clar, pentru cine a urmărit filmul „Charade (1963)", că în tânăra văduva coexistau două mentalităţi, două concepţii diferite despre caracterul lui Peter care se situau, însă, amândouă pe poziţii diametral opuse în privinţa relaţiei existente dintre ei. Una era atitudinea limitată, prudentă faţă de el, cealaltă constituia o acceptare a oricăror compromisuri, fapt ce-i dădea o stare de aparentă siguranţă şi stabilitate.

Leadership: Poţi să scoţi la iveală valoarea propriului sine cu ajutorul unei experiențe vizual-revelatoare corespunzătoare derulării unui flux de imagini puternic încărcate cu stări afective?

Un film cu final fericit, aş spune. Peter se îndrăgosteşte de Regina şi chiar o salvează de la moarte, scăpând-o din mâinile celorlalţi vânători de averi ale soţului ei decedat. Dar ce anume l-a transformat pe Peter într-un bun samaritean?

Caracterul. Sau mai bine zis, nevoia de restabilire a echilibrului şi a adevărului în viaţa lui şi a celorlalţi. El a avut voinţa de a smulge „răul" din propriile interese şi gânduri nocive. Revenirea morală la vechile sale concepte şi credinţe a însemnat eliberarea sa din „boxa acuzaţilor", din cuşca credinţelor impure şi dăunătoare.

Între Peter şi Regina se interpuneau mereu nişte imagini de senzaţie, bune de pus pe fundalul unei vieţi zbuciumate, dar aventuroase şi provocatoare. Imagini pline de surprize în care se poate efectua o căutare a stărilor afective, mai mult privind felul cum se conturează personalitatea umană în jurul unor vieţi în care se împletesc nevoi şi circumstanţe, în care lucrurile mici fac diferenţele mari.

Putem înţelege mai uşor felul în care imaginile pot crea un impact pozitiv sau negativ în viaţa oamenilor, după felul cum ei îşi privesc durerea în faţă şi încep să se simtă egali.

Unii oameni îşi privesc diferenţele drept resurse de sensibilitate şi raţionament în ceea ce priveşte esenţa respectului sine. Alţii, poate mai lipsiţi de dimensiunea spirituală a vieţii, îşi

privesc perirea cu ochii, decât să-şi împărţească avutul, pierzând adesea înţelegerea cuprinzătoare a vieţii lumii şi a vieţii lor în ea. Şi mai sunt şi aceia care îşi privesc în taină propriile slăbiciuni aşa cum şi-ar privi reflexia în oglindă, şi în mod indirect fac referire la lipsurile lor, neavând astfel nicio şansă de a-şi atinge obiectivele.

Leadership: Felul cum iau întorsătură lucrurile pe care le crezi că stau în controlul tău, semnifică faptul că orice caracter poate apărea în poziţia multiplă în care este poziţionat de sensul vieţii?

Personalitatea ţi-o conturezi după bunul plac, după regulile pe care singur ţi le impui. Este interesant şi semnificativ faptul că tocmai de aici se desprinde germenele adevărului, al cunoaşterii personale. Să-ţi cunoşti bine propriul tău „conţinut", adevărata ta personalitate - unde trebuie să predomine atitudinea pozitivă, o mentalitate sănătoasă, calităţile alese şi bine consolidate – este primul pas către dobândirea liniştii sufleteşti şi a unei rezonanţe profund benefice asupra celorlalţi. Din confruntarea cu tine însuţi apari un alt om, întreaga concepţie a celorlalţi asupra personalităţii tale se schimbă. Ei fac cunoştinţă cu un alt om.

Aşa cum primăvara rândunica se întoarce la cuibul ei pe care l-a părăsit toamna, tot aşa şi tu, pentru ca leadershipul tău să aibă un ecou care să te onoreze, trebuie mai întâi să te redescoperi, trebuie să te întorci la propriul tău „adăpost" pe care l-ai părăsit din vina ta sau a altora, şi să-ţi refaci echilibru interior. Ocupă-te atent de fiecare detaliu al personalităţii tale, dovedind iscusinţă în conturarea caracterului tău.

Un caracter poate apărea în poziţia multiplă în care este poziţionat de sensul vieţii atunci când are de ales între două variante opuse: îşi poate imagina lucruri care sunt false, dar poate înţelege numai lucruri care sunt adevărate, sau atunci când încearcă să-şi păstreze integritatea în pofida celor mai cumplite încercări.

Leadershipul poate să lărgească sensul vieţii dacă ajungem la constatarea că orice om care are o putere este înclinat să abuzeze de ea; că orice om care încearcă să fie bun tot timpul este obligat să se ruineze în rândul numărului mare de oameni care nu este bun; şi orice om care iubeşte ceva simte nevoia să facă mărturisiri.

Pelerinajul adevărului desemnează acel proces interior de cunoaştere prin care discerni binele de rău. Felul în care îţi conturezi caracterul rezidă tocmai din acest proces de autocunoaştere, prin care poţi „birui" acel drum în pantă care, în timp, îţi poate deteriora serios leadershipul şi raporturile cu ceilalţi.

Adevăratele verdicte se dau la aflarea adevărului. Dacă oamenii constată o diferenţă de „ton" între majoritatea acţiunilor tale, atunci te vor părăsi.

Pentru primele generaţii ale renaşterii perspectiva avea o însemnătate deosebită

On Februarie 14, 2013

Învaţă să surprinzi o imagine egală cu dimensiunile unei depărtări în care vrei să ajungi, fără să fii afectat de receptarea unei realităţi cu vădite caracteristici de "lărgire a orizontului".

Perspectiva. S-au mai scris și alte lucrări despre perspectivă, însă ele nu aduceau nimic nou, ci se mărgineau să repete cele scrise de Euclid asupra punctului de vedere și al punctului de fugă. Dar faptul că se scriau asemenea lucrări arată că pictorii au început să manifeste interesul pentru această problemă, care avea să schimbe cu totul concepția lor despre pictură. În timpul Evului Mediu nimeni nu și-a pus problema ca într-un tablou bidimensional să fie redat spațiul cu trei dimensiuni. Existau anumite procedee care dădeau figurilor și obiectelor un anumit relief, dar acestea erau prezentate într-un mod stilizat, iar pictura, în întregimea ei, avea un caracter simbolic.

Pictorii de la începutul Renașterii au înțeles însă că perspectiva le dădea posibilitatea să pună în evidență spațiul în care se aflau modelele, reprezentate în așa fel ca să se poată stabili, dintr-o singură privire, legăturile și raporturile dintre formele reprezentate, care ar putea apărea chiar izolat sau dezlipite unele de altele. În cartea lui Leone Batistta Alberti, "Despre pictură", tabloul trebuia să fie "ca o fereastră transparentă prin care să apară o parte din lumea vizibilă". Această carte este de altfel primul tratat sistematic despre perspectivă. El arăta cum se pot reprezenta în perspectivă mai multe segmente egale, așezate unul în urma celuilalt și mai ales că perspectiva cercului aflat într-un plan neparalel cu planul tabloului era o elipsă.

Deși Alberti a compus primul tratat sistematic privind perspectiva, Filippo Brunelleschi este considerat ca întemeietorul perspectivei moderne și, în cinstea lui, Florența i-a ridicat un monument funerar. El a arătat că într-un tablou se poate crea o desăvârşită iluzie a spațiului cu trei dimensiuni, dacă punctul de vedere, adică ochiul observatorului, este situat la o distanță care corespunde cu distanța reală la care se află tabloul. El a introdus noțiunea de linie a orizontului și pe aceea de tablou fictiv transparent, care se interpune între tablou și obiect. El și elevii lui, Masaccio și Paolo Uccello foloseau aceste noțiuni în picturile lor, iar despre Uccello, Leonardo da Vinci își amintește că exclamă: "O ce dulce este perspectiva". Tot Uccelo a desenat, pentru prima oară și după multă trudă, un cerc în perspectivă !

Leadership: Perspectiva la care te raportezi îţi dă posibilitatea să pui în evidență spațiul în care se află modelele de percepţie a imaginilor pe care le sesizezi în jur, reprezentându-le în așa fel încât să se poată stabili legătura dintre ceea ce îţi imaginezi şi realitate?

- În adevăr, elipsa pe care Apoloniu o îndrăgise și îi studiase proprietățile cu vreo 17 secole înainte, a fost redescoperită, într-o formă cu totul rudimentară, acum în Renaștere. Aici recunoaştem un singur model de percepţie a imaginii pe care Apoloniu a sesizat-o în jur: când imaginea este percepută ca obiect al experimentării directe a momentelor vieţii, atunci reprezentarea viziunii artistice va depinde de ceea ce se întâmplă la "suprafaţa", nu în background.

- N-ai de ce te mira, tocmai de aceea suntem în epoca Renașterii. Însă, practic, lucrurile nu au mers chiar așa de ușor, de pildă, problema punctului de fugă s-a impus destul de târziu, fiindcă pictorii nu puteau accepta ideea că dreptele paralele s-ar putea întâlni. De-abia pe la jumătatea veacului al V-lea el apare în tablourile lui Giotto, Lorenzetti, Jan van Eyck,

aplicat la liniile paralele dintre dușumele sau cele ale plafonului.

- Să nu uităm că această teorie a perspectivei și strâns legată de ea, aceea a proporţiilor, impuneau studii serioase de geometrie, iar aceste studii s-au dezvoltat în secolele XV și XVI. Iată ce scrie Jan Bialostocki în cartea ce o avem înainte.

Pentru primele generații ale Renașterii perspectiva avea o însemnătate deosebită. Din punctul lor de vedere "perspectiva matematică nu numai că dădea garanția corectitudinii (reprezentării realității), dar oferea, de asemenea - și poate, mai ales, de aceea - și garanția unei perfecțiuni estetice". Problema corectitudinii reprezentării spațiului și a ceea ce se află în el era, așadar, în esență, identică cu problema de bază a esteticii Renașterii, care se remarcă prin accentuarea armoniei drept cel mai important principiu compozițional.

Și mai era ceva, acei pictori-geometri care au pătruns mai adânc problema, nu erau dispuși să o difuzeze în afară de cercul restrâns al elevilor pe care-i avea lângă ei. Știu că Albrecht Durer a făcut o călătorie anume, din Nürnberg în Italia, la Veneția și Bologna ca să învețe secretele perspectivei, "perspectiva tainică". Când s-a întors a scris o geometrie specială pentru pictori: îndrumări pentru măsurători cu ajutorul compasului și a riglei, probabil inspirată de cartea lui Pierro della Francesca Despre perspectiva în pictură, care circulă în manuscris sau poate după "Tratatul de pictură" al lui Leonardo da Vinci.

Leadershipul depinde de ceea ce vrei să transmiți prin imagine, acolo unde are sens paralelismul dintre elementul de noutate pe care îl marchează experimentarea directe a momentelor vieţii şi extinderea unui orizont care se întinde dincolo de tine.

Pentru primele generaţii ale renaşterii perspectiva avea o însemnătate deosebită. Dar şi în prezent, şi mai ales în viitor, perspectiva va avea asociate conţinuturi alcătuite din obiecte, proprietăţi ale acestor obiecte, precum şi relaţiile dintre obiecte.

Dar mai mult decât atât, mi-aş permite o altă abordare a perspectivei: să ai conştiinţa unui orizont care se întinde dincolo de tine, găsindu-i relevanţa în modul realităţii de a reconstitui un moment de mare încercare aflat sub influenţa surprinzătorului (sau aleatorului).

*** Notă:** Câmpan, Florica - *Povestiri cu proporţii şi simetrii,* Editura Albatros, 1985.

Pentru un singur diamant am cucerit o lume

On Ianuarie 28, 2013

Alege calea certitudinii în căutarea constantei de a fi ceea ce eşti cu adevărat, raportându-ţi continuu leadershipul la valorile cele mai înalte.

Temudjin avea cel mai preţios dar, viaţa Şi a ales să o trăiască alături de aleasa lui, Börte. Dar, fără să ştie ce îi va rezerva destinul, el şi-a îndreptat paşii spre un făgaş neprevăzut, tot mai firav. O rătăcire perpetuă, uneori atingând momente dramatice, o linie şerpuitoare în cenuşiul întins şi diversificat al riscului, al nesiguranţei şi incertitudinii.

Spuma evenimentelor se solidifică. Chiar atunci când lumea-i era mai dragă, cineva o răpeşte pe Börte de lângă el. Şi din acest moment se cutremură totul în el, şi odată cu el, tot pământul, toţi polii se tensionează, cerul se întunecă, vântul se intensifică până ajunge la vijelie. Înverşunat, porneşte în căutarea ei.

În ciuda tuturor eforturilor de a o regăsi, este respins, lovit, rănit, hăituit de toţi. Dar, ca un munte care nu se clătină, el continuă căutarea, focul dragostei îl vindecă de fiecare dată, cauterizându-i rănile cele mai adânci. Un nor binefăcător acoperă tot ceea ce este *malade et faible* , puterea unui singur gând îl ţine în viaţă: o vrea pe Börte.

Leadership: Răspunsul tău în cazul evenimentelor care te prind în vârtejul lor are în vedere formarea capacităţii de a recunoaşte şi a aprecia diversitatea lumii înconjurătoare din punct de vedere al regretului de a nu fi la putere?

În tot acest aprig exil, întreţinut de speranţa regăsirii ei, Temudjin observă, pătrunde cu privirea şi cu spiritul realităţile lumii, adulmecă ca un animal de pradă toate dedesubturile îndoielnice, necunoscute, care devin tot mai primejdioase. Nu scapă nimic din multiplele aspecte ale societăţii. Dar, în acelaşi timp, regretul de a nu fi la putere şi de a nu avea o armată care să-l susţină, îi schilodeşte certitudinea în viaţa de zi cu zi, îi chinuieşte sufletul, îi arată zădărnicia părerilor de rău.

Avântul spre dragoste este o sabie cu un tăiş foarte ascuţit. Temudjin tinteşte cu uriaşa sa voinţă asupra întregului, toată artileria şi-o pune la bătaie: energia, creativitatea, iscusinţa, înţelepciunea, perspicacitatea, tenacitatea – toate exacerbate prin asimilarea unei alte scări a valorilor, ca într-un performant laborator care lucrează fără întrerupere, destinat consolidării şi cristalizării propriei sale personalităţi.

De mai multe ori îşi distilează convingerile, aidoma un adevărat alchimist, până când substanţa rezultată devine tot mai stabilă, mai pură, mai omogenă, mai încărcată pozitiv, mai activă la temperaturi extreme. Constant, noi picături de energie rafinată şi sublimă îi revitalizează forţele.

Leadership: Eşti pe cale să reduci la maxim esenţa conştiinţei de a fi unic prin renunţarea la dependenţa de o realitate care îţi răneşte puterea şi hotărârea de a te ridica la nişte aşteptări mult prea exagerate?

Aliindu-se cu Jamukha, fratele său de sânge, Temudjin porneşte un război în toată regula, o adevărată cruciadă de salvare, pune stăpânire pe provincii, una după alta. Datorită credinţei sale într-un Dumnezeu puternic, putere care se personifică în concepţiile lui despre sine, el începe să îşi recunoască conştiinţa de a fi unic, în loc de a se refugia într-o zonă a neputinţei

şi a lipsei de viziune.

Jamukha încearcă deseori să-i schimbe convingerile: " *De ce o vrei atât de mult pe Börte, de ce te încăpăţânezi s-o găseşti? Am o mie de femei frumoase. Îţi pot da câte doreşti.* "

Dar un stejar cu rădăcini puternice nu se poate transforma niciodată într-o păpădie care îşi scutură puful la cea mai delicată adiere de vânt. Acolo unde viaţa dă la iveală mii de varietăţi, Temudjin nu cunoaşte decât o singură constantă. Voinţa lui e condensată tot mai mult numai în jurul ei. Căci el nu vrea orice diamant, ci îl vrea pe cel mai valoros, pe cel mai scump, pe cel de 1000 de karate, suma valorilor tuturor celorlalte nestemate, bijuteria cea mai rară.

Lumea lui e mai săracă decât realitatea, dar mai intensă, mai plină de însemnătate numai la gândul că o va regăsi pe Börte. Pretutindeni, tot mai departe se desfăşoară voinţa sa universală, ca şi a inestimabilului său diamant. Doi poli se atrag de la distanţă prin forţe de natură magnetică foarte puternice. Căci, la rândul ei, Börte îl aşteaptă, îl vrea numai pe el. Numai un diamant poate şlefui alt diamant, la fel de puternic şi de cizelat în virtuţi.

Leadership: Ce anume te defineşte în cazul unei descrieri a realităţii în spaţiu şi timp, când eşti constrâns să te concentrezi asupra modului în care percepi şi interpretezi urmarea unei victorii fabuloase?

În cele din urmă Temudjin o găseşte pe Börte. Dar regulile vieţii se înăspresc şi mai tare, pe alt plan se manifestă ele de această dată. Căci fratele său, Jamukha, se desparte de el, şi declanşează războiului – tocmai împotriva lui.

Din nou, Temudjin înfruntă imposibilul, din nou este hăituit, rănit, ajuns sclav, închis în cea mai întunecată închisoare. Dar din nou păcăleşte moartea, diamantul are puteri supranaturale care risipesc orice temeri, dureri şi neajunsuri.

Are loc bătălia finală pentru supremaţie. Cine va sta la cârma lumii? Doi titani se înfruntă. Doi zei se înfurie odată cu furtuna, două armate se încleştează cu înverşunare, două forţe concurente, de temut, se manifestă simultan, se opun, încearcă să se anuleze una pe cealaltă.

O întreagă lume poate fi cucerită cu sabia, dar numai printr-o puternică motivaţie lăuntrică.

Bătălia este câştigată. Şi numai unul singur rămâne în picioare. Numai un singur tip uman ţine cu îndârjire capul sus şi sabia ridicată deasupra unui demon cazul fatalmente la pământ. Învingătorul ! Acela care a păstrat întotdeauna adânc înrădăcinat în suflet un diamant, acela a cărui valori sufleteşti, construite din materialul cel mai dur, au rămas bine înţepenite în scoarţa timpului.

După suprafaţa teritoriilor cucerite, Temudjin, cunoscut sub numele de Ginghis Han, acest războinic aproape indestructibil, a fost cel mai mare cuceritor din toate timpurile, mai mare şi decât Alexandru Macedon. Ceea ce îl defineşte pe un asemenea conducător în cazul unei descrieri a realităţii în spaţiu şi timp, este modul lui de a nu se uita în altă direcţie decât cea în care crede cu tărie că va învinge.

Leadership: Cum contribuie rezultatul căutărilor tale la formarea caracterului tău, prin exerciţiul confruntării cu un exces de putere?

Eşti un stejar cu rădăcini puternice sau o păpădie care îşi scutură puful la cea mai delicată adiere de vânt? Porţi mereu viu în tine un ideal? Unde se află diamantul care te poate favoriza să-ţi depăşeşti limitele? Persişti în căutarea lui?

Expertul în materie de leadership, John Maxwell avea dreptate când afirma: " *Leadership înseamnă o minte şi un suflet deschise. Dacă acest gând îţi creşte pulsul şi îţi face inima să bată mai tare, atunci vei avea un impact mai mare asupra vieţilor celorlalţi.* "

Leadershipul nu este doar o combinaţie de caracteristici speciale deţinute de anumiţi indivizi, ci un act raţional de angajare existenţial-definitoriu, marcat de responsabilitatea fiecăruia pentru formele concrete de configurare a viitorului, prin intermediul propriilor sale "căutări".

Rezultatul căutărilor tale, necesar pentru a-ţi lămuri cauza şi menirea, va pune bazele caracterului tău. Ţinteşte cu uriaşa ta voinţă asupra întregului din jurul tău. Culege de pe traseul dificil pe care îl parcurgi toate roadele care îţi pot facilita dezvoltarea şi desăvârşirea.

Excesul de putere este o regăsire a propriei meniri în raport cu asumarea unei noi identităţi care nu mai permite emoţiilor să îţi domine viaţa.

Ca un ceas care bate la ora fixă, leadershipul se construieşte pornind de la două timpuri: trecutul şi prezentul. Trecutul nedefinit din mintea individului şi prezentul concret, uneori fracturat, al convenţiei: *Ego-Valori-Virtuţi* în jurul cărora el trebuie să graviteze. Dar nu un prezent ficţional, contorsionat şi miop. Şi se definitivează într-un viitor cert - printr-o gândire liniara, sau, dimpotrivă, într-un viitor nesigur - printr-o gândire tip "vârtej", foarte tulbure.

De aceea, prognoza optimistă şi calculul pozitiv al traiectoriilor probabile ale leadershipului se justifică în contextul analizelor prospective ale propriului tău caracter. La a cărui formare şi consolidare poate să contribuie în mod direct un "diamant".

Leadershipul este un diamantul care se regăseşte mereu în tine, şlefuit şi finisat (pentru a străluci) de un cumul de valori personale precum: forţa interioară, persistenţa, stabilitatea, continuitatea, intransigenţa, angajamentul, devotamentul.

Timpul trece, iar ceasul leadershipului se opreşte din ticăit dacă, în timpul căutărilor tale, nu înveţi din fiecare lecţie a vieţii, dacă nu ţinteşti cu uriaşa ta voinţă asupra „întregului' din jur, dacă nu-ţi pui la bătaie şi mai ales dacă nu-ţi impregnezi bine în suflet acele valori înalte care te revigorează, care formează un ideal, care să-ţi confirme orizontul de aşteptare.

În aceeaşi măsură, atitudinea ta în timp, faţă de modul în care reacţionezi sau acţionezi în anumite circumstanţe, cel puţin în parte, trebuie să aibă girul unei autorităţi morale ferme şi categorice – astfel încât să anulezi orice forţă ostilă care încearcă să te schimbe, să te controleze, să te saboteze.

Defectul principal al multor aşa zişi lideri este că nu au girul unei autorităţi personale puternice, impregnate cu cele mai durabile valori şi virtuţi. Iar fragilitatea convingerilor, relativitatea valorilor sau statusul incert pe care şi-l asumă, pot fi năruitoare.

Înainte să măsori valoarea leadershipului tău, învaţă să împlineşti menirea vieţii tale prin căutarea şi puterea unei iubiri binecuvântate de Dumnezeu.

Pentru un singur diamant am cucerit o lume desemnează acel uriaş efort şi a investiţiilor

personale pe termen lung, care pornesc dintr-un imbold lăuntric irepresibil.

Voinţa ta e condensată tot mai mult numai în jurul unui diamant? Cât de departe poate ajunge voinţa ta? Înfrunţi imposibilul pentru atingerea unui ideal? Există o forţă duşmănoasă care încearcă să anuleze forţa ta morală? Valorile tale sunt construite din materialul cel mai dur, rămân ele bine înţepenite în scoarţa timpului?

Alege calea certitudinii în căutarea constantei de a fi ceea ce eşti cu adevărat, raportându-ţi continuu leadershipul la valorile cele mai înalte.

Percepţia unei culori cuprinsă într-o singură privire

On Mai 17, 2022

Ceea ce vezi influenţează opţiunile care îţi sunt la dispoziţie ca să recunoşti transformarea neîntreruptă a obişnuitului în creaţie artistică.

Este o zi călduroasă de vară. Soarele luminează neîncetat totul în jur. Mă îndrept cu paşi mărunţi şi siguri spre Palatul Culturii când, deodată, ochii mei rămân surprinşi de culoarea bleumarin care marchează zona de parcare pentru persoanele cu handicap. Este o măiestrie să te ştii artist, unul capabil să dezvolte strânse legături cu spațiul din jur, în contextul unei adaptări continue la noi realităţi de creaţie. Dar este o artă sublimă a privirii să sesizezi cu colţul ochiului, cu flexibilitatea subiectivismului, ceea ce nu se supune la prima vedere tendințelor în continuă schimbare ale designului.

Culoarea bleumarin a declanşat un moment unic de luciditate, de scânteieri în gândire. La aceasta se adaugă măiestria artistului care constă în a descifra însuși miezul lumii în licărul unei priviri care sesizează culoarea, o asortează cu nuanţele unei delicate sensibilităţi, dar nu aşa cum este ea de fapt, nu ca rezultat al acţiunii luminii (de diferite lungimi de undă) asupra ochiului, ci ca referinţă la un model de formare al Sinelui care are de multe ori o puternică componentă spirituală.

Mă întreb: ştie oare culoarea că o privesc în raport cu intensitatea luminii, nu doar ca pe o imagine care întruneşte calităţile fotografiei de orientare? Bănuieşte ea oare că o privesc nu doar ca pe un instrument puternic, capabil să convingă și să influențeze privirea privitorilor, ci ca un proces de constituire a Sinelui prin construcţia de Sensuri? Are oare culoarea bleumarin un suflet, un suflet renăscut din furtuni, de dincolo de nori? Are ea o vedere, o claritate surprinsă de impresia corectă asupra unei perspective de înnobilare sufletească într-o lume iluzorie? Cât de mult rezonează ea cu percepţia privitorului ei?

Leadership: Poţi să îţi extinzi limitele realităţii privindu-te în raport cu un mijloc de exprimare al valorii unei retrospective vizuale ce este direct proporţională cu imaginea sinelui?

Şi dacă culoarea infinitului, cauza dorinţei de a mă întoarce la un anumit moment, este o putere care influențează direct sufletul, atunci ce simt cu adevărat când mă privesc în raport cu un mijloc de exprimare al valorii unei retrospective vizuale ce este direct proporţională cu imaginea sinelui? Toată lumea trece pe lângă ea, o calcă în picioare, alţii o scăpă din vedere, neştiind să folosească acest indicator suprem al complexităţii desenului pentru a corecta anumite aspecte ale Sinelui și pentru a dezvolta calități necesare propriei dezvoltări.

În acest caz, valoarea unei retrospective vizuale este dată de acea stare unică, acea senzaţie inedită a momentului când simţi că domini timpul, când simţi că eşti prins între dimensiuni şi nu vrei să grăbeşti lucrurile. Iar eu exact asta simţeam, că pot stăpâni o eternitate într-un singur loc, fapt total contrar concepţiilor mele despre lume şi viaţă, că pot să concentrez într-un singur punct imaginar, pe care l-am botezat "controller", toate reflecțiile, experiențele și gândurile mele.

Astfel, imaginea sinelui devine subiectul imaginii unei noi realităţi *: "Ceea ce văd la mine este ceea ce mă surprinde la prezenţa obişnuitului."* Prin ai mei ochi, atât de atenţi la lucrurile banale, reuşesc adesea să disting sau să asociez diferite variaţii ale culorilor, formelor, stilurilor, între realitate şi ficţiune, între evanescent şi etern, cu precădere în clipa când doresc cel mai puţin să surprind obişnuitul. Deja pot să mă gândesc la mine ca la un artist care, fiind n relaţii profunde cu materia, reuşeşte să-şi toarne imaginaţia veșnic

schimbătoare n matricea solidă a realului vizibil, nu a realului ascuns de ochii lumii. Mai mult ca oricând, culoarea bleumarin mi-a făcut azi peste tot cu ochiul.

Leadership: Poţi să-ţi dezvolţi puterea de percepţie asupra semnificaţiei conceptului de "imagine fidelă unor părţi ale realităţii", în substratul unei sensibilităţi şi al unei viziuni care îţi defineşte esenţial unicitatea?

De fapt, marele avantaj al culorii bleumarin este că, integrând-o într-o imagine de decor, ea poate să ia multe nuanţe diferite, chiar dacă în timp se poate estompa, putând fi urmărită până în momentul declanşării unei meditaţii asupra raporturilor ce ţin de aparenţă şi esenţă, cu trecere metaforică între cele două teme: idealul de adevăr renascentist şi idealul culturii de performanţă.

Până la urmă, numai puterea de percepţie a ochiului uman este cea care limitează gama de tonalităţi în spectrul culorilor inspirate din natură, atât de vii şi expresive. Însă impactul pe care bleumarinul îl produce asupra mentalului devine un fel de "axis mundi", un centru al artei manieriste, un fel de oglindă în care artistul se vede pe sine însuși, un semn din lumea lui Morpheus, care indică faptul că ceva trebuie schimbat la realitate. Aici, fără îndoială, cuvintele marelui pictor Nicolae Grigorescu întăresc punctul meu de vedere:

"Ochii sunt uşor de făcut. Privirea-i mai greu. Orice lucru are o taină a lui mai expresivă, acolo-i taina vieţii lui. De obicei o găsesc numai acei care o caută. Vai de cel care, privind un lucru frumos, deci viu, căci toate lucrurile frumoase sunt vii, privindu-l numai o dată şi numai dintr-un punct de vedere, crede că l-a văzut destul ! Nimic nu este o repetiţie, nicio floare, niciun lucru, nicio culoare. Nicio undă de lumină. De milioane de ani, de când trimite soarele raze pe pământul nostru, n-au venit doua la fel."

Aşa este şi cu a mea culoare, bleumarin. În acel moment nu mai era niciuna la fel. Pare just, N-am reuşit s-o văd decât într-un pătrat fotogenic, deschis privirii care ştie să caute neobişnuitul în banal, acolo unde lumea nu se înghesuie să observe reprezentările artistice ale frumosului. Spontan, revelator, cuprinzător, un ochi nou s-a deschis în lumea formelor de aici înainte, un ochi care simte că poate colora o lume cu acea culoare pe care sufletul o numeşte "Marea Lucrare" - ca şi când ar cunoaşte-o de mult şi, recunoscând-o, o primeşte bucuros şi se pune la unison cu ea.

Îmi construiesc leadershipul prin orice imagine care îmi trece prin faţa ochilor. Ceea ce văd influenţează opţiunile care îmi sunt puse la dispoziţie ca să recunosc transformarea neîntreruptă a obişnuitului într-o creaţie artistică. Întru totul, leadershipul aparţine planului Creaţiei.

Percepţia unei culori cuprinsă într-o singură privire poate să creioneze o imagine a tuturor lucrurilor din jur, dar din care artistul extrage pentru propria-i creaţie doar elementul căruia îi amplifica calităţile, nu şi cel pe care îl distruge prin ascundere, prin uitare, prin rutină ori prin confruntarea cu restul lumii.

Perdeaua neagră a unei slăbiciuni ascunse

On Iulie 20, 2012

Şlefuieşte-ţi cu grijă propriile aspiraţii, ca să te poziţionezi cât mai bine în raport cu tine însuţi.

Ideea care începea să prindă contur în mintea mea, era că voi reuşi să evadez. Să ies din starea sufocantă, antipatică, în care ajunsesem, proprie unui călător care străbate un tărâm plin de obstacole. N-aveam o asemenea forţă a gândirii ca Spinoza, Kant sau Locke care să indice un drum în confuzia în care încă mai continuă să se complacă mulţi filosofi, a cărei nervură principală o constituie acea scânteie reală a visului nedomesticit de atingerea unei viziuni a beatitudinii asupra lumi. Aşa că eram dispus să accept de pomană orice provocare venită din răceala minţii.

Era vădit ca în acea clipă nu mai eram eu însumi. Nu mai eram un rătăcitor, *un solitaire sur les royaumes de l'objectivité* , un condamnat la o anumită soartă, la o sentinţă definitivă care ucide spiritul şi înrobeşte mintea. Ci un filozof cercetând cu de-amănuntul domeniul necunoscutului. Reuşisem să păcălesc uşor soarta?

Urmăream pedepsirea unei crime, asemenea unui personaj din " *1001 de fantome* ", al lui Al. Dumas. Şi dacă era adevărat că am comis crima de care mă acuzam singur, acest salt spre autoevaluarea corectă ar fi fost o ispăşire. Îngrozitoarea "crimă" era aceea de a sluji unui scop diferit, mai strălucit, mai sofisticat, mai plin de sens decât ar fi fost în măsură să realizeze unul ca mine, un necunoscut în lumea iluştrilor, a artiştilor.

În afara frontierelor conştiinţei mele se contura un punct de vedere care apăruse aproape din nimic. Ca şi cum aş fi fost dintr-o dată învăluit în întuneric, şi în tot acest întuneric lugubru ar fi apărut o lumină binefăcătoare care îmi transmitea în chip tainic: "Poţi fi altcineva."

Leadership: Poţi să trăieşti din ceea ce nu ştii despre tine, lăsându-te pătruns de toată solemnitatea ce se cuvine unui final aparținând necesităţii de stimulare a dualităţii "artist-magician"?

Trăiam din ceea ce nu ştiam despre mine, adică mă lăsam pradă fanteziei de a mă desprinde de reguli, de a mă rupe de mediocru, auto-introducându-mă în "laboratorul" marilor creatori de literatură şi de ştiinţă, cu observaţia că graniţa trasată între literatură şi ştiinţă era adesea artificială. Plin de speranţă, mă lansasem într-o revărsare dezlănţuită de inteligenţă şi farmec, pe un traseu spaţio-temporal spre reprezentarea unui scop imposibil: de a fi parte integrantă dintr-o experienţă încapsulată în scrieri cu caracter mistic.

Am gustat fremătătoarea plăcere, beţia picantă, intensă a unei transformări totale. Ardeam de dorinţa de a o resimţi mereu şi mereu. Mi-am adunat întreaga voinţă, întregul curaj de a începe scenariul de film, ca un om care se aruncă iar şi iar în valurile furtunoase ale unei obsesii devorante, numai ca să retrăiesc acel stimulant simţământ al transformării.

Scenariul, "Magicianul", prima incursiune în sfera lumii mele interioare, instrumentul formării unui alt tip de personalitate, una ascunsă sub învelişul preţios al unei înnoiri totale, avea să fie o încercare mult mai grea decât mi-am închipuit. Cât de tentantă putea fi această poveste, această opţiune neverosimilă a desăvârşirii?

Arta de a fi altcineva este modul de a-ţi pune în valoare prețiosul talent al verosimilităţii,

mânuind magia de a te iluziona în cel mai frumos mod cu putință, de a te face să uiți că citești din propria experienţă de lectură inedită.

Indiferent de scenariu şi de impactul său, mă lansasem în cu totul alt gen de înţelegere a lumii, a vieţii, a universului. Mă simţeam mai liber, mai puţin supus eroziunii. Îndepărtasem perdeaua neagră a slăbiciunii mele ascunse: de a dori să aflu ceea ce aş fi dorit să nu ştiu. Devenisem altcineva. Cu totul şi cu totul străin faţă de cei care mă cunoşteau. Magicianul făcea legătura dintre omul obişnuit şi artistul unei lumi nemărginite, o lume în care odată integrat puteam să privesc dincolo de aparenţele aşa zisei normalităţi.

Puteam să interpretez un personaj destul de apropiat de ceea ce eram eu în realitate. Cu însetată curiozitate coborâsem până în zonele adânci ale pasiunii mele, acolo de unde izvorau năvalnic şi hotărât toate ideile, toate idealurile, toate virtuţile mele, acolo unde toate formele de cunoaştere se îmbinau şi se contopeau într-o măiestrie absolută. Şi, asemenea unui chimist care experimentează noi reacţii chimice combinând elemente diverse, am reuşit să dezvolt elementul cheie, esenţa care îmi putea maximiza capacitatea de creaţie.

Ceea ce doream, se împletea strâns cu ceea ce eram. Ceea ce nu ştiam despre mine s-a împletit strâns cu realitatea pe care imaginaţia a creat-o. Dualitatea artist-magician aducea în prim plan acea capacitate de a transforma o absenţă într-o prezenţă, redând o stare de fapt într-un mod cât mai plastic, adică prin plasarea accentului pe lucrurile care depindeau numai de mine pentru a fi iluminate, manifestate în diverse forme de existenţă şi infinite în timp şi în spaţiu.

Leadership: Poţi să-ţi măsori forţa gândirii conform aventurii de a te pierde ore în şir în lumea personajelor unei poveşti despre spectacolul vieţii de zi cu zi, astfel încât să beneficiezi de imaginea idealului de a fi altcineva?

Unul din cele mai rapide moduri de a-ţi forma personalitatea este să-ţi instruieşti Eul să accepte schimbarea. Modul în care îţi pui în evidenţă calităţile, în special puterea de a interveni în evoluţia lucrurilor, reflectă acea parte din tine, acel impuls pozitiv pe care îl descătuşezi atunci când vrei să te autodepăşeşti. În consecinţă, preocupă-te mai mult de natura fiinţei tale.

După cum prezentările de modă urmăresc crearea unui inedit de formă şi culoare, ridicat la rang de artă, bazându-se pe o bună cunoaştere a tendinţelor în materie de "Haute-Couture" şi a aşteptărilor publicului, - tot astfel leadershipul se bazează pe o mai bună cunoaştere de sine în raport cu stimularea şi creşterea capacităţii de dezvoltare a nivelului optim de performanţă, dar şi pe aşteptările celorlalţi.

Devii altcineva numai atunci când reuşeşti să interpretezi un personaj destul de apropiat de ceea ce eşti în realitate, şi de ceea ce aşteaptă ceilalţi de la tine. Aventura de a te găsi în pielea unui personaj dintr-o carte sau dintr-un film te va apropia de o nouă dimensiune a personalităţii tale, una abordabilă prin intermediul imaginii omului care se poate despărţi de vechile repere şi de vechea realitate.

A fi altcineva înseamnă să te percepi în comparaţie cu aducerea cuiva într-o imagine de prim plan mai reprezentativă, într-un fundal complet diferit, cu ambianţă diversă, pentru a face faţă provocării de a fi parte dintr-un scenariu de poveste care are toate şansele să devină real.

Te dedici "îngrozitoarei crime" de a sluji unui scop diferit, mai strălucit, mai sofisticat, mai plin de sens decât ar fi fost în măsură realizezi? Ai curajul să cercetezi, ca un filozof, cu de-amănuntul domeniul necunoscutului? Sau preferi să rămâi un rătăcitor, un condamnat la o

anumită soartă, la o sentinţă definitivă care ucide spiritul şi înrobeşte mintea? Depinde de tine şi de alegerea ta.

Leadershipul este o variantă inedită a capodoperei numită "It will hurt a little", ce vine cu o imagine amplă a ceea ce înseamnă să fii altcineva, apropiat de acea obsesie a artistului care caută teritorii neexploatate, lumi necunoscute, dimensiuni umane încă nedetectate.

Perdeaua neagră a unei slăbiciuni ascunse exprimă raţiunea, forţa implacabilă a minţii şi a gândului, care te împiedică să vezi ceea ce îţi lipseşte ca să fii TU, ceea ce este esenţial în definirea unui orizont mai larg. Evidenţiază forţa care încearcă să ascundă însuşirile tale de căpetenie faţă de tine şi faţă de ceilalţi.

Îţi aminteşti de *Micul Prinţ* din opera lui Saint Exupery? El zicea: *"Întotdeauna mi-a fost drag pustiul. Te aşezi pe o dună de nisip. Nu vezi nimic. Nimic nu se aude. Şi cu toate acestea, ceva străluceşte în liniştea lui. De aceea e frumos pustiul, fiindcă undeva, el ascunde o fântână…"*

Leadershipul se dizolvă, graniţele dintre cunoaştere, percepţie şi realitate devin permeabile dacă nu te cunoşti îndeajuns de bine. A porni în explorarea propriul Eu, este ca şi cum ai căuta o fântână în pustiu. Poţi înţelege "taina strălucirii" numai dacă intervii în procesul tău de evoluţie, dar fără să "denaturezi" ţinta finală a ta şi a celorlalţi.

Numai dacă căutările tale se bazează pe elementele concrete detectate cu "instrumente" specifice - psihice sau materiale, vei putea găsi sursa de cunoaştere şi calea de evoluţie ulterioară.

Şlefuieşte-ţi cu grijă propriile aspiraţii, ca să te poziţionezi cât mai bine în raport cu tine însuţi.

Perfect Silence

On Decembrie 13, 2015

Susţine efortul de a-ţi înţelege raţiunea de a fi, ţinând cont de valoarea imensă a uitării de sine.

Perimetrul momentan al conştiinţei mele era destul de limitat datorită densităţii gândurilor nespuse. Brățara identităţii mele o las în grija voastră ! Gânduri înălţate din negrul mohorât al uitării de sine, ca un fir de fum de la o casă pierdută în frigul iernii, absorbind raţiunea mea de a fi din forma ei pură. *„ The most perfect silence is when there's no need of showing. "*

Raportul dintre diferenţa de potenţial aplicată la capetele unui conductor şi intensitatea curentului care îl parcurge, este prin definiţie rezistenţa electrică a acelui conductor (pasiv). Admisibil. Mi-e uşor să înţeleg că totul decurgea din această lege stranie, dar adevărată, inclusiv puterea de a uita de mine, dincolo de tot ceea ce era temporar, din izbucnirea unui Eu care îşi experimentează multi-dimensionalitatea. *„ Something is true when you see the same pictures from another point of view. "*

Gândurile sunt expresia unui curent care crește și devine puternic pe măsură ce te concentrezi asupra unui fapt imaginar, fără a te întrerupe. Puteam lesne să-mi închipui cum stăteau lucrurile faţă de multi-dimensionarea personalităţii mele distincte, puţin dispusă să recunoască valoarea imensă a unei ruperi de real când era vorba de a mă lăsa pradă nebuniei de a crede în ceva mai presus de mine: ficţiunea de a trăi în ceaţă. *"The most perfect moment is when we just come from different circumstances."*

Eric, eroul unui roman al lui Herbert Franke, încerca să-şi reprezinte propria imagine, înaintând prin rizomul supradimensionat, alături de însoţitorul său impasibil şi străin de neamul omenesc. Îşi reprezenta imensitatea pustie a Cosmosului şi în ea firicelul de praf al stelei Heyse II. Tocmai acolo se afla el însuşi, cu misiunea şi cu neputinţa sa. Ceva din el refuza să ia fantasticul acesta drept realitate. Dar adevărul era, fără îndoială, adevărat.

Leadership: Poţi să-ţi reprezinţi propria imagine în numele unui adevăr pe care îl trăieşti în raport cu densitatea gândurilor nespuse?

Celebra scriitoare, Ana Blandiana, a avut un lucru clar în minte când a întrebat: *„ Cine dintre noi ar putea explica frumuseţea drumului acela prin ceaţă, frumuseţea curajului obscur şi a victoriei fiecărui metru de drum cucerit? "*

Probabil în mintea omului grăbit de timp, în care sunt adunate cu regularitate gândurile ce înfrumuseţează viziunile şi sprijină aspiraţiile de înzdrăvenire a unei noi forme de înţelepciune, se deschide încet-încet, sub semnul unei imagini semnificative, drumul către o lume mult mai interesantă. Dar una care aparţine capcanelor unei rătăciri, unei îngheţări a sinelui.

Gândurile mele păreau tot atât de neînţelese ca un diamant neşlefuit care aşteaptă pe cineva să-i descopere strălucirea, dincolo de tot ceea ce puteam cunoaşte, a cărui valoare depăşea orizonturile expectanţelor realizabile. Ştiu că încercam să redau o imagine a ceea ce puteam aştepta să văd în viitor, să ajung pe culmi înalte care să nu se schimbe odată cu trecerea anilor, ca atunci când vrei să descoperi într-o cutie invizibilă acele lucruri pe care nu le ştie nimeni. Dar întotdeauna ceva mă trezea din visare. Era conştiinţa de a nu aluneca prea mult înspre utopia unei exaltări de-o clipă, stranie beţie a unei scurte rătăciri.

Cu certitudine, adevărul pe care îl trăiam în raport cu densitatea gândurilor nespuse putea fi pus în corespondenţă cu o perspectivă de imbunatatire a unui ideal de solidaritate între aceste două unităţi extreme: inteligenţa de a transforma realitatea în fantastic şi fantasticul în realitate.

Devenim născători de confuzie din punct de vedere perceptiv, supuşi fiind investigaţiilor asupra propriei imagini, atunci când ne punem încrederea într-o fiinţă nouă, unde receptarea lumii se desfăşoară pe baza unui set de gânduri ce păstrează relaţiile bine definite între două personaje. Unul care constant se judecă pe sine şi altul care regăseşte într-o lume anexată celei reale numită „Nicăieri".

Leadershipul începe să se contureze prin materializarea unei viziuni care reînnoadă această luptă a celor două personaje, împletirea armonioasă a celor două dimensiuni pereche (episoade din viaţa sufletului) influenţând modul cum îţi redefineşti stilul de a fi.

Leadership: Pricepi într-adevăr esenţa a ceea ce înseamnă să ai imagine şi să nu ai conţinut, pe măsură ce îţi focalizezi mintea asupra unui gând care încearcă să prindă consistenţă?

Când perimetrul momentan al conştiinţei tale devine destul de limitat datorită densităţii gândurilor nespuse, producând acea nemărginire a uitării de sine, adică identificarea cu ceva în care să te poţi pierde complet, devii o victimă a propriilor explorări, o victimă a propriului chip de a gândi sensul existenţei.

A-ţi forma o imagine despre ceea ce eşti, despre ceea te frământă, despre ce te face vesel sau trist, fără să îi atribui acestei imagini un anumit conţinut şi o direcţie, înseamnă să te pierzi într-un labirint al ideilor şi elementelor inutile germinate doar de dragul de a crea un ghiveci atrăgător pentru audienţele de fast-view (to meet the demands of the quick viewing).

Leadershipul îşi poate păstra statutul de configurator al propriei tale deveniri, făcând accesibilă crearea unor reprezentări mentale a celor mai însemnate perspective asupra realităţii, atunci când îţi stabileşti o direcţie nouă de urmat în viaţă.

Satisfacţia interioară confirmată de această direcţie nouă, aducând un fel de a înţelege momentele de cădere şi de a accepta orice experienţă, este un factor esenţial în relaţie cu succesul personal.

Un gând care nu începe să prindă consistenţă este o condiţie a uitării de sine în timpul unei realităţi cu care nu te poţi întâlni niciodată în viaţa de zi cu zi, una care nu poate fi conceptualizată, care nu este deloc verosimilă. Iar un gând care prinde consistenţă este rodul unei ficţiuni care face din tine imaginea unei lumi care inspiră căutarea unei schimbări adevărate.

Perfect Silence este momentul de maximă luciditate când stai de vorbă cu tine, deschizi şi mai mult calea pentru abordarea mai critică a experienţei de visare, meditaţie, şi constaţi că singura cale de a te redefini ca un om puternic este de a schimba direcţia de vedere, fără a fi acuzat de cineva că nu vezi nimic altceva în afară de propria ta înălţare în izolare.

*** Notă:** - Blank & Jones feat. Bobo - Perfect Silence

Perspectiva prim-planului

On Octombrie 14, 2015

Apropie-te de universul ştiinţei, străduindu-te să compui un „poem", nu doar relatând o „povestire".

Să ne oprim la două exemple care vor desluşi poate mai limpede relaţia celor doi regizori Griffith-Eisenstein şi ne vor permite, mai târziu, să înţelegem mai bine genialitatea operei eisensteiniene. Prim-planul nu era deci o "invenţie" a lui Griffith. Edvin Porter îl folosise, ca mijloc tehnic, punând un bandit să tragă în prim plan, în direcţia spectatorilor. Faptul a făcut senzaţie şi atât.

Dar Griffith a folosit într-un film prim-planul unei femei care aştepta întoarcerea soţului urmat de imaginea celui pe care îl aştepta. Alternarea aceasta a provocat furtuni prin neobişnuitul ei.

- Cum se poate rupe subiectul, a fost el întrebat, cu asemenea sărituri? Nimeni nu va înţelege nimic.

- Dar Dickens, răspunse Griffith, el nu a scris tot aşa?

- Bine, dar era Dickens; el scria romane şi asta e cu totul altceva.

- Deosebirea nici nu e atât de mare, eu scriu romane în imagini.

Însă prim-planul lui Griffith era legat doar de un mod de a vedea, de condiţiile fizice ale felului în care poţi privi un personaj: anume de aproape.

Eisenstein va folosi prim-planul nu pentru a arăta ceva, ci pentru a reprezenta. Cu alte cuvinte, el nu priveşte pur şi simplu mai de aproape un obraz sau un obiect, ci îl foloseşte în această ipostază pentru a exprima o idee, pentru a-i acorda o nouă semnificaţie. Griffith relatează o povestire, Eisenstein compune un poem. *

Leadership: Poţi să distingi o nouă dimensiune a revizionismului de la orizontul unei experienţe care trebuie alimentată frecvent prin intervenţia unei realizări particulare?

Sensul ideal şi profund pe care-l caută un artist în procesul de elaborare a unor noi concepţii, făcând din leadership un soi de scenografie - un mod de a gândi o imagine asupra lumii reale, sau o imagine a omului reflectată în lume, bazată pe o fixare a ştiinţei asupra unui fapt omnipotent, este transpus la nivelul trăirii existenţei sale.

Însuşi artistul se transformă într-un prim-impact asupra fenomenului de reprezentare a unei imagini ample şi, mai cu seamă, asupra evoluţiei abordării modului cum priveşte şi percepe "ceea ştie" în vastitatea informaţiei ce-l înconjoară. Această imagine surprinde semnificația pe care artistul o acordă actului de creaţie în lungul liniei de conduită a unui om care ştie să comunice cu ceea ce alţii văd în el însuşi.

Conţinutul mesajului pe care îl furnizezi lumii întregi, devenind subiectul central, forţa

egalizatoare a unor presupuneri, adesea de ordin subiectiv, cu privire la organizarea realului, ce poate duce la o nouă formă de artă, rămâne legat de reprezentarea complexă a prim-planului. Este vorba de gândirea auto-dirijată spre o finalitate a revelaţiilor ce satisfac condiţiile unui ideal de cunoaştere izvorât din experienţa cercetării, din însăşi substanţa celor anterior asimilate.

Revizionismul este o formă de a crede într-o constatare care devine uimire: sentimentul de a fi unic în faţa unei realităţi de multe ori ignorată de lume, dar care deschide calea către grandoarea ideală a unei explicite realităţi. Este vorba despre o acordare de semnificaţie acelui lucru, întâmplare sau fenomen, din care îşi iau valori de subiect atributele de bază rezultate din perspectiva a ceea ce vezi şi modalitatea prin care explici ceea ce vrei ca ceilalţi să creadă.

Leadership: Modul în care reprezinţi un punct de vedere într-o compoziţie de mari resurse expresive reflectă un punct central al sentimentului de sine extins pe care îl trăieşti prin ceea ce te face diferit?

Leadershipul îşi continuă înaintarea spre o modelare mai precisă a faptelor care trebuiesc revelate prin sensuri, pe baza unor reprezentări de natură obiectivă, cu ajutorul tehnologiei şi informaţiei, în diferite contexte de afirmare a puterii de creaţie, nu doar dacă „relatezi o povestire”, ci dacă reuşeşti „să compui un poem”.

Aşadar prim-planul este legat nu doar de un mod de a vedea, nu doar de condiţiile fizice ale felului în care se poate aborda un anumit subiect de aproape. Ci reprezintă rezultatul sintezei unei întregi experienţe, consecinţa unei acumulări extraordinare de noţiuni şi concepţii, un model de definire a ştiinţei conectat la o semnificaţie atribuită unei realizări particulare, întregind astfel aria de continuitate între creator şi receptor.

Atitudinea sau acţiunea care urmăreşte revizuirea unor concepţii aparţine în mod exclusiv artistului care, asemenea unui colecţionar care pasionându-se atât de mult pentru obiectele ispititoare stă ore întregi în faţa lor pentru a le pătrunde mai bine misterul, îşi făureşte opera prin argumente care cuprind raţionamente şi dovezi privind raporturile dintre imagine, ideal şi realitate.

Un sentiment de sine extins se obţine prin conţinutul raţiunii de a te transpune într-un artist care nu mai priveşte decât la propria sa creaţie, deşi concretă, trăind prin singurul lucru care-l face diferit de restul lumii: valorificarea spectaculozității inedite a unei capodopere într-o lecţie de viaţă durabilă.

Perspectiva prim-planului este generată îndeosebi de performerii de elită care sondează permanent adâncurile tăinuite ale fiinţei şi ale lumii, prin intermediul ştiinţei, pentru a obţine nu doar un alt sens al existenţei. Ci pentru a-şi lămuri ei înşişi adevărurile trăite, prin ceilalţi, în felul lor.

Perspective evolutive în evaluarea personalității umane

On Martie 12, 2012

Caută mai întâi prezența a ceea ce te modelează exlusiv ca artist, și făcând asta mintea ți se va umple de gânduri constructive.

Într-o discuţie avută cu renumitul negustor de artă Ambroise Vollard, pictorul francez Paul Cezanne i-a spus:

- Să ştii, domnule Vollarde, că pictura este pentru noi tot ce poate fi mai important. Cred că în faţa naturii devin mai lucid. Din nenorocire însă, în ce mă priveşte, realizarea concretă a propriilor mele senzaţii este totdeauna foarte chinuitoare. Nu pot atinge intensitatea care mi se creează în simţuri, nu pot atinge acea superbă bogăţie de colorit care însufleţeşte natura. Totuşi, ţinând seama de senzaţiile mele de culoare, îmi pare rău că sunt atât de bătrân. E trist că nu sunt în stare să prind multe dintre nuanţele senzaţiilor şi ideilor mele. Uită-te la norul de colo - mi-ar plăcea să fiu în stare să-l pictez. Da, Monet, el ar putea. Are vâna trebuitoare.

Într-un fel, asta era o mărturisire de credinţă. Chinuit şi timid în faţa naturii, cum nu a fost niciodată în faţa oamenilor, Paul Cezanne căuta să exprime pe pânză, în culori, o stare sufletească. Pentru aceasta, a abandonat perspectiva clasică, preluată acum de aparatul fotografic, care privea natura cu un ochi imobil, rece, indiferent. Ochiul uman putea percepe mult mai multe nuanţe şi dimensiuni. *

Leadership: Poţi să faci o mărturisire de credinţă din ansamblul stărilor sufleteşti care se împlinesc numai pe măsura creării unei singure lumi, din perspectiva momentului şi intensităţii cu care acestea afectează înălţimea ideilor tale despre tine însuţi?

Lucrând cu materia realităţii, l-aş admira de pildă pe omul care, într-o singură bătălie cu el însuşi reuşeşte să cucerească cele două capitole esenţiale ale evoluţiei sale: senzaţia de control şi starea de mulţumire. Primul, în care îşi susţine cu tărie convingerile, al doilea, în care face dovada obligatorie a aplicării ferme a rezultatelor. El îşi face o mărturisire de credinţă din ansamblul stărilor sufleteşti care se împlinesc numai pe măsura creării unei singure lumi, din perspectiva momentului şi intensităţii cu care acestea afectează înălţimea ideilor sale despre sine însuşi.

Şi i-aş reproşa atunci când, dincolo de ceea ce cunoaşte despre sine însuşi, nu reuşeşte să spargă zidurile neputinţei de a fi el însuşi. L-aş penaliza serios fiindcă dezamăgeşte prin faptul că ignoră elementele esenţiale care garantează buna lui funcţionare, precum stima de sine ori sentimentul de mulţumire personală.

Ceea ce cunoaştem despre reuşita unui om de mare talent, dincolo de limitele pe care el însuşi şi le impune, fără să-i reproşăm nimic în privinţa alegerilor sale în viaţă, este faptul că seriozitatea sa îmbină elementele de "bună funcţionare" ale gândirii bazată pe rezultate. Iar fiindcă funcţionarea gândirii garantează o mai bună bună stimă de sine, un sentiment de valoare, o mulţumire personală, această mărturisire de credinţă a artistului poate să apară şi ca o manifestare de grijă faţă de ceea ce se desfăşoară în jurul lui, faţă de ceea ce se întâmplă cu sau fără voia lui.

Leadership: Poţi să realizezi o evaluare mai amplă a propriul tău profil artistic care să cuprindă un sentiment de încântare şi de mulţumire sufletească, încât să poţi atrage atenţia privitorului spre o lume a interiorităţii tale?

Când simţi că nu mai poţi să lupţi pentru idealurile şi ţelurile pe care ţi le-ai propus, când simţi că viaţa ta nu mai are nici un sens pentru că te-ai făcut vinovat de vreo faptă sau de vreo manevră nepermisă, când simţi că ceilalţi oameni din jur te depunctează la capitolul încredere, în acest caz eşti constrâns să adopţi o postură care îţi subminează într-o oarecare măsură calitatea de om şi de lider.

O dilemă serioasă aş spune, fiindcă eşti prins într-un joc de-a v-aţi ascunselea în care identitatea îţi este împărţită în mai multe "umbre". Umbre care se mişcă în toate părţile, combinându-se apoi într-un mod în care uneori te fac să te simţi bine, iar alteori te înfricoşează. Devii străin de tine însuţi, îţi învălui expresiile şi acţiunile într-un mister tot mai mare. Astfel se ajunge la o anumită imprecizie în evaluarea personalităţii tale.

Iar în acest caz, e indicat să-ţi reconsideri intenţiile pe care le ai vizavi de parcurgerea unui joc în care nu reuşeşti să te regăseşti pe tine însuţi. Sau aşa cum spunea cineva, reconsideră-ţi propriile rădăcini şi ia în calcul posibilitatea sădirii unor seminţe noi dacă vrei ca identitatea ta să se consolideze şi să-ţi furnizeze combustibilul necesar în exercitarea unui leadership eficient.

Un profil artistic este caracterizarea sensibilităţii unei persoane pusă faţă în faţă cu măreţia naturii. Iar interiorizarea unui artist reflectă tocmai acea transformare a naturii, surprinsă într-un tablou de mare rafinament, care îi amintește de propriile sale transformări sufleteşti.

Perspectivele evolutive în evaluarea personalității umane ţin mai mult de stările sufleteşti care însoţesc reuşita omului, de ideile cu care el vine în dialog cu lumea, şi de apariţia senzaţiilor de încântare şi de mulţumire sufletească, întocmai ca la vederea unui tablou care conturează o scenă splendidă din natură.

*** Notă:** Catinca Muscat - Orele lui Prometeu

Peyton Westlake

On Iunie 29, 2016

Învaţă să te conectezi la o cauză nobilă, mişcând din loc partea vizibilă a realităţii pe care o trăieşti.

Încă de când mă apucasem să studiez noţiunile fundamentale ale ştiinţei, sub influenţa nevoii a mă afirma şi de a fi unic în felul meu, exclusiv prin mijloacele satisfacerii de sine, păream însoţit de sentimentul că trăiesc în altă lume. Mă simțeam legat de ceva care nu aparținea în mod firesc de mine, ceva care încă nu exista, ca și când aş fi nimerit într-un peisaj pe care nu l-ar fi imaginat niciun pictor.

Toată această activitate neîncetată, ca o boală a intelectului de care nu mai scapi, de care sunt loviţi numai artiştii, o boală care explodează, pulverizează, se răspândeşte în starea de spirit cu strălucirea unor transformări de fază însoţite de difuzie, purtând în ele simboluri şi valenţe chimice, era o formă de a mă îndepărta de suferinţa mea. De lipsurile de ordin identitar apărute din cauza neexploatării la timp a liniei recordurilor personale.

Secretul deprinderii cunoaşterii superioare rezidă tocmai din zgomotul constatărilor produse de mintea cercetătoare, din acest sunet de fond supărător, în acelaşi timp plin de sens, speculativ, declanşând o reacţie puternică în subconştient, făcându-te să trăieşti tranziţia spre o altă dimensiune, în virtutea unui principiu al echilibrului universal.

Dintr-o dată ajungi să trăiești filmul unei călătorii tainice, desfăşurate în mod direct între părţi independente, într-un sistem fizic izolat unde toate forţele lucrează la obţinerea unui echilibru, a unei uniformităţi, între ecuaţii algebrice, obiecte luminoase, raze incidente, câmpuri electromagnetice, în care se reflectă adaosul de stimulatori care încurajează formarea unui nou construct mental.

Aveam nevoie de experienţă artistică a unui Rembrandt şi de cunoaşterea vizionară a unui Einstein ca să mă apropii de idealul perfecţiunii în fiecare aspect al unei creaţii utilitare, dacă voiam ca invenţia mea să funcţioneze şi, prin urmare, să aibă succes.

Leadership: Poţi să te descoperi, ca orientare intelectivă, în direcţia unui parcurs care stă sub semnul valorii personale unde creaţia capătă valenţe de sens în unica existenţă a intenţiei de a produce un rezultat de prestigiu?

Frumuseţea artei de a fi mai mult decât ceea ce eşti, capacitatea de a te avânta spre ceea ce este în afara condiţiei de prizonier al unei existenţe imprevizibile, constă în unitatea dintre calitativ şi cantitativ, pe care vectorii informaţionali, într-o măsură variabilă, acţionând printr-un soi de efect bizar care îşi distruge cauza, facilitează intrarea ta într-un soi de revoluţie a minţii.

Şi nu există decât un singur fel de a testa această capacitate: întruchipând un rol absolut genial de care nu te credeai în stare, un om de ştiinţă, un Peyton Westlake, cu o altă identitate. Valoarea personală ia în considerare urmările inevitabile ale unor cauze antecedente, atunci când constaţi că ai lucrat conform voinţei şi experienţei tale, iar nu silit de altcineva, deci atunci când raţiunea cea mai însemnată a unei abordări eficiente şi inedite nu este depăşită de rolul pe care îl joacă alţii în viaţa ta.

Leadershipul este o continuare a orientării omului spre o versiune a lui mai stabilă, legând

mijloacele satisfacerii de sine cu informația trebuincioasă tranziţiei spre o altă etapă de expansiune a valorii personale. La rândul ei, valoarea personală are în centrul ei acea inteligenţă superioară care prezintă capacitatea de a percepe, dintr-o perspectivă mai înaltă, ceea ce crezi că ești în stare să posezi şi să fii.

Inteligenţa este o trezire a capacităţilor de depăşire a limitelor personale, la un nivel de profundă intuiţie şi înţelegere. Ea nu poate fi atinsă exclusiv prin mijloacele satisfacerii de sine, ci prin participarea la procesul de formulare a concluziilor, ipotezelor, teoriilor, prin extragerea şi analiza constatărilor din numeroase surse de informații.

Primejdia inteligenţei, întâmpinată numai de omul care se aruncă în vâltoarea atotcuprinzătorului, este aceea de a crede că realitatea pe care o trăiește este totul, și că prin mijlocirea ştiinţei poate să transmită ceea ce este în el însuşi. În toate cazurile, omul este responsabil numai când n-a lucrat cu voinţă, sau când a lucrat în contra-responsabilităţii, silit de o forţă exterioară să abdice de la orice prevederi şi reglementări.

Iar când invenţia unui chimist loveşte soarta unei încărcături moleculare, fiind împins de o minte străină, înseamnă că el n-a lucrat conform unor motive venite din reflexie, din judecată şi raţionament, ci dintr-o pornire născută din necesitatea de a-şi împărtăşi emoţiile cu ceilalţi oameni.

Leadership: Consideri că trebuie să-ţi formezi un anumit complex de priceperi şi deprinderi atribuite rolului important pe care îl ai la îmbogăţirea unei imagini pretate la o transformare de tip ordine-dezordine?

Pentru ca inteligenţa să contribuie la dezvoltarea valorii personale, mai întâi de toate trebuie luată în calcul posibilitatea unei selecţii, a unei alegeri a caracteristicilor de propagare a informațiilor - trebuincioase deprinderii anumitor competenţe foarte căutate, care să-ți inducă sentimentul unei identităţi distincte, autentice. Deci, trebuie să cântăreşti bine ansamblu de elemente succesiv-alternante pe care le poţi recunoaşte și asuma în procesul de fundamentare a noţiunilor ştiinţifice.

Citesc într-o carte de probleme de fizică şi optică, următoarele: *"Imaginea dată de lentila convergentă joacă rolul de obiect virtual pentru lentila divergentă. Folosind formula gaussiană a lentilelor, în cazul lentilei divergente, pentru situaţia în care obiectul este virtual, se obţine că lentila convergentă formează imaginea în spaţiul imagine al lentilei divergente la distanţa de 20/3 cm de aceasta. Deoarece imaginea dată de lentila convergentă se formează în spaţiul său imagine, la distanţa de 30 cm de ea, se obţine distanţa de la obiect la lentila convergentă egală cu 60 cm."*

Descoperirea răspunsurilor la anumite întrebări, deducând toate combinaţiile şi permutările posibile între opţiunile de filtrare a informaţiilor, începe mai întâi cu plăcerea de a condensa într-un tablou, strâns încadrat într-o nouă teorie, toate rezultatele diferitelor observaţii pe un fond general de suspiciuni.

Însă una din particularităţile devenirii este un al treilea ochi, care priveşte amănunţit tabloul, percepe elementele care nu pot fi văzute în mod obişnuit şi reuşeşte să te conecteze la o cauză nobilă: de a mişca din loc partea vizibilă a realităţii pe care o trăieşti.

Rolul pe care îl ai în evoluţia ştiinţei poate fi reprezentat printr-o imagine pretată la o transformare de tip ordine-dezordine atunci când determinarea cu care dovedeşti că poţi construi o reputaţie se realizează prin dezvoltarea capacităţii de a face faţa unor situații profesionale neconvenționale, cum ar fi formularea unei noţiuni din care derivă noi norme de creaţie care nu atenuează efectele lor.

În ecuaţia ştiinţei, ordinea sau dezordinea pot reprezenta catalizatorul unui pas înainte numai dacă combinaţiile şi permutările posibile între opţiunile de filtrare a informaţiilor pe care le prelucrezi sunt susceptibile să se concretizeze într-un produs finit în urma unei manevre care în opinia altora ori nu există, ori nu funcţionează.

O cauză nobilă promovată prin activitatea neîncetată a intelectului în spaţiul de creaţie, se poate exercita mişcând din loc partea vizibilă a realităţii pe care o trăieşti prin comparaţie cu cineva mai experimentat în domeniu, şi evadând din acel concurs de împrejurări care duce la un deznodământ egal cu renegarea din partea celorlalţi oameni.

Peyton Westlake este eroul principal din filmul "Darkman (1990)". El nu simbolizează doar lupta pentru găsirea unui nou rost existenţial ce stă sub semnul aceleiaşi determinări implacabile, ci totodată simbolizează găsirea eleganţei inteligenţei care, deşi este subtilă, se face remarcată foarte uşor şi decisiv.

Acest tip de inteligenţă este, mai întâi de toate, o asumare a unei noi realităţi ce poate fi accesată numai prin forţa şi metodele ştiinţei.

Piatra cedează locul cerului

On Mai 12, 2015

Asigură-ţi o mobilitate care să permită reevaluarea forţei tale de "Gigant" al producţiei de vizibilitate, prin prisma tendinţei de a cuceri întinderile nesfârşite ale imaginaţiei.

"Scrisori de-ale lui Michelangelo…Uneori străbate un geamăt din ele. Vaietul pe care îl auzi la fiecare rând al scrisorilor din timpul frescelor de la Capela Sixtină. Să lucrezi luni întregi, nefiresc încovoiat, cu capul lăsat pe ceafă. Cu mâinile amorţite şi picioarele grele ca plumbul. Ochii roşii şi umflaţi din cauza tencuielii ce cade pe ei. Pensulele care scapă din mâini. Ameţelile. Schelele care se cutremură de parcă ar vrea să strivească avântul creaţiei de imobilitatea implacabilă a bolţii.

Dar iată că lunile de martiraj trec. Se desfac schelele…Se îndreaptă spinarea. Se ridică capul. Creatorul priveşte. Îşi priveşte opera. Şi bolţile se deschid în faţa privirii sale. Piatra cedează locul cerului.

Ca şi Michelangelo să ne îndreptăm şi noi spinarea.. întorcând privirea către vasele de laborator, filtre, proiectoare, difuzoare, dialoguri, partituri…Şi să privim bolţile care se întind deasupra noastră…Ni se tăie respiraţia când, lăsându-ne capul pe spate, privim în viitor. Ne aflăm în vârful unei piramide… Dar, privind în sus, iată că acest vârf devine un punct de pornire. Şi de la el încolo se înălţă…un alt gigant, care…e gata să cucerească întinderile nesfârşite ale imaginaţiei." *

Leadership: Poţi să dai un nou sens experienţei de explorare a unor noi zone de creaţie prin prisma însuşirii unei noi concepţii despre ce înseamnă să fii tu însuţi într-o diversitate de ipostaze expresive?

Întotdeauna convingerile întăritoare, plecând de la observaţia că tendinţa omului este spre în sus, în raport cu credinţa de a duce un lucru până la capăt, pot reprezenta un fundament solid pentru provocarea de a fi un creator. Iar prin intermediul mobilităţii, indiferent de nivelul de experienţă atins, evidenţiind dinamica dezvoltării pe care o reprezinţi ca om al creaţiei, se fortifică acea formă de îndrăzneală – de a ieşi din aria de confort care te limitează, rostogolind orice neîncredere în sine spre pieire.

Leadershipul, ca tendinţă de încurajare a avântului spre performanţă, presupune să iei act de voinţa, dorinţa şi putinţa de a da un nou sens experienţei pentru învăţare, explorare - prin raportare la rezultatele acesteia, antrenându-ţi pe această cale capacitatea de autoevaluare. Un om al inovaţiei se consacră întru totul operei sale şi, în special, noilor deschideri spre evoluţie care-l pun în contact cu puterea sa de a realiza ceva original, uneori independent de ceilalţi, chiar şi fără siguranţa izbânzii.

Mobilitatea reprezintă capacitatea artistului de a-şi asigura transformarea creaţiei personale într-un instrument pentru mânuirea tuturor performanțelor cinematografice imaginabile.

Tendinţa unui om al creaţiei de a cuceri întinderile nesfârşite ale imaginaţiei, alături de dorinţa de a se afla în vârful piramidei, devine printr-o experienţă individuală ordonată în actul artistic mai mult decât expresia personalităţii sale şi a atitudinii faţă de ceea ce face şi transmite. Devine o parte a sufletului, o oglindă a drumului său prin viaţă, o continuare a procesului de training spre performanţă, un punct de pornire spre un viitor al calităţii. Ora et labora, roagă-te şi munceşte.

A fi tu însuţi într-o diversitate de ipostaze expresive înseamnă să garantezi autenticitatea vastei tale cunoaşteri prin însuşirea unei anumite modalităţi de construcţie a unei inovaţii care va face mult mai atractivă experienţa consumului de vizualizare a unei imagini care va supravieţui timpului.

Leadershipul este orice asumare a unei imagini care e capabilă să te facă să apari în ipostaza de "Gigant" al producţiei de vizibilitate produsă prin intermediul avântului acelei creaţii artistice care înnobilează şi transfigurează elementele eteronome ce au stat la baza constituirii ei.

Piatra cedează locul cerului este o metaforă a dorinţelor care devin realitate, urmare a tendinţei omului de a se conforma aspectelor pozitive şi rezultatelor propriei sale experienţe, acţionând în direcţia unei personalităţi care se impune prin realizarea sintezei fond-lucrare-mesaj. Exprimă speranţa deplină a izbânzii în căutarea performanţei şi găsirea unicităţii în ceea ce faci. Sfârşitul muceniciei. Urmarea izbucnirii din adâncimile bogate ale însufleţirii. Fapt ce implică o tratare diferenţiată a fazei de dezvoltare, în contradicţie cu statutul de om simplu.

*** Notă:** Ion Barna - *Eisenstein* , Editura Tineretului, 1966.

Piatra fundamentală a magiei

On Aprilie 04, 2017

Aliniază-te cu ceea ce poți să controlezi, nu cu ceea ce eviţi să înfăptuieşti.

Sunt Gerry Lane, om de ştiinţă, şi trebuie să descopăr originea virusului care a umplut lumea cu o nouă specie de prădători, numită Zombies. Ceva, mai real, şi mult mai terifiant decât în filme. Cum de-am fost aşa ghinionist încât să cad eu însumi Joker în încercarea de a câştiga jocul palpitant cu viaţa în termenii morţii? Şi totuşi, ca în nădejdea unei clipe excepţionale, mă simt de parcă aş fi descoperit într-un mormânt antic misterios un mozaic bine conservat care, provocând mintea la un duel fără sfârşit între cercetare şi imaginaţie, compune o măsură de combatere a nemiloaselor întrebări care nu-şi găsesc răspunsurile.

Acolo unde ochiul surprinde esenţialul se zugrăveşte un tablou trist şi tenebros care oglindeşte condiţia, doar aparent limitată, a unei noi cotituri în gândire și a unei reîntoarceri la o etapă anterioară de localizare şi manifestare a virusului - unul care îşi dezvăluie „simbolic" şi "tainic" slăbiciunea tocmai la persoanele imuno-compromise sau la cele care trec printr-un episod traumatizant acut.

Nu-mi dau seama exact cum îşi duce virusul prezenţa în sânge, dar am observat că ocoleşte bolnavii aşa cum râul ocoleşte o stâncă. Un tablou în existenţa căruia nu voiam să cred, dar în care mă integram cu prisosinţă.

În niciun caz nu vreau să mă transform într-o creatură care răzbeşte dincolo de limitele raţiunii, chiar dacă raţiunea mă împinge la înfăptuirea unui act grandios, în limitele unei probabilităţi acceptabile de supravieţuire. Dar aşa cum un pictor, un spirit sintetic caută esenţialul, forma şi volumul în spaţiu - printr-o reflecţie vizuală, tot astfel conştiinţa şi spiritul meu de evaluator al fenomenelor naturii se simt datoare să uniformizeze sau să respingă tot ce e „altfel" în alcătuirea unui tipar de reacţie al virusului.

Leadership: Ai capacitatea de a te deschide unei experiențe incitante, fără a te pierde în condiţiile ei de fond, luând în calcul factorul "enigmă" care face ca realitatea să devină fantastică într-o lume plină de întrebări fără răspuns?

Adevărata piatră fundamentală a magiei este de fapt piatra de încercare a evoluţiei lumii, a cunoaşterii, a tuturor lucrurilor, care fac ca o existenţă frământată de contradicţii şi tensiuni, incapabilă de a se menţine numai la nivelul normal, să fie plasată sub semnul "operei imperfecte a naturii" care trebuie acceptată drept o provocare de a relua jocul lumii în alt chip.

Aici trebuie luată în calcul puterea omului de a face distincția între bine și rău, dar mai ales putem face referinţă la cartea scrisă de Alice Roberts, "Marea șansă a existenței", care aduce în prin plan acea abilitate a omului de a sonda trecutul său și al vieții în general prin însăși observarea atentă a proceselor prezente în propria-i ființă și, reușind a se descoperi pe sine descoperă și miriadele de legături ale sale cu lumea non umană de care este profund legat asemeni străbunilor săi.

Fără îndoială, calitatea omului care aspiră la un statut de netă supremaţie se distinge prin maturitatea interpretării experienței care îl recomandă pentru un rol de acțiune pus în umbra unei desăvârşite enigme - una care te incită să o descoperi, ca fiind numai a ta, spre a ajunge la obiectivitatea unei cunoaşteri care trece dincolo de hotarele propriei credinţe. Iar magia persistă cu încăpăţânare: omul este ceea ce pare a fi, sau este ceea ce poate deveni

prin eliminarea a ceea ce este capabil să îndure?

Cum reuşeşte un magician să leviteze? Sunt 7 faruri. O frânghie invizibilă. Două oglinzi laterale de culoarea adâncimilor maritime. Un capitol bine definit al patologiei chimice. Un cufăr plin de comori. O cupă plină cu mânia lui Dumnezeu și una plină cu licoarea miraculoasă a vieții. Şi o ipoteză despre începutul renaşterii sub forma unei frumoase şi captivante poveşti a redescoperirii ştiinţifice.

Adună toate acestea în aşa fel încât rezultatul lor să-ţi dea într-adevăr Unu, momentul cinetic al unui întreg lanţ cauzal. Dacă tabloul realizat de tine va fi veridic, el va fi înţeles fără raţionamentele logice. Află secretul din spatele magiei înainte să-l stăpâneşti şi să-l utilizezi conform cu menirea lui.

Magia este o experiență a luptei cu moartea, din care ţâşneşte inepuizabil viața. Ea se aliniază cu ceea ce poți să controlezi, nu cu ceea ce eviţi să înfăptuieşti. Înseamnă să cutezi să te arunci în necunoscut, în mrejele unei puteri tainice, și acolo plutind peste prăpăstii să fii prins strâns de mâna lui Dumnezeu. Magia este apropiată credinței, dar mai presus de ea. Nu e ceva psihologic localizabil, ci o modalitate de a privi și de a răzbi dincolo de limitele raţiunii, împingându-te la înfăptuirea unui act grandios.

A te încrede în miracolul de a răzbi dincolo de limitele existenței este o încercare de cuprindere a necuprinsului în granițele propriei tale forme de autoritate. Înseamnă să surprinzi esenţialul din care se zugrăveşte un tablou trist şi tenebros care oglindeşte condiţia unei noi cotituri în gândire, făcând din el o revelație provocatoare de tipul: „Tot ce mi se întâmplă face parte din lanţul iluziei creată de minte."

Leadershipul este lumea în care trăieşti cu frica de a-ţi pierde puterea, acea putere care se exercită sub dependenţa de a fi prezent într-o situaţie problematică în care soluţia poate veni doar prin metodele empirice ale ştiinţei.

Piatra fundamentală a magiei, care face din știința omului o realitate a unei puteri neobişnuite, este capacitatea de a te deschide unei experiențe incitante, fără a te pierde în condiţiile ei de fond. Aceste condiții rezultă din ceea ce se întâmplă când începi să resimţi durerea propriei neputinţe de a depăşi limitele şi prejudecăţile specifice consecinţelor nefaste ale acestei experiențe unice.

*** Notă:** World War Z

Piatra lui Husafell

On Martie 06, 2009

Străduieşte-te să creşti în tine însuţi, apoi puneţi în valoare talentul ca să asiguri leadershipului tău un fundament mai larg şi mai solid.

Abraham Lincoln (1809-1865) a fost cel de-al şaisprezecelea preşedinte al Statelor Unite. Deşi lui i s-au atribuit meritele abolirii sclaviei, Lincoln a condus cel mai sângeros război din istoria Americii, nu pentru a îndrepta o nedreptate istorică, ci pentru susţinerea unui principiu istoric, cel al unităţii unei naţiuni.

Dar ceea ce rareori menţionează cineva, sunt treptele pe care le-a avut de urcat Lincoln pentru a-şi crea faima - propria lui poveste cutezătoare care a făcut înconjurul lumii. Provenea dintr-o familie modestă. S-a născut într-o micuţă cabană de lemn. Dar fiind un autodidact, şi-a desăvârşit cunoştinţele şi şi-a dezvoltat personalitatea. După ce a ajuns avocat, a ales calea politicii, intrând ca membru al partidului Whig în camera legislativă a statului Illinois (1834-1841), apoi în Congres (1847-1849), unde a si propus o lege care prevedea emanciparea treptată şi compensată a sclavilor.

În cele din urmă a aderat la noul partid republican, câştigându-şi o faimă naţională, după ce în 1858, în cursa electorală pentru ocuparea postului de senator, a dezbătut problema sclaviei împotriva candidatului partidului democrat Stephen A. Douglas. *

Leadership: Ar fi preferabil să-ţi manifeşti intenţia de a analiza o descoperire experimentală - relaţională cu posibilitatea sporită de înrâurire asupra formării concepţiei de tipul: "conştientizării valorii de sine"?

Piatra lui Husafell este una din cele mai antice probe de forţă viteză şi rezistenţă în care sportivii trebuie să care pe piept o piatră trapezoidală (cu o greutate cuprinsă între 150 kg -180 kg) evaluarea făcându-se pe două criterii:

- viteza cu care este cărată piatra pe o anumită distanţă în cel mai scurt timp posibil.

- rezistenţa în care sportivul trebuie să care piatra până îi scapă, măsurându-se distanţa parcursă.

Dacă ar fi să măsor timpul pe care Lincoln l-a investit în el însuşi, timpul pe care l-a acordat căutărilor sale spre a putea să se ridice din anonimat, să-şi pună în valoare leadershipul (cu îndrăzneală şi stăruinţă) şi de a deveni un apărător al drepturilor şi libertăţile oamenilor, aş spune că este o combinaţie între două probe eliminatorii: de viteză şi de rezistenţă, pe fondul unui context tensionat.

Urcuşul lui Lincoln către destinaţia îndrăzneaţă pe care şi-o fixase în minte încă de mic copil („Într-o bună zi voi ajunge preşedinte ! ”), şi care l-a făcut de neuitat, s-a datorat interesului său personal, bazat pe convingerile proprii. Acel urcuş – pe care toţi oamenii mari îl au de depăşit, este precum o piatră pe care foarte puţini o pot ridica. Greutatea ei se lasă pe umerii fiecărui aspirant la o carieră de succes, însă numai cei cu adevărat puternici - moral şi spiritual, au şansa de a se califica în finala pentru titlu de lider. În leadership, piatra lui Husafell este testul pe care îl dai în faţa credinţei proprii, pe care ori îl treci, ori îl pierzi, şi al cărui rezultat nu trebuie să lase loc de interpretări.

Conştientizarea valorii de sine are ca principal suport rezistenţa pe care o manifeşti într-o situaţie în care cauzalitatea propriei tale voinţe (niiciodată concepută altfel decât sub ideea libertăţii) este ridicată la rang de absolut, adică nu se poate deroga de la respectarea angajamentelor pe care le-ai luat faţa de tine însuţi.

Înainte de a te hotărî să schimbi ceva în viaţa celorlalţi, stabileşte-ţi un ţel şi o viziune clară a exact ceea ce vrei şi du-o la îndeplinire fără ezitări, fără greşeli, fără constrângeri de nicio natură. Dar fii sigur că ceva se va împotrivi planurilor tale: urcuşul pe care îl ai de trecut şi care va schimba cursul lucrurilor dacă nu eşti îndeajuns de tenace, perseverent şi deschis la minte. Iar dacă nu ai o rezistenţă mare la nivel de subconştient care să nu-ţi blocheze propria dezvoltare şi transformare pe care ţi-o doreşti, rişti să te îndepărtezi de ţel şi chiar poţi claca.

Rezistenţa ta cedează, puţin câte puţin? Ar trebui să te concentrezi asupra măreţei sarcini ce o ai în fata ta, pe care singur ţi-ai impus-o, să devii şi mai devotat cauzei căreia i-ai arătat supremul devotament. Străduieşte-te să creşti în tine însuţi, luând o atitudine fermă în susţinerea propriilor aspiraţii, desăvârşindu-ţi menirea, apoi puneţi în valoare talentul ca să asiguri leadershipului tău un fundament mai larg şi mai solid.

Aşa cum un pictor trebuie să ştie cum să folosească culorile pentru a reda spaţiul şi perspectiva, cum să le combine pentru a reda imaginea finală, cum să le aleagă pentru a crea o anumită stare - tot aşa şi tu trebuie să ştii cum să-ţi foloseşti propriul potenţial pentru a fi tot ce poţi să fii, cum să-ţi combini calităţile ca să le cultivi şi să le valorifici, cum să scoţi la suprafaţă din propria ta bogăţie interioară competenţele pentru a obţine performanţele cele mai bune.

Leadershipul denotă o atitudine permanent conştientă faţă de sine care se vede numai din cele mai neaşteptate experienţe de viaţă pe care le-ai depășit cu înțelepciune, fără să cazi în impasul de a nu putea lua o decizie în privinţa trecerii la un nivel superior de putere personală.

Să nu cazi în impasul de a-ţi judeca ideile, pentru că n-ai de unde şti dacă e cu adevărat bună sau rea.

Piatra lui Husafell este încercarea la care te supune viaţa ca să-ţi măsori dorinţa şi capacitatea de a-ţi atinge scopurile (fără de care personalitatea ta nu ar putea să o domine pe a celorlalţi). Tocmai în virtutea acestui lucru se aşează importanţa acordată visurilor şi timpului pe care îl investeşti în tine însuţi pentru ca, într-o bună zi, să ajungi acolo unde destinul te aşteaptă.

Concluzie: Dezvoltă-ţi acele calităţi şi abilităţi care să-ţi întărească poziţia în faţa oamenilor şi care să-ţi confere un ascendent asupra lor, prin viziunea susţinută de argumente convingătoare, prin demonstrarea căilor de urmat, prin evaluarea corectă a consecinţelor şi prin demonstrarea avantajelor şi chiar şi a dezavantajelor, acestea fiind accentele importante în leadership. Ele sunt susţinute de acele calităţi dezvoltate în timp printr-un antrenament continuu al gândirii, prin cunoştinţele dobândite, prin tenacitatea exersată permanent şi prin rezistenţa la efortul de a combate orice intervenţie „parazitară" care are drept scop îndepărtarea de la scopul propus.

Piatra mormântului

On Aprilie 07, 2015

Ridică-te din tine însuţi într-un mod cu totul special, graţie puterii de a-ţi stăpâni în totalitate experienţele de viaţă.

- Conte ! - strigă Maximilien plin de avânt - luaţi seama ! Vă spun asta pentru a treia oară, căci mă înspăimântă puterea pe care o aveţi asupra mea. Luaţi seama la înţelesul cuvintelor rostite căci iată, ochii mi se însufleţesc din nou, inima mi se încălzeşte şi bate iar. Luaţi seama, căci mă faceţi să cred în lucruri supranaturale. Dacă-mi veţi porunci să ridic piatra mormântului care o acoperă pe fiica lui Iair, mă voi supune. Dacă îmi veţi face un semn doar, cu mâna, să păşesc deasupra valurilor, voi păşi pe valuri ca apostolul. Luaţi seama, mă voi supune !

- Nădăjduieşte, prietene, repetă contele.

- Râdeţi de mine, oftă Maximilien recăzând de la înălţimea înflăcărării sale până la prăpastia tristeţii. Faceţi cum fac mamele bune sau, mai bine zis, mamele egoiste, care potolesc prin cuvinte mieroase durerea copilului, fiindcă ţipetele le obosesc. Nu, prietene. Mă înşelam când vă spuneam să luaţi seama. Nu vă temeţi de nimic. Îmi voi înmormânta durerea cu atâta grijă în străfundul pieptului, o voi acoperi şi o voi tăinui atâta, încât nu veţi mai avea nici măcar grijă s-o deplângeţi.

- Mi-e atâta milă de tine, Maximilien, crede-mă, atâta milă încât dacă nu te voi vindeca într-o lună, zi cu zi, ceas cu ceas, ţine bine minte ce-ţi spun, te voi aşeza eu însumi în faţa pistoalelor încărcate şi a unei cupe pline cu cea mai sigură otravă, cu o otravă mult mai puternică decât aceea care a ucis-o pe Valentine. *****

Leadership: Conştiinţa pe care o practici în orice moment al vieţii introduce un semn de probabilitate în sistemul tău de referinţă pentru a limita manifestările din care este alcătuită înălţimea măreţiei tale sufleteşti?

Abia atunci când eşti pus la grea încercare se petrece ceva în tine. Ceva nou pare că se materializează, se transformă, se zbate, se adună şi ai senzaţia că te vezi de la distanţa unei existenţe rătăcite prin labirintul unei lumi situate la alt pol valoric. Acest amalgam de stări conectate prin continuitatea caracterului și a suflului care îţi însoţeşte viaţa, este tradus într-un spectru numit suflet, care vorbeşte doar prin intermediul inimii.

Iar atunci când sufletul fredonează doar simfonii mute de dor şi iubire, în acea etapă a suferinţei, în acea secundă a rătăcirii într-o realitate confuză şi apăsătoare, ducând în mod necesar la o singură concluzie, şi anume, la renunţare, atunci se conturează acea atitudine de suspiciune a tot ce există. Ajungi să nu mai crezi în nimeni şi nimic.

Aici putem pune un semn de probabilitate care tinde spre certitudine, ca un fel de motto al vieţii aparţinând comediantului Moms Mabley: *"Viaţa e ca pokerul: dacă nu pui nimic la bătaie, nu ai ce să scoţi".*

Primul pas spre cucerirea leadershipului îl constituie acea ridicare a omului din el însuşi într-un mod cu totul special, prin eliminarea acumulărilor de sensuri atribuite suferinţei supreme. Spre a se redefini drept o contra-reacţie a ceea ce nu merge, a ceea ce s-a petrecut, a ceea ce nu a obţinut, în aşa fel încât să nu mai fie rob al slăbiciunii de a se împăca cu

soarta.

Viaţa pe care ţi-o întreţine conştiinţa încărcată este forma puterii sufleteşti de a gusta libertatea iluziei de a controla totul. Trebuie luat în considerare faptul că sufletul nu-şi poate ridica puterea la rang de evaluare a sinelui decât dacă se reprezintă drept manifestare a unei mobilizări exemplare spre dobândirea unei capacităţi superioare de înţelegere şi judecare a lucrurilor.

Preţuieşte-te pentru ceea ce reprezinţi atunci când viaţa nu îţi oferă decât motive concrete de îngrijorare, când nu-ţi mai dă motive de fericire. Abia aici se produce adevăratul test al caracterului. Sfatul unui guru al leadershipului sună cam aşa: *„Priveşte în interiorul tău şi vezi dacă există în tine acel sâmbure care stă la baza realizărilor viitoare – adică încrederea nezdruncinată în forţele proprii."*

Cred că primul pas spre a fi puternic, încadrându-te într-un leadership transformaţional, în măsura în care acesta reclamă anumite retuşări ale modelului de a reacţiona la orice fel de constrângeri şi evenimente existenţiale, este să lansezi o „funcţionalitate" care să permită căutarea rapidă în acea reprezentare a lumii raportată la fenomene ce depăşesc cadrul îngust al necesităţii de a preveni pierderea propriei esenţe. A propriei individualităţi, care se exprimă dincolo de acţiunea imediată. Această funcţionalitate poate fi de tipul auto-motivării: *"Nimic nu mă poate întoarce împotriva propriei mele conştiinţe."*

Iar salvarea, măreaţă prin iubirea necondiţionată a cuiva sau ceva, şi înfruntând demonul din tine, gândurile autodepreciative, vine de acolo de unde „ *Trebuie* " se amestecă cu „ *Pot* ", oferind o măsură a ordinii în starea de haos.

Când ajungi să nu te temi de nimic, să nu regreţi nimic, când ajungi să-ţi înmormântezi durerea cu atâta grijă în străfundul pieptului, nu doar să o tăinuieşti aidoma unei poteci fragile de pe care rişti să te prăbuşeşti la prima grea încercare, ci în aşa fel încât să nu mai poţi da înapoi decât cu preţul vieţii, abia atunci se remarcă încercarea de a te reprezenta ca fiind mult mai puternic.

Puterea sufletului poate dobândi o însemnătate uriaşă prin faptul că este dispus să-şi câştige credinţa într-un plan divin, şi să trăiască prin ea, numai atunci când scrutează orizontul de la înălţimea înflăcărării până la prăpastia tristeţii, sau invers.

Piatra mormântului face referire la durerea sufletească pe care o aduce cu sine viaţa, forţându-l pe om să se supună orbeşte regulilor ei. Iar omul cu calităţi de lider este un sistem de operare cu emoţii puternice, rulând comenzi introduse la o linie de program care descrie o rezistenţă la orice tip de înstrăinare de realităţile vieţii.

Viaţa însăşi testează tăria caracterului unui lider, introducând un semn de probabilitate - care exprimă deopotrivă catalogarea trecutului şi prezicerea viitorului - în sistemul lui de referinţă pentru a-i limita manifestările. Are el capacitatea de a-şi transforma trăirile într-o ambiţie care să nu se umple de anxietate?

Pictez doar în cuvinte

On Martie 10, 2019

Un scris care urmează meandrele sufletului este mişcarea unei pensule pe pânza unui subiect prins între două lumi asemănătoare.

Ceea ce furnizează înţelegerii mele toate materialele gândirii cele mai înalte, din care planurile universului alcătuiesc cea mai mare parte a credinței mele în conceptele legate de superioritate, este purtarea de grijă a esenţei mele de creator potrivit unui destin artistic de excepţie. Înţelegerea mecanismului generator de autenticitate, cu trimitere la densitatea vizuală a imaginilor menite să constituie un eveniment revelator, am căpătat-o printr-o corelare a simbolurilor dispuse într-o prelungire a lucrurilor sfinte ataşate existenţei umane, dar şi pentru o încadrare mai strictă în regulile ştiinţei.

Simbolurile se produc sub influenţa modelatoare a unei fiinţe care poartă în sine motivul înţelesului unei existenţe desprinsă din orizontalitatea atemporalităţii, extrasă din mașinăria bine unsă a unei lumi „veşnice" atât de diferită de îngustul şi searbădul cotidian. Resorturile estetice folosite pentru a pune în vibraţie sufletul uman cu ajutorul simbolurilor sunt culoarea pură a turcoazului, în cazul picturii, iar în cazul scrisului de mare fineţe se face legătura cu expresiile de largă circulaţie în spaţiul literar al secretelor agreabile (metafore, personificări, epitete, asocieri, analogii).

Leadershipul autentic presupune abilitatea de a combina elemente aparent disparate, creând o compoziție armonioasă din teme și perspective diferite.

Nu-mi recunosc nici acum ipostazele, nu ştiu în ce m-am metamorfozat de-a lungul timpului, dar mă simt prins între argintul viu al cunoaşterii cele mai înalte şi universul larg de înţelesuri al regăsirii spirituale.

Pictura este similară scrisului tot aşa cum natura rezonează cu funcția vizualității, aşa cum sufletul rezonează cu ceea ce ochii observă într-un sistem determinist. Expresivitatea, fineţea execuţiei şi strălucirea coloritului rezonează cu profunzimea gândirii în definirea conceptelor legate de identitate, de alteritate și de diversitate artistică şi culturală din necesitatea perspectivei relaţionale în studiul fenomenelor sociale.

Aşadar, sunt îndreptăţit să mă consider mai mult decât un pictor care oscilează între erudiţie şi penel, ci un întreg univers al expresiilor artistice implicate în actul scriitoricesc.

Leadership: Poţi face dovada permanentă a unei superiorităţi estetice descriind experiența psihologică a ataşamentului faţă de o imagine care chiar dacă este direct legată de caracteristicile personalităţii tale, are o existenţă şi un destin inconfundabil?

Când mă raportez în mod inovator la actul picturii, cu privire la felul cum trebuie să transmit o emoţie, îmi amintesc ce spunea criticul literar Hippolyte Taine despre prozatorul francez La Fontaine care simţea şi imortaliza totul în imagini veritabile:

"El nu descrie numai pasiunile sufletului, ci simte că imaginaţia omului este organică, că pentru a înţelege diversitatea sentimentelor, trebuie urmărită diversitatea gesturilor şi atitudinilor. Că nu vedem spiritul decât prin intermediul trupului. El descrie la fel cum povesteşte, vizualizând şi în detaliu: căci a descrie înseamnă a povesti, şi singura diferenţă este că, în cel de-al doilea caz, amănuntele se succed, în timp ce în primul caz ele sunt

împreună."

Prima prevedere în actul scriitoricesc, la fel ca în cazul picturii, este bogăţia detaliilor şi căutarea trăsăturilor particulare menite să declanşeze anumite emoţii. Ceva mă îndeamnă să-mi imaginez viaţa în oglinda lucrurilor existente în jur, să organizez întreg spaţiul tabloului, jocul reprezentărilor redublate şi posibilitatea de a privi lucrurile din perspectiva unui vis, a unui delir poetic, a unui flashback, ca o revelaţie a unei realităţi absolute sau ca un gând legat de ceea ce vreau să fac pentru Dumnezeu.

Din punct de vedere psihologic, artistul este ataşat de o imagine a realităţii prin luarea în considerare a studiului omului în toate ipostazele sale (de creator şi muză), interpretând destinul acestuia, consecinţele şi rolul său în societate, în funcţie de impresia vizuală a detaliilor (cromatice) care ar fi în avantajul unei memorii colective. Destinul inconfundabil al omului trebuie să parcurgă faimoasa metaforă a statuii care prinde viaţă datorită dragostei Creatorului pentru artă.

Leadership: Poţi să tratezi subiectul unui tablou din perspectiva unei idei dominante care parcurge frumoasa metaforă a unui teritoriu în care poţi coexista timp îndelungat prin prisma rolului de Alter-Ego?

Un scris care urmează meandrele sufletului este mişcarea unei pensule pe pânza unui subiect prins între două lumi asemănătoare: simbolul unei creaţii divine dăruite omului cu un coeficient înalt de sensibilitate şi simbolul unei învieri spirituale. Aici avem de a face cu o realitate văzută din perspectiva unui mod de confruntare a fiinţei cu limita, cu destinul, dar şi cu imaginea unei lumi idilice pe linia valorificării elementelor de limbaj asimilate pentru consolidarea deprinderilor improvizatorice.

Aceasta este adevărata improvizaţie literară: să te consideri mişcarea fină a pensulei care declanşează o întreagă gamă de sentimente extraordinare în sufletul privitorului. Densitatea vizuală a informaţiei pe care o furnizez printr-o asortare echilibrată a culorilor este, deci, punctul forţe în creativitatea ce nu ezit să o calific drept excepţională a mediului artistic deschizător de apetit pentru imaginea unei realităţi simbolice, reactualizată prin mesajul unei gândiri emoţionale de o mare frumuseţe.

Un acord autonom în marea orchestraţiei. Înainte să ajungi la conţinutul intrinsec al fiecărei culori şi al fiecărei teme trebuie să explici o revelaţie care să anuleze teoriile clasicilor, tot aşa cum un excelent anatomist explică resorturile corpului omenesc din propria experienţă de bun observator al faptelor izolate şi de analist profund al fenomenelor diverse, misterioase.

O revelaţie poate fi ilustrată prin dialogul intim dintre: ceea ce eşti atunci când trasezi pe pânză caracteristicile modelului reinventat după strategii ale memoriei şi ceea ce eşti atunci când vei termina tabloul, privindu-te pe tine în ipostaza modelului. Aici intervine Alter-Egoul, "străinul cu care creatorul face o pace provizorie", doar pentru a realiza o nouă variantă a personalităţii sale.

Leadership: Poţi să-ţi perfecţionezi arta de a te menţine în autenticitate folosind ansamblul "simbol-semnificaţie" din care să transpară imaginea unei realităţi care să însemne mai mult decât suma părţilor sale componente?

Sub aspectul unui amestec de culori aprinse şi îndrăzneţe, proporţiile determinărilor esenţiale şi obiective ale prezentului, în cazul unui artist autentic, nuanţează magia fantasticului şi se pot întoarce cu inima şi mintea în lumea poveştilor cu tâlc şi cu substrat mistic în care "trupul lui Hristos" sau "Elixirul Tinereţii" sunt privite din unghiuri surprinzătoare. Una este să ordonezi întregul semantism al unui univers simbolic, cu totul altceva este să exprimi "înaltul

unui cer care n-a fost niciodată la fel” în adâncul spaţiului.

O cale de a ajunge la un scris plin de însufleţire folosind ansamblul “simbol şi semnificaţie” este să prospectezi necesitatea reînnoirii artei pornind de la conştientizarea proprietăţilor specific fiecărei culori (emană căldură, atrage atenția, stimulează nervii) şi a corespondenţei lor spirituale. Impasul care intervine în acest caz, pe lângă faptul că este necesară funcţia de explorare a “inefabilului”, între figurat şi abstract, constă în a defini un spaţiu de realitate care să inspire o poveste.

În conceptele legate de superioritatea estetică, constând în descompunerea ideilor în unităţi şi în reducerea la senzaţii şi reflecţii, domină **efectul de cruce**: *atenţia, înţelegerea, expresivitatea şi erudiţia* sunt redate prin metafore ca: “o mângâiere de galaxii”, “soarele dreptăţii”, “pântece de mercur”, “o moarte care să nu fie sfârșitul”, etc.

Schimbarea calitativă a întregului imaginii care poate produce dependenţa de o succesiune de fapte şi evenimente, îmi oferă spre analiză experienţa unei picturi care capătă o viaţă a ei, îmbătrânind în timp ce proprietarul îşi păstrează tinereţea. O simplă linie de contur care în termenii artei clasice este o categorie elementară a sintaxei plastice.

O imagine a realităţii poate să însemne mai mult decât suma părţilor sale componente atunci când ea se întemeiază pe instinctul de metaforizare, pe resursele aperceptive ale imaginaţiei care posedă libertatea de a combina perspective, forme, elemente, teme total diferite de artă, de la compoziţii cu personaje, la compoziţii abstracte.

Pictez doar în cuvinte ori de câte ori doresc să controlez sentimentele corespunzătoare imaginii pe care mi-am format-o cu privire la realitate. Titlul acesta este o metaforă potrivită pentru o conversaţie cu mine însumi desprinsă parcă dintr-un tablou cu peisaj de primăvară, unde munţii se succed în multe planuri, topindu-se în cer, în care o singură culoare îmi face cel mai mult cu ochiul: azurul, o culoare a nostalgiei sau a infinitului.

Pictura este oglinda sufletului creator

On August 19, 2024

O lume pe care ochiul o cuprinde cu înfrigurare devine fundalul pentru o călătorie personală interioară.

Uneori, îmi imaginez că sunt un creator de universuri, pe motiv că arta mea transcende realitatea obișnuită. Doar astfel pot să ating esența divină a creației, *esa perfecta armonía de la existencia*, într-o simfonie a culorilor și formelor. Greu de crezut, nu-i aşa? Încă nu știu sigur încotro mă va purta inspirația, nu știu nici dacă voi atinge perfecțiunea visată, dar deseori văd multă culoare în operele mele viitoare, mult albastru viu, și deja mă simt atingând potențialul creator, nu limitele impuse de decorul tot mai sumbru al lumii.

În liniștea abia perceptibilă a atelierului său, unde umbrele amintirilor se amestecă cu bătăile timpului prezent, stă maestrul, cu chipul său bătut de vânturile veacurilor. Numele său a fost un murmur dincolo de timp, purtat de epoci, purtând măști diverse: alchimist, fizician, magician. Dar în fiecare existență, un singur lucru a rămas neschimbat: căutarea neîntreruptă a cunoașterii, setea neostoită de a dezlega misterele universului. Până la urmă, este și acesta un dar de la Dumnezeu: să știi să găsești esența a ceea ce se ascunde dincolo de aparențe, dincolo de vălul uitat al vieţii fecunde.

Pe fața sa, trecutul și prezentul se împletesc precum firele unei tapiserii vii, fiecare rid formând povestea unui veac pierdut. Își zicea adesea: *"Am trăit o mie de ani, într-o mie de secole, dintr-un ciclu nesfârșit al reîncarnării. Am fost tot timpul altcineva, dar am rămas esențialmente același."* Jumătatea dreaptă a feței, marcată de chipuri și simboluri, amintește de mentorii și rivalitățile care i-au modelat calea, de acele experiențe transformatoare care au sculptat esența ființei sale.

Leadership: Cum reușești să provoci percepția conștientă a spectatorului, atunci când perspectiva vizuală oscilează între elementele concrete și abstracte ale compoziției tale?

În stânga încăperii, ca un fel de memento mori, o siluetă împinge un pendul masiv, într-o luptă continuă cu măsurarea timpului, refuzând să cedeze ordinii prestabilite. Acesta este bărbatul dintr-o altă viață, când stăpânea forțele naturii, căutând să transforme plumbul în aur, să dezvăluie secretele ascunse în stele și să învingă timpul însuși. Dar cea mai adâncă transformare, cel mai profund salt spiritual, nu a venit când a împărțit atomul sau când a chemat spiritele, ci atunci când și-a deschis inima în fața divinului. Acea viață a fost cea mai iubită dintre toate, căci a fost viața în care L-a întâlnit pe Dumnezeu.

Pictorul: „De ce, Doamne, culorile lumii sunt atât de vibrante, iar ale mele atât de stinse pe pânză?"

Dumnezeu: „Tu nu pictezi doar culori, ci și emoții, speranțe și dureri. Culorile tale sunt reflexii ale sufletului tău, iar fiecare nuanță spune o poveste."

Pictorul: „Dar cum să surprind lumina ta în întunericul pânzei?"

Dumnezeu: „Luminează-ți inima, omule. Când vei face asta, lumina ta va străluci și prin culorile tale."

Pictorul: „Și cum să văd dincolo de ceea ce se vede?"

Dumnezeu: „Închide ochii și deschide-ți sufletul. Acolo vei găsi răspunsurile pe care le cauți."

Leadership: Fuziunea dintre viziunea artistică și experiența transcendentală poate să schimbe percepția ta asupra timpului și realității, revelând conexiuni nebănuite între ceea ce este vizibil și invizibil?

Stau în tăcerea camerei, îngândurat și abătut, simțind cum ființa mea vibrează cu ecourile viețiilor trecute, ca și când aș fi un recipient al memoriei cosmice. Arta transcende granițele temporale, unind trecutul cu prezentul. Pendulul masiv din fața mea, atât cât îl pot cuprinde cu privirea, pare să bată în ritmul inimii universului, amintindu-mi de vremurile când credeam că pot controla însăși esența timpului. Cât de naiv eram, crezând că puterea înseamnă dominarea naturii ! Cât de orb față de adevărata înțelepciune !

Da, privesc în oglinda sufletului meu și îl văd pe bărbatul care am fost, cel orbit de ambiție și sete de cunoaștere, cel atât de aproape de divin și totuși atât de departe. Simt încă acea dorință arzătoare de a descoperi secretele universului, de a transforma plumbul în aur, de a deține cheia nemuririi. Dar acum înțeleg, mai mult ca oricând, că adevărata alchimie nu se petrece în retortele de laborator, dincolo de barierele fizicii, ci în adâncurile ființei mele.

Alchimia este o metaforă pentru transformarea interioară și artistică. Chiar şi acum, încerc să-mi amintesc momentul exact când totul s-a schimbat, când am renunțat la lupta cu forțele naturii și m-am deschis față de ceva mai mare decât mine. A fost o clipă de grație, o revelație provenită nu din stele sau din cărți, sau din experimentele chimice, ci din adâncul inimii mele. În acea clipă, am simțit prezența divină, o iubire atât de vastă încât a dizolvat orice barieră între mine și univers. Ochii spectatorului sunt invitați să vadă dincolo de realitatea imediată a picturilor mele, să mă vadă pe mine, așa cum sunt într-un decor al eternității pe care Dumnezeu l-a creat pentru sufletul meu nemuritor.

Leadershipul cuprinde procesul de transfigurare lăuntrică, abandonând conflictul cu circumstanțele exterioare, pentru a facilita deschiderea către o perspectivă mai cuprinzătoare și mai profundă.

Pictura este oglinda sufletului creator atunci când artistul se abandonează complet procesului creativ. Și asta pentru că în momentele de abandon total, esența interioară a artistului se manifestă liber pe pânză.

Acum, în fața pendulului ce marchează trecerea inexorabilă a timpului, realizez că adevărata victorie nu stă în a cuceri lumea, ci în a-ți găsi locul în ea. Simt cum fiecare bătaie a inimii mele e o rugăciune tăcută, o recunoștință pentru darul vieții și al conștiinței, la fel cum pictura este o oglindă a sufletului creator.

Încă mă întreb, oare câți alții rătăcesc pe calea pe care am părăsit-o eu? Cum aș putea să le transmit că adevărata putere nu stă în a controla, ci în a te abandona cu încredere în fața misterului divin? Transformarea plumbului în aur metaforizează procesul de creație artistică.

În sfârşit, simt cum fiecare respirație devine o invitație către o existență mai profundă, mai autentică, pentru că fiecare clipă e o oportunitate de a transcende limitele eului și de a atinge divinul. Și în această acceptare, găsesc în sfârșit pacea și împlinirea pe care le-am căutat mereu.

Pictura trebuie văzută printr-o singură fereastră

On Decembrie 24, 2012

Fiecare pictor trebuie să încerce cel puţin o dată să reprezinte splendoarea naturii pe pânză, aşa încât natura să fie o proiecţie a stărilor sale lăuntrice.

Pictura trebuie văzută printr-o singură fereastră, așa cum apare în cazul lucrurilor făcute să arate ca cifra 0: dacă vrei să redai o minge rotundă la înălțime, e nevoie s-o faci lunguiață, după aceeași lege, pentru ca stând îndărătul ei în racursi să apară rotundă. Pentru aceasta trebuie să ţinem cont de cele dintâi opt părți în care se împarte pictura: întunecime, lumină, trup, chip, culoare, loc, îndepărtare și apropiere. Se pot adăuga acestora încă alte două: mișcarea și neclintirea, pentru că acestea sunt necesare să fie înfățișate în mișcările lucrurilor închipuite în pictură.

Şi, bineînţeles, pictura se împarte în cinci părți. Părțile picturii sunt cinci și anume : suprafața, forma, culoarea, umbra și lumina, apropierea și depărtarea, sau aș mai putea spune: mișcarea și mărirea, care sunt cele două perspective, ca în micșorarea cantității sau micșorarea preciziei lucrurilor privite în depărtare, precum și-a culorilor; iar culoarea este ceea ce se micșorează mai întii, la distanțe egale, și ceea ce dăinuiește mai mult.

Cât despre cele două părți principale în care se împarte pictura, iată-le. Două sunt părțile principale în care se împarte pictura și anume: contururile care înconjoară figurile închipuite și care cer să fie desenate. Cea de a doua este umbra. Iar desenul are un foarte mare merit, pentru că el nu se află numai în căutarea lucrurilor care se văd în natură, dar și a unor nesfârşit de multe altele, pe care nu le face natura. Desenul poruncește sculptorului precum și tuturor artelor manuale, să-și isprăvească cu grijă întruchipările sale și cu toate că numărul lor e nesfârşit, să le arate în desăvârșita lor încheiere.

Întru aceasta vom încheia și noi arătând că desenul nu e numai o știință a omului, ci o divinitate în toată puterea cuvântului, divinitate care izvodește aidoma tot ce a creat netăgăduit Dumnezeu.

Leadership: Poţi pune în legătură redarea unui fenomen al naturii cu faptul că acesta a avut anterior valoarea senzaţiilor şi a stărilor care l-au definit pe om în momentul când îşi contempla imaginea?

Părerea mea nu este diferită de ceea ce spunea, mai sus, Leonardo Da Vinci. Observatorul unei imagini, precum o pictură abstractă (datorită florilor cu petale ce îmbină albul cu roșul-carmin), poate să vadă numai exteriorul, dar nu şi interiorul. Deşi, asta este cea mai importantă caracteristică a unei capodopere: cel care priveşte o pictură trebuie să simtă în primul rând trăirile pictorului, nu să contemple spectacolul naturii (înfăţişat printr-un colorit autentic) printr-o permanentă atitudine statică.

Fiecare pictor trebuie să încerce cel puţin o dată să reprezinte splendoarea naturii pe pânză, aşa încât natura să fie nu doar o proiecţie a stărilor sale lăuntrice, ci şi o proiecţie a propriei existenţe dincolo de timpul şi spaţiul infinit. Degeaba pictorul are pornirea de a desena forma lucrurilor, în culorile cele mai vii, dacă observatorul nu reuşeşte să pătrundă taina lucrurilor eterne care îl uneşte cu Dumnezeu.

În opera pictorului, descrierea imaginii naturii trebuie să fie inseparabilă de viața lui. Iar observatorul picturii va constata că nu este suficient să cunoască stările pictorului ca să poată vedea diversitatea naturii în culori. Dacă însă observatorul îşi îndreaptă atenţia asupra

unor stări anterioare ale pictorului, va constata că poate să prevadă în mod sigur desfăşurarea fenomenelor naturii, întrucât vă apărea comportarea pictorului reflectată sub forma culorilor agresive sau calme.

Dacă pictura este reuşită, observatorul va pune în legătură redarea unui fenomen al naturii cu faptul că acesta a avut anterior valoarea senzaţiilor şi a stărilor care l-au definit pe artist în momentul când a realizat imaginea. Astfel, dacă observatorul nu este în stare să observe direct partea lăuntrică a pictorului, nu va putea să facă previzibil parcursul existenţei lui, mai ales dacă ţine seama de valorile anterioare a ceea ce el poate să observe. Posibilitatea este motivată prin existenţa corespondenţei dintre anticipare şi realitate.

Pentru a redimensiona leadershipul şi a-l integra în spaţiul artei, trebuie să argumentezi faptul că însuşi liderul este un artist care cucereşte lumea cu picturile sale. Un artist care ştie să-şi valorifice potenţialul simbolistic, un artist care și-a făcut un crez din a fi veșnic oglinda naturii.

Pictura trebuie văzută printr-o singură fereastră care să ofere o perspectivă mai amplă asupra lumii lăuntrice a artistului. Această fereastră trebuie să asigure, în acelaşi timp, o vizibilitate bună asupra peisajului care însă se poate degrada dacă suportă - prin analogie - consecinţele conflictelor interioare cu care se confruntă artistul.

Conflictele interioare apar atunci când o parte din tine vrea să facă creadă un lucru, iar altă parte din tine este total împotriva acelui lucru.

*** Notă:** Leonardo Da Vinci - *Tratat despre pictură*, Editura Meridiane, 1971.

Pierdut în afara timpului

On Iunie 12, 2013

Pune-te în faţa unei noi situaţii de "a fi", fără să stârneşti un conflict de mare intensitate cu tine însuţi.

Ceea ce-mi trădează firea este neputinţa de a fi acelaşi om de ieri. Nepotolită, dorinţa de a mă descoperi şi înţelege în situaţii noi, care nu se suprapun şi nu se confundă cu realitatea, îmi creează un anumit disconfort, un conflict de mare intensitate cu mine însumi. Întâmplările cele mai banale devin puncte de plecare pentru estimarea problematică a unei aduceri aminte, ca o proiecție astrală a unui vis văzut câteodată cu ochii deshisi, înfăţişat printr-o asumare a contrastului dintre o coajă aparenţelor şi existența unui plan transcendent, al unui anumit mister al vieții.

Dominant, mă gândesc la mine ca la un vizitator într-o carte plină cu frumuseţile unei lumi fără ups and downs, din care nu pot să mă aleg cu nimic, fără să pot atinge o stea şi să surâd spre lună, fără să simt mirosul trandafirilor creaţi special din flăcările unei iubiri profunde, fără să pot mişca din loc o lacrimă a soarelui aşternută pe covorul de frunze pastelate al unei grădini vrăjite aflată dincolo de orizontul timpului.

Mă trezesc constant în situaţii de care nu pot scăpa. Nu singur. Ci cu lumea întreagă, inevitabilă, care parcă mă tot urmăreşte ca un ecou, anunţând o nouă rivalitate, sporind inconfortabila senzaţie de închidere în mine însumi. Mă învârt într-un cerc care îşi schimbă mărimea în timp. Într-un timp care pare că aparţine altcuiva, unei creaţiuni impunătoare, unei dimensiuni pe care nu o pot transcende.

Pe măsură ce mă adâncesc în cercetarea de sine, mintea se scufundă într-o lume fictivă. Din nou simt cum sunt luat de valul inconsecvenţei şi subiectivităţii. Cad pradă uşoară încălcării legilor universale de " *a fi* ", tocmai pentru că sunt enorm de multe necunoscute de care mă agăţ. Şi cărora le atribui mereu o altă semnificaţie.

Leadership: Eşti pregătit să-ţi asumi destinul de explorator al unui univers lărgit, care se recompune din nişte fragmente de jurnal combinate cu impresiile, amintirile şi imaginile adunate într-un singur personaj?

Urc treptele înguste spre sublimul eliberator, speranţa întrezăririi unui înţeles nou stăruind la marginea semnificaţiei situaţiilor care mă puneau la încercare, ca apoi să mă pierd şi mai mult într-un vârtej năucitor. Un adevărat joc al ficţiunii. Sunt complet dezorientat, de parcă mi-aş fi închis toată existenţa într-un vas pe fundul căruia se derulează, într-un continuu flux, toate rămăşiţele raţiunii şi obiectivităţii. Aproximaţia unei realităţi inerte nu poate fi conceptualizată, depăşind intuitivul, dar are rolul de a asigura deschiderea către o nouă ordine a lucrurilor.

Itinerariul meu este în fiecare zi altul. Oricât de întâmplătoare par căderile mele în atemporal, nu reuşesc să trec niciodată de hotarele impuse de mintea mea. Nu par să mă îndrept spre un loc anume. Şi nici nu ştiu unde mă aflu. Inimaginabilul sălăşluieşte cu prisosinţă în mintea mea. Preţul izolării mele în această enigmatică zonă de timp a crescut.

Degeaba mă agăţ de gânduri şi înţelesuri care aş vrea să mă trezească. Ele sunt inutile, nu pot alunga toată ceaţa de mister care mă împrejmuieşte nemijlocit. Simt că trăiesc în afara timpului, unde nu există nici zi şi nici noapte. Nu am nici măcar posibilitatea de a face ceva conştient. Cum e cu putinţă?

Nu pot găsi o explicaţie plauzibilă acestui fenomen care poate fi confundat cu uşurinţă cu un vis, cu un *voyage* spre o realitate virtuală, sau cu *une inclusion dans le chaos.* Poate că este doar o încercare de a mă izola, de a evada într-o lume imaginară, pentru a distruge obişnuitul din viaţa mea şi toate proporţiile adecvate acestuia.

Leadership: Te concentrezi asupra propriei lumi la nivelul contrastului dintre imaginea omului care îşi manifestă opţiunea între realităţi şi identităţi alternative, și produsul final al unei experienţe reale de articulare a unei viziuni comprehensive?

Poţi să te dezlegi de neputinţa ta de a fi acelaşi om de ieri? Dorinţa de a te înţelege în situaţii noi, creează un conflict de mare intensitate cu tine însuţi? Simţi cum eşti luat de valul inconsecvenţei şi subiectivităţii? Reuşeşti să treci de hotarele impuse de mintea ta?

Dacă eşti un lider experimentat, înseamnă că nu eşti orb cu tine însuţi, ci preiei cu autoritatea care te caracterizează controlul acelor situaţii care nu conduc la conştientizarea limitelor tale şi nu laşi oponentul tău cel mai înverşunat să decidă în locul tău.

Ca lider, eşti responsabil pentru modul în care guvernezi sau eşti guvernat de oponentul tău cel mai înverşunat. Acel Alter-Ego care abia aşteaptă să te ţină prizonier într-o situaţie de neputinţă, tăindu-ţi elanul de a fi constant cu tine însuţi. Şi dacă nu faci tot ce îţi stă în putinţă pentru a împiedica influenţa negativă a acestei convingătoare entităţi (de neînţeles în anumite momente), proiectând în lumină imaginea vie a realităţii, te faci vinovat de culpă morală, de neacordare de prioritate acelei interpretări verosimile a autenticităţii tale.

Omul care îşi manifestă opţiunea între realităţi şi identităţi alternative este creatorul de idei şi de ficţiuni cu valoare de adevăr care umple spaţiul gol din viaţa sa cu viziunea unei lumi simultane, asemenea scriitorului plin de har al cărui text îl digeri într-un moment anume, dar îi regăseşti urmele peste tot în jur.

Totodată acest om poate deveni produsul final al unei experienţe reale de articulare a unei viziuni comprehensive atunci când creaţia ce o face posibil de recunoscut (şi din care transpar sentimente, gânduri şi intenţii ale inimii) devine un mod de a retrăi permanent intensitatea momentului care îl scoate din anonimat.

Leadership: Rămâi ferm în faţa principiilor şi limitelor tale, în acele situaţii când crezi că eşti incapabili să reacţionezi din cauza deznodământului unei poveşti pe care o lecturezi cu sufletul la gură?

Leadershipul de calitate vizează acea categorie de indivizi care, în cea mai deplină armonie cu ei înşişi, se adaptează la o realitate bine construită, la o lume de tipul " *safe",* care le permite să rămână constanţi cu ei înşişi. Certe experienţe de viaţă, solicitante, îi izolează pe cei care prezintă simptome de "rătăcire" într-un enigmatic timp, determinându-i să staţioneze la cumpăna dintre trecut, prezent şi viitor.

Spunea odată cineva: " *Nu e suficient să obţii o autoritate, trebuie de asemenea să ştii să o apreciezi şi să o stăpâneşti, altfel ea este irosită sau folosită greşit, sau se poate dovedi a fi în detrimentul tău.* " Nu pot să interpretez acest adevăr altfel decât printr-un singur cuvânt "valoare".

Dacă nu te laşi luat de valul inconsecvenţei şi subiectivităţii, dacă nu cazi pradă uşoară încălcării legilor universale de manifestare a libertății imaginarului, deci dacă rămâi constant în asigurarea unui aport optim de creativitate care să concretizeze magistral acele aspecte şi situaţii din realitatea vie, atunci valoarea ta nu va fi pusă la îndoială.

Numai rămânând ferm în faţa principiilor şi limitelor tale, în acele situaţii când eşti incapabil să reacţionezi cum ai dori şi cum te-ar avantaja, vei putea să eviţi orice conflict de mare intensitate cu tine însuţi.

Deznodământul unei poveşti pe care o lecturezi cu sufletul la gură este un prilej de reflecţie, emoţie, satisfacţie pentru triumful imaginarului în zbuciumata aventură numită "viaţă", care se iroseşte dacă nu este însoţit de un vis devenit realitate.

Pierdut în afara timpului vizează trecerea de starea normală de " *a fi* ", la o altă stare care te prinde în cercul inconfortabil al dezordinii, al imaginaţiei prodigioase, al lipsei de armonie în gândire şi în relaţia cu partenerul tău – Ego-ul – care se poate transforma într-un oponent redutabil. Adică atunci când pierzi noţiunea timpului şi să te laşi purtat de val, şi nu mai poţi să-ţi valorifici experienţa de viaţă.

Aşa cum o pictură neterminată oferă posibilitatea unei analize precise, pe tabloul însuşi, tot astfel situaţiile şi experienţele de viaţă în care te confrunţi cu mai multe variante de " *a fi* ", în mijlocul intrigilor care se ţes de unde nu te aştepţi, îţi oferă posibilitatea de a-ţi actualiza potenţialul prin înţelegerea mai bună a propriei fiinţe în raport cu timpul pe care îl acorzi construcţiei şi întreţinerii imaginarului intens metaforizant.

Piesa de leadership

On Decembrie 05, 2010

Leadershipul este o piesă pe care trebuie să o înţelegi foarte bine, să pătrunzi în esenţa ei, iar finalul să-l creezi aşa cum vrei tu.

Deseori, povestind despre celebrul personaj, Contele de Monte Cristo, am simţit că ţi-ar fi mult mai uşor să înţelegi adevărata latură umană a leadershipului. Pentru că singurul lucru cert care stă în calea atingerii performanţei dorite, este propriul tău "design" interior - care întegrează adevărata ta identitate şi adevăratul tău potenţial de a crea rezultate.

După evadarea din înspăimântătorul castel D'if, şi după găsirea uimitoarei comori a cardinalului Spada, Edmond Dantes şi-a creat o nouă identitate, cumpărându-şi titlul de conte. Singurul lui gând era să-şi pedepsească călăii şi să-şi ajute vechii prieteni. Prestaţia pe care a oferit-o tuturor în rolul contelui de Monte Cristo a fost de-ajuns de eficientă ca să-i deschidă noi orizonturi şi noi oportunităţi în vederea atingerii scopurilor propuse. Reuşita lui a fost deplină.

Leadership: Faci parte din categoria artiștilor cameleonici care îşi pot asuma identități extrem de diferite în funcţie de decorul pe care îl oferă impulsul de a pune pe wishlist preţul eliberării de trecut?

Edmond a reuşit printr-o măiestrie rar întâlnită să dea viaţă atât unui personaj pe cât de cuprinzător, pe atât de desăvârşit, cât şi unui "spectacol" fermecător, cu maximă audienţă. El a interpretat cu o virtuozitate nemaiîntâlnită un rol extrem de credibil, a unui om putred de bogat, apărând mereu îmbrăcat într-o ţinută ingenios concepută – ca cea a unui magician, care i-a conferit prestanţă, cât şi o aură de putere, de lider autentic, dominând astfel întreaga lume.

Un spectacol impresionant, o idee bună, un scenariu bine gândit, cum numai un regizor desăvârşit îl poate realiza, formula unui leadership de calitate şi o prestaţie de zile mari. Aceasta este formula unui leadership de calitate.

Numai un om foarte dotat din punct de vedere intelectual poate întruchipa cu o deosebită forţă realistă şi la un nivel de înaltă artă un personaj unic prin complexitatea lui, emoţionând "publicul" prin inocenţă şi simplitate. Numai un artist desăvârşit poate să confere o interpretare realistă personajului pe care îl interpretează şi să provoace o adevărată senzaţie.

Un parcurs plin de puterea şi slava lui Dumnezeu are ca esenţă testarea sensibilităţii dureroase faţă de ireconciliabilele forţe ale timpului ce spulberă visele şi faţă de caracterul unui rol constituit în funcţie de reacţiile şi aşteptările celorlalţi, care precum în tragedie şi dramă fac din viaţă o sumă de contorsiuni incredibile.

Fără un proces de gândire desfăşurată, uneori la o înaltă tensiune psihică, nu poate exista o depăşire a experienţei de viaţă bazată pe istoricul unor răni dureroase. La fel cum fără a fi creativ şi expansiv nu poţi să atingi relativ facil scopuri care, răspunzând întocmai sufletului, constituie extensii active ale condiţiei de prizonier al trecutului, constrâns să-şi redefinească, în mod repetat, propria identitate.

Inspiraţia, singur simţământul nemijlocit care conţine dedicarea cu consecvenţă unui rol important în funcţie de reacţiile şi aşteptările celorlalţi, nu este un dar fericit al naturii, ci o

moştenire bogată a acelor merite de creaţie care nu îţi asigură sfinţenia, dar te îndreptăţesc să primeşti călăuzirea din partea Domnului, aspră în limitele unei severităţi corecte.

Gândurile de răzbunare duse până la capăt, uneori singurele forme de interpretare ale pedepsei divine faţă de săvârşirea nedreptăţii şi fărădelegii, fac din tine stăpânul demn şi legal al acestei moşteniri, deseori întâmplătoare.

La Contele de Monte Cristo, măiestria artistică, originalitatea şi imaginea de actor, au jucat un rol fundamental în resetarea raporturilor dintre scenă şi culise, afirmând totodată acea realitate a îmbrăţişării divine, ferma convingere a existenţei unei puteri neaşteptate şi superioare. În absenţa acestora, toată menirea lui s-ar fi pierdut, s-ar fi irosit.

Reiese clar că numai din unirea contrariilor dintre atributele de acțiune, permisibil atribuite lui Dumnezeu, se formează artistul autentic.

Leadership: Poţi să compui un rol mare şi să-l interpretezi cu măiestrie într-un scenariu de viaţă care are toate şansele să se dovedească adevărat numai dacă îţi pune la încercare capacitatea de a "simți" la ce pagină ești într-un roman plin de intrigi şi taine?

Îndrăzneşte să faci primul pas demn de a fi luat în consideraţie de ceilalţi oameni: compune un rol mare pe care să-l îmbini la perfecţiune cu cel al liderului, şi pe care să-l ancorezi în scenariul tău. Vei avea un succes colosal numai dacă vei da dovadă de fantezie, numai dacă vei reuşi o interpretare autentic novatoare printr-un un rol plin de substanţă, plin pasiune si de energie.

Demonstrează, degajând forţă de caracter, că eşti croit pentru un rol de mare importanţă. Şi încearcă să răstorni toate concepţiile asupra rolului de lider – fii un magician ! Fii un magician care prin iscusinţa şi desăvârşirea sa actoricească dă dovada de o mare capacitate de creaţie în rolul său. Astfel încât să nu lipsească aprecierile favorabile din partea "publicului" recunoscător pentru frumoasa ta prestaţie.

Leadershipul este rolul pe care ţi-l asumi cu voia Domnului, a cărui singur scenariu se scrie cu acea "urmă" a durerii rămase undeva într-un colţişor al memoriei şi cu acea răsplată a izbânzii sufletului asupra răului.

Personalitatea ta va trebui să fie definită ca aceea a unui artist de mare sensibilitate, făcut pentru roluri puternice şi complexe, unde nu există şi posibilitatea de a face paradă. Leadershipul tău nu trebuie să semene cu un spectacol de circ la care oamenii râd în hohote. Ci unul autentic, real, serios, plin de emoţii şi de sentimente, adaptat le propria ta viziune - un spectacol în care ceea ce pare imposibil devine posibil.

Un lider are de făcut un rol mare, în orice circumstanţă. El nu face niciodată figuraţie. Nu poţi să iei un lider şi să-l pui să interpreteze rolul unui servitor care să ducă o tavă şi să servească fără sa piardă nimic din ea. Servitorul face doar figuraţie, dar nu poate interpreta niciodată rolul de lider.

Se spune că regele Carol al IX-lea a întrebat-o pe Caterina de Medicis, după noaptea Sfântului Bartolomeu: *"Cum ţi se pare că mi-am jucat micul meu rol?"*

La fel te întreb şi eu pe tine: Cum ţi-ai jucat propriul tău rol? Ai reuşit să-ţi interpretezi cu o virtuozitate inegalabilă rolul de lider în "piesa" pe care tu însuţi ai creat-o? Dacă nu, renunţă pe viitor la acest rol şi cedează-l altcuiva cu adevărat talentat.

Un artist cameleonic este omul care ştie să facă din viaţa sa un tablou în care fiecare culoare îşi găseşte corespondent în gândirea de a fi superior altora prin rafinamentul şi subtilităţile de cluise, dar şi prin manifestarea năzuinţei într-un vis pe care să-l poate povesti peste ani.

Piesa de leadership este o combinație explozivă de măşti, evenimente, încercări, emoţii şi lecţii de viaţă pe care trebuie să ştii să le asamblezi şi să le domini astfel încât să construieşti personajul perfect al unei confesiuni sufleteşti de o emoţionantă sinceritate.

Dacă aspiri la titlul de lider, trebuie să ştii din start că te aşteaptă o muncă colosală într-o "piesă" în care trebuie să deţii capul de afiş permanent, o piesă scrisă şi regizată de tine a cărei final este cel aşteptat de tine, dar care să fie în favoarea tuturor. Depinde de tine calitatea piesei şi a prestaţiei pe care o oferi.

Piesa minune a renaşterii intelectuale

On Decembrie 20, 2013

Oferă modelului tău de leadership o transformare fără precedent, concentrându-ţi toate forţele de excelenţă într-un sistem de gândire care să asigure noi abordări.

O bună parte din viaţă mi-am consacrat-o muncii ştiinţifice, în propriul laborator, înconjurat de retorte şi creuzete. Cu chibzuinţa unui alchimist care cercetează noi reţele de transformare a metalului în aur, am pornit la descifrarea unor taine deosebit de complexe. Şi, cu răbdare, am reuşit să elimin variantele necorespunzătoare de prelucrare a necunoscutelor, prin accesarea eficientă a datelor şi rezultatelor analizate.

Vreme îndelungată, stăruitor, zi de zi, mi-am îndreptat dezvoltarea spre o *Intellectuale Renascentiae* , reunindu-mi analizele într-o teorie a materiei pe baza unor noi legi şi principii. Ireproşabil, am reuşit să creez un nou spaţiu de înţelegere a relaţiei dintre taine şi înţelesuri. Şi, astfel, am putut să recunosc efectele unui sistem de forţe concurente care acţionează asupra unui punct şi în raport cu o axă.

Celebrul alchimist, Van Helmont, a scobit o adâncitură într-o cărămidă, a pus în ea busuioc mărunţit, apoi a acoperit adâncitura cu o altă cărămidă. A expus micuţa structură la soare şi, după câteva zile, mireasma din busuioc acţionând ca o maia a transformat iarba în adevăraţi scorpioni. Reţeta aceasta a avut o cu totul altă conotaţie pentru mine, un alt conţinut, un înţeles pe care l-am recunoscut în esenţă. Şi anume, totul era posibil pentru cel care reuşea să menţină în echilibru forţele de acţiune şi reacţiune ale acestei lumi.

Trecând cu abilitate peste fiorul inexplicabil al plăsmuirii ce transforma toate obiectele din jur în regiuni de cercetare, excluzând cu prioritate toate generalităţile goale de conţinut, am reuşit în final să descopăr esenţa, profunzimea din care sunt constituite elementele. A căror variaţii şi interacţiuni pot să producă o mare cantitate de forţă într-un timp foarte scurt.

Leadership: Poţi să-ţi etalezi capacitatea de a distinge limbajul ştiinţei vieţii de "poarta" spre o cunoaştere detaliată a tot ce este în jurul tău, fără să te constitui drept rezultat al unei puteri care continuă să te stăpânească?

Nu puteam să renunţ la halatul alb, aveam încă de limpezit mult taine în lupta cu imaginaţia şi adevărul. Făceam tot mai multe experienţe şi observaţii. Stimulatoriu, mă slujeam de forţele de sens contrar, ţinând cont de alternanţa şi unitatea lor, astfel încât modulul rezultantei lor să fie maxim.

Din tentaţie în tentaţie, din provocare în provocare, în experimentele trăite atât prin intensitate cât şi prin durată, depăşind barierele gândurilor, uzând de tendinţa de a face din orice o entitate vie, am reuşit să aşez toate aceste forţe de sens contrar într-o nouă construcţie, într-un sistem de gândire care viza asigurarea unor noi abordări.

Esenţa creaţiei, starterul acesta care mă menţinea în priză, făcându-şi zilnic upgrade, asigura alimentarea unui curent suficient de mare prin filamentele ştiinţei, conturând direcţiile mele viitoare de cercetare. Curentul s-a transformat şi evoluat de-a lungul timpului, ajungând să fie ceea ce trăiesc în ziua de azi: aventura cunoaşterii prin intermediul puterii prezentului. Acesta a fost, de altfel, şi secretul lui Milton.

În ceea ce mă priveşte, limbajul vieţii evidenţiat de o împăcare cu mine însumi, ce ţine de

iubirea faţă de tot cei din jur, nu-mi creează nicio imagine în ochii celorlalţi, nu-mi oferă mândrie sau o bucurie de nedescris, fiindcă încă nu mi-am asumat o exteriorizare a sufletului meu printr-o favorabilă îmbinare a frumosului cu utilul. Singura putere care continuă să mă stăpânească este dorinţa de a cunoaşte legile materiei şi de a le folosi în scopul valorizării unei noi raţiuni.

Leadership: Poţi să recunoşti efectele unui sistem de forţe concurente care acţionează asupra unui punct şi în raport cu o axă, evaluându-te în raport cu imposibilitatea unei cunoaşteri adevărate care îmbină toate detaliile experienţei de viaţă cu detaliile unei opere de artă?

Leadershipul este rezultatul unui proces de fundamentare a cunoaşterii şi înţelegerii, prielnice unei dezvoltări avantajoase. A produce o mare cantitate de forţă intelectuală într-un timp foarte scurt, este proiectul posibilităţii unei putinţe lăuntrice nelimitate de a construi noi tipare de utilizare a resurselor proprii de formare şi învăţare.

Cunoaşterea reprezintă primul episod dintr-o nouă etapă a regăsirii de sine plină de pasiune, pline de sensul care este sau nu este în fiecare dintre noi. Iar această regăsire reflectă însuşirea de a fi autentic. Este urmarea unei continuităţi, nepusă în lumină în chip sistematic.

Omul care pretinde mai multe de la el însuşi, totuşi, nu ajunge la excelenţă decât rareori, şi numai atunci când analizele pline de experienţă şi intuiţie, ieşind din perimetrul de investigaţie a ştiinţei, încep să-şi făurească o "istorie" personală la care ceilalţi nu au acces. O filozofie la care nu poate participa oricine cu convingere. Aceasta fiind dubla încadrare a determinismului într-un leadership eficient în baza unor eforturi şi idei care îngăduie "priviri din afară" dar nu îngăduie deliberări de grup. În multe cazuri, totul se face individual de-a lungul întregului proces de creare a valorii.

A recunoaşte efectele unui sistem de forţe concurente care acţionează asupra unul punct şi în raport cu o axă înseamnă să pui la dispoziţia propriei tale cunoaşteri o mulţime de date omogene care modelează un sistem sau un proces din lumea reală şi serveşte ca suport unei scheme de înţelegere a necunoscutelor derivate dintr-o analiză complexe. Punctul desemnează profunzimea realităţii, în timp ce axa poate fi reprezentată de patternurile acelor convingeri, considerate de bază, care nu-ţi limitează cunoaşterea şi conturează interpretările personale date aspectelor particulare ale practicii.

O artă perfectă care face cinste ştiinţei de a te constitui drept un rezultat al unei puteri care continuă să te stăpânească este o îmbinare de filosofie care îţi permite să gândeşti orice în termeni de "proces al transformării" şi de valoare atribuită curiozităţii de tipul "privire din exterior".

Această privire din exterior care nu-ţi mai dă pace te face să te întrebi mereu: "oare ce am descoperit astăzi nou, şi care mi-a scăpat ieri" ?

Din tentaţie în tentaţie, din provocare în provocare, în lupta cu necunoscutele, vei ajunge să contribui masiv la formularea unor noi teorii în ştiinţă, uneori prin raportarea la teorii anterioare. Şi asta cu o singură condiţie: să aşezi toate aceste forţe de sens contrar într-o nouă construcţie, într-un nou sistem de gândire care vizează asigurarea unor noi abordări.

Aceste forţe de sens contrar sunt date de noţiunile şi cunoştinţele căpătate în timp, teoretice sau practice, care îţi individualizează cercetările şi sunt utile dezvoltării tale. Dacă intenţionezi să descoperi noi ipoteze sau teorii care să prevestească sau să pregătească dezvoltarea procedeelor de reconstituire a unor aspecte particulare din arsenalul cercetării, atunci slujeşte-te de forţele de sens contrar ţinând cont de alternanţa şi unitatea lor, astfel

încât modulul rezultatei lor să fie maxim.

Leadershipul devine din punct de vedere ştiinţific expresia fenomenalizării uneia şi aceleiaşi esenţe de bază a renaşterii intelectuale: cuprinderea materiei, creşterea conţinutului de adevăruri care pot fi înțelese pe măsură ce se transformă în convingeri.

Ordonarea logică a compoziţiilor de informaţii şi a exemplelor de bună practică, din spatele cercetării ştiinţifice, după sistemul evoluat de prelucrare a întrebărilor şi răspunsurilor care produc materia primă a unor noi reflecţii cu adevărat utile, va stărui în multă vreme în jurul aurei perfecţiunii.

Piesa minune a renaşterii intelectuale este cunoaşterea izvorâtă din realitatea care constituie izvorul tuturor transformărilor din natură, mai ales cunoaşterea aprofundată a complexităţii fenomenului numit "om".

Pilda dreptei credinţe a lui David

On Martie 02, 2022

Să ai atât de mare încredere în tine, încât încrederea ta să constituie povestea unui destin neîntrerupt. De la încredere la destin se măsoară performanțele tale !

Prin clasa a 3-a am văzut un filmuleţ despre lupta lui David şi Goliat, o pildă de mărturisire a adevăratei credinţe. Tare mult mi-a plăcut. Mai întâi fiindcă îmi plac filmele despre învingători, apoi fiindcă şi eu am fost dintotdeauna un învingător. Şi nu-mi place să pierd. Ei bine, Goliat era un războinic filistean uriaş, faimos pentru lupta corp la corp, foarte înalt de circa patru metri, învingător în toate bătăliile la care a participat. De cealaltă parte, David era subţirel, avea o statură medie, nu luase parte la nicio bătălie, dar ştia să tragă cu praştia mai bine ca oricine.

Toată lumea l-a avertizat pe David să fie cu mare băgare de seamă, deoarece nu are nicio şansă să-l învingă pe marele Goliat. Dar, mai important este ce-a simţit David în sufletul lui, fără să ia seama de avertismentele repetate ale celorlalţi. Sământa credinţei şi a sfinţeniei sădită în sufletul lui de către Dumnezeu, s-a manifestat ca un avânt puternic spre a reuşi imposibilul: *"Goliat este atât de mare, încât pur şi simplu nu am cum să nu-l nimeresc ! "*

Asta este o lecţie de un preţ nespus de mare. Vei putea să învingi pe oricine se crede BIG, dacă ai praştia potrivită. Şi care este cea mai letală praştie din lume, acum, în secolul 21? Ei bine, TEHNOLOGIA este praştia care poate doborî orice Uriaş, orice munte şi orice obstacol !

Bun, dar poate vă întrebaţi: este loc sub soare pentru amândoi. De ce să învingă unul sau celălalt? Un răspuns la această întrebare: fiindcă totdeauna va trebui să existe un David capabil să creeze o distanţare între oamenii înzestraţi cu o credinţă enormă, şi acei farsori, falşi performeri, care îşi confecţionează o imagine şi un statut de "Cel Atotputernic" la fel cum se considera Goliat.

Cu siguranţă, sunt prea mulţi ca Goliat care nu merită să se considere mai mult decât sunt, de fapt. A venit momentul ca praştia trebuie să-şi facă efectul cum trebuie, şi dacă se poate, efectul să fie cât mai rapid şi mai zdravăn.

Leadership: Poţi să-ţi îndeplineşti menirea de a fi puternic, la nivelul de înţelegere a unei imagini de mare impact şi a sensurilor ei ce pot fi deduse din raportul stabilit între ceea ce este ereditar şi ceea ce te înnobilează?

La fiecare generaţie va apărea câte un David, a cărui unică menire este aceea de a reaminti celor precum Goliat cât de slabi şi neputincioşi sunt, de fapt. Lumea îşi va aminti de cei precum David, propovăduitori ai adevăratei credinţe, nu de falşii lideri sau de falşii apostoli...

Poate că în genealogia mea există o înrudire îndepărtată cu David, în pofida faptului că el era mai tânăr atunci când a săvârşit fapta nemuritoare şi glorioasă. Sau poate că, pentru a susţine credinţa într-un Dumnezeu întrupat, este nevoie de cineva mai puţin "uriaş" care să se remarce prin acele fapte deosebite pe care doar credinţa le poate înfăptui.

Într-adevăr orice om ales de Dumnezeu este un individ unic, înzestrat o anumită forţă de cunoaştere şi având o menire unică în viaţă: de a scoate în evidenţă rezultatul unei voinţe supreme, al unei credinţe dirijate, cu scopuri precise. Din această perspectivă, un om de mare credinţă este un original, dar şi imprevizibil mai ales prin rezultatele obţinute: unexpected

sau unusual.

Este revelator în această privinţă punctul de vedere exprimat de scriitorul Mark Fisher: *"În fiecare dintre noi există însă o voce micuţă, care nu moare niciodată, supravieţuind chiar şi în cele mai vitrege condiţii. Ea ne şopteşte cu timiditate la ureche că imaginea pe care o proiectăm în public este falsă, că adevărata noastră personalitate rămâne ascunsă şi nemanifestată. Consecinţele negării de sine şi ale refuzului de a oferi lumii ceea ce avem de mai bun în noi sunt inevitabil frustrarea şi tristeţea".*

Poate că aceasta este şi însemnătatea temei biblice a luptei dintre David şi Goliat: să port în suflet menirea înaltă de a ţine aprinsă candela credinţei în contextul unei lumi în schimbare, sau în contextul reorganizării societăţii, creând premisele unei diferenţieri între cei ce au acces la harul divin (care transformă caracterul), şi cei care nu au acces. Când te raportezi la statutul de "învingător prin credinţă", de fapt te raportezi la puterea adevărului divin care spune că: *" Sfântul Duh are menirea de a ne întări pe fiecare înăuntrul nostru".*

Leadership: Poţi să manifeşti un ataşament deosebit faţă de o stare de conştiinţă care depăşeşte limitele actului mediatic normal şi cere un act de credinţă, invocând prevederea referitoare la un eveniment declanşator de noi energii creatoare?

Mindset reprezintă o serie de percepţii sau convingeri pe care oamenii le au despre ei înşişi. În cazul meu, am ştiut că dacă vreau să fiu învingător în orice luptă, cu mari şanse de a reuşi să dobor un munte, întru combaterea idolatriei şi a falsei credinţe, va trebi să fiu diferit de ceilalţi, să fiu eu însumi şi să nu mă tem de nimic. Mai ales, nu trebuie să-mi fie teamă să-mi afişez adevărata personalitate într-o lume în care eroii trăiesc drame ale dezechilibrului sufletesc, şi se reprezintă doar în imagini care spun poveşti. De altfel, am învăţat să observ totul cu mare atenţie şi, izolându-mă din când în când de restul lumii, am învăţat să fiu sincer cu mine însumi, am aflat mai multe despre cine sunt eu cu adevărat.

Goliat este o metaforă a întunericului necredinţei sau a idolatriei, un reper al modului cum funcţionează criza de identitate a unei şarade care permite perpetuarea incompetenţei, creând o mare breşă în zidul de valori puternice pe care se bazează o societate ordonată. Valori precum onestitatea, demnitatea, cumpătarea, respectul, ordinea, perseverenţă, voinţa, credinţa în Dumnezeu. Iar dacă aş lua în calcul ipoteza unei diferenţieri între toleranţa centrată pe relativitatea valorilor, şi toleranţa asociată în principal cu valorizarea egalităţii, fără să subestimez importanţa unei transformări interioare, aş adăuga că numai o intenţie precisă dublată de un ataşament spiritual poate să conducă la un rezultat pozitiv.

Am înţeles că transformarea trebuie să se producă întotdeauna mai întâi în interior, prin formarea unei imagini clare şi precise a ambiţiilor şi dorinţelor mele (îndreptate spre dobândirea înaltei performanţe). Dar asta nu este de ajuns ca să realizez o schimbare. Trebuie, totodată, să merg până la cele mai mici detalii referitoare la exercitarea unor competenţe majore şi acte de intervenţionism pentru accelerarea progresului ştiinţei, încât să promovez o nouă viziune a viitorului.

În niciun caz nu trebuie să mă afirm prin exercitarea unor acte de constrângere la nivel de acceptare a unei imagini care nu face nicio atingere onestităţii, demnităţii ori măreţiei.

Oamenii mari sunt cei care deşi nu au nimic, reuşesc să aibă realizări uimitoare. Oamenii mici sunt cei care au totul, dar nu reuşesc să facă nimic extraordinar.

Desigur, în sprijinul acţiunilor mele, am luat deseori în calcul acest imperativ: *"Când ai o intenţie reală, 90% din posibilele obstacole tind să dispară de la sine, iar celelalte 10 procente pot fi controlate cu uşurinţă de ajutorul instrumentelor de care dispuni. Puterea*

intenţiei este cvasi-nelimitată."

Aceasta din urmă este şi concluzia complicatei demonstraţii de putere în care, uşor-uşor, mi-am înscris intenţiile de comunicare a unui mesaj spiritual: "Un om de mare credinţă este om care s-a dăruit cu mare pasiune ştiinţei şi artei, spre susţinerea inovaţiei şi difuzarea ei largă pe ansamblul unei demonstraţii de autoritate în domeniu."

Leadershipul este demonstraţia de putere pe care o faci invadând un terioriu care este obişnuit cu minciuna si cu reaua credinţă.

Pilda dreptei credinţe a lui David îmi indică un singur reper de verticalitate: să nu-mi fac niciodată chip cioplit, adică să mă încred numai în mine şi să nu pun niciodată pe nimeni mai presus de puterea mea. Dar trebuie să ştiu exact ce anume doresc să fiu, unde trebuie să ajung, şi să-mi transform dorinţele în intenţii - formulându-le cât mai clar cu putinţă.

De fapt, lupta dintre David şi Goliat evidenţiază deosebirea dintre adevăr şi falsitate, dintre autenticitate şi aparenţă: una este să fii realmente puternic (prin credinţă), şi cu totul altceva este să te consideri BIG (fără să îl ai pe Dumnezeu de partea ta).

Pink - The Color Of Love

On Mai 27, 2018

Învaţă să te recunoşti din perspectiva unei străluciri calde, încât să creşti în renaşterea unei opere care nu moare niciodată.

Arta înseamnă în primul rând culoare, o veşnică dimensiune a sinelui educat într-o cultură a frumosului autentic, prim planul unui act de creaţie îndelung chibzuit care reflectă modul de gândire, de simţire şi de înţelegere a vieţii în desfăşurarea unui joc de tonuri şi nuanţe, lumini şi umbre, linii şi curbe naturale. De aici a început totul.

Înţelegerea şi explicarea artei imediate, cu toate aspectele ei concrete legate strâns de existenţa unui Dumnezeu care îşi continuă expansiunea plină de înţelesuri abandonate, în ciuda oricăror nuanţe de optică, se comportă ca o forţă de expresie greu separabilă de întregul unei simţiri înaripate în timp. Puţini deţin capacitatea artistului de a se adânci în formularea unei premise cromatice ca singură inspiraţie a Duhului Sfant şi a se confrunta cu repere culturale durabile, fiindcă totul la el exprimă tendinţa de expansiune a mirajelor cele mai intense.

A transforma viziunea în acțiune implică recunoașterea valorii contrastelor, generând un echilibru între lumină și umbră.

De mic copil am înţeles că sunt asemenea unui străin pe un fond de trăire mistică, vecin cu plonjonul inițiatic într-o lume paralelă şi acaparatoare, dar ferit de orice contaminare anecdotică din partea vizibilă a unui continent scufundat aproape total în uitare. Arta, cu secretele ei pline de sensibilitatea universului, nu este la îndemâna oricui muritor.

Într-un mod cu totul uimitor, trebuia să-mi câştig reuşita într-o atmosferă de puternic contrast de clar-obscur, modelată de o lumină roşiatică destul de convingătoare care tratează spectacolul unei frumuseţi mai profunde, mai ascunse, a sufletului. Ceva neînsemnat ca şi construcţie plastică, dar care căpăta proporţii imense de rigoare prin folosirea principiilor artei ca reflexie a unei vieţi literar-artistice de o efervescenţă remarcabilă.

Să mă recunosc la perfecţie din perspectiva unei străluciri calde, subterane, într-un fond sângeriu care nu se poate auzi, vitaminizat de sensuri adânci, ce se prezintă ca mozaic al măreţiei în fața unei conștiințe estetice pure, era ceea ce în artă se numeşte: "Renaşterea unei opere care n-a murit niciodată".

Leadership: Îţi controlezi tendinţa de a te considera o parte dintr-un univers abstract, rezervându-ţi privilegiul unei vieţi văzută ca o corelaţie între nişte culori care îşi focalizează strălucirea asupra unui fond de imagine autentică?

Iniţiatorul unei mişcări artistice care îşi va desăvârşi caracteristicile esenţiale în secolul XXI, provocând prin exemplul său extinderea unui concept exclusiv de culturalizare a maselor, în stilul lui Paracelsus care lăsa să se înţeleagă mesajul universal *"Să te ţii scai de ştiinţă până ce ea se îndrăgosteşte nebuneşte de tine"* , s-a hrănit în mod mixt sau integral cu supliment cultural, plin de semnificaţii şi simboluri, care stau la temelia oricărei construcţii plastice sau literare.

Trebuia să mă apropii de un splendid exemplu de păstrare a farmecului intelectual, ca o rezultantă a contrastelor dintre frumuseţea supremă a unei inimii harice care ştie oricând să

fie tandră, şi apogeul artei finite, prin încercarea de simbolizare a spaţiului de expunere a unei serii de subiectivisme educate, pline de consistenţă, aşa cum apar ele exprimate în încercările marilor artişti de a da naştere unui nou curent de simţire şi gândire.

Rozul pal şi Roşul intens. Combinaţia dintre aceste două nuanţe cu valori concentrate pe fondul ideatic al unui expresionism destul de insistent, se face prin transfigurarea sensibilului într-o spiritualitate superioară, pură şi armonioasă. Trăirile cele mai intense se confundă cu culoarea sângelui care străbate o inimă plină de iasomie, ca într-un fel de lege a naturii care confirmă ambivalenţa simbolică a unui macrocosmos temporal şi nemuritor, sensibil şi intelectiv deopotrivă.

Leadership: Estetica cu care înnobilezi vastitatea subiectului numit "viaţă" confirmă argumentele cu privire la reacţiile emoţionale care invită la contemplarea unei opere de artă autentice?

Însăşi coordonatele unei gândiri desfăşurate pe un fond de imagini suprapuse într-un basm cromatic crepuscular, într-un scenariu fictiv dominat de impulsul către explorări creative, pot fi asociate cu năzuinţa imposibilă a pictorului de a-şi cunoaşte conţinutul emoţional într-un fel de coloană a infinitului văzută ca atribut al unei policromii instrumentale, sub forma unui ecou cu grave rezonanţe filosofice: Take a look around, don't you see what I have meant?

Maestrul meu, aproape de uimirea pe care o trezeşte o lumină puternic focalizată pe articulaţiile unui univers infinit în care divinitatea este modelul suprem, îmi repeta adesea: *"În artă degeaba atingi inima modelului dacă nu scoţi la iveală sufletul care îl întregeşte pe al tău "*.

Să reprezinţi spectrul celor mai fine semnale de vibraţie ale bucuriei sau durerii, oscilând de la nerv la nerv într-o ecloziune a cromaticii perfect echilibrată cu semnificaţia adâncă a fiecărei poveşti în sine, înseamnă să modifici toate entităţile şi dimensiunile celui mai infinit univers pe care ţi l-ai putea imagina. Dar în acelaşi timp trebuie să respecţi tainele şi darul oglinzii, fără să renunţi la povestea personală.

Lumea lui Dumnezeu a lăsat în favoarea artei doar pozitivul ei, iar cine reuşeşte să folosească materia primă (care reprezintă tot atâtea metafore şi simboluri) pentru a compune o nouă cromatică a raporturilor echilibrate de complementaritate roşu - verde, în nota unui clar-obscur sufletesc caracterizat prin supremaţia formelor inspirate de natură, acela se va constitui numaidecât ca forţă de expresie şi valoare artistică.

Leadership: Poţi să-ţi prelungeşti viaţa prin intermediul esteticii cu care îţi înnobilezi Egoul, fără să faci din trăirile tale o culoare fără licărire şi fără reflexii?

Frumuseţea pe care o inspiră artistul este o culoare care vorbeşte despre spaţiul infinit al universului suspendat între vis şi realitate, pe care ochiul interior o identifică drept mesaj al unei materialităţi care se spiritualizează. Şi tot prin intermediul unui artist care a făcut înconjurul lumii, scriitorul Mika Waltari evidenţiază mai bine trăirile pe care le încearcă un suflet care pătrunde în lumea spirituală şi nu mai poate evada în libertate:

"Ascultă, străinule ! Mă macin singur pentru a îndrăzni să fac ce încă nimeni n-a făcut. Zeii mă ocrotesc, dar nu ştiu dacă ei înţeleg cu adevărat disperarea cu care sunt dominat în încercarea de a-mi etala însuşirile unice în lume. Cei care nu cunosc limbajul artei, dimensiunile şi factura ei monumentală, se mulţumesc cu culorile şi cu formele tradiţionale. Iată de ce lumea este plină de oameni iscusiţi, care se bucură de succes şi au o viaţă uşoară. Dar un adevărat artist nu se măsoară decât cu el însuşi. Nu, eu nu am rival în această lume ! Eu, Aruns din Tarquinia, nu mă întrec decât cu mine însumi ! "

Expresia constantă a unei priviri adânci şi atente care se pierde în lumina destinului altora este ceea ce constituie şi determină un lucru, o reacţie sau o direcţie vizuală în jurul unei idei: este mai uşor să-ţi transpui povestea în imagini, decât să fii tu însuţi încadrat într-o realitate care depăşeşte graniţele lumii cotidiene obişnuite.

Un fond de imagine autentică seamănă cu o culoare fără început şi fără sfârşit: te captivează şi te amăgeşte în acelaşi timp pentru că îţi permite să te consideri un creator nemărginit, o mică parte a universului pământesc, vizibil şi cognoscibil, dar nu şi stăpânul absolut în planul perfect al macrocosmului în care divinitatea este modelul suprem.

Leadershipul este conţinutul unei poveşti pe care o poţi colora cum vrei tu, dar în limitele fixe ale unui subiect care rămâne imortalizat peste timp într-un tablou care nu-şi poate depăşi dimensiunea originală.

Pink - The Color Of Love este expresia dimensiunii emoţionale a culorii pe care o aleg să reprezinte "my own story" care nu a mai fost vizibilă până acum, cel puţin nu în varianta de tablou semnat cu litere de sânge în universul literar, în colţul din stânga-jos a paginii în care pământul se uneşte cu cerul: *Neculai Ioan Fântânaru.*

Plăcerea de a realiza cu mâna mea degringolada

On Iulie 19, 2010

Leadershipul constă în puterea de a-ți menține viziunea, chiar și atunci când resursele sunt limitate.

În privința distribuției, Eisenstein avea probleme grave. Sosise însoțit numai de câțiva dintre cei care urmau să joace în roluri principale, dar mai lipseau o serie de interpreți importanți. Fidel propriilor sale idei despre tipaj, Eisenstein căuta figuri cât mai expresive. Strauch era însărcinat cu depistarea lor. Dar nu numai el, ci și întreaga echipă alerga în tot orașul, căutând pe străzi, în tramvaie, în birouri sau ședințe fizionomiile solicitate de regizor.

Medicul nu fu găsit, și Eisenstein, ca o soluție de compromis dureros, alese un actor. Mergea într-o zi spre filmare în barcă cu el și, indispus, posac, evita să-l privească. Se uita numai la ceilalți din barcă, consumându-și interior iritarea. În fața lui era un fochist de la hotelul la care locuiau, angajat ca electrician în echipă. Eisenstein medita îmbufnat: "De ce angajează tipi din aceștia slăbuți pentru ca să țină oglinzile grele? Ăsta e în stare să lase oglinda să cadă în mare sau să o spargă, ceea ce e un semn rău."

Deodată însă îi privi chipul. Cu alți ochi. Îi puse, în închipuire, o mustață, un barbison… Pe nas un pince-nez… Și, ajuns pe punte, muncitorul nebănuitor fu îmbrăcat în uniforma cuvenită, devenind doctorul Smirnov în film. După cum rolul popii era interpretat de un bătrân grădinar dintr-o livadă din jurul Sevastopolului. Iar dublura lui, în scena rostogolirii pe trepte, deveni chiar Eisenstein. El spunea: "Nu mi-am putut refuza plăcerea de a realiza cu mâna mea degringolada."

Angajamentul față de o viziune se exprimă atunci când alegi să te implici personal în procesul creativ, demonstrând talentul de a înfrunta constrângerile de ordin practic și artistic.

Examenul distribuției este o parte esențială a evaluării cinematografice complete, din cauza că alegerea corectă a actorilor poate influența decisiv calitatea și autenticitatea filmului. Pentru a efectua acest proces cât mai funcțional cu putință, viziunea regizorală trebuie dilatată folosind tehnici creative speciale. Ochiul regizorului permite vizualizarea expresivității actorilor, a potențialului lor dramatic și a capacității de a întruchipa personajele. Observarea atentă poate dezvălui anomalii precum lipsa de autenticitate, expresii forțate sau inadecvări la rol.

În cazuri complexe, precum cele întâlnite de Eisenstein, poate fi necesară utilizarea unei abordări indirecte, precum analiza comportamentului în situații cotidiene, care oferă o imagine stereoscopică a potențialului actorilor și un câmp creativ mai larg. Astfel, regizorul poate descoperi talente neașteptate în locuri neprevăzute, precum fochistul hotelului sau grădinarul din livadă. Dacă privești cu atenție, ochiul îți spune multe despre realitate și viață, dar mai ales despre cum să creezi o poveste din detalii.

Leadershipul autentic presupune implicarea personală în realizarea viziunii, chiar dacă aceasta înseamnă asumarea unor roluri neașteptate.

Interpretarea corectă a aspectelor fizionomice necesită experiență și cunoștințe aprofundate despre tipajul cinematografic și psihologia personajelor, mai ales că fiecare detaliu poate schimba percepția publicului. Eisenstein, fidel propriilor idei despre tipaj, căuta figuri cât mai expresive, uneori fiind nevoit să aplice un "pince-nez" imaginar asupra chipurilor întâlnite

pentru a le transforma în personajele dorite. Dacă un muncitor nebănuitor fu îmbrăcat în uniforma cuvenită, devenind doctorul Smirnov în film, atunci este posibil ca orice om oarecare să devină un personaj memorabil.

Această abordare creativă în distribuție permite regizorului să depășească limitările castingului tradițional, găsind soluții inedite, precum transformarea unui muncitor în doctor sau asumarea personală a unor roluri pentru a realiza "cu mâna lui degringolada". Astfel, procesul de distribuție devine o extensie a viziunii artistice, contribuind la autenticitatea și originalitatea filmului, prin faptul că fiecare alegere de casting reflectă profunzimea și detaliile intențiilor narative ale regizorului.

Leadershipul vizionar constă în abilitatea de a redefini realitatea conform propriei perspective, evidențiind capacitatea de a vedea dincolo de aparențe și de a transforma resursele neașteptate în elemente esențiale ale succesului.

Plăcerea de a realiza cu mâna mea degringolada se constituie ca un fel de eliberare creativă atunci când te implici direct în haosul pe care îl creezi, deoarece îți oferă control absolut asupra fiecărui detaliu și îți amplifică legătura personală cu opera ta. Spun asta știind că fiecare gest artistic este adiacent unei viziuni care îmbrățișează atât imperfecțiunea, cât și spontaneitatea ce duc la rezultate unice.

*** Notă:** Ion Barna - *Eisenstein* , Editura Tineretului, 1966.

Plăsmuirile unei minți în care abundă arta

On Ianuarie 09, 2015

Poziţionează-te în planul concret al descoperirilor, reglând sensul realităţilor aflate dincolo de experienţa de viaţă.

Simţeam că sunt în preajma unei mari descoperiri, semănate din prea plinul unei încărcături revelatoare. Micile artificii de sintaxă ale construcţiei de tip „While", din procedura de extindere a orizontului de proiecţie a imaginilor de dincolo de gratiile realităţii, mă salvau cu brio din aproape orice încurcătură. Însă, la un moment dat am realizat că ecuaţia a cărei necunoscută era „argumentul duratei", în virtutea căreia se defineau excepţiile din câmpul logicii, devenise tot mai incertă datorită impredictibilităţii efectelor ei.

Aidoma unui meticulos colecţionar de tentaţii primejdioase, strecurate într-un loc discret unde îşi puteau dezlănţui în voie dulcea otravă, eram atras în vârtejul ameţitor al simbolurilor care puteau da sens experienţelor de viaţă trăite la maxim. Ispititor, mă agăţam de o aparentă stranietate, determinată de o sumă întreagă de factori obiectivi, dar totodată marcată de suma forţelor de reacţie ale modelului de gândire nerestricționat de vreo limitare.

Mă vedeam tot mai mult într-o lumină în care alţii nu mă vedeau. Cumva, mă aflam în postura califului Harun Al-Rasid care, prins în mod regulat de insomnii, se preumbla de unul singur prin umbrele saraiului căutându-şi frumoasele roabe pe care, odată găsite, le mângâia cu cele mai pure cuvinte. Dar ziua ştergea vorbele din timpul nopţii.

Şi tot aşa se întâmpla cu descoperirea mea uluitoare. Ea trebuia să fie examinată ca un fel de convenție a modalităţii de expunere a realităţii, una cu o cauzalitate inversă, deci să nu ducă la nudul aparenţelor. Dar trebuia să fiu atent atunci când încercam să o împărtăşesc cu ceilalţi. Căci o asemenea artă creatoare, *une drôle de façon de l'expérience,* îşi putea pierde din impact pe măsură ce încercam să unific raţiunile finite ale creaţiei cu ficţiunile necorupte de nicio finalitate.

Leadership: Experienţa ta de trasare a unei noi realităţi validează aplicabilitatea cu totul extraordinară a descoperirilor înglobate într-un orizont de timp îndepărtat?

Finalitatea este o caracteristică esenţială în leadership, implicând un ansamblu de corelaţii între valoarea de exprimare, libertatea de gândire, conotaţiile ideilor plăsmuite şi conţinutul de adevăr pe care îl generezi. Tot acest ansamblu depinde de o anumită concepţie a filosofiei, formată în jurul elementelor de bază ale vieții în mijlocul cărora se află subiectul uman, pe care trebuie să o propagi faţă de orice formulă a schimbării.

Leadershipul este o consecinţă a ceea ce numeşte „inteligenţă idealistă", redată prin intermediul creaţiei situate la graniţa dintre viaţă şi ficţiune. Care, la rândul ei, este consolidată prin sensul atribuit culturii descoperirii unui alt mod de a înţelege lumea, de a-i căuta culoarea, de a o personaliza cu o nouă interpretare. Iar dacă vrei să testezi limitele de acceptabilitate a gândirii tale, împărtăşeşte-ţi viziunea despre lume cu ceilalţi.

Experienţa de trasare a unei realităţi mai presus de obişnuit, în care argumentul duratei este un rezultat al extinderii şi implementării ei, se consideră a fi inevitabilă. Iar deoarece condiţiile de expunere a finalităţilor se pot oricând rescrie, experienţa aceasta devine o aventură a spiritului - de la percepţie la conştiinţa de sine, şi de la raţiune la revelaţie. Şi ea validează aplicabilitatea cu totul extraordinară a descoperirilor înglobate într-un orizont de timp îndepărtat prin unificarea raţiunilor finite ale creaţiei cu ficţiunile necorupte de nicio

finalitate.

Cunoaşterea care izvorăşte din întâlnirea cu realitatea de dincolo de experienţa vieţii, prin contact cu puterea creatoare, sub forma unei combinaţii suprarealiste dintre vechi şi nou, real şi imaginar, poate face dovada depăşirii limitelor tale de dezvoltare.

Dacă vrei ca leadershipul să deţină suficientă pregnanţă pentru a marca evoluţia, poziţionează-te în planul concret al descoperirilor, reglând sensul acelor realităţii aflate dincolo de experienţa de viaţă – deci, apropiată de o raţiune mai înaltă de creaţie, capabilă să producă o transformare radicală a lumii.

Experienţa care împleteşte toate elementele realităţii din care este format spaţiul unei noi descoperiri abundă de acea forţă creatoare a talentului de a te vedea în postura unui personaj de poveste care merită să fie în centrul unui nou concept numit: "Ia-te după mine ! "

Plăsmuirile unei minți în care abundă arta evidenţiază acele fragmente de gânduri, stări și experiențe de viaţă, finalizate într-un act de creaţie care aduce noi interpretări în care se regăsesc imagini şi aspecte ale unei lumi aflate în continuă prefacere. Dacă reuşeşti să-ţi extinzi orizonturile, prin creaţie şi prin conştiinţă, atunci se vei putea spune că ai început să faci „artă".

Plasticitatea neîntrecută a proiecţiei astrale

On Mai 20, 2018

Artistul şi trecutul lumii sunt ca două ascuţişuri de sabie pe care numai expresia unei viziuni subiective le face să se încreadă unul în celălalt.

O să-ţi spun acum despre ceea ce nu se predă niciunde, un secret al cărui ecou liber şi nestingherit zace doar în universul fascinant al hazardului, între îndoială şi delir, credinţă şi extaz, conform voinţei unui artist de a aşeza formele unei elementarităţi primare într-un ingenios şi pertinent profil pictural, plin de contraste cromatice.

Înconjurată de o aură mistică printre rămăşiţele timpului nemăsurat, culoarea unei teme majore se manifestă prin abundenţă, splendoare şi măreţie, vorbind despre ceea ce te va face să treci dincolo de simpla existenţă trecătoare, atunci când voinţa ta se pierde în grija unui Dumnezeu care adesea poartă o picătură de mirare după atâtea lacrimi astrale vărsate la contemplarea propriei lumi.

O undă de filiaţie cosmică străbate miturile lumii antice, în măsura în care culoarea temei s-a păstrat într-un loc uscat, într-un container închis ermetic, într-un spaţiu răcoros şi întunecat, aşa numitul abis al nostalgiei ce posedă în mod latent memoria unui timp fabulos care îşi trimite până în prezent undele pline de semnificaţii.

Profilul autentic al construcţiei picturale se contopeşte cu baza sensibilă a unei poveşti bizare, în combinaţie cu caracterul specific al reflectării artistice în cadrul formelor conştiinţei metafizice, mai degrabă decât acea faţetă empirică a profeţiilor străvechi în care se concentrează toate însuşirile imposibilului devenit posibil.

Leadership: Îţi poţi elabora o nouă reprezentare despre tine însuţi în jurul conceptului de "voiaj cosmic" care să funcționeze ca o multiplă oglindire a aceleiași teme?

Ulise a rezistat cântecului uimitor al Sirenelor ordonând echipajul său să-l lege de catargul navei, în timp ce corăbierii au fost vrăjiţi de sunetele lungi şi expresive ale unei muzici fascinante. El a vrut să înfrunte legenda şi nu le-a urmat chemarea, fiind singurul care s-a salvat din nimicitoarea tentaţie. Pictorul englez William Etty a pictat întreaga scenă "The Sirens and Ulysses" folosind o tehnică experimentală care, însă, a determinat-o să se deterioreze de îndată ce a fost terminată.

Refrenul unui cântec substanţial interpretat din perspectiva unui mit glorios nu este nicidecum lipsit de corespondență reală, el predomină într-o seducţie a culorilor care îşi epuizează prea devreme resursele de durată.

Singura motivaţie a vieţuirii trecutului, din partea unui muritor ce învinge nemurirea prin arta de a răscoli o realitate demult apusă, aşa cum cristalul reflectat în intensitatea emoţiilor învinge amărăciunea, conferind curajul de a o lua de la început, este o reducere la expresia unei semnificaţii astrale: Totul se reia sub o altă formă şi în altă octavă !

Numai un artist grandios poate să reproducă o realitate şi cadrul unui anumit eveniment în jurul conceptului de "voiaj cosmic" dinspre și înapoi spre sine. Mai întâi se convinge pe el însuşi de veridicitatea unei ipoteze a lumii apropiate de un anumit subiect, apoi o transpune într-o temă cu caracter de noutate prin includerea unei "asigurări de viaţă prelungite" în favoarea unui concurs al hazardului reflectat printr-un fenomen cosmogonic măiestrit

estetizat.

Leadership: Te consacri ideii reluării unui fapt ce poate fi acceptat ca fiind un prototip și o copie a interacţiunilor anterioare dintre mit şi adevăr?

O continuitate bizară pare să lege mişcările unei arte vizuale de mişcarea oscilatorie a unui pendul gravitaţional virtual, amintind de sunetul unui flaut îndepărtat, sau de producerea unei seducţii ce nu dispare prea uşor, înţepenind trupul şi sufletul, culoarea şi linia, lăsându-le să se estompeze.

Această continuitate pare să aibă ca bază sensibilă a construcţiei picturale însăşi preocuparea de a surprinde cromatic transparenţa unui cristal în care se găsesc atomii unei perpetuări a conţinutului latent dintr-un scenariu de viaţă scris de o mână invizibilă, repetându-se prin reflecţia unor unde cosmice de energie ca în aproape toate ficţiunile borgesiene.

Plasticitatea neîntrecută a unei proiecţii astrale se supune altor legi decât cele pe care le-a descoperit omenirea de-a lungul secolelor, fiindcă redă neîncetat ideea de reformulare a întâmplărilor în favoarea unui prezent de tipul "Oglindă" care devine în timp o legendă.

Scriitorul argentinian Jorge luis Borges se întreba cum ar putea fi enumerat, măcar în parte, un ansamblu infinit, fără ca mărturia lui scrisă să fie contaminată de falsitate? El spunea: *"În acea clipă necuprinsă am văzut milioane de lucruri plăcute sau înspăimântătoare. Nici unul nu m-a uimit mai tare decât faptul că toate ocupau acelaşi punct, fără a se suprapune şi fără a fi transparente. Ceea ce mi-au văzut ochii a fost simultan, pe când ceea ce o să transcriu e succesiv, fiindcă numai aşa îngăduie limbajul. O să încerc, totuşi, să surprind ceva."*

Trebuie să ştii să vezi din adâncimea amănuntului primar înainte de a susţine relevanţa punctului de vedere final, pentru a recepta o adevărată operă de artă care la un moment dat va exploda într-o singură modalitate de exprimare artistică, prin mirroring: "You and I Could feel as once".

Artistul şi trecutul lumii sunt ca două ascuţişuri de sabie pe care numai expresia unei viziuni subiective le face să se încreadă unul în celălalt.

Marele secret al efectului artistic vizează singurul amănunt care reconstruieşte o lume: oglindirea propriei personalităţi în pielea unui personaj mitologic, rememorând aventurile legendare şi încercând să ajungi un erou recunoscut de toţi ceilalţi membri ai unui univers real, spiritual şi generator de năzuinţe.

Plasticitatea neîntrecută a proiecţiei astrale este dată de cuvântul închis în deşertul secolelor, numit "mitologie", din care artistul își ia inspirația pentru ființele magice plămădite din acelaşi aluat cu el datorită inclinaţiei spre suprarealism şi a convingătoarei demonstraţii de continuitate a unei vieţi de legendă.

Player şi Gamer

On Aprilie 21, 2016

Demonstrează-ţi superioritatea, extinzându-ţi libertatea de a te manifesta într-un cadru al cărui conţinut se află la intersecția dintre creație, interpretare şi coordonare.

Am ştiut dintotdeauna ce voiam de la mine, cine sau ce mă aştepta într-o parte de lume fabuloasă. O lume desprinsă parcă din jocul *League of Legends* , reînviind acel plus de strălucire al unui decor de un realism impresionant, inspirat dintr-un aspect de viaţă ireală, chiar dacă uneori totul se întorcea împotriva mea.

În acest caz, atitudinea mea corespundea unui *player dropped into a battle arena* , fiind altcineva decât am fost iniţial, asumându-mi rolul unui "Summoner", nevăzut, care controlează un "campion" cu abilități unice de luptă împotriva unei echipe formată din alți jucători sau campioni. A scoate în evidenţă superioritea facultăţii de recunoaştere a unei realităţi mai vii, mai alerte, mai evoluate, pe care ceilalţi oameni cu greu ar fi dispuşi s-o accepte, înseamnă să te încrezi într-un om mai apropiat de univers care acceptă provocarea de a se ridica la înălţimea unei legende demne de un Creator de lumi paralele.

Hazardul poate fi admis drept cauză a apariţiei unei provocări din care se scade uitarea în urmă, uitarea înainte, rămânând doar vraja aparenţelor, acea beţie a primilor paşi într-o lume paralelă, somnambula fericire a unui carpe diem epic, pentru care nu există permisiune explicită, nici justificare, ci doar *acceptance of a challenge.*

Leadership: Experienţa pe care o atribui superiorităţii tale în a mânui partea revelatoare a hazardului deschide orizontul unei tematici mai largi despre interacțiunile dintre intelectualitate și putere?

Părea că sunt controlat de la distanţă de un computer performant. Practic, trebuia să execut comenzile bine stabilite ale unui utilizator născocitor care, utilizând propriile experienţe şi percepţii, încălca orice reguli şi orice limite. Cât timp oare puteam să urmez instrucţiunile acestui user-final? Cum oare să-i trezesc interesul, încât să-mi atribuie o altă axă de orientare în proiectul „game”?

Eu si Userul meu. Player şi Gamer. Împreună am format o conştiinţă, o prezenţă obsedantă, indispensabilă unei evoluţii care părea c-am mai trăit-o. Şi mi-ar plăcea ca cei care nu deţin răspunsurile, să admită asta. Interacţiunea dintre intelectualitate şi putere are ca suport de susţinere a actului de creaţie însăşi acea idee de viitor care poate conduce spre o cale de cunoaştere a realităţii favorizată de întâlnirea cu arta, cu visele, cu viitorul, cu imposibilul, cu o altă variantă a ta de a fi.

Nu ne-am întâlnit pentru a salva lumea din mrejele unui timp care îşi măreşte ritmul de scurgere în mod asimptotic spre o apropiată dată limită, spre acel *end of the world* prezis de atâtea spirite luminate, ci pentru a pătrunde, ca într-un vis, unul în spaţiul celuilalt. Până când, în tăcerea trezirii surprinzător de dulce, totul s-a dovedit o alternativă la viaţă.

Leadership: Ai început să culegi roadele ambiţiei nemărginite de a fi un fel de dublură a ta care te împinge tot mai departe spre un *"acceptance of a challenge"* ?

Orice om care vrea să-și dezvolte superioritatea imaginaţiei asupra realului, însuşindu-şi acea cantitate totală de informație dată de suma percepţiilor pe care le experimentează în mod

unic, intervine practic în jocul liber al unui erou aflat în concordanţă sau în opoziţie cu creatorul său.

Creaţia și interpretarea sunt două repere ale leadershipului, simetrice sentimentelor și pasiunii care însoțesc implicarea într-o relație, care fac din posesorul unei gândiri avansate, dintr-un revelator al unei evaluări despre această lume, un vestitor al unei forme noi de cunoaştere.

Acceptarea unei provocări se trage din faptul că realitatea pe care o percepi adevărată nu durează decât ca o limită pe care n-o poate întrece nimeni, una pe care n-o mai poţi răbda, nu o mai accepţi fără să asiguri capacitate suplimentară de a te imagina în altă postura, mai puţin obişnuită, cum ar fi cea de erou cu însuşiri profetice şi puteri supranaturale.

Leadership: Poţi aplica o regulă de tipul: *"am devenit parte dintr-o lume în care creatorul şi creatul se confundă"* în jurul unei viziuni extrasă din efectele unei ficţiuni setată să te facă să te simţi mai mult decât eşti?

A intra în posesia unui bun dobândit - cum ar fi o raţiune situată deasupra definiţiilor faptelor, ceva care capătă sens numai dacă poţi vedea altă versiune a realităţii prin accesarea unei surse de orientare străine, înseamnă a relaţiona cu un gamer care ordonează altfel lucrurile.

Gamer-ul este dublura ta. Este superioritatea ta. Tu eşti reprezentantul individualităţii sale într-un decor fabulos, scoţând în evidenţă acel plus de totalitate care lipsește lumii exterioare. El este aventurierul care în rătăcirile sale descoperă o altă faţă a lumii, găsindu-şi îndestularea în contactul cu ceea ce ești tu la un nivel mai subtil. El este prietenul lângă care ai vrea să stai, chiar dacă ştii că la un moment dat este posibil să dispară. Eşti pierzător sau învingător pe cât de mult este el dispus să te coordoneze în contextul acelui nivel maxim atins al unui joc plin de provocări.

Superioritatea, pe care leadershipul o acceptă ca pe o necesitate stringentă, vizează mai întâi acea trecere de la player la gamer, încălcând orice reguli şi orice limite ale alcătuirii individului, astfel încât el să-și dezvolte acea facultate, într-adevăr excepţională, de a se determina din relația cu elementele unei Existenţei Create.

Percepţia asupra spațiului în care te proiectezi, datorită nevoii de a te manifesta în raport cu alt plan al fiinţei, dominând toate dimensiunile unei realităţi intrinseci, se substituie unei iniţiative private de supraveghere și conducere.

Leadershipul presupune să ai întotdeauna în vedere faptul că altcineva este mai presus decât tine, strălucind prin ceea ce tu treci, dar mai ales prin ceea ce tu alegi să crezi că ți se întâmplă.

Doar astfel se poate obţine egalitate între creație și creatorul ei, între examinare și descoperire. În acest caz, putem concluziona că leadershipul este un act sinergic.

Player şi Gamer evidenţiază acea stabilitate a unui întreg, acea unicitate a experienţei de a-ți extinde libertatea de manifestare într-un cadru al cărui conţinut se află la intersecția dintre creație, interpretare şi coordonare.

Playtime

On Mai 01, 2016

Ai în vedere acceptul de a te uni cu ceva mai presus decât tine, care să-ți furnizeze prin acorduri fine motivația de a te pregăti pentru noi tendinţe de exprimare.

Simţeam că devenisem obiectul de observaţie al unei entităţi străine, aflate la mii de ani lumină depărtare, ce mă surprindea mereu cu ceva plăcut, ca într-un vis iluminator fără sfârşit, acţionând asupra atmosferei mele cerebrale, şoptindu-mi prin efectul combinat al vibrațiilor și al undelor magnetice obscure. Cumva, îmi asumam o taină pe care nimeni n-o ştia: *"Pentru că tu să devii nemuritor şi să capeţi puterea lui Dumnezeu, devenind egalul meu, trebuie să te laşi reglat cu o precizie absolută".*

Trebuia să învăţ să controlez ritmul acestei colaborări inedite, odată ce mă încredinţasem unei întoarceri spre dreapta, unei transformări de 90 de grade, chiar dacă curiozitatea amestecată cu teama, dacă inima accelerându-şi bătăile ca după o emoţie puternică, mă împingea asiduu să-mi pun întrebări încuietoare. Obstacolul de care mă loveam în acordul cu formele pure ale învăţării despre mine însumi, din rostirea neascunsului, era un fel de asemănare dintre repetarea şi acumularea unor determinări diferite, în măsura în care integrarea învăţării pe tot parcursul vieţii de adult era o parte a înţelegerii unei noi profunzimi ale folosofiei.

Rămăsesem cu ideea ciudată că sunt urmărit de acelaşi flux de cerinţe stricte cu privire la viitoarea mea slujire unei forme de răspuns înscrisă în sfera unui fantastic experimental, nuanţat cu elemente magice, totodată realist, printre sunetele vibrante ale unei iluzii cu happy - end în viaţa care precede moartea, alese de un regizor incognito în acord cu prezentul unui PlayTime.

Leadership: Modul în care îţi percepi limitele vizavi de profunzimea unei realităţi care se vrea un adevăr al fiinţei tale poate surprinde asemănarea dintre ceea ce te caracterizează esenţial şi ceea ce te depăşeşte (dar te umple de admiraţie) ?

O nouă putere se revărsa în mine, o senzaţie de eliberare şi o recunoştinţă nemărginită. Eram învăluit cu îndârjire de acea senzaţie de High, prins într-un joc captivant de umbre şi lumini, pe un ritm alegro, *faster than allegretto but slower than presto* , angajat într-un periplu muzical alert, fascinant, de o fluenţă extraordinară, care îndemna deopotrivă la meditaţie şi voie bună, la iniţiativă şi dinamism.

Din partea scriitorului Ion Moja am auzit un “Da” tare şi răspicat, primind cea mai adecvată sursă de inspirație, cel mai frumos dar și cea mai mare provocare. Dar cheia întregii situaţii, prin unicitatea ei, a găsit-o în cele din urmă ceasornicarul Hans Schultz, lucrând o lună întreagă fără pauză: ziua născocind sonerii cu aptitudini muzicale, iar noaptea punându-le la probă din oră în oră la căpătâiul prea blândei sale soţii, spre a trage concluziile ce se impuneau atât în privinţa acurateţei tonului, cât şi în cea a efectului produs asupra fiinţelor umane luate prin surprindere.

Luatul prin surprindere este rodul unei conştiinţe superioare, devenită între timp un fel de continuă schimbare de stări, pe ritmurile unor dulci acorduri melodioase, cu ajutorul adaosurilor de improvizaţie, cărora încerci să le găseşti o explicaţie plauzibilă. În această privinţă, filosofia oferă o cheie de înţelegere a modului în care îmi percepeam fiinţa: *"Ceea ce îl depăşeşte pe un om este însăşi esenţialitatea de care nu reuşeşte să scape, fiindcă esenţialitatea denotă capacitatea de a se exprima într-o gamă variate de mijloace, dar fără să dea de înţeles că este altcineva."*

Leadership: Poți să sporeşti şansele unui anumit tip de consecinţă a faptului de a fi altcineva, abordând dezvoltarea personală din perspectiva unei conştiinţe apreciată prin acordurile fine ale unei experiențe dinamice?

A fi altcineva înseamnă să te recunoşti drept creatorul unei realităţi care continuă să te tragă în direcţii diferite. O condiţie necesară traversării corecte a unei noi etape de dezvoltare, înainte de a deveni un om al permanentei redefiniri, este să treci pragul unui fenomen de tipul „acceptă să slujeşti unei forţe universale". Ea este busola propriei tale stări de spirit ce îţi arată în ce direcţie este punctul tău de lansare într-o mare aventură. Iar faptul de a te raporta la această aventură seamănă cu integrarea într-o melodie care te supune unor noi ritmuri de inspiraţie şi autodepăşire de sine, lăsându-te purtat pe acordurile fine ale unei experienţe dinamice numită: "comunicare universală".

Traiectoria ta în ecuația leadershipului se poate reprezenta în contact cu o conștiință superioară, care facilitează trecerea de la un drum foarte tranzitat la unul puțin umblat, dar mai evoluat. Este vorba de o adecvare a unei muzici la o idee poetică, frumusețea rostirii divine, ceva care te inspiră prin acordurile fine și prin efectele ascultării, raportat la un dincolo de tine însuți. Orice revelator de idei, orice om al creaţiei a descoperit că ascultarea este o artă în care există frumuseţe şi o mare înțelegere.

Maestro Eugen Doga spunea că: *"Muzica este o formă de comunicare universală. Primul lucru pe care l-a pus la dispoziție Dumnezeu a fost naiul prin care a vorbit cu lumea prin mijloace muzicale. Avantajul muzicii e că nu avem nevoie de traducere. În special azi când sunt atâtea mijloace tehnice, noi vorbim și se poate auzi chiar și în Cosmos. Muzica, acest suport spiritual care pătrunde direct în inima ascultătorului, este un avantaj foarte puternic al zilelor noastre."*

Leadershipul este precum muzica, o experienţă dinamică, pe care mai întâi trebuie să o slujeşti și apoi să-i descoperi farmecul ! Este o putere care, la randul ei te slujește și în care trebuie sa te recunoşti.

Poți să sporeşti şansele unui anumit tip de consecinţă asupra autenticităţii de a exprima ceea ce muzica îţi transmite, eliberându-ţi energiile creative, doar dacă îţi modelezi contribuţia la dezvoltarea personală din perspectiva unei conştiinţe superioare.

Conștiința superioară, despre care se consideră că nu poate fi atinsă ori cunoscută, transmite o anumită stare de spirit în scena numită lume, într-un cântec numit viaţă. Ea reprezintă acea voce a raţiunii care, evaluându-te constant, silită totuși să-ți consume o anumită libertate, îți maximizează șansele de a te descoperi sub imaginea unirii cu Marele Tot.

Una din necesităţile superioare ale omului este cea de apartenenţă la Marele Tot, alături de intuiție - ai încredere în ceea ce simți ! , prezentând o valoare prin faptul că permiți să fii corectat, îndrumat, reglat cu o precizie absolută,100% personalizat şi adaptat evoluţiei care cere dinamism și acțiune, meditaţie și voie bună.

Leadershipul are în vedere, mai întâi de toate, acceptul de a te uni cu ceva mai presus decât tine, în absenţa oricăror teorii, legi, superstiţii, care să-ți furnizeze prin acorduri fine un stimul obiectiv, acea motivație de a te pregăti pentru noi tendinţe de exprimare, printr-o altă abordare a muzicii și a actului de creaţie. Muzica este ceea ce te simţi în interior, ceea ce te creşte, te creează mai bun, atunci când te angajezi în traversarea unei noi experienţe de cunoaştere.

Bine spunea cineva: *„ muzica reprezintă o slujire a oamenilor, un mod prin care să-l cunoască mai bine pe Dumnezeu, deschizându-le sufletele prin armonii. "*

În filosofie, capacitatea de a te identifica cu altcineva are ca şi corespondent de bază confruntarea cea mai profundă a fiinţei umane cu întregul evoluţiei universului care ţine de modul în care te recunoşti o fiinţă superioară prin integrarea ta în versurile şi în acordurile unei muzici care te binedispune.

PlayTime este începutul unei descoperiri de sine dintr-o altă perspectivă, datorată regularităţii și ritmicităţii bătăilor unei pendule cosmice care descrie un traseu între două extremităţi, formând un echilibru. Capacitatea de a auzi Vocea lui Dumnezeu şi de a fugi înspre ea pe ritmurile unei muzici trăite numai de tine, prin conectarea lumii creaţiei cu lumea reală. Şi capacitatea de a reacţiona prin izolare şi îndepărtare de orice alte zgomote din jur.

*** Notă:** Yanni - Playtime

Pledoarie pentru un sfânt

On Ianuarie 11, 2012

Demonstrează-ţi superioritatea morală în acele situaţii limită în care nu îţi poţi pune în valoare calităţile emoţionale.

Aproape nimeni nu scăpase cu viaţă. Întregul sătuleţ fusese decimat. Nu existau cuvinte care să exprime oroarea şi revolta din sufletul celor opt membri ai echipei de comando condusă de Locotenentul Waters. Rebelii îi executaseră cu sânge rece pe aproape pe toţi localnicii.

Ellis 'Zee' Pettigrew, unul dintre membrii echipei, îi întâlni ochii femeii care tocmai fusese batjocorită şi mutilată. Aceasta dădu din cap încet, încercând să îngâne ceva, iar el simţi cum îi pătrunde în inimă acea senzaţie de teamă cumplită. Îi susţinu privirea femeii pentru câteva momente, dar apoi fu rândul lui să se uite în altă parte. Nu vroia să se confrunte cu acel amestec de durere pe care îl citise în ochii ei, pentru că ştia ce anume îi transmitea: moartea.

Era tulburat şi chiar puţin dezgustat de evidenta răceală şi indiferenţă a ucigaşul ei. Un alt membru al echipei îl imobilizase pe acest rebel care aproape o omorâse cu o brutalitate animalică.

- Nenorocitule ! Uite ce-ai făcut, nenorocitule ! apucându-l de gât cu amândouă mâinile, aplecându-i capul spre trupul femeii.

Mila, îndurarea, generozitatea - virtuţile specifice omului, nu-şi puteau împlini menirea în acea clipă. Simţindu-se năpădit de o ură cumplită - din motive care au devenit foarte clare, Zee îşi scoase cuţitul de vânătoare de la brâu. Nu trebuia să înţeleagă, ci doar să acţioneze. Falca i se încleştă în jurul unei hotărâri impenetrabile. Furia împotriva acestui ucigaş, a acestui “animal”, nu putea fi înăbuşită prin nimic. Implantă adânc cuţitul în abdomenul acestuia, învârtindu-l rar, deplasându-l circular în jos, apoi în sus, pentru ca vârful să-i perforeze stomacul şi intestinele.

Leadership: Te loveşti de tendinţa de a renunţa la sentimentele pozitive într-o conjunctură de tipul "scopul scuză mijloacele" ce durează pe o perioadă nedeterminată?

Un gest “generos”: uciderea fără milă a unui criminal, a unui personaj malefic. Însă acest gest, o înfrânare conştientă şi deliberată a dorinţei de răzbunare pe care o simţea Zee, a produs în sufletul lui o transformare. Acest gest nemilos i-a zbuciumat întregul for interior Pentru o clipă a pierdut tot ce avea mai măreţ, generos, umanitar în el. Şi-a pierdut forţa de a fi om, prin îndepărtarea de la credinţă, prin nerespectarea legii supreme: să nu ucizi.

O bucată din el - acea bucată care îi susţinea tăria morală, care îi umplea sufletul de viaţă, care păstra integră propria lui natură emoţională - a murit odată cu cel pe care l-a ucis.

Sentimentele pozitive sunt o întoarcere la începuturile dezvoltării tale etice, deoarece devii din nou flexibil în gândire şi simţire, preocupat cu luare aminte de atingerea năprasnicei arme numită "lecţie de viaţă" a cărei tărie o cunoscuse-ţi puţin mai înainte, pregătindu-te în acelaşi timp să urmezi lupta împotriva setei de glorie.

Dacă la un moment dat te confrunţi cu o imagine negativă, complet diferită de ce te-ai aşteptat să vezi, atunci să ştii că modul în care îţi întrebuinţezi însuşirile predominante

(compasiunea, iertarea, gradul de autocontrol sau simţul dreptăţii) reflectă darul spiritual cu care ai fost înzestrat: sensibilitate şi empatie.

Ca lider, aplici întotdeauna legea sau îţi creezi propria lege?

Fiecare om are o datorie morală care îi influenţează existenţa şi orizonturile. Nu te poţi spăla pe mâini ca Pilat de sângele celor ucişi, iar crima să rămână nepedepsită. Rămâne o urmă în inima ta, o reminiscenţă a trecutului, rămâi cu conştiinţa încărcată de fapte condamnabile, împiedicându-te să avansezi moral spre ceea ce este bine.

Dar cine l-a judecat pe vinovat? Cine l-a condamnat la moarte? S-au ascultat depoziţiile martorilor? Cine erau juraţii? Au fost cu toţii de acord în privinţa verdictului final? Şi, în sfârşit, unde erau judecătorii care trebuiau să asigure uniformitatea interpretării şi aplicării unitare a legii prin prisma normelor drepturilor omului?

Ellis 'Zee' Pettigrew, din filmul " *Tears of the sun (2003)* ", a fost singurul judecător, singurul jurat, el a creat legea, a reprezentat-o şi tot el a aplicat-o. Legea răzbunării morale.

Iar pedepsirea criminalilor este într-o anumită măsură morală – dar asta nu te transformă într-un sfânt.

Leadership: Alegi vinovăția de a nu face ce trebuie atunci când "trebuie" te poate urmări toată viaţa, în încercarea de a te pune contra curentului?

N-ai cum să străluceşti de glorie, n-ai cum să-ţi ridici leadershipul pe înalte piedestaluri când remuşcările produc în tine o furtună serioasă. Deoarece rămâi sclavul unor principii înguste care nu au nimic în comun cu umanitatea şi moralitatea. Trebuie să te eliberezi de orice fel de vină atunci când apare primul nor care îţi întunecă conştiinţa. Sau să găseşti un motiv bun care să-ţi susţină puterea şi valoarea morală. Trebuie să lupţi împotriva propriei decăderi morale cu toate mijloacele.

Convingerile şi sentimentele pozitive sunt necesare acolo unde mulţi uită de ele, sau unde pur şi simplu le ignoră. În asemenea caz ei se împotmolesc fără soluţie în actul de judecată, depreciindu-şi conştiinţa care le defineşte identitatea.

Dar în timpuri imorale, probabilitatea ca judecata ta să rămână fixată cum se cuvine de acele convingeri care îţi susţin esenţa vieţii se va îndrepta tot mai mult spre zero.

În leadership trebuie să fii tare şi să învingi propria ta "moarte". Vei fi luat prin surprindere, vei fi pe cale să clachezi atunci când te aştepţi mai puţin . Căci uneori te vei lovi de tendinţa de a renunţa la toate emoţiile tale pozitive, pentru a le înlocui cu altele negative. Ceea ce va conduce la o anulare a personalităţii tale, lipsindu-te de tot ceea ce este vital: dragostea şi credinţa faţă de aproapele tău, faţă de Dumnezeu, faţă de natura ta proprie.

Înainte de a-ţi dezaproba propria conduită morală (care constă dintr-un amestec complex şi bine determinat între judecată şi convingeri) trebuie să depui efortul de a fi cât obiectiv cu putinţă în evaluarea propriei evoluţii morale.

Răzbunarea care te mântuieşte este o formă de dominare a acelei suferinţe care te îndeamnă să întreci măsura conştiinţei.

Pledoarie pentru un sfânt desemnează acel efort neîncetat de a evidenţia calităţile tale emoţionale în momentele dificile - atunci când te abaţi de la orice fel de principiu etic sau moral, atunci când te decuplezi de la orice conexiune afectivă cu lumea din jur.

Toate faptele tale vor fi expuse în faţa instanţei judecătoreşti – conştiinţa. Ca să fii declarat "nevinovat", şi ca să îţi vindeci inima de orice remuşcări şi regrete, va fi necesar să demonstrezi superioritatea conştiinţei tale în acele situaţii limită în care nu ţi-ai putut pune în valoare calităţile emoţionale.

Concluzie: Desigur, nimeni nu este un sfânt. Nimeni nu este o fiinţă impecabilă din punct de vedere etic sau moral. Dar trebuie să te supui unui proces permanent de autoeducare a voinţei pentru a nu acţiona arbitrar sau sub impulsurile de moment. Iar în orice situaţie, oricât de mult eşti impresionat de fapte reprobabile, trebuie să dovedeşti probitate morală.

Nu uita niciodată că nu eşti sfânt şi nu vei fi, şi nu-ţi închipui vreodată că eşti perfect, căci Dumnezeu nu a creat duplicate.

Poarta celor două tărâmuri

On Iulie 05, 2011

Sporeşte-ţi valoarea de lider, urmărind permanent existenţa unei concordanţe între intenţiile tale şi aşteptările oamenilor.

5 noiembrie 2008. Oraşul Chicago. Barack Obama s-a adresat mulţimii după ce a devenit primul preşedinte afro-american din istoria Statelor Unite. Toţi îl priveau cu o încredere ce nu lăsa loc de nicio îndoială.

Felul în care domnia sa şi-a început discursul reflectă acea disponibilitate de a le comunica oamenilor intenţiile sale serioase cu privire la schimbările esenţiale ce vor fi adoptate în America. Dar, mai mult decât atât, reflectă acea scânteie de putere pe care o caută în general oamenii, acea doză de siguranţă generatoare de speranţă, izvorâtă din adâncul propriei fiinţei, acea forţă morală extraordinară care nu poate decât să aducă consideraţie din partea tuturor.

„ Buna seara Chicago. Dacă se mai îndoieşte cineva că America este un loc unde totul este posibil, care se întreabă dacă visul părinţilor noştri fondatori este încă viu, care se mai îndoieşte de puterea democraţiei noastre, răspunsul îi este dat în această seară."

Leadership: Poţi să-ţi exerciţi autoritatea ca etalon al manifestării, cu discreţie, a unei puteri incomensurabile, ţinând cont de dimensiunea unui spaţiu cunoscut care nu este proprietate personală?

Prin faptul că înaintezi tot mai mult spre o atitudine mai responsabilă, aducând dovezi pentru ipotezele unei gândiri avansate - a viitorului, deschizi calea spre o pregnantă diferenţiere într-un cadru de manifestare, directă şi nemijlocită, a întregului fiinţei tale.

Liderul creează un cadru deschis de dialog şi interacţiune cu toţi ceilalţi. Un fel de implicare mai aprofundată a raţiunii de a fi, aparţinând autorităţii Eului situat pe o treaptă superioară în scara consideraţiei morale, servind drept etalon al multor validări privind capacitatea de a emite o decizie hotărâtoare şi facilitând împărtăşirea exactă a ideilor şi sentimentelor ca tribut pentru o evoluţie reuşită.

Dimensiunea unui spaţiu cunoscut care nu este proprietate personală ţine mai mult de calitatea de a te face remarcat fără să-ţi creezi un profil intelectual şi emoţional care să creeze dependenţă. Imaginează-ţi că ai introdus un fir de aţă în gaura unui ac, firul trebuie să se mişte alternativ dintr-o parte în alta ca un pendul. Dar între imagine şi setea de dependenţă de trebuie existe întotdeauna o forţă de echilibru care are acelaşi punct de aplicaţie şi aceeaşi direcţie.

Leadership: Reuşeşti să aduci o anumită căldură rolului tău fără să cazi în patima unei raţiuni interzise care pretinde să fie suficientă sieşi, dar îşi neagă puterea transcendentă de care se leagă ideea de adevăr şi de necondiţionat?

O căldură care are o înrâurire profundă şi directă asupra sentimentelor şi năzuinţelor celorlalţi, o căldură care alungă temerile şi mângâie înţelegător orice auditoriu, nu este o binecuvântare pentru că introduce conştiinţa demnităţii proprii şi a infailibilităţii calităţii umane. Pentru că dezvoltă aceste două elemente identitare într-atât încât oamenii ajung să se cufunde într-un univers de gânduri şi emoţii pe care nu le-au trăit niciodată, de idei şi

perspective pe care nu le-au mai întâlnit nicăieri. Dar care sunt izvorul unei varietăţi infinite de manifestări.

Asigurarea unei bune vizibilităţi şi obţinerea unui bun nivel de conştientizare a valorii personale, informând publicul cu privire la rigorile şi avantajele statutului pe care ţi-l oferă poziţia, este posibilă prin cuantificarea şi dimensionarea acestei "călduri degajate".

Dar, atenţie ! Percepţiile generatoare de presupuneri şubrede, plecate de la concepţie greşite, funcţionează haotic într-un micro-univers în care nu există niciun fel de bariere, ci doar redundante de comunicare. Senzaţia de "căldură excesivă", tinde să obosească la un moment dat. Influenţa a ceea ce transmiţi are o valoare de referinţă asupra procesului de formare a personalităţii celorlalţi care corespunde stărilor resimţite, chiar dacă prin ceea ce exprimi forţezi intrarea într-o anumită logică a dăruirii de sine, manipulatorie. Asta înseamnă să-ţi exerciţi autoritatea ca etalon al manifestării, cu discreţie, a unei puteri incomensurabile.

Leadership: Puterea ta de influenţă rezidă din felul în care îţi etalezi calităţile chiar şi atunci când ele nu dobândesc configuraţia şi funcţionalitatea unei idealităţi generatoare de valori în contextul desfăşurării unui destin de excepţie?

Felul în care îţi etalezi calităţile şi îţi promovezi personalitatea nu e un scut care te protejează împotriva neîncrederii celorlalţi, ci e o sabie ce sugerează forţa atacului. Nu poţi să te ridici la înălţimea aşteptărilor celorlalţi dacă nu-ţi precizezi serios intenţiile de la prima apariţie, dacă nu-ţi marchezi inteligent puterea de influenţă, dacă nu stârneşti o adevărată avalanşă de stimuli emoţionali care să-i scoată pe oameni din rutină şi care să le redea speranţa şi elanul creator.

Ca să pătrunzi în sufletul oamenilor, ca să le schimbi percepţiile şi să-i cuplezi la convingerile tale, trebuie să fii animat de o energie interioară debordantă, de acea încredere intrinsecă (nu de suprafaţă !) ce denotă ambiţia şi dorinţa ta de a reuşi, cu orice preţ. Şi, în funcţie de ideea pe care doreşti să o exprimi, să asiguri leadershipului tău o puternică capacitate de impresionare, de emoţionare şi de convingere. O chestiune particulară legată de testarea propriilor limite, o formă de exprimare a acelor părţi ale Eu-lui tău considerate acceptabile de cei pe care intenţionezi să-i schimbi.

Unicul set de calităţi care nu dobândeşte configuraţia şi funcţionalitatea unei idealităţi generatoare de valori în contextul desfăşurării unui destin de excepţie sunt date de ceea ce ţi se întâmplă atunci când nu primeşti nicio reacţie din partea celor din jur: orgoliul, aroganţa sau auto-suficienţa. Calităţi precum onoarea sau reputaţia cer întotdeauna garanţii.

Aşa cum un pictor reuşeşte să confere lucrării sale un aspect viu şi strălucitor printr-o bună organizare a planurilor şi printr-o combinaţie perfectă dintre lumină şi culoare – tot aşa şi tu, ca să direcţionezi convingerile, gândurile şi emoţiile oamenilor în direcţia dorită de tine, trebuie să-ţi pui în evidenţă valoarea printr-o combinaţie perfectă de calităţi şi virtuţi. Şi trebuie să-ţi reglezi în aşa fel energiile încât să exerciţi asupra oamenilor un efect cu adevărat tonic.

J.K. Rowling spunea că *„Destinul este un nume dat des în retrospectivă la alegerile care au avut consecinţe dramatice.”*

Străduie-te să creezi acel sentiment vibrant prin care să te legi de oameni, prin care să produci o fuziune între intenţiile tale şi aşteptările lor. Caută să transmiţi un simţământ puternic şi să convingi. Caută să plantezi în mintea şi în sufletul lor acea sământă de încredere care să le dea avânt, care să le dubleze entuziasmul, care să le permită să-şi exprime, să păstreze şi să dezvolte recunoştinţa pentru tine.

Un destin de excepţie este un labirint în care numai tu ştii drumul spre ieşire, iar oamenii odată intraţi în acest labirint trebuie să se piardă frumos, să simtă ceva neobişnuit care să-i facă să se simtă puternici.

Poarta celor două tărâmuri se găseşte la frontiera dintre tine şi ceilalţi oameni, ea poate face legătura dintre performanţele tale şi rezultatele pe care le obţii (pe măsura propriei tale valori) – şi aşteptările, speranţele şi idealurile lor.

Dacă treci de ea înseamnă că ai fost capabil să depăşeşti toate barierele de comunicare şi de relaţionare care restricţionează accesul la dorinţele si credinţele lor, înseamnă că ai fost capabil să-ţi conduci leadershipul pe calea pe care o aşteaptă ei, înseamnă că ai reuşit să realizezi acea concordanţă între intenţiile tale şi aşteptările lor.

Concluzie: Datoria ta este să găseşti modalitatea optimă de a depăşi frontiera ce te separă de ceilalţi oameni. A deschide „ *poartа dintre cele două tărâmuri* " realizând o concordanţă între intenţiile tale şi aspiraţiile lor este cel mai mare beneficiu de care te poţi bucura, fiindcă denotă faptul că ţi-ai sporit valoarea de lider.

Cum direcţionezi convingerile, gândurile şi emoţiile oamenilor în direcţia dorită de tine? Reuşeşti să-ţi pui în evidenţă valoarea printr-o combinaţie perfectă de calităţi şi virtuţi? Iţi reglezi în aşa fel energiile încât să exerciţi asupra celorlalţi un efect cu adevărat tonic?

Sporeşte-ţi valoarea de lider urmărind permanent existenţa unei concordanţe între intenţiile tale şi aşteptările oamenilor.

Poarta Marii Enigme (II)

On Aprilie 15, 2013

Fundamentează-ţi ştiinţa în concordanţă cu evoluţia ta, astfel încât individualitatea ta ca întreg să se manifeste în orice moment.

Totul orbita în jurul unei iluzii aparte, senzaţionale. Magicianul se trezea zi de zi, mobilizat de combustibilul ideativ pe care i-l oferea mintea şi pregătirea lui, o legătură intimă stabilindu-se între felul lui de a gândi şi a fi. Un flux puternic de imagini în mişcare, un flux de gânduri care trec dintr-unul într-altul, pătrundea până în străfundul fiinţei lui, transformat şi împins către exterior, concretizându-se într-un val de inspiraţie ce se cerea valorificat la modul optim.

Magicianul îşi îndrepta virtuţile unicat ale ştiinţei sale spre fundamentul operei căreia i se consacrase, adevărata magie, apropierea de punctul fix, care stabilea regulile observaţiei şi interpretării noii sale compoziţii. Trebuia sa-si joace ultima carte în încercarea de a crea o mare enigmă.

O legătură covalentă, formată din perechi de electroni, gravitau în jurul a două nuclee: " *de ce?* " şi " *cum?* ", stabilind o singură configuraţie moleculară: " *când?* ". Continuând acest raţionament magicianul putea găsi sursa unei noi iluzii, printr-o nouă interpretare a realităţii ce guverna relaţiile dintre particular, absolut şi universal. Un progres fundamental către controlul complet al marii sale opere, printr-un soi de efort de cercetare la care contribuiau fiecare dintre metodele anterioare de magie, luate în mod izolat.

Leadership: Cum te priveşti din perspectiva unei creaţii care nu încetează să uimească prin luciditatea personajului central, încât să pui în prim planul atenţiei motivul preferinţei pentru o practică cu caracter manipulativ?

Şi numai această iluzie, singulară şi oportună, putea introduce un nou standard în arta lui interpretativă. Care-i permitea ca gândind, lucrând totodată şi cu sufletul, respectând principiile magiei, să creeze noi reguli adaptate realităţilor momentului, oferind publicului maximum de performanţă posibilă.

Iluzia, misterul insondabil care stătea la baza spectacolului, făcea parte din acea categorie fundamentală: *dispari - apari în altă parte* . Uşor de realizat prin plasarea oglinzilor, folosirea lumii, distragerea atenţiei şi "sfidarea legilor naturii". Dar combinarea efectelor, care produceau la rândul lor alte cauze şi efecte, într-o adevărată înlănţuire, constau într-o perturbare temporară în schema normală de funcţionare a magiei.

Magicianul ajunsese la cea de-a doua poartă, mult mai greu de trecut decât prima. Iar în această poartă stătea înfiptă o cheie minusculă, ruginită, care când se vedea, când dispărea. Între apariţie şi dispariţie se scurgeau câteva secunde. Aceasta era cheia misterului care învăluia relaţia dintre iluzie şi realitatea percepută de public.

Leadership: Poţi să-ţi pui întreaga nădejde în împingerea uriaşului mecanism de gândire pe "drumuri retrase în ceaţă", încât să faciliezi o conexiune cu persoana ta la un alt nivel de realitate?

Unde se găseşte indiciul cheie care te poate ajuta să ieşi din zona brăzdată de incertitudini şi temeri privind evoluţia ta? Evoluţia ta orbitează în jurul unei noi iluzii, senzaţionale? O

legătură ritmică se stabileşte între felul tău de a gândi şi a fi? Efectele operei tale produc la rândul lor alte cauze şi efecte? Poţi deschide cea de-a doua poartă?

Schimbările pe care le efectuezi asupra operei tale, spre îmbunătăţirea şi optimizarea ei, cunosc o extraordinară dezvoltare în special atunci când păşeşti pe covorul roşu al terenului tău de antrenament. Abia în acest moment îţi demonstrezi priceperea şi capacitatea cognitivă superioară, prin faptul că îţi dai seama că *"more îs more"* , punându-ţi întreaga nădejde în împingerea uriaşului mecanism de gândire pe drumuri noi.

Acesta este motorul noului tău fel de a fi, care îţi permite să treci cu uşurinţă de la nivelul " *junior* " la " *senior* ". Toate căile cunoașterii pleacă de la acest nivel. Trecerea de la minim la maxim fiind limitată doar de ruta pe care operezi, se realizează în funcţie de capacitatea ta de a crea noi reguli adaptate realităţilor momentului, care să-ţi permită să afli ceea ce ai nevoie pentru a "străluci" în activitatea ta.

Un alt nivel de realitate este o aventură de regăsire a magiei sub forma unei poveşti cuceritoare, care te învaţă să vezi lucrurile din perspectiva mijloacelor de epatare a unei clase de mijloc relativ înalt instruite. Leadershipul, în acest caz, se caracterizează prin producţia de elemente stimulative, declanşatoare de noi demersuri de dezvoltare, atât la nivel personal cât şi profesional, decorate în spiritul desăvârşirii cu cele mai fine compoziţii şi inovaţii.

Folosind la mare eficienţă combustibilul ideativ pe care ţi-l oferă mintea şi pregătirea ta, printr-un soi de efort cercetare, vei putea să-ţi mobilizezi potenţialul, să-ţi depăşeşti blocajele şi să descoperi noi standarde în arta de a-ţi exprima individualitatea.

Leadership: Susţii o zonă în care perfecţionarea continuă devine un scop principal pentru personalitatea unui artist care căutându-se pe sine, se descoperă mereu altul, în operele sale?

Legătura ritmică care se stabileşte între felul tău de a gândi şi a fi, pe parcursul trecerii spre nivelul superior de măiestrie, stabileşte modul în care personalitatea, talentul şi iscusinţa îţi pot favoriza interesul pentru dobândirea ştiinţei de a te descoperi pe tine însuţi, deloc neglijabilă în contextul acestui stadiu. Dar şi pentru acumularea de cunoştinţe privind aspectele fundamentale ale unui cadru de referinţă viitor, în care nu există chei invizibile.

Susţii zona în care perfecţionarea continuă să devină un scop principal, sau aştepţi să descoperi cheia care să descuie poarta spre înţelegerea propriei tale valori? Şi care sunt valorile unui magician, altele decât: curajul, autenticitatea, excelenţa, responsabilitatea, profesionalismul, agilitatea, diversitatea, libertatea de exprimare, toate acestea abordate într-o manieră interactivă.

Aşa cum un dirijor acordă atenţie fiecărui instrument din orchestră, tu trebuie să distingi orice element de instabilitate care să poată induce o altă percepţie asupra gestionării calităţii procesului tău de funcţionare. Un artist care se descoperă mereu altul în operele sale este un mediator al puterii nelimitate, el se situează pe linia ce desparte două lumi : lumea reală şi lumea tuturor posibilităţilor.

Câştigul de imagine care face cinste magiei este un triumf de momente artistice de excelență, al omului pregătit să cerceteze, să cunoască şi să stăpânească secretele mereu insondabile ale lumii în care fantasticul n-a devenit niciodată grotesc, tragic, sumbru.

Poarta Marii Enigme desemnează, în acest context, finalizarea unei investigaţii, a unui studiu

minuţios asupra sistemului tău funcţional. Un punct de plecare pentru o cercetare mai amplă a ştiinţei tale, menită să-ţi întărească individualitatea. Nevoia de a-ţi exprima potenţialul la adevărata lui valoare pe parcursul desăvârşirii.

Desăvârşirea în leadership, ca şi în orice alt domeniu, începe cu zona unde se găseşte prima poartă şi se termină cu zona unde se găseşte cea de a doua poartă. Distanţa dintre porţi corespunde unei zone libere pe care trebuie să ţi-o rezervi pentru dezvoltarea ta, unui spaţiu de inspiraţie şi creativitate care se reinventează constant. Ce poate conduce, valorificat în mod optim, la definirea sau redefinirea stilului propriu.

Fundamentează-ţi ştiinţa în concordanţă cu evoluţia ta, astfel încât individualitatea ta ca întreg să se manifeste în orice moment.

Source: https://neculaifantanaru.com/poarta-marii-enigme-II.html

Poarta Marii Enigme (I)

On Aprilie 14, 2013

Stabileşte o legătură puternică între felul tău de a gândi şi a fi, astfel încât să rezonezi mai bine cu tine însuţi până la obţinerea unei identităţi complete.

Pornisem spre Poarta Marii Enigme, locul izolat de lume, sălbatic şi virgin, scăldat de multe umbre de îndoială. Dar fără niciun plan, neavând la dispoziţie niciun indiciu concret care să ducă la identificarea precisă a acestei zone nedefinite pe nicio hartă.

Auzisem, din surse demne de luat în seamă, de acest controversat *espace temporairement* , mai degrabă un punct al separării de lumea tumultoasă, în care uneori rămâi fără repere, când simţi că nu mai rezonezi cu tine însuţi. Se înţelege de la sine că treceam printr-un moment de confuzie, încercând să-mi dau seama cum îl pot depăşi. Simţeam că locul meu nu este nicăieri. Experimentam vacuitatea, nimicul.

Poarta Marii Enigme se găsea la intersecţia între ceea ce este cu putinţă şi ceea ce nu este, între ceea ce se ascunde şi ceea ce se dezvăluie, prima parte a unui joc bine elaborat, cu numeroase necunoscute. Odată ajuns în faţa ei nu mai exista cale de întoarcere, erai doar tu şi cu tine. Concurai cu tine însuţi.

Mă identificam cu acel dublu-personaj al lui Michael Ende ce se găsea la răscruce de drumuri. Pe de o parte încărcat de nostalgia unui timp pe veci pierdut, pe de altă parte cuprins de fericirea, de imensa putere a speranţei, de tainica măreţie a credinţei.

Leadership: Eşti în stare să experimentezi aplicarea a două efecte de imagine simultan la același personaj care trece printr-un moment de îndoială faţă de ceea ce cunoaşte despre sine însuşi într-o poveste intitulată "No way out" ?

Trăiam mai mult singur în mintea mea. Fără a avea măcar vreo garanţie că interpretam corect ceea ce-mi dezvăluiau gândurile de nestăvilit, ce transmiteau sistemului meu nervos central impulsuri contradictorii simultane. Mult noroc, îndrăzneţule !

Dar orice interpretări erau greu de admis în mozaicul acestei etape alambicate a vieţii mele. Căci o stea care străluceşte seară de seară pe cerul senin al fanteziei, riscă să se stingă îndată, explodând, lăsând în urma ei un imens gol. Două efecte de imagine puteau fi aplicate la personajul în care, este evident, mă regăseam cu totul: reflexia unei lumi îndepărtate şi reflexia unei absențe care doare. Acestea creau iluzia unei false aşteptări paradisiace, nimic altceva decât „raiul trist".

Un fior trist, temător, străbătându-mi toate fibrele cu o intensitate care evoluează de la moderat la sever, neutraliza toate acele elementele din care eram constituit, care mă determinau să fiu sigur pe mine. Când curentul străbate soluţia unui compus chimic, poate determina descompunerea sa.

Să presupunem că aş fi izbutit să ajung la Poarta Marii Enigme şi să trec de ea. Atunci va apărea cea de a doua poartă.

Leadership: Cum interpretezi ceea ce-ţi dezvăluie gândurile în planul unei reconstituiri a unui experiment cu caracter subiectiv, în care OMUL NOU încearcă să-și găsească

identitatea chestionându-și convingerile faţă de sine însuşi?

Bine spunea cineva pe o pagină de internet: *"A învăța să te cunoști pe tine însuți, să fii capabil să-ţi chestionezi pozițiile de viață, valorile, viziunile, să rămâi cu mintea deschisă față de provocări care îți întorc universul cognitiv spre alte dimensiuni, este fascinant."*

Vom încerca de această dată să apropiem leadershipul de alte ştiinţe precum filozofia, psihologia şi sociologia, care permit cunoaşterea Omului, cu întreg ansamblul lui de calităţi şi raporturi necesare evoluţiei sale în timp, dar fără să-l condimentăm cu prea multă "sare şi piper".

Aşadar, nuanţând gradat adevăratele lanţuri care ţine Omul prizonier în diverse momente, ne propunem de această dată să reliefăm, prin leadership, adevărata lui identitate în raport cu propria lui interpretare şi disponibilitate de a se identifica cu fiinţa sa interioară. Sau mai simplu spus, cu propria lui slujire. Cum altfel decât prin urmărirea trendurilor pe care el însuşi le adoptă în momentele în care este condiţionat să redescopere, să aleagă, să strângă acele mici pepite extrase din mina personală, folosindu-le pentru a-şi activa motorul motivaţional.

Cunoscutul expert în instruirea personalului din vânzări, John Fuhrman, exprima foarte bine acest trend pe care Omul îl adoptă în drumul spre autocunoaştere. El spunea: " *Atunci când suntem entuziaşti, dorim să înaintăm încontinuu pentru a ajunge mai curând la destinaţie. Dacă avem o frică predominantă de necunoscut, deseori căutăm modalităţi de a evita situaţia. Dar indiferent de context, emoţiile noastre cele mai puternice sunt cele care ne ghidează paşii spre direcţia în care, până la urmă, ne vom îndrepta.* "

Ei bine, aşa se naşte leadershipul, încetul cu încetul, prin acceptarea matură a necunoscutului în drumul spre destinaţia cea mai nesigură: tu însuţi. Să fii tot ceea ce poţi să fii, indiferent de contextul în care te afli şi în care se produce schimbarea, urmându-ţi emoţiile cele mai puternice. Chiar dacă nu ai nicio garanţie că interpretezi corect ceea ce-ţi dezvăluie gândurile, la răscruce de drumuri, când te simţi rămas fără repere, ghidează-te după imensa putere a speranţei, de tainica măreţie a credinţei.

Neavând la dispoziţie niciun indiciu concret care să ducă la identificarea precisă a destinaţiei, vei fi condiţionat să te accepţi pe tine însuţi, vei descoperi cine eşti cu adevărat, şi să te respecţi cu tot ceea ce însumezi - înainte de a te dedica în întregime conducerii celorlalţi oameni. Mobilitatea ta spirituală, eliberată de orice dogmatism care încătuşează şi este ostil evoluţiei eficiente, se va exercita cu mare putere asupra leadershipului.

Leadership: Ceea ce diferenţiază povestea ta de alte mărturisiri cu privire la imaginea unei noi lumi, este recunoştinţa faţă de un Alter Ego mai puternic decât personalitatea ta?

În ceea ce mă priveşte, cred că experimentam o lume în care lucrurile, fiinţele, dorinţele, sensurile şi cuvintele se asociază altfel între ele decât în mod obişnuit. Cumva, păream să experimentez trăirile unui alter-ego care înregistrează doruri, destăinuiri, vise, cuvinte, disperări majore, dezvăluind faţete diferite ale realităţii, deci un alter ego care mă analiza în situațiile ce-mi periclitau armonia sufletească - fapt ce reprezenta o necesitate pentru condiţia mea de scriitor.

Tu treci printr-un moment greu de înţeles? Simţi ca locul tău nu este nicăieri? Experimentezi vacuitatea, nimicul? Interpretezi corect ceea ce-ţi dezvăluie gândurile?

Adevărata sursă a "tensiunii" care te poate scoate din pragul derutei, în momentul când te simţi izolat, debusolat, fără repere, când simţi că nu mai rezonezi cu tine însuţi, este

aprofundarea funcţional-structurală sau de tip intrare-stare-ieşire.

Adică, să cercetezi profund cauza şi efectul propriilor tale vulnerabilităţi, declanşate de limitările interioare - când nu izbuteşti să treci de prejudecăţile pe care le experimentezi, nu le înţelegi şi nu le poţi atribui anumite semnificaţii. Tot ceea ce asimilezi în aceste momente tensionate te transpune într-o anumită stare de insatisfacţie, urmând ca apoi aceasta să se volatilizeze odată cu începerea maturizării, a cunoaşterii de sine.

Ca să "înduri" leadershipul trebuie să ţii cont de exploatarea acelei vulnerabilităţi declanşate de limitările interioare, prin care ceea ce te fascinează te poate trage în jos, sau prin care ceea ce te prezintă lumii ca un personaj de poveste se poate transforma într-un roman de sine stătător.

Poarta Marii Enigme desemnează tranziţia ta spre trăinicie şi durabilitate, care nu ar fi putut să aibă loc niciodată dacă nu ai fi trecut prin procesul maturizării. Este etapa de înţelegere a realităţii pe care o trăieşti, nu marginal ca un spectator, ci ca un participant activ, puternic implicat, al Omului din tine în procesul de dezvoltare şi perfecţionare - care duce la obţinerea unei identităţi complete.

Stabileşte o legătură puternică între felul tău de a gândi şi a fi, astfel încât să rezonezi mai bine cu tine însuţi până la obţinerea unei identităţi complete.

Poate clipa să devină eternitate prin forța unui gest spontan?

On Octombrie 31, 2024

Învață să încarci fiecare gest artistic cu puterea autentică a emoțiilor tale, lăsându-ți amprenta asupra fiecărui privitor sensibil la mesajul tău.

Trecând printr-o zonă mai puțin circulată din cartierul Galata, privirea îmi este atrasă de o inscripție făcută cu marker negru pe una din extremitățile podului: "Podul Dragostei: Petronel și Evelina". Părea un fel de manifest al tinereții, un prim pas în crearea unui spațiu simbolic, unde "sufletul neîmblânzit" se revarsă în cerneală neagră pe betonul rece. Cu cât privesc mai mult această mărturie spontană, cu atât mai limpede recunosc setea de nemurire ascunsă în gestul aparent rebel. Și încă acum simt un fel de melancolie difuză, inerentă unui gând nesigur, cu sprijinul ideii că "trecătorul este și el un martor tăcut".

Simplistă, emoționantă, privind-o cu luare aminte, inscripția mă trimite spre un univers adolescentin, unde sentimentele sunt intense și nefiltrate. Astfel, îmi pot imagina un adolescent visător, ștrengar, *robado por el ardor de un sentimiento imparable, încercând să încrusteze în memoria lumii o chemare spre recunoaștere eternă, un "Teaqui Oslentohutba", dincolo de* orice limitare impusă de realitate. Numaidecât. În fiecare literă trasată pe pod pulsează dorința ancestrală de a lăsa o urmă, de a transforma efemerul într-un monument al clipei perfecte. Se simte o chemare către eternitate, nu-i așa?

Când privești de mai aproape inscripția, memorabilă, încălzită cu flacăra inimii, simți acea vibrație a autenticității pure, nealterată de convențiile artei formale. Este un act de curaj brut, transpus în cuvinte simple și directe, în care artistul ocazional își asumă rolul de cronicar al propriei povești de dragoste, transformând podul într-o galerie urbană a sentimentelor nerostite. Vibrația mesajului crește pe măsură ce constat asemănarea dintre nesăbuința tinerilor și dorința de a fi remarcați, dezvăluind un artist pentru o clipă, într-un gest autentic de căutare a semnificației.

Leadership: Cum reușești să transformi impulsul creator într-o amprentă vie a emoției tale, astfel încât fiecare privitor să simtă autenticitatea trăirii tale?

El camino del arte (calea artei) ne învață că cele mai profunde expresii uneori se nasc din cele mai mărunte gesturi. În spatele unui simplu graffiti descoperim o fereastră către autenticitate, aceeași intensitate întâlnită în operele consacrate. Tânărul însuflețit, ca un "artist stradal pentru o secundă", reușește să concentreze povestea sa într-o mărturie lăsată lumii. Asemeni lui Delacroix, în care fiecare gest artistic ar trebui să poarte greutatea intenției, inscripția de pe pod capătă greutate emoțională, devenind un simbol neșlefuit al dorinței de a imortaliza trăirea. De fapt, inscripția spontană, nestearsa de intemperii, îmi amintește de un pasaj revelator din "Jurnalul" lui Eugène Delacroix:

"Nu există artă fără sacrificiu. Dacă nu ești capabil să desenezi un om căzând de la al treilea etaj, nu vei fi niciodată capabil să pictezi o mare compoziție. Fiecare gest trebuie să poarte în el întreaga greutate a intenției tale artistice."

Așa este. Puterea acestui citat capătă o nouă dimensiune când privesc inscripția de pe pod. În aparenta sa simplicitate, acest gest spontan poartă aceeași greutate emoțională ca o mare compoziție - este expresia pură a unui moment de curaj creator. Sacrificiul în artă este ca o inscripție a tinereții pe trupul compoziției, un prim pas spre acel spațiu simbolic unde cade întreaga povară a intenției tale. Atunci când ești martorul unui gest simbolic nemaivăzut, abia atunci constați că profunzimea artei devine un soi de confesiune, dezvăluind legătura intimă dintre artist și opera sa. Când întâlnești un gest de curaj pur, realizezi că arta capătă o voce

intimă, dezvăluind nevoia artistului de a se lăsa în voia creației.

Leadership: În momentele când autenticitatea pură întâlnește convenția socială, cum găsești echilibrul între respectul pentru normă și nevoia de exprimare genuină?

Sacrificiul în artă înseamnă abandonarea confortului convențional pentru a găsi forme noi de expresie, chiar și în cele mai neașteptate locuri. Acest "artist stradal pentru o secundă" a reușit să comprime în câteva cuvinte întreaga intensitate a trăirii sale, lăsând o urmă la fel de semnificativă ca orice operă consacrată. Era ca și când betonul rece al podului devenise pânza unui pictor intuitiv, iar markerul - penelul său improvizat. În acest spațiu urban transformat în galerie improvizată, granița dintre vandalism și artă se estompează, lăsând loc unei noi forme de expresie autentică "Oomaafint Yllarahid", însemnând acea fuziune între rebeliune și creație pură, unde gestul spontan devine artă eternă.

Privind în urmă la această inscripție urbană, realizez că ea reprezintă mai mult decât un act rebel - este o lecție despre curajul de a transforma clipa în eternitate prin forța unui gest autentic. Ea întruchipează lecția de a transforma clipa într-o mărturie a spiritului liber. Cred că a fost un moment unic când impulsul creator s-a manifestat fără constrângeri, dând naștere unei mărturii despre curajul de a fi vulnerabil în fața lumii. De ce nu? Poate că tocmai în această vulnerabilitate stă forța mesajului, în asumarea riscului de a fi judecat pentru sinceritatea exprimării.

În forța sincerității, fiecare acțiune autentică poate uni efemerul cu eternitatea, încurajându-ne să găsim inspirația în simpla dorință de a lăsa o amprentă. Iar dacă spontaneitatea artistică devine o formă de mărturisire intimă, transformând gesturi simple în expresii profunde ale spiritului creator neîngrădit, atunci nu-mi rămâne decât să iau aminte la ce-am văzut, reținând ideea că: "Creația spontană devine o mărturie vie a momentului în care curajul interior învinge teama de judecată și convenții sociale."

Leadershipul se manifestă prin capacitatea de a recunoaște și valorifica autenticitatea expresiei umane în toate formele sale, transformând gesturile spontane în catalizatori ai schimbării culturale pozitive.

Poate clipa să devină eternitate prin forța unui gest spontan? Prin curajul de a ne exprima adevărul interior, chiar și cel mai simplu gest poate deveni o punte între efemer și etern. Este lecția pe care acest tânăr "artist urban" ne-o oferă - că în fiecare dintre noi există potențialul de a transforma o clipă de inspirație într-o mărturie durabilă a spiritului uman neîmblânzit.

Pocăieşte-te şi mori !

On Noiembrie 08, 2016

Începe să consideri leadershipul ca pe o forţă morală, conturându-ţi sensul vieții ca o formă de emoţionalitate exaltată pentru ceva care să te reprezinte necontenit.

Într-adevăr, de un ceas încoace, nu mai avusese dinaintea ochilor decât o latură a nenorocirii sale şi iată că pe neaşteptate îi venise în minte o altă latură, nu mai puţin cumplită.

Faţă de soţie, el se purtase ca un judecător neînduplecat, o osândise chiar şi la moarte. Şi ea, cuprinsă de groază, strivită de remuşcări, prăbuşită sub ruşinea pe care el şi-o făcuse în numele virtuţii lui nepătate, ea, sărmana femeie slabă şi fără apărare împotriva unei puteri absolute şi supreme, ea poate chiar în clipa aceea se pregătea să moară !

Se scursese o oră de când o osândise. Fără îndoială că acum ea îşi retrăia în minte toate crimele, îi cerea iertare lui Dumnezeu - toţi criminalii îşi întorc faţa spre cer înainte de moarte - în timp ce scria o scrisoare ca să implore în genunchi iertarea virtuosului ei soţ, iertarea plătită cu moartea.

Villefort scoase încă un răcnet de durere şi de furie. Vai - gemu el rostogolindu-se pe mătasea trăsurii - femeia asta n-a devenit criminală decât fiindcă a trăit lângă mine. De crimă eu sunt infectat, eu, eu ! Dar ea a căpătat crima aşa cum capeţi tifosul, cum capeţi holeră, cum capeţi ciuma ! Iar eu, o pedepsesc ! Eu am îndrăznit să-i spun: "Pocăieşte-te şi mori ! " Eu ! Nu ! Nu ! Ea va trăi ! Mă va urma, o să fugim amândoi, o să părăsim Franţa, o să mergem tot înainte, cât ne va putea îndura pământul.

Îi vorbeam despre eşafod ! Dumnezeule bun, cum de-am îndrăznit să folosesc cuvântul ăsta ! Doar şi pe mine mă aşteaptă tot eşafodul ! O să fugim ! Dar, am să-i mărturisesc totul. Da, îi voi spune în fiecare zi, umilindu-mă, ca şi eu am săvârşit o crimă… Vai ! Unirea tigrului şi a şarpelui ! Soţie veşnică de un soţ ca mine ! … Trebuie să trăiască, trebuie ca ticăloşia mea s-o facă să pălească pe a ei ! *

Leadership: Îți arăţi preocuparea exclusivă pentru fenomenul „remuşcării prin delegaţie", exprimându-ţi recunoştinţa faţă de sfârşitul neînduplecat al propriului ciclu evolutiv care se autoîntreţine cu mărturia de neclintit a faptelor care îşi merită răsplată?

Punctul de pornire în realizarea construcţiei unei personalităţi care schimbă lumea, poate fi investigată și interpretată în orice tip de știință experimentală prin integrarea dinamicii și proceselor psihice ale omului într-un context de formare și de responsabilitate. Orice asemenea personalitate are la bază o motivaţie puternică: de a trăi și gândi pozitiv.

Iar punctul de oprire al omului, care poate avea ca morală efectul negativ dintr-o acţiune slujită și manifestată în exces, sau dintr-o omisiune care într-un moment a creat o ameninţare iminentă cu un prejudiciu asupra mediului propriu de formare, trebuie considerat ca fiind un „tu însuţi" mai puţin finisat.

Un „tu însuți' care se asociază unui conţinut slab de pozitivitate. Un „tu însuţi" părtaş acelei stări de conștiință trezitoare, în care se activează solventul „vină", activând o formă de paralizie etică, acel sentiment de tristă resemnare în faţa unei realităţi nedorite. Vinovăţia înseamnă îndurare, înseamnă conştiinţă şubredă, înseamnă să fugi de tine însuţi în încercarea

de a-ţi găsi o altă realitate în care să te adăposteşti, ştiind că oricând te poţi rătăci într-o altă zonă numită "mărturisire fără înconjur."

Experienţa de a fi judecător şi inculpat aparţine omului care îşi consumă existenţa prin mărturisiri cotinue legate de faptele sale, demonstrând că nu este interesat de cunoaşterea adevărurilor lumii, ci numai de raportul ei cu el însuşi.

Sfârşitul inadmisibil este întotdeauna urmarea lui „este vina mea", cu o doză mare de resentiment la nivel individual. Ceea ce omul tinde să cunoască despre întreaga lume este direcţionat către centrul lumii lui interioară, aşa cum se află în raport cu fenomenele sufleteşti, cu produsul conştiinţei sale. Deci, raportul lui faţă de posibilul pe care îl poate suporta în legătură cu faptele sale, este rezultatul atingerii unui punct în care cugetarea trebuie să fie însoţită de echilibru pentru a se îndrepta către înţelepciune. Altfel, omul este constrâns să nu se mai recunoască el însuşi, redeşteptând dureri adânci care îl vor mişca până la lacrimi, şi îndepărtându-se tot mai mult de evlavie.

Omul care nu-și conturează sensul vieții ca o trăire complexă de ataşament, ca o formă de emoţionalitate exaltată pentru ceva care să-l reprezinte necontenit, va avea întotdeauna accente de resemnare după războaiele pierdute cu el însuși. Întotdeauna omul învins de propriile slăbiciuni va demara încă din tinerețe acţiuni care, în exces şi pe parcursul timpului vor fi incriminate în producerea unor evenimente neaşteptate. El este predispus la schimbări ce pot fi adesea dramatice.

Leadershipul se conturează ca forță mentală atunci când schimbările permanente și mizeria din jur te constrânge să te simți slab şi blocat într-o deplângere nostalgică a pierderii autocontrolului epistemic, emoţional și moral, și cu toate astea alegi să crezi în ceva bun, în măreţie şi în frumuseţea vieţii.

Leadershipul este tendinţa de a te înscrie în filonul de sens existenţial al omului care îşi modelează propria sa existenţă, adică senzaţiile şi stările sufleteşti, după felul cum se amplasează în punctul central al evenimentelor: ca victimă a hazardului sau ca un instrument al hazardului.

Pocăieşte-te şi mori ! este semnalul de alarmă că te afli pe ultimul drum: al însingurării, al deşertăciunii şi al pierzaniei. Dovada pocăinţei este validă atunci când ești nevoit să mergi tot înainte, cât te poate îndura pământul ca să scapi de o vină ce trebuie pedepsită neîntârziat de către legile lumii.

Dovada propriei tale mărginiri și puţinătăţi este justificată atunci când nu ai dinaintea ochilor decât o latură a nenorocirii tale și când, mereu, pe neaşteptate îţi vine în minte o altă latură, nu mai puţin cumplită. Și ești constrâns să încalci principiile egalităţii.

*** Notă:** Alexandre Dumas - *Contele de Monte Cristo* , Editura Tineretului, 1957.

Podoabele diamantine ale leadershipului

On Martie 09, 2011

Modul în care evoluează leadershipul tău depinde de percepţiile fundamentate pe aşteptările celorlalţi oameni şi de modul în care te raportezi la ei.

Fiecare om are o poveste. Povestea plină de umanism şi valori deosebite ale medicului dentist Roland Hermann, am aflat-o întâmplător citind revista Cariere. Aşa cum va spuneam şi în "Pulsul fermecător al vieţii", Ronald este un lider prin abnegaţia pe care o are faţă de oamenii cu un nivel de trai scăzut din toate colţurile lumii.

După spusele lui Ronald, cel mai dificil lucru cu care s-a confruntat a fost să acorde servicii medicale stomatologice mai multor refugiaţi din Gore. Care pe lângă faptul că erau foarte mulţi, aveau şi probleme multiple. El a precizat:

" Triajul pacienţilor era foarte dureros, asta mă apăsa foarte tare sufleteşte. Aveam în faţă un pacient cu probleme şi o singură şansă, pe mine. Întrebarea era cum să fac ca să beneficieze toţi de aceeaşi şansă? Dacă lucram foarte mult la un singur pacient, probabilitatea de a-i trata pe mulţi alţii scădea. Dacă rezolvam parţial problemele unuia şi reuşeam să ajung şi la alţii, mă durea sufletul pentru pacientul căruia trebuia să îi mai fi lucrat. "

Leadership: Explorezi o situaţie provocatoare de tipul "şansei de a te reinventa" prin extensia mult mai largă a câmpului de utilizare a dublei reflecţii?

Felul cum te vezi într-un moment de grea încercare este o evoluţie a şansei de a te reinventa prin extensia mult mai largă a câmpului de utilizare a dublei reflecţii.

Prima reflecţie este expresia aspiraţiei de a călători într-o direcţie contrară intereselor tale şi scopului declarat. A doua reflecţie porneşte de la consecinţa aspiraţiei de a te descoperi altfel în lume, cu atât mai mult cu cât eşti pândit de neglijenţa în tot ceea ce ţine de profesie sau viaţă socială.

Prin însăşi firea sa, prin mentalitatea sa, prin modul în care şi-a raportat viaţa şi sentimentele la ceilalţi oameni, încercând să-i ajute cât mai mult pe fiecare, medicul dentist Roland Hermann a demonstrat că posedă o înaltă ţinută morală. Pentru 2011 el şi-a propus să se implice în alte proiecte umanitare prin care să-şi aducă contribuţia la ajutorarea celor aflaţi în mare suferinţă. Nimic nu l-ar putea face să renunţe la calitatea de prieten, de vindecător şi de îndrumător al celor aflaţi în această situaţie.

Să-ţi asiguri succesul care îţi validează poziţia de lider înseamnă să priveşti cu ochi plini de recunoștință toate lucrurile minunate care ţi se întâmplă, după ce te-ai avântat acolo unde alţii nu s-au încumetat niciodată să păşească.

Roland Hermann reprezintă tipul de om la care iniţiativa predomină. Stabilindu-şi drept scop să relaţioneze cât mai bine cu oamenii, concentrându-se permanent asupra fiecăruia, identificându-le nevoile şi aşteptările la modul cel mai realist, şi fiind alături de ei în momentele grele puterea lui de influenţă creşte iar leadershipul său evoluează tot mai mult spre succes.

Dragostea lui Roland pentru cariera sa, pentru viaţă, pentru ceilalţi oameni este deseori amestecată cu o durere vie fiindcă nu poate ajunge să-i consulte şi să-i trateze pe toţi, fiindcă nu reuşeşte să le satisfacă tuturor nevoile într-un mod eficace. Dar e ceva solemn şi mobilizator să vezi un om ca el, plin de bunătate şi intenţii bune, însufleţit de sentimente alese (empatie, afecţiune şi prietenie) că se avântă acolo unde alţii nu se încumetă niciodată să păşească.

Leadership: Eşti supus unei deveniri care se reflectă în metoda de răsturnare de pe "Side A" pe "Side B" ?

Omul care lucrează sub presiune nu poate evita duritatea realităţii, percepută şi înţeleasă prin consecinţele ei, care dă sens vieţii pe fondul experienţei cognitive, afective, comportamentale acumulate în timp - prin consonanţa convingerilor cu acţiunile puse în slujba unor cauze de mare impact. Totul depinde de felul în care caracterul este interesat spiritualmente de reuşita modelului său pozitiv, înzestrat cu puterea de a converti un trecut întunecat într-un viitor mai bun. Iată deci că nici din acest punct de vedere nu avem motive să credem în moartea artei de a deveni cu toţii fiinţe mai înalte.

Două din obstacolele care te împiedică să devii o fiinţă mai înaltă, oricând posibile pe spirala unei deveniri care se îndepărtează de umanism, amplificată de imposibilitatea de a cunoaşte necuprinsul propriei tale neputinţe de a te manifesta emoţional faţă de cineva, sunt convingerile limitative şi temerile raţionale care exercită permanent o anumită presiune.

Iar această presiune, reflectată în „metoda de răsturnare de pe faţa A pe faţa B", îşi are originea în valoarea respectului de sine (nelucrat la cererea conştiinţei care se propagă în matricea şi ţesătura fiinţei tale) care înlocuieşte toate căile de acces spre obţinerea aprecierii celorlalţi.

"Side A" corespunde lucidităţii în evaluarea propriilor acţiuni, în timp de "Side B" corespunde evaluării propriilor tale experienţe de către ceilalţi. Imaginea de sine a individului, reprezentată de contactul dintre cele două unghiuri de vedere, va avea, astfel, la bază, pe de o parte consideraţii de bun simţ, fapt întru totul subiectiv, sprijinite pe ştiinţa de a fi virtuos. Pe de altă parte consideraţii de egoism, sprijinite pe fatala ştiinţă a superiorităţii. Şi, pe de altă parte, consideraţii de conştiinţă care se recunosc doar datorită existenţei celorlalţi.

Leadership: Caracterul tău poartă recunoştinţa facerii de bine într-un context în care evenimentele de tip determinist duc la apariţia aceluiaşi efect?

Unul din motivele pentru care mulţi lideri eşuează este acela că nu acordă importanţă nevoilor celorlalţi, nu luptă pentru a le satisface complet aşteptările sau nu reuşesc să se raporteze la valorile lor. Tu ce simţi pentru o fiinţă scumpă pe care o vezi că se pierde şi pe care nu poţi s-o ajuţi? Durere? Fiindcă acesta este sentimentul pe care îl simte Ronald ori de cate ori nu reuşeşte să trateze pe cineva.

Nimeni nu te urmează pentru simplul motiv că ocupi o poziţie şi ai o funcţie de conducere. Atâta timp cât nu vii în întâmpinarea cerinţelor lor şi nu răspunzi aşteptărilor lor, şederea ta acolo, între ei, va fi o permanentă apăsare pentru ei. E ca şi cum ai avea "medicamentul" care să-i poată face bine, dar nu li l-ai administra niciodată.

Oamenii intuiesc ce fel de om eşti, iar dacă caracterul tău nu poartă recunoştinţa facerii de bine ei nu-şi vor da niciodată interesul să te urmeze. Modul în care evoluează leadershipul tău depinde de percepţiile fundamentate pe aşteptările celorlalţi oameni şi de modul în care te raportezi la circumstanţele care fac necesară intervenţia ta.

Efectul produs de complexitatea evenimentelor deterministe este acela de repartiție a sarcinilor pe care ţi le poţi asuma, făcându-le să conteze.

Aşa cum fiecare ocean are o mulţime de perle preţioase care îl împodobesc – tot aşa şi leadershipul tău poate să devină mai preţios şi poate evolua spre succes dacă îi adaugi "podoabele" cele mai alese care să se aşeze în sufletul oamenilor, încărcându-i cu lumină, cu bucurie şi seninătate.

Podoabele diamantine ale leadershipului sunt compuse din: funcția de control a domeniului de experienţă, măsura valorilor care te inspiră să crezi în tine, posibilitatea de a acţiona ca o recompensă a afirmării tale şi derivatele de ordin superior multiplicate cu factori de actualizare, precum virtutea de a dărui şi acceptarea sacrificiului.

Fiecare mână de ajutor pe care o dai, fiecare moment în care eşti alături de oameni si arăţi că îţi pasă de soarta lor, simţământul de responsabilitate pe care îl manifeşti pentru ei, atitudinea plină de ambiţie, curaj şi optimism pe care o ai în faţa lor, sunt podoabe care, măcar pentru un moment, le aduce primăvara în suflet, le promovează fericirea şi îi împinge înainte. Asemenea podoabe sclipitoare scot în evidenţă calitatea leadershipului tău şi fac ca el să evolueze spre un nivel tot mai înalt.

Abnegaţia, profesionalismul, solidaritatea, rezolvarea optimă a problemelor, înalta ţinută morală sunt câteva din podoabele diamantine ale leadershipului tău, a căror valoare va fi recunoscută de oamenii pe care îi conduci.

Poemul conştiinţei omeneşti

On Aprilie 07, 2010

Tezaurul conştiinţei creştine este infinitul pe care omul îl poartă în el şi pe care, cu speranţă sau cu deznădejde, încearcă să-l măsoare cu smerenia simţirii fiinţei lui, prin faptele sale.

Cititorul a ghicit desigur că domnul Madeleine nu este altcineva decât Jean Valjean. Am mai privit în adâncimile acestei conştiinţe foarte exigente cu sine însăşi. A venit timpul să privim din nou. N-o facem fără să fim zguduiţi de emoţie. Nu există nimic mai înspăimântător decât acest fel de cercetare. Ochiul spiritului nu poate găsi nicăieri mai multă strălucire şi mai multă beznă decât în om. Nu se poate opri asupra nici unui alt lucru mai de temut, mai complicat, mai misterios şi mai fără de margini. Există un spectacol mai mare decât întinsul mării: cerul. Există şi un spectacol mai mare decât cerul: sufletul omenesc.

A scrie poemul conştiinţei omeneşti, dac-ar fi vorba de un singur om, de cel mai neînsemnat dintre oameni, ar însemna să contopim toate epopeile într-o singură epopee superioară şi definitivă. Conştiinţa este haosul nălucirilor, al poftelor şi al încercărilor; este focarul viselor, caverna gândurilor de care ţi-e ruşine; este gheena sofismelor şi câmpul de luptă al patimilor.

Pătrundeţi în anumite ore dincolo de chipul livid al unei făpturi omeneşti care cugetă şi priviţi ce se ascunde acolo, priviţi înlăuntrul acestui suflet, priviţi în această întunecime. Sub tăcerea asta de suprafaţă se dau lupte de uriaşi ca în Homer, sunt încăierări de balauri şi de scorpii, învălmăşeli de fantome ca în Milton, vârtejuri ca în închipuirile lui Dante. Cât de întunecat este acest infinit pe care omul îl poartă în el şi pe care cu deznădejde încearcă să-l măsoare cu voinţa fiinţei lui şi cu faptele sale ! *

Leadership: Eşti în stare să sondezi cele mai mari adâncimi ale propriei fiinţe, fără să-ți cunoști cele mai mari slăbiciuni, ci doar prin intermediul unei mărturisiri care poartă responsabilitatea celor întâmplate?

Durerea și suferința scot la lumină cele mai mari slăbiciuni ale propriei persoane. Din ce lasă omul, chinuit de acea dorinţă a găsirii unui sens nobil în viaţă, fără a înăbuşi spontaneitatea sentimentală a alegerilor de tot felul, importane sunt câteva din cele mai mari potenţialităţi ale sinelui. Că are în el ceva din duioşia unui suflet care circulă sub zodiile unui destin dulce-amar ce-şi are suişul şi coborâşul său, că are în el ceva din statornicia unui luptător, asta nu ne arată decât faptul că în faţa lumii spiritele cele mai luminate sunt ceva mai rezervate.

Acest om, pe nume Jean Valjean, pe care ni-l întinde mâna destinului său prin intermediul lui Victor Jugo, deci tremurând de emoţia creatorului său, rămâne nu doar sincer şi sfios faţă de sine ca şi de alţii, dar ne-a dat un rezumal al conştiinţei măreţe, în toate înfăţişările personalităţii sale, care în ultima parte a romanului ajunsese a fi atât de variată. El reprezintă destinul unui neam întreg, spiritul singuratic al celui plecat la lumina lui Dumnezeu, cel mai probabil întorcându-se mai elevat şi mai puţin suferind printre provocările vieţii.

Ai tot ce vrei în viaţa lui: păcat şi binecuvântare, durere şi iubire, singurătate şi spiritualitate, ai povestea, ai simbolul, ai interpretarea sufletului omenesc într-o evoluţie în bine a vieţii celor care nu cuvântă, dar care au sentimente făcute parcă să exprime dincolo de limbajul articulat o întreagă concepţie despre lume şi anume: *"Tot ceea ce omul face este ca să scape, să se mântuiască de limită."*

Erudiţia participă, de asemenea, şi ea la acest spectacol al mărturisirilor de nepătruns, fiind disponibilă acolo unde fermitatea morală intervine în interpretarea corectă a legilor divine.

Leadership: Ai puterea să-ţi întreţii acea stare primordială a vieţii lăuntrice care se situează „dincolo de cunoaşterea prin intelect", prin câte o întâlnire a vieţii lăuntrice cu vorbirea minţii lui Dumnezeu?

Amintirea faptelor, dacă nu are legătură cu acea dulceaţă a simţirilor, oricât de uşoară ar fi ea, nu poate aduce în prim plan adevărata putere a omului - care este blândeţea sa. De toate sunt, şi este totuşi o unitate care e însăşi nota sufletului său marcată printr-un *Estrapedanthar* (o schimbare a vieţii lăuntrice), pe care erudiţia o transformă într-un colţ de rai. Aşadar, există oameni duioşi a căror inimă plânge dorul de ceva ce n-ar putea avea niciodată, deşi au talent poate chiar foarte mult. Sunt alţii, cu o atitudine de calculator performant, dar reci la simţire, care se joacă meşteşugit cu simprea altora şi, când vor, aduc lacrimi în ochii celorlalţi.

La personajul Jean Valjean, mai mult ca la oricine, comparabil cu alte opere literare, se relevă sentimentul zguduit însuşi de ceea ce spune caracterul său. Fără a-şi pleca ochii în faţa puterii pasiunii, se loveşte continuu de timiditatea unei naturi gingaşe, te prinde în vraja unei poveşti din care aproape că nu mai ai scăpare, şi asta datorită însuşirii sale cea mai de preţ: însuşirea de a fi simplu; lipsa de formalitate, de complicații; lipsă de artificialitate, de afectare, de prefăcătorie.

Şi, pe când chipul său glasul altora ne sunt indiferente, iar faţă de viaţa lor nu simţim nicio apropiere, opera lui Jean Valjean niciodatà nu va putea fi despărţită de dânsul: împletirea gândurilor şi a simţămintelor sale de iubire cu setea de cunoştinţe ne luminează totdeauna, chiar dacă uneori ne oferă un zâmbet în care statornic există multă jale. Şi în modul său de a vorbi cu lumea, se simte uneori disperarea, având parcă modulaţiile alintate ale unui copil care simte o privire iubitoare lunecând asupra lui, în suferinţă.

Vorbirea minţii lui Dumnezeu evidenţiază dialogul pe care îl porţi cu tine însuţi în aceeaşi linişte cu care Dumnezeu întâmpină finalul minunat al căilor Sale, umplându-ţi inima de bucurie, fiindcă i-ai încredinţat Lui totul.

Poemul conştiinţei omeneşti se referă la însuşi sufletul aşternut într-o adevărată epopee, numită viaţă, pe care DUmnezeu nu o uşurează, căci face parte din crucea personală de mântuire. Din aceste considerente, nu trebuie să privim viaţa ca pe o provocare de a ne ridica în picioare şi a răspunde pentru ea, ci ca pe o „scară”, o ascensiune continuă spre slava lui Dumnezeu.

Poemul omului care îşi caută sfârşitul

On Decembrie 08, 2012

Urmează firul încâlcit al trendurilor "Omului" din tine, fără să-ţi asiguri exploatarea în întregime a superiorităţii faţă de ceilalţi oameni.

Sosise clipa răzbunării. Dar, vai ! Care pe care? Ce încurcătură ! Şi ce coincidenţă stranie ! Toate schimbările de direcţie, toate metamorfozele se săvârşeau pentru prima oară în ei, în amândoi artiştii, în cele două caractere puternice provenite din medii oarecum asemănătoare: Llewelyn Moss şi Anton Chigurh.

Exploatarea în întregime a acelui nestemat, " *superioritatea* ", componentul unei etici a performance-ului din sfera nelegiuirii şi a implicaţiilor sale, era asul din mânecă, cheia întregului meci dintre ei doi. O cucerire grandioasă a Bizanţului, dar o deschidere a Cutiei Pandorei care ar fi produs efecte bizare.

Când lui Llewelyn Moss i-a sosit timpul să iasă din spital, când îi răsunară în ureche acele cuvinte cumplite ale asasinului aflat pe urmele sale, generoasa ofertă, atent selecţionată: *"Îmi aduci banii, şi te omor doar pe tine, dar o voi lăsa pe soţia ta în viaţă ! "* el a înţeles teribila sentinţă.

O trecere bruscă într-o altă treaptă a existenţei, în mijlocul unui câmp de luptă, între bine și rău urmând legile unei singure legi: "Eu decid cine trăieşte sau moare". Momentul de cotitură cel mai periculos, alimentat prin revoltă şi intoleranţă. O agitaţie undeva înăuntrul său la fel de puternică ca un motor turat la maximum. Răspunsul lui Llewelyn veni neaşteptat, ca o piatră aruncată cu putere la întâmplare: " *Am decis să te transform într-un proiect special, Anton. Nu va trebui să vii să mă cauţi. O să te găsesc eu ! "*

Putea el oare, măcar să încerce, sau măcar să ia în considerare o alternativă, alta decât scufundarea în apele cele mai adânci şi nămoloase, care nu proveneau dintr-un izvor de conştiinţă curată? A se iniţia în tainele scufundărilor în acele ape tulburi, era totuna cu sinuciderea. Dar şi unica lui salvare.

Leadership: Felul cum te raportezi la ipostazele în care experimentezi viaţa oglindeşte modul în care se realizează coeziunea dintre ceea ce îţi asumi ca datorie morală şi ceea ce te împlinește din punct de vedere al capacității de a face faţă unei încercări care te copleșește?

Creaţia numită "viaţă" VERSUS tragedia numită "moarte". Un poem al vieţii, fără rimă, în care Llewelyn nu se mai putea încrede. Un poem în care metaforicul nu avea ce căuta. Un desfrâu înşelător al imaginaţiei, al trăirilor şi sentimentelor de moment, riscant, care se putea oricând încheia.

Un "imposibil" ferm şi foarte răspicat - strecurându-se prin cele mai întortocheate gânduri, făcându-şi loc forţat, pulsând prin venele sale cele mai fragile, atacându-i necruţător conglomeraţia de celule roşii din sânge. Dar, cu efect invers.

O rază plină de ură, o rază din lumina adevărată a celuia care percepe brusc sentimentul cel mai autentic al pericolului, îl străpunsese hotărâtor pe Llewelyn Moss. Timpul era preţios. Şi rar. Trebuia să acţioneze înaintea rivalului său. Şi, în acelaşi timp, trebuia să-şi găsească un motiv ca să pună o piedică voinţei sale de a nu mai fi acelaşi om dispus la negocieri.

Un război psihologic evoluat, o luptă pe viaţă şi pe moarte. Doi poeţi prinşi într-un joc al nervilor tari, folosindu-se de lira neîndurării, comparându-se, urmărindu-se şi ameninţându-se reciproc. O înfruntare bizară între două muze, Erato şi Terpsichore, în vederea îndeplinirii unei obligaţii corelative. Siliţi să se ascundă sau să fugă, punându-şi fiecare la bătaie arsenalul de gândire.

Doi poeţi ai raţiunii îndărătnice, doi împătimiţi ai acţiunii, *qui vont et viennent* . Un poet care nu a mai apucat să-şi desăvârşească creaţia numită "viaţă". Şi, un poet care doar şi-a întârziat puţin tragedia numită "moarte". *

Leadership: Reprezinţi nimic altceva decât un factor aleatoriu în finalul unei tranziţii de la stadiul de negare a integrității la cel de generare a unui profit de unicat în dialogul dintre ceea ce "pur şi simplu s-a întâmplat" şi ceea ce "nu trebuia să se întâmple" ?

Schimbările de direcţie, toate metamorfozele care se săvârşesc în tine, sunt rodul unei vieţi întregi trăite sub semnul esenţialului? Îţi asiguri exploatarea în întregime a acelui nestemat - superioritatea faţă de ceilalţi oameni de acelaşi calibru? Poţi oare, măcar să încerci, sau măcar să iei în considerare o alternativă? Sau accepţi să fii protagonistul unui desfrâu înşelător al imaginaţiei, al trăirilor şi sentimentelor de moment, riscant, care se poate oricând încheia?

Capacitatea de a deveni un alt om depinde de felul în care reacţionezi la propria ta schimbare, care la rândul ei îşi are rădăcinile în modul de structurare a personalităţii tale.

Fireşte că pe scena vieţii de toate zilele se vor întâlni tot felul de răsturnări de situaţii, întâmplări neprevăzute, multe dintre ele nefiind în avantajul tău. Situaţii extreme când modelul personalităţii tale se va demasca singur asemenea unui om de paie care reacţionează la comanda unei voinţe exterioare, nu interioare, deci subordonându-se influenţelor străine de adevărata lui esenţă. Iar dacă acest din urmă statut este foarte pregnant, leadershipul, asemenea marmurei, îşi poate pierde din finisajul lucios şi protecţia normală.

În cazul acesta, este vorba de modelul unei personalităţi care prezintă dificultăţi de asamblare a pieselor care participă la realizarea unui principiu de finalitate, unic şi esenţial. Acel principiu de funcţionare a "Omului" din tine care îmbină două proprietăţi fundamentale: auto-reînnoirea raţiunii de "a fi" şi renunţarea la ideea suprematiei (la ideea de a deţine ceva mai presus decât ceilalţi, de a te vedea mai marele peste toţi).

O relaţie de paralelism pe perioade lungi de timp care se află la baza mecanismului de funcţionare a leadershipului veritabil. Un război psihologic evoluat care se duce în culisele propriei tale existenţe.

Leadership: Eşti capabil să-ţi asumi o supremaţie care începe cu ceea ce eşti în stare să înfrunţi şi se termină cu ceea ce reuşeşti să împlineşti prin renunţare?

Sunt evidente aceste suişuri şi coborâşuri care fac bine. Reacţia ta în faţa tranziţiei de la A la Z, printr-o sporire a imunităţii în faţa dorinţei de supremaţie, prin intervenţia unei raţiuni care pune cu calm ordine în acţiuni şi efecte, te-ar putea motiva să te pui în slujba oamenilor printr-un scop nobil, prin lucruri măreţe. Deci demascarea propriei persoane, acceptarea unei identităţi care să garanteze continuitatea vieţii, găsirea unor puncte comune cu ceilalţi oameni, suficient de sigure, devin astfel deosebit de utile pentru menţinerea unui leadership de durată.

Jules Verne ştia ce spune atunci când a concluzionat: *"Să dobândeşti motorul care dă*

rezultate spectaculoase, să-ţi asiguri exploatarea lui în exclusivitate, aceasta este afacerea ce trebuie încheiată."

"Motorul" care asigură funcţionalitatea deplină a leadershipului, putând a da rezultate spectaculoase, este dat de relaţia TU şi El. O tendinţă către reciprocitate ce trebuie menţinută pe termen lung. O afacere care se dezvoltă în ritmul raţiunii de "a fi", şi care te poate ajuta să treci la nivelul de desăvârşire dorit numai dacă reuşeşti să rezişti la transformările impuse de evenimentele din viaţa ta.

Un lider nu dă niciodată cu banul când nu este în stare să decizădintre două posibilităţi: a trăi sau a muri, ci le înfruntă pe amândouă cu stoicism ca şi când ar trebui să câştige un premiu binemeritat numit: "Stăpânul Destinului".

Poemul omului care îşi caută sfârşitul marchează acea atitudine de acceptare a ceea ce eşti atunci când depinzi de evenimentele din jur, fără să ştii să te foloseşti de ele pentru a-ţi construi în jurul lor o identitate proprie şi puternică. Sau, invers, folosindu-te de ele în chip samavolnic pentru a-ţi impune superioritatea.

Dacă vrei să atingi excelenţa, renunţă la poziţia de supremaţie, la acel "care pe care", tu sau ceilalţi. În caz contrar te vei dezintegra singur într-un război de uzură, în care nu vor exista nici învingători nici învinşi. Ci doar o trecere de la o stare la alta în drumul spre o viaţă tot mai agitată, în care vei omite adevăratele ei bucurii, valori şi sensuri.

*** Notă:** "No Country for Old Men (2007)"

Popularizarea Leadershipului

On Martie 14, 2012

Fii pregătit să triumfi în mijlocul evenimentelor de mare amploare, dând curs unui act de trăire şi participare organică la un nivel înalt de spiritualitate.

Romanul "Aztec" scris de Colin Falconer se termină cu un exemplu deosebit de abordare a leadershipului. Celebrul conchistador spaniol, Hernan Cortés, aflându-se la o distanţă de aproximativ 1 km faţă de armatele mexicanilor, se adresează oştenilor săi:

- Suntem din nou copleşiţi numeric. Dar gândiţi-vă de câte ori nu am fost în aceeaşi situaţie în ultimele luni. Oare pe râul Tabasco nu am luptat împotriva unei forţe la fel de înspăimântătoare? Şi nu am triumfat? Amintiţi-vă de texcalteci şi de tunurile şi cavaleria cu care ne aştepta Narvaez la Cempoallan !

Se opri pentru câteva clipe.

- Am triumfat întotdeauna pentru că nu suntem oameni sau soldaţi obişnuiţi. Acum puteţi spune toţi, cu mândrie, că sunteţi soldaţii lui Cortes. În anii care vor urma, se vor compune balade care vor cânta vitejia noastră. Pentru că nu numai curajul, ci şi iscusinţa voastră în mânuirea armelor vă deosebesc de muritorii de rând. Nu uitaţi că aţi fost aleşi de Dumnezeu Însuşi să mărşăluiţi sub steagul Său.

Ca să-şi întărească spusele, ridică stindardul albastru cu alb, care fluturase odată pe catargul corăbiei sale.

- Crucea ne va ajuta să triumfăm ! Şi acum aş vrea să vă mai spun un singur lucru: nu uitaţi că sunteţi avantajaţi atâta timp cât aveţi putere să luptaţi. Aceşti mexicani nu vor să vă omoare, ci să vă ia prizonieri pentru ritualurile lor păgâne şi de aceea sunt mai vulnerabili. După cum ştiţi foarte bine, nu vor lupta ca o armată unită, ci individual. Azi nu veţi avea de-a face cu o bătălie, ci cu o serie de dueluri. Cred că Dumnezeu vă va da tăria să rezistaţi. Înfigeţi săbiile direct la ţintă, nu le învârtiţi orbeşte deasupra capului, ca să nu vă expuneţi bâtelor şi cuţitelor lor.

Leadership: Cum foloseşti sinteza tuturor experienţelor de tipul "believe in something more powerful than yourself" care s-au încrucişat în preajma evenimentelor de mare amploare bazate pe o singură constantă?

Evaluarea finalităţii propriilor demersuri de obţinere a unei poziţiei avantajoase de leadership, are ca premisă de apreciere incertitudinea ce eclipsează cursul evenimentelor. Adică, eventualitatea finalităţii unui demers de anvergură, foarte avantajos din punct de vedere al beneficiilor obţinute ca resursă a puterii de afirmare, este importantă pentru înţelegerea contextului şi ordinii evenimentelor care alcătuiesc lumea.

Cortés a triumfat în chip glorios nu pentru că evenimentele ţin cu acela ce are dreptate, nu pentru că el ştia să convingă lumea să-l urmeze, ci pentru că a sesizat starea de spirit a armatei adverse, neconsiderând-o periculoasă. Să recunoşti starea de spirit a oponentului este mai important decât influenţa pe care o ai asupra subalternilor tăi. Dacă Cortés ar fi ştiut că are de-a face cu armata unui conducător categoric, dispus să se sacrifice pentru un ideal înalt, probabil nu s-ar fi expus pericolului într-o bătălie cu mari pierderi.

Probabil experienţa de conducere a lui Cortés era una de tipul "believe in something more powerful than yourself", adică nu-i de ajuns să ai încredere în capacităţile tale, ci trebuie să evaluezi cât mai bine poziţionarea credinţei oponenţilor tăi în vederea obţinerii unei reuşite. Totul are legătură cu evenimentele pe care trebuie să le concentrezi într-o stare de spirit puternică, iar aceste evenimente de mare amploare trebuie să se bazeze pe o singură constantă: prezenţa lui Dumnezeu. Acea hotărâre a lui Dumnezeu prin care El alege un anumit număr de indivizi pentru mântuire şi glorie.

Rezum prin a consemna că un comportament de învingător se constituie prin interferenţa a numeroase circumstanţe psihologice care adesea complică sau fac chiar imposibilă predicţia evoluţiei evenimentelor. Comportamentul de învingător, în ansamblu, și cel al persoanelor marcate de psihologia luptei, prin apartenenţa la un ţel măreţ, implică nivele diferite de rezistenţă şi vibraţie spirituală, nivele diferite de direcționare și încurajare.

Liderul care se află în preajma evenimentelor de mare amploare a înţeles adevărata semnificaţie a cuvintelor divine: "De-aceea Stăpânul Te-a pus mai sus de tovarăşii tăi / Ca prin tine să ajungem, la voia lui Dumnezeu."

Popularizarea Leadershipului se adresează acelui tip de erou care ştie să folosească evenimentele şi oamenii în favoarea unui Dumnezeu determinist, căci tot ceea ce este onorabil la un erou este gloria cu care se înconjoară în calitate de slujitor dedicat al lui Dumnezeu.

Nu Hernán Cortés a a cucerit Mexicul cu o armată mică de oşteni, ci omul care a pus pe primul loc voia lui Dumnezeu a triumfat în mijlocul evenimentelor.

Porțile amintirilor prin care impresiile timpurii irup intempestiv

On Iulie 07, 2010

Un lider vizionar în cinematografie știe să folosească fluxul amintirilor pentru a îmbogăți lumea lăuntrică a operei sale, creând conexiuni profunde între trecut și prezent.

Înainte de deslușirea câtorva trăsături autobiografice ale operei - sunt evident mai multe, însă descifrarea lor exhaustivă ne este acum încă imposibilă - aș invoca două argumente de ordin general. Cercetând desenele lui Eisenstein din perioada lucrului la "Ivan", am constatat că, în acest timp, artistul a lăsat deschise porțile amintirilor prin care impresiile timpurii irup intempestiv. De pildă, în ziua de 28 noiembrie 1942, în plină creație a lui "Ivan", conștiința sa este literalmente inundată de amintiri din copilărie. Toate acele desene de clovni, prieteni sau stăpâni ai gândurilor sale sunt așternute pe hârtie în aceeași zi. Este și ziua în care apare, pe o altă foaie, un portret al lui Ivan, înfricoșător, sau o schiță pentru secvența procesiunii de la Svoboda Alexandrovskaia. Tot în 1942 se nasc desene cu "bunicul" său sau, pur și simplu, o amintire oarecare din New York. Iar la 17 octombrie al aceluiași an începe să-și scrie memoriile.

În 1944, tot în perioada creației lui "Ivan", așadar, creionul așterne în interval de două zile amintiri diverse din călătoria în Occident, din Mexic. Apoi, puțin mai târziu, o alegorie a "fricii". Desenele acestea nu sunt decât o mărturie a măsurii în care, paralel cu realizarea filmului, fluxul amintirilor irigă lumea lăuntrică a artistului. Există apoi, în al doilea rând, o mărturie directă: "Tocmai în scenariul "Ivan cel Groaznic" se află ascunsă într-un fel autoapologia autorului...

În scenariu se arată că o sumă de impresii din copilărie contribuie la formarea unui proces social sau istoric util, atunci când complexul emoțional creat de aceste impresii coincide, pe planul sentimentelor, cu ceea ce trebuie să facă un adult pe linia acțiunilor raționale și voluntare. Cu alte cuvinte, o serie de impresii puternice din copilărie și sentimentele care le însoțesc... determină acea nuanță pasională și emoțională a faptelor care vor trebui întreprinse în viitor... de către adultul Ivan.

Leadershipul subliniază și accentuează abilitatea de a integra experiențele personale și amintirile din copilărie în procesul de creație, reflectând experiențele personale într-un context social și istoric mai larg.

"În crearea unei opere cinematografice, regizorii combină elemente autobiografice și ficționale pentru a crea narațiuni armonioase, pe fondul argumentelor de ordin general care susțin veridicitatea emoțională a poveștii. Mai ales că stratificarea detaliilor emoționale creează o textură bogată care invită la multiple lecturi și interpretări. Procesul de adăugare a straturilor succesive reflectă natura organică și evolutivă a actului creativ. Procesul creativ începe cu o analiză detaliată a scenariului, luând în considerare trăsăturile autobiografice și impresiile timpurii ale creatorului, la care amintirile reprezintă elementul primordial prin care se construiește autenticitatea narațiunii. Astfel, desenele preliminare sunt esențiale în această etapă, permițând vizualizarea conceptului general al filmului și reflectând fluxul inspirațional care irigă lumea lăuntrică a artistului.

Pe măsură ce creația avansează cu ajutorul figurilor de stil, în special metafore și simboluri, se adaugă straturi de detalii emoționale, inclusiv selecția amintirilor din copilărie, designul scenelor cheie și amplasarea elementelor simbolice, cum ar fi: ceasuri, oglinzi și peisaje familiare. Peisajele familiare servesc ca ancore emoționale, conectând opera cu experiențele universale ale publicului. Fiecare decizie este influențată de principii estetice și funcționale, pe baza unei viziuni clar definite, creând o compoziție cinematografică care se dezvoltă organic, reflectând procesul social și istoric al narațiunii. Această abordare permite regizorului

să-și construiască autoapologia în cadrul operei, unde complexul emoțional creat de impresiile puternice din copilărie coincide cu acțiunile raționale și voluntare ale personajelor adulte, determinând nuanța pasională și emoțională a faptelor care vor fi prezentate în film.

Concluzia este că o îmbinare atentă a elementelor autobiografice și ficționale poate crea o operă cinematografică profundă și captivantă. Procesul de adăugare a straturilor succesive reflectă natura organică și evolutivă a actului creativ.

Amintirile timpurii ale artistului irigă creația sa, deschizând noi perspective asupra personajelor și evenimentelor și adăugând un strat autobiografic subtil care îmbogățește opera.

Creșterea amintirilor în procesul creativ este un fenomen complex care implică o serie de procese psihologice ce se desfășoară în condiții variate de mediu emoțional. Impresiile din copilărie, asemenea fotosintezei, sunt esențiale pentru dezvoltarea unei opere artistice. Structura internă a conștiinței, inclusiv aranjamentul temelor autobiografice și distribuția sentimentelor, influențează eficiența acestui proces. Studiul desenelor lui Eisenstein oferă informații cruciale despre evoluția și adaptarea emoțiilor sale la diferite condiții de creație.

Artistul utilizează diverse tehnici, inclusiv alegoria și memoriile, pentru a înțelege compoziția și funcționarea operei. În acest context, fluxul amintirilor, asemenea aranjamentului celular în plante, creează o nuanță pasională și emoțională care modelează narațiunea. Impresiile puternice din copilărie, precum desenele de clovni și prieteni, contribuie la formarea unui proces social sau istoric util, atunci când complexul emoțional creat de aceste impresii coincide cu ceea ce trebuie să facă un adult pe linia acțiunilor raționale și voluntare. Astfel, faptele întreprinse în viitor de către adultul Ivan sunt puternic influențate de sentimentele și impresiile copilăriei.

Un lider eficient în artă știe să utilizeze complexul emoțional creat de amintirile din copilărie pentru a da o nuanță pasională și emoțională faptelor și deciziilor prezente.

Porțile amintirilor prin care impresiile timpurii irup intempestiv se redeschid neașteptat atunci când contextul creativ activează legături emoționale adânci, deoarece aceste impresii oferă autenticitate procesului artistic, în sensul că ele contribuie la modelarea unei narațiuni autentice și emoționale.

Porţile fatale ale conştiinţei

On Martie 12, 2012

Fortifică temelia leadershipului tău, stabilind o concordanţă între atitudinea ta şi adevăratul tău fond sufletesc pe care se întemeiază conştiinţa ta.

Filmul “ *Tears of the sun (2003)* ”. Echipa de comando condusă de locotenentul Waters, împreună cu cei peste 40 de localnici, se îndreptau spre zona de retragere Alpha, la graniţa cu Nigeria. Dar un tragic incident survine - una din acele clipe fatale pe care destinul le creează în desfăşurările lui de neînţeles şi hotărăşte, dintr-o singură lovitură, soarta omului. Dintr-o dată, sunt atacaţi din toate părţile. Michael ‘Slo’, unul din membrii echipei, este rănit grav.

- Nu trebuia să fie aşa, şefule. Nu trebuia să se întâmple asta… adresându-i-se lui Waters. Şi, cu ultimele forţe, părea să adauge cuvintele pe care şeful artificier, Francois de Louviers-Maurevel, i le-a spus la un moment dat regelui Carol al IX-lea: "Viaţa mea este în mâinile tale, fă ce vrei cu ea.” Lasă-mă aici ca să v-o scăpaţi pe a voastră.

Leadership: Poţi să pătrunzi adevărul propriului sine şi să-l accepţi cu convingerea că tot ce ţi se întâmplă este o provocare menită să te pregătească pentru o percepţie autocuprinzătoare a realităţii?

Cuvintele acestea ar fi putut să fie acceptate de unii fără mustrări de conştiinţă, dar nu şi de Waters, care răspundea de siguranţa echipei - cuvintele aveau două sensuri: unul de acceptare a sacrificiului pentru salvarea celorlalţi, celălalt acuzator, căci amintea, necontenit, de etica şi profesionalismul său.

În devotamentul lui, cu neputinţă de corupt, Waters păstra un adânc respect şi o mare recunoştinţă. Îl învălui pe ‘Slo’ într-o privire plină de înţelegere, apoi îi strânse mâna. Pe faţă i se citea tulburarea lăuntrică. Ca şi cum o furtună înspăimântătoare se îngrămădise în sufletul lui, deschizând pe această cale porţile fatale ale conştiinţei.

Waters trebuia să pătrundă adevărul propriului sine. Şi să-l accepte. Un sincer: “ *Îmi pare rău. E vina mea* ” - nu-i putea răscumpăra greşeala şi nu-l absolva de consecinţele morale. Moartea lui ‘Slo’ a atins coarda cea mai sensibilă a conştiinţei sale, iar comportamentul său a fost în concordanţă cu fondul sufletesc pe care se întemeia conştiinţa lui.

Realitatea cea mai dură care i s-a conturat locotenentului Waters într-un asemenea moment este că trebuie să îşi asume alegerile şi să nu se lase influenţat de evenimente, indiferent de starea de spirit şi de sănătate a celor care îşi poartă vina de a-l urma într-o misiune periculoasă.

Leadership: Accepţi adevărul conştiinţei printr-o convenţie condiţionată de mărturisirea greşelilor şi depăşirea lor?

Îţi adresez o întrebare, viitor lider, şi cugetă bine căci dezlegarea ei îţi este trebuincioasă. Există vreun păcat care nu îţi poate fi iertat - un păcat atât de mare şi aşa de grav, încât să nu cuteze nimeni a-l ierta, nici măcar tu însuţi, nici măcar Dumnezeu? Ceea ce-ţi propun nu este altceva decât un test general care are legătură cu starea conştiinţei tale.

Tu accepţi adevărul conştiinţei printr-o convenţie condiţionată de mărturisirea greşelilor şi depăşirea lor? Sau prin asumarea şi repararea lor? Sau accepţi să fii prizonierul unei crize morale şi spirituale?

Conştiinţa este temelia leadershipului, ea este cea care marchează diferenţa semnificativă dintre Eul evaluat în urma unei constrângeri de ordin moral sau emoţional şi Eul ideal la care aspiră orice lider, acesta din urmă fiind o proiecţie a imaginii pozitive despre sine. Provocarea în cazul tău, ca şi lider, este să demarezi schimbarea şi să facilitezi dezvoltarea propriei fiinţe chiar şi atunci când autoritatea morală nu-ţi garantează reuşita.

Aşa cum o otravă poate fi fatală şi aceluia care o prepară, tot aşa calitatea unui lider se poate diminua dacă el îşi lasă conştiinţa la îndemâna compromisului dintre împlinirea idealurilor sale morale şi accentuarea convingerilor negative care subţiază zidul de apărare a emoţiilor ce garantează funcţionarea sa la nivel optim. Tu cu ce convingeri îţi alimentezi conştiinţa atunci când combini în mod dezechilibrat valorile şi credinţele tale?

Cineva a spus că conştiinţa morţii ne ajută să înţelegem mai bine viaţa. Tot aşa trebuie să sădim în grădina minţii noastre conştiinţa greşelii şi a consecinţelor acesteia ca să înţelegem mai bine leadershipul şi ca să evităm o eventuală condamnare a propriei personalităţi, a neputinţei de a ne ridica la nivelul impus de aşteptările noastre morale şi ale celorlalţi. Istoria ne arată ca dezvoltarea leadershipului se sprijină pe existenţa greşelilor, mai mici sau mai grave, pe recunoaşterea lor, dar şi pe modalităţile de prevenire şi de corectare a lor.

Leadership: Poţi să-ţi creezi o viziune clară asupra valorilor pe care vrei să le transmiţi legate de o percepţie a frământărilor sufleteşti aparent lipsite de adâncime?

Plutarh, acel scriitor ilustru, asemuia darurile naturii cu nişte flori minunate dar trecătoare, în timp ce virtutea o considera o plantă binefăcătoare, cu un parfum nepieritor şi care vindecă fără greş rănile.

Socoteşti că trebuie să iei atitudine faţă de procesul de degradare al conştiinţei tale? Eu cred că substanţa leadershipului nu trebuie căutată numai în interiorul fiinţei tale, cum se afirmă atât de des, ci în aceeaşi măsură şi în felul de a-ţi evalua, de a-ţi exterioriza şi de a-ţi transmite trăirile.

La vindecarea emoţională şi la dezvoltarea conştiinţei vei ajunge treptat, plantând cu sinceritate şi cu bucurie seminţe în sufletele oamenilor, lăsându-le să rodească şi să înflorească acolo, dar în acelaşi timp, ocupându-te cu conştiinciozitate de ocrotirea propriului tău cod moral.

Virtutea, în acest caz, înseamnă să alegi ceea ce e drept, de ceea ce e nedrept, nu să-ţi focalizezi emoţiile şi conştiinţa asupra greşelilor care nu pot fi evitate. Virtutea îţi poate vindeca rănile morale dacă integrezi în leadershipul tău acea gamă de valori caracteristice procesului tău de evoluţie, nu de involuţie – valori care conduc spre o înţelegere mai deplină a adevăratul tău fond sufletesc pe care se întemeiază conştiinţa ta, suprimând defectele care pot duce la transformarea ta negativă, şi încurajându-te să adopţi o atitudine sănătoasă, sau cel puţin mai optimistă, şi un comportament mai chibzuit.

Frământările sufleteşti, aparent lipsite de adâncime, pot fi înţelese ca fiind un rezultat al trecerii prin loviturile vieţii, în diferite etape ale carierei, care îţi amplifică durerea dar nu şi cauza apariţiei ei.

Conştiinţa care invocă virtuţile are ca simptom o durere trecătoare, nu una care durează.

Porţile fatale ale conştiinţei marchează felul cum te raportezi la starea ta interioară, felul cum îţi controlezi emoţiile în situaţiile dificile. Evidenţiază părţile tale bune pe care nu le iei în considerare din cauza circumstanţelor nefavorabile – care îţi diminuează starea de spirit şi respectul de sine, împiedicându-te să-ţi canalizezi forţa interioară spre o stare pozitivă. Iar, aşa cum preciza cineva, caracterul este dat tocmai de modul în care reacţionezi în faţa circumstanţelor nefavorabile.

În leadership este esenţial să îţi recunoşti greşelile, să ai grijă ca ele să nu se repete, să îţi asumi consecinţele şi să îţi dezvolţi conştiinţa - să ţi-o aperi de emoţiile negative, dar şi de "atacul" non-valorilor.

Portretul personalităţii de excepţie în sfera ştiinţei

On Noiembrie 07, 2016

Încearcă să creezi cadrul de extindere a idealului de sine prin valorificarea experienţei de a te întâlni pe tine însuţi în varianta unei manifestări a creaţiei pe care o atestă progresul ştiinţei.

Nicolaus Copernic era un tânăr stăpânit de o permanentă nelinişte intelectuală, cu o înclinaţie înnăscută spre a crea noi idei, iar în perioada de înflorire a Renaşterii el a avut ocazia să le şi pună în valoare. S-a adaptat rapid la viaţa universitară, cumpărând cu aviditate cărţi (o nouă şi minunată posibilitate apărută o dată cu inventarea tiparului) şi participând la cursurile valoroasei şcoli de matematică şi astronomie. A explorat ideile umaniste provenite din Italia care începeau să câştige teren în faţa rigidelor dogme scolastice care circulau în Cracovia.

A studiat legea canonică fără să uite de primele sale iubiri, astronomia şi matematica, precum şi istoria greacă, medicina, filozofia şi dreptul roman. La Bologna a avut şansa să studieze cu Domenico Maria de Novara, unul dintre cei mai mari astronomi ai vremii. A citit toate cărţile pe care le-a găsit despre astronomie şi a profitat de fiecare prilej pe care l-a avut de a învăţa despre metodele de observaţie aşa cum erau ele practicate în acele vremuri. După câte se pare, încă de timpuriu a început să se gândească la o concepţie nouă, mai simplă, asupra structurii universului: un sistem heliocentric cu Soarele în centru şi Pământul împreună cu celelalte planete rotindu-se pe orbite care îl înconjoară.

El se temea, aşa cum avea să scrie mai târziu, că "unii oamenii vor striga imediat ca eu şi ideile mele să fim daţi afară din scenă", explicând mai departe:

"Am ezitat multă vreme dacă să public sau nu ceea ce scrisesem pentru a demonstra mişcarea Pământului, sau dacă n-ar fi mai bine să urmez exemplul pitagoricenilor, care obişnuiau să încredinţeze secretele lor filozofice rudelor şi prietenilor sub forma orală. Am fost aproape îndemnat să las cu totul deoparte opera în forma ei finală, din cauza dispreţului pe care aveam toate motivele să-l anticipez cu privire la noutatea şi aparenta opoziţie faţă de raţiune a teoriei mele. *

Leadership: Existenţa ta alcătuieşte un ansamblu unic de condiţii pentru testarea unei cunoaşteri alternative din care derivă înclinaţia spre promovarea unei concepţii noi cu privire la evoluţia creaţiei?

Oamenii pe deplin conştienţi de valoarea proprie, preocupaţi de ceea ce pot realiza cu adevărat cu ajutorul ştiinţei, se ridică deasupra statutului de practicant autonom al gândirii noi, spre a fi consideraţi o capodoperă a timpului lor. Ei îşi dezvoltă abilităţi oriunde s-ar afla, fără să fie limitaţi de proporţiile amplificate ale apropierii sau îndepărtării de valorile unei singure variabile de tip "Restrict", care blochează accesul la o gândire avansată.

Ei se îndreaptă constant într-o direcţie ce oferă posibilitatea extinderii cunoaşterii şi evoluţiei dincolo de domeniul experienţei, lucrând totdeauna conform unor motive de ordin moral, filosofic, obiectiv cât şi subiectiv. Ei sunt asemenea pictorilor care îşi fac nenumărate portrete, expunându-şi lucrările pe plan internaţional fără să aibă aprobările necesare şi fără să intre în asociere cu alte autorităţi în domeniu. Fiindcă la ei predomină dorinţa de a se afirma acolo unde nu reuşise odinioară, din dorinţa celui obligat să fugă pentru a se regăsi şi a se împlini şi, în fine, din dorinţa de confirmare într-un spaţiu ce le rămăsese inaccesibil la un nivel de începător.

Pentru a deschide noi căi de cercetare şi progres în leadership trebuie să ridici nivelul de cunoaştere şi înţelegere a elementelor care contribuie la dezvoltarea acelei ştiinţe ale cărei orientări sunt în plină ascensiune. Căutând să-ţi armonizezi gândirea cu elementele noi pe care le poate genera forţa ştiinţei, vei deveni pe deplin capabil să deţii acea calitate numită "Shining", ce te poate îndrepta înainte cu paşi repezi spre o nouă dimensiune a valorii tale.

Leadership: Îţi reevaluezi ideea atitudinii faţă de viaţă ca totalitate a potenţialului de inovare, prin prisma importanţei de a gândi un stil diferit de a comunica lucrurile care îţi par ţie importante?

Dacă vrei să depăşeşti limita unei cunoaşterii ieftine şi imperfecte pune-te la punct cu elementele determinante care stimulează progresul ştiinţei tale. Şi fă eforturi pentru a face ca gândirea şi creaţia ta să devină o sferă autonomă a leadershipului. Fii asemenea unui pictor care oscilează între erudiţie şi penel, trăsăturile lucrărilor sale reunind enciclopedismul, totodată având ca model şi orizont de idealitate renaşterea unei noi concepţii de viaţă, a unei noi abordări ale artei şi ale învăţării ştiinţei.

Ştiinţa ta poate să alcătuiască un ansamblu unic de condiţii pentru testarea unei cunoaşteri alternative numai dacă devii creatorul conștient al unei realități greu accesibilă celorlalţi. Şi doar dacă reuşeşti să construieşti firul logic al unui raţionament care utilizează noi ipoteze de interpretare ale concordanţelor dintre "evident" şi "ascuns".

Un artist în ale ştiinţei continuă să-şi manifeste superioritatea în ceea ce priveşte depăşirea banalităţii naturalismului, a artificialităţii goale a experienţelor formaliste, întreţinându-şi filosofia asupra vieţii cu noi teorii ale raţionalităţii. Una din aceste teorii ar spune că nimic nu este mai necesar izbândei de a face loc lucrurilor rafinate şi alchimice în viaţa sa decât a sta deasupra tuturor printr-un soi de anticipare cu privire la aparenta opoziţie intelectuală a celorlalţi cercetători ce poate fi contrară şi incompatibilă cu orizonturile sale de experienţă.

O nouă concepţie cu privire la evoluţia creaţiei rezidă din experienţele vieţii care te îmbogăţesc spiritual, care şi cu bune şi cu rele te maturizează dacă ştii să evoluezi prin înţelepciune şi răbdare.

Creaţia cea mai de preţ a unui inventator este acea formă a existenţei care stimulează capacitatea de a se dezvolta pe sine însuşi ca personalitate şi ca inteligenţă profundă, superioară, spirituală, consistentă, sistematizată, una care înţelege sensul evenimentelor şi ştie să le aranjeze în favoarea sa şi a progresului ştiinţific.

Portretul personalităţii de excepţie în sfera ştiinţei cuprinde în primul rând dimensiunea principală a vieţii inventatorului exprimată prin înfăţişarea trăsăturilor intelectuale, fizice şi morale, vădind o anumită deschidere spre cultură, spre noutate, spre perspective care abordează într-un mod foarte vast viitorul.

Portretul unui gând rătăcit în lumea artei

On Iunie 21, 2017

Învaţă să te priveşti din perspectiva unui secret bine ascuns, pentru a obţine o înaltă perfecţiune artistică.

Cum ar fi dacă ai încerca să-mi desenezi viaţa în culorile nopţii, cu bogăţia nuanţelor fine ale lacrimilor pline de speranţe şi visuri, dintr-o încordare care vine dintr-un program mental, ce se reflectă emoţional, dar care se manifestă la nivel fizic? Nu-i așa că poezia inimii are aceleași drepturi cu poezia gândirii captivă în viziunile abstracte ale artei?

Important e cum mă priveşti din perspectiva unui secret bine ascuns, care nu lasă loc de nicio interpretare răutăcioasă, dar cu grija de a nu-l aşeza sub semnul unui realism compensatoriu. În mod idealist, trebuie să-ţi reprezinţi ideea în imagini vii, un truc cu schimbarea inspiraţiei într-o formulă intelectuală şi productivă, dincolo de romantismul ce nu lasă loc de nicio îndoială cu privire la sentimentele pe care mi le acorzi.

A învăţa să te priveşti din perspectiva unui secret bine ascuns pentru a obţine o înaltă perfecţiune artistică, înseamnă să sesizezi proiecţia unei forţe de exprimare căreia îi poți cuprinde măreția.

Printre frământarea de gânduri care personifică arta de a înfăţişa un ideal de frumuseţe, pentru care tainele plămădelii îşi asumă totdeauna o nouă fizionomie, trebuie să foloseşti pulsațiile de lumină ale stelelor pe linii fantastice şi nemărginit de lungi. Pe care premisele manifestării dependenţei de frumos îl dau concluziei unei gândiri pline de dorinţe satisfăcute. Cât de bine mă încadrez în simbolurile unei realităţi transcendente *behind the lyrical journey of Shadows of the Night?*

Leadership: Îți exprimi năzuinţa spre ceea ce este mai presus de tine printr-o redare creativă a distanţei dintre adevăr şi iluzie?

Gravitatea cu care mă priveşti într-un vis feeric cu sensuri adânci poate să devină totul, o întindere de o mie de ani lumină până în centrul universului văzut dintr-un singur unghi: al esteticii operei de artă.

Încearcă să efectuezi o experiență de gândire, așa cum obişnuiesc fizicienii, care să permită prin intermediul unei ficţiuni verosimile eliminarea hazardului realităţii. Poți să exprimi cu suficientă forță și căldură sufletească adevărul fenomenelor care mă înconjoară pentru a obţine o înaltă perfecţiune artistică?

Întotdeauna lipsește ceva, aşa este, ca o concluzie plină de confuzii şi fără drept de apel. Şi întotdeauna se va găsi altceva, ca momentul acţionării unei forţe de atracţie în raport cu axa unei succesiuni de prefaceri. Probabil sunt lucruri pe care nu le ştii încă despre mine, iar când le vei afla crezi că se va schimba ceva din perspectiva pornirilor curate ale teoriei estetice? Și prin ce oare îţi poţi înălţa mai mult idealurile decât prin redarea relaţiei dintre frumosul natural și frumosul artistic?

Aici te cunosc mai bine decât crezi, după felul cum îţi manifeşti uitarea de sine, năzuinţa spre ceea ce este mai presus de tine. Prezentul tău vorbeşte acum cu prezentul meu, deci prezentul este mulţumit fiindcă amândoi rezonăm cu el.

În artă capacitatea deosebită de a realiza ideea şi simţământul nu direct - prin faptă, ci printr-o redare poetică a distanţei dintre adevăr şi iluzie, tinde spre formele moderne ale artei vizuale în concordanţă cu dezideratele timpului prezent.

Leadership: Poți să zăreşti ceea ce este mai presus de tine prin evadarea dintr-o stare de poveste suprarealistă?

După cum rostul arheologului este acela de a reconstitui o întreagă cultură din rămăşiţele ei de piatră, tot astfel prima şi cea mai importantă misiune a unui artist este de a pătrunde viaţa lăuntrică a modelului. Un soi de gravitate mai mult decât inerentă care nu se dezvăluie de la prima vedere, tocmai pentru că ascunde rădăcini împletite într-o tulburătoare adâncime. Şi de a găsi un echilibru între sensibilitatea de a-şi urmări visele ascunse, mişcarea de rotaţie a unei stele şi evadarea dintr-o stare de poveste suprarealistă.

Deosebirea esenţială dintre mine şi cine mă percepi tu în planul creaţiei este o indulgenţă faţă de natura omenească în exerciţiul contemplării unui peisaj care poate să aibă un efect emoţional profund, surclasat prin deşteptarea unei viziuni cu forţă simbolică. Astfel ai posibilitatea de a te conecta cu infinitul.

Un artist desăvârşit ştie să distingă orice culoare în confesiunile unei minți însetate de secrete, chiar şi în încordarea unei încremenite aşteptări din timpul inspiraţiei, cum ar fi culoarea năzuinţei spre universal sau culoarea unei vibraţii a extazului. Albastrul şi Galbenul asortându-se într-un cadru al gândirii estetice, al libertății și al autenticității. Crezi că dacă niciodată nu înţelegi totul despre mine, poţi măcar să ţi-l închipuieşti?

Expresivitatea în leadership este spațiul de reprezentare a unei asocieri între interpretarea calităţii modelului pe care galeria de idei și trăiri ți-l pune la dispoziție și imaginea particulară pe care ți-o formezi despre tine însuți.

Dumnezeu, Regele, Onoarea şi Femeile. În dimensiunile artei, cu resorturile ei intime şi consecinţele ei ascunse, în simetria timpului, a spaţiului şi a inspiraţiei, aceste prezenţe de o importanţă covârşitoare corespund deosebirii dintre modul de gândire al poetului şi al gânditorului.

În viziunea unui critic literar ca Nikolai Dobroliubov, primul gândeşte într-o manieră concretă, fără să piardă niciun moment din vedere fenomenele şi imaginile particulare, iar celălalt ţine să generalizeze totul, să contopească semnele particulare într-o formulă generală.

Portretul unui gând rătăcit în lumea artei reprezintă pasul semnificativ al unei creaţii ancorată în observarea riguroasă a naturii umane făcut în direcţia artei în care un chip este o fereastră spre interiorul tău.

Portretul unui trandafir în versiune artistică

On Februarie 18, 2021

Dacă ştiinţa devine o artă prin pasiune, atunci arta trebuie să fie o direcţie a sensibilităţii manifestată în ştiinţă.

Sunt o fiinţă creată conform legilor naturii şi, prin urmare, sunt condiţionat de aceleaşi legi care determină existenţa unui trandafir "Double Delight" în spaţiul central al grădinii mele. Or acest superb trandafir, uimitor prin stăruinţă, nu există ca plantă izolată de alte flori, echivalentă imaginii unei prezenţe mult mai cuprinzătoare în dăinuirea ei, ci există ca un fel de continuum între materie şi spirit, ca un liant universal între două lumi potenţial autonome, nici una neputând fi considerată superioară celeilalte.

În privinţa aceasta, atrag atenţia că trandafirul aparţine familiei Rosaceae, simbolul unei învieri spirituale şi al unei călătorii mistice care mi-a deschis mintea și sufletul spre frumos, spre adaptare, spre schimbare, guvernând relația mea cu Dumnezeu prin discreţie, prin distribuţia sensibilului mai mult decât o ordine bazată pe egalitatea vizibilului şi a inteligibilului care-l însoţeşte. În plus, când priveşti prin această optică, începi să vezi natura cu o claritate excepţională.

Chiar şi în manuscrisul meu secret, *Tukerlyeress* (Misterul cuvântului întrupat), trandafirul ocupă locul de frunte, fiindcă el are nevoie să se simtă integrat într-un mediu protectiv, să aparţină unei taine de dincolo de ceruri, de munți și de ape, dincolo de orice înţelegere pământeană. Este o prezenţă plină de semnificaţii, un interlocutor cald şi inteligent din punctul de vedere al unei conştiinţe artistice, pulsând a explozie de culori, a viaţă neîncorsetată-n imitaţii.

Da. Trandafirul este mereu acolo unde se creează, într-un labirint al cuvintelor fără de moarte, într-un fel omnipotent asemănându-se cu încrederea perceptivă a unei fiinţe mistice aflată în fața unei oglinzi iluminate de o lumânare, fără de nici o clătinare, impresionând prin tăcere, rezervare, ascultare, virtute, asemenea unui poet care contemplă natura mai mult prin lirism decât prin semnificaţie profundă.

Leadership: Poţi să aduci o îmbunătăţire semnificativă percepţiei continuităţii de sine, ca rezultat al gestionării sensibilităţii ce poate fi identificată numai într-o operă de artă?

Prin activitatea mea intelectuală, însoţită de un efort voluntar, pulsând a ceva tainic care uimeşte fiecare ochi iubitor de frumos, deci lăsându-mă stăpânit de înclinații artistice încă neexplicate, încerc să ajung în starea de dominare a naturii. Numai prin intermediul Marii Cunoaşteri se realizează totul. Pentru aceasta trebuie să mă diferenţiez de ceilalţi oameni şi să mă situez în raport cu natura ontologică a povestirii pe care o alcătuieşte viaţa mea din altă lume, din alt spaţiu, din perspectiva celor mai delicate flori ale naturii creionate în nuanțe trandafirii.

Şi, totuşi, misterul care învăluie învăţătura principală desprinsă din dialogul meu cu trandafirul, spirit lângă spirit, cu un soi aspiraţie spre acceptarea idealului promovat de Renaștere, pare a fi o permanentă tendinţă spre puritatea acuarelei, revărsându-se dinspre dezlegarea misterelor naturii spre dobândirea iluminării divine. Să înţeleg mai bine miezul unui secol plin de realizări estetice uimitoare, asta e principala mea preocupare.

Nu e deloc întâmplător faptul că sinele meu continuă să ia parte la o realitate care mă absoarbe total, mă devorează cu încuviinţarea mea şi mă desprinde sistematic de banalitatea

cotidianului.

În acest moment, consider că este de preferat ecoul unei lumi de dincolo de aparenţe, decât preaplinul unei naturi milenare care strecoară în mine, prin sita ochilor expresivi, prin toate nuanţele vieţii mele, o curiozitate fără margini. Or, trandafirul, nu doar că îl pot vedea, ci şi înţelege şi-l pot reprezenta prin filtrul propriei sensibilităţi care reflectă inocenţa sincerităţii, spontaneitatea şi curiozitatea nedisimulată, însuşiri detectate numai în operele de artă. Cu această sensibilitate artistul creează microuniversuri.

Leadership: Unitatea lumii pe care o experimentezi prin actul de creaţie se remarcă prin materialitatea unei realități care-și construiește sensul, în afara sensului intrinsec al cuvintelor?

Realitatea care-și construiește sensul, în afara sensului intrinsec al cuvintelor, este nuanţată prin folosirea unei imagini cel puţin inedite într-un cadru de experiment artistic în care fragilitatea fiinţei este semnificativ asociată cu o frumuseţe unică a naturii. Orice creator trebuie să treacă printr-o cufundare în fiinţa metafizică a naturii pentru a-şi scoate la iveală artistul interior şi a-şi crea propriul cod de încifrare vizuală.

Numaidecât, trandafirul îmbracă forma unui *mysterium tremendum* atunci când încerc să pricep tehnica picturii, nu datorită vreunei psihologii aperceptive îndreptată spre lumea culorilor aşternute pe şevalet, cu libertate şi cu măiestrie, ci datorită izolării câtorva fragmente ale complexităţii mele sufleteşti întărite prin conlucrarea artistică a naturii cu adaosul minunăţiilor care i-au trecut pragul pe timp îndelungat.

Apropo de artă. Celebrul roman "Piatra filosofală" scris de Marquerite Yourcenar, începe cu un citat aparţinând învăţatului umanist italian din perioada Renaşterii, pe nume Giovanni Pico della Mirandola:

„Nu ţi-am hărăzit, o, Adame, nici un chip, nici un loc, şi nici un dar care să fie numai al tău, pentru că atât chipul, cât şi locul şi darurile toate să le doreşti şi să le stăpâneşti prin tine însuţi. Natura îngrădeşte celelalte specii prin legi stabilite de mine. Tu însă, neîngrădit de nicio opreliște, te defineşti prin propriul tău discernământ în voia căruia eu te-am lăsat. Te-am aşezat în mijlocul lumii ca să poţi cerceta mai bine toate câte le cuprinde lumea. Nu te-am zămislit nici ca pe o fiinţă cerească, nici pământească, nici muritoare, nici nemuritoare, pentru ca prin tine însuţi, în mod liber, ca un pictor bun sau ca un sculptor dibaci, să-ţi desăvârşeşti propria ta formă."

Aşa este. Sunt sigur că dacă ar trebui să mă exilez într-o sferă a percepţiei frumosului, şi nu mai puţin să mă adâncesc în practicarea vocaţiei frumosului, exprimându-mi admiraţia neţărmurită faţă de înălţimea expresiei, atunci trandafirul m-ar ajuta să descifrez acea "descătuşare" a impresioniştilor care nu poate fi trăită decât în natură. Nu e deloc întâmplător faptul că mi-am desăvârşit forma imaginii pe care o transmit lumii. Sunt agentul conexiunii dintre două lumi pline de vibraţie.

Arta este mijlocul creatorului de a se constitui într-o viziune a cărei percepere cere o anumită subtilitate şi fineţe faţă de redarea unei realităţi suprasensibile, observate doar prin intermediul comparaţiei între ceea ce se simte şi ceea ce se lasă contemplat.

Portretul unui trandafir în versiune artistică este imaginea unui creator surprins pe pânză, în propriul univers, într-un moment de genială manifestare a unei viziuni plină de înţelesuri care ia in calcul posibilitatea lui de a se transpune în alte ipostaze, fără să-și piardă identitatea.

Posesorul absolut al artei fără frontiere

On Iulie 20, 2014

Stabileşte tipul de cunoaştere care îţi orientează motivaţia în practica ştiinţifică, revizuind permanent relaţiile cu arta pe care o creezi.

Teatrul, gândea Eisenstein, îi permite omului să înfăptuiască fictiv acţiuni eroice, să fie fictiv pasionat cu Romeo, să devină înţelept cu Faust, să scape de toate problemele lăuntrice cu ajutorul graţios al lui Brandt, Rosmer sau Hamlet. Şi tânărul regizor se înfierbântă mergând mai departe cu gândurile sale, constatând că acest comportament fictiv îi oferă spectatorului o plăcere întru totul reală. El simte eroul, are sentimentul martirajului, îl copleşeşte propria-i generozitate...

Ajuns pe la piaţa Trubnaia, Eisenstein se opri din drum, cuprins de fierbinţeli. Gândurile îl asediau ca într-o febră. *"Ce descoperire îngrozitoare ! Ce mecanism oribil se ascunde în această artă sfântă pe care o servesc ! Nu-i numai minciună. Nu-i numai escrocherie. Este otravă. O otravă groaznică, înfricoşătoare. Pentru că, de fapt, dacă îţi poţi procura fictiv plăcerea, cine va mai încerca să caute în înfăptuiri efective ceea ce se obţine pe degeaba, fără să se mişte de pe fotoliul teatrului de pe care te ridici apoi cu sentimentul plăcerii absolute?"*

Cel ce avea mai târziu să devină un mare regizor, îşi continua ameţit drumul. Şi tabloul întrevăzut devenea un coşmar: *"Trebuie să ucid asta. Să distrug ! "* Şi gândurile fug, aleargă într-o goană nebună. Da, să distrugă asta. Dar cine? El, un băieţandru? Care încă nu-şi găsise locul nici pe tamponul expresului creaţiei artistice ! Atunci un nou gând i se strecura în minte. *"Întâi s-o stăpânesc. Apoi s-o distrug. Să învăţ secretele artei. Să-i înlătur valurile. S-o stăpânesc. Să devin un maestru. Apoi să-i smulg masca, s-o dezvălui. Începe o nouă fază a relaţiilor noastre."* A relaţiilor sale cu arta.

Leadership: Profilul tău de personalitate se constituie ca rezultat al unei creaţii care îşi "devorează" creatorul, chiar şi atunci când faci abstracţie de experienţa trăită prin frământările unei arte imperfecte?

Ce mecanism oribil se ascunde în această artă pe care o serveşte un lider? Acest mecanism este o aplicare a principiului "scopul scuză mijloacele"? Este o creaţie individuală şi finisată, încorporată într-o viziune care nu e în concordanţă cu standardul de evaluare a propriilor sale rezultate? Este o combinaţie de elemente care posedă valori determinate şi au rolul de a transmite o "maladie" a creaţiei?

Înainte ca leadershipul să se regăsească reflectat în practică, mai întâi trebuie să stăpâneşti arta care îţi înnobilează ştiinţa şi îţi impune modelul de gândire. Apoi s-o distrugi, ca să-i înlături "valurile", defectele şi imperfecţiunile. Apoi s-o reinventezi introducând noi valori, după care s-o prezinţi într-o modalitate indicativă, ca fiind mai bună decât alte variante anterioare. Doar astfel vei deveni un maestru în domeniul tău de activitate.

Dar ce se întâmplă dacă arta de a descoperi şi promova acest "produs ştiinţific", în urma utilizării unui set de standarde de creaţie, cu valori necunoscute pentru elementele căutate în mijlocul unor prejudecăţi sau contestări, nu insuflă o sporită putere de înţelegere celor din jur?

În acest caz are loc o anumită monopolizare a atenţiei celorlalţi prin mijloace care nu sunt de cele mai multe ori decât pârghii de afirmare şi promovare a propriei gândiri. Asta este o

escrocherie, o otravă groaznică, pentru că, de fapt, îţi procură fictiv plăcerea de a-ţi impune propriile legi, considerând că doar tu cunoşti adevărul ideilor tale, pe care îl trâmbiţezi cu atât avânt neîntrerupt.

Leadership: Poţi să-ţi cultivi arta de a fi diferit într-un mod subtil, rafinat, fără exagerări, într-un mediu în care manifestarea unei stări de spirit îndreptate spre progres este ridicată la nivel de „valoare" ?

În lupta cu mijloacele de promovare a gândirii proprii, liderul este singurul care are de suferit dacă nu îşi revizuieşte permanent relaţiile cu arta pe care o promovează, dacă nu arată adevărul care se ascunde în spatele a ceea ce construieşte. Bine preciza cineva pe o pagină web: *"Când o să poţi spune: eu sunt în spatele a ceea ce reprezint eu, ca om... atunci vei putea să construieşti."*

Leadershipul nu ar trebui să fie rezultatul unei creaţii care îşi "devorează" creatorul, indicând posibile epuizări ale valurilor de cercetare, în confruntarea cu ceea ce unii numesc „experienţa imposibilului". Iar orice încercare de a o îmblânzi şi de a-i modifica adevărul este sortită eşecului, mai ales dacă ea exprimă aspectul cantitativ al fenomenului de posesiune totală, care creează sentimentul plăcerii absolute.

Manifestarea unei stări de spirit îndreptate spre progres este ridicată la nivel de „valoare" atunci când este privită din perspectiva apartenenţei la o personalitate care nu suportă vulnerabilităţile formelor artistice, şi se vede nevoită să adopte alte practici şi să introducă alte criterii de apreciere ale artei.

Posesorul absolut al artei fără frontiere este liderul care reuşeşte să descopere acel "perpetuum mobile" de excepţie, într-un domeniu în permanentă schimbare, care să fie benefic şi acceptat de toţi. Dar în acelaşi timp creaţia liderului, odată cu formele ei de expresie şi cu mijloacele ei de promovare, nu trebuie să creeze sentimentul unei înşelătorii – căci, în acest caz, va aduce numai dezamăgire.

*** Notă:** Ion Barna - *Eisenstein* , Editura Tineretului, 1966.

Potenţialul nevalorificat al muribunzilor

On Martie 26, 2014

Fii stăpân pe un scenariu care utilizează valori aferente trecutului, prezentului şi viitorului oamenilor, astfel încât să întregeşti scenariul win-win care dă măsura corectă leadershipului.

Ceea ce trebuie să ne minuneze în bătălia de la Waterloo este hotărârea engleză, sângele englez. Nu comandantul ei, ci oştirea.

Wellington, cu o neînţeleasă lipsa de recunoştinţă, spune într-o scrisoare către lordul Bathurst că oştirea sa a fost o armată foarte slabă. Ce spune despre asta întunecatul vălmăşag de oseminte îngropate sub brazdele de la Waterloo?

A-l face pe Wellington atât de mare, înseamnă a micşora Anglia. Wellington nu este decât un erou ca oricare altul, a fost dârz. Acesta este meritul lui şi noi nu i-l precupeţim, dar cel din urmă dintre pedestraşii şi dintre călăreţii lui a fost tot atât de dârz ca şi el.

În ceea ce ne priveşte, toată admiraţia noastră se îndreaptă către soldatul englez. Dacă are cineva dreptul la vreun trofeu, atunci Angliei i se datorează trofeul. Monumentul de la Waterloo ar fi mai nimerit dacă, în locul chipului unui om, s-ar înălţa în văzduh statuia unui popor.

Se ştie că în bătălia de la Inkermann, un sergent care, după cât se pare, scăpase armata de la pieire, n-a putut fi pomenit de către lordul Raglan, deoarece ierarhia militară engleză nu îngăduie să fie citat într-un ordin de zi niciun erou sub gradul de ofiţer. *

Leadership: Calităţile tale sunt compromise datorită conectării la un canal de comandă obscur, într-un context de determinări care produc unghiuri diferite de convergenţă a istoriei cu viaţa trăită prin vulnerabilitate şi curaj?

Ceea ce ne atrage şi pe noi la leadership nu este atât cunoaşterea de ansamblu, hotărâtoare în crearea unei viziuni atotcuprinzătoare, ci capacitatea de a surprinde și de a înțelege ceea ce scapă majorității, ceea ce scapă controlului şi nu poate fi "prevăzut" sau "influenţat".

Aici ne referim la omul singular, factorul constant de putere care lipeşte unui tot unitar, care intimidează desfăşurarea evenimentelor prin însăşi cuprinderea pe care o dă unei formei particulare de progres. El reprezintă un sistem coerent de integrare a unei experienţe de mobilitate și de sacrificiu într-o concepţie nouă despre lume. Iar calităţile lui unice sunt capacitatea de a înţelege adevăratul sens al vieţii şi capacitatea de a transmite celorlalţi tensiunea dramatică a istoriei.

Muribunzii sunt consecinţa unei forme de reacţie curente care afectează mersul lumii. Ei nu sunt asemenea unor comenzi lansate de un utilizator pe care calculatorul le poate interpreta şi executa după un algoritm prestabilit, nu sunt instrucţiunile care se execută la comenzile pe care le dă utilizatorul. Ci reprezintă suportul permanent al corectărilor de erori, *those percentage of replies at the end of some queries* , acele resurse de putere ce determină nivelul de stabilitate al sistemului denumit "fatalitate", hotărând ordinea în care vor fi executate procesele de definitivare a versiunii finale de eroism care rămâne înscris în eternitate.

Morţii nu-şi pot revendica vreo calitate sau vreun privilegiu în marea zonă a "neînsemnatului". Asta reprezintă dovada că reformele iniţiate de lideri lâncezesc, ele scad preţul oricărei izbutiri a omului de a-şi face din faptele sale un model de inspiraţie, făcând nenegociabilă promovarea prestigiului său. Este dovada că forma de leadership adoptată nu duce nici pe departe la ceea ce s-a aştepta: ridicarea nivelului calitativ al Omului la înălţimea unui destin care îşi statorniceşte existenţa şi eternitatea.

Leadership: Poţi să-ţi asumi o viaţă dominată de provocările unui destin care se revarsă în eternitate, extinzându-ţi capacitatea de a avea mai multă grijă de tine însuţi în încercarea de a influenţa evoluţia mersului lumii?

Degeaba eşti la comandă, în extinsa poveste a lumii, în faţa tentativei de cucerire a laurilor, dacă suferi din cauza limitelor construite în jurul unui singur indicator: lipsa de recunoştinţă. Eşti străbătut de sentimentul că eşti stăpân pe un scenariu care nu utilizează valori aferente trecutului sau cel mult prezentului şi care nu este sigur că se vor contura în viitor?

Dacă nu întrepătrunzi din ce în ce mai bine legătura creată cu oamenii, din punct de vedere al recunoştinţei, rezultatele care vor veni în urma acestei unicităţi create nu vor fi niciodată preţuite în sine, ci prin sine. Nepăsarea este uneori o stare de graţie, dar un minus al leadershipului, este calitatea oamenilor slabi.

Asta înseamnă că principalul "canal" de comandă şi control, obscur, pe care îl administrezi prin intermediul leadershipului, nu se conectează la un generator de valori continuu. Este obscur fiindcă este rece, fiindcă nu transformă oamenii în valori, fiindcă este pustiu de orice urmă de recunoştinţă, fiindcă se îndreaptă spre o zonă de câştig din munca altora. Un astfel de leadership este un tărâm al imperfecţiunii care nu valorifică potenţialul oamenilor, este o maladie a indiferenţei faţă de cei pe care pretinzi că-i reprezinţi.

Calităţile tale de lider sunt compromise dacă nu iniţiezi o schimbare fundamentală la nivelul conştiinţei comune, prin care oamenii să nu se simtă derutaţi şi să nu se producă o inversare a scării de valori sau o marginalizare a valorii lor şi, deci, a dimensiunii sensului vieţii. Calităţi precum curajul de a înfrunta un destin potrivnic, puterea de a suferi o tragedie, sau răbdarea de a fi martor la evenimentele de seamă ale lumii, pot avea ecou pe termen lung, în marea istorie a umanităţii.

Ca lider, ţii pe umeri o împărăţie zugrăvită ideal nu din trofeele câştigate de alţii, ci din îmbinarea unicităţii cu potenţialul de a fi măreţ. Oamenii trebuie să fie străbătuţi de cele două sentimente: ca tu ai câştigat datorită lor, şi că ei au câştigat datorită ţie. Numai astfel se întregeşte scenariul win-win care dă măsura corectă leadershipului.

Leadershipul este monumentul eroului necunoscut care a acceptat provocarea de a avea un rol bine determinat în cadrul unei lumi a cărei evoluţie istorică coincide cu perspectiva eternităţii.

Potenţialul nevalorificat al muribunzilor evidenţiază aportul substanţial a celor necunoscuţi la reuşitele unui leadership performant, aplicat ca normă pentru un „contract" încheiat în condiţii de neegalitate, care totuşi se dovedeşte avantajos pe scurt timp, dar fără posibilitatea de a fi validat la cote înalte.

Fiindcă un leadership fără un alai de susţinători a căror merite nu sunt recunoscute şi evocate în orice împrejurare, ajunge în final să nu mai conteze sau să se destabilizeze.

*** Notă:** Victor Hugo - Mizerabilii (Cartea întâi - Waterloo);

Poţi să priveşti prin mine datorită iubirii mele

On Decembrie 18, 2012

Fii stăpân pe propriul destin și aspiră mereu către ideea de libertate deplină, pentru a dobândi puterea care îţi poate vindeca sufletul.

— Nu ! Mergi mai repede ! Aşa de repede, încât să ne simţim ca arborii prin care suflă vântul. Cum alungă noaptea trecutul ! Mă simt pătrunsă de dragoste. Poţi să priveşti prin mine datorită iubirii mele. Te iubesc aşa de mult, încât sufletul meu se revarsă asemenea unei femei dintr-un lan de grâu, în faţa bărbatului care o priveşte. Sufletul meu vrea să zacă întins pe pământ. Ar vrea să stea culcat şi să zboare. Într-o livadă. E trist. Se-ndrăgosteşte de tine când conduci. Să nu ne mai întoarcem la Paris. Să furăm o casetă cu bijuterii sau să spargem o bancă, să luăm maşina asta şi să nu ne mai întoarcem niciodată.

Ravic opri în faţa unui mic han. Zgomotul motorului se stinse şi din depărtare se auzi, deodată, răsuflarea adâncă a mării.

— Vino, spuse el. Putem lua un calvados aici. Cât ai băut până acum?

— Prea mult. Din cauza ta. Afară de asta, la un moment dat n-am mai putut asculta bâlbâiala idioţilor acelora.

Leadership: Însuși actul de a trăi putea fi catalizatorul unei profunde introspecții, dezvăluind că existența ta este revelaţia unei conştiinţe în continuă devenire?

— De ce n-ai venit atunci la mine?

— Am venit. Viața nu așteaptă pe nimeni, avansând neîncetat. Existe o împărtășire totală a sinelui, fără secrete, permițându-ți să mă cunoști în totalitate prin forța iubirii.

— Da. Când ai crezut c-am să plec. Ai mâncat ceva?

— Nu prea mult. Mi-e foame. Ai câştigat?

— Da.

— Atunci să mergem la cel mai luxos restaurant şi să mâncăm icre negre, să bem şampanie, să fim aşa cum erau părinţii noştri înainte de toate războaiele astea, fără griji, sentimentali şi fără temeri, fără refulări şi plini de prost-gust, cu lacrimi, lună, oleandri, viori, şi ocean şi dragoste. Şi aş vrea să-mi închipui că avem copii, o grădină, o casă, că vom avea un paşaport şi un viitor, că am renunţat la o carieră strălucită pentru tine, că ne vom iubi în linişte chiar şi după douăzeci de ani, că eşti gelos şi că încă mă mai crezi frumoasă, că nu pot s-adorm când nu vii o noapte acasă, şi...

Leadershipul are la bază următoarea premisă: "fiecare moment petrecut împreună poate fi o oportunitate de a experimenta transformarea continuă a unei conștiințe supreme".

Această premisă sugerează că trebuie să acorzi o importanță profundă momentului prezent, că trebuie să vezi fiecare interacțiune ca pe o ocazie de creștere, învățare și transformare la un nivel profund de conștiință, că trebuie să recunoşti importanța dezvoltării unei "conștiințe supreme" - stare de cunoaștere profundă, înțelepciune, claritate și integrare interioară.

Poți să privești prin mine datorită iubirii mele dacă iubirea este atât de profundă și autentică încât creează o legătură transparentă și o conexiune de suflet între noi. Deschide-te complet în fața celuilalt, fără bariere sau ascunzișuri, permițându-i să-ţi vadă esența cea mai pură. Există o încredere totală și o acceptare necondiționată între voi, care te lasă să pătrunzi dincolo de aparențe?

*** Nota:** Erich, Maria Remarque - *Arcul de triumf*, Editura Galaxis, 1992.

Povara de pe umerii liderului

On Martie 22, 2009

Fă-ţi credibilă manifestarea propriei tale individualităţi şi a caracterului pe care ţi-l asumi, pentru ca potenţialul tău să atingă un punct maxim al calităţii.

Se povesteşte că Ginghis Han a rămas descumpănit când a aflat că unul dintre oştenii lui îl omorâse pe Taichar, fratele rivalului său Jamukha, după ce acesta a încercat să-i fure caii. Existau doar două modalităţi de a rezolva problema: ori îl trimitea pe acel oştean la Jamukha, ceea ce însemna automat condamnarea lui la moarte, ori îl păstra, ceea ce fără îndoială ar fi generat într-un mare conflict.

Ginghis Han l-a păstrat pe oşteanul care, făcându-şi datoria l-a omorât pe hoţ şi astfel a declanşat războiul din anul 1206 care a schimbat pentru totdeauna faţa istoriei. Faptul că şi-a pus viaţa în pericol pentru un singur oştean, Ginghis Han a dovedit o loialitate deosebită, şi totodată că este un conducător bun care ştie să-i preţuiască pe cei care îşi fac datoria în serviciul său.

Leadership: Eşti dispus să trăieşti o realitate în care să poţi trece dincolo de tine, creându-ţi o experienţă de tip "expunere îndelungată la înălţime" care să-ţi schimbe acel punct de sprijin pe care se susţine un destin de legendă?

Ca lider, răspunderea pe care o ai faţă de oamenii loiali este ca mersul pe sârmă la mare înălţime: la început conştientizezi doar pericolul căderii în gol şi încerci să eviţi o catastrofă, apoi prinzi curaj şi înaintezi împotriva riscului fiindcă realizezi că ai de îndeplinit un destin din care ţâşneşte imaginea unui erou de legendă.

Un destin de legendă, căci nu există nicio cale spre gloria veşnică care să nu pornească de la om, stă în întemeierea adevărului credinţei în fapte remarcabile. Eroul de care tot mereu aminteşte istoria n-a apărut ca purtător a conştiinţei divine sau a unui scop religios-moral care să treacă drept ultimă expresie al unei lupte culminante, ci mai cu seamă se distinge în urma unor încercări grele sortite eşecului care s-au finalizat cu un succes neaşteptat şi totodată colosal.

Oamenii care te urmează se simt inspirați de evenimentele incredibile produse în jurul unei încercări periculoase de a ajunge în vârful celui mai înalt munte din lume, iar de acolo să execuţi un salt care te aduce mai repede decât te aștepți la atingerea unui scop imposibil.

Leadershipul este actul urcușului spre nemăsurat, urmat de efectul căzăturii în gol care se constituie într-un miracol.

Situaţia tensionată din spatele unei încercări eşuate trebuie să creeze forme noi de a continua o acţiune cu mai mult avânt şi curaj. Sau cum spunea scriitorul român Mihail Drumeş: *"Dacă lucrurile nu merg aşa cum vrei tu, încearcă să-ţi duci viaţă mai departe alături de visul tău. Şi pentru că n-ai încotro, trebuie să zbori, mereu să zbori, parcă numai spre a-ţi aduce aminte că eşti în viaţă şi că n-ai părăsit lupta cu circumstanţele potrivnice spiritului tău."*

Trebuie să te gândeşti că succesul tău pe termen lung se datorează în cea mai mare măsură modului în care oamenii pe care îi conduci îşi fac treaba, iar dacă nu eşti atent la strădaniile lor şi nu te interesezi câtuşi de puţin soarta lor, atunci probabil că nici lor nu le va păsa prea

tare de tine, de acţiunile pe care doreşti să le întreprinzi, de planurile de viitor pe care ţi le-ai făcut.

Ce crezi că vor crede oamenii despre tine dacă nu eşti capabil să iei hotărâri ferme în momentele cele mai grele? Ce vor crede ei dacă nu eşti în stare să te implici în rezolvarea problemelor lor? Mai mult ca sigur, ei îşi vor forma imediat o părere proastă despre tine şi vor căuta să-şi schimbe locul de muncă şi liderul cât mai repede posibil.

Aşa cum evaluarea corectă a unui om nu este dată de notele obţinute la şcoală, ci mai degrabă de ceea ce a fost el capabil să realizeze în viaţă, tot astfel potenţialul tău de lider nu va atinge un punct maxim al calităţii doar dacă legi legături cu oamenii, ci mai degrabă dacă îţi faci credibilă, prin idei, convingeri şi valori, manifestarea propriei tale individualităţi şi a caracterului pe care ţi-l asumi.

Dacă vrei să-ţi dezvolţi potenţialul şi să-ţi ridici nivelul de leadership învaţă să dansezi în ritmul tău şi al celor din jur, aşa cum simţi tu, dar şi aşa după cum simt ei – astfel încât să-i convingi că eşti interesat de menţinerea unei relaţii de durată. Fii credibil în ochii lor. Restul vine de la sine.

Leadership: Îţi cotezi anticiparea biruinţei la un nivel destul de ridicat de conştientizare a valorii personale, folosind efectele circumstanțelor potrivnice la creșterea impactului vizual al "căzăturii" cu adevărat miraculoase?

Acceptarea şi îndeplinirea unui destin de legenda nu constă în înlăturarea acelor efecte ale actului care sunt potrivnice cererilor indispensabile ale circumstanțelor de timp şi de loc, ci în zămislirea unui drum pe care nu poate ajunge nimeni. O căzătură miraculoasă este ca o piedică pe un drum cu sens unic, dar pentru cei care vin din direcţia opusă.

Cine se află la conducere trebuie să facă mai mult decât să îndrume oamenii în direcţia cea mai bună. Trebuie să îşi asume responsabilitatea pentru fiecare dintre ei (cât timp sunt în subordinea lui), pentru orice greşeală pe care o fac, şi să nu uite că modul în care se implică în rezolvarea problemelor, deciziile pe care le ia de-a lungul timpului, îl afectează în mod direct în primul rând pe el.

Relaţia dintre manager şi angajat este foarte importantă şi constituie baza succesului unei companii. Managerul care nu ştie să menţină o relaţie strânsă cu angajaţii, care nu reuşeşte să le câştige respectul şi susţinerea pe termen lung va avea întotdeauna de pierdut. Nu-i de mirare că mulţi dintre managerii marilor companii apelează la ajutor extern pentru a menţine dezvoltarea eficientă a companiei. Şi aceasta este o metodă bună - dacă nu ai aptitudini de lider găseşte pe cineva care are şi este dispus să-ţi ţină locul când vine vorba de motivarea angajaţilor şi îmbunătăţirea relaţiilor cu ei. Dar în acest fel rişti să-ţi pierzi puterea de influenţă.

Trăsătura definitorie pe care vrei ca oamenii s-o identifice la tine este biruinţa temerarului explorator de noi graniţe şi noi orizonturi, care întrece orice aşteptare?

Concluzie: Un conducător poartă o mare povară pe umeri, povara responsabilităţii şi a consecinţelor deciziilor individuale. El trebuie să ia deciziile cele mai grele şi să fie loial celor pe care îi conduce. Iar dacă vrea să-şi menţină poziţia, atunci trebuie să fie capabil să le insufle oamenilor încredere, să-i susţină moral în clipele cele mai grele şi să-şi asume responsabilitatea pentru faptele lor (atâta timp cât acestea vin în sprijinul său).

Povestea nesfârşită a unui artist într-o proiecţie astrală

On Septembrie 24, 2018

Încearcă să gândeşti o estetică pură a trăirii personale, transformându-te prin intermediul unui mesaj vizual într-o conştiinţă universală.

Mă simt târât de curentul unei înalte energii ascunse într-un vis al eternităţii posibile, o lume total diferită de lumea muritorilor de rând, şi nu pot face nimic ca să opresc timpul prea mult într-un singur loc. Cel mai de preţ lucru pe care îl am la îndemână este sfârşitul unei perioade de viaţă, sau ceva aproape de el, provocat de făurirea plastică a unei imagini care se vrea a fi capabilă să încorporeze şi să conjuge materia universală cu memoria şi conştiinţa de sine.

E un sfârşit oarecare, un mijloc de a mă raporta la orizontul timpului privindu-l ca pe o suspendare temporală a legilor divine, baza lucrării unui univers tainic care nu-şi permite luxul de a lăsa muritorilor putinţa de a-l înţelege pe deplin.

Eternitatea este retrăirea continuă a vieţii din alte ipostaze. Zeii au hotărât să rescrie intriga poveştii mele cu alte ilustraţii şi alte destinaţii, ca într-o capodoperă de ficţiune literară, dincolo de dimensiunea unei suferinţe asumate nostalgic. Dincolo de intensitatea de moment a trăirilor pline de fineţe, a înflăcărării neaşteptate şi a frumuseţii trecătoare experimentate de un artist care gândeşte înalt şi simte profund.

Cele mai multe acţiuni şi reacţiuni, conduse de elementul primordial numit "simţire", mult mai presus decât raţiunea, ar fi putut să provoace o fisură în structura de monolit a naraţiunii care mă înfăţişează mereu la o altă vârstă. Nu s-a întâmplat nicio schimbare în raţiunea universului.

Marea şansă de a înţelege universul se poate realiza prin punerea în text a unei lumi fantastice, prin încadrarea mea temporară în imaginarea neîntreruptă a unei lumi reale. Bineînţeles, este şi asta tot o iluzie, o acceptare a provocării de a fi parte dintr-un experiment inedit, acela de a face turul labirintic al unui vis prelungit care te pune în faţa unei expresivităţi a sublimului.

Leadership: Poţi să te constitui ca o creaţie uşurată de un alibi sufletesc care se conturează în urma impactului cu o existenţă efemeră, cu deschidere către timpul de prestare a unei personalizări de imagine care ia forma unei determinări a destinului?

Anul 1567. Luna se zărea ca prin ceaţă. Încăperea era plină de un miros pătrunzător de ulei. Tabloul lui Tiţian trebuia să opereze o reconversiune a cuvintelor în imagine. Self-Portrait părea imaginat din cuvintele "bătrâneţe plină de demnitate". Prezenţa pensulei reprezenta elementul care dădea legitimitate statutului său de reper fundamental al picturii fără artificialitate.

Ceea ce face dintr-un tablou o adevărată poezie este tocmai imaginea angelică a unui om trecut parcă prin contextul unui sistem de credinţă inaccesibil muritorilor de rând, învrednicit de revelarea vieţii veşnice prin întruparea în temporalitate.

Ar fi fost cu adevărat trist să fiu în locul lui Tiţian, să ating perfecțiunea viciată de nostalgia unei lumi imposibil de pătruns, dar am dorit să petrec o clipă lângă el numai pentru a-i transmite salutările mele, felicitările universului. O poetică de ingeniozitate poate să domine actul de comunicare cu puterile spirituale ale universului numai dacă atmosfera şi

expresivitatea tabloului îndeplinesc cerinţele unei opere literare.

Imaginaţia lui era un țesut viu care se refăcea constant din orice bucată a întregului numit "Lumea Mea", întâmplător decis chiar în miezul compoziţiei, asigurând dimensiunile creaţiei cu subiectivismul unei certitudini de sine asumate prin utilizarea cunoaşterii venită din alt Univers.

Cu multă admiraţie, îl priveam ca pe un exemplu privilegiat de glorie ce se răsfrângea asupra întregii lumi, atâta căldură şi simţire emoţionantă se afla între el şi autoportretul său, mai sincer şi mai apropiat sufletului meu decât năzuinţele necugetate şi nemăsurate spre frumuseţile vieţii.

Am privit nu doar Self-Portrait, ci şi schiţele şi rupturile încercărilor precedente. Era atâta amărăciune în ele, dezgust faţă de imposibilitatea de a atinge desăvârşirea. Subiectul era bine încifrat în formula unei proze poetice trăită doar la persoana întâi, părând totuşi să reveleze sensul unei arte deschise la interpretare.

Destinului artistului, imortalizat prin mijloacele artei în culori apăsătoare, într-un spaţiu plin de încărcătură istorică și emoțională, părea a fi o predestinare spre mântuire, nu spre pierzanie.

Leadership: Te poţi gândi la tine ca la un dublu al tău prin accentuarea efectului de multiplicare a imaginii de sine într-un timp şi spaţiu adecvat preferinţelor de gândire a unei estetici pure?

Cu mare bucurie i-am oferit părerea mea vizavi de interpretarea moralizatoare tradusă de vizualul unui spectator static. Nu aveam de unde să ştiu ce efect hotărâtor va avea mica mea intervenţie în spaţiul său de reflecţie. Certitudinea vizuală tematizată de el cuprindea o stare de imensă mulţumire, ca atunci când îţi accepţi vârsta înaintată şi îţi permiţi să redai charisma unei existenţe din care rezultă un soi de prestigiu deosebit în faţa forţelor ineluctabile ale timpului.

Tiţian a rămas surprins de punctul meu de vedere, cu atât mai mult cu cât îmi dădeam seama că mă percepea ca o dezlegare a unei enigme pe care nu fusese în stare s-o rezolve la timpul său. O necunoscută în marea ecuaţie a unei libertăţi de expresie ce ţine seama de nişte reguli sfinte nescrise şi care i se oferea în dar ca privilegiu acordat sacrificiului de a considera bătrâneţea numai din punct de vedere cronologic, ca o variabilă goală.

Bătrâneţea, chiar în mijlocul supărărilor, este o raritate de mare preţ, având un farmec al ei izvorât din vitalitatea unei arte condiţionată de credinţă, din căldura apăsătoare a unei poveşti fără vârstă traversată de forţa explozivă a nuanţelor profunde de negru și maro bogat. De aici am tras concluzia că nu-i de ajuns să închipuieşti arta doar sub forma unui model de om exemplar, ci mai important este să treci prin marea aventură a eliberării individului din contextul care îl împovărează.

A gândi o estetică pură înseamnă să te transformi cu ajutorul culorilor, formelor şi a relaţiilor dintre ele, deci prin intermediul mesajului vizual, într-o poveste, într-un vis, într-o conştiinţă universală.

Leadership: Poţi să schimbi impresia intensă a unui episod deja trăit în termeni de "efect de contribuţie", fără să fii constrâns de anumite termene limită să încremeneşti într-un tipar existenţial care înseamnă doar supravieţuire?

Chipul portretului său, luminat de nişte culori pale, radia o anumită căldură internă încărcată cu provocări ale învăţăturilor vieţii, formând armonia sufletului unui artist care şi-a atins scopul străduinţelor sale. Dar exista totuşi o anumită rigoare în aparenta sa blândeţe care parcă indica o anumită prioritate în utilizarea timpului, o anumită înclinaţie spre compromis, spre singurătate, spre culorile sumbre ale vieţii.

Vorbele sale, rămânând în istorie, îl vor salva de la orice aparenţe: *"It is not bright colors but good drawing that makes figures beautiful."*

Am cerut o clipă cât un vis, iar universul mi-a dat o veşnicie. Cu efect de contribuţie, am intrat într-o lume care şi-a dezvăluit secretele în faţa nemuririi pe măsură ce-am înaintat în jocul plin de sugestii a realităţii încadrată într-un tablou ce-şi poartă privitorii prin labirinturile unei minţi ferită de „păcatul" divertismentului exclusivist.

Departe de regrete, am înţeles şi am admirat splendoarea artei unui om desăvârşit. Este calmul dinaintea morţii, prevăzut în termenii de raportare la un univers fără margini.

Triumful Leadershipului este elogiul adus unei personalităţi marcante care durează doar o clipă, dar rămâne păstrat în veşnicie.

Povestea nesfârşită a unui artist într-o proiecţie astrală surprinde liniştea sufletească a artistului care a învins trecerea timpului prin măsura unui spaţiu parcurs de la profunzime la grandoare.

Înainte de a-i părăsi atelierul, Tiţian mi-a spus un lucru care va rămâne în istorie: *"Pictura făcută sub presiune de către artiștii fără talentul necesar nu poate da naștere decât la lipsa formei, deoarece pictura este o profesie care necesită pacea minții."*

Povestea neştiută a creaţiei mele

On Noiembrie 06, 2020

Concentrează-te asupra unei perspective ample şi nuanţate legate de o experienţă artistică de înaltă calitate, propulsându-ţi creaţia într-o dimensiune a cunoaşterii care îţi poate valida personalitatea inconfundabilă.

O imagine interesantă legată de stilou şi de pensulă este reprezentată de un magician situat pe alt plan de existenţă care, cel mai probabil îşi ascunde secretele de ochii curioşilor. Îl vedem îmbrăcat într-un frac închis la culoare, părând a avea o înfăţişare de vis, într-o manieră transparentă, înconjurat de stele şi numere, încercând parcă să găsească explicaţiile unui fenomen de *interpretatio* a simbolului universal, în care sunt puse faţă în faţă lumina divină şi cosmică, sondând cu rigoare magistrală un adevărat univers al semnelor.

Magicianul pare să aibă nu doar darul de a ghici în viitor, în stele şi în semne, ci şi darul de a scrie destinele oamenilor în acelaşi fel în care pensula artistului surprinde în mod vizual orice detaliu la ființele pe care le pune în prim planul unei scene extrapolată din pluralitatea lumilor oferite de bogatul univers artistic. Este important să înțelegem nu doar mesajul unei opere de artă, format dintr-o singură imagine mare în care e pus tot conţinutul simbolic, ci și modul de aplicare a culorilor, retuşarea tonalităţii, pentru a obține expresivități plastice.

Ca să te exprimi nu doar prin cuvinte, și prin imagini artistice, trebuie să adopţi o scriere cu caracter confesional, profund subiectiv. De exemplu, dacă într-o pictură plină de simboluri eu mi-aş reflecta starea de spirit în imaginea unui magician, ca şi când aş descifra splendoarea puterilor stelare, atunci stiloul şi pensula, în speranţa de a atinge o Conştiinţă de Sine comună, ar trebui să-şi procure nişte elemente de personalitate şi astfel să transcendă puterea de concepţie umană.

Pe această cale, pensula poate să-mi ofere posibilităţi infinite de expresie vizuală în acelaşi tipar de transmitere a unei învăţături noi, numai dacă îmi păstrez acea seninătate a fiinţei conştiente de starea sa de iluminare spirituală, la fel cum un om care se bucură de graţia divină este capabil să guverneze stelele. În formele sale sublimate, scrisul meu poate evoca experienţa pensulei de a da culoare unui univers plin de mister, farmec, sensibilitate şi poezie, devenind stăpânul timpului spiritual, simbol al întrupării perenităţii.

Leadership: Poţi să dai sens unei experienţe de cunoaştere într-un moment de revelaţie în care trebuie să redai imaginea unei noi dimensiuni a personalităţii tale cu rigoarea unei noi perspective de receptare a realităţii?

Astfel am ajuns la cauza supremă a tuturor lucrurilor, din care se trag toate formele şi gradele diferite de putere spirituală, pentru că stiloul şi pensula şi-au preparat posibilităţi infinite de a călători în lumea imaginaţiei mele, ajungând printr-o reacţie de revelaţie divină să se transforme într-o baghetă şi, respectiv, într-o pelerină. Impulsul lor instinctiv de a se cufunda într-un univers al purităţii amețitoare, atât de personală pendulare între real şi fantastic, dau speranţa colosală de a ajunge la formarea unei conştiinţe de sine comună.

Mai mult. În operaţiunile stiloului, de a scrie cât mai artistic o epopee a minţii mele, este descrisă şi imaginea pensulei când urcă în prima fază a Leului. Stiloul înfăţişează puterea pensulei de a prezenta realitatea printr-un rege încoronat, stând impunător pe un scaun de domnie, făcut din smarald, îmbrăcat în haine de culoarea şofranului. Se spune că dacă această imagine face înconjurul lumii în 40 de ore, atunci stiloul şi-a îndeplinit cu prisosinţă rolul cuvenit scripturii, acela de a gândi ca un magician ce are puterea de a aduce fanteziile la viaţă.

Da, am ştiut dintotdeauna că sunt un magician, că sunt un stilou şi o pensulă în acelaşi timp, în sensul că tot ce mintea-mi plăsmuieşte cu graţie, cu măiestrie, cu farmec, poate evoca o întreagă experienţă a spaţiului pictural, redând iluzia vizibilului. Nici n-aş fi putut să scriu despre artă fără să pricep fenomenul desprinderii corpului astral de cel fizic. Sunt, aşadar, contopirea mai multor expresii ale aceleiaşi cunoaşteri care aparţine divinului. Sunt numitorul comun ale aceleiaşi energii obţinută printr-o reacţie de dublu schimb, fie sub formă naturală, fie sub formă artistică.

Leadership: Cum se derulează procesul recunoaşterii unei reprezentări artistice privind interpretarea unei imagini vizuale, confruntând ceea ce vede cu ceea ştie despre un lucru care nu este numai un quantum, ci în acelaşi timp un magnum?

Aşa cum am arătat în multe locuri, sunt un magician fiindcă am o existenţă materială şi o existenţă imaterială. De fapt, nu este posibil să mă reprezinte nimeni în complexitatea mea, nimeni în afară de mine. Sigur că, din acest punct de vedere, dimensiunea cunoaşterii mele are ca punct de referinţă o viziune constructivă asupra conceptului de experienţă estetică, asociat cu renaşterea unei opere care n-a murit niciodată, deoarece sunt flexibil cu ceea ce vine şi apreciez momentele prezente.

Aşadar, stiloul sau pensula nu sunt doar un quantum, ci în acelaşi timp un magnum, pentru că fiecare din ele reprezintă un agent generator de inspiraţie, şi cu ajutorul unui asemenea agent se pot obţine o sumedenie de lucrări artistice.

Aşa este. Personalitatea mea este inconfundabilă deoarece stiloul şi pensula duc la îndeplinire, numai prin puterile mele şi printr-o încredere spontană în ajutorul Celui de Sus, acea mare cerinţă a unei opere de artă: trebuie să fie în întregime concepută și modelată de minte înainte de a fi executată. Prin urmare, perspectiva mea de receptare a realităţii evidenţiază o anumită dependenţă de creaţie care se transmite printr-un accesoriu indispensabil artei (stiloul sau pensula), exprimând o anumită stare sufletească şi o forţă intelectuală care se manifestă în tendinţa de a căuta noul cu orice preţ, tendinţa de a surprinde rapid metamorfozele din natură, tendinţa de a amplifica redarea frumuseții naturii.

Scrisul este o meditație asupra veridicității artei mele.

Cât despre experienţa mea de cunoaştere care din loc în loc îşi spune cuvântul, chiar dacă cititorul nu este întru totul familiarizat cu formulările mele pline de spirit, ea este în plin acord cu principiul raţiunii suficiente care spune că gândirea se autodirijează prin intermediul operaţiilor ei specifice cu noţiuni (generalizare, abstractizare, analiza, sinteză, comparaţie etc.) spre emiterea unor adevăruri ce s-ar putea dovedi vitale pentru teoria picturii şi asigurarea unei reuşite plastice demne de toată laudă.

O lucrare artistică, integrată în spaţiul leadershipului, trebuie să fie congruentă cu veridicitatea unui mesaj de tipul: "să apreciem fiecare imagine creată cu artă, la fel cum apreciem o viziune menită să fie atât de longevivă şi de consecventă cu sine."

Povestea neştiută a creaţiei mele începe cu un stilou fermecat care se transformă în mesagerul unei pensule plină de viaţă și tare visătoare, cu ajutorul însuşirii mele de a reface un întreg univers artistic printr-o acumulare (aproape lacomă) de alte ipostaze: sunt când pictor, când magician, când scriitor, un sfânt sau un om de ştiinţă. De fapt, sunt orice vreau eu să fiu, cu precizarea că orice sunt se poate focaliza spre infinit în orizontul tainelor, al credinţei şi al minunilor.

Povestea statuii de marmură şi a plăcii de marmură

On Iunie 25, 2010

Învaţă să-ţi pui în evidenţă calităţile, fără a le devaloriza pe ale celorlalţi.

În mijlocul unui oraș frumos, a existat un muzeu amenajat cu plăci frumoase de marmură și cu o statuie uriașă de marmură ca parte principală a expoziției. Mulți oameni din întreaga lume au vizitat muzeul în fiecare zi și au admirat statuia frumos lucrată. Într-o noapte, plăcile de marmură au început să vorbească cu statuia de marmură.

Placa de marmură: Hei statuie, aşa-i că nu este corect ca toată lumea din întreaga lume să vină până aici să te admire, în timp ce pe mine mă ignoră și mă calcă în picioare?

Statuia de marmură: Draga mea placă de marmură, nu-ți amintești că suntem de fapt din aceeași carieră?

Placa de marmură: Da ! Tocmai de aceea simt că este și mai nedrept. Amândoi ne tragem din aceeași carieră și totuși lumea ne tratează atât de diferit acum. Este atât de nedrept !

Leadership: Poţi să trăieşti cu consecinţa angajării unei forme de răspundere care nu implică forța de constrângere în cazul opunerii la o "modelare" necesară unei lucrări de bună calitate?

Statuia de marmură: Da, ai dreptate draga mea. Dar, mai ții minte ziua în care sculptorul a încercat să lucreze la tine, dar tu ai rezistat instrumentelor lui?

Placa de marmură: Da, îl disprețuiesc pe tipul ăsta. Cum a putut să folosească acele instrumente urâte asupra mea?

Statuia de marmură: Ei bine, din moment ce nu ai rezistat instrumentelor lui, el nu a putut lucra cu tine. Când a decis să renunțe la tine, a început să lucreze la mine. Am știut imediat că voi fi ceva diferit și unic după eforturile lui. Am îndurat toate instrumentele pe care le-a folosit asupra mea și i-am permis să mă modeleze așa cum a vrut !

Placa marmură: Dar acele instrumente erau atât de dureroase.

Statuia de marmură: Draga mea, există un preț pentru orice în viață. Din moment ce ai decis să rezişti și ai renunțat la jumătatea drumului, nu poți da vina pe nimeni care te calcă acum !

Celelalte plăci de marmură ascultau în tăcere cuvintele surorii lor. Şi au început să reflecteze asupra ei.

Morala este următoarea: Cu cât loviturile prin care treci în viață sunt mai dureroase, cu atât înveți mai mult și le vei folosi în viitor ! Nu te lăsa descurajat de eșecuri şi greutăţi ! Continuă să încerci să fii mai bun.

Leadershipul este urmarea certitudinii că toată munca ta de cizelare a meritat. Reprezintă

încordarea voluntară a puterilor fizice sau psihice ale organismului în vederea realizării unui randament superior celui obişnuit, în sfera unui interes major: acela de a construi o capodoperă, ridicându-te pe culmile desăvârşirii.

Povestea statuii de marmură şi a plăcii de marmură scoate în evidenţă acea parte a spiritualităţii care se ocupă cu regulile şi cu eforturile ce duc pe om de la prima treaptă a urcuşului spre desăvârşire, până la unirea cu Dumnezeu. Totodată, povestea indică partea activă a vieţii spirituale, partea de cooperare pe care Dumnezeu ţi-o cere, silinţele şi sacrificiile ce se cer din partea ta ca să ajungi la acea măreţie a lucrării pe care Dumnezeu vrea s-o împlinească.

Povestea unei perpetue deveniri

On Iulie 30, 2017

Ceea ce niciodată nu se uită stă cuprins într-o anexă, parte integrantă a traseului parcurs prin diversitatea sa, acelaşi traseu imaginat de un Zeu, trăit de un alchimist, iubit de un filosof, încredinţat unui explorator și condus cu forța hazardului.

Trăiam dintr-un exces nemăsurat de luare aminte, between "remember your own faults" and responses of "don't know", în totalitatea descrierii unui tablou nocturn al vieţii, la fel cum prințul Ludovic Filip îşi plămădea personalitatea din schimbarea împrejurărilor excepţionale şi nefavorabile prin care trecea patria lui.

Totul părea desprins dintr-o călăuzire non-materială de afară, a celor ce se văd, dar nu se pot cunoaşte, în misterul infinit al diferenţelor lor, în lăuntrul ascuns al făptuirilor de neînţeles de care gândurile pline de îndoială se agăţau cu încăpăţânare. Ca şi când m-aş fi cufundat într-un spaţiu etern, orice aş fi ales, întuneric sau lumină, tot în același loc aş fi ajuns, unde bătăile de inimă nu sunt auzite, dar simţite şi împărtăşite cu precizia unui ecou care se răsfrânge peste lume.

Însumând toate cele încercate și testate până atunci, chiar dacă nu am fost tot timpul conştient de absurditatea eforturilor mele, ceea ce poate constitui o taină pentru orice om nefamiliarizat cu formulele de experimentare a marii cunoaşteri, se obține o nouă imagine despre artă: prim planul unui prezent etern. Destul loc în care să-mi adăpostesc mintea și constanta ei nevoie de a "deveni" ceva.

Din necesitate, ştiam prea bine că există și alte bunuri care constituie fericirea, precum pasiunea pentru artă și interesul acordat „laboratorului de ştiinţe", reunite în universul unui creator de geniu. Dar numai unul singur se perpetuează în ciuda faptului că nu epuizează întregul conţinut al Marii Opere, lăsând la o parte orice demers filosofic: profunzimea conştiinţei în care toate lucrurile se întâlnesc într-o aceeaşi unică realitate.

Leadership: Răspunsurile "Ştiu" sau "Nu știu" cu privire la efectele secundare ale consumului de „luare aminte" pot fi considerate incorecte în ecuația obişnuinţei de a le retrăi?

Erorile unui înţelept din care se poate desprinde un sens profund, din care fac parte confuziile unei memorii neexperimentate sau ezitările unei conştiinţe legate de timp, se exprimă printr-un sentiment sfânt în faţa necunoscutului, făcând ca toate să capete o rezonanţă copleşitoare, aproape letală.

Arta de a privi totul în mai multe dimensiuni simultane, *a trick of a mind stretched by new experiences* , este un simptom al unei obişnuinţe adânc înrădăcinate în mine: de a privi lucrurile contra curentului, în alt fel decât am crezut că le știu. Să retrăiesc tot, prin ce-am trecut, regretele și aspiraţiile, îmi dă răgazul să mă gândesc la mine ca la "Cei Trei Prinţi din Serendip": când călătoream nu încetam să descopăr, accidental sau prin isteţime, lucruri pe care nu le căutam. „Nu ştiu" s-a transformat aproape peste noapte într-un binemeritat „Ştiu".

Victor Hugo, căruia viața i-a comunicat alte înţelesuri decât oamenilor de rând, s-a făcut auzit după prima cotitură a filosofiei, cea adevărată: *„Dumnezeu arată oamenilor vrerile lui vădindu-le în evenimente, texte obscure, scrise într-o limbă misterioasă. Oamenii le traduc pe loc. Traduceri grăbite, incorecte, pline de greșeli, de lipsuri și de contraziceri. Foarte puține spirite pricep limba divină. Cel mai pătrunzători, cei mai potoliţi, cei mai adânci descifrează*

încet, și când ajung la capătul textului lor, treaba e desăvârşită de mult."

Necontenit, păream încărcat de acea predestinare a omului mândru care niciodată nu ar pleca capul în faţa ascuţitei săbii a legilor nescrise, aproape tot atât de impersonale ca judecata lui Dumnezeu căruia parcă îi lipsea toată emoţia. Concluziile experienţelor personale se desprindeau din impactul originalului pe care credeau că l-au deprins și alchimiştii, și înţelepţii sau exploratorii în călătoriile lor lungi în necunoscut, fiind mai mult o chestiune de curaj, o ultimă clasificare a factorilor pulsionali, între revelaţia divină şi inspiraţia artistică. Toate îşi au baza în bruscarea legăturii secrete cu ceea ce presupune să fii realmente virtuos.

Virtutea cea mai importantă pe care trebuie să o dobândeşti este un fel de înfrângere temporară în faţa păcatului metafizic, din care capeţi puterea de a te opune celor deja cunoscute.

Căpitanul Sinbad și echipajul său găsesc o tabletă de aur care îl conduce către un practicant malefic de magie neagră, prințul Koura. Sinbad se întâlnește cu Vizirul care are cealaltă parte a tabletei, formând harta unei comori de neimaginat: tinerețe veșnică, scutul întunericului și o coroană a bogățiilor nespuse. Împreună cu Vizirul, Sinbad și echipajul său pleacă peste mări în căutarea comorii.

În fiecare timp există oameni care înoată împotriva cursului apei, dar și oameni care sunt conduși de un fir misterios, care se numește: imprevizibil. Reuşita ca o întâlnire întâmplătoare. Hazardul integrat operei de artă - divină. Cauți un lucru și găsești altul. Mergi într-o direcție, și în mod ciudat ești condus în alta. Nu poţi deosebi descoperirea de ceea ce ai căutat efectiv.

Să-mi asum riscul privirii dincolo de marele ocean al interiorităţii divine, care ordonează fapta triumfătoare şi raporturile omului cu lumea dincolo de graniţele efortului minim necesar al inspiraţiei moralizatoare, însemna să mă adâncesc în desăvârşirea lucrării de care are nevoie înălţimea înţelepciunii, sfidând proiecţia acelei Energii sau Voinţe de a fi, care, după Schopenhauer, se manifestă fără scop şi fără raţiune.

A fi un om al deprinderii lecţiilor de viaţă, aidoma unui alchimist aflat în căutarea tinereţii veşnice, înseamnă să te adânceşti în întregime în împlinirea ta, dulce şi dureroasă totodată, care porneşte de la o ignorare continuă a semnalelor de alarmă trimise de spiritul universal şi se continuă cu lupta împotriva unui sine care nu se lasă înţeles, nu se dă învins în faţa orizonturilor etern misterioase ale lumii.

Adevărata măreție este să te menţii într-un prezent care își protejează trecutul asigurându-i „traducerea" corectă, o interpretare conformă cu o voință mai mare și mai înţeleaptă decât a ta.

Povestea unei perpetue deveniri, adevărata capodoperă a punerii în relaţie a două sau mai multe judecăţi pentru a obţine o alta nouă, între puncte originare şi momente finale, în analiza personajelor trasate din linii fine, este o eroare exilată în eternitate. Tot aşa cum a construi un glob de cristal înseamnă a pune în funcţiune o lume imaginară în care cineva a aşezat soarele pe cer.

Ceea ce niciodată nu se uită stă cuprins într-o anexă, parte integrantă a traseului parcurs prin diversitatea sa, acelaşi traseu imaginat de un Zeu, trăit de un alchimist, iubit de un filosof, încredinţat unui explorator și condus cu forța hazardului.

Prăpastia lui Boris Elţîn

On Martie 27, 2009

Modul în care tratezi schimbarea influenţează gradul în care o controlezi.

În cartea " *Dezvoltă liderii din jurul tău* ", expertul în materie de leadership John Maxwell aminteşte despre un incident petrecut în Rusia în timpul unei lovituri de stat. Tancurile armatei înconjuraseră clădirea guvernului care îl adăpostea pe Preşedintele Boris Elţîn şi pe suporterii săi pentru democraţie. Liderii militari de rang înalt dăduseră ordin comandantului tanchiştilor să deschidă focul şi să-l omoare pe Elţîn.

În timp ce armata se aşeza în dispozitiv, Elţîn a ieşit cu paşi hotărâţi din clădire, s-a urcat pe un tanc, l-a privit drept în ochi pe comandant şi i-a mulţumit că a venit ca să se alăture democraţiei. Mai târziu, comandantul a recunoscut că nu venise cu tancurile ca să i se alăture lui Elţîn. Dar Elţîn apăruse atât de încrezător şi ferm, încât soldaţii au hotărât să i se alăture.

Leadership: O alternativă la consolidarea poziţiei tale distincte este sursa unei trăiri presante din timpul producerii unui eveniment marcant, pe care o poţi actualiza printr-un comportament ce nu lasă nicio îndoială asupra propriei valori?

Cum controlezi situaţia "la înălţime"? Dacă te-ai întrebat vreodată cât de potrivit sau de nepotrivit eşti pentru a îndeplini un anumit rol, atunci ştii cum se simţea Elţîn. Eşti destul de bun, destul de intuitiv şi destul de prompt în gândire ca să iei hotărârile cele mai potrivite în situaţiile dificile? Acţionezi repede, cu mintea limpede, când toţi ceilalţi încremenesc? Asculţi de acel impuls solid de încredere de care ai nevoie pentru a merge mai departe atunci când primeşti o lovitură, sau atunci când totul pare pierdut?

A trece în fruntea oamenilor e ca şi cum ai merge pe sârmă, deasupra unei prăpastii ce se adânceşte pe măsură ce înaintezi. Nu ai de ce să te agăţi ca să ajungi la celalalt capăt. Singura ta şansă de reuşita ţine numai de atitudinea ta, de modul cum tratezi situaţia. Dacă "a conduce" este o parte importantă a carierei tale, dacă acest lucru reprezintă realizarea deplină a idealurilor tale atunci, mai întâi de toate, va trebui să influenţezi gradul în care controlezi situaţia "la înălţime".

Trăirea cea mai înaltă a lui Boris Elţîn nu era acea trăire a vieţii fără lupte, încrâncenări şi frustrări, care secătuiesc energia omului, ci era acea trăire a cuvintelor ce pot schimba modul de gândire şi care pot rămâne pentru totdeauna în sufletul celorlalţi oameni. Era acea trăire a realităţii, care se numeşte "trezire", percepută drept un pas înainte spre inima lumii, spre miezul adevărului din care a rezultat nevinovăţia sa.

Leadershipul tău poate să sugereze o trăire foarte intensă a experiențelor de viaţă, fiindcă te atașezi de momente şi de împrejurări într-un mod foarte ciudat, atunci când îi învinovăţeşti pe alţi oameni de propriile trăiri?

Prin modalitatea în care a reacţionat, fără ca nimeni să se aştepte, Boris Elţân a anulat acea trăire a neputinţei în privinţa înstăpânirii propriei vieţi, şi a configurat-o responsabil pe baza unei forţe interioare numită: intuiţie, curaj, angajament, vigoare - acestea fiind forţele de coeziune ale manifestării de cuget care îndreptăţeşte gândurile de unitate şi nu chestionează semnificaţiile fizice şi metaforice ale vreunei suferinţe.

A conduce eficient este o adevărată provocare. Actul de a gândi înseamnă o muncă grea. Dar

şi mai greu este să ajungi în vârf şi să te menţii "la înălţime", aşa cum a făcut-o Elţîn. Câteodată îţi va fi greu să schimbi lucrurile. Dar nu uita că, într-o bună zi, de felul în care te mişti, chiar şi de aspiraţiile tale, va putea atârna viaţa ta. Depinde doar de dimensiunea leadershipului tău.

Aşa cum un doctor trebuie să depisteze rapid diagnosticul pacientului, înainte ca suferinţa sau boala acestuia să se agraveze, tot aşa şi tu trebuie să depistezi acea scânteie care se aprinde în sufletul oamenilor, înainte ca ea să devină o vâlvătaie. Iar dacă totuşi ea se înteţeşte, să faci tot posibilul să o stingi rapid.

Atâta curaj în atitudinea lui Elţîn. Asta îţi dă de gândit, nu-i aşa? Atunci când tu te afli în faţa oamenilor, ei îşi dau seama, înţeleg că în faţa lor stă un lider, un om stăpân pe emoţiile sale? Ce sentiment te încearcă atunci când trebuie să te ridici deasupra lor? Ai suficientă prezenţă de spirit să acţionezi în ciuda temerilor pe care le simţi, în ciuda sentimentelor lor? Poţi să-ţi construieşti singur funia cu care să traversezi prăpastia, cu riscul de a te prăbuşi în abisul ei?

Leadershipul rezidă din câştigarea încrederii asupra capacităţii tale de a distinge valoarea de non-valoare, atunci când evenimentele în care te simţi demotivat nu se materializează în afara controlului tău.

Prăpastia lui Boris Elţîn semnifică un mijloc riscant, dar eficient, de a te trece în fruntea oamenilor. Este o "prăpastie" care odată trecută face ca leadershipul tău să capete o dimensiune tot mai profundă. Pentru a o trece cu brio, trebuie să ai puterea de a-i convinge pe oameni să ţi se alăture. Trebuie să ai un caracter puternic şi să îţi dovedeşti măiestria în a-ţi conduce emoţiile şi teama către limite.

Concluzie: Adevărata măiestrie în leadership constă în abilitatea de a transforma un potenţial eşec, într-o victorie. Adaptarea la schimbările ce apar intempestiv, presupune de fapt să ai abilitatea şi capacitatea de răspuns rapid şi adecvat la neprevăzut, şi să-ţi menţii controlul asupra oamenilor, care în anumite circumstanţe îţi pot deveni inamici.

Modul în care tratezi schimbarea, influenţează gradul în care o controlezi.

Premiul întâi pentru excelenţă

On Martie 17, 2009

Continuă să-ţi dezvolţi potenţialul de leadership, stabilind o un ritm accelerat de evoluţie a demersurilor celor care te susţin.

Jerome Eugene Morrow nu mai aştepta nimic de la sine. Nimeni nu ar fi putut să desluşească adevăratele sale sentimente, adevăratele sale virtuţi, adevăratele sale intenţii. Singurul său prieten, Vincent Freeman, îi „împrumutase” visul său, şi numai acest lucru îi adusese bucuria de a trăi. Dar ştia că n-o să-l mai vadă niciodată pe Vincent.

Jerome, în scaunul cu rotile, ce ajunsese o povară pentru el, se apropie de Vincent. Păşise cu el împreună pe acel drum alunecos şi plin de primejdii, drum care putea fi şi al său. Stăteau unul lângă celălalt, bucuroşi că au reuşit amândoi. Mânat de un îndemn interior, Jerome îi spuse lui Vincent că pleacă şi el într-o călătorie, şi că i-a pregătit toate cele necesare pentru întoarcere - un serviciu binevenit şi hotărâtor pentru viitor, drept răsplată pentru meritele lui.

Dacă ai urmărit filmul „Gattaca (1997)” probabil îţi aminteşti sfârşitul. Vincent a reuşit să zboare în spaţiu, deşi nimeni nu i-ar fi dat vreodată o şansă din cauza dizabilităţilor sale. Dar şi mai fericit a fost Jerome, fiindcă şi-a împlinit visul de a-l şti pe Vincent „învingător”. El l-a susţinut pe Vincent stabilind o un ritm accelerat de evoluţie a demersurilor acestuia de a intra în Gattaca, de a deveni navigator şi de a zbura în spaţiu.

Leadership: Poţi să te integrezi în spațiul de manifestare al Eurilor tale diferite, aşa încât efectul obţinut să fie alăturat iniţiativei unei personalităţi cu două imagini distincte?

Ce înseamnă să ai două Euri diferite? Înseamnă să simţi cu inima altcuiva şi să gândeşti cu gândurile altcuiva, fără să te îndepărtezi de propriile principii, de propria natură, de propriul suflet, de proprile instincte. La fel ca soarele de pe cer. Vreau să spun că este nemaipomenit să te poţi bucura de atâta soare, de căldura fiecărei zile. De fapt, nu te poţi sătura niciodată de soare atâta timp cât împrăştie căldură. Devii dependent de el dacă îţi plac vacanţele pe litoral, de exemplu.

Dar aşa cum soarele nu se poate ascunde precum luna, nu poate opri mareele oceanice, la fel nici tu nu poţi să fii mai mult decât eşti pregătit să fii (decât dacă împrumuţi o parte din personalitatea altcuiva). În acest ca avem de-a face cu două imagini distincte care se potrivesc cu orientarea ta: o imagine care se bazează mai mult sau mai puțin pe realitate şi o imagine care se numeşte "idol". Dar, indiferent de imagine, niciodată nu vei putea obține mai mult decât ceea ce vezi cu ochii credinței !

Nu-ţi poţi netezi singur drumul spre atingerea scopurilor, dacă ceilalţi te îndepărtează din sufletul lor. E ca şi cum ai da la o parte o mână întinsă, e ca şi cum ai spune inimii „Nu mai bate, stop ! ”. Dacă vrei ca leadershipul tău să ia avânt trebuie să fii stăpânit de dorinţa de a fi recunoscător celor care te-au ajutat, dar trebuie să iei şi acea hotărâre fermă înlăuntrul tău de a merge pe acelaşi drum cu aceia care caută acelaşi lucru ca şi tine.

Asta înseamnă în termeni simpli „să laşi o uşă deschisă spre măreţie„ adică să te forţezi să mergi pe aceeaşi linie cu ei, să treci în tabăra convingerilor lor (dar fără să te îndepărtezi de ale tale), să le arăţi aceeaşi afecţiune şi să le îndrepţi paşii numai spre lucruri bune. Lasă o uşă deschisă pentru măreţie !

Leadership: Poţi să găseşti o asemănare între realitatea pe care o modelează atitudinea ta și povestea pe care a imaginat-o Alter-Ego-ul tău, din prisma efectelor unei eventuale constatări a unei abateri de la adevărul pe care trebuie să-l accepţi?

Aşa cum la un aparat foto digital focalizarea automată poate puncta prin precizie şi viteza, dar poate pierde teren pentru lipsa de performanţă în condiţii de slabă luminozitate sau la urmărirea subiectelor în mişcare – tot aşa şi încrederea pe care o manifeşti pentru cei din jurul tău, poate puncta prin efortul tău de a acţiona în folosul celorlalţi şi de a comunica cât mai convingător cu ei, dar poate pierde teren pentru lipsa de eficienţă în adoptarea unor decizii comune sau prin gradul redus de promovare a propriilor convingeri.

John Maxwell spunea la un moment dat într-una din cărţile lui: *„Fără a avea în jurul tău oameni de nădejde care să te ajute să porţi povara, te vei epuiza şi te vei stinge."* Avea mare dreptate, fiindcă oamenii care au o orientare comună, care au un simţ al onestităţii în raporturile care se stabilesc între ei acceptă responsabilitatea de a se asigura de buna funcţionare a muncii în echipă, şi, mai mult decât atât, acceptă responsabilitatea de a acţiona mereu cu integritate, competenţă, demnitate şi într-o manieră etică.

Asemenea oameni sunt de o valoare inestimabilă. Ei sunt mai puţini vulnerabili în faţa factorilor de risc care pot duce la apariţia conflictelor şi la dezbinarea echipei. Indiferent că de partea ta se află unul sau mai mulţi astfel de oameni, să ştii că el/ei formează întregul tău, tot ceea ce eşti din profunzime până la suprafaţă.

Adevărul pe care trebuie să-l accepţi ca lider este că, indiferent a cui imagine o preia personalitatea ta pentru a crea o nouă poveste, mai devreme sau mai târziu trebuie să-ţi dezvălui adevăratul sine, încât să ajungi să te delimitezi de ceea ce este fals în viaţa ta.

Premiul întâi pentru excelenţă se acordă numai acelor lideri care obţin performanţe deosebite prin acţiuni de promovare a celorlalţi oameni de lângă ei. Leadershipul este cu atât mai eficient şi mai durabil, cu cât reuşeşti să te conectezi la „frecvenţa" celorlalţi, să-i energizezi stabilind o un ritm ridicat de evoluţie a demersurilor lor proprii.

Un lider nu poate fi performant dacă echipa lui nu are performanţe. Performanţa echipei determină performanţa liderului şi în aceasta constă performanţa leadershipului.

Premiul întâi pentru excelenţă îl obţin doar liderii care au ştiut să coopteze oamenii din echipă în vederea obţinerii unor rezultate bune pentru realizarea intereselor ambelor părţi, ceea ce presupune o muncă susţinută cu oamenii, înţelegere, întrajutorare reciprocă dar şi creşterea exigenţelor şi alinierea la standardele specifice, ca şi un ritm alert pentru a-i depăşi pe ceilalţi.

O uşă deschisă spre măreţie este de fapt recunoaşterea conferită de „evaluatori" pentru activitatea şi performanţele liderului şi a echipei sale, dar înseamnă întotdeauna că se poate şi mai bine sau că există loc de şi mai mult bine. Pe parcursul activităţii unui lider şi a echipei sale pot exista momente când această uşă pare zăvorâtă. Dar aşa cum se spune că D-zeu închide o uşă, dar lasă întotdeauna o fereastră deschisă, tot aşa liderul trebuie să găsească soluţiile optime de a redeschide uşa sau calea spre performanţă.

Continuă să-ţi dezvolţi potenţialul de leadership, stabilind o un ritm accelerat de evoluţie a demersurilor celor care te susţin.

Preoții sunt învechiţi, știința este noua religie

On Ianuarie 06, 2017

Noile perspective asupra vieții, dar și a vieții de dincolo, pot fi concepute numai din întâlnirea dintre știință și spiritualitate, nu din izolarea uneia față de cealaltă.

Aşa cum am mai spus, la Gizeh sunt trei piramide ale regilor, printre care și Marea Piramidă, și toate trei au mici pasaje și camere goale. Piramida lui Kefren avea încă vârful acoperit de stratul de calcar care odinioară asigurase celor trei structuri O suprafață albă, perfect netedă și şlefuită. Scânteiau, probabil, ca niște prisme de sare ! Folosind instrumentele de măsurare, am calculat că Marea Piramidă, când ajungea într-un punct precis, avea o înălțime de o sută patruzeci și șase de metri sau cu mai mult de treizeci de metri decât turnul ascuţit al catedralei din Amiens, cea mai înaltă din Franţa. Egiptenii au folosit doar 203 rânduri de zidărie ca să obțină această uimitoare înălțime. Înclinaţia laturii sale era de cincizeci și unu de grade, atât cât trebuia pentru a face ca înălțimea și jumătate din circumferința ei să fie egale atât cu T, cât şi cu secvența lui Fibonacci descrisă de Jomard.

În ciuda acestei coincidențe stranii, scopul piramidelor încă mă ocolea. Ca opere de artă, erau sublime. În ceea ce priveşte utilitatea, păreau fără sens. În fața mea erau construcții atât de netede când au fost construite, încât nimeni nu putea să stea pe ele, cu coridoare greu de străbătut pentru oameni, care duceau la camere care păreau să nu fi fost folosite niciodată, și o matematică încifrată care părea ascunsă tuturor, cu excepția unui specialist.

Monge a spus că toată chestia asta avea probabil o legătură cu religia.

Leadership: Trecerea de la o credință bazată pe loc și timp - la legi științifice universale, arată progresul tău spre o înțelegere obiectivă a lumii?

- Peste cinci mii de ani, vor înțelege oamenii motivul care a stat la baza construirii catedralei Notre-Dame?

- Ai grijă să nu afle preoții că ai spus asta.

- Preoții sunt învechiţi, știința este noua religie. Pentru egiptenii antici, religia era știința lor, iar magia o încercare de a controla ceea ce nu putea fi înțeles. Omenirea a avansat dintr-un trecut în care fiecare trib şi națiune avea propriul grup de zei către unul în care mai multe națiuni venerau un singur zeu. Totuși, există multe credințe, fiecare considerând-o pe cealaltă eretică. Acum știința nu se mai bazează pe credinţă, ci pe rațiune și experiment și nu mai este centrată asupra unei națiuni, a unui papă ori rege, ci asupra legii universale. Nu contează dacă ești chinez sau german, dacă vorbeşti araba sau spaniola: știința e una singură. De aceea va triumfa și de aceea Biserica s-a temut instinctiv de Galilei. Dar această structură din spatele nostru a fost construită de un popor deosebit, cu credințe deosebite și s-ar putea să nu descoperim niciodată raţionamentul lor pentru că are la bază misticismul religios pe care nu-l putem înțelege. Descifrarea hieroglifelor ne-ar putea ajuta.

Leadership: Știința ta oferă un limbaj comun pentru a înțelege natura, dincolo de credințe și ideologii, ghidându-te în căutarea adevărului universal?

În contextul avansului științific, frontierele dintre vechi și nou devin tot mai transparente, iar schimbul de idei între vechile credințe și noile teorii facilitează emergența unei conștiințe universale care îmbrățișează recreația lumii în acord cu universul însăși. Într-o lume

interconectată, guvernată de rațiune și experiment, credinţele şi modurile de gândire sunt rescrise sub influența unor principii universale, bazate pe cauza şi efect, care promovează egalitatea între oameni drept esenţa unei vieţi sinergice, cum ar fi acceptarea diversității, promovarea toleranţei şi formarea respectului reciproc, indiferent de originea lor națională sau lingvistică.

Cred că acest proces poate conduce la diluarea misticismului religios și la formarea unei perspective globale bazate pe știință, unde creaţia devine principalul punct de referinţă, dar și la recunoașterea și valorificarea diversităţii sociale, diferențelor şi aptitudinilor individuale.

Leadership: Explorezi posibilitatea unei viziuni unde percepţia vizuală a simbolurilor religioase se întrepătrunde cu aspectele științifice, într-un dialog ce transcende simpla observație?

Nu puteam să nu fiu de acord cu această predicție - la urma urmei eram un om al lui Franklin - și totuși trebuia să mă întreb de ce știința, dacă era universală, nu măturase deja totul înaintea ei. De ce mai erau oamenii religioși? Știința era ingenioasă, dar rece, explicativă şi, cu toate astea, nu dădea răspunsuri la cele mai mari întrebări.

Ea răspundea la "cum", dar nu și la "de ce" și astfel îi lăsa pe oameni să tânjească. Bănuiam că oamenii din viitor chiar vor înțelege Notre-Dame, la fel cum şi noi înțelegem acum un templu roman. Și veneraţia și teama, probabil cam în același fel. Îmi spuneam că revoluționarii, în fervoarea lor raționalistă, pierdeau ceva din vedere, iar ceea ce lipsea era inima sau sufletul. Avea știința loc și pentru aşa ceva, sau speranță pentru viața de dincolo?

Leadership: Din perspectiva unei înțelegeri vizuale și spaţiale, cum crezi că va arăta interacțiunea dintre raționalismul științific și trăirile emoționale religioase, într-o epocă unde echilibrul este esențial pentru receptarea unei viziuni de ansamblu?

Înțelegem astfel că, dacă pentru contemporanii noștri știința și tehnologia urmează să fie agenți ai progresului, ele sunt chemate să restaureze în calitatea lor de "progres" funcționarea armonioasă a unui univers în care speranța și înțelegerea sufletului uman nu sunt afectate de dileme existențiale. Rolul lor devine acela de-a inculca societății principiul universalității și de-a readuce pe calea de mijloc spiritul derutat al celor fervenți. Or, condiția necesară pentru o relație eficientă în viitor, între ştiinţă şi univers, este să observăm mai întâi o similaritate fundamentală între ceea ce știința poate explica și ceea ce oamenii religioși receptează ca mângâiere.

În cadrul acestei similitudini comune, forța motrice necesară schimbării provine din tensiunea dintre principiile opuse ale rațiunii și venerației, dintre care unul operează și celălalt suferă transformarea. Mai departe, condiția favorabilă activității inovative, legată de extinderea cunoaşterii lumii în univers, nu este simpla repetare a cunoscutului, ci adaptarea mutuală a vechilor credințe cu noi descoperiri. Noile perspective asupra vieții, dar și a vieții de dincolo, pot fi concepute numai din întâlnirea dintre știință și spiritualitate, nu din izolarea uneia față de cealaltă.

Omul de știință răspunde la 'cum', dar căutarea spirituală a 'de ce-ului' continuă să alimenteze spiritul uman."

Preoții sunt învechiţi, știința este noua religie. Reflectând la vizibilitatea și importanta creaţiilor lumii noi, știința va trebui să îmbrățișeze o dimensiune spirituală care să răspundă și la nevoile sufletului. Având convingerea că viitorul poate să aducă o reconciliere, îți imaginezi cum simetria dintre știință și credință ar putea atinge o armonie prin cursivitate stilistică, unde fiecare explică lumea în modul său unic?

Călătoria spre eternitate este o expresie a aspirațiilor umane de a depăși limitele timpului și spațiului, îmbinând arta, matematica și spiritualitatea.

Prestigiul artei “In Memoriam”

On Octombrie 13, 2010

Identifică un teren comun cu ceilalţi, gestionând toate însuşirile leadershipului tău în aşa fel încât acesta să acţioneze în folosul tău.

Unul din tablourile în care celebrul pictor Gustave Coubert a redat scene din viaţa concetăţenilor săi din Ornanse, este “L'Enterrement a Ornans (Înmormântare la Ornans)”, pe o pânză de dimensiuni mari, în care el grupează aproximativ 50 de persoane, în mărime naturală.

Când tabloul a apărut pentru prima dată în faţa comisiei care trebuia să decidă primirea operelor la Salonul anual al Parisului, toţi au fost scandalizaţi. Au avut impresia că se găseau în faţa unui individ ironic, lipsit de orice sentimente, de orice urmă de respect faţă de durerea oamenilor în faţa morţii. În consecinţă, tabloul a fost refuzat.

Astăzi, acelaşi tablou este considerat drept una din realizările deosebite ale artei franceze din prima jumătate a secolului al XIX-lea, care excelează printr-un studiu adânc şi expresiv al figurilor umane, ce reflectă puternice sentimente şi trăiri.

Leadership: Poţi să-ţi transpui ideile într-o creaţie originală care nu se perimează niciodată, întrucât tot ceea ce exprimi prin prisma trăirilor pe care le împărtăşeşti face parte din planul unei imagini care niciodată va părăsi memoria lumii?

Lui Coubert i s-a criticat “imoralitatea” subiectelor. Faptul că a reprezentat oamenii aşa cum sunt în faţa morţii, a fost considerat ca un fel de atitudine provocatoare şi ireverenţioasă în faţa “artei eterne”. Puţini au fost aceia care şi-au dat seama numaidecât de calitatea rară şi de esenţa picturilor sale.

Omul de afaceri Sorin Neagu afirma: *“În orice afacere ai costuri şi beneficii. Important este să le gestionezi în aşa manieră încât la sfârşit când tragi linie să ieşi pe plus.”*

Coubert nu şi-a gestionat în aşa maniera resursele artistice, încât la sfârşit, când a trebuit să tragă linie, să iasă “pe plus”. Chiar dacă arta lui a fost vizionară şi atât de naturală în expresia ei, superioară prin simplitate şi bun gust, chiar dacă a fost desăvârşită prin faptul că s-a apropiat de realitate, ea nu a fost profund comunicativă, nu a ajuns la inimile oamenilor, nu a creat acel efect de mulţumire care să contribuie singur la atingerea unei ponderi semnificativ mai ridicate de semnificaţie şi de importanţă. Drept consecinţă arta lui, catalogată drept insensibilă, a fost pusă la îndoială, nesalutată de aproape nimeni.

Ca lider, dacă vrei să ai succes, trebuie să identifici un teren comun cu ceilalţi, gestionând toate însuşirile leadershipului tău în aşa fel încât acesta să acţioneze în folosul tău. Oamenii trebuie să-ţi cunoască “opera”, toate atributele ei, dar pentru asta ea nu trebuie să apară ca un protest contra principiilor şi concepţiilor lor vizavi de leadership, mai ales în ochii celor aşa zişi cunoscători. Cu alte cuvinte, trebuie să dai viaţă unui leadership menit să coaguleze toate punctele comune dintre tine şi ei: viziunea, valorile şi credinţele.

Acordă operei tale un procent de acceptabilitate crescută la public. Pe asta ar trebui să se bazeze marea ta eficacitate. Nu-ţi prezenta opera ca un duşman al convingerilor celorlalţi, numai pentru a vedea totul în lumina propriilor tale principii. Chiar dacă stilul tău este mai complex şi diferă de al celorlalţi, prezintă-l într-o manieră care să te reprezinte şi să atragă

atenţia, şi care să le permită acestora să recunoască importanţa lui.

Leadershipul este imaginea de sine transpusă într-o imagine sugestivă care nu va părăsi niciodată memoria lumii, întrucât tu însuţi trebuie să treci prin acele sentimente care îşi derivă forţa din descrierea unor întâmplări dorite sau nedorite.

Prestigiul artei "in memoriam" nu înseamnă altceva decât stabilitatea leadershipului tău în timp, care depinde de modul în care acesta a fost înţeles şi acceptat de ceilalţi.

Aşa cum testarea şi evaluarea unui nou medicament se face prin aplicarea lui la sute de mii de voluntari, tot aşa şi evaluarea leadershipului tău se face prin acordul comun al celorlalţi, în funcţie de ponderea pe care o au idealurile şi aspiraţiile tale în raport cu ale lor. Dacă leadershipul tău este contra manierei în care îl percep ei, atunci rişti să-ţi pierzi credibilitatea.

Concluzie: Pentru un lider, a-şi înălţa "opera" la rang de artă înseamnă, de fapt, ca ea să fie acceptată şi recunoscută de toţi, iar "beneficiile" ei să fie evidente şi incontestabile.

Ideile novatoare nu sunt totdeauna unanim acceptate, promovarea lor trebuie făcută cu prudenţă şi numai dacă ai "acceptul" celorlalţi. Vizionarii sunt puţini şi ei trebuie lămuriţi asupra beneficiilor ce vor veni. Şi o dată obţinute, ele vor consolida poziţia unui lider şi prestigiul lui iar arta lui va persista "in memoriam".

Prestigiul unui imperiu

On Aprilie 04, 2009

Exploatează-ţi la maxim potenţialul menţinând pulsul propriei tale valori la o cotă maximă.

Se ştie prea bine ca cineastul rus Serghei Eisenstein a revoluționat cinematografia de la începutul secolului al XX-lea prin teoria sa asupra montajului, tehnică destul de nouă de filmare pentru acea vreme, pe care a concretizat-o în filme istorice, dintre care Alexandru Nevski sau Crucișătorul Potemkin. Odată, marele regizor rus, Serghei Eisenstein a mărturisit felul în care lucra la pregătirea filmelor sale. A spus:

"Lucrez foarte profesional. Ridicând valuri de erudiţie. Dezbătând cu mine însumi principii şi programe. Acumulând calcule, ecuaţii, concluzii. Îmi place să potrivesc melodia la mersul filmului. Uneori depăşindu-l. "

Leadership: Eşti în stare să surprinzi totalitatea realităţii din evocarea unui timp care nu s-a lăsat acoperit de uitare, printr-o modificare corespunzătoare a particularităţii pe care o dă o reprezentare imaginară?

„Creaţia" în leadership este ca un film la care fondul muzical trebuie să fie în concordanţă cu tema abordată. Trebuie să potriveşti o anume „melodie", care să fie extraordinară, adecvată şi să vibreze cu tine, la propriul tău scenariu de realitate – un leadership în care pasiunea ta trebuie să capete o coloratură vie şi să se preteze la o calitate excelentă.

Absorbit cu totul de pasiunea pentru munca sa, gândindu-se întotdeauna la viitorul carierei sale, punându-şi toate resursele la bătaie, celebrul Serghei Eisenstein a fost în stare să găsească întotdeauna acel element unic pentru scenariile sale, comun cu realitatea, prin care şi-a dezvoltat şi perfecţionat constant gama de tehnici de filmare până la nivelul maxim al propriilor competenţe. Prea puţini se aseamănă cu Eisenstein, prea puţini sunt aceia care, pornind de la o idee, cred cu toată fiinţa lor că pot s-o şi realizeze şi sunt totodată capabili de a o gestiona.

Leadership: Elementul de construcţie care îţi defineşte "Creaţia" este o sincronizare între imaginaţie şi realitate, în dinamica unei evoluţii tehnologice care continuă să se menţină la înălţimea momentelor istorice?

Să laşi urmaşilor o creaţie de valoare înseamnă să te apropii de nivelul maxim al potenţialului tău. Capacitatea ta de conducere este afectată de modul în care îţi dezvolţi propriul potenţial, de nivelul exigenţelor tale în autoevaluarea şi valorificarea lui. Numai dezvoltându-ţi competenţele, crescând exigenţele faţă de tine şi „creaţia" ta, te vei putea apropia de nivelul maxim al potenţialului tău.

Aşa cum un regizor se străduieşte să realizeze în spectacolul său o relaţie aparte cu spectatorii prin inedite compoziţii de spaţiu, sunet şi lumină, tot aşa şi tu trebuie să te străduieşti să realizezi o relaţie aparte cu propriul tău leadership, cu propriul tău sine, cu propriile sentimente, gânduri, atitudini printr-o inedită abordare, printr-un anumit ritm, printr-o inedită combinaţie de entuziasm şi inspiraţie ca să ridici nivelul performanţelor tale, ca să garantezi calitatea propriilor activităţi.

Creaţia ta poate fi evolutivă şi se poate menţine la înălţimea momentelor istorice numai

dacă ideea pe care o surprinzi în imagini se desfăşoară într-un context de transformare a unei poveşti în realitate.

Prestigiul unui imperiu se construieşte în timp prin implicarea ta cât mai activă în proiectele pe care ţi le propui. Serghei Eisenstein a revoluţionat tehnica montajului. El şi-a creat propriul său imperiu de tehnici şi mijloace utilizate pentru realizarea filmelor, fiindcă a reuşit să-şi exploateze potenţialul la maxim menţinând pulsul propriei sale valori la o cotă optimă. Valoarea lui a fost dată de măsura în care şi-a ridicat potenţialul la un nivel mai înalt.

Excelenţa în leadership se obţine depunând eforturi serioase de perfecţionare şi dezvoltare a competenţelor, abilităţilor, concomitent cu creşterea exigenţelor faţă de tine – liderul – dar şi faţă de „obiectul” creaţiei tale.

Un imperiu se construieşte greu, iar excelenţa şi prestigiul se obţin atunci când îţi dai tot interesul pentru a realiza ceva aproape perfect.

Preţul echitabil al contractului de ucenicie

On Aprilie 19, 2009

Cultivă-le şi transmite-le oamenilor spiritul de unitate şi solidaritate, punându-le în valoare întreg potenţialul de care sunt capabili.

În „ *Doctorul misterios* ", scriitorul francez Alexandre Dumas îl readuce în prim plan pe avocatul Georges Jacques Danton, una dintre figurile marcante ale Revoluţiei Franceze.

Franţa trecea printr-o perioadă dificilă, prusacii ameninţau să invadeze ţara. Un om de bază trebuia să fie trimis cât mai repede la Verdum pentru a organiza cea mai bună apărare. Iar cel mai potrivit om pentru această misiune nu putea fi decât doctorul Jacques Merey. După ce i-a acordat lui Jacques împuternicirile cuvenite, Danton i-a spus cu fermitate:

- Vei da socoteala la întoarcere Jacques. Gândeşte-te că eşti în misiune pentru guvern şi că niciun obstacol nu trebuie să stea în calea unui om care are sabia la şold, două pistoale la brâu şi zece mii de franci în buzunar… Vei face un lucru sfânt, poetic, glorios… Adio, noroc !

Leadership: Eşti dispus să negi influenţa factorilor externi asupra actului tău de voinţă, factori care adesea îţi alterează dominarea emoţiillor atunci când rămâi ultimul martor al vremurilor?

Te vei putea poziţiona mai bine în relaţia cu oamenii numai dacă reuşeşti să-i determini să se concentreze asupra a ceea ce contează cel mai mult pentru ei, într-o manieră în care nimeni nu a mai făcut-o până în acel moment. Pentru asta trebuie să găseşti argumentele cel mai solide care să susţină (cu mare aplomb) convingerile şi punctele tale de vedere, dar care să exprime acele sentimente care să corespundă cu valorile şi orizonturile lor, acele sentimente care prin natura lor să le trezească oamenilor interesul pentru obligaţiile ce le au de îndeplinit.

Georges Jacques Danton, al cărui talent de lider nu poate fi contestat, l-a investit cu autoritate pe doctorul Jacques Merey convingându-l să accepte că e datoria lui ca cetăţean de onoare a ţării să se implice cu tot sufletul în chestiunile fierbinţi care priveau interesul naţional, să accepte că este datoria lui morală să fie un erou, să răspundă chemării de a-şi sluji patria, făcându-l astfel responsabil de felul în care se vor desfăşura evenimentele ce depindeau de el.

Danton a reuşit să-i cultive şi să-i transmită lui Jacques spiritul de unitate şi solidaritate, insuflându-i încredere şi curaj în potenţialul său. Acesta a recepţionat cu gratitudine îndemnul lui Danton de a se implica în rezolvarea problemelor ţării, formându-şi o imagine pozitivă asupra rolului important care i-a fost acordat. Aşadar, doctorul Jacques Merey nu a negat influenţa factorilor externi asupra actului său de voinţă, factori care îi puteau altera dominarea emoţiillor, ştiind că, dacă va supravieţui încercărilor, va rămâne ultimul martor al vremurilor tulburi pe care le traversa ţara lui.

În leadership este mai important să fii desemnat pentru o viaţă plină de agitaţie şi neprevăzut, decât să duci o viaţă personală liniştită şi lipsită de griji.

De ce spun că era posibil ca Jacques Merey să rămână ultimul martor al acelor vremuri tulburi? Pentru că existența lui glorioasă în slujba statului depindea de meritele sale. Era dator să se pronunţe asupra lui, să se simtă vinovat de ceva care putea să aducă un afront

statului.

Aşa cum lumina becului rezultă din condensarea curentului în jurul unui nucleu, tot astfel măreţia caracterului tău rezultă din majoritatea faptelor tale unite în jurul unui factor comun: credinţa în schimbare. Trebuie să ai putinţa ta de a te recunoaşte ales pentru a realiza un ideal înalt şi, în acelaşi timp, trebuie să trăieşti uimirea de a rămâne în viață în vremuri de restrişte.

Fii gata să dai piept cu sensul pe care îl întâmpină viaţa ta într-o dinamică a evenimentelor paralizate de incertitudine, pe parcursul cărora şansa de a te afirma depinde de eforturile comune ale părţilor implicate, dar mai mult de cunoașterea contextului interacțiunii dintre "dominarea emoţiilor" şi capacitatea de adaptare la noi stări emoţionale în situaţii bulversante.

Simţi că trebuie să te împotriveşti situaţiilor stresante, dar nu-ţi poţi învinge teama de experienţa trăirilor pe care le poate genera procesul de ajutor pe care îl continui în numele unui ideal?

Aşa cum diferenţa dintre afacerile de succes şi cele mai puţin performanţe nu constă doar în strategiile adoptate, ci mai mult în capacitatea de a implementa acele strategii - tot aşa diferenţa dintre a pierde sau a câştiga încrederea oamenilor nu constă doar în cât de bine eşti văzut de ei, ci mai mult în capacitatea ta de a le comunica intenţiile tale, fără să le răneşti mândria, egoul, sentimentele pe care le au pentru tine, fără să-i împingi spre anumite acţiuni sau activităţi care nu corespund cu valorile lor, cu idealurile şi convingerile lor.

Leadershipul este actul de manifestare a unei iniţiative pline de hotărâre (dar şi pline de greutatea emoţiilor) care dă importanţă formarii caraterului puternic la intensitatea cuvenită fiorului uimirii de a rămâne în viață în mijlocul unor evenimente distructive şi dezbinătoare.

Preţul echitabil al contractului de ucenicie desemnează încrederea pe care trebuie să le-o acorzi oamenilor în schimbul serviciilor pe care ei le oferă. De fiecare dată când atribui cuiva un rol, de fiecare dată când delegi pe cineva într-o funcţie, eşti dator să plăteşti mai întâi acea „taxă" de încredere care să-i ridice moralul, care să-l motiveze mai mult şi să-l facă mai conştient de misiunea sa.

Leadershipul este un „contract" pe care îl închei direct sau indirect cu anumite persoane, un contract în care amândouă părţile – tu şi ei – sunt de-acord să-şi aducă contribuţia la reuşita unor acţiuni. Dar trebuie să fii dispus să le dai ceva în avans pentru ca ei să-ţi împărtăşească convingerile şi viziunea. Trebuie să le oferi certitudinea că sunt în stare să-şi atingă obiectivele. Cum? Cultivându-le şi transmiţându-le spiritul de unitate şi solidaritate, punându-le în valoare întreg potenţialul de care sunt capabili.

Asigură-te că vei reuşi să satisfaci în mod rezonabil aşteptările oamenilor cu privire la performanţele lor. Nu să le spui ceea ce vor ei să audă, ci ceea ce realmente îi ajută să-şi dezvolte încrederea în propriul lor potenţial, să-şi regleze mai bine capacitatea de a-şi duce la bun sfârşit misiunea ce le-a fost încredinţată, cu o mare responsabilitate şi un înalt profesionalism. Ceea ce-l motivează pe un om este încrederea cu care a fost investit într-o funcţie de decizie. Iar ceea ce îţi confirmă ţie, ca lider, autoritatea, este acceptul lui de a prelua sarcinile ce i-au fost atribuite şi dorinţa de a le duce la îndeplinire.

Aşa cum cei care lucrează în publicitate caută o caracteristică unică a mărcii unui produs pentru a o face mai uşor de diferenţiat din mulţimea de produse similare – tot aşa şi tu, ca lider, trebuie să cauţi acea caracteristică unică a fiecărui om, să ştii s-o pui în valoare pentru

a-i determina pe fiecare din ei să fie mai încrezători în propriul lor potenţial.

Concluzie:

Succesul tău depinde de cum te poziţionezi în relaţia cu oamenii. Oamenii se diferenţiază unii de alţii prin acel plus de optimism şi încredere pe care liderul li-l insuflă odată cu investirea cu una sau mai multe responsabilităţi. Înainte să însărcinezi un om cu o misiune importantă, trebuie să-l investeşti cu o încredere bazată pe o cunoaştere profundă a sa şi a abilităţilor sale astfel încât să fii sigur că face faţă la îndeplinirea misiunii.

Totul are un preţ. Şi în leadership există un preţ care poate să exprime valoarea unuia sau mai multor oameni, valoare care sporeşte în condiţiile în care investeşti în el sau în ei trudă şi încredere, punându-le în valoare întreg potenţialul de care sunt capabili. Preţul acestui „contract de ucenicie" este corect atunci când raportul dintre investiţii şi beneficii este echilibrat, beneficiile constând în implicare, în asumarea şi îndeplinirea cu brio a responsabilităţilor conferite.

Preţul unui salt uriaş în tainele identităţii

On Februarie 13, 2014

Realizează o extrapolare a percepţiilor tale vizavi de dimensiunea umană, astfel încât evoluţia ta spre o treaptă superioară de înţelegere a leadershipului să nu devină contradictorie.

Procesul meu de evoluţie spre o treaptă superioară de înţelegere a leadershipului nu simplifica deloc lucrurile. Ci mai mult le complica. Efectuând constant măsurători care influenţau prin variaţia lor rezultatele cercetărilor asupra lumii si a oamenilor, m-am trezit prins într-o lume a contrastelor. A aparenţelor, a demascărilor şi revelaţiilor care pretindeau să depăşească, să corecteze sau să-mi tulbure convingerile. Confirmând, astfel, faptul că adevărul meu era subiectiv, diferit de adevărul celorlalţi.

Pereţi perfect izolatori nu existau în această mini-galerie de viaţă şi culoare, de personaje, figuri şi portrete alese pentru studiu. Sclipind de atâta inteligenţă şi simţire, de atâta conştiinţă şi voinţă de viaţă. Iar interacţiunea unui sistem de factori de evoluţie, distribuiţi aleatoriu pe un câmp coerent de posibilităţi de înţelegere a coordonatelor lor de impact, în contact cu realitatea concretă şi crudă, se putea realiza numai prin raporturi de forţe diferite.

Realitatea putea fi susţinută numai prin formarea de echilibre care nu afectau structura capacităţii mele de performanţă, de autodepăşire şi de îndeplinire a obiectivelor de cercetare.

Dar în această ecuaţie a iniţierii mele în fascinanta lume a universului uman intervenea problema formelor de plan "în sine", dincolo de orice finalitate. La o adică, eu însumi reprezentam fondul inepuizabil de cunoaştere ce-mi condiţiona dezvoltarea. Dar acest "Myself" modificat prin idealizarea unor stări şi aptitudini se îmbina cu gândirea greu manevrabilă a unităţii numită "Themself" care viza modele precum eroii, regii, artiştii, oamenii de ştiinţă, exploratorii.

Aveam de-a face cu o extrapolare care pornea de la propria persoană, folosind anumite presupuneri de care era posibil să nu fiu conştient. Şi se extindea spre o dimensiune străină, ambiguă, populată cu o varietate largă de valori şi non-valori, de adevăruri şi falsuri.

Evoluţia leadershipul tău este condiţionată de o reprezentativitate reală a profilurilor targetate de sugestia unei autonomii în planul creării unei imagini care se pretează la o condiţionare "behind the scene" ?

Într-o societate în care oamenii se ghidează în mod capricios doar după propriile lor reguli, acţionând strict în funcţie de dimensiunea codului lor de recompunere a realităţii, se cere o mai bună implicare în "recrutarea" şi promovarea acelei înţelegeri comune care să nu prezinte condiţionări de tipul " *behind the scene* ".

Într-o lume cu multe necunoscute, oamenii sunt văzuţi de mine ca rezultat al experienţei de cercetare a unei mentalităţi la care au acces doar iniţiaţii într-un tip de filosofie a perfectibilităţii imaginative. Fiecărui om îi este atribuit un profil de conexiune cu pretenţiile unei mentalităţi individualiste, ceva asemănător cu ideea de a trăi prin cel mai generos dar pe care cineva îl poate face, cu un singur obiect numit "artă" sau "literatură". În acest scenariu, el trebuie să-şi exprime propria şi unica perspectivă despre o situaţie dată, despre o realitate alternativă sau despre o viaţă veşnică.

Omul devine experimentul unei lecturi intermediate, din categoria manuscrise găsite, sau experimentul unei fotografii care surprinde diferenţele dintre actorii în viaţa reală şi personajele interpretate.

Evoluţia leadershipului necesită o analiză mai profundă şi mai detaliată a performanţei la nivel individual, dar şi ca întreg, fiind condiţionată de o reprezentativitate reală a profilurilor vizate de măsura realităţii cuprinsă în coordonatele unei intrigi poliţiste, sau în coordonatele unei picturi care caută să depăşească chiar conceptul de artă abstractă. În acest caz, indivizii sunt văzuţi ca nişte actori raţionali care instrumentalizează un întreg sistem de valori, construit conştient, transmis continuu în mod special prin intermediul interpretărilor.

Iar posibilităţile de înţelegere a coordonatelor lor de impact, în contact cu realitatea concretă şi crudă, se poate realiza numai prin raporturi de forţe diferite: dintre natura lor şi fondul de cunoaştere pe care îl au la dispoziţie. Şi pe care liderul are datoria să-l decodifice şi să-l folosească în scopul formării şi emiterii unei judecăţi de valoare.

Leadership: În afară de adevărul propriei tale judecaţi eşti pregătit să înţelegi adevărul unei noi realităţi desprinsă din impactul pe care îl are căutarea unei interacţiuni între vizibilul şi măsurabilul *modus vivendi* al omului?

Pentru a lansa o nouă teorie ştiinţifică asupra lumii, trebuia mai întâi să descriu ceea ce vedeam în viaţa celorlalţi oameni şi să măsor rezultatele cu însăşi cursul vieţii mele. Vizibilul era semnificaţia realităţii de dincolo de teorie, iar măsurabilul era ceea ce reuşeac să fac cu ceea ce ştiu în situaţia în care depindeam de regulile şi actualizările de funcţionare ale celorlalţi oameni. Modus vivendi se referă la suportabilitatea unor decizii care limitează sau dirijează cursul evenimentelor.

Prin prisma indicatorilor semnificativi de performanţă trecuţi prin propriile tale legi de acces la un real de care te poţi folosi pentru a-ţi desăvârşi pregătirea, poţi realiza o analiză comparativă şi competitivă a valorilor şi însuşirilor tale faţă de trăsăturile de personalitate ale celorlalţi. Pe un continuum între fondul măsurabil al leadershipului şi aspectul previzional al formelor de impact: intelectual, emotional, spiritual.

Însă te poţi transforma într-un un exponent al contrariilor dacă nu reuşeşti să înţelegi şi să accepţi adevărul acelei noi realităţi, puse sub lentilele unei judecăţi subiective care nu-şi găseşte locul în concepţia ta vizavi de "Om". Uneori chiar respingând-o din cauza limitelor clădite de perspectivele unei imposibile unificări dintre "Yourself" şi "Themself".

Printr-o extrapolare a ceea ce este vizibil şi măsurabil în cadrul fiecărui colţişor al ansamblului de observaţii, devenite puncte de reper în şirul mult mai numeros al adevăratelor înţelegeri care îţi dirijează autoritatea intelectuală spre instituirea unor convingeri mai integrate în leadership, te vei putea distanţa de acel tot unitar al contrariilor. Care te poate arunca într-un dualism iraţional.

Iar prin intermediul plenitudinii cunoaşterii umane raportate la o succesiune de experienţe obiective, ca formă superioară de materializare a gândirii ştiinţifice care are ca scop evoluţia leadershipului, vei întări acea percepţie subconştientă, subtilă, despre tine însuţi. Conform căreia calitatea de a-ţi construi identitatea în funcţie de ceea ce crezi despre ceilalţi şi de ceea ce cred ceilalţi despre tine, este o treaptă greu de atins.

Leadershipul este adevărul la care ai ajuns să te raportezi în ceea ce priveşte "fii tu însuţi" într-un context de cercetare ştiinţifică a cărei finalitate se regăseşte în experienţa de viaţă pe care o trăieşti prin comparaţie cu o realitate alternativă.

Preţul unui salt uriaş în tainele identităţii reflectă acea preocupare continuă dublată de o profundă autoanaliză, spre o evoluţie ascendentă în sfera leadershipului, lipsită de contradicţii şi în concordanţă cu realitatea.

Preţul unui trandafir nemuritor

On Mai 16, 2019

Învaţă să te priveşti din perspectiva unei creaţii care nu încetează să uimească, luând în considerare compoziţia unei imagini care te reprezintă prin natura ei.

Există ceva între mine şi acest trandafir, e ceva în noi care ne vorbeşte în sens invers oricărei gravităţi a enigmaticului aparent derizoriu: decât în durere, în suferinţă, în rătăcire, mai bine orice altceva. El înfăţişează frumuseţea lumii drept o formă a imitaţiei trăsăturilor unui artist care adaugă în tablourile sale planurile unei viziuni ale vieților pământești anterioare, rosturile intime ale unei explicaţii date universului: "de ce să exişti fără să trăieşti prin însăşi ascultarea timpului?"

Trandafirul evidenţiază relaţia "aproape-departe" dintre pământ şi univers, dintre exprimare şi libertate, simbol al unui mare creator de frumos care adaugă spini convenţionalităţii reprezentării sale pe scena vieţii. Posedă o aură de mister care dăinuie asupra recepţionării unor noţiuni transmise imaginativ, alteori grafic, în echivalenţa simbolică a unei ființe mature ce aspiră la perfecțiune.

Privindu-l în bătaia picăturilor de ploaie, simţindu-l transfigurat într-un credincios care înalţă un imn de slavă Dumnezeului atotputernic, ca sub efectul unei magii petrecute direct în natură, mi-l închipuiesc pierdut în nemărginirea unei dureri profunde care îl năuceşte asemeni unui fulger, ca şi când prezenţa lui în această lume ar fi trecută cu vederea. Îl simt plonjând într-un trecut sentimental, drum pe care îl face Spiritul într-un spaţiu liniar pentru a verifica legile universului care guvernează viaţa omului, sub înrâurirea unui simbol sacru al creaţiei, având farmecul unui cuvânt care se repetă obsesiv în templul nemuririi.

Dacă reuşeşti să priveşti un trandafir ca pe un miracol al naturii, în sensul unei creaţii care creşte continuu în însemnătate, poate vei învăţa să citeşti şi gândurile lui Dumnezeu.

Leadership: Eşti în stare să imprimi natura fiinţei tale în formarea unei imagini distincte, interpretând această experienţă ca pe o călătorie într-un univers care se dezvăluie printr-o abordare unitară a esteticii?

Măreţia trandafirului constă în sinceritatea unei clipe care se trăieşte prin simţuri, nu prin raţiune. Prin acea tăcere care îți spune să ai răbdare și să nu te îndoiești de ceea ce simţi, de ceea ce crezi. El cunoaşte toate conflictele şi controversele acestei lumi, dar şi toate valenţele valorice ale unei creaţii artistice de excepţie care încă nu este pregătită să fie înţeleasă de muritorii de rând care se încurcă uneori cu zeii.

Experienţa seculară a picturii îl consacră ca fiind legătura tainică între cer şi pământ, un subiect cunoscător de realităţi diverse, un amestec superior de cunoaştere şi credinţă, existând într-un anumit interval de timp suficient de mare încât să i se poată asocia mitul iniţiatului într-o stare de "Alteritate" datorită sentimentului de a fi diferit.

Cu devotament, îi vorbesc ca unui prieten vechi şi drag, alături de care am trăit o poveste de 2000 de ani, fără să mă feresc niciodată de reproşurile aduse unui obiect al iubirii care se termină cu litera i, până la un punct al atenţionării justificate asupra autenticităţii unei naraţiuni subiective.

Double Delight. Este compoziţia unei imagini devenită clasică în opera unui pictor genial care

se delectează cu mediul înconjurător și se afundă în trăirile sale redându-le prin culori cât mai acaparante. Ne-am ataşat unul de celălalt. Îmi soarbe cu nesaţ vorbele, ca şi când ar vrea să smulgă din mine anii petrecuţi împreună şi să trăiască într-o singură clipă toată plinătatea unei creaţii menită să se extindă până la împlinirea sa definitivă, când Dumnezeu va fi "totul pentru toţi".

În trandafirul meu, Double Delight, se oglindeşte mereu începutul unei noi poveşti pline de emoţie, o anumită plinătate și căldură, la fel cum în orice suflet bun străluceşte o stea specială, la fel cum în orice infinitate de culori străluceşte lumea interioară a unui artist care îşi desenează cu îndrăzneală viaţa. În el se înscrie viziunea din spaţiul unei relaţii cu un univers complex în planul nemuririi.

Aşadar, estetica care caracterizează dimensiunea portretistică a creaţiei mele ţine de claritatea cu care captez un moment din eternitatea timpului, un exemplu de frumuseţe surprins într-un univers alternativ, bazat pe îngăduinţa naturii de a spune: "Înalţă-ţi spiritul spre culmile bucuriei de a da o nouă însemnătate lumii pe care o reprezinţi şi o împărtăşeşti cu mult talent".

Leadership: Semnificaţia pe care o atribui imaginii tale de artist poate fi înţeleasă ca operă a unei naturi spirituale care favorizează întâlnirea cu "Creatorul unei lumi pline de metamorfoze" chemat să-şi exprime viziunea în spaţiul de memorie al timpului?

Singurătatea nu există în lumea trandafirului meu, nu atât pentru că vorbesc zilnic cu el, ci pentru că glasul meu pare întipărit în memoria unui timp care se repetă, înfăptuind întoarcerea unei părţi din propria-mi fiinţă într-un cadru compoziţional ales cu multă grijă, în care pictorul răsplăteşte natura cu expresii ale impulsului divin, ale frumosului, ale sensibilităţii, ale creativităţii, expresii ale modului în care mintea și sufletul au văzut și și-au imaginat lumea perfectă.

Cu adevărat, foarte puţini artişti au ajuns la cunoaşterea trebuincioasă înţelegerii Marii Opere. Trandafirul, într-un plan vertical larg deschis, privit din punct de vedere al raportului logos-creaţie pare (în mod paradoxal) un act de renunţare la linie şi obiect, putând fi perceput ca având drept substrat intelectul unei minţi superioare la care se ajunge tocmai prin simplificarea trăitului.

"Am răscolit vreo durere, am înviat vreo cauză pierdută?" mă întreabă el aruncându-şi cu sugestivitate o petală pe pământul umed, ca şi când m-ar fi atenţionat în privinţa unei legături eterne ţesută între aspiraţiile sufleteşti ale unui univers prea puţin explorat şi complexitatea problemelor care intervin în dinamica subtilă a spaţialităţii unei creaţii care depăşeşte puterea de cuprindere a minţii omeneşti.

"Cu siguranţă", i-am răspuns imediat, privindu-l cum se înclină în bătaia lină a vântului de primăvară. Dar nu i-am suflat nicio vorbă despre tot ceea ce credeam că se leagă de unirea noastră în duh, de slujirea aceleaşi cauze făurite de un univers complex care ține strict de spațiul imaginar al cuvântului tipărit cu glasul timpului.

Nu este niciodată prea târziu să-mi revin din dependenţa de frumos şi să aleg anatomia unei suferinţe datorate lipsei de înţelegere a unui univers mult prea superior amprentei existenţiale pe care trandafirul a tipărit-o în memoria timpului, şi în care mi-am înfăşat propria fiinţă.

Leadershipul este speranţa de viaţă a unei creaţii de geniu menită să-şi găsească corespondenţa într-un univers paralel în care simpla redare grafică a realităţii nu mai prezintă nicio doză de spectaculos, doar trăitul prin comparaţie este ceea ce contează.

Dragul meu trandafir. Tu ai trăit mai mult decât toţi şi nu vei muri niciodată, te regăseşti în tematica marilor picturi, împingi în prim planul imaginaţiei artistului genialitatea de a fi original, eşti perceput ca modalitate de a măsura expansiunea în timp a unui univers plin de semnificaţii.

Prin tine trăiesc capodopera unei vieţi care continuă încetul cu încetul să se completeze cu echivalenţa simbolică a unei amulete magice, aducătoare de noroc, fiindcă deţine puterile universului.

Preţul unui trandafir nemuritor este dat de legătura “raritate - ecou universal”. Face referire la produsul complex al unei creaţii unice realizată de un artist genial, înzestrat cu capacitatea de a descifra mesajul unui univers care nu încetează să se autodefinească ca fiinţă, natură, imagine şi potenţial de putere.

Natura fiinţei mele cuprinde bunătatea de a împărţi cu un artist al naturii gândul şi voia lui Dumnezeu: "Trăieşte după cum îţi dictează sentimentul de linişte sufletească."

Prezervarea culturii

On Aprilie 04, 2008

Configurează-ţi propriul spaţiu de creaţie care să răspundă unor cerinţe existenţiale concrete, prin stabilirea deosebirii dintre "interior" şi "exterior".

Totodată continuă şi munca pentru filmul "Ivan". În aceste zile monstruoase ale războiului, regizorul Serghei Eisenstein se simte obligat să apere cultura, paralel cu lupta armată împotriva fascismului. Îl îndurerează fiecare nouă barbarie: distrugerea inegalabilelor fresce medievale de la Pskov şi Novgorod, a palatelor şi a fântânilor arteziene din secolul al XVIII-lea de la Leningrad, a catedralelor de lângă Moscova, a hidrocentralei de pe Nipru... Îl doare cumplit jertfa de vieţi omeneşti care se pierd înfruntând urgia nemţească.

Dar totodată se gândeşte încă de la început la zilele de după război, la ziua de mâine a culturii şi a artei pe care şi el este chemat să o asigure făcând orice jertfă pentru grăbirea venirii ei. Oamenii poporului său sunt gata înarmaţi până în dinţi cu experienţa trecutului, iar făcliile din mâinile lor, din mâinile celor care aşteaptă lumina, trebuie să fie curate şi pregătite pentru acea clipă când arta lor va începe să exprime noul cuvânt al vieţii.

*Sarcina sa principală însă o socoate a fi apărarea, prezervarea culturii. În luna august termină studiul său despre El Greco, redactează o versiune engleză a studiului despre Griffith şi a istoriei montajului în diferitele arte şi pregăteşte o privire de ansamblu asupra ideii de prim plan de-a lungul istoriei artelor. **

Leadership: Ţi-ai propus să arunci o privire de ansamblu asupra ideii de prim plan de-a lungul construcției unei imagini artistice, ca modalitate de a face faţă lumii prin definirea ei în detaliu?

Cine simte că este dator lumii întregi să apere cultura, ştiinţa sau morala, trebuie să se pregătească pentru acea clipă când arta sa va trebui să exprime noul cuvânt al vieţii, adică înnoirea spiritului de creativitate care rodeşte în direcţia unui esenţialism vizual şi a intensificării unei anumite calităţi abstracte ale avangardelor secolului prezent. Totodată, trebuie să înţelegem că o latură indispensabilă a evoluţiei omului este strâns legată de un sistem de creaţii ce răspund unor cerinţe existenţiale concrete.

Plăcerea actului de creaţie, fiind o modalitate mai bună de exprimare a sinelui, dar mai ales actul complex de autoexaminare prin furnizarea unor noi punct de vedere faţă de meşteşugul artistic, faţă de curentul artistic, faţă de mesajul artistic, aduc practica unei libertăţi de exprimare în direcţia unui esenţialism vizual şi a intensificării unei anumite calităţi abstracte a artei şi ale spaţiului ei de manifestare.

În ceea ce priveşte opera de creaţie, "exteriorul" este ceea ce reflectă realitatea, fără a o denatura, iar "interiorul" este ceea ce experimentezi în realitatea ta prin diferite perspective artistice.

Nu se poate imagina afinitatea omului cu domeniul artei decât prin prezervarea culturii, adică acţiunea pe care omul creator o îndeplineşte faţă de progres, faţă de suma activităţilor spirituale, faţă de natura omului, faţă de viitorul gândirii omeneşti.

Şi ţinând cont de faptul că lumea obiectivă prezintă un aspect empiric, este important să evaluezi cât mai multe modalităţi de creaţie care funcţionează astfel ca o formă de verificare

practică a unei imagini vizuale, încât să ai o privire de ansamblu cât mai cuprinzătoare asupra vieţii, înainte să te concentrezi asupra ideii de "prim plan al unui realism care transcende imediatul" (şi care poate căpăta valenţe alegorice).

Foarte bine punctează Wikipedia definiţia culturii: *"Cultura reprezintă o moștenire ce se transmite cu ajutorul codurilor de comunicație specifice - cum sunt gesturile ori cuvintele, scrisul și artele, mass-media (presa, radioul, televiziunea), media interactivă (telefonul). În același fel se transmit gesturile, ritualurile, cunoștințele teoretice, normele abstracte, religia. Cultura poate fi însușită prin diverse forme ale memoriei subiective (reflexe, cuvinte, imagini) dar și prin intermediul memoriei obiective (obiecte, peisaje, cărți, numere, reguli)."*

A face faţă lumii prin definirea ei în detaliu înseamnă să mergi până în miezul lucrurilor şi al legăturilor dintre ele, folosind combinația dintre cunoștințele, convingerile, trăirile şi experienţele tale pentru a da viaţă unei imagini care surprinde punctul de întâlnire dintre natural şi ideal.

Prezervarea culturii răspunde existenţei unor creaţii utile şi indispensabile progresului tehnologic şi social, configurate valoric prin tranziţia de la realitate la viziune, de la imaginaţie la imagine veridică, de la necesitate la modernitate.

Prima funcţie a culturii leadershipului

On Iulie 17, 2016

Caută acolo unde nu caută nimeni și găsește acolo unde nu te aștepți.

Eisenstein a început munca la scenariu, împreună cu Agadjanova, printr-o serioasă documentare la care au fost ajutaţi şi de consilierii comisiei documentare. Articole, documente, mărturii ale participanţilor stau la baza acestei munci de informare. Scenariul condensa un material faptic uriaş. Acţiunea începea în timpul războiului ruso-japonez şi se încheia cu reprimarea revoluţiei, desfăşurându-se la Moscova, Leningrad, Odessa, Sevastopol, Tiflis. Scenariul, scris în timpul verii, sintetiza adeseori în două rânduri, evenimente importante.

Aparent imposibil de privit ca punct de pornire pentru realizarea unei pelicule, scenariul cuprindea de fapt întreaga muncă de pregătire a filmului, de documentare istorică şi, am zice, emotivă. Încerca să surprindă dinamismul şi ritmul epocii, relaţiile dintre evenimente, atmosfera perioadei istorice pe care o descria. *****

Leadership: Poți să produci o adevărată revelaţie, găsind acele referinţe de minimum şi maximum care ajută motivelor tale de construcție a ansamblului creaţiei?

„Lucrarea trebuie să aibă puterea de a se revela" spunea demult pictorul român Sorin Ilfoveanu . Dar pentru că ea să se reveleze, anunţând o nouă faţetă a artei - creând unicitate, în arhitectura atât de ferm construită a unei opere viguroase, artistul trebuie mai întâi să capteze toate sursele și referinţele care corespund integral necesităţilor de producție a unui model de viziune și interpretare artistică.

Continuând seria începută în cadrul proiectelor de finisare a unor idei, schiţe și tipuri de experiențe, făcând posibilă o introducere a unei noi linii de artă și gândire, și sugerând înclinarea spre anumite perspective și spre un anumit nivel de preferințe de evoluţie, leadershipul se poate ridica la înălțimea potențialului de a utiliza toate mijlocele de producție a calităţii performării.

Altfel spus, omul care se ridică la înălțimea potenţialului de transformare individuală creatoare, manifestându-şi dinamismul în ceea ce privește actul de naștere-facere a creaţiei, ajunge în baza muncii de informare să condenseze un material uriaș de susținere și modelare a conţinutului său teoretic şi practic.

Asta, în leadership, se numește să-ți extinzi intervenţia asupra acelor constante dependente unele de altele, cu o distribuție simetrică în jurul *forward-ului* , adică orientată în direcţia depăşirii punctului de pornire.

Punctul de pornire este începutul unui demers cu bătaie mai lungă, pe cât de dificil, pe atât de satisfăcător, care vizează identificarea unor noi surse şi referinţe de inspirație pentru identificarea ideilor .

Înainte ca o idee bună să câștige valoare, trebuie să asiguri modalitatea de întregire a unei revelaţii și calea ei de transmitere.

Revelaţia, în domeniul leadershipului, este rezultatul descoperirii acelor modalităţi unice de a

face creație (o dependenţă de realizări), prin intermediul documentarii axate pe înțelegere și emoții, folosind ca suport de întregire relaţiile dintre mai multe surse de background ale căror mărimi sunt determinate separat.

Referinţele de minimum și maximum sunt informațiile ajutătoare, uneori de sens contrar, care contribuie la întregirea acelor fenomene, evenimente, idei, concepţii, insuficient desluşite, dar care permit estimarea modului de a se proiecta în posibil, în spaţiul infinit care se deschide între creație și lume.

Prima funcție a culturii leadershipului are ca finalitate producerea unei revelaţii, pe baza unor metode ştiinţifice, de cunoaştere originală.

Iar revelația, care la rândul ei se explorează și se transformă în creație, se axează de cele mai multe ori pe principiul: *„ caută acolo unde nu caută nimeni și găsește acolo unde nu te aștepți. "*

*** Notă:** Ion Barna - *Eisenstein* , Editura Tineretului, 1966.

Prima lege a ştiinţei în plan spiritual

On Februarie 06, 2022

Nu putem cunoaşte lucrurile aşa cum sunt în sine, ci numai aşa cum ne apar.

Vă povesteam în articolul precedent despre marele inventator Alfred Nobel, căruia întreaga materie îi dădea mereu ascultare atunci când încerca să realizeze o nouă variantă (mult îmbunătăţită) a dinamitei. El a fost ferit de orice accident în lucrul cu substanţele cele mai explozive, deşi milioane de oameni mureau anual datorită dinamitei.

Într-o oarecare măsură, fără să întămpin vreo dificultate, dacă mi-aş măsura capacităţile de inventator prin experienţa confruntării cu moartea, cu privire la modul de a schimba o constantă a reprezentării cuceririi ştiinţei pe o traiectorie axiomatică unitară, atunci probabil m-aş ciocni de o latură trecută cu vederea, o excepţie, ceva ce nu aş fi gândit că pot face. O fi doar o problemă de credinţă şi de for interior?

Totuşi, sunt un inventator-autodidact, şi pe această cale sunt îndreptăţit să accept modul de încadrare a invenţiilor mele în categoria celor ce nu se rostesc, dar se închipuiesc. Fără excepţie, lucrul cu materia se poate transforma într-o relaţie desfăşurată între ceea ce proiectez ca intenție, și efectivitatea protecţiei pe care natura mi-o asigură cu un singur scop: pentru a-i lărgi valenţele de "miracol" în afara materiei vizibile.

Leadership: Poţi să te priveşti înăuntrul unei versiuni de evenimente imaginare, fără să fii dator să dai măsura propriei tale confruntări cu reprezentarea adevărului din jurul viziunii pe care o creezi?

Relația cu mine însumi este o punte către miracolul ştiinţei, o redimensionare a imagini care îmi permite să reproducă ceva, încât să dau o replică realului, dar în acelaşi timp este o confruntare între ceea ce consider a fi vechi și dorința de progres. Se creează astfel premisele unei evoluţii constante şi vizibile, fapt care lărgeşte orizontul cunoaşterii naturii vii (ca totalitate a evenimentelor de impact) şi a esenţei lucrurilor nevăzute.

În acest sens, moartea nu mai este văzută ca fapt natural în cartea vieţii, ci ca unul din coordonatele unei magii care este totodată un joc de o ghicire sublimă, desfăcându-se şi legându-se de mine printr-un exerciţiu al imaginarului şi al visului de a trece peste hotarul posibilităților omenești. Natura nu poate fi satisfacută să adauge un plus de complicitate reală cu Creatorul, decât prin recapitularea propriei mele experienţe de dedublare, deci sub formă fictivă.

Lucrurile merg întocmai cum mi-am dorit" spunea la un moment dat vrăjitorul Prospero într-o piesă de Shakespeare. Planul său îndrăzneţ se transformase într-un angajament care sfida moartea. Îi era din ce în ce mai uşor să stea în mijlocul lucrurilor care se întâmplau. Mai mult, el putea să observe totul, dar fără să fie văzut. Duhul pe nume Ariel, care era şi el nevăzut pentru orice ochi omeneşti, afară de-ai lui Prospero, ruşinat la gândul că ar putea să pară lipsit de recunoştinţă, s-a supus mereu poruncilor creatorului său.

Aici se aduc în prim plan caracteristicile unice ale legii care mişcă lucrurile: pentru a fi întindere, materia trebuie să fie forţă de pătrundere, de expansiune şi de rezistenţă. Apoi, dispunem de un mijloc de cunoaştere directă a realităţii, pe care ni-l oferă doar propriul nostru suflet. Iar activitatea sensibilă a sufletului, dirijată de virtutea perfectă, constituie puntea de trecere de la spiritual la material.

Leadership: Procedezi la identificarea capacităţilor tale de a face distincţie între imaginar şi real, prin maxima interpolare a unei imagini care poate fi obţinută doar prin respingerea ei?

Mai bine zis, ca deschizător al unei viziuni spre cele neînchipuite, pot să aplic orice lege a fizicii pentru a ajusta dimensiunea unei atare schimbări lumeşti într-o manieră subiectivă. Şi asta deoarece materia dispune de acea calitate de a forma puntea de trecere de la tărâmul spiritual la lumea fizică. Îndeosebi, principiul lui Fermat îmi place nespus să-l aplic pe fundalul miraculosului: *"Timpul în care lumina străbate drumul geometric "s" într-un mediu oarecare este egal cu timpul în care lumina ar străbate drumul"l" în vid."*

Îndelunga căutare s-a încheiat într-un mod cu totul neaşteptat. Vizionarul a devenit un creator, şi nu orice fel de creator. Mai întâi am fost Alfred Nobel, apoi am fost Prospero, şi în final am devenit imaginea celor doi. Am scăpat ca prin minune din faţa oricăror nenorociri, ori de câte ori m-am jucat cu pericolul, şi am avut mereu duhul fenomenelor cereşti de partea mea, pe care am ştiut să le descifrez la timp cu ajutorul naturii. Mai mult decât atât, furia naturii s-a abătut asupra tuturor celor care mi-au dorit răul.

Nu, nu mă consider un Creator doar fiindcă m-am lăsat influenţat în procesul de descriere a imaginilor de ceea ce simţurile au perceput la contactul cu "obiectul descris". Ci pentru că, dincolo de limitele vizibilului, am introdus discret, ici-colo, pas cu pas, elemente de hazard, de improvizaţie, dar şi o serie de algoritmi miraculos–hiperbolici şi extensiile acestora într-un joc al expresivităţii.

Cu toate astea, dacă m-aş considera un model al universului în expansiune exponenţială, şi dacă gândirea mea ar fi proiectată în chimia necunoscută a materiei, pe lângă orice altfel de lege imanentă, probabil m-aş încadra cu nonşalanţă în tendinţa de a trece de la o percepţie obscură la alta mai clară, deci de la imperfect la un grad superior de perfecţiune.

Ceea ce leagă un Creator de întregul univers al creaţiei sale, în dimensiunea leadershipului, este acea parte a viziunii pe care el o foloseşte atunci când îşi îndreaptă atenția asupra celor care se văd doar printr-un joc al dublurii ce contrapune, în aceeași structură figurativă, o imagine fabuloasă și una simbolică.

Prima lege a ştiinţei în plan spiritual are ca punct de plecare următorul punct de vedere: Nu putem cunoaşte lucrurile aşa cum sunt în sine, ci numai aşa cum ne apar. Am un motiv serios sa spun acest lucru. Am acasă o carte pe care o citesc în continuu, fara sa mă mai pot opri. Sunt nevoia să traiesc în lumea ei fără să-mi forţez privirea, fiindcă ea are calitatea aceea specială de a şti dinainte să introducă în paginile ei toate momentele vieţii mele.

Source: https://neculaifantanaru.com/prima-lege-a-stiintei-in-plan-spiritual.html

Primul determinant al leadershipului

On Mai 19, 2017

Stimulează-ţi motivaţia de a te autodepăsi, găsind acea componentă a imaginii de sine pe care să o traversezi în planurile extremelor care te clatină.

Era mai mult decât prinderea mea în lanţurile unor percepţii trăite anterior, dacă e să analizez fertilizarea gândirii mele în întregul atotcuprinzător al unei stări de veghe - acompaniată de o justificare a izolării în raport cu lumea reală. Neîndoios, *my beta testing* asupra tendinţei de a interpreta experienţele vieţii numai în termeni de rezistenţă se voia a fi o încercare de a mă situa, în stare de amăgire finală, în sensul introducerii unor limite de speranță care se micşorau tot mai mult.

Era ceva peste pragul sensului atribuit cunoaşterii care fundamenta conştiinţa timpului meu de a găsi o motivaţie existenţei, o psihologie a drumului spre alternativa libertăţii fără constrângeri, un ceva peste limitele posibilităţii cunoaşterii infinit de variată a unui science fiction care angajează omul pe o cale întunecată a izolării. Era o nuanţa de gri a modului de a face schimbare peste care se aflau anumite legi veşnice, statornice, carora li se supuneau în intreaga lor dezvoltare anumite restricţii de acces aplicate într-un coşmar care se tot repetă.

În acest caz, leadershipul era un accept al disponibilităţii de a mă îndruma spre o aventură de neuitat, spre o cale măreaţa de a trăi în temeiul subtilităţii psihologiei de a surprinde, în acelaşi timp, aspectul general dar şi cel particular al fiinţei umane înscrisă în ansamblul unei lumi sfârşite.

Eu, Gerry Lane, un om de ştiinţă foarte atipic, nu eram sigur că virusul care a îngrozit lumea, făcând din orice om un Zombie, putea avea un leac definitiv. Doar de un singur lucru eram sigur: trebuia să am suficientă energie ca să pendulez după bunul meu plac între o raţiune bazată pe un fir logic şi o raţiune bazată pe fenomene naturale şi pe deducţii raţionale parţiale extrase din fenomenele naturale.

Leadership: Îţi permiţi să-ţi imaginezi viitorul relaţiei tale cu tine însuți şi să îl comunici lumii prin prisma felului în care îți trăiești viaţa în faţa unui fenomen natural atipic care ia amploare?

Fiind prins în limitele unei logici simple, nimic complicat pentru geniul unei staţionări în organismul artei supravieţuirii, cu o largă răspândire în construcţia aparatului propriei hegemonii intelectuale, am început să-mi făuresc destinul astfel încât să simt că îmi trăiesc viaţa în cel mai util mod, la fel cum un sculptor talentat ştie să sublinieze, în compoziţii şi colorit, conţinutul adânc uman cu multă vervă.

Forţele care împingeau lumea în ciclurile de imprevizibilitate a viului, a schimbării lucrurilor, a legilor ştiinţei, pe durata unei emancipări individuale autentice, fără precedent, constituiau elemente ale unui limbaj mecanic, realizat prin sudura cu percepţiile valorii care mă definea printr-un rol distinct, la temperatura unei atare responsabilităţi de sine acordată serios la realitate. Viitorul meu părea a fi o succesiune evenimenţială din cadrul unui fenomen atipic care nu se poate explica prin știința convențională.

Departe de mine lipsa motivaţiei chiar de la începutul unui exil perpetuu în spațiul privat al unei fenomenalităţi autentice: " *That's what I am* ". Expresia stării de întemniţare, linişteа dintr-un lagăr al artei privită din unghiul presiunii de contact dintre planul realului de o concretitudine strivitoare și cel al lecţiilor pe care ea le trimitea lumii, se exprima prin

coloritul extremelor la care eram supus. O extremă a interpretării dispoziției de a îndeplini datoriile lumeşti și o extremă a răbdării din perspectiva timpului.

Sensul pe care îl dai atitudinii superioare (de erou) este o parte a psihologiei experimentale produsă pe traseul spre punctul de trecere a frontierei dintre ceea ce te izolează și ceea ce te inspiră.

Era timpul călătoriei prin pustiu, timpul de a alege între bine și rău, între posibilitatea de a accepta o înfrângere și posibilitatea de a mi-o asuma cu acea dârzenie cu care Jean Valjean, personajul lui Hugo, se întărea pe calea binelui în lupta cu întunericul răutăţii lumii care îl denigra continuu.

Prima componentă a imaginii de sine pe care merită să o traversezi în planurile extremelor care te clatină este atitudinea de a te arăta în orice situaţie mai bun decât eşti. Gery Lane este eroul care îşi găseşte menirea supravieţuind în faţa unui fenomen numit "That's what I am în a world that tries to hide in the dark", şi care reuşeşte să ţină în frâu evenimentele prin lupta împotriva forţelor naturii. Iar, în acest context, leadershipul este responsabilitatea pe care Gery şi-o asumă ca supravieţuitor într-o lume supusă morţii.

Iar sensul autenticităţii pe care o promovezi „ *That's what I am* ", despre care am avut de atâtea ori prilejul să vorbesc, exprimă convingerea că însăşi destinaţia spre care te îndrepți este oglindirea vieții care se conformează unei nemăsurate chibzuieli și a unei atitudini superioare. Nu totdeauna viața, prin suişurile și coborâşurile ei, este cea care se orânduieşte potrivit interpretării pe care i-o dai, calificată ca mai mult sau mai puţin precisă, mai mult sau mai puţin imperativă.

Leadershipul este atitudinea de erou pe care o ai în faţa acelei schimbări colosale care poate face din tine un obiect fără valoare cu care destinul, devenit necruţător, se joacă în mod cinic.

Primul determinant al leadershipului îl reprezintă situaţia în care se plasezi atunci când sensul autenticităţii pe care o promovezi, sub aspectul unei retrospective a întregului parcurs, derivă din marea necunoscută a unei lupte fără sfârşit acceptată ca un rău necesar. O luptă cultivată, adâncită, construită pe pilonii amăgirii, confuziei, mandriei, conştiinţei sau libertăţii de acţiune.

Uneori, asumarea prilejului de a experimenta o lume complet diferită în povestea pe care destinul ţi-o creează este o componentă a imaginii de sine pe care o traversezi în planurile extremelor care îţi dau o anumită viziune, nu tocmai cea mai fericită despre viaţă.

Primul prag al leadershipului

On Iulie 10, 2011

Întăreşte-le oamenilor încrederea în potenţialul tău de lider, restabilind firul conducător al convingerilor şi sentimentelor lor.

Bob Spangler era proprietarul unei insule din Pacific, o cunoştea mai bine ca oricine. Era ferm convins că hotelul său, construit pe o rocă fermă, îi putea salva pe toţi turiştii de înfricoşătorul vulcan care începuse să erupă. El se adresă oamenilor speriaţi:

- Ascultaţi-mă ! Aici există tot ce avem nevoie, chiar aici. Credeţi-mă, hotelul acesta a fost construit să dureze. E construit pe rocă fermă. Şi vă spun să rămâneţi. E singura voastră şansă. Nu intraţi în panică din cauza oamenilor neîncrezători şi fricoşi.

Hank Anderson, un maistru de foraj, convins că erupţiile vulcanului şi lava vor distruge în totalitate hotelul, iar toţi cei aflaţi acolo vor muri, ieşi în faţa oamenilor şi, cu mult curaj şi încredere îi îndemnă să părăsească insula, adică să-l urmeze degrabă.

- Fiţi atenţi la mine. Lava continuă să vină pe partea asta. Veţi muri cu toţii dacă rămâneţi aici. Cine vrea să meargă cu mine, să se echipeze imediat şi să urce în maşini.

Leadership: Care este consecinţa impactului psihologic al evenimentului care te provoacă să-ţi depăşeşti limitele atunci când e vorba de persoane/locuri vulnerabile pe care nu le poţi integra în traseul individual?

Dacă nu ai văzut filmul „ *When Time Ran Out (1980)* ", iată cum au decurs lucrurile. După ce Hank s-a adresat oamenilor, majoritatea s-au revoltat împotriva lui. Foarte puţini l-au urmat fiindcă „nu era un expert" şi, mai ales, fiindcă nu reuşise înainte de toate să-şi salveze propria lui echipă de lucru.

Evenimentul cumplit a fost acela că toţi cei care au rămas în hotel au fost înghiţiţi de vulcan. Singurii care au scăpat cu viaţă au fost cei care au răspuns chemării lui Hank.

Ca să capeţi autoritate în faţa oamenilor, trebuie să restabileşti firul conducător al convingerilor lor, trebuie să le inspiri acel sentiment de solidaritate puternică care să-ţi acopere orice imperfecţiune şi să-ţi amplifice măsura competenţelor tale, aducând argumente convingătoare în sprijinul opiniilor şi deciziilor tale.

Aşa cum o experienţă muzicală poate fi ratată dacă muzicianul se concentrează pe propria persoană şi nu pe muzică, tot aşa valul ce te poate propulsa înaintea celorlalţi oameni poate fi ratat dacă ei nu continuă să-şi canalizeze spre tine toate acele resurse interioare care produc recunoştinţa şi ataşamentul lor.

Leadershipul este un factor de impact psihologic care produce urmări pe măsura convingerilor şi emoţiilor oamenilor. Ca să-i faci pe oameni să răspundă chemării tale, ca să trezeşti în ei acel simţământ de mulţumire interioară care face loc instalării stimei şi respectului reciproc, ca să-i determini să-şi pună toată nădejdea în tine - atunci trebuie să elimini din conştiinţa lor acel simţământ intens de nesiguranţă şi incertitudine şi să-l înlocuieşti cu unul de unitate şi încredere.

Leadership: Prezenţa punctelor tale de vedere în orice loc şi în orice faptă reprezintă certitudinea atingerii obiectivelor chiar şi atunci când realitatea nu-ţi oferă nici un fel de supapă de control în arta compromisului?

În spaţiul pretenţios al solidarităţii, care înclină spre o succesivă fuziune de forţe, se concentrează cu precizie toate trăirile, toate învăţăturile şi toate contradicţiile, într-o îmbinare de pragmatism, idealism şi justeţe. Unica lor valoare fiind de a facilita acceptarea necondiţionată a unei mai mari centralizări și de a suda mai bine această uniune, a cărei finalitate este leadershipul.

Însă dacă majoritatea trăsăturilor indivizilor, dacă mentalul colectiv rămâne alterat în pofida oricăror măsuri de susţinere care acţionează predominant în baza unor interese comune, atunci prezenţa leadershipului nu mai poate reprezenta o certitudine a atingerii unui obiectiv.

Schimbării percepţiei generale a oamenilor asupra realităţii, generată într-un mod uimitor de leadership, i se poate atribui o valoare de unitate doar dacă există un acord al tuturor forţelor participante la o acţiune de cooperare. Dacă însă convingerile oamenilor întemeiate pe zvonuri sau pe o cercetare îngustă, au ca unic rezultat incapacitatea liderului de a formula direcţii de acţiune într-un context problematic în care se impune luarea rapidă a unei hotărâri, înseamnă că ei pun mai presus de orice procentajul ridicat de îndoială, fiind conduşi de sentimentul de rivalitate.

Leadership: Doreşti să-i pui pe ceilalţi înaintea intereselor personale, dar reţinerea propriilor nevoi constituie o negare a propriei persoane într-o ipostază de care nu poţi scăpa?

Palide reflectări ale unei evidenţe refuzate. Căci aşa cum durerea arată în ce ritm se petrece vindecarea leziunii, tot astfel ideile preconcepute despre "marca" liderului arată în ce măsură o valoare investită produce un rezultat aşteptat, sau arată în ce măsură alegerile făcute determină obţinerea rezultatelor dorite. Un singur calcul eronat asupra valorii liderului, nevoia interioară fundamentală a oamenilor de a se alinia părerii generale îi împiedică să se deblocheze din dilemele lor.

" *Ce zic ceilalţi?* ", " *Ce crede majoritatea?* " (şi foarte rar " *Ce cred eu?* ") rămân aceleaşi principale motive prin care omul înţelege să se subordoneze "dreptei", adică unei logici mai înalte şi prestabilite în termenii unei viziuni şubrede, concentrate pe securitate, dar care lasă de dorit.

De aceea tind să cred că solidaritatea înfloreşte mai cu seamă în vecinătatea unor situaţii sigure, a unui viitor sigur, care nu pune în şah rolul liderului. Dacă sentimentul individual ar fi mai mare, dacă omul s-ar axa mai mult pe propria gândire, şi mai puţin pe spiritul de turmă, probabil că propagarea solidarităţii nu ar întâmpina mari probleme.

O negare a propriei persoane într-o ipostază de care nu poţi scăpa se produce atunci când riscul la care te expui este maxim şi simţi că nu-ţi mai aparţii ţie însuţi, ci unui început al deznodământului iminent cauzat de cursul evenimentelor.

Primul prag al leadershipului stabileşte poziţia ta definitorie în viaţa oamenilor. Este pragul cel mai important al evoluţiei tale, dar şi cel mai greu de atins, prin care trebuie să asiguri o conexiune foarte bună între convingerile oamenilor şi aşteptările tale. Dacă nu reuşeşti să stabileşti o concordanţă deplină între nivelul real al încrederii pe care ţi-o acordă oamenii şi capacitatea ta de a influenţa convingerile lor, atunci nu vei reuşi niciodată să-i determini să te urmeze (mai ales în situaţiile dificile). Ca să primeşti undă verde din partea celorlalţi trebuie să creezi un sentiment de siguranţă în sufletul lor.

Concluzie: Pentru a câştiga încrederea majorităţii oamenilor trebuie să restabileşti firul conducător al convingerilor şi sentimentelor lor. Competenţele tale şi experienţa profesională demonstrată în relaţia cu ei sunt argumente convingătoare ca şi antecedentele tale privind modalităţile de rezolvare a unor situaţii dificile, când ai învins scepticismul unora şi reaua voinţă a altora.

Atenţie însă, totdeauna să te sprijini pe date concrete, să ai informaţii corecte de la specialiştii în domeniul în care nu deţii controlul şi mai ales să ai o capacitate de a prevedea pericolul iminent care poate duce la pierderi de vieţi omeneşti. A te aventura, a utiliza argumente care nu au o bază solidă, a risca vieţile oamenilor de dragul orgoliului tău şi a intereselor tale personale, este un pas greşit care te va costa mult.

Primul sens al abisului

On August 29, 2014

Realizează o configurare corectă a parametrilor existenţiali, identificând o viziune care să se potrivească propriei tale individualităţi.

Niciodată nu îmi fixam ceva anume în minte, în aşteptările neliniştite ale impactului cu ceea ce se numeşte „primul sens al abisului". De ce aş fi făcut-o? Nu eram o fiinţă aparte, propriul rege în propriul său regat, dar eram mereu în căutare de ceva nou. Ceva care să se recreeze din imaginar, de dincolo de necunoscut, dar în acelaşi timp asemănându-se cât mai mult cu normalitatea.

Era o etapă necesară în evoluţia universului meu, prin percepţia unei realităţi indescriptibile. Extinderea unei dimensiuni diferite de cea care era setată în subconştientul meu. Ea se traducea într-o schimbare lăuntrică, născută din experienţa în lucrul cu materia resuscitată din cenuşa unei stele muribunde - impulsiunea mea secretă, intensitatea proiecţiei mele într-un viitor deja prezent.

Încrezător, eram pătruns de ideea că avea să fie palpitant, dar nu a fost deloc aşa. Nu aveam nici cea mai vagă idee despre cum ar trebui să arate sau cum ar trebui să procedez pentru a obţine ceva palpabil, ceva care se poate comunica, care se poate exprima prin cuvinte. Viaţa mea lăuntrică era plină de gânduri, care mai de care mai sofisticate, mai pline de energie, mai uşor de mânuit sub umbra realităţii care nu era provocată de vreo forţă necunoscută. Ci se datora chiar celui aflat în eroare.

Mi-aş fi dorit să nu ştiu niciodată că marea ştiinţă poate transforma parametrii puterii de construcţie a alternanţelor „ *închis-deschis* ", de la intensitate mare şi tensiune mică, la intensitate mică şi tensiune mare. Şi invers. Găsesc totuşi că asta era interesant. Creaţia, pe care viaţa cu provocările ei multiple o ridica în faţa mea, era un fenomen ambiguu la care asistam neputincios. Păream devorat de ecouri misterioase, provocate de concretul vieţii și îndreptarea lui înspre abstract.

Leadership: Ai puterea să te adânceşti în sânul unei realităţi care depăşeşte graniţele admisibilului, sub influenţa unei forţe de redefinire a fundamentelor dezvoltării sinelui?

Tot ceea ce se concretizează în posibilitatea de exprimare a gândurilor, stărilor, are ca prim reper autenticitatea individului. Recurgând la consolidarea poziţiei sale de susţinător al unei viziuni aparte, în sensul pe care îl are efectul pozitiv al puterii de exprimare a propriei individualităţi, prin extinderea dimensiunii existenţiale, viitorul lider îşi poate amplifica domeniul de cercetare. Pe această cale el oferă condiţii extrem de adecvate adâncirii relaţiilor dintre ştiinţă, experienţă şi lumea care îl guvernează pe el însuşi.

Există diferite modalităţi de a-ţi exersa leadershipul, la fel cum există diferite modalităţi de receptare a realităţii, verificând şi validând raţionamentele prin care îţi poţi regândi existenţa. Iar fiecare modalitate are o funcţie uşor specializată, prin care se realizează schimbarea lăuntrică, controlând tendinţele de căutare a noului în imaginar şi mai ales în imaginarul reprezentat de formele de acceptare a ceea ce eşti cu adevărat.

Vrei să găseşti ceva, da aşa e, ceva care să se identifice cu viziunea ta, ceva care să se potrivească propriei tale individualităţi şi să scoată în evidenţă ceea ce gândeşti. O posibilitate de reglare a curentului de „inadmisibil" prin modificarea forţei de creaţie. Iar asta înseamnă de fapt că viaţa ta lăuntrică este plină de gânduri, care mai de care mai sofisticate,

mai pline de energie, mai uşor de mânuit sub umbra realităţii care nu este provocată de vreo forţă necunoscută.

O realitate care depăşeşte graniţele admisibilului este o operaţie complexă a gândirii prin care extragi dintr-un complex de trăsături ale unui eveniment sau fenomen anumite caracteristici definitorii pentru perceperea sinelui și a propriei identități în raport cu ceilalți.

Dar până să te simţi oarecum "pus în faţa faptului împlinit", până să atingi nivelul de rodire al propriei tale persoane şi a experienţei în leadership, trebuie să elimini orice eroare care poate determina anularea conştiinţei de sine, a identităţii pe care o presupune apartenenţa la un nou real.

Înainte să goneşti prin meandrele unei judecăţi care nu se înscrie în normele obişnuite, schimbând regulile leadershipului, realizează o configurare corectă a parametrilor existenţiali, identificând o viziune care să se potrivească propriei tale individualităţi.

Rişti să te adânceşti în eroare dacă te încerci mereu să creezi din imaginar noi structuri de puncte de reper pentru redefinirea propriului sine şi a propriului rol în procesul tranziţiei de la o fază stagnantă la una de dezvoltare progresivă. Astfel leadershipul va căpăta un alt sens, nedorit, de supremaţie în sfera creaţiei şi irealităţii, în loc de echilibru şi armonie în sfera vieţii şi a realităţii concrete.

Influenţa unei forţe de redefinire a fundamentelor dezvoltării sinelui se poate constata din percepţia pe care o ai asupra "inefabilului" unei creaţii ce o poţi atribui îndeosebi unui Dumnezeu din afara înţelegerii tale. Ea se materializează într-o schimbare lăuntrică care încurajează, la rândul ei, confirmarea unei noi revelaţii despre concretul vieţii manifestat în varietatea propriilor emoţii, trebuinţe, născociri, căutări şi eşecuri.

O viziune care se potriveşte propriei tale individualităţi este construită pe pilonii unei realităţi ascunsă dincolo de ceea ce se vede, dar care poate fi percepută prin contemplarea lucrurilor cele mai evidente, prin contemplarea atentă a schimbărilor, prin contemplarea unor plăsmuiri născute din experienţele vieţii reale.

Primul sens al abisului face referire la acel sistem de autocontrol instituit de fiecare lider, care trebuie să domine atât parametrii săi existenţiali cât şi viziunea proprie, forţa de creaţie şi viaţa sa lăuntrică, până la atingerea scopului propus.

Abisul este un spaţiu plin de mistere, plin de imaginaţie, în care ai acces nelimitat, dar care nu îţi garantează victoria în lupta cu tine însuţi, cu ceea ce devii în marea ecuaţie a vieţii. Ce sens va căpăta leadershipul tău în cazul unei înfrângeri?

Primus Inter Pares

On Martie 20, 2016

Menține condiţiile de producere a unei gândiri referenţiale, finisând capacitatea de a transforma munca creatoare într-un angajament de consolidare a experienței de însuşire a culturii de seamă.

Eisenstein interzicea studenţilor să-l oprească pe coridor cu întrebări puse între patru ochi: „toate problemele le voi rezolva cu participarea tuturor". Lecţiile sale erau nişte discuţii aprinse, lansa întrebări, studenţii toţi răspundeau, discutau, se disputau diferite soluţii, până când profesorul conchidea. Gălăgia discuţiei se linişteа atunci. Studenţii mai făcuseră un pas în a învăţa să gândească creator.

În expunerea să programatică, Eisenstein spusese limpede: Profesorul nu este altceva decât *primus inter pares* - primul între egali. Colectivul, şi mai târziu fiecare membru al său individual, îşi croieşte drumul propriu prin greutăţile şi chinurile muncii creatoare, prin întregul proces al formaţiei creatoare, de la prima slabă licărire a temei, până la hotărârea dacă nasturii de pe haina de piele a ultimului figurant sunt potriviţi pentru scopurile filmării.

El cerea o maximă precizare în gândirea studenţilor: *"Nu spune cred. Până nu ştii, nici nu vreau să te aud." Cerea studenţilor să devină, înainte de toate, oameni de cultură. Să gândească cu propria lor minte. Lecţiile sale erau fascinante.*

Leadership: Optezi pentru linia neîntreruptă a unei solicitudini realizate într-un context de tipul „Nu spune cred, arată mai întâi că știi" ?

Condiţiile de producere a unei gândiri referenţiale, finisând capacitatea de a transforma munca creatoare într-o datorie morală pe termen lung, într-un angajament de consolidare a experienței de însuşire a culturii de seamă, se referă și la diferenţierea mijloacelor active și practice, produse printr-un anumit tip de reacție. Este vorba de acea reacție la fascinaţia pe care o exercită un impact psihologic puternic ce creează un context de tipul *„Nu spune cred, arată mai întâi că știi."*

Cultura cea mai de seamă este rezultatul muncii creatoare, o obişnuinţă a minţii de a-şi croi drumul propriu prin greutăţile şi chinurile vieţii de artist, plină de schimbări şi durere, este o iniţiativă de genul "gândeşte singur înainte să consulţi pe alţii" expusă unei evaluări de impact care însoţeşte orice măsurare a performanţei.

Leadershipul este interesul pe care îl obţii din partea celorlalţi oameni spre realizarea unor performanţe bine integrate într-o viziune (estetică) şi într-o atitudine de recunoştinţă faţă de grija cu care reuşeşti să sugerezi un nou stil de abordare a idealurilor de cultură prin integrarea cunoaşterii individuale în activitățile de creaţie. Leadershipul prelucrează aspirația iniţiatului într-un domeniu spre unirea cu o formă de cunoaştere erudită, spre obţinerea unei expansiuni a mecanismelor de producere a artei şi culturii.

Artistul cel mai solicitat este o lecţie de deschidere către tot ce este nou în plan cultural, prin atragerea cât mai largă a interesului celorlalţi practicanţi de artă spre elaborarea unor modele de modernizare a stilului de concepere a unei "Opere Totale".

Primul pas făcut în a învăţa să gândești creator, datorită capacităţii de aflux al informaţiei în conștiință, în spirit, dar mai ales în mentalitatea valorizatoare, prin extinderea tendinţei către

unitatea dintre idee și idealul stilistic, de obicei se asociază și cu năzuinţa de a desăvârşi un proiect comun, un concept personalizat sau un proces care te responsabilizează.

Acest pas se situează întotdeauna pe regiunile proeminente ale sferei identitare, în special acea parte din tine care îți amintește că eşti important când gândești primordial cu propria ta minte, iar ce faci tu contează în primul rând pentru tine. Oameni de cultură gândesc cu propria lor minte. O operă totală este un produs al propriei minţi, al minţilor libere, nu o marionetă a minţilor celorlalţi.

Iar cea de-a doua caracteristică a acestui prim, dar important pas, este că, în deosebire de amprenta pe care experiența de a gândi singur o lăsă între aspirație și motivare, rămâne apreciabilă acea latură artistică prezentă în tine ce te determină să vezi lucrurile din perspectiva raportării la un model absolut de logică și inventivitate.

Orice măsurare a performanţei ar trebui să evidenţieze căutarea reperelor de sustenabilitate în originalitatea realizării actului de creaţie şi satisfacţia construirii unei atmosfere educative a culturii în spiritul unei profunde comuniuni artistice.

Primus Inter Pares este omul care rezolvă problemele cu participarea tuturor, dar având puncte de vedere mai bune decât ceilalţi şi o cultură mult mai largă.

În leadership, greutăţile şi chinurile muncii creatoare au caracteristic accesibilitatea producerii considerentului că trebuie să fii „primul între egali". Deducând de aici faptul că este nevoie de o anumită continuitate în asimilarea acelor cunoştinţe care condiţionează capacitatea de a înţelege şi folosi corect informaţiile pe care le recepţionezi de la alții și le amplifici de la tine.

*** Notă:** Ion Barna - *Eisenstein* , Editura Tineretului, 1966.

Principiul acceptării selective

On Februarie 02, 2011

Acceptă-i pe ceilalţi în viaţa ta, şi vei descoperi partea pozitivă din tine.

Nu ştia decât un singur lucru să facă, dar îl făcea mai bine ca oricine: să ucidă. Ca orice asasin profesionist, Leon nu aparţinea niciunui loc şi nimănui. Era un fugar, destul de abil ce-i drept, care nu cunoştea afecţiunea, fidelitatea, nu avea niciun fundament în viaţa lui, niciun ţel, nicio aspiraţie, nimic. Nu ştia decât să asculte de părintele său adoptiv, Tony, un mafiot care îi dădea tot felul de misiuni. Dar cu cât avea mai mult succes în meseria sa – cu cât îndeplinea mai multe misiuni, cu atât fugea mai mult şi mai departe. Şi cu atât se accepta mai puţin. Cu atât era mai posac şi mai ursuz, şi din ce în ce mai indiferent cu viaţa lui şi cu viitorul său.

Aşa cum precizam şi în articolul precedent, " *Turnul de fildeş al lui Leon* ", din momentul în care Leon a "înfiat-o" pe Mathilda, viaţa lui a luat o altă turnură. Nu a mai fost omul singuratic, pustiu, lipsit de sentimente şi dorinţe. Ci a dobândit o nouă personalitate, a devenit o fire mai deschisă, mai sociabilă, mai comunicativă şi chiar romantică, capabilă să preţuiască mai mult pe cei din jur şi lucrurile din jur.

Leadership: Validarea sentimentelor tale ascunse ar trebui să succeadă validarea continuităţii de a păstra un obicei care te limitează?

Îndrăzneala de a te descoperi mai bun este forţa primară vitală care îţi asigură continuitatea în a lua decizii şi a acţiona în spiritul integrării armonioase într-o existenţă care depinde de afirmarea ataşamentului şi de îngrijirea omului.

În romanul "Shantaram", scriitorul Gregory David Roberts a spus o vorbă mare, care în limba pashto înseamnă: "Nu eşti bărbat până nu-ţi oferi iubirea cu adevărat şi fără niciun fel de constrângere unui copil. Şi nu eşti un om bun până când nu câştigi dragostea sinceră a unui copil."

Leon a găsit la Mathilda ceea ce nu găsise nicăieri în altă parte. A găsit o fărâmă de visare, o picătură de dragoste, un strop de linişte sufletească. Clipele petrecute în compania fetei, au făcut ca sufletul său să simtă starea de împlinire şi de iubire necondiţionată. Partea bună din el s-a trezit la viaţă.

Fără niciun fel de constrângere, deschizându-şi sufletul în faţa acestei copile, Leon a mers la Tony, cel care îi administra banii, şi l-a rugat să-i doneze lui Mathilda, în caz că vreodată se va întâmpla ceva cu el. Iată dovada certă a bunătăţii sale. Iată dovada că oricine se poate schimba şi poate deveni mai bun, dacă este deschis şi îi acceptă pe ceilalţi în viaţa sa.

Leadership: Acţionezi conform unui crez care îşi anunţă prezenţa într-un echilibru de stabilitate în toate condiţiile de exploatare a experienţei de creare a unei lumi noi?

Lumea pe care contribui s-o înfrumuseţezi cu detalii ale personalităţii tale ascunse, fără a te comporta prin asumarea "suferinţei" faţă de neglijarea puterii tale de autoritate, trebuie să fie rezultatul unui echilibru cantitativ şi calitativ între ceea ce de defineşte şi ceea ce te inspiră.

Îţi aminteşti, desigur, cunoscuta poveste "Frumoasa şi Bestia", nu-i aşa? Bell petrecea ore în

şir citindu-i Bestiei, învăţând-o să mănânce cum se cuvine, să danseze, etc. Încet-încet, Bestia a ajuns să se asemene tot mai mult cu un om. A aflat ce înseamnă blândeţea şi mărinimia, gingăşia, smerenia şi recunoştinţa. Iar Belle, cu toată duioşia şi înţelegerea de care era în stare, a ajuns să o îndrăgească tot mai mult. Şi, îndrăgostindu-se de ea, de partea pozitivă din ea, vraja s-a spulberat – Bestia se prefăcu într-un prinţ deosebit de frumos şi iubitor.

Impactul pe care îl au ceilalţi oameni asupra ta, este crucial. Leon, ca şi Bestia, s-a transformat într-o altă persoană, o persoană mai bună şi mai sufletistă. El a reuşit, de asemenea, să treacă peste complexele pe care le avea – datorate firii sale posace, şi a meseriei sale. Astfel, a simţit că există, că există cu adevărat, că poate avea sentimente faţă de ceilalţi oameni. A ajuns să se descopere pe sine însuşi, să-şi descopere partea pozitivă din sine. El a atribuit vieţii sale un alt sens – în concordanţă cu latura lui sufletească bună. (Dar dacă transformarea Bestiei a fost totală, a lui Leon a fost doar parţială, el rămânând un asasin cu...suflet bun.)

Grandoarea este dependenţa de a te forma ca fiinţă sufletească, gânditoare şi morală, în condiţiile prielnice ale biruinţei în lupta cu ceea ce ai înrădăcinat rău în tine.

Cel mai important lucru în viaţă este să descoperi că poţi fi un om cu calităţi şi valori morale deosebite, nu unul cu defecte şi fără calităţi. Fii optimist şi gândeşte pozitiv. Nu te lăsa stăpânit de haosul pe care defectele îl produc în sufletul şi în mintea ta !

A te accepta pe tine însuţi ca un element pozitiv, înseamnă să descoperi şi să vezi mereu partea bună a lucrurilor. Înseamnă să intri în armonie cu propriul tău "univers" şi să accepţi partea pozitivă a universului celorlalţi. Înseamnă să-ţi trăieşti viaţa fără să manifeşti niciun fel de repulsie faţă de nimeni, chiar dacă nu eşti întru totul de-acord cu ei.

Principiul acceptării selective se referă la acceptarea acelor părţi pozitive din oameni care promovează dezvoltarea şi progresul lor.

Categoric proverbul “cunoaşte-te pe tine însuţi şi vei putea cunoaşte pe ceilalţi” are un tâlc pe care mulţi îl cunosc, dar puţini îl înţeleg. Pentru un lider este esenţial să-şi cunoască oamenii cu care lucrează şi să descopere părţile pozitive din ei, potenţialul lor şi să le dezvolte acea dorinţă de îmbunătăţire continuă.

Pentru a reuşi acestea, trebuie în primul rând să se cunoască pe sine. Desigur, reuşita liderului depinde şi de alţi factori cum ar fi nivelul educaţional, cultural, nivelul IQ-ului, etc.

Principiul ascensiunilor paralele

On Noiembrie 07, 2024

Ascensiunea unei extreme va duce întotdeauna la ascensiunea celeilalte extreme, asemenea unui contrabalans al contrariilor în care polaritățile se caută și se completează într-o armonie perfectă.

În labirintul existenței noastre, fiecare urcuș spre o extremă devine catalizatorul unui alt urcuș. Asemenea unui "Astralis Vorterix Luminex", punctul de convergență unde contrariile își dau întâlnire, extremele se atrag și se potențează reciproc, într-un orizont inedit, dintr-un proces perpetuu al devenirii. Exact așa stau lucrurile în marele circuit al alergărilor montane, pe care munții, falnici și maiestuoși, îl găzduiesc an de an în România. Iar în timp ce momentele de intensitate maximă transformă competiția fizică într-o expresie a căutării echilibrului universal, căutarea punctului culminant al oricărui efort devine însăși expresia setei de absolut.

Da. Fiecare urcare este o șansă de a-ți regăsi echilibrul pierdut. În acest loc al transcendenței, observ cum fiecare salt spre o limită devine oglinda unui alt salt. Este ca și când universul ar fi conceput o serie de trepte duble, unde urcarea pe o parte atrage inevitabil ascensiunea pe cealaltă parte, asemenea unui tablou de Escher unde scările par să urce în direcții opuse, dar ajung în același punct. Aici, sora mea, Oana Fântânaru, devine aproape de fiecare dată expresia unui artist cu mare deschidere spre noi orizonturi, prin faptul că transformă fiecare pas într-un act creator.

Leadership: Cum reușești să transformi tensiunea dintre doua extreme într-o forță creatoare, făcând din aparenta lor opoziție o sursă de energie și progres?

Cu fiecare pas spre o extremă, *y con la fuerza del destino inevitable,* cealaltă extremă își intensifică propria ascensiune, într-un ritual de echilibru și completare reciprocă. Că lucrurile stau așa, ne-o confirmă însăși Oana, de fiecare dată când pașii ei se înalță sub un impuls artistic, formând împreună cu mișcarea un continuum în care coexistă universul unei povești triumfătoare prin însăși arta corpului de a se transforma într-un instrument al transcendenței. Polaritățile efortului fizic și ale spiritului creator se întâlnesc în punctele culminante ale cursei, coincid cu momentele de grație ale victoriei, din care doar una recreează spațiul artistic al performanței pure, prin oglindire cu vibrația unui strigăt al inimii în care se amestecă strălucirea culorilor vieții reinventate cu teama, neliniștea, angoasa în fața luptei competiționale.

Această dinamică a contrariilor, dintre ceea ce consumă energia și ceea ce o regenerează, îmi amintește de cuvintele lui Hermann Hesse: *"Întotdeauna când un om a ajuns la cea mai înaltă treaptă a unei extreme, va descoperi că cealaltă extremă l-a așteptat acolo dintotdeauna."*

Tot astfel, în căutarea limitelor, Oana a descoperit de fiecare dată că extremele sunt de fapt porți spre aceeași realitate fundamentală: *"Tot ceea ce mă consumă fizic, în același timp mă înalță spiritual."*

Vârful este culmea farmecului. Acolo sus, totul pare că stă suspendat, într-un echilibru instabil, deasupra abisului, însă voința nestrămutată menține starea de "grație transcendentă", ca un fel de planare extatică peste piedicile și greutățile întâlnite pe parcurs. Spațiul dintre extremele acestor două stări, anume epuizarea fizică și elevația spirituală, devine un Nexoris Ethereal Synoptix, un câmp de forță unde polaritățile se întâlnesc și se transformă. Asemenea unei picturi de Kandinsky, unde formele geometrice rigide se îmbină cu fluiditatea culorilor, extremele își găsesc armonia în aparenta lor contradicție.

Leadership: Urcușul tău spre limite dezvăluie puterea unei chemări lăuntrice către echilibru, reflectând un ecou adânc ascuns în miezul unei viziuni creatoare?

Ochiul explorator al Oanei captează sinergia dintre ascensiune și auto-descoperire. Mă refer la faptul că polaritățile dintre constrângere și eliberare, conștient și inconștient, se întâlnesc în momentele de grație, din care doar cel conștient recreează spațiul artistic al performanței pure, prin oglindire cu esența spiritului creator. În această alchimie a contrariilor, este vital să înțelegem că fiecare extremă poartă în sine sămânța propriei transcendențe. Precum în arta japoneză a kintsugi, unde fisurile devin linii de aur, extremele se completează creând o nouă formă de frumusețe.

Fiecare pas pe care Oana îl imprimă în munte se transformă într-un act creator ori de câte ori depășește limitele obișnuitului, dobândind o dimensiune transcendentă pe care arta o numește "revelație". Este într-adevăr o revelație să vezi cum limitele fizice se topesc în intensitatea urcușului, încât fiecare provocare să devină o expresie a continuării cursei pe un drum nou. Repet, în acest complex joc al ascensiunilor paralele, fiecare extremă devine învățător pentru cealaltă. Este precum acel moment descris în Tao Te Ching când înțeleptul realizează că lumina și întunericul sunt două fațete ale aceleiași realități.

Nu degeaba, viziunea creatoare a Oanei se poate exprima în felul următor: *"Fiecare pas e o afirmare a spiritului, o mărturie a curajului de a sculpta propriul meu drum în piatra destinului."*

Leadership: În ce măsură reușești să menții echilibrul între forțele opuse, transformându-le într-un proces de creație mai degrabă decât într-un conflict destructiv?

Nu este fiecare extremă o oglindă pentru cealaltă? De parcă universul ar fi conceput un sistem perfect de echilibre, unde fiecare forță își găsește contraponderea exactă în opusul său, iar Oana, prin arta de a îmbina contrariile, reușește să recreeze miracolul marii capodopere numită: "armonia extremelor". Adică transcendența prin efort, prin acceptarea ideii că limitele sunt doar puncte de transformare, în versiunea unui raport armonios între forță și fragilitate. În final, devine evident că principiul ascensiunilor paralele nu este doar o lege a naturii, ci o cale de înțelegere a întregii existențe. Extremele devin astfel nu puncte opuse, ci parteneri în planul spiritual al devenirii.

Oana va continua să participe la concursurile montane de running, știind că după fiecare vârf de munte cucerit, va urma altul, că fiecare moment artistic trăit este sinonim cu actul creator prin faptul că transcende limitele obișnuitului. Prinsă în acest proces de transformare, prin care fizicul devine artă pură, arta Oanei de a alerga prin spații montane infinite, cu acea grație neîmblânzită, ne atrage atenția asupra faptului că autenticitatea se naște din depășirea limitelor, în sprijinul ideii că "fiecare pas este o nouă creație". Până la urmă, este și asta un fel de artă, să te știi creator al propriului destin, propunând ca semnificat pentru esența capodoperei o poveste vie sculptată într-un tablou al nesfârșitei deveniri.

Leadershipul se manifestă prin capacitatea de a recunoaște și orchestra dinamica extremelor, transformând tensiunea lor într-o sursă de creație și evoluție continuă.

Principiul ascensiunilor paralele se aplică atunci când extremele se întâlnesc continuu. Această înțelegere profundă ne relevă că în orice urcuș spre o extremă se ascunde promisiunea unui alt urcuș, într-o spirală continuă a devenirii unde contrariile se completează și se transcend reciproc. Oana face dovada măiestriei acestui urcuș, menținându-și promisiunea că, întotdeauna, pentru a face artă, trebuie să reușești să transformi efortul în grație, dincolo de granițele vizibilului. Fiecare pas către extremă devine o oglindă pentru o altă dimensiune a creșterii personale.

Principiul autodepăşirii

On Iunie 17, 2010

Nu poţi să-i depăşeşti pe ceilalţi dacă nu te depăşeşti pe tine însuţi.

Ieri am fost în vizită acasă la unul din prietenii mei cei mai buni, Andrei, care este un foarte bun medic stomatolog. Mi-a strâns mâna cu căldură, dându-mi a înţelege că se bucura nespus de mult să mă vadă. Nu ne mai văzuserăm de câteva luni bune, şi trebuie să recunosc că şi eu m-am bucurat să-l revăd.

Pe unul dintre pereţii din camera lui era înrămată o vorbă de duh: „Caută să fii cel mai bun". Asta mi-a atras atenţia şi mi-a stârnit cu adevărat curiozitatea. M-am gândit că asta ar putea fi o oportunitate din care aş putea afla multe lucruri interesante şi utile. L-am întrebat:

- Andrei, e pentru prima dată când văd înrămată vorba aceasta pe peretele tău. Ce însemnătate are ea pentru tine?

Părea pregătit pentru această întrebare. A aranjat câteva foi de hârtie de pe birou, apoi s-a uitat la mine zâmbind, şi mi-a răspuns:

- Nicu, ce vezi tu acolo pe perete, este de fapt motto-ul după care m-am ghidat toată viaţa. Este motto-ul care m-a ajutat să-mi construiesc o carieră promiţătoare, să-i depăşesc pe toţi ceilalţi colegi ai mei, şi să ajung la nivelul la care sunt acum. Este motto-ul care m-a ajutat să fiu întotdeauna energic şi peste măsură de ambiţios.

Am studiat din greu la şcoală, mi-am economisit alocaţia şi mi-am asigurat un loc la Universitatea de Medicină. Pe parcursul anilor mi-am perfecţionat cunoştinţele, aptitudinile, şi cu fiecare an am păşit pe o treaptă mai înaltă faţă de anul precedent. Am avut de trecut foarte multe examene ca să demonstrez cunoştinţele şi aptitudinile mele de excepţie, şi ca să ajung şef de promoţie în fiecare an. Am depus eforturi considerabile pentru a termina studiile şi, apoi, să mă calific ca medic specialist. Iar acum, după cum bine ştii, cabinetul meu stomatologic este mereu plin de pacienţi. Sunt mândru că am căutat să fiu cel mai bun, sunt mândru că am ajuns un foarte bun specialist.

Leadership: Conţinutul tău de valoare se întinde pe mai multe cereri de conţinut?

Nu poţi fi mai presus de ceilalţi oameni, dacă nu realizezi mai mult decât ei. Asta este ceea ce prietenul meu, Andrei, m-a învăţat ieri. Pofta lui nesecată de a-şi întrece colegii şi de a fi cât mai bun erau la fel de puternice ca şi incapacitatea de a renunţa la visurile sale. Căutând să ţintească cât se poate de sus, învăţând şi practicând zi de zi, Andrei şi-a depăşit toţi colegii şi şi-a conturat o carieră de invidiat. Cu alte cuvinte, el a aplicat principiul autodepăşirii: „Nu poţi să-i depăşeşti pe ceilalţi dacă nu te depăşeşti pe tine însuţi."

Andrei este un om deosebit, cu multe calităţi care l-au ajutat să devină genul de doctor pe care şi-l doresc toţi pacienţii. Dar el a reuşit această performantă prin perfecţionare continua, prin dobândirea unei experienţe vaste, prin dobândirea de noi competenţe. Altfel spus, fiind interesat de meseria sa, a ridicat stacheta perfecţionării. Acum Andrei este un profesionist devotat meseriei de medic stomatolog. Iar faptul că are o experienţă bogată şi cunoştinţele necesare pentru a vă oferi cele mai bune tratamente, îl ajută şi îi dă credibilitate în relaţia cu oamenii.

Cererile de conţinut, întemeiate exlusiv pe opţiunea de a te eticheta cu un "preţ" determinat de aspiraţiile spre performanţă, înglobează efortul de a te exprima prin munca ta şi de a te identifica cu ea, dincolo de tendinţa de a te crede mai bun decât ceilalţi. Aşa cum frumosul constituie conţinutul artei, tot astfel forma de a te dărui menţinerii unei atitudini de implicare se accelerează cultivându-ţi un simț al lucrului bine făcut.

Leadershipul este preţul pe care ţi-l acorzi singur cu maximă grijă şi respect când eşti autentic în ceea ce simţi, în ceea ce faci, în ceea ce vrei să te reprezinte.

Ca să câştigi trebuie să ridici mereu ştacheta. Viaţa noastră este o competiţie în care avem de trecut anumite bareme împreună cu alţi competitori. Esenţial este însă ca atunci când ajungem la maturitate să ştim ce vrem, să ştim unde vrem să ajungem şi cum să ajungem, pe ce căi, la punctul terminus. Iar odată ajunşi acolo să ne putem declara mulţumiţi de ceea ce am realizat. Asta înseamnă să avem un plan de viaţă, un plan de carieră, ca treptat să ajungem, trecând de multe bariere, acolo unde ne-am propus. Căci autodepăşirea este în strânsă legătură cu existenţa unui plan în carieră.

Ca orice plan şi planul în carieră are mai multe etape, şi-n fiecare etapă îţi propui să realizezi ceva. A realiza mai mult decât ţi-ai propus înseamnă să te autodepăşeşti, adică să te implici cu tot elanul în munca ta, să te perfecţionezi continuu şi să îţi foloseşti întregul potenţial lucrativ. Iar apoi, trebuie să-ţi verifici „statusul" profesional prin diferite metode specifice competiţiilor cum ar fi examenele, concursurile, etc. În aceste momente de evaluare poţi afla unde te situezi faţă de alţi competitori, şi ce trebuie să faci mai departe.

Autenticitatea este conţinutul indiscutabil al sublimului în care se păstrează "minunea" cotinuării formării personale pe tot parcursul vieţii.

După cum în medicină treci de la nivelul de medic stagiar, la medic specialist, apoi la medic primar, apoi la doctor, (avansând pe baza unor evaluări dure, la care nu toţi medicii rezistă), tot aşa există asemenea etape de perfecţionare în orice domeniu.

Se pune întrebarea de ce nu trece toată lumea aceste bareme, ci numai unii reuşesc să meargă mai departe? Există mai multe răspunsuri: fie pentru că individul şi-a fixat stacheta prea jos, fie că nu s-a autoevaluat corect, fie că nu şi-a dat suficient interesul.

P.S. Când nu există dorinţa de autodepăşire şi implicit dorinţa de a-i depăşi pe alţii, nu poate exista performanţă. Individul care nu rezistă competiţiilor sau le evită, nu poate ieşi niciodată învingător. Şi înseamnă că s-a plafonat, înseamnă că se mulţumeşte cu un status mediocru.

Principiul autoexcluderii

On Ianuarie 20, 2010

Când un lider este nehotărât, nehotărârea lui va determina propria lui excludere din cursă.

Celui nehotărât nu-i este dat să atingă atât de uşor excelenţa în leadership. O exaltare, un avânt, îl poate arunca pe om, ca o rachetă, dincolo de limitele proprii, dar dacă nu-i este hărăzit să ajungă în vârful piramidei şi să se stabilizeze la acel nivel, dacă îi lipsesc trăsăturile puternice de caracter, cum ar fi încrederea în sine, hotărârea sau voinţa, atunci încercările sale se vor dovedi, fără doar şi poate, pieritoare.

M-am convins de acest adevăr, că unora nu le este dat să reuşească în ceea ce şi-au propus, din cauza nehotărârii, după ce am urmărit filmul *"Vertical limit (2000)"* . Dacă îl vei urmări şi tu sunt convins că îmi vei da dreptate.

Tom McClaren, un alpinist excepţional, este desemnat să conducă o expediţie pe muntele K2 din Himalaya. El are o mare responsabilitate: trebuie să-i ducă până în vârful muntelui pe miliardarul Elliot Vaughn şi pe Annie, o alpinistă cu renume. La început vremea fusese minunată, soarele se înălţa limpede şi strălucitor pe cer, nu era aproape deloc vânt. La un moment dat Tom este contactat de bază şi avertizat asupra schimbărilor condiţiilor meteorologice. Pentru o clipă el se gândeşte să abandoneze misiunea. Dar pentru că existau 70% şanse ca vântul să-şi schimbe direcţia, şi mai ales la insistenţele lui Annie şi Elliot, el ia hotărârea să continue escaladarea.

Leadership: Condamnarea ta este consecinţa confruntării finale între ceea ce te-ai angajat să îndeplineşti şi ceea ce nu ştiu ceilalţi că eşti cu adevărat?

Când ajung la 7800 de metri Tom este din nou contactat de bază, dar de data aceasta i se comunică faptul că o furtună mare se apropie de ei, şi este somat să abandoneze imediat escaladarea şi să se întoarcă. Tom pare că presimte o mare nenorocire. Însă ezită să ia o hotărâre fermă. Elliot îl provoacă să continue ascensiunea, altfel se va face de ruşine şi va trăi toată viaţa cu ruşinea asta. Iar Tom, ca un supus, îi dă ascultare.

Toţi trei îşi continuă drumul. Aşa cum era de aşteptat se porneşte furtuna, iar ei sunt prinşi într-o cavernă acoperită de o avalanşă. Tom este rănit grav. După numai câteva ore se îmbolnăveşte, ca şi Annie, din cauza unei crize de edem pulmonar. Singura lui şansă de supravieţuire era să-şi injecteze dextroză. Dar dozele erau prea puţine. Iar Elliot ştia că nu va mai dura mult până ce se va îmbolnăvi şi el.

Ceea ce urmează apoi este o scenă demnă de neuitat. Tom îl face pe Eliot răspunzător de tot ceea ce s-a întâmplat: "Nu am fi ajuns aici dacă nu erai tu". Iar atunci Elliot îi aduce aminte: "Tu ai fost conducătorul, Tom".

În final, Tom este omorât de Elliot, cel care i-a propus să continue urcuşul, dar căruia nu trebuia să i se supună niciodată.

Leadershipul este o situaţie de genul "Tu sau Ei" în care vei avea avantaj, pentru că tu eşti cel care are dreptul să facă compromisuri, deoarece tu eşti cel care face acţiunea şi tot tu o suporţi.

Faliment la mare altitudine. Să fim sinceri şi să recunoaştem, lui Tom i-au lipsit calităţile de lider. El trebuia să conducă, iar Annie şi Elliot să-l urmeze. Însă, de fapt, lucrurile au stat exact pe dos. Elliot şi Annie, dar mai ales Elliot, l-au condus în direcţia dorită de ei şi din păcat, în final, la moarte.

De fapt, principala greşeala a lui Tom a fost nehotărârea. Când ar fi trebuit să ia o atitudine fermă, a ezitat. În loc să-şi asculte instinctul, în loc să-şi impună autoritatea pe care o avea ca lider, a ascultat de Elliot. Iar când un lider este nehotărât, nehotărârea lui va determina propria lui excludere din cursă. Asta este ceea ce eu am numit "Principiul autoexcluderii".

Tom a reuşit să se saboteze singur prin şovăială şi nehotărârea de care a dat dovadă. Ca lider, a fost autorizat şi a avut datoria de a-i conduce pe Annie şi pe Elliot spre vârf, de a le oferi siguranţă totală ţinându-i departe de pericol. El trebuia să aibă ultimul cuvânt de spus, el trebuia să hotărască dacă pot sau nu să continue drumul, el trebuia să decidă schimbarea. Numai el ar fi putut influenţa ascensiunea. Dar Tom nu şi-a luat rolul în serios. A fost îngăduitor, s-a subordonat altora şi n-a meritat. El singur, prin atitudinea sa nesigură şi fragilă, prin sentimentul de ruşine şi vinovăţie, s-a autoexclus din cursă. Întotdeauna, din păcate, firile slabe şi uşor influenţabile, vor plăti preţul întreg.

Calitatea de a fi în frunte vine în contrast cu riscul de a fi eliminat de un jucător care are un profil asemănător cu al tău, care are un high-ranking şi ştie să joace de la distanţă prin forţa sugestiilor şi a emoţiilor. Prin contrast, nu vei putea să-ţi finalizezi obiectivele propuse printr-un îndemn la ascultare sau prin afiliere, chiar dacă vei câştiga teren împotriva acestuia. Ci numai dacă îţi vei dubla valoarea pierdută, adică dacă îţi măreşti eforturile de a te încadra tot timpul în limitele unei legi ce exprimă voinţa generală.

Întrebarea pe care trebuie să ţi-o pui înainte de a începe o ascensiune: eşti proiecţia unei forţe de răspuns pe o axă a privilegiilor de imunitate sau proiecţia unei stări sufleteşti mai presus de datorie?

Viziunea, delegarea autorităţii sau carisma, rămân doar nişte calităţi interesante. Ele pot da rezultate în multe situaţii, dar atitudinea este cea care stabileşte tonul în cazul liderului. Cel ce are o atitudine nehotărâtă, cel ce se lasă împins şi condus de oricine, în orice moment, şi are tendinţa de a persista în această stare, nu se poate numi lider ci mai degrabă o marionetă. Iar marionetele dispar rapid de pe scena vieţii.

Concluzie: A ajunge liderul unui grup presupune să ai şi obligaţii faţă de grup. Şi implicit drepturi decizionale în interiorul grupului. La rândul său, grupul este subordonat liderului. Orice insubordonare din partea grupului trebuie sancţionată pentru că altfel liderul nu-şi poate îndeplini menirea.

Lipsa de fermitate a liderului, atitudinea lui şovăielnică, incapacitatea decizională cât şi subordonarea la interesele individuale, decât cele comune grupului, vor conduce la decăderea lui din această postură, deci la excluderea lui datorită propriilor defecte sau slăbiciuni.

Principiul cleştelui

On Februarie 03, 2010

Cu cât aplici o presiune mai mare asupra oamenilor, cu atât aceştia se vor închide mai mult în ei.

Natura fiecărui om are 2 jumătăţi distincte: una plăcută, care îi încântă pe cei din jur şi îi face să se simtă mai bine, şi alta neplăcută, care iese la iveală în momentele de criză şi care îi respinge pe toţi cei din jur, îi demotivează şi îi face să-şi piardă interesul. De ce cred asta?

Îmi aduc şi acum aminte de vremea când jucam fotbal. Eram legitimat la un club de juniori din oraş, unde eram şi titular în echipa de bază. Zilnic mergeam la antrenamente, făceam eforturi enorme dar şi progrese mari. Îmi plăcea nespus de mult să joc fotbal, a fost pasiunea mea cea mai mare din timpul liceului.

Antrenorul era un tip destul de înalt, voinic, cu părul scurt, roşcat, şi faţa puţin pistruiată. Dar ceea ce îl face de neuitat este firea lui irascibilă. Avea mereu toane şi izbucnea din orice. Nu se mai sătura să ţipe şi să înjure. Pentru el, orice greşeală făcută de un jucător, oricât de mică, însemna o mare greşeală. Era însă considerat de mulţi ca fiind un foarte bun antrenor.

Leadership: Experienţa pe care o atribui unui rezultat dezamăgitor constituie de fapt reprezentarea unei imagini despre sine care se integrează într-un context de tipul "Cu ce m-am ales dintr-un foc cu două acuzaţii"?

Într-o zi am jucat un meci amical cu o echipă de juniori din Constanţa parcă. A fost un fiasco total. La pauză era 3-1 pentru ei. Am fost chemaţi în vestiar rapid de antrenor. Furios, cu un început de lacrimi în ochi, dezamăgit până în adâncul sufletului, a exclamat cu vehemenţă:

- Aşa deci. Vă bateţi joc de mine. De munca mea. Eu pentru ce naiba vă antrenez? Ca să jucaţi ca nişte ciubote obosite?

Mintea i-o luase razna. Începu să ţipe, să ne critice, să ne jignească. Unul dintre băieţi, săturat de atitudinea agresivă a antrenorului, şi-a scos tricoul, l-a aruncat pe jos şi dus a fost.

A doua repriză începu. Cele 45 de minute s-au scurs într-un chip dureros şi neconstructiv. Am jucat cu toţii cu frică de a nu face cea mai mică greşeală, ceea ce automat ne-a determinat să greşim. Ne pierdusem încrederea în noi. Şi am mai primit două goluri. Scorul final, 5-1. Cum spuneam, mai rău nici că se putea. Antrenorul era roşu de furie. Dacă v-aş povesti tot tărăboiul pe care l-a făcut, n-aţi mai dori citiţi până la capăt acest articol.

"Un foc cu două acuzaţii" este expresia unei atitudini ofensive, atribuită de regulă antrenorului, tradusă prin manifestarea lipsei de respect pentru toţi cei implicaţi în joc şi prin lipsa de viziune în ceea ce priveşte preţul unei anumite scăderi a succesului său motivaţional, sau în ceea ce priveşte performanţa pe termen lung a echipei.

Leadership: Eşti titularul unui act de voinţă asumată printr-o convenţie de constituire a unei servituţi sau prin acceptarea unei certitudini de reuşită interioară?

Omul care năzuieşte să transforme pe toată lumea după modelul său de putere nu va reuşi

niciodată să câştige acceptarea unei certitudini de reuşită interioară. O astfel de reuşită, comparată cu un izvor care nu seacă niciodată, poate fi aşteptată din partea acelei nădejdii trezite la viaţa de culorile ce le conturează nota concepţiilor despre autoacceptare, şi doar în acele acţiuni care se săvârşesc cu ajutorul împrejurărilor oferite de promovarea unei culturi de autoexaminare.

Felul în care antrenorul ne-a influenţat nu este deloc de neglijat. Dorinţa lui bolnăvicioasă de a ne critica ori de câte ori nu obţineam rezultate extraordinare, ipocrizia, atitudinea nepotrivită în situaţii diverse, standardul prea înalt pe care l-a stabilit şi pe care ni l-a impus, presiunea pe care o exercita asupra noastră, toate acestea ne-au determinat să plecăm la un alt club de fotbal. Două sau trei luni mai târziu, mai bine de jumătate activam la un alt club de fotbal.

Cum poate cineva să atingă un nivel considerabil de performanţă, atâta timp cât este aşezat mereu în umbră, criticat în permanenţă, învinuit de incompetenţă sau lene, catalogat drept necooperant? Ce simte cineva ori de câte ori îi este insultat, înjurat sau denigrat? Cât poate suporta un om toate acestea? Până când? Şi care va fi efectul?

Realitatea este că, cu cât cineva aplică o presiune mai mare asupra oamenilor, cu atât aceştia se vor închide mai mult în ei. Vor deveni tot mai confuzi, apoi se vor simţi tot mai vinovaţi că nu sunt în stare de mai mult. Vor deveni nedoritori şi indiferenţi. Vor refuza să mai coopereze, se vor izola îşi vor construi un zid de apărare. Iar în final îşi vor căuta un alt loc de muncă. Cu alte cuvinte, cine încearcă să-i constrângă pe oameni, aidoma unui cleşte, să-i împlinească dorinţele, va obţine rezultate contrare.

Leadership: Felul în care îţi defineşti experienţa de sine în interiorul unui joc de adevăr se reflectă în felul cum îţi gestionezi imaginea de care vrei să scapi?

Un lider influenţează pe cei din jurul său prin ceea ce face, fie într-un mod pozitiv, fie într-un mod negativ. Prin atitudinea sa el poate face rău sau poate face bine, îşi poate fixa scopuri măreţe pe care să le atingă într-o perioadă mai scurtă de timp, sau pe care să nu le atingă niciodată. La urma urmelor totul depinde de el însuşi, pentru că el este acela care dă oamenilor tonul necesar pentru a se perfecţiona şi evolua, ca în final să obţină rezultate extraordinare.

Prin felul său de a fi îi poate inspira pe oameni în acţiunile lor, atât în cadrul organizaţiei, cât şi la nivel personal, aducându-i astfel mai aproape de el. Dar, pe de altă parte, îi poate strica pe oameni, îi poate face nefericiţi, distrugându-le respectul de sine, imaginea de sine şi încrederea în sine. Iar în final, dacă oamenii nu dau randamentul scontat şi nu obţin rezultatele aşteptate, cel ce pierde este liderul.

Imaginea care te reprezintă poate fi produsul experimentării autonomiei personale, a autorităţii personale sau a trăirilor emoţionale care îţi înfrumuseţează viaţa şi îţi îmbogăţesc spiritul. Care dintre acestea îţi schimbă modul de a-ţi exprima autenticitatea, indiferent dacă asta şochează "normalitatea"?

Adevăratul joc pe care îl supervizează antrenorul nu este fotbalul, ci experienţa de sine în faţa unui adevăr care îl poate dezarma total: poţi scăpa de ceea consideri a fi exces de zel, dar nu poţi fugi de ceea ce te consumă.

Munca cu oamenii este foarte grea. „Materialul uman” este diferit de alte materiale şi trebuie investită multă muncă şi răbdare care, desigur, necesită multă energie şi disponibilitate din partea liderului. El trebuie să aibă un temperament şi comportament echilibrat, făcând tot posibilul să se coboare la nivelul de înţelegere al colaboratorilor, să fie el însuşi un om

maleabil şi flexibil, bineînţeles în anumite limite.

Principiul cleştelui se aplică atunci când liderul nu-şi cunoaşte opreliştea limitelor. Cu cât aplici o presiune mai mare asupra oamenilor, cu atât aceştia se vor închide mai mult în ei.

Principiul constantei de a fi (II)

On August 23, 2012

Găseşte factorul principal şi decisiv al înţelegerii naturii tale reale, ca să reuşeşti să identifici elementul primordial care stă la baza atingerii excelenţei.

Trebuie să-ţi spun ceva. Ce nu ştie nimeni. O vreme în viaţa mea a mai existat cineva, suprem, nobil şi transformator. O formă perfectă a unei alte persoane, o entitate terță, o parte din felul meu de a fi caracterizată de o cunoaştere autentică, nemijlocită. O entitate care voia să se desăvârşească, strecurându-se tăcută, *clandestine et irrévérencieux* , în restrânsul folder al conştiinţei mele, destinată parcă să devină o piatră de temelie în construirea viitorului meu.

Era un fel de manifestare artificială a propriei mele identităţi, o excrescenţă în zona mea funcţională, un pivot puternic care pătrunsese nedesluşit, adânc şi temeinic în mine, împingându-mă cu hotărâre, constrângător, dincolo de limitele conformismului. Mă găseam într-o situaţie inversă, şi revelatoare, care ridica însă anumite probleme. O încercare de a-mi depăşi propria condiţie?

Totul era destul de complicat. Voia să devenim prieteni, să-mi suplinească orice slăbiciune, să ne contopim cele două forme de cunoaştere, să existăm în afara oricăror raporturi de subordonare. Un refuz al realului?

Orice deviaţie de la punctul ei de vedere ar fi fost privită ca o contestare a sinelui meu, a părţii care mă intriga. Nu era suficient să ştiu cine e sau ce e, când şi de ce urma să se alieze cu mine. Trebuia doar să înţeleg la ce e bună. Şi de ce conta. Şi la ce trebuia să renunţ în favoarea ei.

Tăria unei creaţii constă din două elemente – puterea voinţei de a te reprezenta în rolul unui personaj şi puterea de a accepta relevanţa particularităţilor tale.

N-aveam de ce să mă simt vinovat, dar era atât de absurdă situaţia aceasta. De parcă aş fi pătruns într-una din acele cărţi covârşitoare, teribile a căror influenţă înmoaie firea omului, transformându-mă dintr-un personaj pozitiv în unul negativ, şi invers, deci incluzându-mă cu preponderenţă în categoria personajelor inconstante care persistă întotdeauna în a se desconsidera, sau mai rău, în a se comporta ca inamici, rareori ca aliaţi. Căci cum poţi să rezonezi cu o forţă dacă orice coabitare cu ea te nelinişteşte?

M-am străduit să păstrez totul în taină, ca un om care îşi ascunde adesea natura reală sub o mască a aparenţei. Nu trebuia să iau prea în serios inclinaţiile mele de "extremă stângă". Totuşi, am senzaţia stranie că dacă am fi rămas apropiaţi, totul ar fi fost altfel. Nu ştiu... într-un fel oarecare cred că ne-am fi completat.

Am pornit-o pe calea sigură a certitudinii. N-am permis nimănui, nici unei forţe dominatoare să-mi complice existenţa. A urmat o nouă trecere de la "a nu fi altceva", la "a fi ceea ce sunt". Evoluam spre o devenire constructivă. Realitatea efectivă era lucrul cel mai important.

Sunt eu însumi, deci exist în prezent. Tot restul e o utopie, chiar şi când e vorba de realul cel mai concret. Mi-am înţeles trăirile, blocajele. Mi-am acceptat complet personajul.

Angajamentul față de un leadership eficient în vremuri de schimbare implică menținerea clarității propriei identități, evitând distorsiunile care pot apărea sub presiunea circumstanțelor

Iată deci, încă o dată, pentru ce îndrăzneala de a risca posibilitatea unui alt scenariu. Ipoteza unui alt viitor posibil, a unei alte judecăţi, a unei alte surse de „a fi” este foarte probabilă. În cazul de faţă cel al artei de a deveni ceea ce nu eşti cu adevărat, o lentilă prin care adevărata ta identitate reuşeşte să-şi diminueze percepţia favorabilă despre ea însăşi.

A învăţa să conduci eficient este o adevărată provocare pentru lideri. A-i învăţa pe alţii să conducă eficient este una şi mai mare. Dar cel mai dificil este să-i înveţi cum să-şi gestioneze şi cum să-şi manifeste identitatea, luptând cât mai mult pentru a şi-o menţine nealterată.

Ai imprima o poză pe o hârtie de proastă calitate? A nu-ţi gestiona cum trebuie propria identitate este ca şi cum ai imprima o poză pe o hârtie de proastă calitate. Adevăratul tău fel de „a fi” iese cu blur, cu nişte tente şterse sau prea aspre, uniforme, sau chiar ireale.

A fi autentic înseamnă să îți amplifici calitățile umane, refuzând compromiterea esenței tale în favoarea unei imagini superficiale.

“A fi” presupune să fii diferit, sau să rămâi constant cu tine însuţi? Iată o întrebare la care aş vrea tare mult să am un răspuns, mai ales din partea unui “creator de leadership”. Convingerea mea nestrămutată este că un lider se poate auto-construi, îşi poate amplifica calităţile de “Om”, nu doar cele necesare pentru reuşita în business, doar dacă redescoperă acea parte esenţială din felul său de a fi - acel act raţional de angajare existenţială în orizontul conştiinţei şi cauzalităţii.

Sau, în cuvinte mai simple, cine refuză să fie ceea ce este cu adevărat, riscă să intre în conflict cu propriul Eu şi să-şi limiteze potenţialul. Dacă te adânceşti într-o stare de confuzie şi dezorientare, în călătoria spre “devenire”, nu vei putea să-ţi asumi responsabilitatea pentru formele concrete de configurare ale viitorului pe care ţi-l pregăteşti. Dacă te detaşezi de ceea ce te caracterizează nu-ţi vei putea menţine „constanta de a fi”.

"Tu însuţi" este modul de a te raporta la lucrurile care contează cu adevărat atunci când îți accepți stările interioare așa cum sunt ele, fără să le judeci, fără să le dai un nume, fără să le opui rezistenţă.

Porneşti pe calea largă a certitudinii în căutarea constantei de a fi ceea ce eşti cu adevărat? Cum îţi manifeşti propria identitate? Evoluezi spre o devenire constructivă? Realitatea efectivă este lucrul cel mai important după care te ghidezi? Te auto-incluzi cu preponderenţă în categoria personajelor inconstante care persistă întotdeauna în a se desconsidera? Poţi să rezonezi cu ceva care nu te reprezintă?

Ca să-l parafrazez pe celebrul scriitor Alexandre Dumas: “ *Noi mergem spre ideal, dar înainte de a ajunge acolo, avem de străbătut o pădure întunecoasă, apărată de monştrii ignoranţei şi falsităţii, o regiune necunoscută pe care nu o vor putea lumina decât aceia care şi-au înţeles trăirile, blocajele.* ” Aceia care şi-au acceptat complet personajul.

Leadership: Poţi să comunici motivul de a exista printr-o mască a aparenţei care îţi surprinde plăcut orice aşteptare legată de cine eşti atunci când eşti doar cu sufletul tău?

Să devii ceea ce eşti. Să rămâi constant cu tine însuţi, nu să renunţi la ceva în care crezi şi să te subordonezi unei influenţe străine, a unui alt mod de a fi. Să îţi afli identitatea, să te regăseşti şi să îţi glorifici măreţia.

Adevărata istorie, remarca cineva, este aceea a progresului omului. De aceea tind să pun semnul întrebării asupra temeliei leadershipului. Cred că leadershipul ar trebui să aibă incorporat o funcţie care să ajute omul să se formeze, să se desprindă de ceea ce-l limitează, de a-l ajuta să devină ceea ce este capabil să fie.

Cucerirea propriei identităţi ar fi pentru orice om, lider sau nu, o mare mândrie.

Un model de leadership care integrează dezvoltarea personală presupune menținerea unui echilibru între constanță și adaptabilitate, fără a pierde esența sinelui.

Principiul constantei de a fi aduce în prim plan nevoia de a ne găsi individualitatea. În leadership, şi nu numai, fiecare dintre noi trebuie să ne găsim individualitatea, să ne descoperim propriul Eu cu toate cele bune şi rele, şi să ne dezvoltăm acea parte din noi care ne reprezintă, care construită cu perseverenţă şi tenacitate să ne conducă spre excelenţă.

Suntem la fel şi totuşi diferiţi. Fiecare dintre noi poartă pecetea unei personalităţi aparte, are veleităţi deosebite şi un mod de prelucrare diferit a propriului Eu. Esenţial este să descoperim, să cizelăm şi să perfecţionăm acea parte din noi care ne reprezintă şi care să aibă un efect constructiv, deci care ne poate conduce spre excelenţă.

Principiul constantei de a fi (III)

On August 28, 2012

Direcţionează-ţi eficient atenţia spre tine însuţi, pentru a descoperi acele calităţi şi valori care vor favoriza dezvoltarea ta ulterioară.

Mi se părea că, într-o singură noapte, am făcut un salt peste un deceniu: mă ridicasem cu mult deasupra fiinţei mele. Simţeam că mă trădasem puţin, că îmi încălcasem instinctul de conservare. Dar în această ascunsă şi reformatoare agitaţie a gândurilor, a pretenţiilor contradictorii, se cristalizase o nouă năzuinţă ce putea fi benefică existenţei mele.

Aşa cum primii oameni care ajunseră în America crezuseră că găsiră din întâmplare raiul pe pământ, a doua Grădină a Edenului, pe mine mă bucura enorm gândul că găsisem din întâmplare o uşă, o cale de a ieşi dintr-o dilemă morală, *la pénétration a l'intérieur d'une fenêtre du temps* , care îmi putea condiţiona dezvoltarea ulterioară.

Voiam să pătrund în resorturile ultime ale marilor necunoscute ale vieţii, să înţeleg rosturile, mecanismele care maximizau sau minimalizau existenţa mea pe această lume, într-o asemenea măsură încât să fertilizez acel "ceva" din gândirea mea încă neconturat. Să îmi găsesc un loc în această aventură a cunoaşterii şi a orientării într-o epocă în care extraordinarul concurează cu neverosimilul.

Înţelesesem că pot fi altcineva, că pot trăi atât în prezent cât şi în viitor, în spatele unei măşti bine puse la punct. Îmi denaturasem adevărata personalitate? Cred că mă obseda ideea unei înţelegeri, adânci şi nelimitate, între mine şi cel ce puteam fi. Era poate singura modalitate de a mă dezvălui, de a face cunoscută experienţa mea responsabilă, hotărâtă, bazată parcă pe un secret pe care-l ascundeam de-o veşnicie.

Leadership: Trebuie să faci un compromis între a înţelege că poţi fi altcineva decât ceea ce eşti şi modalitatea de a te dezvălui drept cunoaştere a unei experienţe anterioare?

Nu puteam nega, cu un fel de profundă disperare, ceea ce era evident, ceea ce declanşase în subconştientul meu o întreagă nebunie. Ca un val mareic incontrolabil se revărsau împrejurul meu taine ale unei renaşteri fără precedent, tot la fel cum există taine ale binelui şi ale răului. Viaţa şi faptele, gândurile şi trăirile mele se desfăşurau, cred, într-o dimensiune nebănuită, plină de culoare, de magie şi în continuă mişcare. Refuzasem în mod deliberat să văd şi să înţeleg realitatea, adevărul despre cine eram.

De fapt nu era nimic grav, imoral, în neregulă cu mine. Inedită era doar miza pusă în joc pe parcursul procesului în care intram în rezonanţă cu propriului meu Eu. De parcă m-aş fi avântat într-o zonă interzisă, într-un spaţiu gol, nedefinit, în care puteam să creez, ca o corelare între căutările mele şi nevoia de a mă cunoaşte, un nou profil care să fie utilizat exclusiv pentru o reliefare a contrastului dintre două personaje, dintre esenţă şi aparenţă. Perspectiva era copleşitoare. Şi fascinantă.

Din anumite puncte de vedere, mă temeam că nu mă voi maturiza niciodată. Simţeam că mă abandonasem în încercarea de a adăuga noi valenţe vieţii. Ceea ce aducea o inedită şi şocantă imagine asupra întregului meu fel de a fi. Nu-mi puteam închipui că linia de comuniune între mine şi cel ce puteam fi se putea oricând întrerupe, iar imensul efort de consolidare a sinelui să se erodeze precum albiile râurilor după o mare viitură.

Prin excelenţă, trebuia să fiu ceea ce întotdeauna am vrut să fiu, şi nu o trădare care rodeşte mai târziu în spinii căutărilor. Trebuia să înţeleg avertismentele unei transformări, a unei noi creşteri, a revoluţiei interioare care îmi putea accelera devenirea, şi să devin conştient de puterea ei. Doar astfel puteam să mă înţeleg, să-mi desluşesc menirea, adevăratele motivaţii interioare.

Leadership: Poţi să extragi aurul din lecţiile vieţii ca să-ţi creezi o imagine relevantă asupra întregului tău fel de a fi?

O prognoză sau un calcul pozitiv al traiectoriei probabile pe care o urmează propria ta cale de dezvoltare va stimula mai mult implicarea ta în procesul de cunoaştere şi adaptare la situaţii noi de leadership.

Ceea ce aduce o inedită şi relevantă imagine asupra întregului tău fel de a fi, este "aurul" pe care îl extragi din lecţiile vieţii. Este acel grad de maturizare care provine dintr-o mai bună cunoaştere şi care face posibilă întregirea propriului tău fel de „A fi", raportarea continuă la valorile tale. Este sentimentul de superioritate faţă de tine însuţi - că nu mai eşti cine erai, că înţelegi mai bine lucrurile, că priveşti de undeva de sus şi mai corect.

Leadership: Evoluţia ta este în concordanţă cu factorii ce acţionează la nivel mai degrabă profund şi subtil?

Procesul de maturizare este o parte importantă a leadershipului. Linia de comuniune dintre tine şi cel ce poţi fi se poate oricând întrerupe, iar imensul efort de consolidare a sinelui va fi inutil dacă maturizarea ta nu decurge armonios. Când căutările tale spre o desăvârşită "devenire" şi nevoia de a te cunoaşte se întrepătrund, abia atunci se vor contura mai clar, încetul cu încetul, adevăratele tale calităţi şi valori.

Direcţionează-ţi eficient atenţia spre tine însuţi pentru a descoperi acele calităţi şi valori care vor da un sens benefic acţiunilor tale viitoare şi care vor favoriza dezvoltarea ta ulterioară.

Desigur, nu este suficient să doreşti dezvoltarea unui fenomen într-o anumită direcţie, să înţelegi avertismentele unei transformări, a unei noi creşteri, pentru ca aceasta să se şi realizeze, mai ales dacă evoluţia ta nu este în concordanţă cu factorii ce acţionează la nivel mai degrabă profund şi subtil.

Vertebra care uneşte Leadershipul de Dezvoltarea Personală

Poţi atinge un grad înalt de maturizare, te poţi îndrepta spre excelenţă dacă porneşti în această aventură a cunoaşterii şi a orientării într-o lume în care extraordinarul concurează cu neverosimilul. Căci fiecare dintre noi suntem împinşi, asemenea curentului unui fluviu, într-o zonă în care drumul este mărginit de pretenţii contradictorii, de năzuinţe care nu cunosc împlinirea, idei şi obiective care sunt nerealizabile în ritmurile vieții contemporane.

Exteriorizarea unei false identităţi, existenţa unei percepţii de sine deformate, constituie tot atâtea stavile în dezvoltarea ta. Acest lucru denaturează adevărata ta personalitate. Şi, în consecinţă, îţi vei ascunde identitatea reală în spatele unei măşti. După cum cărbunele şi diamantul sunt alcătuiţi din acelaşi element, tot astfel leadershipul şi dezvoltarea personală, care îţi condiţionează existenţa ca "Om", nu doar ca "Lider", sunt unite printr-o singură vertebră: potenţialul de a fi ceea ce eşti în realitate.

Simţi că te abandonezi în încercarea de a adăuga noi valenţe vieţii? Care este factorul care

aduce o inedită imagine asupra întregului tău fel de a fi? Înţelegi avertismentele unei transformări, a unei noi creşteri care îţi poate accelera "devenirea"? Refuzi în mod deliberat să vezi şi să înţelegi realitatea, adevărul despre cine eşti cu adevărat? Poţi trăi atât în trecut cât şi în prezent şi mai ales în viitor, în spatele unei măşti bine puse la punct? Singura modalitate de a te dezvălui este să fii altcineva? Ţi-ai desluşit menirea, adevăratele motivaţii interioare?

Principiul constantei de a fi (III) accentuează ideea de transformare, canalizarea nevoii de a-ţi explora noi laturi ale personalităţii tale.

Să dai cortina timpului de-o parte şi să-ţi întrezăreşti viitorul este un deziderat urmărit de toţi. Dar numai cei ce au reuşit să se autocunoască, să-şi dezvolte "nativul" din ei, să urmeze calea desăvârşirii în concordanţă cu ceea ce sunt şi ceea ce pot fi, vor reuşi acest lucru.

Karma este Karma. Dar poate fi modelată în sens pozitiv şi benefic nouă, prin şi de către noi, în concordanţă cu realităţile actuale.

Source: https://neculaifantanaru.com/principiul-constantei-de-a-fi-III.html

Principiul constantei de a fi (IV)

On Septembrie 01, 2012

Modul în care îţi evaluezi limitele propriei tale lumi determină rezultatul procesului tău de transformare.

Înţelegeam totul cu o claritate care nu lăsa loc niciunui dubiu, neliniştitoare ca o amenințare de veacuri, ca o prevestire sumbră de viitor. De parcă m-aş fi redeşteptat, străpuns de o inspiraţie divină, dintr-o epuizantă rătăcire care ducea la damnare, care denatura adevăratul sens al propriei mele identităţi, canalizându-mi prezentul într-o direcţie greşită.

În existenţa mea încurcată şi impredictibilă de atunci, presărată cu sfărâmături de trăiri şi gânduri derutante, se produsese o schimbare adâncă, *une rupture de l'accord avec ma propre personnalité* . O linie întreruptă care îşi schimba direcţia la întâmplare. Intrasem în bucla unei perpetue şi clocotitoare crize de personalitate. Căutări, trădări, uitări, regăsiri, cugetări, nelinişti, fără puncte originare şi fără momente finale. De parcă aş fi continuat să trăiesc într-un spaţiu abandonat, într-un mediu imatur, nesigur, silenţios, înecat în necunoaştere.

Încărcat de toată povara unei uitări de sine, nemărturisită a unei vieţi programate şi înscrise într-un letopiseţ al neîmplinirii, mă expuneam primejdiei reînvierii unui statut blamabil. Nu eram capabil să revizuiesc și să reflectez asupra planurilor mele, în timp ce îmi utilizam cunoștințele în moduri incoerente, nefuncţionale.

Ca un om azvârlit brutal într-o altă lume, a cărui peisaj se schimbă la fiecare coborâre sau ascensiune a propriilor aspiraţii, mă transformasem într-o victimă a contradicţiilor, a anarhiei, a abisurilor raţionale, a propriilor mele vulnerabilităţi care mă chinuiau amarnic, neîncetat. Mă ascundeam de mine însumi de frică să nu săvârşesc un act ale cărui urmări nu le puteam prevedea.

Leadership: Te autoexaminezi pentru a preveni exploatarea oricăror lacune existenţiale, aşa încât să-ţi asiguri conformitatea de-a lungul întregului ciclu de evoluţie?

Numai un cod secret ar fi dezlegat şi lămurit cifrul tuturor tainelor care se revărsau asupra fiinţei mele ca valurile unui tzunami care vin unul după altul. Trebuia să treacă o vreme ca să alung imaginile de background care mă mistuiau, care mă prefăceau în altcineva, într-un înapoiat al conformităţii de a fi prezent la un nivel la care lucrurile sunt dincolo de cuvinte, şi să-mi reiau cursul obişnuit, necontradictoriu, al gândurilor pozitive.

Mă aflam, ca acel erou nedreptăţit de soartă al lui Stephen Crane, pe un tărâm straniu unde bântuise vitejia. Se petrecuseră răsturnări, dar până la urma ieşisem la suprafaţă, trecând prin toate încercările. Fusesem acolo unde domnise negrul dispreţului pentru tot ce implica felul meu de a fi, scăpând cu răni uşoare pe conştiinţă. Spaţiul dintre linia continuă şi întreruptă care mă unea de cel ce puteam deveni, umplându-se cu focul maturizării, al regăsirii de sine.

Un psihanalist ar putea spune că eram în căutarea identităţii pierdute, de doi - într-unul, care schimbau lovituri ca doi boxeri. Mă angajasem într-un meci cu mine însumi. Evoluam între un interior şi un superior legat printr-o instanţă simbolică a unei realități absolute. Un soi de separare de orice reper real care păstra distanţa de cine eram cu adevărat. O împletitură a tuturor formelor de excludere a oricărui individualism, a oricărui acord cu mine însumi, ce devenea din ce în ce mai trainică, ca o culoare care îşi are originile în celelalte culori.

Încet, încet, am ieşit la suprafaţă din îmbâcseala norilor denşi, negri, care mă acoperiseră la momentul inoportun. În sfârşit am fost în stare să înţeleg ceea ce mă prefăceam a nu pricepe şi să ţin pasul cu împrejurările prin care treceam.

Trebuia să umplu acea parte din mine care rămase în trecut, examinandu-mă prin prisma a ceea ce îmi imaginam că nu ştiam despre mine.

Leadershipul: Te afunzi în bucla prea accentuată a unei crize de personalitate ca să-ţi construieşti propria identitate?

Îţi poţi îmbunătăţi mai mult capacitatea de conducere printr-o abordare realistă a naturii umane care are potenţialul de a schimba în mod semnificativ mentalităţi, de a crea continuitate în propriile decizii, de a schimba regula jocului în ceea ce priveşte propriile capacităţi şi perspective.

" În interiorul fiecărei persoane mai în vârstă se află o persoană mai tânără care se întreabă ce naiba s-a întâmplat." remarca odată Cora Harvey Armstrong.

Înainte să antrenezi oameni, înainte de a schimba destine, înainte de a influenţa schimbările, trebuie să înţelegi lecţiile şi realităţile vieţii. Care uneori sunt foarte dure, alteori fac tumbe, ţopăie nestingherite într-un singur loc, sau te aruncă pe tărâmuri stranii unde bântuie vijelii; dispar prin subconştientul sau inconştientul tău, scot brusc la lumină tot felul de nereguli. Dar care te pot învăța, ghida, și inspira în procesul de devenire.

Direcţia leadershipului este reprezentată de acea linie neîntreruptă din viaţa ta, a omului care îşi construieşte propria identitate fără să se afunde în bucla prea accentuată a unei crize de personalitate care iterează la nesfârşit. Iar pentru ca identitatea ta să nu se deprecieze, trebuie să compui, să zugrăveşti portretul corect al părţii de bază a fiinţei tale care te apropie constant de cine eşti cu adevărat.

Ai intrat în bucla unei perpetue şi clocotitoare crize de personalitate? Te împotriveşti nevoii de a te transforma într-o victimă a contradicţiilor? Îţi canalizezi prezentul într-o direcţie bună, sau continui să trăieşti într-un spaţiu abandonat, înecat în necunoaştere?

O floare frumoasă şi foarte apreciată nu creşte pe toate drumurile, dar se poate usca oriunde dacă nu are condiţii optime de umiditate, temperatură şi lumină. Pentru ca personalitatea ta să fie în concordanţă cu adevăratul tău fel de a fi, trebuie să-i asiguri cele mai bune condiţii de a se dezvolta normal. Iar în acest scop numărul de voturi pe care îl acorzi existenţei tale trebuie să reprezinte cel puţin o treime din totalul resurselor, a investiţiilor pe care le faci în vederea formării propriului tău Eu.

Leadership: Un copac înalt în care se află o mulţime de fructe coapte

Oricât de entuziaste sau necesare sunt eforturile tale de "regăsire" a adevăratului potenţial de Om, nu doar de Lider, acestea trebuie să se înscrie în orizontul obiectivităţii pentru a deveni posibile şi acceptabile.

Iar un orizont insuficient de cuprinzător, care nu permite evoluţia unor forme de cooperare între cine eşti şi cine poţi deveni, în sensul confirmării şi conservării valorilor esenţiale care te definesc, se aseamănă cu un copac înalt în care se află o mulţime de fructe coapte. Trebuie să confecţionezi o scară tot atât de înaltă cât copacul ca să ajungi să le culegi pe toate. Această scară desemnează compromisul pe care îl faci pentru a-ţi menţine constanta de a fi.

Nu rătăci în roluri inconsistente care nu-ţi accentuează calităţile. Învaţă să distingi între un orizont al trecutului şi unul al prezentului.

Cu ce umpli spaţiul dintre linia continuă şi întreruptă care te uneşte de cel ce poţi deveni? Poţi enumera cel puţin trei factori care te obligă să păstrezi distanţa faţă de cine eşti cu adevărat? Cu ce umpli acea parte din tine care a rămas în trecut?

Modul în care îţi evaluezi limitele propriei tale lumi, determină rezultatul procesului tău de transformare.

Concluzie: Suntem materia vie care a fost modelată până la o anumită vârstă şi care în continuare este modelată şi finisată de noi înşine spre a deveni o veritabilă "operă de artă". Însă acest lucru necesită o bună autocunoaştere, o viziune de perspectivă a ceea ce putem să devenim în concordanţă cu o realitate prezentă şi viitoare.

Source: https://neculaifantanaru.com/principiul-constantei-de-a-fi-IV.html

Principiul constantei de a fi (I)

On August 18, 2012

Priveşte lucrurile din perspectiva a ceea ce poţi fi, acţionând în concordanţă cu ceea ce eşti.

Aveam nevoie de cineva care să mă cunoască, şi totuşi să nu mă cunoască. De un martor al unei mari tranziţii spre un „altceva" provizoriu neconturat. Cineva care să mă perceapă nu aşa cum eram de fel, ci aşa cum puteam fi după o mare transformare, după o noapte furtunoasă, *une rencontre avec moi-même* . Să uite de mine, ca apoi să-şi amintească. Şi invers, ca un fel de vice-versa.

O judecată fără cunoaştere? sau O cunoaştere fără judecată?

Întunericul mă învălui cu toată puterea lui, mistuitor şi rece, ca pe-o scoică de mare. Îl simţeam aproape ca pe un colos gata să mă strivească, sub forma unei structuri imense care se impunea mental, o unitate mistificatoare care îmi împiedica orice compromis cu raţiunea, orice motivaţie pentru participarea corespunzătoare la marea „devenire".

Leadership: Poți purta o luptă constantă cu uitarea de sine, menținând conexiunea cu realitatea **prin** acceptarea vulnerabilităților, pentru a deveni o forță de impact?

Decădeam tot mai mult în abisul înrobitor al uitării, al neştiinţei, al neînţelegerii din careul trecutului, al deteriorării propriei mele naturi. Mă condamnam singur, ca Chuck Noland, din " *Cast Away* ", punându-mi masca permanentă a separării de orice reper real, care concomitent mă supunea constant la un proces de uitare de sine. De parcă aş fi primit ordin de la însuşi Mephistopheles să distrug întreaga lume, începând cu a mea, căci scotea la iveală tot ce rămăsese artificial în relaţia dintre noi.

Ca o celulă vie, conştiinţa mea se lupta continuu pentru a exista, pentru simplul fapt că existenţa sa reprezenta o realitate care ieşea din cadrul anodinului şi anonimatului. Mă adâncisem într-o stare de confuzie şi dezorientare, la comanda unei utopii totalitare. Mi-era ruşine de tăcerea mea glaciară şi nesimţitoare faţă de omul care eram şi care îmi dăruise mai mult decât oricine, dar care se înjosea atât de mult în ochii realităţii prin aparenta nepăsare faţă de sinele propriu.

Am avut grijă să ascund totul. Breşa cea mai adâncă din existenţa mea a fost creată de dorinţa de a şti dacă aveam sau nu vreun control asupra propriului meu Eu. Doar aşa am izbutit să descopăr cele mai obscure taine ale părţii bune care se găsea în mine, vârful cel mai înalt al artei de a crea noi forme de înţelegere şi impact asupra felului meu de a fi.

Am simţit bucuria pură de a mă regăsi.

Leadership: Care este factorul care te poate transforma într-un "altcineva", știind că dorința de a înțelege propriul impact asupra vieții ar putea duce la cel mai înalt nivel al auto-cunoașterii?

Cunoaşterea de sine, raţiunea de a fi sau imaginea a ceea ce ţi-ai dori să fii, reprezintă tot atâtea motivaţii pentru o existenţă plină de responsabilităţi, dublată de conştientizarea semnificaţiei acţiunilor tale viitoare, ca lider.

Poţi lua decizii care să afecteze pozitiv leadershipul şi calităţile tale numai dacă creezi noi forme de înţelegere şi impact asupra felului tău de a fi. Dimpotrivă, unei autocunoaşteri care nu te încurajează să te laşi în voia naturii tale, în voia propriilor mecanisme de "autorefacere şi apărare", uneia care nu te încurajează să-şi exerciţi mai bine calităţile sau abilităţile excepţionale, îi va fi greu să ţină pasul cu leadershipul pe care îl doreşti.

Care este factorul care te împiedică să te apropii de cine eşti cu adevărat? Te laşi învăluit de întunericul mistuitor şi rece al unei autocunoaşteri incerte? Te adânceşti într-o stare de confuzie şi dezorientare care te face nesigur asupra a ceea ce aştepţi de la tine? Te supui unei judecăţi continue fără cunoaştere? Te loveşti de fluxul unei cunoaşteri fără judecată?

Felul de a te privi pe tine însuţi rezidă din cunoaşterea pe care ţi-o readuci aminte din ce în ce mai mult după ce te-ai transformat în altcineva.

Pentru a-ţi creşte nivelul de autoacceptare şi motivaţie trebuie să discerni asupra realităţii şi asupra propriilor gânduri. Dacă nu-ţi personalizezi drumul spre tine însuţi până ce izbuteşti să dezlegi cele mai obscure taine ale părţii bune care te caracterizează, nu vei reuşi să netezeşti semnificativ calea către luarea deciziilor corecte. De asemenea, nu vei putea să îmbrăţişezi acele valori care îţi pot orienta judecata şi acţiunile spre efecte, nu spre cauze.

Unui om conştient de capacitatea de neînlocuit a propriului său model de a fi, încrezător în inepuizabila profunzime a propriei sale fiinţe, şi care îşi călăuzeşte acţiunile în acest sens, viitorul nu-i poate rezerva decât confirmarea şi amplificarea acestor aşteptări, prin dezvoltarea unor noi forme corespunzătoare de manifestare a Eu-lui său.

Tu eşti martorul cel mai lucid al marii tranziţii spre un altfel de a fi altcineva. Indiferent ce aduce leadershipul, reuşita ta va veni odată cu modul în care foloseşti opţiunile care îţi dezvăluie caracterul privit prin prisma trecutului. Încearcă să vezi lucrurile şi din perspectiva a ceea ce poţi fi, acţionând în concordanţă cu ceea ce eşti.

Un leadership profund își găsește sursa în capacitatea de a dezlega cele mai obscure taine ale părții bune din noi, fiind amplificat de manifestarea unor noi forme de exprimare a determinării.

Principiul constantei de a fi scoate în evidenţă felul tău de a fi în acele situaţii, bulversante, când ai impresia că nu te priveşte nimeni, atunci când nu-ţi recunoşti calităţile.

Cogito ergo sum – cugeţi deci existi şi nu numai atât. Trebuie să-ţi direcţionezi gândirea spre tine însuţi pentru a descoperi acele calităţi care vor da un sens benefic acţiunilor tale viitoare şi care vor favoriza dezvoltarea ta ulterioară, făcându-te să fii "altcineva" în marea masă a liderilor.

Principiul corectitudinii

On Ianuarie 22, 2010

Nu pretinde de la oameni ceva în plus faţă de ceea ce pretinzi de la tine însuţi.

Cred cu tărie că tot ceea ce ni se întâmplă în viaţa are un scop. Ca fiinţe inteligente avem puterea, şi este de datoria noastră, să învăţăm câte ceva din fiecare experienţă pe care o trăim, fie plăcută sau mai puţin plăcută, fie antrenantă, fie descurajatoare. Iar dacă totul în viaţă se repetă, înseamnă că n-am învăţat nimic din lecţiile pe care am fi trebuit să le învăţăm. De aceea cred că omul în sine poate evolua cu condiţia ca el însuşi să-şi dorească să evolueze. Altfel, niciodată, nimic nu va fi nou sub soare.

Săptămâna trecută mi-a fost dat să întâlnesc un om special. Spun special deoarece, într-un fel, se deosebeşte de mulţi alţii. Şi mai ales pentru m-a învăţat o lecţie preţioasă care sunt sigur că îmi va folosi în viitor.

Eram într-o sală de sport şi jucam fotbal cu prietenii mei, cu unii dintre ei fusesem coleg la acelaşi club de fotbal cu mulţi ani în urmă. Sala era destul de încăpătoare şi modernă. S-a putut juca frumos. Însă, din cele trei echipe câte eram, una nu şi-a dat interesul să joace prea bine. Era evident lucrul acesta. Pasele jucătorilor nu se legau, nici nu-i de mirare pentru că majoritatea erau date la întâmplare. Pierdeau foarte multe mingi, nu alergau aproape deloc, nu se ajutau, ci jucau individual. Nu exista nicio conectivitate. Jocul lor curgea anapoda.

În momentul când am făcut o pauză, stând pe bancă lângă Andrei, căpitanul echipei cu pricina, nu am putut să nu-l întreb: *„ Andrei, de ce nu vorbeşti cu băieţii din echipa ta să se concentreze mai mult la joc? Nu vedeţi că nu vă iese nimic? Niciodată n-aţi jucat aşa slab ca astăzi. "*

În răspunsul pe care l-am primit stă numai laudă: *„ Nicu, aceşti băieţi au jucat alături de mine ani de zile. Ne cunoaştem foarte bine. Au şi ei încredere în mine, nu numai eu în ei. Dar dacă eu însumi nu joc bine, ei vânzând acest lucru, nicidecum nu se vor strădui să fie mai buni. Nu vezi că şi eu joc ca o ciubotă astăzi? De aceea nu pot pretinde de la ei ceva în plus faţă de ceea ce pretind de la mine însumi. Când eu am să joc bine şi n-am să mai pierd aşa uşor atâtea pase, abia atunci voi putea avea pretenţii de la ei. Altfel nu. Cum să mă urmeze, dacă tocmai eu sunt cel care joacă cel mai prost dintre toţi?*

Leadership: Te onorezi pe tine însuţi ca şi câştigător într-un test de performanţă, prin a avea încredere în reply-ul autorităţii tale la un mesaj de tipul: "Autentificare eşuată" ?

Rezultatele unei echipe depind de efortul depus de liderul ei. Andrei m-a învăţat în acea zi o lecţie importantă, pe care mulţi refuză s-o înveţe: atunci când liderul „joacă" slab, restul echipei abandonează lupta imediat. Dar, mai mult decât atât, că un lider nu-i poate critica sau judeca pe membrii echipei sale şi nu poate cere mai mult de la ei atâta timp cât el însuşi nu-şi face treaba impecabil.

Autoritatea unui lider eşuează considerabil, pricinuind un dezavantaj de imagine care nu se anulează de la sine, atunci când reacţia lui în faţa presiunii unei partide se îndreaptă către o altă faţă a naturii sale - manifestată prin dualitatea dintre voinţa de a vrea să schimbi ceva la tine şi instinctul de a sprijini o cauză mai mare. Cu alte cuvinte, are loc o autentificarea eşuată într-o experienţă de imagine prin care liderul ajunge la un nivel de interiorizare care îi zdruncină din rădăcini vechile credinţe şi principii, fiind chemat să se comporte în mod parţial faţă de el însuşi.

Mulţi lideri, şi aici mă refer la modul general, nu sunt atât de sinceri şi corecţi cum este Andrei. Ei cer de la oameni mai mult decât ei înşişi sunt în stare să dea. Este acesta oare un lucru normal? Sigur, înţeleg că unii care sunt într-o poziţie de lider au autoritatea de a interveni şi de a implementa anumite schimbări, de a impune reguli, de a lua decizii şi de a solicita subordonaţilor să se supună lor în vederea realizării scopurilor propuse.

Însă a pretinde de la oameni ceva în plus faţă de ceea ce eşti capabil să dai, mi se pare o lipsă totală de profesionalism. O lipsă totală de fair-play. O lipsă totală de respect faţă de membrii echipei care se străduiesc să facă o treabă cât mai bună, care îşi dau tot interesul să obţină rezultate cât mai bune.

Leadership: Eşti rănit de instinctul de a face o legătură între felul cum îţi percepi rolul și ceea ce îţi asumi când te înstrăinezi de şansa de a face o diferenţă în rezultatul echipei?

Să-ţi formezi o anumită convingere despre neacceptarea ta ca un întreg de emoţii şi tensiuni, apoi să treci la acţiune în conformitate cu ea, înseamnă să devii un om cunoscut sub învelişul unui comic aparent, nu sub un înveliş al aspiraţiei către performanţă şi perfecţiune. Solemn este numai cel ce vrea să fie, din toate punctele de vedere, pretenţios cu performanţele de care se mândreşte.

Iar cine se ancorează într-un om rănit de instinctul de a face o legătură între felul cum îşi percepe rolul și ceea ce îşi asumă când se înstrăinează de şansa de a face o diferenţă în rezultatul echipei, îngrijindu-se de gestionarea emoţiilor trăite prin angajamente ferme, se va menţine într-o stare permanentă de nemulţumire până când va abandona orice relaţie cu voinţa.

Datoria unui lider este să fie mereu lângă oameni, să le întindă o mână de ajutor atunci când este nevoie, să-i răsplătească pe fiecare după performanţele obţinute. Dar dacă el nu depune niciun efort, dacă nu manifestă niciun interes faţă de rezultatele echipei şi nu se implică deloc în susţinerea şi dezvoltarea ei, atunci subordonaţii, la rândul lor, nu vor avea motive reale să-şi dea interesul. Iar dacă liderul pretinde de la oameni mai mult decât poate oferi, atunci aceştia îl vor cataloga drept „necorespunzător" şi în final îşi vor căuta alt lider.

Leadershipul este şansa de a face o diferenţă în rezultatul echipei, fără să te laşi ghidat de circumstanţele de fundal create printr-un act de renunţare, de clemenţă sau de îndurare.

P.S. Întotdeauna trebuie să ţii cont de capabilitatea echipei dacă vrei să-ţi atingi scopurile propuse, şi să nu pretinzi niciodată de la oameni mai mult faţă de ceea ce pretinzi de la tine însuţi.

Principiul creatorului de artă

On Noiembrie 10, 2014

Determină realitatea ce intră în conul de lumină al investigaţiei temei pe care îţi propui să o abordezi, măsurând valoarea existenţei particularului din întreg.

Ce este mai important: pedanteria în respectarea detaliilor istorice, sau precizia în descifrarea evenimentelor, a sensului lor cu rezonanţa actuală? Cum să fie prezentaţi aceşti oameni care au trăit cu secole în urmă: stilizaţi hieratic în sensul operelor plastice ale epocii, cu gesturi de icoană, dictate involuntar de costumele vremii? Cum poate fi creat contactul cu aceşti oameni atât de depărtaţi şi totodată atât de apropiaţi de noi? Care să fie atitudinea faţă de acest "sfânt", genial conducător de oşti? Cum să ne fie înfăţişat personajul Nevski: înălţat în slăvi, sau coborât până la halat şi papuci?

Marele regizor găseşte soluţionarea acestor întrebări în elaborarea filmului. Interpretarea istorică este realizată prin punctul de vedere al prezentului, al actualităţii temei. Esenţială este pentru Serghei Eisenstein claritatea temei, sobrietatea verbală a filmului. Oamenii despre care va povesti filmul sunt, în fond, aceiaşi oameni ca şi noi. În ceea ce priveşte eroii din epocile trecute, putem discuta de la egal la egal cu ei, nu simţim nevoia să înjosim eroii trecutului şi nici să ne ridicăm în vârful picioarelor pentru a apărea de aceeaşi înălţime cu ei. *****

Leadership: Cum înfăţişezi viziunea despre om astfel încât el să se încadreze în tiparele unei structuri individuale de concepţie a operei?

În intenţia unei asocieri directe între modalităţile de consolidare a cerinţelor de conţinut ale creaţiei şi realizarea tehnică a unei noi platforme de inovare care să contribuie la contextualizarea cât mai nuanţată a producţiunilor de ordin ştiinţific şi intelectual, trebuie mai întâi să readucem valoarea existenţei umane în faţa fenomenului de transformare a artei.

Cum trebuie înfăţişată viziunea despre om astfel încât el să se încadreze în tiparele unei structuri individuale de concepţie a operei, acolo unde trebuie să intervină în mod autentic originalitatea?

Ei bine, viziunea, dar şi dedicarea necesară pentru materializarea acesteia într-o formă reprezentativă de abordare a ineditului, dând naştere la o anumită nişă de subiect, trebuie să pornească de la combinarea, proiectarea şi integrarea în diverse proporţii a elementelor de spectaculozitate.

A atrage privirile oamenilor din jur din ipostaza de artist, permiţând reunirea virtuţilor de experimentator, de investigator al realului şi imaginarului, la frontiera cu ficţiunea, înseamnă de fapt să te confrunţi cu ei într-o interpretare care slujeşte o teorie avansată, o idee sau o tendinţă ce pune în lumina intenţia de nemărginire în infinitate, ca atunci când pictorul amestecă de fiecare dată altfel culorile, plecând de la tonul de bază, pentru a obţine o altă nuanţă şi alt model.

Iar omul, modificat substanţial pentru experienţa de depăşire a condiţiei de exilat în propriile limite, interferând cu creaţia, pus în ipostaza de „artist complex", poate aduce creatorului de artă o anumită doză de subiectivitate în aprecierea gradului de extindere a zonei de impact. Dar şi o doză de obiectivitate în aprecierea gradului de realizare a criteriilor şi obiectivelor de performanţă.

Leadership: Cum evaluezi şi interpretezi valoarea existenţei personalităţii umane în faţa fenomenului de transformare a artei?

Personalitatea a cărei activitate este relevantă în contextul procesului de dezvoltare a leadershipului se conturează dincolo de ecranul nonconformismului stilistic ce are la bază atracţia desprinderii de norme şi reguli, uimind prin varietatea temelor de creaţie care lărgesc orizonturile cunoaşterii.

În leadership, ca şi în arta regizorală, valoarea omului cât şi maniera de concepere a trăsăturilor de personalitate integrate într-o anumită experienţă, au o pondere importantă în stabilirea trendului de exprimare şi afirmare a propriei autonomii în raport cu idealul de artă - prin creaţie, prin intermediul modelelor construite.

Ca lider-artist, tema pe care o tratezi şi o personalizezi, sprijinită de sensurile atribuite valorii omului, trebuie să reflecte - în măsura posibilului - o abordare conceptuală a creaţiei, care poate fi înţeleasă atât în sens subiectiv cât şi obiectiv.

Nota dominantă care învăluie ansamblu de transformări ale elementelor de producere a semnificativului, evidenţiind diferenţele şi apropierile dintre ceea ce cunoşti şi ceea obţii prin prisma conceptelor reconsiderate, este găsirea, în cadrul unor noi situaţii, a unor valori de referinţă care pot să susţină tranziţia spre un tip diferit de orientare – una axată pe interpretări de ordin constructiv ale personalităţii umane.

Interpretarea pe care o conferi personalităţii tale din perspectiva unui artist se prezintă ca o structură deschisă de trăsături compensatorii ce îţi arată nu doar cum să înţelegi mai bine lumea, dar şi cât de vastă e dimensiunea a ceea ce încă nu cunoşti despre tine.

Poţi să determini limitele cunoaşterii tale „obiective”, arătând şi faptul că natura ta însăşi nu poate fi cunoscută?

Principiul creatorului de artă vizează instaurarea conexiunilor între multiplele modele de referinţă, situate într-un curent al dezvoltării autenticităţii, care intră în structura creaţiei prin implicarea oamenilor - reprezentaţi în diverse ipostaze.

A măsura valoarea existenţei particularului din întreg înseamnă a găsi, pe baza cunoaşterii profunde, elementele caracteristice de unicitate, constitutive ale unui scop de superioritate în creaţie, transmise prin modalităţi specifice unui leadership performant, care se bazează pe trecut, dar privesc prezentul şi viitorul. Să găseşti unicitatea într-o diversitate, asta reprezintă adevărata performanţă.

Principiul cunoaşterii reciproce

On Ianuarie 24, 2010

Cunoaşte-i pe cei ce sunt cu tine, şi cei ce sunt cu tine te vor cunoaşte.

Întotdeauna numai în faţa unor situaţii critice se poate distinge un om. El poate birui voinţa celor din jur şi se poate ridica deasupra lor la momentul oportun, ca o flacără arzătoare dătătoare de speranţe, dacă în momentele cele mai dificile dovedeşte curaj, abilitate şi tărie de caracter. Doar dacă dovedeşte că este un as în conducerea oamenilor, că este neclintit în deciziile sale şi că este capabil să se arunce primul, fără frică, în faţa oricărui pericol, va putea câştiga încrederea celorlalţi şi va fi sprijinit de ei.

Dar nimeni nu poate ajunge cu uşurinţă în fruntea oamenilor. Şi asta deoarece oamenii aşteaptă de la o persoană, mai întâi de toate, dovezi că este capabilă să-i conducă. Într-o altă ordine de idei, ei vor să vadă de ce e în stare o persoană, luând în consideraţie calităţile şi defectele, abilităţile şi competenţele ei, înainte să o accepte la conducerea lor.

Leadership: Reacţia ta la sugestia pe care o oferi în modul de expunere a exemplului personal face parte din felul tău de a te motiva atunci când îţi măsori toate avantajele?

După ce-au ajuns pe insula Cos, la lumina slabă pe care stelele de pe cer o aruncau pe puntea corăbiei, încercaţii bărbaţi din Foceea s-au strâns oftând şi suspinând în jurul lui Dionysios. Cu toţii erau epuizaţi, gâfâiau, în urma efortului depus de-a lungul ultimelor zile. Fuseseră zoriţi să vâslească fără întrerupere şi erau sleiţi de putere.

Observând feţele schimonosite, gesturile nervoase şi oboseala oamenilor, şi după ce a ascultat tânguirile multora, Dionysios, comandantul galerelor, le-a vorbit:

- Mulţumiţi-le zeilor nemuritori că aţi fost înţelepţi şi v-aţi ales un comandant care ştie ce vrea. Eu, Dionysios, fiu al Foceei, nu vă voi abandona. Nu vă spun acest lucru pentru a mă urma în continuare pe mine doar pentru că sunt cel mai iscusit navigator, doar pentru că sunt mai puternic şi mai viclean decât oricare dintre voi, ca să nu înşir şi celelalte calităţi pe care le am. Dar gândiţi-vă bine ! Este printre voi un altul mai bun decât mine? Dacă este, atunci să îndrăznească şi să spună. Ca să vedem ce facem mai departe.

Toată lumea a tăcut. Nimeni nu a revendicat dreptul de a fi comandant. Nimeni nu s-a considerat mai destoinic decât Dionysios, nimeni nu s-a găsit interesat să-l înlocuiască la conducerea galerelor. De ce oare?

Dintr-un singur motiv. Nimeni nu s-a îndoit că Dionysios este cel mai iscusit dintre ei. Nimeni nu s-a încumetat să facă ceea ce putea face el. Toţi îi recunoşteau calităţile şi îl recunoşteau ca fiind singurul capabil să-i conducă pe mare, singurul capabil să-i conducă spre victorie în bătăliile navale împotriva perşilor. Fiind de atâta vreme pe mare cu el, oamenii au ajuns să-l cunoască foarte bine, şi ştiau că este o persoană pe care într-adevăr se pot baza şi că un alt comandant mai bun nu există. La rândul său, Dionysios îşi cunoştea foarte bine oamenii. Fiind sigur că nu există căpitan mai bun decât el, şi-a putut exercita autoritatea care îi era recunoscută, neputând fi înlocuit de nimeni.

Prestigiul pe care îl meriţi este o manifestare a mândriei ce rezultă din felul de a te motiva atunci când îţi oglindeşti toate avantajele într-un context de împărtăşire şi de laudă a unicităţii.

Dionysios va fi întotdeauna un exemplu desăvârşit: a ştiut să-i conducă pe oameni spre victorie, chiar dacă a fost aspru şi sever cu ei. Nu s-a eschivat niciodată, dând din umeri cu un: ”Nu ştiu”. Ci a cumpănit cu deplină răspundere tot ce era pro şi tot ce era contra, tot ce era bun şi tot ce era rău pentru echipajul său, şi cu priceperea sa în navigaţie i-a îndrumat în direcţia cea mai bună, mai ales atunci când au avut de traversat momente grele. Oamenii erau convinşi că vor avea noroc atâta timp cât Dionysios se afla în fruntea lor, iar de se vor lipsi vreodată de el, norocul îi va părăsi în totalitate.

Cunoaşterea reciprocă dintre lider şi oameni, după care am putea opera fără greş distincţia dintre o realitate de faţadă şi una de adâncime, la care se adaugă beneficiul unei viziuni partizane asupra unor aspecte cu impact major în costul şi durata unei acţiuni, izvorăşte din modul de a-ţi explica clar şi la obiect cauza pentru care lupţi pe fondul unei potenţiale victorii.

Singurul tău duşman este calea prin care te afirmi în condiţiile unei conformităţi cu o limită pe care nu trebuie să o depăşeşti, cum ar fi justificarea utilizării necinstite a imaginii unei forţe de care nu dispui. Iar a-ţi forma o convingere despre superioritatea ta şi a trece la acţiune în conformitate cu ea, se poate simţi în modul de a vedea viaţa ca o rană pe care nu o laşi să se vindece.

Unul dintre lucrurile cele mai importante pe care trebuie să le facă un conducător este să stea suficient de mult timp printre oameni până ce va ajunge să-i cunoască foarte bine. Dacă nu-i va cunoaşte temeinic, şi dacă oamenii, la rândul lor, nu-l vor cunoaşte foarte bine, atunci nimic nu va putea fi sigur.

Bineînţeles în felul acesta liderul devine cunoscut. Dar vai de liderul care are diverse slăbiciuni, ce vor fi cunoscute de cei pe care îi conduce. De aceea este important ca el să se cunoască bine mai întâi pe sine însuşi, iar dacă ştie că are totuşi nişte slăbiciuni, să le ascundă bine, căci o dată cunoscute de ceilalţi, va cădea pradă manipulării lor.

Leadershipul este o chestiune de onoare care se obţine printr-un procedeu care comportă două părţi în cursul cărora se stabileşte plaja de valori care îţi ghidează paşii: prima parte se referă la preocuparea ta pentru efectele secundare ale pierderii şi focusarea pe schimbările de rol, iar cealaltă parte se referă preocuparea ta pentru binele celor ce te urmează.

A fi în fruntea oamenilor, pe lângă ţintirea înainte, la o depărtare despre care uneori nu-ţi poţi face o idee exactă, este o aplicare a adevărului exprimat de filosoful rus Nikolai Cernîşevski: "cu cât năzuinţele tale sunt mai realiste şi mai pozitive, cu atât mai energic vei lupta cu împrejurările ce se opun înfăptuirii lor".

P.S. Ca să ai o putere mare de influenţă asupra oamenilor, trebuie să stai mult timp în preajma lor, să-ţi dovedeşti isteţimea, priceperea, profesionalismul şi ataşamentul faţă de ei. Să-i domini printr-o voinţă de nezdruncinat, prin spiritul viu şi inepuizabil, printr-o dorinţă continuă şi puternică de victorie. Iar dacă le vei reda speranţa în viitor ei nu te vor putea dezamăgi, şi nu-şi vor căuta niciodată alt lider.

*** Notă:** Mika Waltari - *Etruscul* , editura Polirom, 2002.

Principiul Deja Vu

On Noiembrie 21, 2014

Adu noi dovezi în sprijinul a ceea ce ai devenit, printr-o aducere aminte a cine eşti cu adevărat.

Mă regăseam într-un fenomen inacceptabil din punct de vedere raţional, acela al timpului recuperabil, ca o aducere aminte a cine eram cu adevărat în momentul în care eram înconjurat de ceea ce nu eram. Înadins, prin practicarea introspecţiei, mă angajasem în explorarea unui adevăr ascuns, nemăsurat, intimidant, care mă depăşea prin amploarea şi complexitatea lui. Ceea ce era nemuritor în mine putea să ascundă o altă realitate, supusă improbabilităţii, chiar imaginativă.

Totul se dezvăluia printr-o ciudată inversare de optică, ca printr-o oglindă magică, la nivelul unui subiectivism halucinant, rupt parcă din Stephen King. Păream suspendat într-un spaţiu al conştiinţei extins dincolo de mine, condus fiind doar de acea orbire a inteligenţei fără sentiment. Ca şi când aş fi încercat să reînvii nişte viziuni de mult uitate într-o realitate care se încăpăţânează să acţioneze după reguli necunoscute - una superioară, susţinându-se singură prin unificarea celor trei cercuri congruente: incoerenţele, paradoxurile şi iluziile.

Iar acest pre-update al autocunoaşterii duse la extrem, ca o forţă centrifugă ce mă elibera aproape cu totul din strânsoarea cătuşelor trecutului nelimpezit, continua cu îmbunătăţiri de ordin imaginar şi rezolva micile scăpări pentru bug-urile apărute în versiunile "alfa" aferente realităţii ancorate drastic în cadrele unei gândiri schimbătoare.

Aici începe frumuseţea înţelegerii de sine – eram mereu prins în repetitivul joc al potrivirii cu un anumit tip de rol care putea fi abordat din mai multe unghiuri, pe mai multe laturi existenţiale. Sub acest aspect exista, însă, în viaţa mea, un alt Eu. Căci accesasem o altă extensie a mea, printr-un Deja vu care mă făcea să simt că trăiesc viaţa altcuiva.

Leadership: Poţi să construieşti un "Select" în dinamica trecutului care să întoarcă valoarea logică "True" în condiţiile prezentului?

Cred că de fapt în această stare reziduală a gândurilor şi acţiunilor pe care le-am întreprins în trecut, încadrând noi funcţiuni de timp în specificul conştiinţei care dă contur unei realităţi apuse, se produce fuziunea dintre esenţă şi aparenţă. Adică dintre ceea ce te defineşte în permanenţă şi ceea ce te defineşte atunci când faci abstracţie de ceea ce ai devenit, luând mai mult în considerare imaginea a ceea ce ai fost.

Dovezile vii a ceea ce ai devenit, oferind alte răspunsuri la întrebarea: "Cine eşti?", pot fi de fapt repetiții inconștiente a ceea ce ai fost cândva, prelucrând şi dezvoltând în cadrul logicii - pe care o conţine gândirea pusă în sprijinul coordonării existenţei - un raţionament valid sau invalid. Adică, un raţionament favorabil plasării personalităţii într-un context de aliniere la un model de a fi, cu totul nou, în strânsă legătură cu cel vechi, deci în condiţiile unui pluralism de identități care oferă spaţiu de manevrare a modalităţilor de reevaluare, redescoperire şi reinventare.

Trecutul este mesagerul unor adevăruri esenţiale, a unor valori de referinţă care nu s-au conturat precis în timp și nu au crescut uniform odată cu experiența vieţii. Un fel de indicii lăsate în urmă care te pot conduce spre o altă zonă de cunoaştere, căci prin trecut retrăieşti momente fundamentale ale propriei excepţionalităţi – care revendică totalitatea ta. Momente puse necontenit în lumină, având drept călăuză adevărul, bucăţele din ceea ce gândeşti,

emoţii şi stări, având ca finalitate posibilitatea de a te forma continuu şi de a lua contact cu o sumă de calităţi care nu trebuie să-ţi lipsească atunci când vrei să devii lider.

Într-un domeniu cum este leadershipul, supus schimbărilor de progres sau regres în orice direcţie, obligaţia de a porni în căutarea a ceea ce ai fost te poate distribui într-un rol nou, care te face să simţi că trăieşti viaţa altcuiva care ai fi putut fi. Asta, în condiţiile unei existenţe afectate de acea realitate care insuflă spirit în ceea ce priveşte imaginea de sine, în tot ceea ce faci, prin distribuţia a ceea ce este subtil, aparent mic şi neînsemnat, într-o altă structurare şi într-o viziune de ansamblu cu accente şi funcţionalităţi suplimentare, cât mai evoluate şi mai performante.

Frumuseţea înţelegerii de sine poate fi etichetată că o aducere aminte a destinului ce te aşteaptă atunci când mersul mai departe constituie un update al raţiunii cu care ai vrea să te întâlneşti într-un alt timp decât cel ce se desfăşoară acum.

Principiul Deja Vu vizează acea recognoscibilitate a ceea ce ai fost şi eşti, în tot ceea ce realizezi, păstrând trendul ascendent al performanţei, dublate de moduri inovative de aprofundare a identităţii proprii.

Activitatea ta de lider trebuie să treacă dincolo de această postură de interpret al trecutului pentru pregătirea prezentului şi viitorului. Astfel încât apartenenţa ta la ceea ce se numeşte "curentul principal" din gândirea pe care o expui să aibă ca prioritate asigurarea unui rol potrivit în relaţia dintre fundal şi context, dintre ceea ce ai trecut cu vederea şi ceea ce eşti capabil să realizezi în cuprinsul realităţii pe care o trăieşti.

Principiul dezvoltării accelerate

On August 25, 2010

Cu cât sunt mai mulţi oameni implicaţi în sistem, cu atât sistemul este mai simplu şi mai flexibil de utilizat.

Probabil fiecare dintre noi a folosit măcar o singură dată instrumentul Google Translate. Google Translate este un instrument de traducere automată gratuit care îţi permite să traduci fraze, documente şi chiar site-uri întregi instantaneu. Modul în care funcţionează este fascinant. Ei bine, în spatele acestei aplicaţii se afla un program foarte complex care scanează textele pe care utilizatorul doreşte să le traducă dintr-o limbă în alta, căutând modele statistice semnificative - adică modele între traducere şi textul original, care sunt puţin probabil să apară din întâmplare. Odată ce programul găseşte un model, se poate folosi de el pentru a traduce texte similare în viitor.

Traducerile nu sunt întotdeauna perfecte, dar în mod constant prin furnizarea de noi texte traduse, instrumentul Google Translate se dezvoltă şi traducerile sunt din ce în mai bune. Nici nu-i de mirare că în ultimii patru ani tot mai multe persoane şi servicii au apelat la acest instrument de traducere gratuit. Deci, data viitoare când vei traduce o propoziţie sau o pagină de web cu Google Translate, gândeşte-te la acele milioane de documente şi miliarde de modele care au dus la traducerea ta - şi toate s-au întâmplat cât ai clipi din ochi.

Leadership: Poţi să te identifici cu o imagine care este criticată din punctul de vedere al dominației ei asupra unei arte ce asigură prelucrarea informaţiilor într-o formă care nu poate fi înţeleasă fără accesul la esenţa şi menirea ei?

Instrumentul Google Translate generează traducerile pe baza unor modele găsite în cantităţi mari de text. El analizează milioane şi milioane de texte care au fost deja traduse de traducători umani, utilizând un proces numit "traducere statistică automată". Aceste texte traduse provin din cărţi, din documente, din organizaţii precum ONU şi site-uri din întreaga lume. În cazul în care traducerea nu este realizată corect, exista şi opţiunea (foarte des utilizată de milioane de utilizatori) de a corecta textul propriu zis.

Google Translate este capodopera artei de a utiliza cunoştinţele milioanelor de utilizatori nu doar ca pe o sursă a avantajului competitiv, ci ca pe o sursă de date credibilă, completă şi accesibilă, care conţine aceeaşi valoare de tip "record" care însoţeşte apelul spre reviziunea opţiunii de intensificare a activităţii de populare a Internetului.

Instrumentul Google Translate este mai simplu şi mai flexibil de utilizat atunci când se implică mai mulţi oameni în îmbunătăţirea traducerilor, deoarece informaţiile de conţinut vin din mai multe surse şi astfel valabilitatea lor creşte, deci sunt întâmpinate tot mai puţine lipsuri, erori sau complicaţii.

Cu alte cuvinte, Google Translate, care la ora actuală este cel mai bun şi mai cunoscut instrument de traducere, nu poate funcţiona şi nu se poate îmbunătăţi constant dacă oamenii nu apelează la el realizând tot mai multe traduceri. Ce este minunat la Google Translate este faptul că se îmbunătăţeşte constant cu ajutorul informaţiilor furnizate de oameni. Strategia pe care Google o foloseşte pentru a-şi îmbunătăţi acest formidabil instrument de traducere este aceea de a implica cât mai mulţi oameni în procesul lui de dezvoltare, asigurându-i o perfecţionare continuă.

Google este un lider în ceea ce priveşte inovaţia, iar strategia dezvoltată de el, ca să se

diferenţieze de concurenţii deja prezenţi pe piaţă, s-a orientat într-o altă direcţie, concentrându-se cu prioritate asupra utilizatorilor. Cu alte cuvinte, Google s-a ghidat în procesul de evoluţie după zicala: "Ca să te dezvolţi rapid, trebuie să implici în procesul de dezvoltare cât mai mulţi oameni care să fie mulţumiţi de fiabilitatea sistemului."

Leadership: Succesul operei căreia ar trebui să-i dai deplin credit spre a reprezenta esenţa concepţiei ei de "liberă iniţiativă" confirmă totdeauna valoarea unei mobilizări pentru o anumită utilizare?

Utilizarea unei "opere informatice", cum este Google Translate, se poate realiza prin intermediul concepţiei de liberă iniţiativă atunci când cei care îi accesează constant constinutul sunt pe deplin conştienţi de faptul că efectele acestui fenomen de prelucrare a informaţiilor afectează valorile fundamentale ale unei companii vizionare.

Dezvoltarea unui sistem implică perfecţionare continuă, inclusiv a relaţiilor umane. Iar Google Translate se îmbunătăţeşte vizibil de la o zi la alta cu ajutorul oamenilor. Acest instrument, care vizează întreaga piaţă (adică toţi oamenii indiferent de vârstă, sex, studii, etc.), nu doar un segment specific, este una din pârghiile pe care corporaţia Google le foloseşte pentru a-şi spori valoarea.

Ca să îmbunătăţeşti calitatea oricărui sistem al companiei tale, prin care să poţi obţine numeroase beneficii, continuă să-l dezvolţi. Însă singura cale de a susţine dezvoltarea este să apelezi din ce în ce mai mult la des la ajutorul oamenilor. Iar cu cât sunt mai mulţi oameni implicaţi în sistem (şi dacă se poate cât mai competenţi), cu atât el se dezvolta mai repede.

De aceea, ca lider, datoria ta cea mai importantă este să găseşti un mijloc prin care să atragi cât mai mulţi oameni, făcând în aşa fel încât să aibă şi ei de câştigat. Dacă elanul lor este puternic, atunci ei vor continua să se dezvolte şi odată cu ei se va dezvolta şi compania pe care o conduci.

Utilizarea unei opere informatice are menirea de a asigura înţelegerea felului în care gândesc vizionarii atunci când solicită loialitate din partea beneficiarilor: trebuie să înţelegi importanţa informaţiilor pe care le oferi şi să fii exigent în privinţa gradului de acoperire al pieţei.

Totodată, utilizarea instrumentului Google Translate are menirea de a asigura înţelegerea felului în care acţiunile fiecărui om influenţează cu adevărat succesul fiecărei echipe.

Principiul dezvoltării accelerate aduce mari beneficii, mult mai mari în comparaţie cu investiţiile. Acest principiu are la bază creativitatea, inovaţia şi implicarea unor factori umani ca dorinţa de perfecţionare, de inter-relaţionare cât şi curiozitatea şi dorinţa de a cunoaşte lucruri noi. Singură, fără implicarea acestor factori umani, tehnologia avansată nu poate asigura dezvoltarea accelerată a unui sistem şi nici chiar a societăţii în ansamblu.

Principiul diferenţei de nivel

On Martie 08, 2012

Când o ţii tot înainte, alţii rămân tot mai în urmă.

La 17 decembrie 1903, de faţă fiind numai cinci persoane, la ora 10:35, Orville Wright, întins pe pântece între aripile aeroplanului, se înălţă în văzduh timp de 12 secunde şi ateriză la o distanţă de 30 de metri de la locul de plecare. Fu întâiul zbor în aeroplan.

După o oră, Wilbur Wright atinse 50 de metri. La amiază, aeroplanul reuşi să se menţină în aer 59 de secunde !

Aeroplanul cu motor cu explozie fusese realizat, iar fraţii Wright fură cei dintâi care l-au conceput şi experimentat în zbor.

Tinerii ascultaseră cu sufletul la gură istorisirea aviatorului, de parcă ei înşişi ar fi luat parte la peripeţiile celebrei invenţii a fraţilor Wright, se ridicară şi-i mulţumiră. Se ridică şi povestitorul şi le întinse mâna. De departe, de pe linia unde adăsta şirul de aeroplane, care luau parte la concursul de acrobaţie, veni, până la colina lor, zvonul muzicii militare.

*- La revedere, băieţi ! Şi nu uitaţi lecţia fraţilor Wright: chibzuinţă, curaj şi mai cu seamă perseverenţă ! **

Leadership: Eşti pregătit să urmezi direcţia unei abordări de tip win-win a relaţiei dintre ceea ce experimentezi ca performer şi ceea ce este aproape imposibil de înfăptuit, în condiţiile unei autonomii neîngrădite?

Trebuie să fii întotdeauna conştient de unicitatea şi valoarea ta dacă vrei să domini zona leadershipului, prin aceea că nimeni altcineva nu-ţi poate lua locul într-o istorie pe care o scrii tu, cu mâna ta, cu dovezi ale realizărilor tale. Unicitatea valorii pe care ţi-o conferă rezultatele obţinute prin perseverenţă şi chiar cu riscul vieţii, conştient că orice eroare te poate doborî de la înălţimea la care te-ai avântat plin de curaj, este o încercare de a domina acel factor numit "întotdeauna" în pofida oricărui "dintotdeauna".

Când îţi propui să atingi un scop greu de îndeplinit, şi dacă ţi se oferă toată libertatea de a încerca măcar o "intervenţie în premieră", abia atunci te poţi situa în categoria celor care ştiu că trebuie să se facă remarcaţi dacă vor să se diferenţieze de restul lumii.

Însă locul tău poate fi în zona unde nu vrei să te compari cu altcineva, fiindcă realizările obţinute cu mâna ta trebuie să conţină dovada prestaţiei unui personaj care îşi scrie singur povestea nemuritoare. Succesul aparţine celor ce s-au avântat mai sus decât toţi ceilalţi. Ori când ajungi cel mai bun din lume începi să te obişnuieşti cu prima poziţie şi nu mai vrei să cobori niciodată pe locul doi.

Leadership: Experienţei tale de viaţă i se poate adăuga o experienţă de relaţionare între ceea ce eşti în stare să devii şi ceea ce eşti în stare să realizezi, încât dovada valorii tale să fie valabilă într-o singură direcţie de evoluţie?

Bine spunea cineva: "A fi tu însuţi într-o lume care caută în mod constant să te facă

altcineva, este cea mai mare realizare." Pentru că singura direcţie de evoluţie a omului, pe lângă orice altă formă de automotivare, este să-şi ducă realizarea la nivelul exigenţelor propriei sale vocaţii.

Să fii cel mai bun din lume într-un domeniu înseamnă să conştientizezi faptul că tu evoluezi rapid spre desăvârşire, în timp ce alţii rămân în urma ta cu prea mulţi ani ca să mai poţi să-i numeri. Şi dacă s-ar aduna cele mai luminate spirite într-un minunat brainstorming, fii conştient că toţi la un loc n-ar face nici măcar 1% din ce-ai făcut tu. Şi toţi la un loc n-ar ajunge să se apropie de talentul tău nici peste 1000 de ani.

Un singur om face mai mult decât restul lumii. Luaţi ca exemplu Freddie Mercury. Dacă s-ar aduna toţi cântăreţii din lume, credeţi că toţi la un loc vor putea vreodată să compună un "The show must go on", versiunea 2.0 ?

Problema cea mare a personajelor devenite peste noapte "mari vedete" este că s-au grăbit să se afirme, dar fără să-l lase pe Dumnezeu să le şlefuiască talentul până la perfecţiune. Singura dovadă a perfecţiunii este acea transformare a omului, treptată, dar evolutivă, cu viteza melcului, ce se produce într-un timp îndelungat, prin multe încercări şi eşecuri. Încât ai avea nevoie de mărturii extrem de bogate privind roadele trudei sale statornice pentru a-i da de urmă în firească dinamică a istoriei.

Leadershipul este vocaţia de a înfrunta zilnic provocarea numită "inovaţie" din punct de vedere a ceea ce eşti dispus să laşi în urma ta ca amintire a unei creaţii care rămâne permanentă, de neuitat.

Principiul diferenţei de nivel este strâns legat de capacitatea ta de a-ţi depăşi limitele autoimpuse (sau impuse de credinţa altora), aşa încât tot ceea ce realizezi să fie direct proporţional cu valoarea pe care tu însuţi ţi-o atribui şi cu felul în care le permiţi celorlalţi să se raporteze la tine.

Principiul disoluţiei autorităţii

On Octombrie 27, 2010

Un lider care nu dispune de un psihic puternic şi echilibrat îşi va pierde autoritatea în faţa lumii şi în faţa măreţiei vieţii.

Îmi amintesc entuziasmul maestrului care i se reflecta în priviri în timp ce, cu creionul în mână şi cu caietul pe masă, notam toate indicaţiile preţioase pe care mi le dădea. Îmi amintesc mândria pe care am simţit-o în acea zi, atunci când i-am dovedit că am înţeles ceea ce el mă învăţa. Cuprins de o nespusă dorinţă de a descoperi tainele artei şi dedesubturile ei, îmi promisesem mie însumi, îi promisesem şi lui, că voi face tot ce-mi cere, că-i voi da ascultare şi-i voi urma toate sfaturile.

Maestrul se uită la mine cu o satisfacţie deosebită. Chipul său, luminat de bucurie, reflecta esenţa lui interioară, îi reflecta personalitatea. Era un om de o excepţională bunătate şi blândeţe sufletească, de o sublimă măreţie. Îmi spuse la un moment dat:

- Ştii, oare, Nicu, că a existat odată un pictor foarte talentat, pe nume El Greco, care suferea de o boală a analizorului vizual numită astigmatism? Şi ştii că toate portretele pe care le-a redat erau alungite? În multe biserici din Spania se găsesc picturile lui care înfăţişează personaje deformate... Şi ştii că celebrul pictor Van Gogh a ajuns să-şi taie o ureche datorită stării sale psihice fragile?... Sau că, după cum susţin unii, Mona Lisa este de fapt un auto-portret al lui Leonardo DaVinci?

Eram puţin nedumerit. Nu ştiam ce vrea de fapt să-mi spună el cu aceste exemple, dar apoi a continuat:

- Nicu, opera unui artist trădează adevărata lui capacitate interpretativă care, la rândul ei, e strâns legată de integritatea anatomică şi funcţională a analizatorilor vizuali şi tactili.

Leadershipul este o creaţie căreia îi transferi experienţa ta de viaţă acumulată de-a lungul timpului în povestea unui personaj ale cărui trăsături produc ecouri în realitatea imediată a faptelor care influenţează percepţia lumii asupra noţiunii de "fragilitate".

Renumiţi pictori care au suferit diferite afecţiuni, s-au afirmat şi s-au bucurat de un real succes încă din timpul vieţii. Şi chiar dacă operele lor au rămas nemuritoare, ele reflectă în mare măsură deficienţele de care sufereau. Au existat, de exemplu, pictori care au pictat numai în nuanţe de verde şi albastru, fiindcă sufereau de o maladie numită discromatopsie. Ei percepeau realitatea înconjurătoare în mod deformat, şi nici nu-şi puteau imagina realitatea altfel.

Aidoma operei unui artist, "opera" unui lider trădează adevărata lui capacitate de conducere care e în strânsă legătură cu fondul lui psihologic şi cu modalitatea de percepţie a realităţii înconjurătoare. El se poate abate de la linia moralităţii, corectitudinii sau datoriei, dacă realitatea pe care o vede, o trăieşte şi o conştientizează nu este coordonată de un psihic solid. O realitate percepută deformat poate să genereze haos, panică şi dezbinare.

Fragilitatea este ceea ce laşi în urma ta după ce ţi-ai epuizat cele mai bune eforturi spre a construi o realitate pe măsura propriilor revelaţii despre sine. Aici avem de-a face cu o tragedie împărţită în două jumătăţi perfect egale: faptul că evoci un sentiment de compasiune fată de rănile profunde şi limitările oamenilor de geniu, care de multe ori suferă de

grandomanie sau narcisicm, şi faptul că nutreşti o admiraţie, asemănătoare idolatriei, agăţându-te prea des de anumite calităţi precum inteligenţă, perspicacitate, imaginaţie, fără să fii conştient că le deţii.

Leadership: Evoluţia ta se determină direct pe cadranul unui timp care te opreşte să fii tu, sub impactul unei raţiuni care cere să existe o comuniune între impulsul instinctiv și presiunea normelor sociale?

Evoluţia ta se determină direct pe cadranul unui timp care te opreşte să fii tu atunci când ea se manifestă într-un psihic instabil şi dezamăgitor, nu într-un psihic superior, uman. Impulsul instinctiv al omului este de a răspunde necesităţilor şi dorinţelor de moment cu ajutorul cunoştinţelor şi experienţei îndelungate, dar totodată el este supus încercării de a se manifesta prin instabilitate în cazul unei depresii cauzate de intensitatea anumitor frustrări, cum ar fi lipsa valorii, lipsa exprimării, lipsa unei poziţii de autoritate în domeniu, lipsa propriei permisiuni de a simţi plăcere, sau chiar lipsa măsurii în creaţie.

Omul care nu a avut răgaz să-şi cultive valorile, spiritualitatea, nu va avea limite decât în alegerea interpretării propriului rol. El va ţine seama doar de acumulările trecutului din care s-au născut disperarea, orgoliul, ciuda sau indiferenţa, iar pe parcursul general al „operei" sale nu va rămâne mai puţin de acceptat decât hazardul.

Hai să lămurim un lucru de pe acum, bine? Leadershipul se concentrează asupra dimensiunii umane ca mijloc de obţinere a rezultatelor de performanţă într-un domeniu sau altul. Dacă leadershipul pe care liderul îl produce, îl demonstrează şi îl exercită în jurul său nu este unul inspirat şi controlat, dacă nu este în armonie cu valorile oamenilor, atunci nu poate fi decât unul de dominaţie şi supunere, care în loc să genereze sentimente de mulţumire, generează numai tensiuni. Categoric modalitatea de acţiune a unui lider şi aşa zisa lui "operă" depinde de starea de normalitate a psihicului său.

Adolf Hitler este un bun exemplu în acest sens. El a reuşit să câştige poporul german de partea lui prin ideile sale iniţiale, idei posibil bune, măreţe, şi o doctrină pe măsură. Dar datorită psihicului său, a căzut în cele din urmă în extremism, şi a ajuns la genocid. Oricât ar părea de ciudat, acest ambiţios aspirant la idealuri înalte a avut o concepţie absurdă faţă de oameni, rase şi religii; el dorea cu orice chip să obţină o rasă ariană pură...

Un lider care suferă de o afecţiune psihică poate avea o capacitate persuasivă mare şi poate inocula în mintea oamenilor o idee care aparent este normală, dar el riscă să se abată de la ideea iniţial acceptată unanim, ajungând la o aberaţie.

Leadership: Alegi să trăieşti într-o dimensiune a asumării responsabilității față de un trecut care se încăpăţânează să nu mai treacă, sau într-o dimensiune a conştiinţei care se manifestă sub forma pretenţiei de a construi "Omul Nou" ?

Împlinirea personală echivalează cu respingerea pretenţiei de încasare a prejudiciului moral datorat unui caracter dur şi fără scrupule. Sau, dimpotrivă, se poate datora unui caracter delăsător, permisiv, care nu are încredere în forţele proprii, care se rezumă la complacerea în lenea cumplită, deci care nu îşi valorifică talentul încredinţat de la natură.

Liderul are nevoie de un psihic echilibrat, altfel poate să clacheze şi să înceapă să vadă totul într-o singură „culoare". Şi la fel cum taurii se înfurie şi reacţionează când văd roşu, orgoliul lor s-ar putea să fie stârnit când lumea din jur se abate de la principiile lui. Iar pentru împlinirea idealurilor sale, cel cu un psihic slab va fi în stare să sacrifice chiar şi ce are mai scump. Şi cum nimeni nu poate suporta prezenţa unui tiran în viaţa lui, încetul cu încetul puterea acestui lider se va diminua până la dispariţie.

Pentru orice funcţie de conducere este necesar să existe o personalitate puternică cu un psihic în limitele normalului, un psihic echilibrat - o persoană care să aibă o minte clară şi să perceapă corect realitatea înconjurătoare, şi de asemenea, să fie înzestrată cu importante capacităţi de analiză şi sinteză.

Omul Nou este copia unui om cu convingeri alese, care a învăţat că singura mare glorie de care se poate bucura cineva nu este aceea de a fi "unic" într-un domeniu de larg interes, ci de a fi puternic în faţa tentaţiilor de orice fel, în faţa propriilor standarde şi principii în viaţă care se pot oricând nărui la primul impuls de energie, adrenalină și entuziasm.

Leadershipul este responsabilitatea de care trebuie să dai dovadă atunci când eşti conştient de faptul că ceea ce te defineşte la nivel de unicitate este total umbrit de imaginea mentală a ceea ce ai experimentat anterior drept o slăbiciune a emoţiilor sau a intelectului.

Principiul disoluţiei autorităţii face referire la problemele lăuntrice cu care se confruntă de regulă oamenii de geniu, artiştii sau intelectualii al căror sens existenţial nu mai este doar acela de a crea şi de a face performanţă într-un anumit domeniu, ci de a se raporta la nişte nevoi egocentrice bazate pe refuzul de a accepta realităţile unei lumi prinsă în nebunia unei evoluţii necontrolate.

Principiul eficienţei

On Februarie 19, 2010

Măsoară-ţi fundamentul răspunderii faţă de ceea ce dai şi primeşti, mărindu-ţi corect dimensiunea imaginii de sine.

Pe timpul când era student, Mikael Karvajalka, ca să-şi asigure traiul, l-a rugat pe marele doctor Theophrastus Bombastus Paracelsus von Hohenheim să-l primească ca discipol şi să-l înveţe acea ştiinţă complexă, numită medicină. După ce s-a gândit bine, doctorul a acceptat, mai cu seamă fiindcă avea nevoie de cineva care să cunoască limba localnicilor. Doctorul îl conduse pe băiat în hambarul care ţinea loc de spital, şi-l îndemnă să-i vorbească despre plantele utilizate de localnici pentru proprietăţile lor tămăduitoare.

În timp ce discutau despre plante şi proprietăţile lor, Mikael dădu din cap a admiraţie şi-i spuse:

- Sunteţi un om norocos, doctore Paracelsus ! Dacă veţi intra în slujba lui, regele vă va răsplăti cu mult aur, cu domenii şi cu păduri verzi.

După ce-i aruncă o privire sălbatică, doctorul îi răspunse:

- Norocul meu este toiagul călătorului şi bucuria de a culege cât mai multe învăţături bune, nimic altceva nu mă interesează în afară de ştiinţă. Eu ştiu că voi ajunge cândva cel mai bun medic din lume, iar cei mai iluştri doctori ai înaltelor universităţi nu vor fi demni nici să lege şnururile încălţărilor mele. Să fi râvnit la bogăţie, m-aş fi putut de mult învesmânta în mătase şi velur, aş fi putut de mult purta coliere de aur, numai că eu sunt mulţumit cu veşmintele aspre de călător şi cu mâncarea săracului. Nu-ţi sporeşti ştiinţa dacă stai la curtea nu ştiu cărui rege sau împărat. Ca să cunoşti, trebuie să strângi cu încredere mâinile aspre ale celor care înţeleg graiul naturii.

Leadership: Valoarea pe care ţi-o acorzi prin manifestarea unei calităţi esenţiale, determină nivelul măiestriei acumulate prin susţinerea unui test de evaluare?

Dacă nu ai citit romanul Mikael Karvajalka de Mika Waltari, ţi-l recomand cu căldură. Nu este o carte de medicină, ci una de aventuri. Dar este foarte bine scrisă, şi cu siguranţă vei afla multe lucruri interesante.

Doctorul Paracelsus avea o dorinţă încăpăţânată de a afla lucruri noi. Îşi sporise cunoştinţele studiind la universităţile din Franţa şi din Italia, călătorind în Spania, Anglia, Olanda, şi în multe alte ţări, intrând în contact cu mulţi alţi maeştri în ale medicinii. Dar el n-a ales drumul pe care şi l-au croit ceilalţi doctori – care-şi imaginează că pot învăţa ceva stând la căldurică, mâncând pui fripţi şi înveşmântându-se în mătăsuri şi velur.

Ci a ales drumul ştiinţei. Dedicat, trup şi suflet, oamenilor suferinzi, s-a aflat într-o permanentă căutare de leacuri şi remedii. Uneori se trezea în mijlocul nopţii şi hoinărea pe câmp după plante medicinale, dacă poziţia aştrilor era favorabilă, făcând numeroase observaţii. Sau se aşeza lângă gura mormintelor pentru a „studia” spectrele morţilor. Nu îi era teamă de vecinătatea leşurilor pe care mişunau viermii, nici scârbă de duhoarea lor.

Doctorul Paracelsus căuta întotdeauna cu ardoare compania oamenilor ciudaţi şi simpli, nu

doar a celor învăţaţi şi nobili. Din dorinţa sinceră şi intensă de a ajuta pe toată lumea, şi pentru că era un doctor extraordinar de priceput, reputaţia i-a crescut enorm de repede. Sfaturile şi tratamentele lui erau nepreţuite, iar oamenii, mulţumiţi de seriozitatea şi amabilitatea lui, bizuindu-se întotdeauna pe priceperea de care a dat deseori dovadă, se reîntorceau mereu la el.

El şi-a sporit mereu valoarea de sine şi valoarea vieţii prin manifestarea unei calităţi esenţiale: înclinaţia spre asumarea unei inteligenţe superioare. Aceasta inteligentă, oricum am înţelege-o, nu era aproape niciodată legată de sublimul unei ambiţii sau de sublimul unei arte. Ci de sublimul unei trăiri exprimată printr-un ritm al sufletului trasat de preţuirea cu care îşi dăruia învăţăturile şi cunoştinţele.

Te evaluezi ca un tot unitar care aproape îndepărtează lumea cu maturitatea şi funcţionarea lui perfectă, sau ca un tot unitar care face posibilă perpetuarea unor idealuri înalte prin conţinutul de valoare pe care îl posezi?

Preţuirea înseamnă să iubeşti cu adevărat însuşirile tale înnăscute datorită cărora valoarea oamenilor din jur să capete o nouă perspectivă de afirmare.

Străduinţa şi perseverenţa vor determina nivelul tău de eficienţă. Dacă eşti dornic să munceşti cu mare bucurie şi din toată inima, dacă ai un apetit puternic pentru noutate, vei putea obţine rezultate maxime şi vei ajunge să fii admirat şi respectat. Străduinţa şi perseverenţa ta în dobândirea cât mai multor competenţe şi abilităţi vor fi recompensate printr-un nivel crescut de eficienţă. Cu cât te vei „antrena" mai mult, cu atât nivelul tău de eficientă va fi mai mare şi cu atât vei deveni mai maestru în domeniul respectiv. Iar, fără umbră de îndoială, performanţele pe care le vei obţine vor determina nivelul tău de succes.

Un doctor foarte bun recunoaşte simptomele fiecărei boli şi ştie să pună un diagnostic exact. Iar în funcţie de particularităţile fiecărui caz să stabilească felul şi durata tratamentului. Ştie să facă deosebirea dintre boli, de exemplu, dintre cancerul pulmonar şi emfizemul pulmonar. Amândouă sunt boli importante ale aparatului respirator, dar au simptome diferite şi tratamente specifice. Unele semne de boală durează câteva zile, sunt mai puţin importante, dispar şi reapar în mod neregulat. Alte semne sunt tardive şi apar în ultimele luni de viaţă ale bolnavului. Alte boli sunt rar întâlnite şi nu pot fi diferenţiate decât cu foarte mare greutate, altele foarte frecvente şi uşor de recunoscut. Importanţa cunoaşterii fiecărei boli este necesară pentru punerea unui diagnostic cât mai precoce, în scopul aplicării unei terapii eficiente.

Funcţia de reprezentare a eficienţei este o afirmare a vieţii practice care îmbrăţişează nu numai activitatea materială, intelectuală şi morală a omului, ci şi valoarea cauzală care produce o altă valoare.

Întocmai ca un doctor, vei ajunge să-ţi stăpâneşti la perfecţie abilităţile şi să-ţi creşti nivelul de eficienţă doar prin practică şi cercetare îndelungată. Dar mai mult prin experienţa directă decât prin analiza teoretică şi ştiinţifică. Dacă nu te strădui să ajungi un artist în profesiunea ta, dacă nu te dedici trup şi suflet muncii nu-ţi vei putea creşte nivelul de eficienţă şi nu vei obţine rezultate excepţionale. Iar impactul tău asupra oamenilor va fi neînsemnat.

Principiul eficienţei are ca premisă dimensiunea imaginii de sine care poate fi mărită corect prin valoarea pe care o produci prin unicitatea valorii tale. Acest principiu nu poate fi definit decât în termeni de genul "beneficii mai mari decât costurile".

Dacă vrei să devii un as în domeniul tău de activitate, învaţă să fii curios, străduieşte-te să afli lucruri noi, aplică zi de zi cunoştinţele dobândite şi inserează-le în sumarul calificărilor

celorlalţi oameni.

Principiul evoluţiei către absolut

On Decembrie 18, 2012

Oferă un sens şi o continuitate propriei tale transformări, fără să-ţi salţi ştiinţa la o înălţime care ţi-ar putea periclita menirea de a fi Om.

Se afirmă că totul este posibil, că ceea ce este ireal poate deveni real. Şi invers. Ceea ce este real, poate fi, de fapt, ireal.

Câteodată, deşteptându-mă dimineaţa, mă cuprindea o teamă nebună şi nu-mi venea să deschid ochii. O lovitură puternică, de pedeapsă, dată insistenţelor mele de a înţelege ceea ce părea de neînţeles. Ca o repercusiune a curiozităţii mele faţă de tot ceea ce era în jurul meu, faţă de tot ce era formă nouă, faţă de legile într-o stare continuă de schimbare care guvernau timpul, Omul şi viaţa.

Mă copleşea amintirea acelei nopţi când fusesem trezit deodată, ca la auzul unui tunet înfiorător, de o străfulgerare de luciditate… din nou nu aveam altă dorinţă decât aceea de-a descifra complexitatea fenomenului. De parcă m-aş fi aflat în mijlocul unei fantasmagorii şi ceea ce simţeam era pur şi simplu efectul coşmarului din somnul greu care este viaţa.

Ca şi cum cineva coborât dintr-o lume mai avansată decât a mea, a noastră, a muritorilor, cineva asemeni fiinţelor superioare nouă, având ştiinţa binelui şi a răului, a timpului şi a vieţii, unicul posesor al cunoştinţelor din toate sferele cunoaşterii, săvârşitor al tuturor tainelor lumii şi ale universului, cu toate elementele care ţin de formarea lor, – mi-ar fi făcut rezumatul tuturor adevărurilor care până astăzi n-au fost descoperite şi revelate.

Leadership: Îţi poţi pune în valoare capacitatea ta de a construi o imagine de sine favorabilă ghidându-te conform legii: *"Dacă ştii totul, nu eşti decât la jumătatea drumului tău"* ?

În acea stare dintre somn şi realitate, credeam că am înţeles totul. Părea, dintr-o dată, că am devenit un Atlas al celor mai adânci taine, deţinător al tuturor celor văzute şi nevăzute, putând a explica, a da o armonie şi un sens tuturor legilor care sunt în toate.

Dar ceva stăruia în mine, ceva mă frământa, mă descuraja în toată această matrice a revelaţiilor care mă întreceau intelectual. Cuvintele lui Alexandre Dumas, cuvintele acestea încărcate cu atâta luare de seamă, băteau cu insistenţă la uşa gândurilor mele, limitându-mi orizontul de înţelegere:

"În ziua în care omul va cunoaşte aceste legi şi le va respecta, se va elibera de datoria lui. Şi, cum această datorie este moartea, omul va deveni nemuritor. A crea şi a nu mai muri, nu este latura ideală a ştiinţei? Căci ştiinţa este rivala lui Dumnezeu.

Dacă omul ar cunoaşte misterul tuturor lucrurilor aflate pe lume, el ar putea susţine teorii de necombătut în faţa divinităţii înseşi. Dumnezeu îi va răspunde:

– Dacă ştii totul, nu eşti decât la jumătatea drumului tău; acuma creează un vierme sau o stea şi vei fi egalul meu. "

Era mai bine să nu ştiu totul, să-mi accept limitele şi să merg mai departe cu mine însămi, în prezentul care era cel mai important. Să devin omul care trebuia să fiu, omul simplu, nu unul sofisticat, atât de greu de înţeles. Să rămân acelaşi, omul care iubeşte viaţa şi micile ei miracole. Şi o trăieşte cu demnitate şi bucurie. Doar atât, să fiu om. Nici mai mult nici mai puţin.

Leadership: Ţi-ai propus să stabileşti sursele cunoaşterii autentice şi să determini valoarea cunoştinţelor tale prin raportare la o experienţă de sine care îţi dă un nou tip de trăire?

A avea acces la întreaga ştiinţă, a porni în căutarea ei şi a ţi-o însuşi pe deplin, ca pe-o comoară închisă cu peceţi, este o îndeletnicire foarte rentabilă. Şi foarte căutată cu precădere în rândul celor mai eruditţi oameni. Dar numărul acestor căutători spre absolut, al acestor *sobresaliente* care nu se opresc niciodată din creştere, se ridică tot mai mult, ca valurile mării, pe o plajă pustie. Căci rareori se întâmplă, în sânul omenirii, ca un ins să fie mai mult decât ceea ce i-a fost dat, oricât de entuziast ar fi în căutările sale.

Mecanismul care înlesneşte puternic legătura **om-leadership**, funcţionează în baza a două componente: ştiinţa şi cunoaşterea. Ştiinţa de a deveni cine vrei să fii şi cunoaşterea de a-ţi gestiona noul statut, personalitatea nou formată. Dar acestor două componente le lipseşte, categoric, a treia: echilibrul. Iar echilibrul este dat de „mesajul din sticla" adusă de valurile vieţii.

Când mergi prea departe cu cercetarea necunoscutului, când amesteci prea multă ştiinţă şi cunoaştere în practicile tale, ai toate şansele să naufragiezi cândva pe o insulă pustie. Singurul tău ajutor, singura ta şansă de revenire la normal, este mesajul din sticlă: " *Întoarce-te la tine. Întoarce-te la viaţă.* " - un răgaz al reînnoirii tale, o pauză între cele două reprize: a căutării şi a îndoielii, a cunoaşterii totale şi a încercării de a regăsi bunul cel mai de preţ: starea de satisfacţie.

Leadership: Îndrăzneşti să compui o lucrare de o indubitabilă calitate și coerență, în care sunt trecute cele mai importante momente din viaţa ta, într-o interpretare care pune în lumină revelaţiile ştiinţei care te motivează?

Leadershipul, l-am definit la unul din webinarii ca un ansamblu de procedee, mijloace bine definite şi transmisibile, destinate să ducă, în condiţii de abordare corectă, la rezultate optime. Totodată leadershipul este compus dintr-un set de transformări de situaţii şi decizii, de faze, de relaţii, menite să asigure o dezvoltare durabilă a societăţii. Deci, reprezintă o pârghie în realizarea unei înţelegeri între cele două laturi: dimensiunea umană şi cea social-economică.

Până astăzi, termenul de leadership s-a resimţit de pe urma întrebuinţării sale în câmpul unei aprecieri morale, cognitive, uneori greşite, a personalităţii celor ajunşi în funcţii înalte, privitoare şi la nivelul de pregătire a acestora. Pentru multă lume, leadership înseamnă a executa cu abilitate anumite operaţiuni, misiuni, potrivit unui ansamblu de norme unanim acceptate.

Pentru mine, foarte pe scurt, leadership înseamnă transformare.

Iar transformarea începe cu tine însuţi, plecând de la punctul prezent, şi ajungând până la punctul maxim de evoluţie. Iar acest punct maxim de evoluţie, ca un râu care se scurge în mare, înaintează odată cu fluxul de ştiinţă şi cunoaştere pe care îl acumulezi, odată cu fluxul continuu dintre a primi şi a da mai departe, între a accepta că eşti în aceeași barcă cu restul lumii şi a respinge cu tot dinadinsul că eşti diferit.

O punte între evoluţie şi crah, echilibru perfect între " *a fi* " şi "*a deveni* ", intersectând mai multe arii ale vieţii, este hotărâtoare pentru "Omul" din tine.

A fi om, aşa cum te-a plăsmuit natura, nu un robot, nu o fiinţă "laterală", superioară prin iscusinţa cu care mânuieşte ştiinţa şi cunoştinţele avansate din vreun domeniu sau altul, este o artă pe care unii, deşi sunt fiinţe umane, nu o stăpânesc. A fi "Om" este prima cerinţă a leadershipului îndreptat spre drumul cel mai bun.

Singura lucrare de calitate pe care o poţi compune din revelaţiile ştiinţei apelate în momentele cheie ale vieţii este o consecinţă a renunţării la ceea ce e absolut necesar să faci cu ceea ce ştii şi să te concentrezi la ceea ce simţi despre ceea ce ştii în momentul prezent.

Principiul evoluţiei către absolut aduce în prim plan acea minimalizare a valorii omului, a celuia care nu reuşeşte să dea *une signification merveilleuse* vieţii sale. Dar care, mânat de cele mai adânci imbolduri, inspirat de cele mai puternice idealuri, încearcă să atingă Gloria încununându-se cu laurii superiorităţii.

Insişti a înţelege ceea ce pare de neînţeles? "Omul din tine" este o consecinţă a curiozităţii tale faţă de tot ceea ce te înconjoară, faţă de legile într-o stare continuă de schimbare care guvernează lumea?

Îţi accepţi limitele şi mergi mai departe cu tine însăţi, în prezentul care este cel mai important? Sau tinzi să fii asemenea unei fiinţe superioare, a cărei întreagă, singură bogăţie este ştiinţa?

Ceea ce dă preţ vieţii este obiceiul de a te retrage mereu din imperiul aparenţelor păstrate între imperativele ştiinţei şi sentimentul prevenitor al limitărilor gândirii abstracte, încercând să te ridici la esenţe.

Eşti un om care se îndreaptă spre propria condamnare, încercând să înţeleagă absolut totul, făcând abstracţie de bogăţiile vieţii? Sau eşti omul care iubeşte viaţa şi micile ei miracole, şi o trăieşte cu demnitate şi bucurie?

Opreşte-te la jumătatea drumului. Nu continua să urci până acolo unde nu ţi-a fost dat să ajungi. Oferă un sens şi o continuitate propriei tale transformări, fără să-ţi salţi ştiinţa la o înălţime care ţi-ar putea periclita menirea de a fi "Om".

P.S. Numai atunci când vom şti să întrebuinţăm cu adevărat viaţa, numai atunci când viaţa îşi va deschide porţile grele ale imensei sale raţiuni, numai atunci când vom învăţa să ne însuşim splendida mecanică a timpului, cu toate dimensiunile sale, cu toate formele sale care se învârt, se rostogolesc şi se rotesc impunând noi graniţe şi noi orizonturi - numai atunci se va micşora distanţa care ne desparte de adevărurile neştiute, numai atunci vom putea înţelege pe deplin, sau cel puţin vom putea întrezări răspunsul la marile mistere ale omului şi ale universului.

Principiul fluid al ştiinţei tăinuite

On August 25, 2018

Nu poţi să dirijezi o lume întreagă într-o direcţie nouă de evoluţie dacă nu schimbi coordonatele majore ale ştiinţei pe care îţi plasezi imaginea personală.

Dintotdeauna am fost preocupat de tâlcurile adânci ale lucrurilor, de proprietăţile lor cele mai surprinzătoare, încercând să le pun într-o perspectivă mai amplă încât să fac dovada autonomiei mele expresive într-o artă fără egal. Asemenea marilor chimişti le-am găsit o formulă de integrare în configuraţia unei lumi fără margini, un teritoriu plin de mister care schimbă radical conceptul de identitate, un loc înalt în care exişti doar prin erudiţie, clarviziune, competenţă interpretativă, spirit iscoditor, profunzime şi rafinament.

Materia invizibilă, fermentată în condiţiile date de complexul activ al elementelor epistemologice, dinamica controlată a unei reflexivități care reclamă nevoia de rigoare intelectuală şi de coerenţă emoţională, ce se vrea a fi constructivă prin amestecarea lucrurilor divine cu cele naturale, ce este sacru cu ce e profan, toate acestea rânduiesc "activitatea în roşu" de finalizare a unei căutări de ordin artistic.

Desigur, mă veţi întreba dacă nu cumva am tras învăţături din exemplele altora, în sensul de a mă consacra unei supravegheri neobosite şi atotcuprinzătoare asupra izvoarelor altor curente de gândire, sau cum am reuşit să-mi păstrez capacitatea de a privi totul prin ochelarii subiectivităţii în ciuda culorii timpului, a senzaţiei de existenţă a unei mari absenţe sau a plăcerilor trecătoare.

Vă răspund că influenţa lumii din jur, presiunea constrângerilor sociale în așa-numita conștiință morală, se manifestă în special asupra reacţiilor în stare de inacceptare a vederilor prea înaintate asupra relaţiilor dintre viaţă, creaţie şi poveste, care uneori se dovedesc a fi nişte iluzii fără niciun miez în ce priveşte utilizarea mijloacelor de exprimare scriitoricești.

Cu alte cuvinte, dacă te încrezi în părerile altora nu-ţi vei mai putea închipui viaţa fără ei, şi deci vei rămâne captiv în realitatea lor, vei trăi experienţa călătoriei lor, fără să-ţi foloseşti propria raţiune, intuiţie şi experienţă spre a-ţi afirma individualitatea şi de a te îndepărta de conformismul contemporan.

Leadership: Îţi integrezi experienţa de viaţă în planul cunoaşterii esenţiale a TOTULUI prin valorificarea relaţiei dintre anticiparea unei noi direcţii a artei şi realităţile unei lumi diagnosticate cu sindronul dependenţei de creştere a Egoului?

Cum se întâmplă destul de adesea, dată fiind mai cu seamă tendinţa de a face ştiinţă pe înţelesul tuturor cu scopul de a o face populară, chiar dacă efectul presiunilor de ordin metodic asupra planului textual devine sensibil în cazul reacţiilor ce decurg din descompunerea activului "PRIMA VEDERE", mă lovesc constant de realităţile aceleaşi lumi pe care o exploraţi şi voi în căutarea de noi forme şi idei.

Dar, nu pot să accept nălucirile îngrozitoare ale teoriilor prea generale, umbre dichisite care flutură la suprafaţa zonei de memorie a timpului scurs din trinitate, împreună cu posibilitatea deja epuizată a întâmplărilor petrecute în succesiunea logică dintr-un text aruncat anapoda în interiorul literaturii de avangardă.

În imediata vecinătate a învăţăturilor cele mai alese, pe cât de folositoare pe atât de greu de

deprins, toate sacrificiile îndurate cu stoicism se rezumă la fixarea estetică a unei poveşti în mintea oamenilor. Procedeu explicat prin modificarea structurii complexului activ care determină micşorarea sau creşterea reacţiei de descompunere a deja-creatului, adică a elementelor constitutive ale unei realităţi cognoscibile.

La fel ca vechii alchimişti care s-au apucat să întemeieze cu puţine date o filozofie a formei şi formulei narative, făcând numeroase experienţe de distilare a plămezii fermentate, ajungând până la a întări legătura covalentă dintre intermediarii reactivi ai vieţii şi intensificatorii emoţionali, am reuşit să mă adăpostesc sub autoritatea unui artist care îşi extinde nelimitat conceptele despre inteligenţa şi creativitate.

Egoul meu se află în tot ceea ce scriu şi nu e niciodată suprasaturat de nuanţele unei adevărate pasiuni pentru transformarea nisipului din clepsidra de aur.

Leadership: Poţi să asiguri accesibilitatea unei opere ce poartă drepturi de autor printr-o interogaţie asupra înţelesului propriei personalităţi validate prin reperele prilejului de a te situa în centrul unei avangarde triumfătoare?

Un bun prieten, de profesie informatician, mi-a lăudat azi dimineaţă realizările în materie de inovare în contextul acestei lumi în schimbare. Mi-a spus limpede, dar într-un chip pe care doar artiştii îl pot transmite, în imediata vecinătate a unei rostiri ce se exprimă prin gustul pentru frumos, calitate şi originalitate:

- Nicu, ai ajuns la un nivel atât de înalt, încât toată lumea a ajuns să te invidieze. Prin aplicaţia ta web lansată sub brandul personal: www.neculaifantanaru.com, ai făcut dovada capacității suficiente de a pune în aplicare toate avantajele tehnologiei în materie de limbaj de programare, design şi conţinut. Singura întrebare care merită atenţie ar fi aceasta: până unde eşti dispus să te aventurezi în căutarea unor noi dimensiuni ale actului cognitiv?

Cum oare ai reuşit să înveţi atâtea lucruri şi să le aplici atât de bine fără ajutorul nimănui?

Asemenea unui chimist ce caută să determine calculul mişcării particulelor solide în diferitele forme ale substanţelor, tu ai ştiut să utilizezi ca nimeni altcineva ştiinţa cea mai aleasă a secolului 21, combinând limbajele de programare: html, php, java, cu reguli de design, SEO, CSS, data analysis, content marketing, text processing. etc. Ai ştiut să le combini precaut, fără îngâmfare. De asemenea, eşti considerat un maestru în ceea ce priveşte folosirea sintaxei "Regex". De fapt, aplicaţia ta a făcut înconjurul lumii şi devine pe zi ce trece tot mai accesată de zeci de mii de utilizatori în fiecare lună.

Şi nu doar atât. Ai făcut dovada unei iscusinţe aproape dumnezeieşti, dar arătând o fineţe a gustului pentru frumos cum numai artiştii sunt capabili. Cu certitudine, ai fost cel mai bun student pe care l-a avut vreodată universitatea Alexandru Ioan Cuza, de când a fost ea înfiinţată şi până în prezent. Dar ai fost un autodidact, un iluminat de cărţi care a dispus de setea sfântă de îmbrăţişare a ideilor artistice de: "adâncime a spaţiului", "conștiință ca stare a materiei", "natura vie" sau "iluzie a realităţii".

Leadership: Te apleci asupra sensurilor existenţei tale percepută ca informaţie de ordin particular ce pune în valoare esenţa unei gândiri validată enciclopedic?

Cu mare chibzuinţă, cu răbdare şi intuiţie ţi-ai întrecut absolut toţi colegii, toate generaţiile dinaintea ta, şi nu există profesor care să dovedească mai multă pricepere în utilizarea ştiinţei, a tehnologiilor informaţionale, branding, marketing, storytelling, etc. Iar acum, în secolul 21, noţiunea de "Leadership" a devenit unanim sinonimă cu brandul tău personal:

"Neculai Fântânaru".

E o mândrie dreaptă, nu trufie din partea ta. O cerinţă importantă din partea conştiinţei tale, esenţa unei gândiri validate metafizic prin care le oferi celorlalţi o bucăţică din tine, reperul primordial de orientare a unei înţelegeri care începe cu *"ştiu ce pot"* şi se continuă cu *"am cu ce"* de care se leagă prilejul de a purcede, pe cont propriu, la reevaluarea unor aspecte variate ale operei poetice.

Ai ştiut să farmeci lumea cu graţia elocinţei tale, datorită preocupărilor savanto-scriitoriceşti, cu talentul pus în slujba activităţii inginereşti din domeniul informaticii, prin erudiţia cea mai temeinică pe care ai pus-o în serviciul cordialităţii, a nevoii de a înţelege ceea ce e dincolo de înţelegerea obişnuită, încât întreaga activitate a tuturor cadrelor didactice păleşte până la dispariţie în faţa vizibilităţii tale în lume, datorită internetului.

În mod sigur ai fost favorizat de cadrul cunoştinţelor enciclopedice asimilate pe tot parcursul vieţii, ele contribuind la formarea unei personalităţi multilateral dezvoltate.

Să nu uităm că ştiinţa de care se leagă numele tău, reperele de orientare ale unei culturi peste măsură de delicioasă şi fremătătoare, asemenea unui felinar care luminează în bezna unei lumi confuze şi complexe, este încredinţată cu nădejde ideii de "întipărire" în memoria colectivă a unui mod inedit de a cuprinde şi a înainta o prodigioasă învăţătură.

În timp ce unii folosesc în chip propagandistic renumele unei instituţii doar pentru interes personal, fără a avea nicio altă pârghie cu care să se facă remarcaţi, tu ai devenit cunoscut în toată lumea strict prin intermediul brandului personal. Când oamenii vor să afle noutăţi din domeniul conducerii, ei nu caută pe internet universitatea cutare, facultatea cutare, profesorul cutare. Ei caută doar "Neculai Fântânaru".

Numele tău, sinonim cu marea ştiinţă a conducerii, a devenit mai important şi mai cunoscut în întreaga lume decât orice universitate. Din acest motiv valoarea ta este cu adevărat BIG. Cel mai probabil, sensul existenţei tale echivalează cu o neîncetată explorare a gândirii cuprinsă între conştientizarea valorii de sine şi experienţa de gestionare a cunoaşterii orientată spre evoluţie.

Leadershipul este acel „The Big Picture" care răspunde la acel "So What" al unui Brand care sintetizează într-un spirit profund şi puternic esenţa unei ştiinţe fără margini, dar greu de însuşit.

Principiul fluid al ştiinţei tăinuite se aplică numai în cazul unui proces de branding care se încadrează între două coordonate majore: imaginea de sine, compatibilă cu autoritatea unui artist care îşi extinde nelimitat conceptele despre inteligenţă şi creativitate, şi învăţătura cea mai înaltă extrasă din ceea ce trăieşti prin intermediul unei arte care se doreşte revoluţionară.

Principiul himerei

On Aprilie 10, 2010

Nu-ţi închipui că eşti un lider dacă treci în fruntea oamenilor.

Cel înţelept este întotdeauna foarte chibzuit în gândire şi acţiune, ia decizii bune şi este foarte atent în tot ceea ce face. Dar eu, îndrăznesc să spun, că nu am dat dovadă de o adâncă înţelepciune în acea zi.

Mă aflam la munte împreună cu prietenii mei. Organizasem un paintball în pădure. Ne-am împărţit în două echipe, echipe care nu aveau niciun conducător. Aşa că eu, cu o bucurie de nedescris, însufleţit de o sete nepotolită de aventură şi de o formidabilă dorinţă de senzaţional, m-am autoproclamat lider în echipa în care am fost repartizat după tragerea la sorţi: „Urmaţi-mă pe mine". Mintea îmi spunea, iar inima înflăcărată îmi repeta, că voi fi capabil să-mi împing echipa spre victorie.

Dar chiar din primul moment, după ce a început acţiunea, am comis greşeala de neiertat. Fără să caut să discern, să am răbdare şi să iau hotărârea cea mai avantajoasă, ci cuprins de o stare de exaltare fără seamăn, încât nimeni şi nimic nu m-ar fi speriat, m-am năpustit cu înverşunare, primul, în mijlocul luptei, chiar atunci când inamicul a rupt rândurile. Astfel am ignorat cu desăvârşire cea mai importantă regulă a războiului: în timpul luptelor, mai ales într-un moment de primejdie, conducătorul armatei trebuie protejat. El trebuie să stea în spatele frontului, nu să iasă în linia întâi, căci planul de bătălie se afla în mintea lui.

Primul ochit, primul lovit. Ei bine, din cauza acelui simţământ de bucurie egoistă m-am condus pe mine însumi la eşec. Timp de două minute am fost învăluit de o ploaie de bile de vopsea. Mare noroc am avut că nu m-au nimerit toate. Până să riposteze coechipierii mei, ce se aflau la momentul respectiv cu circa zece metri în spatele meu, am fost ţinta preferată şi perfectă a adversarilor.

Nici nu m-am gândit că mi se va putea întâmpla aşa ceva, am avut un sentiment fals de securitate. Iar din pricina judecăţii mele strâmbe, echipa a pierdut. Degeaba m-am crezut apt pentru a fi lider, căci rezultatele au fost foarte slabe, sub orice aşteptări. Toţi coechipierii mei, care la început poate că totuşi mi-au acordat încrederea lor, într-o măsură mai mică sau mai mare, au fost dezamăgiţi în final de prestaţia mea.

Leadership: Necesitatea creării şi menţinerii unei autonomii de decizie, provoacă o permanentă tensiune între dimensiunea maximă de autenticitate şi dimensiunea maximă de predestinare?

Nu mi s-a recunoscut, în mod precis, poziţia de lider. Înveşmântat de loialitatea mea faţă de ceilalţi coechipieri şi pătruns de convingerea fermă că voi fi omul zilei, m-am sfătuit numai cu mine însumi şi cu nimeni altul cum anume să procedez, acesta a fost primul pas greşit. Apoi am pornit la atac cu un spirit rebel la fel ca un kamikaze aflat într-o misiune sinucigaşă care se năpusteşte cu toată puterea, cu toată viteza, cu toată fiinţa lui, şi spre surprinderea tuturor, direct în punctele forte ale inamicului.

Dar nu am făcut nicio convenţie cu membrii echipei mele şi nu le-am prezentat niciun plan de acţiune, cum ar fi fost normal, şi deci nu mi s-a recunoscut, în prealabil, în mod precis şi netăgăduit, poziţia de lider - fiind doar în mod tacit acceptată. În cuvinte elocvente şi cu adevărat sincere, nimeni din echipa mea nu mi-a solicitat vreun sprijin, eu am încercat să vin în sprijinul lor, din propria iniţiativă, punându-mi voinţa la o încercare destul de grea.

Două dimensiuni caracterizează leadershipul. Dimensiunea maximă a valorii pe care ţi-o conferi prin condiţia de autenticitate, obţinută printr-o poziţie de înţelepciune. Iar ea este la fel de primejdioasă ca dimensiunea maximă a valorii de predestinare pe care ţi-o atribui prin înflăcărarea pe care te bizui în momentele de maximă încordare emoţională.

Prima dimensiune te ajută să simţi şi să gândeşti lucruri adânci şi complexe înainte să faci un compromis sau un sacrificiu, dar nu-ţi conferă posibilitatea de a te simţi "divin", de a te simţi în largul tău, de a-ţi dezlănţui energia debordantă, de a-ţi dezlănţui latura esenţială capabilă să săvârșească acte de mare curaj.

A doua dimensiune, care te ține captivat până la ultima literă a nemaiîntâlnitului, te face să crezi că eşti singur, asemenea unui erou care încearcă să învingă un sistem ce se arată a fi mai puternic decât el. În acest caz prezenţa ta e mai mult decât suficientă ca să-ţi înfrunţi demonii. Îţi dă posibilitatea de a te îndoi, posibilitatea de a face o greşeală, posibilitatea de a căuta şi experimenta latura unei lumi care îţi aparţine cu totul.

Leadership: A fi cu un pas înaintea celorlalţi oameni este o investiţie eligibilă în conformitate cu valoarea pe care ţi-o acorzi într-un "Virtual Word" sau într-un ataşament colectiv?

A fi autentic înseamnă să te exprimi ca un învingător prin imaginea pe care o proiectezi în termenii rezultatelor de tip material, cognitiv, atitudinal si afectiv, şi nu în termeni de "Cu cine trebuie să mă bat ca să-mi arăt vitejia". Înseamnă să te conectezi cu ceea ce exprimi în manifestul pe care îl susţii în fiecare creaţie sau în orice acţiune, formulat astfel: "Eu sunt ca voi", şi nu "Eu sunt voi".

Ca lider eşti responsabil de acţiunile şi deciziile tale. A fi cu un pas înaintea oamenilor nu te transformă în lider. Nu-i poţi determina pe oameni să te urmeze şi să te ajute să-ţi îndeplineşti viziunea, prin propria lor voinţă, acordându-ţi încrederea lor totală dacă, din dorinţa de a te situa într-o poziţie dominantă, te împotmoleşti primul când eşti pus fata în faţă cu un obstacol.

Dimpotrivă, vei fi umbrit de o adâncă tristeţe pentru că nu te-ai ridicat la înălţimea aşteptărilor, apoi ei îţi vor împărtăşi sentimentul fiindcă au pierdut. Dacă le dăruieşti de la bun început sprijinul şi devotamentul, fie că ţii mult la ei şi le doreşti să aibă parte de cât mai multe succese, fie doar pentru că te împinge interesul, fie pentru că un orgoliu ridicol, nemăsurat, te face să stărui asupra obţinerii cu orice preţ a unei victorii - vei putea câştiga respectul lor, ataşamentul lor, şi astfel vei avea o mai mare certitudine că vor contribui la atingerea scopului pe care ţi l-ai propus. Însă te vor putea urma cu toată inima numai dacă îi conduci spre victorie.

Leadershipul reflectă atitudinea de acceptare a unei poziţii de înaintaş prin renunţarea la calitatea de unică autoritate, nu prin creşterea gradului de captare a atenţiei care "vinde" o imagine.

O echipă fără un lider e singură, fără putere. De la cine o să primească membrii ei ajutorul pe care îl aşteaptă cu atâta nerăbdare, cu atâta drag, cu atâta ardoare, dacă te pui singur în primejdie în momentele cele mai critice şi eşuezi?

Dacă ocupi o poziţie de manager şi din cauza deciziilor tale greşite bazate pe emoţii, dorinţe, subiectivism, şi nu pe raţiuni, compania ajunge în pragul falimentului, toţi angajaţii vor rămâne fără sprijin moral şi financiar. În loc să fii perceput drept singurul lor ocrotitor, singurul lor sprijin, o călăuză sigură, demnă de urmat, vei apărea în ochii lor drept o povară nefolositoare, un erou grăbit din pricina căruia întreaga companie are de suferit.

Aşadar, degeaba te consideri lider. Dacă nu le dai oamenilor motive reale să aibă încredere în tine, vei rămâne doar o persoană cu intenţii bune, în niciun caz un dătător de speranţe.

Un lider trebuie să fie recunoscut de cei din echipa prin faptele sale precedente. A te autointitula lider, chiar dacă eşti cu un pas înaintea celorlalţi, denotă o încredere absolută în propriile forţe ce rezultă dintr-o supraevaluare subiectivă, superficială, ce te va conduce inevitabil la eşec.

P.S. Un lider fără echipă este la fel ca şi echipa fără lider.

Principiul înălţării fără cădere

On Aprilie 22, 2024

Tot ceea ce alegi să fii într-o clipă de interiorizare, este ceea ce te înalță spre iluminare.

La concursul de duminică, semi-maratonul din Iași, am susținut-o pe sora mea, Oana Fântânaru, nu doar în calitate de frate și suporter, ci și în calitate de martor al lumii din care ea face parte.

Asta presupune a privi dincolo de simpla activitate fizică, întrucât la fiecare concurs Oana modelează fiecare mișcare după chipul și asemănarea unei arte supreme: arta autodisciplinei și a determinării neclintite. Fără a se rezuma doar la a alerga, Oana explorează cu fiecare pas un orizont vast al pasiunii sale, transmutând trudă în inspirație pentru cei ce o privesc, asemenea unui Van Gogh al epocii moderne care redă nu pe pânză, ci în cronica timpului însuși, esența luptei umane cu limitele propriei existențe.

Sprintenă şi totodată delicată, uite-o cum întrece, cu fiecare pas săltat, câte un alt alergător pe traseu. Şi alergarea ei, aşa cum ochii mei o percep, printr-un fel de *Aceratustin Ilhetinula Uriyaadys*, triumful spiritului asupra corpului, devine o stare de absenţă a Egoului, încât tot ceea ce contează este mișcarea pură și libertatea.

Prin fiecare pas, alergătorul se îndepărtează mai mult de constrângerile sale interne. Iar Oana, care trăieşte mereu într-o lume a devenirii continue, tot trecutul desfăşurându-se într-un prezent al acţiunii, ea pe care suflul energiei libere o dezvăluie spiritual în ideea fuziunii perfecte între eleganţă şi potenţial, a devenit stăpâna unirii a doua contrarii: puterea fizică şi pacea mentală.

Leadership: Refuzul tău de a te mulțumi cu ceea ce este imediat transformă fiecare cursă într-o căutare a sublimului, având în vedere impactul emoțional al unei opere de artă ce se dezvăluie treptat?

Măiestria în a uni contrariile reflectă o înțelegere avansată a propriului sine. Ca să o spun drept, Oana a evoluat de la plimbările timide prin parcul Copou, uşor şi fără ambiţii, până la maratoanele dezlănțuite ale prezentului, fiecare kilometru fiind străbătut cu acea flămândă sete de depășire a propriilor umbre. Este o evoluție ce poartă amprenta unei voințe fără margini, a unui spirit ce refuză să se mulțumească cu "imediatul", întrucât caută mereu să atingă întregul potențial al unui artist însufleţit de conștientizarea naturii sale sensibile.

Nici nu mă amăgesc crezând că Oana aleargă doar pentru medaliile efemere ale competițiilor, mici atenţii ale unei nebunii de-o clipă, amintiri ale unei lumini orbitoare ce-n viața fiecăruia răsare. Nu, chiar nu. În tot cazul, alergarea este pentru ea un sanctuar, o odă adusă introspecției, un dialog continuu cu sinele ei cel mai profund, pe linia unei treziri spirituale de forma: "*Valorile autentice nu se rezumă la recompense exterioare, ci la împlinirea interioară".*

Fiecare respirație în ritmul pașilor ei sprinteni, înălţaţi asemenea aripilor învelite în lumină, este un răspuns la întrebările existențiale, fiecare transpirație este o lacrimă de bucurie a descoperirii de sine.

Gândesc că poate într-o zi spiritul ei de alergător își va întrece Ego-ul, ajungând astfel la o pace interioară și la armonia pe care arta o întruchipează. Grozav, nu? Acumularea emoțiilor

intense într-o operă artistică poate sugera un punct culminant de catharsis, unde tensiunea acumulată se eliberează într-un moment de clarificare profundă. Nicicând n-aş fi mai emoţionat s-o regăsesc învingătoare pe Oana decât văzând-o transpunându-se într-o receptivitate spirituală, pe care arta o numeşte "sinestezie concentrată".

Leadership: Pentru tine, "raritatea în unitate" poate să reflecte o viziune care transcende imediatul, dezvăluind un moment de catarsis care îți deschide orizonturile către un sens mai profund al vieții?

O raritate în unitate investită cu o convingere pasională. În momentele acelea de rară însufleţire, când oboseala pare să-i cântărească fiecare mișcare, o văd cum se avântă înainte, tot mai mult, cu acea pasiune a pictorului care își vede opera prinzând contur, înfruntând obstacolele naturii – ploaia, vântul, frigul – cu o înverșunare a celor ce știu că fiecare pas înainte este o victorie asupra limitelor personale, *una dimostrazione di forza interiore che sfida le condizioni esterne*.

Ochii mei îi urmăresc fiecare pas, îi măsoară fiecare mișcare, cuprinși de grandoarea unui fragment din cartea "Arcul de triumf" de Erich Maria Remarque:

"Ochii ei scânteiau ca în lumina felinarelor din stradă; mă puteam uita, pierzându-mă într-un miraj. Îi puteam simţi răsuflarea. Vibra spre mine, cu o admiraţie nevăzută, uşoară, pregătită şi plină de încredere - o viaţă stranie, într-o clipă la fel de stranie. Pe neaşteptate i-am putut simţi sângele. Urca şi urca, dar era mai mult decât atât, era viaţă, de o mie de ori blestemată şi binecuvântată, de atâtea ori pierdută şi tot de atâtea ori redobândită - cu o oră înainte asemenea unui ţinut limitat, arid, stâncos, fără nimic mângâietor - şi acum ţâşnind, ţâşnind parcă din nenumărate fântâni, răsunând şi apropiindu-se de clipa tainică în care cineva, care nu mai credea deloc în puterea ei - era iarăşi omul de mai înainte, ieşind din mijlocul valurilor pe ţărmul oceanului, alb şi strălucitor. Întrebare şi răspuns în acelaşi timp, toate acestea urcau mereu şi furtuna se aduna în ochii ei."

Leadership: Simțind vibrația și admirația nevăzută în răsuflarea altcuiva, poţi să interpretezi această conexiune subtilă ca pe un dialog continuu cu universul tău interior?

Sunt anumite lucruri ce se trezesc în noi, încet, în tăcere și nu ne dăm seama de ele decât dacă avem dorința de a ne împinge pe noi înșine la extrem, de a izbucni într-un val de energie pură, vindecătoare, impusă parcă de un univers care ne împinge până la limite și ne forțează să sărim până dincolo de barierele autoimpuse.

Aşa este şi Oana în alergare, un pasionat de meditaţie într-un popas al spiritului neînfrânt, tăcerea dintre două bătăi, clipa de pauză dintre două respiraţii sacadate, cea mai sinceră şi cea mai tainică formă a fiinţei, tresărirea domoală a veşniciei în însăşi vremelnicia lumii. Şi chiar mai mult de atât, este o formă de ascultare de sine, care se încadrează în formele comunicării unui artist cu penelul, dezvăluind esența sensibilitătii creației prin fiecare pas.

Runningul, cu toate frământările lui, are un surâs blând, mai ales pentru un zbor de lebădă fără glas, străbătând lin un cer plin de furtună. Iar tu, Oana, ne-ai arătat tuturor că suntem arhitecții propriilor stări de spirit, în timp ce ne formăm destinele cu mâinile goale ale voinței. Tu ai realizat o valoare afectivă: “reziliența”, tu ai dat tot ce un artist are mai bun şi mai sublim în sine: “puterea de interiorizare”. Cumva, în simțămintele tale s-a născut forța saltului spre înălțimi, care și-a arătat, în limitele sale înflăcărate, adevărata măsură.

Să extragem din tine ce este mai preţios: opera ta. Pictura ta evoluează odată cu tine, transformându-se cu fiecare trăire într-un mediu transparent prin care privitorului i se oferă o poveste.

Leadership: Pot contribui nişte fragmente de viață neobișnuite la conturarea memoriei universale, transformând fiecare moment trăit într-o părticică eternă a experienţei de receptare artistică?

Pulsul mult mai rapid cheamă tăcerea în perimetrul sufletului, unde arta, lipsită de orice tensiune, vorbeşte în şoaptă despre emoţii netrăite. Încă mă gândesc ce să adaug acestei convingeri, încât să obţin un soi de *Ismaotuss Apentaichter Unuselsica*, o fărâmă de viaţă strălucind în memoria universală. Aş spune-o astfel:

O floare s-a mutat într-o grădină nouă, cu ajutorul penelului, producând o nuanţă unică numită: "radiant orchid". În cazul acestei nuanţe rezultatul e acelaşi: o vreme perfectă.

Oana, creează-ți întreaga viață în jurul acestei nuanțe delicate, așa cum un pictor, pătrunzând profunzimea culorilor, își conturează opera de artă pe inspirația oferită de natura din jur. Iar când liniștea te cheamă în adierea vântului, nu o întrerupe cu cuvinte, ci lasă-te purtată de aripile sugestive ale unei perspective unice: *"tot ceea ce aleg să fiu într-o clipă de interiorizare, este ceea ce mă înalță spre iluminare."*

Aşa cum un pictor își pregătește întotdeauna pânza înainte de a începe o capodoperă, și tu trebuie să-ți pregătești mintea și sufletul înainte de a porni în căutarea unei experiențe profunde și semnificative. În artă, la fel ca în alergare, contează la fel de mult compoziția propriu-zisă, cât şi firescul care se degajă din ea.

În leadership, experiența sinelui de a se manifesta autentic precede compoziția propriu-zisă a realității care te împinge la acțiune.

Principiul înălțării fără cădere se referă la starea căpătată în urma unui efort al cărui efect de spiritualizare te transformă într-o forță armonioasă. Este aşa de greu? Prin fiecare cursă și fiecare antrenament, Oana ne reamintește că limitele sunt doar construcții ale minții, iar orizonturile artei sunt infinit extensibile prin efortul de expresie autentică a unei trăiri profunde.

Principiul încrederii absolute

On Ianuarie 30, 2010

Nu te încrede în tine atâta timp cât nu eşti sută la sută sigur că rezultatul va fi în favoarea ta.

Un roman care mi-au plăcut foarte mult este „ *Magul* ", de Wilbur Smith. Am să mă limitez de această dată la un anumit fragment pe care l-am recitit chiar azi, şi pe care îl socotesc foarte important.

Faraonul Nefer Seti o invită într-o zi pe frumoasa prinţesă Mintaka, de care era îndrăgostit până peste cap, la o vânătoare de raţe. Stabiliseră de comun acord să se ia la întrecere: care reuşeşte să doboare mai multe raţe va fi declarat cel mai iscusit vânător.

Nefer, hotărât s-o impresioneze pe prinţesă, şi foarte încrezător în abilităţile sale de vânător iscusit, a decis să folosească suliţe în loc de arcul cu săgeţi, fiind sigur că ea nu va avea forţa şi îndemânarea să mânuiască armele grele, ceea ce i-ar fi oferit un avantaj.

Primul stol de raţe sălbatice se ivi neaşteptat, fiecare pasăre avea un semn distinct în vârful ciocului. Descriseseră un cerc larg în văzduh, apoi începură să coboare aliniate. Îşi întinseră aripile apoi plonjară, pierzând rapid din înălţime, trecând peste barca lui Nefer, apoi a lui Mitaka.

Nefer, îşi calculă bine momentul, apoi brusc se ridică în picioare şi trimise suliţa spre pasărea conducătoare, dar nu reuşi decât s-o rănească în aripă. Raţa căzu în apă şi înnotă iute astfel încât să nu poată fi prinsă. Nefer a ratat o mare şansă.

Modalitatea de a-ţi păstra o bună reputaţie este să te asiguri că eşti ceea ce vrei să pari într-un context de concurenţă la nivel de supra-apreciere personală.

Din barca alăturată, a prinţesei, una după alta, două săgeţi se ridicară să întâmpine grupul de rate răzleţe, şi sunetul dublului impact răsună limpede în toată laguna. Imediat după aceea, două păsări căzură inerte, cu aripile libere şi capetele atârnând, ucise curat, în aer, în momentul în care le atinsese săgeata. Căzură în apă şi rămaseră acolo, plutind nemişcate.

Nefer şi-a dat seama instantaneu că numai un arcaş experimentat ar fi putut, la înălţimea şi viteza aceea, să nimerească două raţe, una după alta, într-un timp atât de scurt. Mitaka era mai mult decât o prinţesă, era un vânător redutabil.

Din acel moment, Nefer, buimăcit cu totul, mai întâi de prima sa ratare şi apoi de neaşteptata îndemânare dovedită de Mintaka la tras cu arcul, şi-a îndreptat atenţia numai spre barca în care se afla ea. În loc să se concentreze asupra propriei performanţe, a tras tot timpul cu ochii la ce se întâmplă în cealaltă barcă. Rezultatele fură cât se poate de nesatisfăcătoare. Pierzându-şi simţul măsurii, fiind dezorientat şi simţindu-se umilit, a aruncat celelalte suliţe direct, fără să se mai concentreze, ori prea devreme sau prea târziu, până ce mâna îi obosi atât de tare şi fu cât pe ce să-şi luxeze încheietură.

În final, Mintaka fu socotită învingătoare. Nefer şi-a supraapreciat competenţele în faţa unui fapt aparent neînsemnat "impactul afectivităţii", fiindcă îi lipsea exerciţiul de a lua în calcul un aspect ce ţine de domeniul psihologiei. Femeia este un caracter confuz, greu de perceput.

Prin urmare, supraaprecierea este calitatea oamenilor care aşteaptă un destin măreţ, trăind doar prin impozanta privelişte a unei promiţătoare longevităţi, fără să ia în considerare prevederile întâmplărilor neprevăzute.

Motivul afirmării tale profesionale are ca prim constituent al abordării leadershipului dezvoltarea simţului onoarei, pentru a nu face din momentele de maximă importanţă o tendință greşită de orientare?

Cine ştie, poate că dacă nu i-ar fi rătăcit mintea, dacă în profunzimile fiinţei sale nu ar fi existat încă de la început acel sentiment de superioritate, Nefer ar fi câştigat întrecerea. Dar la vederea iscusinţei prinţesei, el a fost cuprins de sentimentul de inferioritate, de o teamă bine înfiripată până în măduva oaselor că nu o va mai putea impresiona. Pierdut în gânduri negre, a devenit tot mai neatent şi a început să rateze lovitură după lovitură. Iată ce se întâmplă atunci când porneşti de la ideea preconcepută că este imposibil să se întâmple ceva ce nu e voie să se întâmple.

Nefer a crezut, fără nicio îndoială, că vânătoarea este o ocupaţie strict masculină, iar o femeie nu ar putea avea suficientă experienţă, dexteritate, fler şi un aplomb fără egal. Dar el nu o cunoştea deloc pe prinţesă, nu avea de unde să ştie că, de fapt, ea se antrena zilnic, de foarte mulţi ani, că participase la numeroase expediţii de vânătoare, şi că mânuia arcul mai bine decât foarte mulţi bărbaţi. Iar Mintaka a ştiut să profite de avantajul pe care îl avea, iscusinţa, experienţă, antrenamentul. Aşa este, învingător este acela care ştie să profite de calităţile sale şi de slăbiciunile adversarului.
